ASTROLOGY.

G. WILDE WILL CAST YOUR HOROSCOPE.

Prefiguring health, wealth, weal or woe, the stars have in store for you. For Terms send stamped envelope.

742 MR. WILDE'S TESTIMONIALS.

[From "BORDERLAND."]

TILDEM. WUT STEAD on Mr. Wilde's Test Horoscope :--"It would be difficult for anyone to ignore the test horoscope of Mr. Pearson, of *Pearson's Workly*, which is published in this number, from the pen of Mr. Wilde, and to deny that it is possible for an astrologer to use his curious science in such a way as to obtain extraordinarily accurate results, the above the test horoscope he casts. No doubt mistakes are both as to the character and history of the person whose horoscope he casts. No doubt mistakes are frequent, and there may be more misses than hits, but a series of hits such as Mr. Wilde seems to have made in the case of Mr. Pearson is hardly explicable on the hypothesis of mere coincidence."

Extract from the Christmas Number, 1895, of "Pearson's Weekly":

Mr. Pearson says :---"I do not think there is the least doubt about the fact that Mr. Wilde had not the smallest knowledge of the personality of the individual whose horoscope he was casting. . . . So many points in this horoscope are so curiously accurate, that I thought almost anybody would probably be interested in glancing through it."

W. T. Stead, Esq., Editor of the "Review of Reviews," writes :-

"Mowbray House, Norfolk Street, Strand, London, W.C.

' August 23rd, 1893.

"G. Wilde, Esq. "Dear Sir,—I yesterday read over your horoscope to the subject of it—the test case, I mean. You You will be pleased to know that both he and I were immensely staggered by your success. You had hit off with extraordinary accuracy so many events of his past life that it was quite wonderful, —I am. yours very truly. (Signed) "W. T. STEAD."

"Mr. Wilde was extraordinarily successful with Mr. Pearson, for whom he did a very elaborate horoscope, which was right as to the past, and has since been verified in relation to matters which were then in the future."—Borderland, October, 1897.

A TEST HOROSCOPE.

See Review of Reviews, May, 1900.

Mr. Stead says: "I print Mr. Wilde's horoscope of Mr. Pearson. . . . It will be noticed that in nine cases out of ten Mr. Pearson thinks the astrologer was right. Mr. Wilde predicted financial success, estates, and riches for this unknown gentleman, who writes, 'It looks as though this were going to come true.'"

Just Published. Price 7/6 post free.

CHALDEAN ASTROLOCY UP TO DATE" By GEO. WILDE.

NOTES ON THE

TWO HUNDRED AND FIFTH ISSUE

OF

MOORE'S ALMANAC.

Once more I have to chronicle the "passing" of an old year and the birth of a new; and once more I would direct the attention of my intelligent readers to the remarkable evidence which *fulfilled* Predictions afford of the wisdom of studying the Stars more carefully in regard to worldly affairs.

We cannot actually see into the Future, but the Heavens do much to assist those who choose to consult them, to make their plans to best advantage in order to meet whatsoever it may please the Divine Being. to bring about.

OCTOBER, 1901.

FRANCIS MOORE.

Physician.

NOTES ON THE YEAR.

During the first five centuries after the birth of During the first five centuries after the birth of Christ, the Christians, comparatively few in number, and scattered among different and distant peoples, used in their records no other mode of expressing dates than those which prevailed amongst the nations of which they severally formed a part. In 532 A.D., when their numbers and importance had augmented, Diony-sius Exiguus, a monk of Scythian birth, proposed that all Christians should adopt the epoch of the birth of Christ as their point of departure in birth of Christians should adopt the epoch of the birth of Christ as their point of departure in counting time and in the expression of dates. This rendered necessary an investigation into the question of the date of that event. Dionysius made historical researches, and finally assigned the birth of Christ to the 25th day of December

in the 753rd year from the foundation of Rome (but this is now admittedly erroneous).

It might have been expected, therefore, that the first Christian year would commence on that day, and that its anniversary would be the first day of each succeeding year. It was, however, found inconvenient to change the commencement of the year, and it was resolved to adhere to that of the year, and it was resolved to adhere to that of the Roman year heretofore used by the church —that is, to the 1st January, and that the first year of the Christian era should be the 754th year from the foundation of Rome. According to the mode of reckoning finally adopted, there-fore, the year 1 A.D. was that which commenced at the moment of the midnight between the 31st December in the grant year, and the 1st January December in the 753rd year, and the 1st January in the 754th year of Rome.

	Dominical Letter	for the	year 190	2	E	Solar Cycle for the year	ar 1902	•••••	7
6	Golden Number	,,	,,			Roman Indiction			
5	Epact	"	,,	••••••	21	Julian Period, Year of	,,	•••••	661 5

The Dominical or Sunday Letter is the letter of the alphabet used to indicate the incidence of the Sundays in the Ecclesiastical Calendar—thus in 1902, the first Sunday will fall on the fifth day, and the letter E (5th letter) will fall opposite the first and every following Sunday for that year. The Golden Number is the number of years

elapsed in the Lunar Cycle or period of 19 years, at the end of which period the same aspects of the moon recur within an hour and a half of the same times.

The Epact is a number representing the age of the moon on the first day of the new year. The Solar Cycle is a period of 28 years,

Digitized by Google

.

within which the Dominical or Sunday Letters, and those that express the other festivals, &c., return in the same order as before.

The Roman Indiction is a period of 15 years, used by the Romans for the time of

taxing their provinces. The Julian period contains 7980 years (being the Lunar Cycle of 19, the Solar Cycle of 28, and the Roman indiction of 15 multiplied together). The Julian period is reckoned as having begun 4713 years before our era, so that the year 1902 corresponds with 6615 of that period. It is used in astronomical and chronological calculations throughout the world.

MOORE'S FULFILLED PREDICTIONS OF 1901.

PREDICTIONS.

"Expenditure on arms and armaments will be increased, ironworkers and gunsmiths will have a busy time."—Almanac, 1901, p. 5.

"At Capetown the indications are that a strong force of British troops will be required to overawe the wily Boers. In the Cape Parliament factious opposition to British rule will cause great excitement."--Ibid.

"There will be trouble and sorrow among the highest in the social scale."—*Ibid.*, p. 6.

FULFILMENT.

In the first quarter of 1901, great expenditure on arms and armaments was incurred. The Army estimates were i sued on the 1-t of March to the amount of £87,915,000. Strong reinforcements, to the extent of 30,000 men, were sent to South Africa, where fighting took place from time to time. Owing to the seditious action of certain members of the Cape Parliament, the Constitution was suspended.

The death of Queen Victoria, and, a few months later, that of the Empress Frederick of Germany, the Princess Royal of Great Britain, plunged the country into the profoundest grief and mourning.

"Debates in Parliament become acrimonious, especially concerning education and religious differences." —*Ibid.*, p. 12.

"The education question will again be hotly debated. In the House of Commons, a scene of discord is threatened in the latter half of this July."—*Ibid.*, p. 23.

"At Constantinople, the situation will soon be so threatening as to cause alarm to the Sultan and the Pashas."—*Ibid.*, p. 6.

"In France, great political excitement and martial ardcur."—*Ibid.*, p. 25 (August).

" Excitement in France.

"Saturn worries the Sultan of Turkey."—*Ibid.*, p. 27 (September).

"At Capetown, the opponents of the supreme power will soon bring trouble on the Government again."— *Ibid.*, pp. 6, 7.

"Mercury retrograding in Cancer unsettles the New York markets and gives South African stocks a downward impulse about the middle of this July."--Ibid., p. 23.

Digitized by Google

The debates in Parliament in the late session on education and religious questions were exceedingly acrimonious.

On the 29th of July two Irish members were suspended for the rest of the session for creating disorder, and another was suspended next day.

The troubles in Albania, the fire at the harem, and the dispute with France caused great alarm to the Sultan and Pashas.

On the 22nd of August the French Ambassador was recalled from Constantinople. At the beginning of September, French warships were ordered to the Bosphorus. There was great excitement in France in August and September over the Turkish dispute and the coming of the Tsar to witness the manœuvres of the French Army.

The guerilla fighting, wrecking of trains, and the cruelties practised by some Boers brought trouble again, in the summer quarter, on the Government.

Great depression, almost a panic, in New York on the 15th of July; and a reaction on the South African market in London.

PREDICTIONS FOR THE YEAR.

The Sun enters Capricornus, December 22nd, 1900, at 0h 36m p.m.

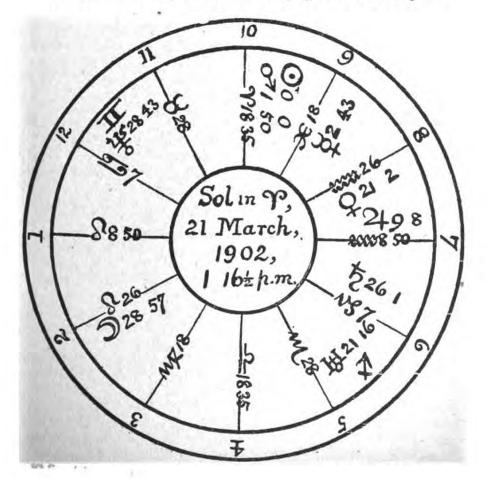

Saturn, Jupiter, and Mars are near together in the sign Capricornus, and in the tenth house of the heavens. The winter quarter will be a critical time for Great Britain, and Europe generally. The price of foodstuffs and coal will be far too high for the slender purses of the industrial people. The financial condition of our country is very unsatisfactory, but it will gradually improve as the New Year opens out. In Ireland affairs will improve more satisfactorily; and her exports will increase and prove more remunerative.

At Calcutta the outlook is not altogether good, for, although trade will improve, India will have some strong rivalry to compete with; on her borders restless and marauding tribesmen will force on some fighting and involve the country in much expense; and epidemic sickness will afflict more than one great province.

At Capetown a manifest improvement will quickly set in; but taxation is more likely to be increased than diminished in Cape Colony; and some restlessness of brigand-like Boers will be the cause of warlike proceedings in the Transvaal.

At New York a tide of prosperity is promised; and gambling in stocks and shares will run riot. In the southern States racial feeling will bring on some violent proceedings, lynching of negro malefactors and attacks on prisons.

The Sun enters Aries. March 21st, 1902, at 1h 162 p.m.

Diminized by Google

5

PREDICTIONS FOR THE YEAR.

The Sun is so near to the violent planet Mars at this ingress that prospects of a thoroughly peaceful and prosperous spring cannot be said be good. Progress can be but slow while martial influence remains in force and the expenditure on arms and armaments, on an increased army and navy, and the paying of interest on the national debt, will neutralise the gain of an increased revenue. The opposition of the Moon to Mercury threatens some loss of trade by foreign competition; fortunately, the presence of Jupiter in the seventh house promises increase of exports to our Colonies, and a more peaceful time in South Africa.

At Calcutta the figure of the heavens is favourable to the advancement of Indian trade. But the Sun with Mars in the sixth house shows that plague and fever will not yet be gone from the crowded cities, but will claim many victims.

At Peking changes in the administration and danger to the Emperor of China are indicated; and a failing revenue will render the payment of the indemnity to the Western Powers very difficult and slow.

At Capetown some public troubles are pre-signified, and the national finances will take a long while to improve and to become sound again. Adverse weather will entail loss on farmers in most districts of Cape Colony.

At Melbourne a prosperous quarter is indicated. An epidemic amongst children will cause some alarm, and it is likely to take the form of either scarlet fever or smallpox, but sanitary measures and isolation of cases would minimise the danger of an epidemic becoming widespread.

At New York the figure of the heavens, although favourable, does not warrant the prediction of such prosperity as was enjoyed by the United States in the spring of last year. Some big Trusts and financial syndicates will be in a shaky state, and this will re-act on the Money Market. The Munroe doctrine will entail increase of the American navy.

Total Eclipse of the Moon, April 22nd, 1902.

This eclipse is partly visible here. It falls in the second degree of Scorpio, a sign productive of earthquakes, so that we shall soon hear of severe shocks in the south-east of Europe.

Partial Eclipse of the Sun, May 8th, 1902.

This eclipse is invisible here, being visible only in the Pacific, and partly in New Zealand. Its effects on our antipodean colony will be injurious in the way of drought to the interests of farmers.

The Sun enters Cancer, June 22nd, 1902, at 9^h 15^m a.m.

The figure of the heavens for the moment of this Solar ingress is propitious, as Venus culminates in Taurus, promising a good harvest in Great Britain and Ireland, a healthy season, and national festivity.

At Berlin and Vienna Mars is so close to the meridian that the blood tax and the prices of the necessaries of life will crush the spirit of the Germans and render them less able to compete in their industries with their American rivals. Great increase of emigration to America will follow.

Original from NEW YORK PUBLIC LIBRARY At Calcutta the planetary configurations indicate a renewal of epidemic disease, in the western part of India chiefly. Otherwise a favourable period is promised.

At Capetown the planetary influences are very good for Cape Colony and Natal, where the natural resources of the land will be highly developed.

At Melbourne the public health will require strict attention to sanitary measures. Places of amusement will prosper. Schools will be developed largely.

At New York some adverse influences will occasion anxiety as to foreign trade; but, on the whole, a favourable quarter is promised for the States.

The Sun enters Libra, September 23rd, 1902, at 11^h 55^m p.m.

The Sun is in the lower meridian; and an opposition of Mars with Jupiter has lately passed. We must not, therefore, be too sanguine as to the prospects of peace and plenty for Great Britain this coming autumn, and we must rigidly scan the horizon of foreign politics and scheming. Either religious or educational questions will cause much discussion, possibly both.

At Berlin Mars is nearly rising at this ingress, an influence which renders rulers and people impatient of foreign action clashing with their interests, and is not conducive to the maintenance of peace.

At Calcutta the influences are very promising for the advancement of India, and her increase of trade will gladden the hearts of her merchants and people.

At Capetown, everything would go well for South Africa but for a small band of irreconcilable Boers who endeavour to upset law and order in the Transvaal.

At Melbourne Mars is too strong for a very successful quarter to be hoped for by farmers and cattle-breeders.

At New York the planetary influences tell of increase of prosperity for merchants and traders; but farmers are likely to suffer to some extent through adverse weather. Ambitious political leaders will bring some hitch or dispute to pass with a foreign nation.

Total Eclipse of the Moon, October 17th, 1902.

Being partly visible here this eclipse is significant of colonial troubles and much sickness of a feverish character, for the Moon is in Aries, the sign ruling England, and afflicted by Saturn.

Partial Eclipse of the Sun, October 31st, 1902.

This eclipse is also partly visible here and is significant of trouble in the East of Europe, and of some loss of trade. The trouble in the East will probably take the form of earthquakes; and rebellion of down-trodden people against their cruel oppressors may be expected. Massacres in Armenia are too likely to be renewed. In fact, Turkey in Europe and Asia will be in a state of seething discontent.

Original from NEW YORK PUBLIC LIBRARY THE first columns of the left page show the day of the month, week, and year—the figures in the latter column indicating the number of days from the beginning of the year.

The column headed "Notes" shows the Sundays, Church festivals and Holy days, Aspects (as to which see below), Astronomical and other notes. (The Saints' days printed in italics are not kept by the Church of England.) The right ascension of the principal planets at certain dates is also given. The thick rule on left of this column indicates the duration of the various Law Sittings.

" Moon " The columns headed show—1st. The moon's age (that is, the nearest number of days, without fractions, that have elapsed since the preceding New Moon). (This is sometimes useful in estimating roughly the time of High Water in localities where the usual tide-tables are not available.) 2nd. Duration of Moonlight from 6 to 9 and 9 to 12 p.m., and 12 to 3 and 3 to 6 a.m. (It will of course not be lost sight of that at certain periods of the year the rising or setting of the Moon must occur in daylight. As the object of the column is solely to show the hours when there is Moonlight, no notice is taken of the fact that there may also be Daylight.) 3rd, 4th, and 5th : The hour of rising (Greenwich mean time), when the Moon is due south and has attained her greatest altitude (astronomically when the Moon Transits or passes the meridian), and the hour of Setting. In these columns where a waved rule line occurs it indicates a period post *meridiem*, whilst a dotted rule line indicates ante meridiem.

The columns headed "Sun" show —Ist. The Rising and Setting of the Sun (Greenwich time). 2nd. Equation of Time, or the period which is needed to adjust civil to astronomical time. 3rd. The Sun's declination.

On the right page is given the time of High Water at London Bridge, morning and afternoon, the time of Ecliptic conjunction with the Moon of principal planets, Weather Forecasts (as to which see below), Voice of the Stars for the month, and Notes on Birthday influences.

The dates of very High Tides are accurately predicted as a useful warning for localities adjacent to the river. Precaution is, however, urgent only when atmospheric disturbances are prevalent, more especially high north winds and a low state of the barometer with continued rain. A very high spring tide is unusually sensitive, and is much affected by these disturbing influences.

Explanation of the Aspects. Conjunction, 6. - Two heavenly bodies are in conjunction with one another when both have the same Semi-quartile. — Two longitude. heavenly bodies are in mutual semiquartile when the difference of their longitudes is exactly 45°. Sextile, *. -A difference of longitude of 60°. Quintile.—A difference of longitude of 72°. Quartile or Quadrature, D. -A difference of longitude of 90°. Trine, \triangle .—A difference of longitude of 120°. Opposition, 8.-A difference of longitude of 180° (half the circle). Sesquiquadrate.---A difference of longitude of 135°. Biquintile.-- A difference of longitude of 144°. The major aspects are the conjunction, sextile, quartile, trine, and opposition. The minor aspects (determined by Kepler, the great astronomer) are the 30°, 36°, 45°, 72°, 135° and 144° . The conjunction varies in nature according to the natures of the planets forming it. The sextile and trine are benefic ; the quartile and opposition are malefic

> Original from NEW YORK PUBLIC LIBRARN

Digitized by Google

8

aspects. Of the minor aspects the 45° and 135° are malefic, the rest are benefic.

When two planets have the same declination they are said to be in *parallel declination*, and this, like the conjunction, varies in nature according to the natures of the planets. The conjunction is weak when the conjoined planets are far apart in declination.

NATURES OF THE PLANETS. — Jupiter and Venus are benefic planets, Mars, Saturn and Uranus are malefic. Mercury, the Moon, and Neptune are variable, partaking of the nature according to the planet with which either may be configurated. The Sun is a benefic, except when greatly afflicted by quartile or opposition with Saturn, Mars, or Uranus.

Weather Forecasts. — These are based on the configurations of the Sun with the planets, mutual aspects between the planets, and the crossing of the equator by the heavenly bodies. They relate to the general state of the weather and the In places where the atmosphere. average annual rainfall exceeds 24 inches, more rain may be expected than is foretold. Forecasts of gales apply chiefly to the coasts, but they will sometimes be verified inland. Astro-meteorology is not yet perfected, so that more precise predictions of variations of weather than those given in the calendar cannot yet be made; but it is based on repeatedly observed coincidences of certain changes of weather with astronomic phenomena. Kepler expressed himself certain, from his observation and experience, of the action of the great planets on the earth's atmosphere. The Solar aspects with the great planets operate on the atmosphere for a period of from two to four days. The conjunction of Venus with Saturn produces rain, fog, or snow, according to the season; often gales, and always lower temperature. The conjunction of Mercury with Mars

produces strong wind or storms. Cardan observed this effect, and Kepler testified to it. Astro-meteorology is well worth attentive study.

LUNAR INFLUENCE.—This influence on mundane affairs varies according to the nature of the body with which the Moon forms configurations in her rapid course. When the Moon is in sextile or trine with the Sun it is a good time for asking favours, seeking employment, or travelling for health. With Saturn, for dealing with farmers, miners, and old people; for purchasing houses or land; and for planting or sowing. With Jupiter, for opening new business, dealing with merchants, bankers, and rich With Mars, for consulting people. surgeons, engineers, and mechanical With Venus, for courting, people. pleasure-seeking, marrying, engaging maidservants, visiting friends, and taking lessons in music. With Mercury, for seeking employment; writing letters or articles, or books; dealing with printers, editors, publishers, or lawyers; for sending children to school for the first time, bin ling apprentices, and travelling. With Uranus, for scientific work, dealing with electrical engineers, or for learning astronomy or astrology. Astrologers find that affairs begun under such configurations proceed more successfully than at other times-Solomon found that "to everything there is a season, and a time for every purpose under the heavens." It is important to ascertain, however, that the moon has no evil aspect (quartile or opposition) or conjunction with either Saturn, Mars, or Uranus at the time selected, or the good influence will be nullified.

WEATHER CHANGES.

In the pages devoted to WEATHER CHANGES the Records of Barometer, Temperature and Rainfall are for the 59 years from 1841 to 1900; those for Sunshine for the 19 years from 1880 to 1899.

JANUARY XXXI Days

Awake ! my Muse, once more, and tune thy string, That I may of the various seasons sing : Now, stormy Winter reigns,—the sullen king Does from his icy throne fierce tempests fling : The piercing winds from northern regions blow, The frozen ground is covered o'er with snow.

In Janiveer, if sun appear, March and April pay full dear.

WEATHER FORECASTS.

January enters with variable, gusty weather, severe in the north ; 3rd to 5th, fair ; 6th, snow-showers ; 7th and 8th, fair ; 9th to 11th, snow-showers; 12th and 13th, fair; 14th to 16th, gusty, variable; 17th and 18th, unsettled; 19th to 23rd, fair; 24th and 25th, gales and downfall; 26th, fair; 27th, breezy, unsettled; 28th to 31st, mostly fair.-GALEs are probable on or about the 9th and 10th, 14th, and 25th.

VOICE OF THE STARS.

The New Year opens gloomily in Europe, but more favourably in Great Britain. The blood-tax in Germany, Austria and Russia deepens the resentment of the populace. In France discord and discontent place the ruling powers in a quandary; and a violent demonstration against the French Government is extremely probable soon after the 9th inst. British trade and commerce will be extended notwithstanding the disturbed state The passage of Mars through the sign vourably on Russia and Prussia. The Tsar of the Continent. Aquarius reacts unfavourably on Russia and Prussia. finds it difficult to keep the military party in check, and to satisfy the demand of his subjects for a Constitution. The state of the East alarms the rulers of Russia and Austria, and the outlook for the holders of Turkish bonds is very serious. The capital of Belgium is disturbed by the progress of Saturn in the sign Capricornus; plots and strikes will soon be in evidence Towards the end of this month fires and explosions will there. do great damage in Russia, Prussia, Piedmont, Hamburg and Paris will suffer either from a storm or conflagration; Bremen. and from popular discontent.

BIRTHDAY INFLUENCES.

The best birthday-anniversaries in the opening month of this year are the 15th and 19th, the 13th and 28th lanking next. stroke of good fortune is promised for those persons whose anniversary falls on the 15th; they will gain in health and social position, and will benefit by advantageous friendships. The 9th has a strange mixture of good and evil influences, bringing bereavement or illness, and some advantages at the same time. Those who are engaged in banking or connected with religious life, and whose birthdays fall on either the 9th, 10th, 15th, 19th, or 28th inst. will meet with advancement or preferment, attended by some drawback unless they act very prudently.

WEATHER FORECASTS.

February opens with seasonable weather; breezy and rather unsettled on the 2nd and 3rd; 4th and 5 h, fairer: 6th, { u-ty, variable; 7th, fairer; 8th and 9th, snow or rain; 10th to 12th, wintry; 13th, fairer; 14th to 17th, wintry; 18th, gusty and un ettled; 19 and 20th, fairer; 21st and 22nd, unsettled; 23rd, gusty; 24th and 25th, fair; 26th, rain or snow; 27th and 28th, wintry.—GALES are probable on or about the 11th and 18th.

VOICE OF THE STARS.

Jupiter enters the sign Aquarius on the 7th day and remains therein for the rest of the year ; this brings gain, advantage, and a measure of prosperity to Prussia, Russia, Sweden, and all the other places ruled by the eleventh zodiacal sign. It will take some time, however, for Russia to recover from the drain on her resources caused by the recent failure of crops and military operations; and sickness and death cannot be expected to show any diminution, this month, in the Tsar's dominions. In Turkey, plots, murders, and executions are the order of the day. The North-Eastern States of America suffer from a blizzard about the 10th to 15th days. In England accidents and explosions will be unusually numerous about the middle of this month. On the Stock Exchange excitement and rapid fluctuation in prices may be expected. In France political discord leads to violent scenes. In Greece events tend towards a financial crisis. In Mexico political disputes are rife and prove fatal to some prominent men. South American Stocks are depressed owing to unsatisfactory trading and internecine quarrels.

BIRTHDAY INFLUENCES.

The celestial influences are very favourable on the 7th, 14th, 17th and 24th days: but those persons at whose birth the Moon was in the fourth degree of the sign Pisces, ascending or setting, will be liable to meet with accidents or danger by fire about the middle of this month. The 14th brings offers of marrige to single young ladies whose anniversary falls thereon, but a risk of misunderstandings or quarrels withal. The 18th brings an active and busy time and journeying; also changes, which may not prove quite so advantageous as expected. Let those whose birthday falls on the 6th or 19th be careful of accidents, and avoid crowds and dangerous places. The 16th, 19th, 20th and 28th days are unfavourable for speculative risks and removals, and rather inimical to health.

WEATHER FORECASTS.

15

March enters in a wintry manner; 3rd, gusty and changeable; 4th ard 5th, fairer; 6th and 7th, gusty and cold; 8th, fair; 9h, downfall, snow in places; 10th, variable; 11th and 12th, cold and windy; 13th, wintry; 14th. fairer; 15th and 16th, fair; 17th and 18th, wintry; 19th, fair; 20th, gusty, changeable; 21st, fair; 22nd, unsettled; 23rd, changes; 24th, fair; 25th and 26th, showery; 27th and 28th, cold, unsettled; 29th to 31st, fair, milder.—GALES are probable on or about the 11th, 21st and 27th.

VOICE OF THE STARS.

At the New Moon of the 10th of March Mars is very near the Sun and in quadrature with Uranus rising: this indicates a martial spirit predominating here and on the Continent; and the outlook is not so peaceful as could be wished, for the Eastern Question looms large on the horizon again. Violent deeds and massacres are too probable in the dominions of the Grand Turk, and in Bulgaria and Servia. Accidents and feverish disorders will be numerous and fatal to an extraordinary extent, in the South and West of England, this month. In Austria-Hungary Czech and German will again be antagonistic to each other, and their disputes will lead to fatal rioting. On the 19th of March, Mars re-enters his chief dignity, the sign Aries, bringing honour Our enemies will have to be more to the arms of Great Britain. respectful than they were during the Transvaal War, for the increase of our splendid navy will prove to them the futility of their hopes for our downfall. Jupiter benefits Prussia and her monarch by his steady progress through the first decanate of Aquarius; and Russia participates in the gifts of Jove to some extent, although the rate of mortality from fever in the latter country will rule high.

BIRTHDAY INFLUENCES.

March 7th, 8th, 15th, 25th and 29th are favourable birthdayanniversaries. The 7th and 8th are good for professional and business people; and the 7th brings offers of marriage and presents to young ladies. The 8th is good indeed for those who had the Moon in either the 6th or 18th degree of Aquarius at their births, especially for those who are musicians, or engaged The 12th is trying; either ill-health, in artistic business. financial loss, or bereavement threatening those whose birthday falls thereon; let those who are mariners exercise extra caution The 20th brings a crisis. The 29th is good. in navigation.

ASTRONOMICAL NOTES.

- Mar. 1, Length of Day, 10^h 47^m; 31st, 12^h,46^m. ,, 5, Sun's time of Semi-passage, 1^m 5'0^s; Semi-diameter, 16' 8'8''.
 - 1.2
 - so, Sun's time of Semi-passage, 1^m 4'3^s; Semi-diameter, 16'4'9".
 I, Moon in Apogee; 13th, Perigee; 29th.
 - Apogee.

Mercury is in Aquarius, but rises too near the Sun to b: well seen this month.

Digitized by Google

- Venus is a Morning Star in Aquarius, and near the Moon on the 7th, and at greatest brilliancy on the 20th.
- Mars is in Pisces, setting about with the Sun, being in conjunction on the 30th.
- Jupiter is in Capricornus, rising about an hour before the Sun.
- Saturn is in Sagittarius, rising about two hours before the Sun.

APRIL XXX Days.

The farmer views with joy the budding trees, And flowers, whose fragrance mixes with the breeze; Around the hive surveys the busy bees, And in the fields the growing wheat and peas : Beholds, when Sol descends below the west, Bright Jupiter and Mars in ruddy vest.

MOORE'S

Till April's dead change not a thread.

WEATHER FORECASTS.

April comes in fine and warm ; 3rd, showers ; 4th, gusty, variable; 5th, fair; 6th, changes; 7th, cold, unsettled; 8th, gusty ; 9th to 12th, showery and cold ; 13th to 17th, fair ; 18th to 21st, cold, downfall; 22nd and 23rd, fair; 24th, breezy, variable ; 25th and 26th, fair ; 27th and 28th, unsettled, cold ; 29th, stormy ; 30th, fair .- GALES are probable on or about the | 18th and 24th.

VOICE OF THE STARS.

April the 8th brings a New Moon in the 18th degree of Aries, attended by Mars, in the ninth mansion of the heavens, which is ominous of a busy time for the Law Courts, and accidents to ships and on the great railways. The public health will not be good, rheumatism and bronchitis prevailing; suicides among young people will be sadly numerous. In the latter part of this month stirring events will be witnessed in France, and the French military party will carry matters with a high hand. News from the United States will be exciting, for our American cousins will have an awkward dispute on hand; and will find criminals and desperadoes very troublesome indeed. Wall Street will be alternately excited and depressed ; and our Stock Exchange will feel the reaction. Some German bankers will feel the strain very near to breaking-point. Political affairs in Europe will become greatly entangled; and disputes between capitalist employers and workmen will be very embittered. Military conscription and the cost of the great European armies will press more hardly than ever on the various nations, producing widespread discontent and impatience to a dangerous extent.

BIRTHDAY INFLUENCES.

The 1st is a favourable anniversary, benefiting martial men and merchants especially. The 3rd is promising of advantage The 11th and 12th bring benefits unexand advancement. pectedly. The 18th and 19th bring sickness or losses; those persons whose anniversary fall: on either of these days should avoid change and removal, as far as possible, this Spring, and should beware of being deceived and defrauded. The 24th threatens accidents, financial losses, and quarrels. The 28th brings a hitch or disappointment in love affairs. The 27th and 29th bring financial difficulties, changes, and debility of health. Persons who were born at the beginning of February now gain by the transit of the benefic Jupiter over their Sun's place. Those who were born on or near the 18th of January are warned to act very cautiously in all things and to safeguard their health.

ASTRONOMICAL NOTES.

Apr. 1, Length of day, 12^h 50^m; 30th, 14^h 40^m. ,, 5, Sun's time of Semi-passage, 1^m 4'3^s;

MAY XXXI Days.

MOORE'S

How beauteous now appears the verdant plain, Refreshed by sunshine and mild showers of rain; With joy we listen to the warbling train; Each songster pours his sweet melodious strain; While daisies, cowslips, wide adorn the ground, And violets spread their fragrant odours round.

A drye May and a dripping June bring all things into tune.

WEATHER FORECASTS.

May enters fine and warm; 4th, gusty, variable; 5th, rainy; 6th and 7th, fair, warm air; 8th to 10th, showery and cold; 11th, fair; 12th, rainy; 13th and 14th, fair; 15th to 17th, unsettled; 18th, fair; 19th, cold, rainy; 20th, fair and warm; 21st and 22nd, unsettled; 23rd, fair; 24th to 26th, showery; 27th and 28th, fair ; 29th, breezy ; 30th and 31st, fair.—GALES are probable on or about the 6th and 24th.

VOICE OF THE STARS.

May brings Saturn stationary in the 28th degree of the sign Capricornus, which is unfortunate for India and critical for Greece; and ominous of a prevalence of diseases of the respiratory organs in England, especially in the eastern counties. Border troubles will be again rife in India; and plague will carry off The partial eclipse of many victims in the Bombay Presidency. the Sun on the 7th inst. is invisible in the British Isles. New Zealanders will have a view of it, and will soon find that it will effect some important reform in their administration. The trade of Great Britain has a good prospect of substantial increase this Railway interests are on the up line. Parliament will month. debate questions relating to religion in connexion with education; and will be more inclined to improve the housing of the working classes, and to consider a scheme for providing old-age pensions, than hitherto. Old Ireland is likely to be disturbed by the passage of Mars through her ruling sign (Taurus).

BIRTHDAY INFLUENCES.

May 1st and 28th are favourable birthday-anniversaries, bringing valuable presents and improvement in health; and The 4th brings love increase of income to most persons. engagements to the single, marriage to many, and increase of family to the married, during their ensuing year of life. The 7th brings much expense, but some advantages at the same time; let those whose anniversary it is be careful of bronchitis and throat affections. The 18th is favourable to business. The 21st involves people in some pecuniary difficulty, and maybe even legal proceedings. The 24th is ominous of either bereavement or financial loss; business people should be very careful in new ventures; and speculators had best keep quiet for some weeks to come. The 29th brings some good business, but The 30th is apt to produce estrangement of disputes withal. friends and troubles as to employment.

WEATHER FORECASTS.

21

June opens with unsettled weather; 2nd, fair; 3rd and 4th, showery; 5th to 8th, fair; 9th, showers, fine intervals; 10th to 12th, unsettled, thunder; 13th to 16th, fine, heat; 17th, variable, thunder; 18th and 19th, fine; 20th, showers; 21st and 22nd, fair; 23rd, gusty, unsettled; 24th and 25th, fine; 26th, variable; 27th to 30th, fine.—GALES are probable on or about the 11th and 23rd.

VOICE OF THE STARS.

June brings Jupiter stationary in the 18th degree of the sign Aquarius on the 6th day; this phenomenon favours a spell of fine weather, and a very successful season for London. Russia and Prussia will benefit by Jupiter's influence, and will have a good harvest. The entry of Mars into the sign Gemini disturbs Belgium and the United States, in which countries strikes, attended with violence, are very probable. In New York fluctuation in Stocks will be great about the middle of this month. Some notable American will succumb to fate. As Mercury is stationary in the sign Cancer, accidents by water will be numerous about the 11th inst. Political excitement will run high in New York and Holland; and in connexion with African affairs. Spanish affairs will again become entangled soon after the 11th day; and towards the close of this month Spanish priests will fall into had odour with the populace again. An anxious time may be expected in Constantinople, where plots and conspiracies Algeria will also be a scene of excitement. Tunis will abound. is likely to form the bone of contention between two rival Powers. Albania and Bulgaria have their border troubles.

BIRTHDAY INFLUENCES.

June 1st is not favourable to love affairs and domestic happiness. The 5th brings annoyance, and even accidents to some whose natal day it is. The 6th to 8th are good anniversaries, promising improved health and an increasing income. The 11th and 12th threaten financial difficulties, or losses, accidents or illness, according to the horoscope. The 19th warns all who are concerned to beware of quarrels, litigation, and rash conduct. The 23rd is rather critical, especially for those who had either the Sun or Moon afflicted at birth: they should avoid removals, changes, new ventures of a risky kind, and speculative investments for some time to come. The 30th is a favourable birthday.

WEATHER FORECASTS.

23

July comes in somewhat unsettled; 3rd, stormy; 4th to 6th, fair; 7th, some showers; 8th and 9th, fine; 10th and 11th, unsettled; 12th and 13th, fine; 14th to 16th, showery; 17th and 18th, thunder-showers; 19th, fine; 20th to 22nd, fair; 23rd, variable; 24th and 25th, fine summer weather; 26th and 27th, unsettled; 28th and 29th, fair; 30th, thunder-showers; 31st, fine.—GALES are probable on or about the 10th and 18th.

VOICE OF THE STARS.

This month opens with four planets retrograde, viz., Mercury, Jupiter, Saturn and Uranus, which is not good for the public health and well-being. Some epidemic prevails among children in our large towns; fever in Spain and Hungary; plague in the western part of India; and heat-apoplexy in America. Then the opposition of Saturn with the Sun on the 18th day is inimical to the peace and happiness of Holland and the north of Africa. In Albania and Bulgaria assassination and sanguinary encounters are witnessed again. Shocks of earthquake are very likely to attend or quickly follow, in the East of Europe. Otherwise, the affairs of the world appear likely to proceed quietly, and the harvest, generally, should be a good one. There is good reason to hope for an extension of the trade and commerce of Great Britain and her Colonies; and a good prospect of beneficial legislation.

BIRTHDAY INFLUENCES.

July 3rd is not a very favourable birthday-anniversary, and warns all concerned to be very careful in all new transactions of importance. The 12th is more favourable. The 15th brings some domestic anxiety and expense. The 17th to 19th are trying for health or affairs; those of our readers whose anniversary falls on one of these days should act with caution in all things and beware of being defrauded or robbed; and should avoid crowds and dangerous places. The 22nd is a favourable anniversary, promising advancement and success. The 30th is not favourable to speculators and financiers, who should limit their risks as far as possible. On the remaining days of the month the planetary configurations are of opposing natures.

(\$) Saturnmorn. (\$) Jupitermorn. (\$) Marsmorn. (\$) Marsmorn. (\$) Marsaftern. (?) Venus	HIGH TIDES. Aug. 5 ,, 6 ,, 7

WEATHER FORECASTS.

August begins with showery weather; 2nd to 4th, fair; 5th and 6th, fine, heat; 7th and 8th, fair; 9th and 10th, fine; 11th to 14th, variable, some thunder-showers; 15th to 17th, fair, generally; 18th to 20th, fine; 21st and 22nd, unsettled; 23rd, thunder-showers; 24th to 27th, fine; 28th, fair; 29th to 31st, variable, showers in places .-- GALES are probable on or about the 11th, 23rd and 27th.

VOICE OF THE STARS.

August brings Mars into Cancer, the sign ruling northern Africa; and some disturbance may again be expected in either Algeria or Tunis. France and Spain will be turning their eyes on Morocco, and we shall have to safeguard our interests in the last-named country. Banks and financial houses in Holland, Germany, Russia and New York will find their position assailed in an unexpected manner, and some of them will come to grief. Mercury rushes through the sign Leo in sixteen days, thus exciting the French and Italians. The relations between the Government of Italy and the Vatican will be more strained than usual; and in the first ten days of this month much excitement will arise in Rome. In our own country, religious and educational affairs will give rise to acrimonious debates. About the 23rd day critical events arise in Holland and India. Our Foreign Office will be very busy throughout the greater part of this month; and Parliament may be kept sitting later than usual.

BIRTHDAY INFLUENCES.

The 1st day is a favourable anniversary, especially for musicians The 5th and 8th bring some financial difficulty and and artists. much expense; religious disputes will bring some people into The 11th brings changes, and some unexpected gains, trouble. and some anxiety, also. The 18th is a favourable birthday. The 23rd threatens accidents; let those who go down to the sea be very careful when bathing and yachting. The 26th is favour-The 27th is not good for new business or risky ventures. able. The 29th and 30th have more evil than good configurations. The 31st is favourable on the whole, but threatens some weakness of health and some losses.

ASTRONOMI Aug. 1, Lgth. of Day, 15 ^h 24 ^m ; 31st, 13 ^h 38 ^m . , 5, Sun's time of Semi-passage, 1 ^m 6'1 ^s ; Semi-diameter, 15' 47'6". , 20, Sun's time of Semi-passage, 1 ^m 4'9 ^s ; Semi-diameter, 15' 50'1". , 1, Moon in Perigee; 13th, Apogee; 29th, Perigee. Mercury is in Leo; near the Star Regulus on the 16th.	 CAL NOTES. Venus is a Morning Star in Gemini; near Mars on the 1st, and near the Moon on the 1st and 31st. Mars is a Morning Star in Gemini. Jupiter in Capricornus is in opposition to the Sun on the 5th, and visible from sunset to sunrise. Saturn is an Evening Star in Sagittarius.

SEPTEMBER XXX Days.

[MOORE'S

Revolving Time brings every Season round, See! Autumn with ten thousand blessings crowned; On every side the ripening fruits abound, And waving harvests grace the fertile ground : While Providence its bounties thus displays, Shall we not raise to Heaven our songs of praise?

St. Michael's raines stay not long in the skyes.

Mercury is in Virgo, setting shortly after the Sun during the month. Venus is a Morning Star in Leo; near the Star Regulus on the 11th, and the Moon on the 30th. Mars is in Cancer, rising about 1h. a.m. Jupiter is an Evening Star in Capricornus. Saturn is an Evening Star in Sagittarius.

OCTOBER XXXI Days. MOORE'S

28

The swains in yonder fields are busy now, Along the plains they guide the useful plough, The soil prepare, and then the seed they sow ; The maid each morn and evening milks the cow : Towards the end the angry winds arise, The trees are bare, and fogs obscure the skies.

Much rain in October, much wind in December.

WEATHER FORECASTS.

October enters fine and warm; 3rd, showery; 4th to 6th, fine; 7th, variable; 8th and 9th, fair; 10th and 11th, rainy; 12th, cold and variable; 13th, fair; 14th to 16th, cold, downfall; 17th and 18th, fair; 19th and 20th, gusty, variable; 21st, fair; 22nd and 23rd, unsettled; 24th, variable; 25th to 27th, fair; 28th, windy and cold; 29th to 31st, fair.-GALES are probable on or about the 7th, 19th and 28th.

VOICE OF THE STARS.

At the New Moon of the 1st of October the Sun is in trine aspect with the benefic planet Jupiter, and Venus is in the seventh mansion of the heavens or descendant. Affairs will be peaceful for Great Britain during the present month. Prussia and Russia still bask in the rays of Jupiter in their ruling sign-Prussia and France has some difficulties at home; and the Aquarius. public health of that country cannot be said to be good, fever being prevalent. The United States enjoy a prosperous time. Deaths from violence will be rife in some States and in Philadelphia. The total Lunar eclipse of the 17th inst. will be partly visible in England, the Moon setting at 6h. 32m. a.m., Greenwich time, totally eclipsed in Aries 22° 56'. Honours and rewards will be given to our army and navy. On the last day of this month a partial eclipse of the Sun will be partly visible here, soon after sunrise, in Scorpio 6° 59', the Sun and Moon being in ecliptic conjunction at 8h. 14m. a.m., in the twelfth mansion of the heavens. Ireland will have a troublous time again very shortly, and the soldier as well as the policeman will have some serious work to do. An extension of light railways may be expected in the Emerald Isle.

BIRTHDAY INFLUENCES.

October begins a new year famously for those persons whose anniversary falls on one of the first three days; young ladies will marry happily and advantageously; business people will prosper, and physicians and lawyers will do well. The 7th brings excitement, change, and in some instances loss of money or relations. The 11th and 13th are very favourable. The 15th The 19th and 20th brings either trouble or failure of health. bring increase of business and changes. The 24th is advantageous for those who are engaged in the iron industry, or in engineering. The 25th brings a pleasurable time and some advancement. The 26th warns those concerned against dangerous risks and quarrels. The 30th is favourable, yet health may be weak.

WEATHER FORECASTS.

November opens fairly well ; 2nd, misty, fair ; 3rd, showery ; 4th, cold and unsettled; 5th, fair; 6th, mist or rain; 7th to 9th, fair, mild ; 10th, fair ; 11th, gusty, variable ; 12th to 14th, cold air, fair; 15th and 16th, cold, foggy or rainy; 17th and 18th, fair; 19th, showery; 20th to 24th, fair; 25th and 26th, variable; 27th and 28th, fair; 29th and 30th, fog, downfall.-GALES are probable on or about the 11th and 30th.

VOICE OF THE STARS.

November is affected by the Solar eclipse on the last day of October, which is likely to disturb the Eastern parts of Europe physically as well as politically. There is some danger of a religious feud leading to bloodshed. The revenue of Great Britain is not likely to be so good as usual, and taxation presses heavily on the middle classes. A member of the Cabinet fails in health; and another incurs popular displeasure. Spanish affairs suffer from the presence of Uranus in the sign Sagittarius; and Spanish finance is not yet recovering from the depression affecting it of late years. Saturn being direct in motion again in Capricornus afflicts India with sickness, and delays her advance in trade and commerce. Greece is not free from trouble. Mexico has some serious questions to debate ; and is likely to be shaken by an earthquake, at the beginning of this month. Venus passing through Scorpio favours Liverpool, increasing her trade and bringing some public festivity. The ancient town of Reading is smitten with fire as the fiery Mars careers through her ruling sign : let the fire-brigade there be increased in time to deal with a possible conflagration.

BIRTHDAY INFLUENCES.

November 2nd brings some financial difficulty, and much expense, to those persons whose anniversary falls thereon. The 5th is a favourable birthday. The 6th brings some little trouble The 8th is favourable to health and or sickness, temporarily. The 16th should bring farmers a good time; and prosperity. some benefits to others whose anniversary it is. The 20th is good for those who are in employment. The 23rd warns all whom it may concern to beware of dangerous places, and of accidents with firearms. The 25th brings new friends and advantageous help. The 29th is favourable to lovers, and those who are in business connected with music or art; but this day and the 30th bring some troubles or obstacles to surmount.

WEATHER FORECASTS.

December enters cold and misty; 3rd, gusty; 4th, fair; 5th, variable; 6th, fine; 7th, showery; 8th and 9th, fair; 10th and 11th, mist or rain ; 12th to 14th, windy and unsettled ; 15th to 17th, wintry; 18th, fair; 19th and 20th, wintry, 21st, fair; 22nd, fog or rain; 23rd to 25th, fair and mild; 26th to 29th, cold, snow in places; 30th, fair; 31st, unsettled.-GALES are probable on or about the 5th, 13th and 25th.

VOICE OF THE STARS.

December brings a spell of wintry weather rather early in the season, severe in the north, for Saturn was in the fourth angle at the New Moon of the last day of November. Railways in the The death-rate of the aged and north will suffer accordingly. The troubles of Greece will of infants will rise to a high figure. pass into the acute stage towards the end of this month ; and the ruler of that unsettled country will have cause to lament the burden of the cares of State, especially as another rupture with Turkey is imminent. But for the state of unrest in the East, Europe would enjoy a period of repose and calm, and the perfect peace which should be characteristic of Christmas. Mars is still too powerful for mischief, and especially so when passing through the sign Virgo, as he is now doing; and forming his quadrature with the Sun just after the winter solstice, from the sign Libra. The conjunction of Mercury with Venus in the sixth degree of the sign Capricornus takes place too near the Sun to be seen clearly; nevertheless it brings some advantage to the trade of India. Those who trade in Turkey must be prepared for losses.

BIRTHDAY INFLUENCES.

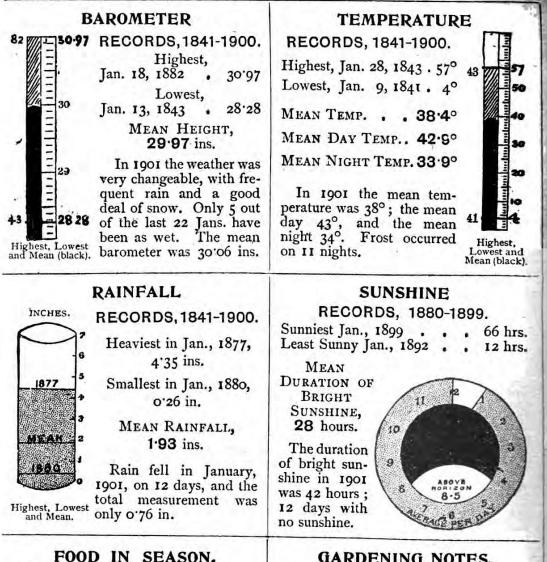

The 2nd day is an unfavourable anniversary, but not to a The 5th and 6th are more favourable, promising serious extent. The 11th new friends, advancement, and increase of substance. brings trouble in love or domestic affairs. The 12th brings a busy time, but not so advantageous as could be desired. The 13th threatens either family loss or financial trouble, or illness, according to the horoscope. The 14th and 15th bring more troubles and losses than gains. The 17th and 18th involve quarrels or litigation. The 22nd is favourable to actors, artists, milliners, and musicians. The 23rd to 25th are not likely to bring a very happy Christmastide. The 28th is a troublous anniversary. The 30th is very favourable.

ASTRONOMICAL NOTES. Dec. 1, Length of day, 8 th 9 ^m ; 31st, 7 th 49 ^m . ,, 5, Sun's time of Semi-passage, 1 ^m 10'3'; Semi-diameter, 16' 15'5". ,, 20, Sun's time of Semi-passage, 1 ^m 11'0'; Semi-diameter, 16' 17'1". ,, 2, Moon in Apogee; 15th, Perigee; 29th, Apoge2. ASTRONOMICAL NOTES. Mercury is in Ophiuchus, and in superior con- junction with the Sun on the 12th. Venus is in Sagittarius, setting shortly after sun- set; near the Moon on the 30th. Mars is in Virgo, rising at midnight. Jupiter is an Evening Star in Capricornus. Saturn is in Sagittarius, setting soon after the Sun.

WEATHER CHANGES-JANUARY.

GARDENING NOTES.

Keep the walks clear of snow; roll occasionally after rain. Make new gravel walks where required; lay new turf and form new flower borders. If weather is open rose trees may be lifted or planted and bulbs still be put in. lf very frosty give extra protection to tender flowering plants in pots. Towards end of month sow radish, spinach, and parsley. Trench, dig, and manure any part of kitchen garden not yet done. Prune fruit trees and plant new where required. Mushroom beds may still be made. Seakale should be covered with note. Chrysanthemums should be prowith pots. Chrysanthemums should be propagated.

HINTS TO FARMERS AND GARDENERS.

Showing Favourable Times for Sowing and Planting.

The following are the most favourable times for *beginning* to sow, plant, or transplant during the year 1902 :---

FEBRUARY.—Begin sowing on the 9th, 10th and 11th days, from 7.50 to 8.40 a.m.; from 9.45 to 10.40 a.m.; and from 1.0 to 2.45 p.m. The 14th and 15th, from 9.30 to 10.30 a.m.; and from 12.30 to 2.30 p.m. The 18th and 19th, from 9.10 to 10.0 a.m.; and from 12.0 to 2.10 p.m.

MARCH.—The 10th, from 6.0 to 6.50 a.m.; 7.45 to 8.45 a.m.; and from 10.45 a.m. to 1.0 p.m. The 13th and 14th, from 5.45 to 6.30 a.m.; from 7.30 to 8.30 a.m.; and from 10.30 a.m. to 12.30 p.m. The 17th and 18th, from 7.15 to 8.15 a.m.; and from 10.15 a.m. to 12 noon. The 21st and 23rd, from 7.0 to 8.0 a.m.; from 9.55 a.m. to 12 noon; and from 3.20 to 6 p.m.

APRIL.—The 9th and 10th, from 5.50 to 6.45 a.m.; from 8.40 to 11.0 a.m.; and from 2.0 to 4.40 p.m. The 14th and th, from 5.30 to 6.30 a.m.; from 8.20 to 10.40 a.m.; and from 1.45 to 4.20 p.m. The 18th to 21st, from 8.10 to 10.20 a.m.; and from 1.20 to 6.55 p.m.

MAV.—The 8th, from 6.50 to 9.0a.m.; and from 12.10 to 7.30 p.m. The 11th and 12th, from 6.40 to 9.0a.m.; and from 12 noon to 7.30 p.m. The 15th to 21st, from 6.15 to 8.20a.m.; and from 11.35 a.m. to 7.30 p.m.

JUNE.—The 7th and 8th, from 5.55 to 7.10 a.m.; and from 10.15 a.m. to 7.30 p.m. The 11th and 12th, from 9.50 a.m. to 8.0 p.m. The 16th to 19th, from 9.35 a.m. to 8.0 p.m.

Digitized by Google

JULY.—The 5th and 6th, from 8.20 a.m. to 8.0 p.m. The 9th to 12th, from 8.0 a.m. to 8.0 p.m. The 13th to 15th, from 7.50 a.m. to 8.0 p.m. The 17th to 19th, from 7.35 a.m. to 7.50 p.m.

AUGUST.—The 5th to 9th, from 6.15 a.m. to 6.45 p.m. The 10th to 16th, from 6.0 a.m. to 6.20 p.m.

SEPTEMBER. — The 2nd to 5th, from 5.30 a.m. to 4.55 p.m. The 6th to 8th, from 5.30 a.m. to 4.45 p.m. The 9th and 10th, from 5.30 a.m to 4.40 p.m. The 11th to 13th, from 5.30 a.m. to 4.20 p.m. The 16th, from 6 a.m. to 4.10 p.m.

OCTOBER.—The 2nd to 5th, from sunrise to 3.0 p.m.; and from 4.30 to 5.10 p.m. The 6th to 10th, from sunrise to 3.0 p.m.; and from 4.10 to 4.50 p.m. The 13th to 15th, from sunrise to 2.30 p.m.; and from 3.45 to 4.20 p.m. The 31st, from sunrise to 1.20 p.m.

NOVEMBER.—The 1st to 7th, from 7.0 a.m. to 1.0 p.m.; and from 2.30 to 3.15 p.m. The 10th and 11th, from 7.0 a.m. to 12.30 p.m.; and from 1.50 to 2.40 p.m. The 14th and 15th, from 7.15 a.m. to 12.20 p.m.; from 1.40 to 2.20 p.m.; and from 3.20 to 4.20 p.m. The 30th, from 7.40 to 11.20 a.m.; from 12.35 to 1.25 p.m.; and from 2.20 to 3.20p.in.

DECEMBER.—The 1st to 5th, from 7.45 to 11.25 a.m.; from 12.30 to 1.10 p.m.; and from 2.15 to 3.10 p.m. The 7th and 8th, from 7.45 to 11.15 a.m.; from noon to 1.0 p.m.; and from 1.55 to 2.55 p.m. The 30th and 31st, from 8.0 to 9.40 a.m.; from 10.35 to 11.15 a.m.; and from to 1.20 p.m.

and the second states a

THE CALENDAR—"OLD" The difference at the present date between what is known as the "Old Style" and the "New Style" Calendars is 13 days. To understand how this difference arises it must be remembered that the Solar Year consists of 365 days, 5 hours, 48 minutes, 48 seconds. In the Calendar known as the Julian Calendar arranged a c aby Julius as the Julian Calendar-arranged B.C. 47 by Julius Cæsar, guided by his astronomer Sosigenes—the year was taken as being 3651 days, and in order to year was taken as being 3054 days, and in order to get rid of the odd quarter of a day, an extra or intercalary day was added once in every fourth year, and this was called Bissextile or Leap Year. The Calendar so arranged is known as the "Old Style," and is now used only in Russia. But as the Solar Year is 11 minutes 12 seconds less than the Julian year of 3654 days it followed in course of years that the Julian Calendar became

inaccurate by several days, and in 1582 this differ-ence amounted to 10 days. Pope Gregory XIII.,

NOTES ON THE

January was placed as leader of the months by Numa Pompilius, when he added two months (Jan. and Feb.) to the Alban Calendar, though it was not admitted to the same precedence in this country until a motion was made to that effect on March 18, 1750. The name is derived from Janus, the god of the year, in the Roman mythology. The idol Janus was placed over the gate of a temple at Rome, and was repre-sented with two faces, the one that of an old man, being typical of his retrospect of the past; the other a youthful countenance, denoting prospect of the future. He presided over gates and avenues, thus symbolically he admitted the new year, and attended the departure of the old.

February was made the second of the lold. **February** was made the second of the lold months by Numa Pompilius. Its name was derived 'either from Februa, a title which the Romans gave to the Feralia sacrifices ; or more probably from Februs, to purify, because this being originally held to be the last month of the war the people offered an evolution coefficient year, the people offered an explatory sacrifice for their twelve months' sin.

farch.-March with the ancients ranked the first month of the year, and was named in honour of Mars, the supposed father of the founder of Rome. Our Anglo-Saxon ancestors called it Lenet monath, that is Lent, or Spring month. Marriages in this month were seldom solemnized, as they were counted to become inharmonious and unhappy. March 15, or according to the Roman calendar, the Ides of March, was the Paricidium, the day on which Julius Cæsar was murdered in the Senate house by Brutus and Cassius, with other conspirators.

April.-By the Saxons April was called Ostr monath, probably from the same word from which Easter is supposed to have been derived. The Dutch and Germans called it Grass month. The name is derived from the Latin word Aperio, to open or disclose. The term applies to the opening of the year, or to the unfolding of the

buds and flowers, by the influence of the genial warmth and moisture of Spring. **May.**—The Hebrews named this month Sivan, from a Sanscrit word, signifying "to rejoice." The Anglo-Saxons knew it as *Tri-milchi*, be-cause their cows, stimulated by the fresh herb-age were so productive of milk, as to enable age, were so productive of milk, as to enable the proprietors to bring them with advantage to the pail three times a day. The Romans offered sacrifices to Bona Dea or Maia on the first day of the month.

June was the Thamur or Tamuz of the Hebrews, that is after their escape from the Bebylonish captivity; for previously to that they had simply distinguished their months by aid of the state of the s

9 Google

at the suggestion of Aloysius Lilius, an astrono-mer of Naples, determined to rectify this, and devised the Calendar now known as the Gregorian Calendar. He dropped or cancelled these to days-October 5th being called October 15th-and made centurial years Leap years only once in 4 centuries; so that whilst 1700, 1800 and 1900 were to be ordinary years, 2000 would be Leap year. This modification brought the Gregorian system into such close exactitude with the Solar year that there is only a difference of 26 seconds, which amounts to a day in 3,323 years. This is the "New Style." It was ordered by Act of Parliament to be adopted in this country in 1752 -170 years after its formation—and is now used throughout the civilised world with the single exception already named. The difference be-tween the two "Styles" will remain 13 days until A.D. 2100.

47

TWELVE MONTHS.

tinuance and perfection, alluding, probably, to the almost uninterrupted daylight, maturation of fruit, &c., which occur during its continuance. July.—The fifth month of the Roman calen-

dar received the name of *Quintilis* to denote its numerical position. It was sacred to Jupiter, and had in the Alban calendar 36 days. Romulus took from it 5 days. Numa reduced it to 30, but Julius Cæsar enlarged it to 31, the present number. In honour of the latter, Mark Antony changed its name from Quintilis to Julius-hence our July.

August derived its name from Augustus, the Roman Emperor; it was called Sextilis, or the sixth month in the Alban calendar, in which it had only 28 days assigned to it. Romulus added had only 28 days assigned to it. Romulus added two, and Augustus a third, which number it has since retained. The Anglo-Saxons called it either *Barn monath*, alluding to this being the period when their barns were commonly filled, or Wood monath, clothing month, alluding to their fields being then clothed with corn, just as the Romans dedicated this month to Ceres, the goddess of harvest.

September,-In the Latin and Roman calendar, this was the seventh month; and hence its name. The month had only sixteen days assigned to it in the Alban calendar; these were increased to thirty by Romulus, to thirty one by Julius Cæsar; but Augustus reduced it to its present number. The ancient Saxons called it Berst monath, or Barley month, because at this time

the barley harvest was gathered in. October was called by our Saxon forefathers Wyn monath, or Wine month, and sometimes Winter fylleth, from the approach of Winter, It was the eighth month of the Alban calendar. in which it had thirty-nine days. Its name is derived from the Latin, Octo, eight, and Imber, a shower of rain. Romulus reduced it to thirty-one days; Numa, to twenty-nine. Julius and Augustus each added one, and this number has not since been altered.

November.—The early Saxon inhabitants of England called this *Blott monath*, or slaughter month, because in those primitive days winter food was so scarce in England that it was usual to kill and salt the greater part of their winter meat this month; they called it also *Wind* monath or *Wind month*, from the tempestuous weather with which it is commonly accompanied.

December.—The month of December, so named by the Romans from being the tenth month of their year, has been denominated by the Saxons Winter monath, but after Christianity they piously gave it the name of Holy month, or High monath.

ECLIPSES IN 1902.

In the year 1902 there will be three Eclipses of the Sun and two of the Moon.

April 8.-A Partial Eclipse of the Sun.

Invisible throughout the British Isles.

This Eclipse is visible only in the high latitudes of the North Pacific Ocean, where at the greatest phase about one-sixteenth of the Sun's diameter is obscured.

April 22.-A Total Eclipse of the Moon.

1.1

Partly visible throughout the British Isles.

The Moon rises generally totally eclipsed, the 'end of totality occurs at 7^h 35^m p.m., and the last contact with the Shadow at 8^h 45^m p.m.

May 7 and 8.-A Partial Eclipse of the Sun.

Invisible throughout the British Isles.

This Eclipse is visible generally throughout New Zealand and the South Pacific Ocean.

Oct. 17.-A Total Eclipse of the Moon.

Partly visible throughout the British Isles.

The first contact with the Shadow occurs at 4^{h} 17^m a.m.; the beginning of totality at 5^{h} 19^m a.m.; the middle of totality at 6^{h} 3^m a.m.; at the end of totality at 6^{h} 48^m a.m., the Moon has set generally throughout the British Isles.

Oct. 31.-A Partial Eclipse of the Sun.

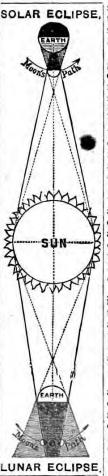

Partly visible throughout the British Isles.

The beginning of the Eclipse occurs before Sunrise. At Greenwich the Eclipse ends at 7^{h} 1^m a.m.; at Oxford at 7^{h} 0^m a.m., and at Cambridge at 7^{h} 5^m a.m.

THE HARVEST MOON.

When does the Harvest Moon occur ? is a question frequently asked. The Full Moon which happens on or nearest to LUNAR ECLIPSE. the Autumnal Equinox (about Sept. 23rd)

is called the Harvest Moon because it rises from night to night after the full, more nearly after sunset than any other Full Moon in the year, and is therefore favourable for evening work in carrying late crops. The succeeding Moon is called the Hunters' Moon. In 1902 the Harvest Moon is full on Sept. 17.

WHAT IS AN ECLIPSE ?

Astronomically, the word "Eclipse" is applied to the darkening, real or apparent, of a heavenly body, especially of the Sun or Moon, though some of the satellites of other planets besides the earth are also "eclipsed" from time to time. An Eclipse of the *Moon* is caused

by its passage through the Shadow of the Earth; an Eclipse of the Sun by the interpo-stion of the Moon between the Sun and the observer, or what comes to the same thing, by the passage of the Moon's Shadow over the observer.

It will be seen, however, from the diagram that since the apparent angular diameters of the Sun and Moon are very nearly the same, it is only when the spectator is on, or very close to, the line joining the centres of those two bodies that a Total Eclipse of the Sun can take place; and, indeed, even if he be on that central line, should the Moon be in the more distant portion of her orbit, her apparent diameter may be less than that of the Sun, so that even in a Central Eclipse a small view of the Sun is still visible. This constitutes what is known as an Annular Eclipse, but there is not one of the Eclipses visible in 1902 of this character. But even when the Eclipse is total on the central line, an observer far from that line will only see a portion of the Sun hidden, as the lines of the diagram clearly indicate.

In an Eclipse of the Moon the Eclipse is due to a real cutting off of light from the Moon. A Lunar Eclipse, if total for any place, must usually be total for every place from which the Moon can be seen. Lunar Eclipses are not, however, by any means always total. One Partial Eclipse occurs in May, 1902. The axis of the Earth's Shadow is

always directed to a point exactly opposite to the Sun. Did the Moon move accurately in the plane of the ecliptic she would be eclipsed at every Full Moon, but since her plane is in-clined at about 5° to that of the ecliptic, she will pass into the Shadow and suffer Eclipse only, if, at the time of the Full Moon, she is near one of the nodes of

her orbit. As this seldom happens, we find that there cannot be more than three Lunar Eclipses in the year (and this only if the Full Moon is at a node early in January), and there may be none. Usually, however, we have two Lunar Eclipses in the year, Total only if the Moon passes fairly near to the centre of the earth's shadow.

BRITISH OBSERVATORIES.

GREENWICH, lat. 51° 28' 38'1" N. Opened 1675, under the direction of Flamstead, Astronomer Royal. The chief centre for observations on

astronomy and navigation. CAMBRIDGE, lon. o^h o^m 22'75^s E.; lat. 52^o 12' 51'6" N. Founded by the University in 1824. OXFORD - Radcliffs, lon. o^h 5^m 2'6^s W.; lat.

51° 45' 35'4" N. Erected about 1772. OXFORD UNIVERSITY, lat. 51° 45' 34'2" N. Celebrated for its 121-in. equatorial refractor. LIVERPOOL. Established 1838--transferred to

Birkenhead in 1867. Lon. oh 12m 17'35" W. ; lat. 53° 24' 4'8" N. KEW, lon. oh 1^m 15'1^s W. ; lat. 51° 28' 6" N.

This is the chief meteorological observatory of the United Kingdom. Digitized by GOOS

DURHAM, lon. o^b 6^m 19'75^e W.; lat. 54^o 46' 6'2 N. Founded 1841. Is under the direction of the University Professor of Mathematics.

EDINBURGH—Carlton Hill, lon. 0^h 12^m 44 '2^sW. lat. 55^o 55' 28'0" N. Elected in 1818. A time gun is fired thence daily.

GLASGOW lon. oh 17^m 10'55^s W.; lat. 55^o 52' 42'8" N. Open ed in 1840. On the north side of the city near Gartnavel.

DUBLIN, lon. o^h 25^m 21'1^s W.; lat. 53^o 23'13'1" N. Opened in 1785. Is under direction of Irisn Astronomer Royal.

ARMAGH, Ion. o^h 26^m 35[•]4^{*}W. ; lat. 54^o 21' 2[•]7 N. Founded in 1701, and enlarged n 1827. CORK-Queen's College lat. + 51^o 53' 30".

Erected in 1878. Original from

NEW YORK PUBLIC LIBRARY

In April, 1901, a comet with a triple tail suddenly appeared in the southern hemisphere. It would appear that it was first observed in Uruquay by Señor Viscara at Paysandu on the 12th of April. It was noticed by Mr. Arthur Hill at Queenstown, Cape Colony, on 23rd April, who reported its reappearance to Sir David Gill, our eminent and distinguished astronomer, who has had charge of the Royal Observatory, Cape of Good Hope, now for upwards of twenty years. It was seen shortly afterwards in Western Australia by Mr. Tattersall at Leeuwin. The tail was about two degrees in length, or about four times the apparent diameter of the Sun or Moon. The first scientific observators of its position appear to have been made at the Cape of Good Hope Royal Observatory. In order to determine the character of the path or orbit in which a

THE NEW STAR IN PERSEUS.

One of the most remarkable events in the stellar heavens which has occurred in our time took place in February, 1901. On the early morning of the 22nd February the Rev. Dr. Anderson, of Edinburgh, noticed that the shape of one of our most familiar constellations was altered by the addition of a bright stranger, forming an obtuse-angled isosceles triangle with its two brightest stars, one of which is well known to be variable in its brightness. Dr. Anderson has discovered variability in several known stars, but the brightness which the new star suddenly attained exceeded (although one previously nearly equalled it) that of any similar star within the memory of anyone living, or, indeed, for nearly three centuries—the one in question being that which appeared in the constellation Corona Borealis (the Northern Crown) in the month of May, 1866, when it was first seen by the late Mr. Birmingham, of Millbrook, near Tuam, Galway. The star in Corona Borealis at its discovery was comet moves it is necessary that three separate observations of its position should be accurately measured. If these observations are spread over a week or a fortnight a very close approximation to its course can be determined. The motion of the comet was incorrectly reported to be northwards, but as a fact its motion at the time of its discovery was south-easterly, and although its course was north-easterly after the 3rd of May, the comet had become so faint that it was only with difficulty seen with the aid of telescopes. It was nearest the Sun on the 24th April, and was distant about 23 millions of miles—its distance from us being about the same as the Sun, or about 92 millions of miles, about 8th May. Its brightness at discovery was estimated as the same as a third magnitude star. Its orbit being parabolic, the comet will not again become visible.

about equal to that of a second magnitude star, but declined rapidly and became invisible to the naked eye in about nine days, although it is still visible in powerful telescopes. The star in Perseus, however, diminished in brightness much less slowly, and was faintly visible for a very long time, although its brightness did not diminish regularly but by a succession of ups and downs. These sudden appearances of new stars, from investigations with the spectroscope, appear to be due to the combustion of huge volumes of hydrogen evolved by the collision of one star with another, or more probably with masses of nebulous matter. The first well authenticated instance of the appearance of a new star was of one which suddenly burst forth in the year 1572 in the constellation Cassiopeia, and was carefully observed aud accurately described by the great Danish astronomer, Tycho Brahé, and another of great brilliancy appeared in Ophiuchus in 1604, and was observed by the famous Kepler.

LUNAR OCCULTATIONS.

An Occultation of a fixed star or planet, like an Eclipse of the Sun, is caused by the Moon. in her eastward course from right to left, passing between the star and the spectator, and so intercepting it from his view. On page 51 the reader will find, as usual, a full table for the present year, 1902, giving the particulars for the principal Occultations visible in Great Britain.

The most interesting examples are the Occultations of the following comparatively bright stars. The letters D and R in the diagrams following indicate the points of disappearance and reappearance of the star, and are measured from the vertex or point of the Moon's limb nearest the Zenith.

The occultation of 8³ Tauri occurs on April 11th. disappearance takes place at g^h 36^m p.m., and the reappear-ance at 10^h 15^m p.m.; the Moon being three days old.

The occultation of a Virginis on April 21st-22nd. The disappearance takes place at 11h 46^m p.m., and the reappear-ance at 0^h 52^m a.m., the Moon being thirteen days old.

The occultation of ρ^1 Sagittarii on April 29th. disappearance takes place at 4^h 20^m a.m., and the reappearance at 5^h 44^m a.m., the Moon being twenty days old.

> N M N S

The occultation of ρ^1 Sagitt-ii on July 19th. The arii on July 19th. The disappearance takes place at 10^h 58^m p.m., and the reappearance at 11^h 54^m p.m., the Moon being fourteen days old.

The occultation of a Librae on Aug. 10th. The disappearance takes place at $8^{h}41^{m}$ p.m., and the reappearance at $9^{h}35^{m}$ p.m., the Moon being seven days old.

The occultation of the double star & Tauri on Sept. 22nd. The disappearances take place at $9^{h} 2^{m}$ p.m. and $9^{h} 14^{m}$ p.m., and the reappearances at $9^{h} 25^{m}$ p.m. and $10^{h} 2^{m}$ p.m., the Moon being twenty-one days old.

The occultation of the double star & Tauri on Oct. 20th. The disappearances take place at ' 5^h 8^m a.m. and 5^h 43^m a.m., and the reappearances at 6^h 13^m a.m. and 6^h 43^m a.m., the Moon being nineteen days old.

The occultation of λ Geminorum on Oct. 23rd. The disappearance takes place at oh 53^m a m, and the reappearance at 1h 44m a.m., the Moon being twenty-one days old.

The occultation of ζ^1 Pisc-ium on Dec. roth. The disappearance takes place at 7^h 8^m p.m., and the reappear-ance at 8^h 22^m p.m., the Moon being eleven days old.

OLD ENGLISH HOLIDAYS.

THESE holidays, with their names, had their origin in mediæval England when the State religion was that of the Church of Rome, and they are still observed in some parts of Great Britain.

JANUARY 7. TWELFTH DAY was 12 days after Christmas, and is sometimes called Old Christmas

Day. Many social rites have long been connected with Twelfth Day. FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year.

FEBRUARY 14. ST. VALENTINE'S DAY. The custom of sending a "valentine" to one's sweetheart was very general 50 years ago, but, since the introduction of Christmas Cards, has almost

March 25. LADY DAY: Annunciation of the Blessed Virgin Mary. April 7 is old Lady Day. JUNE 24. MIDSUMMER DAY. Feast of the Nativity of St. John the Baptist. July 7 is old

Midsummer Day. August 1. LAMMAS DAY! Originally in August 1. One England the festival of the wheat harvest. One

Digitized by GOOS

of the Scotch quarter days. Old Lammas Day

is August 14. SEPTEMBER 29. MICHAELMAS: Feast of St. Michael the Archangel. Old Michaelmas Day is October 12.

NOVEMBER I. ALLHALLOWS: All-hallows, or All-Saints' Day. The previous evening is All-hallow-e'en, observed by home gatherings and old-time festive rites.

NOVEMBER 2. ALL SOULS' DAY: Was formerly regarded as a day of prayer for the souls of the dead.

NOVEMBER II. MARTINMAS: Feast of St. Martin. Scotch quarter day. Old Martinmas is November 24.

DECEMBER 28. CHILDERMAS: Holy Innocents' Day.

MOTHERING SUNDAY is Mid-Lent Sonday, in which the old rural custom obtains of making presents of cakes, &c.

METEOROLOGICAL NOTES. CLOUDS.

CLOUDS are masses of mist or vapour condensed into little drops or vesicles of extreme minuteness, and occupying the higher regions of the atmosphere. Clouds have been classified as follows:

UPPER CLOUDS,

CIRRUS.-The mare's tail or curl-cloud.-Very light and fleecy; this is the most elevated cloud. CIRRO-CUMULUS.—Sonder-cloud.—A system of

small round clouds.

CIRRO - STRATUS. - Wave-cloud. - Concave or undulated stratus.

LOWER CLOUDS.

CUMULUS. - Wool - pack-cloud. - With round conical shape heaped up.

CUMULO-STRATUS .- Twaincloud,-A mixture of cumulus and stratus.

NIMBUS .- Rain-cloud .- Very dark with marked outline, with rain falling from it.

STRATUS. - Fall-cloud. - A sheet or layer of cloud of uniform thickness.

Full descriptions of these clouds will be found in the British Almanac for 1900.

THUNDERSTORMS. -- A thunderstorm is consequent on an electrical discharge in the clouds, and this discharge shows

bighinged by GOUGIE

clouds, and this discharge shows itself by a flash of lightning and Rain (a peal of thunder. When clouds become highly charged with atmospheric elec-tricity a discharge of the electric force takes place, and any human being or animal which may happen to be in the path of the discharge receives a violent shock; often sufficient to cause death. The flash of this discharge is known to us as lightning. M. Arago has described four distinct kinds of lightning, two being dangerous and two harmless: ri Zigzagior Forked Lightning: a discharge between two oppositely electrified

bodies following a zigzag path owing to varying conditions in the air through which it passes. This is highly dangerous. 2. Globular Lightning, in which the electric fluid seems to be condensed the appearance is that of a luminous ball or globe of fire; it remains visible for several seconds, travels slowly with a strange hissing sound, and finally explodes with great violence. This is also dangerous. 3. Sheet Lightning, which covers a large surface of cloud

and is, in fact, merely the re-flection of distant unseen elec-trical discharges, or discharges of a feeble character. 4. The fourth kind of lightning is the luminous flash known as St. Elmo's fire. This is more common at sea than on land ; it is quite harmless and shows itself during a thunderstorm at the extremities of pointed objects, such as yard-arms or mast-heads. Lightning travels, according to Wheatstone, about 290,000 miles a second-about half as quick again as light.

RAIN .- Rain is the most important mode by which the moisture abstracted from the earth by evaporation is again returned to it in a liquid state. Rain originates in the clouds.

ages. whence it is precipitated, by a sudden cooling of the air, in the form of minute globules, which, gathering in size as they fall, reach the earth in drops. The atmosphere which surrounds the earth is capable of holding only a limited amount of moisture in suspension ; this varies according to its temp ture, and a frequent cause of rain is the sudden mixing of hot and cold air, as, for instance, in the tropics, where currents of hot air ascend int colder regions and produce the great tropi summer rains, or when hot damp air is brough

Rain Gauges.

into sudden contact with the slopes of a mountain or the cold earth, as on the west coast of continents in the temperate zone, which are more mountainous than the east coast.

Rainfall is measured by a gauge, the values given representing the depth of water which would have accumulated on a level piece of ground, if none of the rain which fell could escape by drainage or evaporation. But although measurement in this manner seems an easy matter, considerable care is required to ensure

accuracy. The size of the gauge is impor-tant, so, too, is the manner of exposure, both in regard to height from the ground and distance from walls Precauand trees. tions must also be taken to prevent loss by evaporation or leakage, and other materially points affect results. The annual rainfall at sea level in the British Isles ranges from 20 inches on the east coast of England to to or 80 inches on the west coasts of Scotland and Ireland.

SNOW AND HAIL. - When the small aqueous particles produced by the con-densation of vapour descend from the clouds through atmosphere which has be-

come cooled down below the freezing point, they become frozen into tiny crystals ; these gradually come into juxtaposition and form light feathery flakes which we term snow. The beauty of these snow crystals has often been noted. They have a form derived from the hexagonal figure, and it is said that there are over a thousand known varieties of them. A few are illustrated above.

Hail is much denser than snow, and is, in fact, actual ice. True, there is a soft hail which falls

chiefly in winter, when the air is dry, in the form of soft round pellets, but real hail is, as already stated. actualice. Hailstones are usually of a shape, conical and from an eighth to one inch in diameter.

ounces. MISTS AND FOGS .- Mist is a heavy accumulation of watery vapour hanging over the surface of land or water, and rendered visible by a reduction in the temperature, either through coming in contact with a stratum of air of a

Digitized by Google

lower temperature, or with a cooled portion of " the earth's surface such as a mountain side. Fog is very similar to mist, but the particles of moisture are somewhat smaller, and these often become coated or laden with unconsumed carbon or other suspended matter, and hence the brown or yellow appearance, and the disagreeable effects of a fog on the eyes and throat. Mists are most frequent in autumn after the earth has been heated during the summer, the air cooling faster than the earth; they are most dense after very

They hot summers. also show that the air has become suddenly cooler, and frequently are a sign of snow.

DEW AND HOAR FROST.-The phenomenon of dew is consequent on the sunwarmed moisture-laden air being so rapidly cooled by contact with the cold earth that it

cannot retain the same amount of moisture, and this is accordingly deposited on the surface of the earth in the form of very tiny liquid drops. Dew is seldom formed on cloudy nights, because the heat that has been communicated to the earth during the day by the sun, instead of being radiated into space as it is on cloudless nights, is reflected back by the clouds

and so retained. When the temperature of the earth falls below freezing point the dew-drops are congealed into ice, and the phenomenon of hoar frost is produced. The feathery forms of this are very beautiful, and should be carefully examined when opportunity offers. Subjoined are some of the ordinary forms.

THE ATMOSPHERE. - The gaseous air we breathe, and by which the air is surrounded, is composed chiefly of nitrogen and oxygen, with a small amount of aqueous vapour, carbonic acid and ammo-nia. The pro-

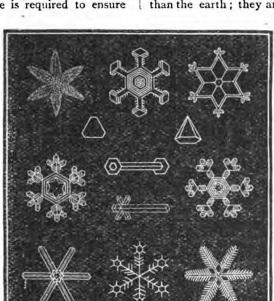

of moisture in the air is measured by a hygrometer, or by comparing the readings of a wet bulb and a dry bulb thermometer.

portions in 1000 volumes of air are: oxygen 206'1, nitrogen 779'5, aqueous vapour, etc., 14'4. Air possesses weight; this, near the surface of the globe, is equal to about

15 lbs, to the square inch. The actual pressure is measured by a barometer, in which the weight of a column of air is indicated by the height of a column of mercury of equal sectional area. The temperature of the atmosphere is determined by a barometer while the amount determined by a thermometer, whilst the amount

Snow Crystals.

Original from NEW YORK PUBLIC LIBRARY

THE BAROMETER.-Atmospherical Pressure is, as stated before, measured by the Barometer, which should be a mercurial one. The readings of the barometer are "corrected" for instrumental errors and reduced to 32° and to sea-level.

These are necessary, since the mercury expands when the temperature rises and the column is lengthened, and two similar barometers cannot read alike unless at the same temperature. In the same way, since the height of In the the column of mercury measures the weight of the column of air of equal sectional area above it, if two similar barometers be placed one directly above the other it is evident that there will be a less quantity of air above the former than above the latter instrument, and it will read lower.

The following are conditions for high barometer. When the air a high barometer. is very cold, for then the lower strata are denser and more con-tracted than when it is warm. The contraction causes the upper layers to sink down, bringing a greater number of air particles, that is to say, a greater mass of air into a given vertical column of the atmosphere supposed unable to expand laterally, so that the pressure at its base is greater. When the air is dry, for then it is denser than when it is moist. (3) When in any way an upper current sets in towards a given

area, for this compresses the strata underneath. Conversely, the barometer stands low when (1)

the lower strata are heated, causing the surfaces of equal pressure to rise, and the upper layers to slide off as already described, for by this means the mass of air pressing on each unit of area below is reduced. (2) When the air is damp, for as the density of aqueous vapour, at the temperature of 60° and pressure of 30 ins., is = 0.622, air being = τ , the mix-ture is lighter the more vapour it contains, and consequently damp air does not press so heavily as dry on the unit of area below. (3) When the air from any causes has an upward movement, for this of course acts in the same manner as (1). From these principles it fol-

lows that a fall in the barometric reading usually betokens rain and wind, or an increase in both ; but a rise the reverse. The direction of the wind,

and the temperature, must be noted, however, for bad weather may accompany a rise, if the wind be from a cold quarter, the north-east winds tending to raise the barometer the most.

The mean height of the barometer at the level of the sea is nearly theisame at all places, and is but slightly affected by the fluctuations of temperature; but in the higher regions of the atmosphere it is greatly affected by these causes.

Great falls of the barometer are generally accompanied by a tem perature above the mean for the season, and great rises by one below the same.

Digitized by GOOgle

The greatest depression of the barometer of daily about 4 a.m. and p.m., and its high elevation about 10 a.m. and p.m.; in sum these extreme points are reached from one to hours'earlier in the morning, and as much la in the afternoon.

> To convert English Barometrical readings into French (inches into millimètres) or vice versa the following table will be useful.

Mil. In.	Mil. In.	J In. Mil.

THERMOMETER.-THE The determination of the temperature of the air is open to much uncertainty owing to the great difficulty of securing an unexception-able exposure for the thermometers. An ordinary thermometer consists of a fine glass tube with a bulb (cylindrical or spherical)

blown on one end, and partly filled with some liquid, mercury or spirits of wine, usually

This liquid con. being By 15 the Selfthermome-

with some highest or the lowest

WINDS AND STORMS.

The motion of the air, both in direction and velocity, is regulated by the distribution of atmospherical pressure at the surface of the earth, which is shown by the distribution of the readings of the barometer in the weather chart.

The force of the wind, as distinguished from its direction, is related to the amount of difference of barometrical pressure over a given distance, and this is defined as the "gradient." Where the lines of equal barometric pressure (the "isobars") are close together, we have a steep gradient, and may hence expect strong winds to restore the atmospheric equilibrium. The force of the wind therefore does not depend on the absolute height of the barometer at any given station, but on its height as compared

with that for the surrounding districts. Storms were formerly divided into two great classes, circular storms (hurricanes and ty-phoons) and straight line storms. The former are almost the only class of storms which occur

within the tropics, and are known under the general name of cyclones. Straight line storms were formerly supposed to be the usual type in temperate latitudes, inasmuch as the wind will blow hard for many days together

Anemometer.

from the same point. Later observations have shown, however, that these storms are almost without exception cyclonic in their nature, al-though they are not so characteristically de-veloped as in the tropics.

YCLONES. - There are two great classes of atmospheric systems, anti-cyclonic and cyclonic.

Anti-cyclonic systems, and cyclonic and cyclonic. Anti-cyclonic systems are characterised by very slow circulation of the air (light winds), by low temperature in winter, great "absolute" dryness of the air, at least at their centres, and consequent absence of rain, though fog may be

very prevalent. Cyclonic systems on the other hand are characterised by rapid circulation of the air causing strong winds—which appear to flow towards the centre, so that the air is supplied from below and ascends in the centre—a comparatively high temperature, much moisture, and therefore heavy rain. At the rear of the disturbance it may be very dry.

These are the winter conditions. In summer

they are exactly reversed, at least in temperature. One great distinction between cyclones and anti-cyclones is that the former move over more or less large areas, whilst the latter are usually stationary. The actual force of the wind is

Digitized by Google

measured in a meteorological observatory by an anemometer, of which an illustration is given below.

STORM AND WIND SIGNALS OF THE METEOROLOGICAL OFFICE. DAY SIGNALS. South North NIGHT SIGNALS. Three Lights in Triangle instead of Cone. South Cone. Conc. Gale Gale Gale Gale probably from the probably probably probably from the from the from the

The Cone point downwards means that gales or strong winds are to be expected, at first from the Southward, viz., from S.E. round by S. to N.W. The South Cone is hoisted if it appears probable that a gale will begin from between E. and S.E., and also that it is likely to veer towards S or SW towards S. or S.W.

Southward. Northward.

Southward. Northward.

The Cone *point upwards* means that Northerly gales or strong winds are probable, viz., from N.W. round by N. to S.E. If it is probable that a gale will begin from between W. and N.W., and also that it is likely to veer towards N. or

and also that it is likely to veel towards it. of N.E., the North Cone is hoisted. The Signal is kept hoisted until dusk, and then lowered; hoisted again the following morn-ing at daylight, and so on for 48 hours from the time at which the message was issued from the Materralogical Office unlass otherwise the Meteorological Office, unless otherwise ordered. At dusk, when a Signal ought to be flying, the Night Signal should be hoisted in place of the Cone-point downwards for South Cone, point upwards for North Cone.

The object of these warnings is only to make known the greater and more general disturbances of the atmosphere, and the hoisting of the Signals is a sign that an atmospherical disturbance is in existence, which will *probably* cause a gale, from the quarter indicated by the Signal used, within a distance of about 50 miles of the place where

the Signal is hoisted. A Southerly wind is more likely to veer rapidly to a point North of West than a Northerly wind is to veer to a point South of East; a gale from the Eastward is more likely to hack to the Northword then to use the likely to back to the Northward than to veer to the Southward.

VELOCITY OF WIND.

Ck., Private Bill Office, J.H.W.Somerset, £1,000.	Speaker's Chaplain, Ven. Basil Wilberforce.

THE HOUSE OF COMMONS.

Broadly speaking any male person of full legal age may be elected to sit as a representative in the House of Commons (the third Estate of the Realm). The exceptions include Peers (except Irish), Judges, the Clergy, Sheriffs, Returning Officers and Government contractors; criminals, lunatics, and aliens are also disqualified. No member receives any payment, though there are many who contend that this should be otherwise. If a member is appointed to a Government office, the seat he represents is vacated, and a re-elec-

1

tion becomes necessary; there are, however, exceptions to this rule.

The present House was elected in Sept.-Oct., 1900, and consists of 670 members elected by constituencies of counties, boroughs or universities. Of these 333 are Conservatives, 60 Liberal Unionists (= 402), 186 Radicals, 73 Nationalists, and 9 Parnellites. The Conservative and Unionist majority is 134. The following shows the allotment of Members to the great divisions of the Kingdom :--

U. King.	283	377	360	284	9	9	6 52	670 18

WHAT AN ELECTION COSTS.

The sum which a candidate may expend in an election is regulated by a scale in the Municipal Elections Act, 1884, which allows a maximum of $\pounds 25$ for the first 500 electors, and threepence for each elector above that number. The limit of expenditure, therefore, will be as follows :—

		£	5.	а.	£, S. d.	
1	For 500 electors	25	0	0	For3,000electors,56 5 0	
	1,000 ,,	31	5	0	3,500 ,, 62100	
,	1,500 ,,	37	10	0		
	2,000 ,,	43	15	0	4,500 ,, 75 0 0	
ʻ	2,500 ,,	50	0	0		
¢	And so on, a	t tl	ne i	rate	of threepence for each	
·	•				tor.	

These sums must not be exceeded, or the ELECTION WILL BE VOID.

(In London, if two candidates stand jointly, the maximum amount for each must be reduced by one-fourth, and they are only in that case allowed to hire the number of committee rooms, and employ the number of persons authorised for a single candidate.)

One committee room is allowed to be *kired* for each electoral division, or if the number of

electors exceeds 2,000, one additional committee room for every additional 2,000, or part of that number. The use of committee rooms voluntarily lent is not limited, provided they are not in prohibited premises.

Claims in respect of the election expenses of a candidate must be sent in within 14 days, and paid within 21 days of the election.

Every agent must send in to the candidate, within 23 days after the election, a return, in writing, of all expenses incurred by him in the conduct and management of the election (under a penalty of \pounds_{50}).

Every candidate must, within 28 days after the election, send to the Clerk of the County Council a return of all expenses incurred by him or his agents, together with bills stating the particulars, and receipts for all sums over twenty shillings and a proper declaration.

The penalties and disqualifications attending the commission of corrupt or illegal practices at the election of a County Councillor are similar in most respects to those which follow the same offences at Parliamentary elections.

80

- 1801 Union with Ireland; Copenhagen taken by Nelson.
- 1801, 1802, 1804. The Planets Ceres, Pallas, and Juno discovered.
- 1803 War with France renewed.
- 1804 Buonaparte made Emperor, May 18. 1805 Battle of Trafalgar, Oct. 21. 1806 Deaths of Mr. Pitt and Mr. Fox. Cape of Good Hope taken, Jan. 9.
- 1807 Copenhagen taken; Gas used in London; Slave Trade abolished.
- 1808 The Peninsular War.
 1809 Battle of Corunna, January 16; O. P. riots.
 1811 Battle of Talavera, July 27.
 1812 Moscow burnt; War with America.

- 1813 Printing machines invented. 1814 Capitulation of Paris; Buonaparte retired to Elba; Stephenson's first locomotive run; Thames frozen ov... 1815 Battle of WATERLOO, Restoration of Louis
- XVIII.
- 1817 Princess Charlotte died, November 6.

OUR POSTAL SYSTEM.

Secretary of Post Office-Sir G.H.Murray, K.C.B. Controller London Fost. Ser.-J.C. Badcock, C.B. Comptroller & Account.-Genril.-C. A. King. Controller of Money Order Office-J. Manson. Controller of Money Order Office-J. Manson. Controller Central Telegraph Office-E. May. Solicitor-Sir R. Hunter, C.B. Controller of Savings Bank-Charles D. Lang, C.B.

There is probably no Government Department which needs reform more seriously than the Post Office. The authorities are almost constantly at loggerheads with those for whose benefit the department exists-the Public-and in many ways the system is altogether behind the times. In the BRITISH ALMANAC for 1902 Mr. Henniker Heaton writes on the subject of Postal Reform, and it is much to be hoped that that gentleman's persevering efforts will ere long be rewarded and that the British Public will have a postal system which, if not, as it should be, the best in the world, will at least ensure freedom from silly red-tapism and facilities equal to those enjoyed in other countries.

The following interesting statistics for 1901 are taken from the report issued by the postal authorities and show what an enormous number of packets are dealt with in twelve months.

During the year ending 31st March, 1901, the number of Postal Packets delivered and not delivered for various reasons, in the United Kingdom is estimated to have been as follows :-

-	Delivered.	Not Delivered.
Letters	2,323,600,000	9,786,870
Post Cards	419,000,000	1,619,390
Book Post and	•	• ••
Circulars	732,400,000	11,911,614
Newspapers	167,800,000	627,643
Parcels	81,017,000	227,252
Registered		
I assams	06-	

Letters 17,729,869 The total value of property found in undelivered

Letters was $\pounds 63,335$. The number of Postal Packets posted without address was 345,690, and in these were found Cash and Bank Notes to the value of $\pounds 251$, and $\pounds 7,203$ in Bills, Cheques, Money Orders, Postal Orders, and Postage Stamps.

The weight of Letters and other articles to and from Countries abroad was as follows :---

	Re	ceived for 1	Distribution in
Despati	ed Abroad.	United K	ingdom.
Letters, lbs,	Book, News &c. Ibs.	Letters. lbs.	Book, News &c. lbs,
2,103,000	19,444,000	1,840,000	696,000

The Mails to the East comprising those for India, China, Australia, &c., despatched on December 7th consisted of 2,885 bags weighing

about 70 tons. The correspondence to the British Forces in South Africa averaged 300,000 each week; the total number sent during the year being 11,550,000.

Parcels despatched to, and received from, places abroad, 2,005,506 and 1,118,788 respectively.

Money Orders issued and paid in the United Kingdom, including those issued for payment abroad, and received from abroad for payment in the United Kingdom, 13,263,667, value £39,374,665. Postal Orders issued during the year,85,390,029,

value £29,881,726. There were 89,576,961 telegrams sent over the wires of the Post Office, and of these 7,641,990 were to and from places abroad; and the total number of telephone transactions, reckoning each as involving two spoken messages, was 8,975,148. The highest number of telegrams dealt with in one day was on the day preceding the funeral of Q ueen Victoria, when 199,155 passed through the London Central Office.

During the year ending December 31st, 1000, 49,969,849 deposits were made in the Post Office

Savings Bank, the total amounts deposited being £40,516,436, and the number of withdrawals were 5,466,347, the total sum withdrawn being £38,231,372. The total amount due to 8,439,983 depositors at the end of the year was £135,549,645. The largest number of deposits was on December 31st, when 124,469 were made, to the value of 4458,115; and on December 18th there were 44,805 withdrawals, amounting to £221,149. There are 22,189 Post Offices in the United Kingdom, and the total number of officers of all works, both male and formals including these nut

ranks, both male and female, including those not on the establishment was 173, 184.

INLAND LETTERS.

The rates for Inland Letters are as follows:

4 ozs. ... id. | Io ozs. ... 2¹d. | 16 ozs. ... 4d. 6 ozs. ... 1¹d. | Io ozs. ... 2¹d. | 16 ozs. ... 4d. 8 ozs. ... 2d. | 12 ozs. ... 3¹d. | 20 ozs. ... 5¹d. and so on for greater weights at ¹d. extra for every additional 2 ozs. No letter may exceed 24 in. long, 12 in. wide, or 12 in. deep. Letters posted unpaid are charged double postage on posted unpaid are charged double postage on delivery; those insufficiently paid, double the deficiency.

EXPRESS DELIVERY.-Letters and parcels are accepted at most of the principal offices for express delivery, at an extra charge of 3^d. for every mile or part. The cost of cab hire extra if required. The packet must be handed over affixed in stamps, and "Express Delivery" boldly written at top left corner.

Single letters not exceeding 4 ozs. in weight can be sent by railway. The postage and a fee of 2d. must be paid to the railway servant receiving such letter, and he will affix and obliter-ate a special label. Such letters *must be* taken to a passenger station, and will be sent to destination by first available train. They may be addressed to the Borcal Office at the station of destination "to be called for," or if so de, sired will be posted in the nearest Post Office to the station to which addressed for delivery by ordinary post.

INLAND NEWSPAPERS.

The ordinary postal rate on newspapers is a halfpenny for every 2 ozs.; but publications which consist wholly or in great part of news, or articles on current topics, and which are printed and published in the United Kingdom at inter-

vals of not more than seven days, may—for an annual fee of 5s.—be registered for transmission by post in the United Kingdom at the newspaper rate of a halfpenny each, irrespective of weight. No newspaper packet may be above 5 lbs. in weight, 24 in. long, 12 in. wide, or 12 in. deep.

NEWSPAPER WRAPPERS. — Halfpenny stamp, id. each, 7 for 4d., or 225. 10d. per 480; Penny stamp 1id. each, 8 for 8id., or 215. 3d. per 240. Sheets of halfpenny wrappers may be obtained at two days' notice in packets of 120 sheets of 14 wrappers each at £3 185.

INLAND BOOK POST.

The rates for Book Packets are as follows :

2 OZS.	₽d.	8 ozs.	2d,	14 ozs.	3 1 d.
4 ,,	ıd.	10 ,,	211.	16 ,,	4d.
and so d	n for s	reater w	30. eights a	16 ,, 18 ,, at 1 d. ext	ra for
every ac	iditiona	1 2 OZS.	No Bo	ok Packe	t may
exceed 2	4 in. loi	ng, 12 in.	wide, o	r 12 in. de	ep.

A 2-oz. Book Packet may contain any matter wholly printed on paper, or other substance in orcinary use for printing; books or literary publications, sketches, drawings, paintings, maps, plans, &c., as well as invoices, and similar commercial and legal documents, provided that nothing is written on them of the nature of a letter, or other than entries proper to such documents.

The regulations for all other Book Packets are the same as for Letters.

INLAND PARCEL POST.

The limit of length allowed is 3 ft. 6 in., and the maximum of length and girth is 6 ft., *i.e.*, a Parcel 3 ft. 6 in. long may measure 2 ft. 6. in. in girth round the thickest part. The Rates of Postage, which must be prepaid, are as follows:

1 lb. 2 lbs.	3d. ₄d.	5 lbs. 6,,	os. os.	7d. 8d.	9 lbs. 10 ,, 11 ,,	05. IS,	11d. cd.
3 » 4 »	5d. 6d.			9d. 10d.		IS.	od.

11 lbs. is the limit allowed.

GENERAL NOTES.

POST CARDS.—Post Cards are sold at the following rates :—Stout Cards (two shapes), \$d. each, 6d. for 10, or 5s. for 100. Thin Cards (one shape), \$d. each, 5\$d. fcr 10, or 11s. for 240. Uncut sheets can be obtained at any Post Office at two days' notice in packets of 120 sheets (containing 42 cards each, or a total of 5,040 cards) at £12 6s. for stout cards, and £11 8s. for thin cards. *Reply* Post Cards are issued at double these rates, but are not sold in uncut sheets. Official Post Cards, or private cards embossed by Office of Inland Revenue with a halfpenny stamp, may be used for correspondence throughout the United Kingdom, but private cards bearing an adhesive halfpenny stamp may be used provided they are composed of ordinary cardboard, not thicker than official cards, and are of about the size of official cards, being not less than 3\$ in. by 2\$ in.

LETTER CARDS.—Letter Cards are sold at ld.each, 4 for 4td., or 8 for 9d.

REGISTRATION & INSURANCE.—The fee for registering an Inland Letter, Packet, Parcel, &c., is 2d. over and above the ordinary postal rate, and in the event of loss or damage

Digitized by Google

this covers compensation up to $\pounds 5$. The packet *must* be enclosed in a strong cover, securely fastened, and if containing coin, *must* to gain the benefit of the Post Office guarantee be enclosed in a *special Registered Letter envelope*, sold at all post offices. The packet *must* be given to a Post Office official, and a receipt obtained for it, and if, contrary to this rule, it should be dropped into a letter box, it becomes liable to a fee of 4d, on delivery. Letters containing coin, jewellery, or watches, if posted without registration, are liable to a similar fee on delivery.

PRIVATE LETTER BOXES. — Posting boxes may now be fixed in private houses in London on the following conditions. The box must be approved by the Postal authorities, and must be fitted with a lock supplied by them at the cost of the user, who will not be allowed access to the interior of the box. The box must be easily accessible from the street for the purpose of collection. The annual fees are as follows :—Initial fee, 205. for two collections other than the "general," and 105. for each additional collection. For the "general" collection, 605.

Inquiries for Missing Letters should be made at the Secretary's Office, St. Martin's-le-Grand, between 10 a.m. and 4 p.m. (Saturdays 10 and 1). The Poste Restante is at the General Post Office; the Returned Letter Office is at Mount Pleasant, and the Money Order Office is at Fore St., E.C.; the Post Office Savings Bank is at 144A, Queen Victoria Street.

FOREIGN.

LETTERS .- The rate of postage on letters addressed to most British possessions is id. per d oz.; to the Australian colonies, Rhodesia, and some minor colonies, and to all foreign countries the rate is 2¹d. per 1 oz. In some countries an additional postage (which cannot be prepaid) is charged on delivery. No letter may be more than 24 in. long, and 12 in. wide or dæp

NEWSPAPERS AND BOOKS. - The rates for Newspapers and other printed matter are given in the table below; circulars in identical form from type-written originals are admitted if in numbers of not less than twenty and specially handed over the counter at a Post Office and attention called to their nature. When Commercial Papers are addressed to any country in the Postal Union the lowest rate is 21d., even if weight be less than 2 ozs., but those under 2 ozs. for British possessions other than those above named may be sent cheaper as letters (which see). Limitation of size for Foreign countries of the Postal Union is 18 in. long by 12 in. wide or deep, and to other places abroad the limit is 24 in. long by 12 in. wide or deep, or if in form of a roll, 30 in. long by 4 in. diameter. Limitation of weight is 4 lbs. to countries in Postal Union, and 5 lbs. to most other countries.

SAMPLES.—Boná fide trade samples, not being liable to Customs duties, and not sent in execution of an order, or by one private individual to another, may be sent by post to the Colonies and all Foreign countries at book post rate, but the lowest rate is 1d. The packet must be open at ends, but samples of seeds, drugs, &c., maybe sent in boxes or bags fastened so that they may be easily opened. Such samples must not be of saleable value, or of a dangerous or prohibited nature. Limit of size to any Foreign country in Postal Union is 12 in. long by 8 in. wide and 4 in. deep, or for packets in the form of a roll, 12 in. long and 6 in. diameter. To other Countries and British Colonies the limit is 24 in. by 12 in. by 12 in. The weight allowed varies.

POST CARDS may be sent to all the countries included in the Postal Union and to some other countries at one penny each. Regulations same as Inland.

REGISTRATION. - Fee and regulations same as Inland. Coin, jewellery, &c., is permitted to be sent to some countries, but value of contents must not be marked on outside. Letters containing bank notes, bonds, &c. can be insured when sent to some countries. By prepayment of an extra fee of 2¹/₄d. an acknowledgment of the receipt of a registered packet when sent to a country of Postal Union may be obtained from the addressee.

MONEY ORDERS.

INLAND.-The Rates for Inland Money Orders are as follows :--

minimum being od. FOREIGN MONEY ORDERS are issued in the United Kingdom to Foreign Countries at a uniform rate of 6d. for sums not exceeding

Digitized by GOOgle

£2; of 1s., not exceeding £6; of 1s. 6d., not exceeding £10. And Money Orders can be ad-vised by Telegraph to various Foreign Countries, particulars of which can be obtained on application at any Money Order Office.

POSTAL ORDERS.

Postal Orders are now issued at all Money Order Offices at the following rates :--1.3

IS. and IS. 6d	
2s., 2s. 6d., 3s., 3s. 6d., 4s., 4s. 6d., 5s.,	
2s., 2s. 6d., 3s., 3s. 6d., 4s., 4s. 6d., 5s., 7s. 6d., 10s., and 10s. 6d.	ıd.
I 5S., 20S	ıid.
Odd pence (not exceeding 5) may be aff	ixed
to the face of Postal Orders as value.	

POST OFFICE SAVINGS BANKS.

Sums of one shilling or of any number of complete shillings are received at all Money Order Offices, on deposit, but no one may deposit more than £50 in one year, ending December 31. Interest is allowed at the rate of £2 105. per cent. per annum. Smaller sums may be saved by purchasing penny postage stamps, and affixing them on a form, supplied at any post office; tweive stamps so affixed will

be received as a deposit of one shilling. INVESTMENTS. — Depositors can invest sums in Government stock, and all dividends in respect of such stock will be credited to the The commission charged for investments or sales is as follows: £25, 9d.; £50, 18. 3d.; £75, 18. 9d.; £100, 28. 3d. INSURANCES AND ANNUITIES.—The Postmaster-General is empowered to insure the

lives of persons between the ages of 14 and 65 aves of persons between the ages of 14 and 65 for not less than \pounds_5 or more than \pounds_1 too, and to grant annuities of not more than \pounds_1 too, and to lives of persons of the age of 5 and upwards. A life in the 30th year may be insured for \pounds_1 too by a single payment of \pounds_45 195. 6d., or by an annual payment through life of \pounds_2 6s., or by an annual payment up to the age of 60 of \pounds_2 125. 6d., or in guarterly. monthly. or fort-£2 125. 6d., or in quarterly, monthly, or fort-nightly payments in proportion.

INLAND TELEGRAMS.

The charge for telegrams throughout the United Kingdom is 6d. for the first 12 words and 1d. for every additional word, the names and addresses of sender and receiver being Names of places consisting of more vord will be charged as an counted. than one word will be charged as one; London District initials will be counted as one word ; figures will be counted as 5 for a word.

Porterage is charged at the rate of 3d. per mile (reckoned from the Telegraph Office), if the mile (reckoned from the Telegraph Office), if the telegram is for delivery beyond 3 miles from that Office (or beyond the town *postal* delivery). The sum paid for delivery is telegraphed to the delivering office, and if under calculated, the deficiency is charged on delivery, whilst any excess is refunded on application to the Secretary. Telegrams bearing the words "by post," or "by train" (which must be paid for) after the address, are forwarded by post or train from the delivering office, a deposit of 1s. being payable by

delivering office, a deposit of 1s. being payable by sender to cover cost of conveyance.

Telegrams repeated at the request of the sender are charged at one half the ordinary tariff; fractions of one halfpenny being reckoned as a half-penny. The money will, however, be refunded if it should turn out that the telegram has been inaccurately transmitted.

The cost of a reply, not exceeding 48 words in length, may be prepaid, and the reply may be sent, from any Telegraph Office, at any time, within two months after the date of the original telegram. A reply form may be used for an original message. Telegraph Offices are, as a rule, open from 8

a.m. to 8 p.m. on week days and Bank Holidays, and from 8 a.m. to 10 a.m. on Sundays, but there are several in London and provincial towns which are open continuously.

FOREIGN TELEGRAMS.

The following are the rates from any part of the United Kingdom. Address of receiver must be paid for as well as that of sender, if transmitted.

Aden, 3s. 9d. per word; Antigua, 4s. 4d. ; Argen-tine Republic, 4s. ; Austria, 3d. ; Azores, 9d. ; Bahamas, 2s. 5d. ; Barbados, 4s. 9d. ; Belgium, 2d. ; Bermuda, 2s. 6d. ; Brazil, 3s. 6d. to 6s. ; British Borneo-Labuan, 48. 10d., other places, 58.; Burmah, 38. 10d.; California, 18. 6d.; Canada, Is, to 25, 11d.; Cape Colony, 55.; Ceylon, 35. 9d.; China, 55. 5d. to 55. 7d.; Cuba, 15. 8d. to 15. 1cd.; Denmark, 3d.; Egypt, 15. 7d. to 25. 6d.; France, 2d.; Germany, 2d.; Gibraltar, 3d.; Holland, 2d.; Hungary, 3d.; India, 35. 8d.; Italy, 3d.; Jamaica, 35.; Japan, 6s. 2d.; Labuan, 45. 1od.; Madeira, 15. 2d.; Mauritius, 55.; Mexico, 15. 6d. to 25. 7d.; Natal, 45.; New Brunswick, 15.; Newfoundland, 15.; New South Wales, 45. 9d.; New York, 15.; New Zealand, 55.; Norway, 3d.; Nova Scotia, 15.; Orange River Colony, 45.; Penang, 45. 3d.; Philippine Islands, 85. 5d. to 85. 1od.; Portugal, 3d.; Queensland, 45. 11d.; Northern Rhodesia, 45. 5d.; Southern Rhodesia, 45. 2d.; Russia, 5d.; Singapore, 45. 3d.; South Australia, 35. 1od.; Spain, 3dd.; St. Thomas, 55.; Sweden, 3dd.; Switzerland, 3d.; Tasmania, 35. 1od.; Transvaal, 45.; Vancouver's Island, 15. od.; Victoria, 45. 8d.; Western Australia, 35. rod.; Zanzibar, 55.; Zululand, 45. In European telegrams no word may exceed 15. to 25. 11d. ; Cape Colony, 5s. ; Ceylon, 3s. 9d.;

In European telegrams no word may exceed 15 letters; in extra European, 10 letters.

PRIVATE TELEGRAPH WIRES.

Private wires are fixed by the Post Office autholities between two or more places at the following rates per annum :---

In London, over house or under ground, per

mile, ξ_5 ; on the roads, ξ_4 . Double wire for Telephone lines, ξ_7 and ξ_6 respectively. Other parts of the United Kingdom, over house or under ground, per mile, ξ_4 ; on the roads, ξ_5 . Double wire for Telephone line, ξ_6 and £5 respectively.

Rental of Instruments, including maintenance and repairs :-

A B C, per set (communicator, indica-tor, and bell), if rented from the department, per annum £4 o Single Needle and Battery, per annum 3 Printer and Battery, per annum...... 10 0 Telephones per set (transmitter, re-ceiver, bell, and battery) 2 0

TELEPHONE NOTES.

Telephone wires are supplied elsewhere than in London at the following annual rentals, including telephones :— not exceeding $\frac{1}{2}$ mile, £8; t mile, Lo; 1 mile, L10. Payments for Conversation.-Where Tele-

phone exchanges in different towns are connected by Trunk lines, such lines may be used for a three-minute conversation by local subscribers and the general public on payment of the follow-ing charges :-Between towns 25 miles apart 3d., 50 miles 6d., 75 miles 9d., 100 miles 13., and 6d. for every additional 40 miles or fraction.

The charge to the general public for conversa-tion with Post Office Telephone subscribers in the same town is 3d. for not more than three minutes' conversation.

Communication between London and Paris may be made at the G. P. O. West (Bath Street), West Strand Office, and Threadnuedle Street P.O. The charge is 8s. per conversation of three minutes. (Paris time is ten minutes in advance of London time.) London Telephones.—The new system of tele-

phonic wires in London, the laying of which has for months past caused such general inconvenience, is not yet in a sufficiently advanced state to permit any definite information concerning rates, &c. to be given, but there is little doubt that those at present in vogue will be very much reduced, and the telephone will practically be brought within the reach of every householder.

FORMS OF ADDRESS.

Kingor Queen.—To His (or Her) Most Gracious Majesty. May it please your Majesty.

Royal Family.-To His (or Her) Royal High-ness Prince (or Princess). May it please your Royal Highness.

RATES, TAXES, LICENCES, STAMP DUTIES, etc.

Affidavits.—An Affidavit or Statutory Declaration must be stamped with a half-crown stamp.

Except such as are to be used in any court or required by any Board of Revenue, or by law and made before any Justice of the Peace, or required at the Bank of Eng. or Ire. to prove the death of any proprietor, or for the transfer of stock, &c., or as to the loss, &c., of any bank note or bank post bill, or declaration required in order to a marriage without licence, or Declaration forming part of an application for a patent

Agreements or Contracts.—If under hand only of the value of $\pounds 5$ or more and not otherwise charged, the duty is sixpence which may be affixed by an adhesive stamp.

Agreements under L_5 or for hire of laborers or manual servants or for sale of goods, &c., or between master and men of a ship for wages need not be stamped.

Appointment of a New Trustee by any instrument except a Will, 10s.

Appraisement or Valuation. $-\pounds_5 - 3d$.; $\pounds_{10} - 6d$.; and for every \pounds_{10} up to $\pounds_{50} - 6d$.; above $\pounds_{50} - 5s$.; $\pounds_{200} - 10s$.; $\pounds_{500} - 10s$.; $\pounds_{500} - 10s$.; $\pounds_{500} - 10s$.; $\pounds_{500} - 10s$.

Apprentices' Indentures.—To be binding, these must be in proper legal form stamped with a half-crown stamp—an ordinary form of agreement will not suffice. The length of term, premium to be paid, remuneration to apprentice, &c., vary with the nature of the trade and the will of the parties. A statute of Queen Elizabeth fixed the term of apprenticeship at 7 years, and though this was repealed in 1814 that period is still regarded as the most satisfactory. An indenture is usually determined by the death of the master. In London, if bound to a member of one of the great City Companies, the apprentice is entitled to take up the "freedom of the City" at the expiration of the seven years on payment of a small sum.

Armorial Bearings, 215.; on carriage, 425. The term "Armorial bearings" includes any crest, coat of arms, or ensign, whether registered at the College of Arms or not, and whether used on plate, jewellery, paper or otherwise, but a licence to use on a carriage includes use in any other manner. Licences expire Dec. 31.

Armorial bearings used solely as Trade Marks or for Trade purposes of by any Corporation or Public Com-pany in their Corporate capacity are exempt.

Attorney, Letter or Power of-

For appointing Proxy at any single meeting, or adjournment thereof, 1d.

For receiving Wages or Prize Money, 15.

For the sale, transfer or acceptance of Government Stock, where the nominal value does not exceed £100--25. 6d. Any other kind, 10s.

Bills of Exchange-

A Bill of Exchange payable on demand, at a period not exceeding three days after date, on sight or on presentation, 1d.

A Bill of Exchange or Promissory Note of any other kind negotiated in the U. K.: No

ot abov	e £50	1	Not above £500	6
,,	100	2	,, 750	

25...0 3 100...1 0

And for every £100, or any fractional part of £100. 15.

Bills of Exchange drawn out of the United Kingdom, when negotiated here, exceeding £50 and not exceeding £100, 6d.; exceeding £100, 6d. for every £100 or part thereof. A Bill of Exchange is an unconditional written

order given for a consideration by one party (the Such a drawer) upon another (the drawee). document is of no commercial value till it is "accepted," and the acceptor then becomes

JOOGle

Digitized by 🕻

ł

primarily responsible for payment, the drawer only secondarily so, provided that if not paid at maturity the document is immediately "noted" in the proper manner. Before it can be paid, the Bill must be "endorsed" or signed across the back by the drawer. The customary form of acceptance for Form No. 1 would be "accepted, payable at (such and such) a bank," and the acceptor's signature.

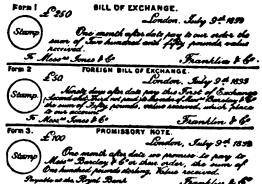

The person to whom a Bill is payable may

assign it to another by writing above his signature the words "pay to the order of" so and so. Instead of "one month after date," or "ninety days after date," any other period may be stated, or the Bill may be made payable at so many days or months "after sight" *i.e.*, after being presented for acceptance); or, again, immediately on presentation, by the substitution of the words "at sight." A Promissory Note does not require to be

"accepted," but must be endorsed by the payee

before value can be received. Three days' "grace" are Three days' "grace" are allowed after the date when a Bill becomes due, but this does not apply to Bills payable at sight. In foreign

countries the number of days of grace varies. Bills of Exchange and Promissory Notes due on any bank holiday are payable the day follow-ing; those due on Good Friday, Christmas Day, or on a Sunday are payable the day previous. The following are ordinary forms of Bills of Exchange and Promissory Notes:--

Bonds.—A Bond, Covenant, or Instrument, which is the principal security for any sum or sums of money at stated periods for a definite period, is liable to an ad valorem duty for the whole sum (see MORTGAGE).

If it is for life or other indefinite period, for every £5 or part of £5 of sum periodically payable, 2s. 6d.

In the case of any superannuation annuity: for every \pounds_5 or part of \pounds_5 of the annuity or sum periodically payable, 6d.

Bonds, by Acts of Parliament or by Customs or Inland Revenue, where penalty does not exceed £150, duty as in MORTGAGE. In any other

case, 55. A Bond on obtaining Letters of Administration in England or Ireland, or a confirmation of testa-

ment in Scotland, 5s. Carriage Tax.-The duty on carriages of all kinds (except Hackney Carriages) with 4 or more wheels drawn or fitted to be drawn by 2 or more horses or mules or propelled by mechanical power is 422. ; if by one horse or mule only, 215. ; with less than 4 wheels, 153. ; Hackney Carriages, 152. Only half the amount is charged if the licence is taken out after Oct. 1st in any year, but all licences expire on Dec. 31. On Motor Cars, in addition to the Carriage Tax a further day

is payable as follows: Weight, without water, fuel or accumulator, from 1 to 2 tons, 42s.: above 2 tons, £3 3s. (See also under Armorial Bearings and Servants.)

· · · ·

Carriages, Carts, Waggons, &c., used solely for convey-ance of goods for Trade purposes are exempt if the name, &c., of owner are legibly painted on them.

Contract Note, advising sale or purchase of Stock of the value of £5 and under £100-1d.; £100 or upwards, 1s.

A note advising sale or purchase of more than one description of Stock will be deemed to be as many notes as there are descriptions of Stock.

Conveyances.—A Conveyance or transfer, whether on sale or otherwise, of Bank of Eng transfer, land Stock, is liable to a duty of 7s. od.; of Canadian Stock, inscribed in books kept in the United Kingdom, and Colonial Stock registered under the Colonial Stock Act, 1877, of 2s. 6d. for every £100 or fraction of £100.

Conveyance or transfer on sale of any property (except such Stock as aforesaid), where the purchase or consideration money is not above £5-6d.

For every additional \pounds_5 , up to $\pounds_{25}-6d$.; for every \pounds_{25} , up to $\pounds_{300}-2s$. 6d.; for every addi-tional $\pounds_{50}-5s$.

Of any other kind, 10s.

See also under Securities.

Dog Tax.—The duty on any dog of the age of six months, no matter of what description, in England, Wales and Scotland, is 7s. 6d. Dogs under six months are not liable, but a licence must be taken out as soon as they attain that age. Dog licences are issued at all Money Order Offices and expire on Dec. 31st. The penalty for keeping a dog without a licence is \pounds_5 . In Ireland the licence duty for each dog is 2s.; the certifi-cate of registration bears a sixpenny Petty Sessions stamp, but one stamp suffices for each licence which mey include sources locat licence which may include several dogs.

Dogs kept and used solely by blind persons are exempt, and farmers and shepherds may obtain exemption for 2 or more dogs kept solely for guarding sheep, on making the necessary declaration.

Estate Duty.—This duty is payable upon the principal value of all property, real or personal, settled or not settled, which passes on a death. In estimating the value of the estate for duty, the funeral expenses and all outstanding debts and liabilities should first be deducted. The following are the rates of Duty :- £100 to £500, 1 per cent. ; are the rates of Duty: $-f_{100}$ to f_{500} , r per cent.; f_{500} to $f_{1,000}$, 2 per cent.; $f_{1,000}$ to $f_{10,000}$, 3 per cent.; $f_{10,000}$ to $f_{25,000}$, 4 per cent.; $f_{25,000}$ to $f_{50,000}$, 4 per cent.; $f_{50,000}$ to $f_{75,000}$, 5 per cent.; $f_{75,000}$ to $f_{100,000}$, 5 per cent.; $f_{150,000}$ to $f_{150,000}$, 6 per cent.; $f_{150,000}$ to $f_{250,000}$, 6 per cent.; $f_{250,000}$ to $f_{500,000}$, 7 per cent.; $f_{500,000}$ to $f_{1,000,000}$, 7 per cent.; above $f_{1,000,000}$, 8 per cent. In addition to the above, where property liable to Estate Duty is settled by the will of the de-ceased, or having been settled on or after Aug. 1st.

ceased, or having been settled on or after Aug. 1st, 1834, by some other disposition passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty called Settlement Estate Duty is payable at the rate of $\pounds x$ per cent. on the settled property, but from that payment the ad valorem stamp duty charged on the settlement may be deducted.

But where the net value of the property, real and personal, does not exceed £1,000, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from Legacy or Succession Duties.

Small estates up to £300 and £500 gross, are charged with fixed duties of 300. and 500., and are exempt from all other death duties.

Interest at 3 per cent. per annum is also payable on the Estate Duty from the date of the death down to the date of the delivery of the affidavit, or the expiration of six months after the death, whichever first happens.

The duty at the rate of 1 per cent. payable under the Acts relating to Legacy or Succession Duties, and the additional Succession Duties imposed by Sec. 21 of the Customs and Inland Revenue Act, 1888, are not leviable in respect of property chargeable with Estate Duty in cases where the deceased died on or after Aug. 1st, 1804.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, with interest at 3 per cent. per annum, but arrears of Estate Duty are

chargeable with interest at 4 per cent. per annum. In small estates, where the gross value does not exceed \pounds_{300} , probate and letters of administration may be obtained through an Inland Revenue Officer.

Game and Gamekeepers' Licences .- No one may use a gun without a proper licence. To carry a gun or firearm of any description the licence costs 107, and expires July 31. An annual licence for killing game, expiring July 31, costs £3; for 14 days only, 207. A short period licence from Aug. 1 to Oct. 31, or from Nov. 1 to July 31, costs \pounds_2 . A gamekceper's licence costs \pounds_2 , and anyone having the right to kill game in England or Scotland can take an annual licence out for any assessed servant to act as a gamekeeper for the same sum. Such licences expire July 31.

In Ireland the licence for a gamekeeper acting under a deputation registered with supervisor for a whole year costs £3: from Aug. 1 to Oct. 31,

sub-section 1.

In England the word "game" includes pheasants, partridges, grouse, black, heath or moor game, bustards and hares, but *owners* may kill hares without a licence. The penalty for killing game or using a gun without licence is £20. Shooting game on a Sunday is also illegal. General Bate.—This rate is one for meeting

various items of expenditure, such as paving, lighting, cleansing, &c. In counties it goes by the name of THE COUNTY RATE, in the Metro-polis it is called THE CONSOLIDATED RATE, and in a few Parishes and in all Boroughs THE GENERAL DISTRICT RATE. It sometimes in-cludes the School Board Rate. It is based on the same assessment as that used for the Poor Rate, and varies according to circumstances. As a rule it is payable quarterly (half-yearly in Boroughs).

The General Rate covers the expenses of watching, street lighting, repair and watering of streets and sewers, and the expenses of the Health Department and Hospitals.

Improvement Rate.-This provides for repayment of expenses of street improvements, quays, &c. the General District Rate is mainly for parks; the City Rate is applied to meet deficiencies in the City Fund for Criminal Prosecutions, salaries of officials, cost of markets, baths and wash-houses, weights and measures, registration expenses, fire brigade, &c.

It may be well here to say that the remarks in these columns concerning Rates can only be taken generally: the whole system of making and collecting Rates differs materially in different parts of the kingdom and ro definite rule can be stated in regard to them. Inhabited House Duty.— This is payable annu

ally in January. The rate of duty is fixed by the Commissioners quinquennially on the full estimated annual value of all houses of the rental value of £20 or more, less local rates.. The guinquennial assessment of 2000 is at present in force for the metropolis, the present rate of duty being as follows: —On inhabited houses the annual value of which exceeds \pounds_{20} but does not exceed \pounds_{40} , if used for the sale of goods, the shop or warehouse being on the ground floor; or for the retail of beer, wines or spirits; or if occupied by any person carrying on the business of an hotelkeeper, inn-keeper, or coffee-house keeper, al-though not licensed to sell therein by retail, ale, wine, or other liquors ; or is occupied by a tenant or farm servant for husbandry purposes only, for every 20s. of annual value, the sum of 2d. If.

not so used or occupied, 3d. When the annual value exceeds £40 but does not exceed £60, if used or occupied as above, 4d. If not so used or occupied, 6d.

When the annual value exceeds £60, if used or occupied as above, 6d. If not so used or occu-pied, 9d. Lodging houses, if registered, are sub-ject to the reduced duty only. Artizans' dwellings (where the annual value of each dwelling does not

amount to £20) are exempt. Tenements, or parts of tenements, occupied solely for purposes of trade, or for purpose of any profession or calling, are exempt from duty (see

44 Vict. c. 12, s. 24). Income Tax is collected under five Schedules. Schedule A is the landlord's tax, and is based on the rent or annual value of the property rated, less the statutory deduction for repairs.

These are as follows:

1. Lands (inclusive of the farm house and other buildings, if any) one-eighth of the full annual value.

2. Houses or buildings (exclusive of farm houses or buildings assessed with lands) onesixth of the full annual value; but where tenant pays cost of repairs, the deduction is not to exceed such a sum-not being more than one-sixth of the annual value-as will reduce the net assessment to the actual amount of rent.

The tenant pays this tax, but, as is shown above, is entitled to deduct from the next payment to the Landlord for rent the whole amount or such part of it as represents the actual annual (See below.) rental.

Schedule B is for incomes derived from the use of land by farmers and others, and is based on the rent paid, the assessment being one-third of the rent or annual value, including Tithe Rent charge (if any). Schedule C applies to incomes derived from

Government dividends and annuities. Schedule D is for trade and professional incomes, and those not included in any other Schedule. Under this Schedule the tax is pay-able annually on or before January 1st, and is based, not on a person's actual income for the past year, but on an estimate of what it is likely to be for the *coming* year (or rather on the year ending April 5th ensuing), such estimate being obtained by ascertaining the *average* of the three years ending April 5th immediately preceding that date (January 1st) on which the person's accounts were made up to. The rate per faccounts were made up to. The rate per \pounds varies according to the requirements of the Government, as indicated in the Annual Budget.

The Finance Act of 1897 enacts that where the total joint income of a husband and wife does not exceed £500, and they are engaged in separate businesses, if the income of each is under the limits within which abatements may be claimed, they shall nevertheless be entitled to claim same.

Digitized by GOOgle

Persons who pay life assurance premiums are entitled to deduct the amount of annual premium from the estimated income to the extent of one-sixth of the income by filling up the space left on the official forms for the purpose. But should the income thereby be reduced below the above limits, such deduction will not entitle to total or partial exemption.

Schedule E is for persons employed by public companies, corporations. &c. The rate of Income Tax for the present year is

15. 2d. in the £ under each Schedule. Relief is given in certain cases under Schedule A to the extent of $\frac{1}{4}$ or $\frac{1}{4}$ of the assessment. Under Schedule B the tax is charged at the full rate on one third of the full annual value of the lands without any deduction.

Incomes not exceeding the following sums are entitled to the abatement named against each :---

Not exceeding £400 an abatement of £160; £500 of £150; £600 of £120; £700 of £70. The following shows amount payable on incomes varying from £200 to £1000:-

Tax			ax,		Γax.	
££s.	đ.	££	s. d.	££	s.	ď.
£ £ 5 200 2 6	8	50020	84	80040	13	4
250 5 5	0	55025	1 8	85049	11	8

85011 1	8	65033 1	6 8	95055		
40014 0	0	70036 1	50	100058	6	8
45017 10	0	75043 1	5 0	1		

The Land Tax is payable under Schedule A of the Income Tax and is paid by tenant and de-ducted from rent. There is a fixed quota for each parish which, under the Finance Act, 1896,

is not to exceed one shilling in the L. Under the Finance Act of 1898, owners of property whose incomes do not exceed £160 are relieved of payment of land tax, while an allow-ance of half the tax is made to owners whose incomes exceed £160 but do not exceed £400.

When land tax has been assessed, a certificate from the surveyor of taxes allowing total ex-emption or abatement, as the case may be, must be produced before the amount of the assessment has been paid.

The owner of any land may in any year re-deem the Land Tax charged on such land by payment of a capital sum, equal to thirty times the sum assessed on such land by the assessment last made and signed, and such sum may be paid either in a single payment or by such annual instalments as may be agreed upon with the Commissioners of Inland Revenue, and interest at the rate of three per cent. per annum on so much of the capital sum as remains unpaid shall be payable with each instalment, and all the instalments remaining unpaid may be paid at any time.

Leases.—For a definite term under a year of any unfurnished dwelling the rent of which does not exceed the rate of f_{10} a year the stamp duty is 1d.; of any furnished dwelling, or apartment, the rent of which exceeds £25 a year for such term, 2s. 6d.

NEW YORK PUBLIC LIBRA

9£

Legacy Duty.—Legacy Duty is payable on all legacies willed by a deceased person, on the following scale :— To children of the deceased, or their descendants, or to the father or mother or other lineal ancestor of the deceased, \pounds r per cent.; to brothers and sisters of the deceased, or their descendants, \pounds_3 per cent.; to an uncle or aunt or their descendants, \pounds_5 per cent.; to a great-uncle or great-aunt, or their descendants, \pounds_6 per cent.; to any person in any other degree of collateral consanguinity, or to a stranger in blood to the deceased, \pounds ro per cent. Legacy to a husband or wife is chargeable with Estate Duty, but not Legacy Duty. (See also Estate Duty.) Limited Liability Companies,—The Capital of Companies with Limited Liability, otherwise than under the Companies Act, is liable to a strang duty of 2s. for every \pounds roo. Statement of capital is to be other lineal ancestor of the deceased, £1 per cent.;

of 2s. for every £100. Statement of capital is to be delivered to the Commissioners of Inland Revenue within one month after date of letters patent or passing of Act, under a penalty of 10 per cent. per month for every month after the first month.

Companies Limited by Shares are liable upon the nominal capital, original or increased, to a

duty of 5.5, per cent. **Male Servants** of any age require a licence which costs 15.5, and expires Dec. 31, but a person who is bona fide engaged to serve for part only of each day and does not reside in his employer's house is exempt.

Harketable Security.-(1) Marketable Security. (a) A Colonial Government Security, or (b) a Security not transferable by delivery, or (c) a Security transferable by delivery. The same ad

valorem duty as upon a mortgage. (d) A Foreign Marketable Security issued abroad and interest payable there if assigned, transferred or negotiated in the United Kingdom For every Lio or part after 1st. Aug., 1899.

thereof, 1s. (2) Transfer, Assignment, &c., of a Marketable Security-

Upon a sale thereof, see Conveyance.

Upon a mortgage thereof, see Mortgage of Stock or Marketable Security.

In any other case, 105. (3) Marketable Security (except a Colonial Government Security), transferable by delivery.

For every £10 or part thereof, 1s. (4) Marketable Security (except a Colonial Government Security) as last aforesaid given in substitution for a like security duly stamped in conformity with the law in force at the time when it became subject to duty-

For every £20 or part thereof, 6*d*. Mortgage Bond, &0. (except a marketable security) :-

(1) Being the only or principal or primary security (other than an equitable mortgage) for the payment or repayment of money-

For every £100 or part thereof, 6d. (3) Being an equitable mortgage— For every £100 or fractional part, 1s. (4) Transfer, Assignment, Disposition, or As-signation of any mortgage, bond, debenture, or covenant (except a marketable security), or of any

money or stock secured by any such instrument, or by any warrant of attorney to enter up judg-

ment, or by any judgment— For every £100 or part thereof (exclusive of interest which is not in arrear), 6d.

(5) Re-conveyance, Release, Discharge, Sur-nder, Re-surrender, Warrant to Vacate, or render, Renunciation of any such security as aforesaid-

For every £100 or part thereof, 6d. **Poor Bate.**—This is an important rate, as the amount of assessment for Poor Rate is taken as a basis for all other local rates. A valuation list is prepared periodically by the Overseers, and, after publication, is sent to the Poor Law Guardians. After hearing any objections that may be made, they modify the list as they think fit and sign it. It is then taken as the basis for making various rates for the ensuing twelve months; taxpayers should therefore be particular to see that the amount of their assessment for this rate is correct. An important point to note is that where the tenant does the repairs,* one-sixth of the Gross Rental is allowable for doing them, and this **reduced amount is the amount** on which **the** rate is payable. Notice is usually given of the rateable value, and not of the gross value, except in the quinquennial year, when the gross value is notified. This gross value is arrived at, in cases of leases, or where the tenant repairs and pays insurance, by adding a percentage according to the duration of the lease or agreement; thus. say the rent is £60, to per cent. would be added for a supposed lease = £65, and one-sixth being deducted from this would give \pounds_{55} as the rateable value. The tenant seeing that this was less than the rent would be satisfied but was less than the refit would be satisfied but should there be no lease, and should repairs be done by the tenant, the proper amount would be $\pounds 60$ less one-sixth = $\pounds 50$. The proper time to object is before the assess-ment list has been signed by the Guardians; for that the object proper their denies is

after that, the only appeal from their decision is to quarter sessions, or on structural alterations or

new lettings. **Police or Watch Bate**.—By the 2nd and 3rd Victoria for regulating the Police in the City of London, all premises in the City, whether occupied or otherwise, are liable for this rate. The amount payable is arranged on the basis of the Poor Rate Assessment; it varies according to circumstances, but is usually 5d. in the \pounds . Of this 2d. is payable for the first quarter, and 1d. each for the other three quarters. In other places this rate is included in the Borough rate (Municipal Corporations Act, 1882), and the amount is collected with the Poor Rate. **Probate Duty Grant.**—The probate duty grant

to local authorities was replaced in 1894 by a grant out of the estate duty derived from personal property of a sum of one and a half per cent. on the net value of the property which would, but for the substitution of estate duty, have been chargeable with probate duty.

Railway Passengers' fares.-(Except fares not exceeding 1d. per mile). Urban District traffic 2 per cent. ; other 5 per cent.

Receipts for the payment of £2 or upwards, 1d.

The School Board Rate is levied upon the total rateable value (Poor Rate), and the amount varies according to the expenditure of the local School Board. In some places the School Board issue a precept on the Council for the

[•] In some places it is where the *landlord* does the repairs that the deduction is made as it is assumed that when the tenant does the repairs he is getting the premises at a lower rental than he otherwise would.

amount they require, and the Council in turn issue a precept on the Overseers or Guardians who collect the School Board Rate with the Poor Rate.

Water Rate .- This varies very considerably both in amount and in basis in different localities. but is usually payable half-yearly at Lady Day and Michaelmas. One of the oldest London Companies is the New River Company, and the manner in which their charges are arranged may be taken in some measure as fairly representative of others.

By the Water Rate Definition Act (1885) the "Annual Value" is declared for the purposes of this Company within the Metropolitan area to be the rateable value of the premises as settled by the local authorities. If such value does not exceed \pounds_{200} , 4 per cent. is charged for the water supply; if it exceeds \pounds_{200} , 3 per cent.; services more than 160 ft. above Trinity high water mark are charged 1 per cent. extra.

A further charge is made for baths and water closets as follows :--

If annual value exceeds-

f.30 but not f.50. 4s. for one w.c. or bath.

				~		•••

METRIC SYSTEM OF WEIGHTS AND MEASURES.

The metric system is derived from a measurement of the earth, the metre being the ten-millionth

The metric by seeing a drawn from the pole to the equator, and is equal to 39 570113 inches. The metre—the standard of length—is represented by the distance marked in the Board of Trade Standards by two fine lines on an iridio-platinum standard bar, when at the temperature 6° Centigrade. It is the only unit of metric measure of extension from which all other metric measures of extension, whether linear, superficial, or solid, are ascertained.

The kilogram—the standard of weight—is represented by the cylindrical iridio-platinum standard kilogram weight deposited with the Beard of Trade. It is the only unit of metric weight from which

all other metric weight, and all measures having reference to metric weight, are ascertained. The *litre*—the standard of capacity—is represented by the capacity at 0° Centigrade of the cylindrical brass measure deposited with the Board of Trade. This litre at 0° Centigrade, when full, contains one kilogram of distilled water at the tempsrature of 4^o Centigrade, under an atmospheric pressure equal to that represented by a column of mercury 760 millimetres high at 0° Centigrade, at sea level, and at latitude 45°; the weighing being made in air, but reduced by calculation to a vacuum. It is the only unit of metric measure of capacity from which all other metric measures of capacity, as well for liquids as for dry goods, are ascertained.

wen for inquity as for the goods, are ascertained.

WEIGHTS AND MEASURES.

Miscellaneous.

Skins, a dicher is 10 skins, a last is 20 dichers. Straw, load = 36 trusses (11 cwts. 46 lbs.). truss of = 36 lbs.

Tea, chest of, Congou = 80 to 100 lbs.

Hyson = 60 to 80 lbs. ,,

Timber, a load of unhewn, 40 cubic feet. Wool, a tod is 28 lbs.

Commercial Table.

12 Articles = 1 dozen or 13, a baker's dozen. 20 Articles = 1 score.

MUSHROOMS.—A punnet holds about I lb. PEACHES, NECTARINES, and APRICOTS.

PEAS. —A sieve is equal to one bushel, contains rot imperial gallons, and is 17t inches in diameter

POTATOES, New, are generally put up into 2-lb. punnet baskets; Old, are sold by the bushel,

RADISHES.-A hand from 12 to 30 in number,

RHUBARB.—A bundle from 20 to 30 stems,

STRAWBERRIES are sold in boxes of punnets of

1.0.134.001

varying size, generally holding 1 lb.; handled baskets, 4 to 6 lbs.; pecks, 10 to 12 lbs. TURNIPS.- A bunch from 20 to 25.

144 Articles = 1 gross.

Baskets of 6 or 12 or 24.

according to the season.

according to size and season.

sack, or ton.

at top and 111 inches deep.

GREENGROCERS' MEASURES,

SEEDS TO SOW AN ACRE.

The following is necessarily approximate, the quantity will vary according to the nature of the solution and other conditions :-

Barley, 3 bushels.	Lawn Grass, 35 lbs.	Rye Grass and Clover, 1 peck
Beans, 2 bushels.	Lucerne, 20 lbs.	Grass, with 14 lbs. Clover.
Beet, 12 lbs.	,, drilled, 15 lbs.	Sanfoin, in husk, 5 bushels.
Cabbage in drills, 6 lbs.	Lupine, 3 bushels.	
Canary, 3 pecks.	Mustard, 20 lbs.	Sunflower, 8 lbs.
Carrot, 8 to 9 lbs.	Oats, 4 bushels.	Swedes, 4 lbs.
Chicory, 8 lbs.	Parsnips, 8 to 9 lbs.	Tares, Spring, 2 to 24 bushels.
Clover, 14 to 16 lbs.	Peas, 3 bushels.	Winter, 24 bushels.
Gorse for Cover, 30 lbs.	Potatoes, 24 bushels.	Trifolium, 24 lbs,
" Cutting, 50 lbs.	Rape, r gallon.	Turnips, 3 to 4 lbs.
Kohl Rabi, to transplant, 11 lb.	Rye, 3 bushels.	Wheat, 2 bushels
,, in drills, 4 lbs.	Rye Grass, 3 bushels.	÷.

SEEDING POWER OF WEEDS.

The following shows the number of seeds in *a single plant* of the various weeds named. This explain the rapid growth of weeds when allowed to go to seed.

the rupta Browth of weeds when anowed to go to seed.							
Dandelion	2,040	Shepherd's Purse 4,500	Corn Sow-thistle 19,0				
Corn Cockle	2,592	Cow Parsnip 5,000	Burdock 24,5				
Musk Thistle	3,750	Common Dock 13,000	Red Poppy 50,0				
Charlock	4,000	Oxeye Daisy 13,500					

MANURES AND THEIR USE.

Name.	Suitable for Grasslands, turnips, and wurzel	Quantity per Act
Bone dust	Grasslands, turnips, and wurzel	14 bushels
Gypsum	Clover, potatoes, grass	
Nitrate of Soda (with Salt)	Grain crops	
Peruvian Guano	Crops of all kinds	
Rape cake	Grain crops	6 cwt.
Salt	Wurzel, grain, &c.	1 to 2 cwt.
Soda	Grain, potatoes, turnips	85 beele
Sulphate of Ammonia (with Salt)	Grain crops	1 to 2 cost.
Superphosphate of Lime	Grain crops and turnips

PROVINCIAL BANKING DIRECTORY

AND LIST OF

MARKET AND EARLY-CLOSING DAYS, FAIRS, &c.

N.B.—The Fairs mentioned in this list are those authorised by Original Charters. Acts of Parlia-ment, Orders in Council, &c. Unofficial Fairs are not included. No trouble has been spared to make the list reliable, but it has been found in practice that the owners of many of the Fair rights change the dates from year to year without authority, and in other cases authorised Fairs are not held. The publishers cannot, therefore, hold themselves responsible for loss or inconvenience which may arise from inaccuracy, but will be grateful to have their attention drawn to any apparent error.

pl., pleasure; sh., sheep; w., wool; wtr., winter; smr., summer. The figures and letters in parenthesis after name of town indicate the Market Day, Early-closing Day and Hour, and Population in thousands (census 1891).

The figures in heavier type at the end of each paragraph refer to the list of London Banks on page 116, and to the list of Head offices of Country Banks on page 115, thus enabling the reader to ascertain the names of all Bankers or branches of Banks carrying on business in each place.

NOW IN PREPARATION.

£50,000 represents the value of the pictures painted for this great work, now reproduced for the first time.

In Shilling Fortnightly Parts.

British Battle

FROM HASTINGS (1066) TO COLENSO (1900).

Charles Letts & Co. have pleasure in announcing the forthcoming issue of an entirely new enterprise, of a nature <u>absolutely unparalleled in the History of the</u> <u>Publishing World</u>. The work will form an historical account of the great battles of the British Army, dating from the Battle of Hastings (1066) to the present time, told by a series of beautiful photogravures from paintings executed specially by one of the most celebrated Battle Painters of the age, who for upwards of three years has been all but exclusively engaged on this great enterprise.

UNIQUE IN ITS MARVELLOUS VALUE. Unique in its artistic excellence. Unique in its absorbing interest.

All who are interested should send a stamped and directed envelope to the Publishers, who will post a prospectus as soon as issued.

GOOD SPECULATION!!

"A room without Pictures is like a house without windows."-John Ruskin.

"Examples of Great Artists."

N consequence of the eager support given to the publication, "The Hundred Best Pictures," and the number of pictures which were necessarily crowded out of the first hundred, the publishers are induced to give their subscribers a further opportunity of improving their acquaintance with the work of great artists. As they believe it to be the artist's mission to illumine every phase of human thought, it will be their object, by the excellence and variety of their reproductions, to enable people to appreciate the reality of this mission, and to understand how amply it has been fulfilled throughout the world. In the serial publication, "Examples of Great Artists," the publishers will reproduce the work of artists of all times and nations, and will appeal not only to men especially versed in the technicalities and the subtleties of Art thought, but also to that wider public which desires to make a knowledge of Art an abiding interest in Home life.

This publication is the only one which gives away with each part

Six Genuine Photogravures

OF THE WORLD'S FINEST PICTURES.

each one being worthy of a frame on the walls of the highest in the land.

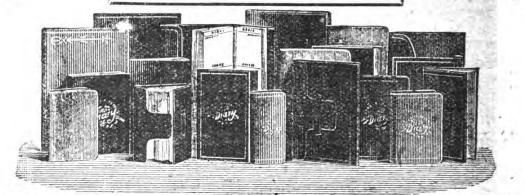

As in the case of "The Hundred Best Pictures," the Parts are certain to rise in value as only a limited number are printed. You should therefore order at once of your stationer.

To be completed in 17 Fortnightly Parts at One Shilling per Part.

N. B. — The time of Birth must be given in all cases as correctly as possible, and where the exact time is not known, or only approximate time, the Photograph should be enclosed, which will be returned with the calculation. Please say where born, or give latitude and longitude of the place, and if married or single, male or female, date and year. Fees are prepaid.

Address—GEO. WILDE, 6, Central Street, Halifax, Yor'kshire.

The following letters are selected from some hundreds of Testimonials:

DEAR MR. WILDE, — My sister wishes me to tell you that she is much better. Indeed, Mr. Wilde, everything you have told us has been so very correct we feel we don't know what to say to you. God has certainly given you great powers. P. M.

DEAR SIR,—It gives me great pleasure to acknowledge the receipt of papers. You said March would be a good month to apply for advancement, that I might have slight benefits or a little money gain. Well, this has just been verified, for March has brought me an increase of salary, which truly is a benefit. B. F. L., Consular Service.

DEAR SIR,—I received your welcome letter this morning, and was not only astonished, but delighted, with your great ability. It is all of it perfectly true. A gentleman like yourself ought never to die, you are so very true and clever. W. G. H.

DEAR SIR,—Many thanks for the horoscope of my son. I think it very good indeed. You are quite right in saying he should be a telegraphist; that is what he is—in South Africa.

DEAR SIR,—Everything so far has come to pass exactly as you predicted. You told me that in the spring of 1901 I must take special care of my cattle, or you feared I would lose some. The prophecy was made two years ago, and this month I have had two cows just on the verge of death. In fact they were quite given up and had been left to die. You told me two years ago that in the end of the year 1900 there were signs of a lawsuit and that I should be the loser. I did lose money through a lawsuit, and had to pay costs, in December 1900. But these are only two of the numerous prophecies which have come to pass. J. H.

DEAR SIR,—I beg to thank you very much for horoscope duly received, which I think *is wonderfully correct*. I showed it to a friend; she was much surprised, and said, had you known me all my life you could not have read me more correctly. S. G.

If you suffer in Health, try WILDE'S HEALTH PILLS, sold at $1/1\frac{1}{2}$ and 2/3 per Box. From GEO. WILDE, 6, Central Street, Halifax.

They will cure those who suffer from Stomach, Bilious, Liver and Kidney troubles, Nervousness, Rheumatism, and Constipation. They are made entirely from herbs and roots; they are Nature's remedies.

"MONEO ET MUNEO."

*SPECIAL CONCESSION TO REGISTERED HOLDERS OF CHARLES LETTS & CO.'S INSURANCE COUPONS.

CHARLES LETTS & CO. have again arranged with the General Accident Assurance Corporation Ltd. that all Registered Holders of the Accident Assurance Coupons issued by them in their Diaries, Note Books, etc., shall continue to have the special concession of obtaining a Policy of Assurance covering the Household Effects at their Private Residences against any loss by Burglary and Housebreaking up to £500 at an annual premium of 5/- (which is about half the usual charge), provided application is made on the attached form and forwarded to the General Accident Assurance Corporation Ltd., at Perth, with Postal Order for 5/-, within one month of the registration of their names under the Accident Coupons.

A Coupon holder who has no household furniture will be allowed to nominate a friend by signing name and giving registered number in space provided on other side.

Several Thousand Purchasers of CHARLES LETTS & CO.'S DIARIES availed themselves of this concession last year, and a number of claims were received and promptly settled to the entire satisfaction of the Policy Holders.

There are **80,000** Thieves known to the Police in Great Britain, and thousands of Burglaries are happening each month. Everyone should therefore cover the risk when they can do so for so nominal an annual payment.

THE GENERAL ACCIDENT is the oldest Burglary Insurance Company in the country, having transacted the business since 1889, and its Assets as security for Policy Holders exceed £500,000.

The Policy contains no average clause, and the Corporation is therefore liable up to the full amount insured in the event of a claim. The Property of all members of the Assured's Family and of Domestic Servants is covered.

"THE CHEAPEST ACCIDENT INSURANCE EVER OFFERED." FURTHER CONCESSIONS FOR PURCHASERS OF CHARLES LETTS & CO.'S DIARIES, &c.

CHARLES LETTS & CO. have arranged that all Registered Holders of their Coupons shall, in addition to a continuance of the benefit of the cheap Burglary Policy offered last year (as per particulars within), have the Special Concession of obtaining at about half the usual charge a "SOVEREIGN" PERSONAL ACCIDENT POLICY,

in commemoration of the Coronation Year.

The Premium of £1 per annum will assure:£250 in case of death.
£150 for loss of both eyes, legs or arms.
£100 for loss of one eye, one leg or arm.
£2 per week during temporary total disablement, for a period not exceeding ten weeks.

The Policy will cover all Accidents happening while travelling as a passenger in any and every sort of public conveyance on land, and while engaged in cricket, golf, tennis, croquet, polo, hockey, lacrosse, cycling (other than racing), riding (excluding racing); also accidental injuries sustained while in a public road or thoroughfare, as a private individual not engaged in business or occupation.

.....

It also extends the allowance of $\pounds 2$ per week, for a period not exceeding ten weeks, in case of disablement from Smallpox, Typhoid, Typhus, or Scarlet Fever.

The Policy is free from the many vexatious conditions and restrictions common to the Policies of other Companies, and we have arranged that the Corporation shall; if required by our Coupon Holders, increase the benefits to any extent up to five times, at a proportionate increase of premium.

The General Accident Assurance Corporation has over HALF-A-MILLION of Assets as security for its Policy Holders. It has a Premium Income of over £200,000, and has paid in compensation to Assurers over £400,000.

Those who for various reasons do not wish to avail themselves of this offer will be allowed to nominate another by signing their name and giving registered number in space provided on other side.

NOTES ON THE

TWO HUNDRED AND SIXTH ISSUE

OF

MOORE'S ALMANA

ONE of the most astounding proofs of the truth of the science of the Stars is afforded by the awful catastrophe which, on the 8th May last, overtook and swept away the town of St. Pierre in the island of Martinique. That day there was an eclipse of the Sun accompanied by the presence of no less than FIVE of the planets in the earthquake-producing signs of the Zodiac. These premonitory indications of seismic disturbances have been current knowledge with all students of the celestial science for the past sixty years, and from these or similar positions of the heavenly bodies all the great disturbances of the earth have been accurately predicted in the past. The preceding new Moon on April 22nd was a total eclipse of the Moon, and under that head (page 6, Alc. 1902) will be found a very explicit warning of the impending earthquakes.

Considering the wonderful revelations of wireless telegraphy and Xradiation, it would be mere waste of words to labour an argument in favour of interplanetary action. We have only to consider the solidarity of the solar system for a moment to be assured that such interplay of forces between the various bodies of that system must be a fact in nature.

> FRANCIS MOORE, Physician.

3

NOTES ON THE YEAR.

During the first five centuries after the birth of Christ, the Christians comparatively few in comparatively rew in number, and scattered among different and dis-tant peoples, used in their records no other mode of expressing dates than those which prevailed amongst the nations of which they severally formed a part. In 532 A.D., when their numbers and importance had augmented, Diony-sius Exiguus, a monk of Scythian birth, proposed that all Christians should adopt the enoch of the that all Christians should adopt the epoch of the birth of Christ as their point of departure in counting time and in the expression of dates. This rendered necessary an investigation into the question of the date of that event. Dionysius made historical researches, and finally assigned the birth of Christ to the 25th day of December

Dominical Letter for t		r the year 1902		D	D Solar Cycle for the year 1902	
Golden Number _ Epact))))))))	••••••		4 Roman Indiction ,, 2 Julian Period, Year of ,,	1 6616

The Dominical or Sunday Letter is the letter of the alphabet used to indicate the incidence of the Sundays in the Ecclesiastical Calendar—thus in 1903 the first Sunday will fall on the fourth day, and the letter D (4th letter) will fall opposite the first and every following Sunday for that year. The Golden Number is the number of years

dapsed in the Lunar Cycle or period of 19 years, at the end of which period the same aspects of the moon recur within an hour and a half of the same times.

The Epact is a number representing the age of the moon on the first day of the new year.

The Solar Cycle is a period of 28 years, within

300gle

Digitized by

in the 753rd year from the foundation of Rome (but this is now admittedly erroneous).

It might have been expected, therefore, that It might have been expected, therefore, that the first Christian year would commence on that day, and that its anniversary would be the first day of each succeeding year. It was, however, found inconvenient to change the commencement of the year, and it was resolved to adhere to that -that is, to the rst January, and that the first year of the Christian era should be the 754th year from the foundation of Rome. According to the mode of reckoning finally adopted, there-fore, the year I A.D. was that which commenced at the moment of the midnight between the 31st December in the 753rd year, and the 1st January in the 754th year of Rome.

which the Dominical or Sunday Letters, and those that express the other festivals, &c., return in the same order as before.

The Roman Indiction is a period of 15 years, used by the Romans for the time of taxing their provinces.

The Julian period contains 7980 years (being the Lunar Cycle of 19, the Solar Cycle of 28, and the Roman indiction of 15 multiplied together). The Julian period is reckoned as having begun 4713 years before our era, so that the year 1903 corresponds with 6616 of that period. It is used in astronomical and chronological calculations throughout the world.

MOORE'S FULFILLED PREDICTIONS OF 1902.

PREDICTIONS.

"The winter quarter will be a critical time for Great Britain, and Europe generally. The price of foodstuffs will be far too high for the slender purses of the industrial people."—Almanac, 1902, p. 5.

"At Capetown a manifest improvement will set in."—*Ibid.*, p. 5.

"Progress can be but slow while martial influence remains in force, and the expenditure on an increased army and navy and interest on the national debt will neutralise the gain of an increased revenue."—*Ibid.*, p. 6.

"The opposition of the Moon to Mercury threatens some loss of trade by foreign competition."—*Ibid.*, p. 6.

"The Total Eclipse of the Moon April 22 falls in the second degree of Scorpio, a sign productive of earthquakes. We shall soon hear of severe shocks."—*Ibid.*, p. 6.

"The Sun enters Cancer, June 22nd, 1902 Venus culminates in Taurus National festivity."— *Ibid.*, p. 6.

FULFILMENTS.

The prolongation of the war in South Africa, and the consequent taxes on coal, sugar, and cereals produced a most depressing effect on the public mind.

Early in the year the permit to open up the mines caused a flush of prosperity in commercial centres, and the removal of military law further enhanced the effect.

Peace was not declared till May 28th, and the Budget figures were exactly in line with the prediction.

•

The great American shipping combine, engineered by Pierpont Morgan, was a source of considerable anxiety to the nation. It was an attempt to capture the transatlantic shipping trade.

The destruction of the chief port of Martinique by the eruption of Mount Pelée, and the earthquake shocks in other parts of the West Indies, in Chili, &c., were supplemented by tremors in France and Cornwall.

The preparations for the Coronation of His Majesty King Edward VII. amply justify this.

The above notes constitute a few examples of the power of forecasting the probable trend of events in the political, social, and financial worlds. As time goes on the possibility of using this power in individual and national affairs will become ever more popular. It is futile to suppose that men like Tycho Brahe, Kepler, Sir Isaac Newton, Sir George Witchell, Russell of Killowen, and men of similar calibre, could subscribe their belief to a mere superstition. Ignorance of the *modus operandi* of the planets in human affairs is unfortunately all too prevalent, but that circumstance does not negative the operation of natural laws, and it is only the untrained mind that takes refuge in such phrases as "coincidence" and "chance." All coincidences are expressions of natural law, and where Law reigns Chance can have no place.

Digitized by Google

PREDICTIONS FOR THE YEAR.

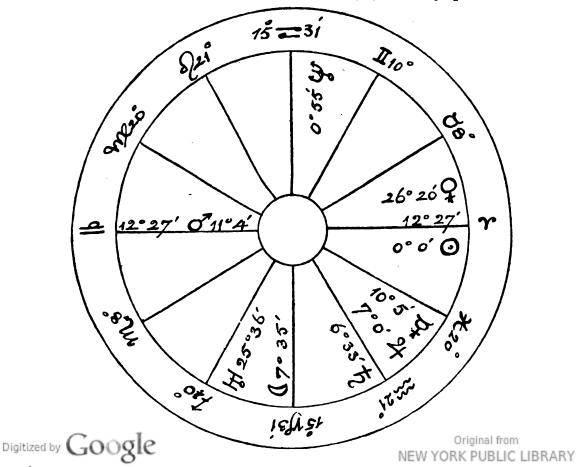

The Sun enters Capricornus, December 22nd, 1902, at 6h 37m p.m.

At the solar ingress into Capricornus the luminary will be thirty degrees below the horizon of the west, in conjunction with Venus and Mercury and opposition to Neptune. It will also have the quadrature of the planet Mars at the same time. The Moon in the northern angle will have the quadrate aspect of Saturn. These positions are fraught with evil import as regards the national health and the chief branches of public service. Besides the prevalent chest colds and rheumatism incident to the season of the year, there will be a prominent recrudescence of the more formidable evils of typhoid and cancer. The season will be very cold, and heavy cyclones will do inuch damage to property. The national service will find a fresh incentive to activity in the large equipments of the forces in other countries. The Government will not be popular and may go near defeat on one of two points, namely, army equipment and supply, or the produce tax. Farming interests will suffer both from legislation and the inclemency of the weather. Theatres and places of amusement will prosper. Railway accidents are imminent about the time of the festive season, while the state of the weather about Christmas will dispose to accidents among coasting vessels. Our colonial interests will prosper during the quarter, and about the beginning of February there will be especial cause for gratification in this direction.

The general import is rather in the direction of sweeping reforms, revolutions, and initiations of a progressive nature. Fiscal reforms are imperative.

The quarter is evil for the general fortunes of Cape Colony, where there will be much sedition afoot; for Argentina, Austria, India, and Greece. In Argentina there will be some intestinal feuds, leading to civil war.

The Sun enters Aries, March 21st, 1903, at 7^h 15^m p.m.

Again the Sun is below the horizon at the ingress. It is found in quadrate aspect to Neptune in the ninth division of the heavens. The planet Mars is exactly rising. This will cause some stirring events to transpire about the beginning of April, and it would not be surprising to learn that a plot was on foot to affect our interests in South Africa. It will be an unexpected mercy if we avoid fighting and bloodshed. Our railways will record more than one accident, but chiefly about the middle of June,—the influences are disposing to recklessness and casualty. The weather will remain cold and cheerless well into April. Crops will suffer from the depletion of the earth's magnetism and heat. Educational reforms will be enacted for the benefit of the up-growing generation. Death duties may be remitted in May. The public health will be good, but there remains the danger of a typhoid outbreak. At Naw York the indications are of a peaceful and beneficial order but

At New York the indications are of a peaceful and beneficial order, but there is danger of a railway accident of some magnitude.

At Calcutta the indications are very disturbing, and Government will have the very difficult task of pacifying an excited people. Financial considerations will press heavily on the Viceregal Council, and to make matters more complicated there will be a dangerous spirit of sedition abroad.

At the Cape, finance will be the uppermost subject of debate, and the condition of the Colony is far from a restful one. Factions will arise within the Governing body, and the unscrupulous parasite of colonisation will reap a rich harvest.

The Sun enters Cancer, June 22nd, 1903, at 3^h 5^m p.m.

At this ingress the indications are still of a warlike and disturbing nature. Our export trade will suffer, and accidents on the high seas will be unusually numerous. This will be due partly to the violence of storms during the quarter, but there is also some danger of our Navy finding employment of a nature to which it has long been unaccustomed, but for which it is to be hoped it will always be found properly equipped. Austria and Hungary are liable to be disturbed with internal dissensions and strife. In South America there will be some fighting both on land and sea, and the Chili-Argentine feud is likely to come to a head during this period of the year. Naval manœuvres and the massing of vessels will take place on foreign shores, and there is reason to suppose that covert motive will not be altogether absent for this display.

At New York the positions of the planets indicate a period of progress. Foreign relations will be pacific, and the heavy expenditure of the past years, together with the consequent taxation, appear to be the chief of the evils to which the West will be subject.

At Calcutta, Saturn will be rising, and this indicates a degree of privation in India, due no doubt to the failure of crops and the non-adaptable methods of the Oriental mind. The fiscal reforms of past years are now likely to show their merits and utility. Border fighting appears to be indicated.

The Sun enters Libra, September 24th, 1903, at 5^h 44 a.m.

At this ingress the Sun will be just upon rising, and the luminary is mainly affected by good aspects. Consequently we may expect a quarter of real progress, and the fortunes of the nation will be considerably enhanced. The financial outlook is of the most hopeful order, and a general expansion in our commerce will be the result of an established sense of security. Public health will be restored, educational projects will make headway, railway traffics will increase, and the national service, more particularly the Navy, will receive credit for a high state of efficiency.

At New York the indications are chiefly in the line of commercial prosperity, good railway returns, and beneficial foreign relations.

At Calcutta the Sun will be on the meridian, and the Government will therefore worry through its difficulties with honour and credit, but it is not to be overlooked that Uranus will be exactly rising, so that a disturbing combination of disaffected people is liable to affect the general peace.

At the Cape the Government will be well established over the whole of South Africa, and the only difficulty which seems to threaten it during this quarter is that of finance.

The following eclipses will occur during the year 1903 :---

Two eclipses of the Sun, one annular and the other total; and two partial eclipses of the Moon. The particulars of these phenomena and their astrological significance are here stated :---

Annular Eclipse of the Sun, March 29th, 1903, at 2^h 6^m a.m. Invisible at Greenwich.

The eclipse is central at noon in Korea, and will affect the whole of China and Japan, together with the northern parts of India. In the Korea, trouble will speedily follow, for the luminaries are in opposition to the planet Mars, and bloodshed will not be avoided. Conflagrations, murders, pillage, freebooting, and lawlessness of every description will prevail in the N.E. of Asia.

Partial Eclipse of the Moon, April 11th, 1903, at 11^h 58^m p.m. Visible at Greenwich.

Magnitude of the obscuration—0.973, totality being 1.

This eclipse falling in opposition to the ruling sign of England is of importance, especially as it occurs close to the meridian. It signifies that a period of financial depression and stringency will be experienced in this country, and that a lady in the highest position is in danger of a decumbiture.

Total Eclipse of the Sun, September 21st, 1903, 5^h 10^m a.m. Invisible at Greenwich.

This eclipse is not central at noon at any place in the civilised world.

Partial Eclipse of the Moon, 6th October, 1903, at 2^h 59^m p.m. Visible at Greenwich.

Magnitude of eclipse—0.868, totality being 1.

This eclipse takes place in the eighth division of the heavens and in the first decanate of Aries, the ruling sign of England. It indicates sorrow and mourning in high places. The demise of some great ruler. The stationary position of Saturn in Aquarius renders it unfortunate for Russia, where trouble will soon set its seal.

The eclipses fall in the signs Aries and Libra, and dispose to revolutions, reforms, and political changes. The fortunes of Denmark, England, Austria, the Argentine Republic, and Japan will be adversely affected by changes in the political atmosphere.

NOTE.—In the calendar notes the astronomical data are given in terms of the sidereal day, which commences at noon. Thus on January 20th it is stated that the Sun enters Aquarius at 18 hrs. This means that the Sun reaches the first point of that sign at 18 hours after mean noon on the 20th, and the secular or common expression would be 21st January, at 6 a.m. Wherever the terms "a.m." and "p.m." are used in the Almanac, the common or secular date is given with it.

EXPLANATION OF THE CALENDAR, ASPECTS, &c.

THE first columns of the left page show the day of the month, week, and year—the figures in the latter column indicating the number of days from the beginning of the year.

The column headed "Notes" shows the Sundays, Church festivals and Holy days, Aspects (as to which see below), Astronomical and other notes. (The Saints' days printed in italics are *not kept* by the Church of England.) The right ascension of the principal planets at certain dates is also given. The thick rule on left of this column indicates the duration of the various Law Sittings.

The columns headed "Moon" show—Ist. The moon's age (that is, the nearest number of days, without fractions, that have elapsed since the preceding New Moon). (This is sometimes useful in estimating roughly the time of High Water in localities where the usual tide-tables are not available.) 2nd. Duration of Moonlight from 6 to 9 and 9 to 12 p.m., and 12 to 3 and 3 to 6 a.m. (It will of course not be lost sight of that at certain periods of the year the rising or setting of the Moon must occur in daylight. As the object of the column is solely to show the hours when there is Moonlight, no notice is taken of the fact that there may also be Daylight.) 3rd, 4th, and 5th: The hour of rising (Greenwich mean time), when the Moon is due south and has attained her greatest altitude (astronomically when the Moon Transits or passes the meridian), and the hour of Setting. In these columns where a waved rule line occurs it indicates a period post meridiem, whilst a dotted rule line indicates ante meridiem.

The columns headed "Sun" show —1st. The Rising and Setting of the Sun(Greenwichtime). 2nd. Equation of Time, or the period which is needed to adjust civil to astronomical time. 3rd. The Sun's declination.

On the right page is given the time of High Water at London Bridge, morning and afternoon, the time of Ecliptic conjunction with the Moon of principal planets, Weather Forecasts (as to which see below), Voice of the Stars for the month, and Notes on Birthday influences.

The dates of very High Tides are accurately predicted as a useful warning for localities adjacent to the river. Precaution is, however, urgent only when atmospheric disturbances are prevalent, more especially high north winds and a low state of the barometer with continued rain. A very high spring tide is unusually sensitive, and is much affected by these disturbing influences.

Explanation of the Aspects. Conjunction, d. - Two heavenly bodies are in conjunction with one another when both have the same longitude. Semi - quartile. — Two heavenly bodies are in mutual semiquartile when the difference of their longitudes is exactly 45°. Sextile, *. –A difference of longitude of 60°. Quintile.—A difference of longitude of 72°. Quartile or Quadrature, \Box . -A difference of longitude of 90°. Trine, Δ .—A difference of longi-tude of 120°. Opposition, 8.— A difference of longitude of 180° (half the circle). Sesquiquadrate.—A difference of longitude of 135°. Biquintile.—A difference of longitude of 144°. The major aspects are the conjunction, sextile, quartile, trine, and opposition. The minor aspects (determined by Kepler, the great astronomer) are the 30°, 36°, 45°, 72°, 135° and 144°. The conjunction varies in nature according to the natures of the planets forming it. The sextile and trine are benefic; the quartile and opposition are malefic

Original from

NEW YORK PUBLIC L

Digitized by Google

aspects. Of the minor aspects the 45° and 135° are malefic, the rest are benefic.

When two planets have the same declination they are said to be in *parallel declination*, and this, like the conjunction, varies in nature according to the natures of the planets. The conjunction is weak when the conjoined planets are far apart in declination.

Nature of the Planets. — All the planets are capable of exerting a good and bad influence, according to the aspects they form to the Sun, Moon, and the angles of the figure The for any ingress, lunation, &c. simple natures of the planets are known by the effects attending their conjunctions with these Significators, as they are called. In this respect Jupiter and Venus are benefic, and also Mercury when not afflicted by aspects. evil Neptune, Uranus, Saturn, and Mars are evil.

The Weather.-The influence of the planets over the atmospheric changes constantly occurring on the earth is a fact already well established. Prof. Falb of Vienna has a cyclic period of 79 years which corresponds to the periodic conjunction of the planets Mars and Mercury, which form their conjunctions every 79 years on the same day of the year. His failures are due to the fact of his not having taken the other celestial bodies into account. The predictions in this Almanac are based on the Solar configurations with all the bodies, and the mutual celestial aspects of the planets among themselves as seen from the Earth. will be generally noticed that there is a downfall of some sort, according to the season of the year, about the day of the Change and Full of the Moon. It is true that the conjunction of Mars and Mercury has a disturbing effect upon the weather in the production of violent storms, which was observed by Jerome Cardan, and afterwards certified by the great Digitized by GOOgle

astronomer Kepler, but it is futile to suppose that all the changes of the weather can be predicted from only one source. The science of Astrometeorology, while far outstripping the efforts of all other systems, especially in its storm-periods, is yet far from perfect. Thus, while it is evidently the fact that all the great storms can be predicted with great certainty and precision, the particular locality which may be affected is largely a matter of speculation.

Lunar Influence. — This influence on mundane affairs varies according to the nature of the body with which the Moon forms configurations in her rapid course. When the Moon is in sextile or trine with the Sun it is a good time for asking favours, seeking employment, or travelling for health. With Saturn, for dealing with farmers, miners, and old people; for purchasing houses or land; and for planting or sowing. With Jupiter, for opening new business, dealing with merchants, bankers, and rich people. With Mars, for consulting surgeons, engineers, and mechanical people. With Venus, for courting, pleasure-seeking, marrying, engaging maidservants, visiting friends, and taking lessons in music. With Mercury, for seeking employment; writing letters or articles, or books ; dealing with printers, editors, publishers, or lawyers; for sending children to school for the first time, binding apprentices, and travelling. With Uranus, for scientific work, dealing with electrical engineers, or for learning astronomy or astrology. Astrologers find that affairs begun under such configurations proceed more successfully than at other times -Solomon found that " to everything there is a season, and a time for every purpose under the heavens." It is important to ascertain, however, that the moon has no evil aspect (quartile or oppostion) or conjunction with either Saturn, Mars, or Uranus at the time selected, or the good influence will be nullified.

WEATHER FORECASTS.

The year opens fine and cold, with a crisp air in the sun, morning mists, foggy at night. Downfall between the 7th and 9th; colder about the 20th; high winds on the 23rd and 24th; cold and bleak to the 30th ; then warmer.

The weather appears normal for the season in all respects save a rather higher wind following the depression of the 20th. Storm periods 5th and 20th to 24th.

VOICE OF THE STARS.

The portents of the year open up rather more brightly than has been the case since 1899, and the New Moon attending this month augurs well for the general public health, in spite of the somewhat inclement weather. Festivals among the old and young will be much in vogue, and places of amusement will This is usually an indication of financial stress in the prosper. country, and it is certain that at this season the fiscal problems of the nation will come in for unusual attention. Anticipations of National Expenditure will be very gloomy, and this will be reflected on the Stock Markets, sending gilt-edged Stocks down. Educational questions will be much to the fore, and Army Supplies will also be a sore point with the financiers. The weather threatens to be exceptionally cold and bleak. The Royal Heads stand well in favour of the younger generation, and will patronize places of amusement more than usual.

The Cape and Argentina show signs of unrest. India will prosper.

BIRTHDAY INFLUENCES.

The best birthdays of this month are the 2nd, 25th and 29th. Those born on the 2nd will have an increase of good fortune, and their affairs will prosper. The 5th shows causes for depression of mind, and anxiety. The 9th indicates some domestic trouble during the year, and possible bereavement. The 18th is accidental, and there is danger of some fever, possibly typhoid. Care must be taken to avoid risk. The 20th is an evil day, and those whose anniversary falls thereon will have cause for sorrow. Finance and business will go awry and in some cases it will be due to ill health. The 25th is fortunate for all engaged in artistic and literary pursuits and generally for enhancing success of The 29th is fortunate for those about to be those born thereon. married and for birth of children; and other domestic and social The 29th gives increase of business, some honours and events. good health.

WEATHER FORECASTS.

The month opens fair with lifting winds, and to the 11th the weather will be fine for the season. On the 14th boisterous winds, then rising temperature to the 19th with heavy downfall Warmer to the 20th, then fine and bright, with about the 15th. high winds on the 26th, and pleasant weather to the end of the month.

VOICE OF THE STARS.

The Government of this country will go near to defeat. Financial questions will be much discussed in the House, and a strong Opposition will be in evidence. Our Colonies will make rapid strides, and the expansion of the Empire will give cause for satisfaction. On the Continent there will be more than usual festivity, and both Berlin and St. Petersburg will show signs of unusual merry-making. Meanwhile there are likely to occur some distressing accidents in schools or at theatres, especially in those parts where children are assembled. Disorders of the blood will be prevalent. Deaths from cold and starvation are more than likely. Warmer atmosphere may be expected in the latter half of the month with a full allowance of rain. Destruction of property by fire is in evidence, especially in the North and West. A more hopeful view of financial questions will be taken as the month wears on, and this will advance the price of Stocks. The month seems likely to produce some very important combinations in the political world. Important marriages will take place. Our exports will increase. The chief point of interest appears to be the position of the Government. Argentina has trouble.

BIRTHDAY INFLUENCES.

The best birthday this month is the 19th, and afterwards the 26th and 28th in lesser degree. Those born on the 2nd will have an active year with much business in hand. The 15th is dangerous, and those born thereon will do well not to incur unnecessary risks during the year. The 16th will bring influences of a depressing nature. The 18th is disturbing to domestic and business affairs. The 19th is a very fortunate birthday. The 24th is rather depressing, and those who were born thereon will do well to look after their health, as there is a chance of taking rheumatic fever. Much business will curtail the chances of The 28th is fortunate for those in love, or for the success. married desiring progeny. It is a happy influence.

The 31st day, at 8 h. morn. (?) Venus		,, 17

WEATHER FORECASTS.

Opening fine and mild, the temperature goes lower between the 6th and 12th, with heavy downfall about the 8th. From the 12th to 15th high winds, cyclones. Colder from the 16th to 22nd, with sudden changes and bright intervals; then fine to the 27th with high winds. Dull with moist chilly air from the 27th to the end.

Storm periods, 21st, 25th and 28th.

VOICE OF THE STARS.

Gloomy forebodings seem to hang around the Government, and national anxiety seems to be acute at this time of the year. It is to be noted however that the financial problem will be satisfactorily solved by the astute Chancellor. The condition of the Public Service Department will cause angry comment. The affairs of the Army do not go very well. There will be trouble in one of our distant Colonies. The Public Health will give cause for alarm. An outbreak of typhoid is to be feared. The cause for alarm. An outbreak of typhoid is to be feared. The germ of typhoid is fostered in the kidneys, and when medical men recognise this fact there will be more attention paid to our water supplies. The county of Kent is likely to prove a hot-bed of pestilence at this period. Spain will be troubled with many internal disputes, and the religious faction in that unhappy country will assist the general process of decadence which has marked the fortunes of the Dons for some years past. In Chili and Argentina strife will arise. Austria too will have its share of troubles. Incendiary acts and lawless freedom may call for military intervention. The weather will be cold at first, but afterwards brighter. Severe cyclones will blow true to the Equinox.

BIRTHDAY INFLUENCES.

The most fortunate days are the 26th and 30th. The month has not many good influences in operation. The 12th is productive of fraudulent schemes and secret enmity. The 14th is The 16th will produce unfortunate for those born thereon. sudden and unexpected developments in business affairs which will prove to be unfortunate. The 18th disposes the mind to hopefulness and confidence. The 22nd is fraught with very deceptive influences. The 23rd is depressing. The 26th is prosperous and effective for good in most affairs. The 27th is full of affairs, but with little profit attaching to them. The 28th is dangerous in the extreme.

WEATHER FORECASTS.

April will be a colder month than usual. It opens cold and chilly, with local storms, and continues unsettled to the 12th. High winds prevail from the 12th to 16th, and the weather then changes to fine and bright till the 26th. At the close of the month a marked depression occurs, rendering the weather cold and wet.

Storm period, 30th.

VOICE OF THE STARS.

The New Moon attending this month is fraught with influences of a very sinister kind. The malefic Uranus is just rising, and There will be strikes or other irregular Mars is in elevation. expressions of public dissatisfaction and unrest. The lunation constitutes an Eclipse of the Sun in the first decanate of Aries, and this is ruled by Mars, disposing the nation to warlike feeling. The planet Mars is also in exact opposition to the lunation, so that it will be a mercy indeed if our rulers can steer us safely past the shoals of political subterfuge without recourse to the arbitraments of war. Farming interests should prosper, however, and although there will be rather more than usual rain, it will be beneficial to vegetation. Accidents on the high seas are likely to damage one of our Men-of-War. The financial question will be satisfactorily replied to by the country. Troubles may arise in the Post Office. Railway accidents are numerous for this period of the year. Seditious movements are afoot in S. Africa. The newspapers will be filled with inflammatory and exciting items from abroad. If there is war in Argentina Republic, as seems most probable, the interests of Chili will suffer. Telegraphic operators may find some general grounds for a protest,

BIRTHDAY INFLUENCES.

The influences are rather sinister than otherwise this month, but the 23rd and 29th are fortunate in some respects, the 23rd chiefly so. The 10th holds some inflammatory influences for both mind and body. The 12th will bring an active year full of business and involving many journeys. New projects may well be taken in hand. The 20th is not a bright anniversary, and the blood is apt to get chilled and disordered. The 23rd is far more fortunate, and holds the best influences of the month. Its subjects will increase their business and make headway. The 28th active and perhaps a trifle futile in its projects. The 29th is fortunate for all domestic and social changes to those born thereon. The 30th is the worst birthday anniversary.

18		MAY	 _	XX	XI -	Days	s.		N	100R	E'S
Sweet Maia, brightest of the Pleiades, Has thy fair palace colours rich as these That mark thy transient rule o'er earth's domain, And glow in every hedge, and field, and lane? All nature lifts its voice to thee in song, And dances in thy flow'ry path along.											
A drye May and a dripping June bring all things into tune.

MAY 1903.

The 7th day, at 4 h. aftern. (3) Mars The 18th day, at 6 h. morn. (b) Saturn	is in	HIGH TIDES.
The 21st day, at 0 h. aftern. (4) Jupiter	ecliptic conjunction	May 28
The 27th day, at 4 h. aftern. (\diamondsuit) Mercury	with the Moon	,, 29 ,, 30
The 30th day, at 0 h. morn. (2) Venus		

WEATHER FORECASTS.

Opens cold and wet, but grows warmer and drier towards the 9th, the period being genial and bright. About the 14th a moist air prevails, with heavy rains in most parts. After the 18th, colder, with rising wind between the 22nd and 25th, the month closing dull and overcast. Much warmer than the same month last year. Storm periods, 1st and 14th.

VOICE OF THE STARS.

The month opens with indications of an earthquake period in full force. Portents of such catastrophes as were witnessed at this time last year are again in force. It will be quite within the lines of probability if we have some tremors of the earth in the British Isles. Foreign trade will now show a great falling off, and shipping interests will suffer. Army Service expenditure will be on a scale which some will consider to be too liberal. Landed interests and the property market will suffer. Our Colonies will continue to expand, and will be the cause of satisfaction to the Mother-country. In the financial world there are indications of some fraudulent proceedings and "smart" combinations. The worst of the evils that are likely to threaten us at this time are unsatisfactory changes in our foreign relations, and a continuance of dissatisfaction among the operators. The public health will not be satisfactory, and rheumatic fever will prove formidable at this period of the year. The positions of the benefic planets will safeguard our national interests in spite of the threatening attitude of other Powers. The Stock Exchange will show a more Bullish spirit.

BIRTHDAY INFLUENCES.

The influences for the first few days are not propitious. The 7th is more active and enterprising but not fortunaté. Inflammatory disease may show itself in the loins and kidneys. Disputes are shown. The 9th is also very prone to impulsive projects, and care must be taken to avoid plunging, or litigation will follow. The 14th has a deceptive influence touching the domestic and social side of the life. Young people should beware in whom they confide their affections. The 17th shows ill-health and misfortune. The 19th is afflicted with a heavy depression of business affairs and thwarting of projects. The 21st is fortunate, and The 22nd and denotes increased business and general welfare. 27th will produce journeys and much activity during the coming The 29th is fortunate for those in love. year.

Astronomical Notes.

May 1, Length of Day, 14^b 42^m; 31st, 16^b 9^m. ,, 5, Sun's time of Semi-passage, 1^m 6'1^s;

- Semi-diameter, 15' 52'8". ,, 20, Sun's time of Semi-passage, 1^m 7'3';
- Semi-diameter, 15' 49'7". ,, 1, Moon in Perigee; 16th, Apogee; 28th
 - Perigee.
- Mercury is in Gemini, and can be well seen after sunset at the beginning of the month.
- Venus is an Evening Star in Cancer; near the Moon on the 29th.
- Mars is in Libra, and visible from sunset till early morning.
- Jupiter is a Morning Star in Pisces. Saturn is a Morning Star in Aquarius.

20

JUNE XXX Days.

Like a young bride that to the year's full prime Has yielded, is the lovely summer time. The restless wooing of the spring is o'er, Matured are joys that were but hopes before; And higher themes in aspirations rise, From the bright teaching of the sunny skies. [MOORE'S

June damp and warme does the gardener no harme.

JULY 1903.

The 2nd day, at 2 h. morn. The 11th day, at 3 h. aftern.	(d) Mars (L) Saturn) is in	HIGH TIDES.
The 15th day, at 11 h. morn. The 24th day, at 11 h. morn.	(2) Jupiter ecliptic (2) Mercury conjunction	July 26 ,, 27
The 27th day, at 5 h. aftern. The 30th day, at 9 h. morn.	(Υ) venus	,, 28

WEATHER FORECASTS.

Opens fine and warm, increasing heat to the 5th; very hot on the 6th with probable heat storms; close hot weather to the 13th, then a heavy break with storms and rising winds. Thunder-Moist and storms prevalent for several days. Intervals bright. Windy genial about the 17th. Fair but unsettled to the 26th. on the 26th, then cooler with heavy downfall about the 29th.

Storm periods, 6th, 13th, 29th.

VOICE OF THE STARS.

The portents for the month are of a sinister order. At the lunation Mars will be in opposition to the meridian, and Saturn will be setting. The conjoined luminaries bring in the 12th The Governdivision of the Heavens, the domain of sorrow. ment will be in a critical condition, and will come near to defeat on some point of martial policy. One in the highest sphere of the realm will be in danger from secret foes. It would appear that there is a plot on foot to aim at the capitol of the national There will be trouble in South Africa, and changes will edifice. be made in the administration of Cape Colony. There is great danger of a conspiracy at the end of June or the beginning of July. Let those in office be on their guard. We may have trouble with Russia at this time. The times are full of conspiracies and reprisals, and the month will prove to be one of unexpected developments. Incendiary fires and arson will account for destruction of property. Severe storms will do damage to the crops.

BIRTHDAY INFLUENCES.

The 1st of the month has rather excitable influences, and the year will furnish cause for strife and disputes to those born The Inflammatory action in the loins is also shown. thereon. 4th to 8th shows grave danger of accidents and more than usual expenditure. And aggressive attitude may be assumed at important junctures leading to loss and trouble. The health is The 11th shows illness and poverty or disturbed by fevers. derangement of the blood. The 12th shows deceit and treachery. The 13th is fortunate and increscent of good fortune. So also is the 14th. The 23rd brings much business and activity, and with it a good deal of worry and anxiety. The 26th brings new enterprises and a change in the occupation. The 27th is From the fortunate for all phases of domestic and social life. 28th to the end of the month the influences are sinister.

Astronomical Notes.

July 1, Length of Day, 16^h 30^m; 31st, 15^h 28^m. ,, 5, Sun's time of Semi-passage, 1^m 8'4'; Semi-diameter, 15' 45'4". ,, 20, Sun's time of Semi-passage, 1^m 7'5'; Semi-diameter, 15' 45'9". 10, Moon in Apogee; 24th, Perigee.

Mercury is in Cancer, and visible before Sunrise at the beginning of the month. Venus is an Evening Star in Virgo; near the

Moon on the 27th.

Mars is in Libra, setting about 11h p.m. Jupiter is a Morning Star in Pisces.

Saturn is a Morning Star in Aquarius.

AUGUST XXXI Days.

MOORE'S

Again the reaper stands amidst the corn, His brown cheek glowing in the light of morn. Between the sheaves the busy gleaners roam, And childhood labours with its armful home. The broad moon rises ere the creaking wain Bears off its last high load of golden grain.

If Bartlemy's Daye be faire and cleare hope for a prosperous autumn that year.

	1	8.58	9.42	the 13th. From the 15th to th	he 19th the weat	ther will be subject
	2	10.25	11. 2	to rapid variations, the tempe	erature being lo	w for the time of
	3	11.38		year. Showers will fall freely	between the 17	th and 20th, when
	4	0.8	0.33	the wind will rise and give pla the month fine, fresh, and seas	onable weather	will prevail. The
	5	0.54	1.15	Equinoctials will commence al	bout the 28th a	nd blow strong to
	6		1.52	the 3rd of the following month	•	0
	7		2.23	Storm Periods, 13th, 20th, a	nd 22nd.	
Ì	8	6	2.53	VOICE OF	THE STARS	3
	9		3.25	The star of good fortune is in		
	10	3.41	3.59	this month, and this is alone ar	n augury of bette	er times. Yet the
	11	•	4.33	financial condition of the coun	try is not altog	gether satisfactory.
	12		5.7	It is true that there will be a la with the Colonies, and the lat	arge developme	nt of export trade
	13	5.26	5.48	their relations with the Mother	•country. But o	our foreign exports
1	14	6.11	6.35	will prove to be on the decline.	In the secor	nd week the Stock
i	15	7.4	7.36	markets will suffer a considera	ble set back, o	wing probably to
	16	8.15	8.57	foreign complications. Spain this time of the year, and its res	suffers a period	1 of missortune at
	17		10.26	politics is now likely to assume	formidable pro	portions. In this
	- 1 I		11.40	country there will be some deat	ths from a virul	ent plague, maybe
	19		0.13	Buboes. Deaths also occur fro	om explosions of	t inflammable oil.
	20	0.40	1. 5	Some illustrious marriages will political importance is likely to		
i	21	1.31	1.52	East and West.		
	22	2.14	2.37	\$2+757782X54377-24	NELLENZE	e
1	23	2.57	3.18	BIRTHDAY II The 11th to the 15th and		
	24	3.37	3.58	month. The best date is the 7t	th. Those who	were born on the
	25	4.18	4.37	3rd will have a depression in th	heir business.	The 7th has ex-
	26	4.56	5.16	pansive and prosperous tendence		
	20	4.50 5.34	5.56	with dangerous financial indicat better indications, tending to p	roduce a happy	y frame of mind
١				The 22nd will bring an activ	ve year and n	o little anxiety.
	28 20	6.18	6.42	The 25th is inflammatory, and t	hose born there	on must take care
•	29	7. 9	7.39	of their health, guarding agains	t tevers and dis	putes. The 27th
	30	8.13	8.55	to the 30th is fraught with decep	prive and treact	icrous minuences,

NOVEMBER XXX Days.

MOORE'S

How the sea beats upon the rugged shore, How the deep caves return the sullen roar, While Midnight in her lonely chamber sees The sleepless mother on her trembling knees; For he, the widow's son, her hope, her stay, Is out upon the billows, far away.

Ice in November that bears a duck, nothing after but sludge and muck.

ALMANAC.]	DECEMBER 1903.	
The 20th day, at The 22nd day, at The 22nd day, at	o h. morn. (?) Venus 8 h. morn. (?) Mercury 9 h. morn. (?) Saturn 11 h. morn. (?) Mars 6 h. aftern. (?) Jupiter	ic tion he ,, 7 8
HIGH WATER	WEATHER FOREC. The month opens cold and wet, with p	

The month opens cold and wet, with probable storms on the 2nd. Rising temperature succeeds, and mild weather for the season may be expected about the 7th to 12th. On the 12th heavy storms become general, with high winds blowing from the 8th to 12th. Colder weather supervenes after the 12th, and about the 18th the air becomes very raw and chill. Violent storms rage between the 20th and 23rd, and are succeeded by cyclones about the 26th. The month ends with high winds and bright skies. Storm periods, 8th to 12th, 20th to 23rd, 26th.

VOICE OF THE STARS.

Two lunations have joint influence in the affairs of the nation this month. The first is that of the 19th November, and the next that of the 18th December. The first of these is ominous of a financial stress in the country which will seriously affect the Stock markets, more particularly on the speculative side. If members escape hammering they will be more fortunate or shrewd than their fellows. Railway accidents and wrecks upon the high seas swell the list of evils to which we are almost inured at this season or Violent storms will do heavy damage to property. the year. Farming interests will suffer. A recrudescence of smallpox is to be feared. Affairs of State are troublesome in India and the Cape. The lunation of the 19th shows danger of a serious accident at one of the theatres or places of amusement, an outbreak of zymotic disease, violent storms, and a wide increase in criminal activity. Not a fitting termination to a rather distressful year, truly, but the world is running at high pressure, and an occasional fall will give us pause to think.

BIRTHDAY INFLUENCES.

The month opens with quiet and steady influences tending to general progress as waiting upon the industrious and thrifty. The 7th is unfortunate, and from the 5th to 9th very serious financial prospects are shown. Those born during this interval will do well to safeguard their interests in every possible way. Unusual expenditure will be necessary, and the income shorter than usual. The 8th shows extremes of worry and anxiety, and some degree of rash impulse. The 14th brings better influences into play, and produces events of a happy nature in social life. From the 16th to the 20th is very evil. The 21st to 22nd is also an evil period. The 25th is more fortunate. From the 24th to the 28th the influences suggest loss by deception and fraud. LONG LIVE THE KING.

Astronomical Notes.

- Dec. 1, Length of Day, 8^h 9^m; 31st, 7^h 49^m. ,, 5, Sun's time of Semi-passage, 1^m 10'3^a; Semi-diameter, 16' 15'5".
 - ,, 20, Sun's time of Semi-passage, 1^m 11'0^s; Semi-diameter, 16' 17'1".
- Semi-diameter, 16' 17'1". ,, 7, Moon in Perigee; 23rd, Apogee. Mercury is in Capriconus, and visible after sunset at the end of the month.
- Venus is a Morning Star in Scorpio; near the Moon on the 14th.
- Mars is in Aquarius, and visible for about three hours after sunset.

Jupiter, in Pisces, sets about 11^h p.m.

Saturn, in Aquarius, sets about 7^h p.m.

Best Times for Sowing and Planting.

The best times for the advancement of all vegetation, and especially for the initial process of sowing and planting, are regulated by the Moon's position. The influence of the Moon over the tides is now no longer a matter of speculation in scientific That its effects upon the minds. rest of the fluidic bodies in nature is proportionately great can be proved by simple experiment. The vegetative effects of the Moon act through the saps of all seeds and plants, its action being to augment the moist heat in vegetable life and so to produce germination.

The correct time to sow and plant is at the increase of the Moon, when the Moon is above the horizon, and this as a general rule will be found eminently satisfactory. But there are certain influences attaching to the Moon's angular distances from the Sun during each month of the year, and as these vary according to the Sun's position in the Zodiac, the following table has been prepared for the year 1903.

JANUARY.—Generally, from the 1st to the 13th, and 29th to 31st. Special: 3rd, 4th, 7th, 8th, 11th, and 12th, also the 30th and 31st.

FEBRUARY.—From the 1st to 11th, and 27th to the end of month. Special: 4th, 5th, 8th, 9th, 27th, 28th.

MARCH.—From the 1st to 13th. Special : 3rd, 4th, 8th, 9th, 12th.

APRIL.—From the 1st to the 11th, and 27th to end of month. Special: 4th, 5th, 8th, 9th, 27th, 28th.

MAY.—From the 1st to the 11th, and 27th to end of month. Special: 1st, 2nd, 5th, 6th, 10th, 28th, 29th.

Digitized by Google

JUNE.—From the 1st to the 10th, and 25th to end of month. Special: 2nd, 3rd, 6th, 7th, 25th, 26th, 29th.

JULY.—Ist to the 9th, and 24th to the end of month. Special : 3rd, 4th, 5th, 26th, 27th, 30th, 31st.

AUGUST.—1st to the 8th, and 23rd to the end of month. Special : 1st, 23rd, 24th, 26th, 27th, 28th.

SEPTEMBER.—Ist to the 7th, and 21st to the end of month. Special : 6th, 7th, 21st, 23rd, 24th, 25th.

OCTOBER.—Ist to the 6th, and 21st to the end of month. Special: 3rd, 4th, 21st, 22nd, 30th, 31st.

NOVEMBER.—Ist to the 4th, and 19th to the end of month. Special: 4th, 27th, 28th.

DECEMBER.—Ist to the 4th, and 19th to the end of month. Special : 2nd, 3rd, 24th, 25th, 26th.

NOTE.-/The time on each day during which the Moon is above the horizon can be found in the calendar, where the time of the Moon's rising is given and the time of its setting. Or, if we take the time of its Southing, and allow about four hours on each side-that is to say, from four hours before its Southing to four hours after its Southing-there will be eight hours during which, on the above dates, germination will be enhanced. The above dates are the result of long experience in gardening and agriculture, and those who attend to them closely will be able to report a better yield than others.

The difference at the present date between what is known as the "Old Style" and the "New Style" Calendars is 13 days. To understand how this difference arises it must be remembered that the Solar Year consists of 365 days, 5 hours, 48 minutes, 48 seconds. In the Calendar known as the Julian Calendar—arranged B.C. 47 by Julius Cæsar, guided by his astronomer Sosigenes—the year was taken as being 3654 days, and in order to reat rid of the odd current of the day are order to get rid of the odd quarter of a day, an extra or intercalary day was added once in every fourth The Calendar so arranged is known as the "Old Style," and is now used only in Russia. But as the Solar Year is 11 minutes 12 seconds

less than the Julian year of 3651 days, it followed in course of years that the Julian Calendar became inaccurate by several days, and in 1582 this differ-ence amounted to 10 days. Pope Gregory XIII.,

NOTES ON THE

January was placed as leader of the months by Numa Pompilius, when he added two months (Jan. and Feb.) to the Alban Calendar, though it was not admitted to the same precedence in this country until a motion was made to that effect on March 18, 1750. The name is derived from Janus, the god of the year, in the Roman mythology. The idol Janus was placed over the gate of a temple at Rome, and was repre-sented with two faces, the one that of an old man, being typical of his retrospect of the past; the other a wouthful countenance denoting the other a youthful countenance, denoting prospect of the future. He presided over gates and avenues, thus symbolically he admitted the

new year, and attended the departure of the old. **February** was made the second of the 12 months by Numa Pompilius. Its name was derived either from Februa, a title which the Romans gave to the Feralia sacrifices; or more probably from Februs, to purify, because this being originally held to be the last month of the year, the people offered an explatory sacrifice for their twelve months' sin.

March.—March with the ancients ranked the first month of the year, and was named in honour of Mars, the supposed father of the founder of Rome. Our Anglo-Saxon ancestors called it Lenet monath, that is Lent, or Spring month. Marriages in this month were seldom solemnized, as they were counted to become inharmonious and unhappy. March 15, or according to the Roman calendar, the Ides of March, was the Paricidium, the day on which Julius Cæsar was murdered in the Senate house by Brutus and

Cassius, with other conspirators. April.—By the Saxons April was called Ostr monath, probably from the same word from which Easter is supposed to have been derived. The Dutch and Germans called it Grass month. The name is derived from the Latin word Aperio, to open or disclose. The term applies to the opening of the year, or to the unfolding of the buds and flowers, by the influence of the genial warmth and moisture of Spring

May.—The Hebrews named this month Sivan, from a Sanscrit word, signifying "to rejoice." The Anglo-Saxons knew it as *Tri-milchi*, be-cause their cows, stimulated by the fresh herbage, were so productive of milk as to enable the proprietors to bring them with advantage to the pail three times a day. The Romans offered sacrifices to Bona Dea or Maia on the first day of the month.

June was the Thamur or Tamuz of the Hebrews, that is after their escape from the Babylonish captivity; for previously to that they had simply distinguished their months by aid of numeration. Tamur or Tamuz signifies con-Digitized by

-i --

at the suggestion of Aloysius Lilius, an astrono-mer of Naples, determined to rectify this, and devised the Calendar now known as the Gregorian He dropped or cancelled these 10 Calendar. days—October 5th being called October 15th— and made centurial years Leap years only once in 4 centuries; so that whilst 1700, 1800 and 1900 were to be ordinary years, 2000 would be Leap This modification brought the Gregorian year. system into such close exactitude with the Solar year that there is only a difference of 26 seconds, which amounts to a day in 3,323 years. This is the "New Style." It was ordered by Act of Parliament to be adopted in this country in 1752 -170 years after its formation—and is now used throughout the civilised world with the single exception already named. The difference be-tween the two "Styles" will remain 13 days until A.D. 2100.

TWELVE MONTHS.

tinuance and perfection, alluding, probably, to the almost uninterrupted daylight, maturation of

fruit, &c., which occur during its continuance. July.-The fifth month of the Roman calendar received the name of Quintilis to denote its numerical position. It was sacred to Jupiter, and had in the Alban calendar 36 days. Romulus took from it 5 days. Numa reduced it to 30, but Julius Cæsar enlarged it to 31, the present number. In honour of the latter, Mark Antony number. changed its name from Quintilis to Julius-hence our July.

August derived its name from Augustus, the Roman Emperor; it was called Sextilis, or the sixth month in the Alban calendar, in which it had only 28 days assigned to it. Romulus added two, and Augustus a third, which number it has since retained. The Anglo-Saxons called it either *Barn monath*, alluding to this being the period when their barns were commonly filled, or Wood monath, clothing month, alluding to their fields being then clothed with corn, just as the Romans dedicated this month to Ceres, the goddess of harvest.

September.-In the Latin and Roman calendar this was the seventh month; and hence its name. The month had only sixteen days assigned to it in the Alban calendar; these were increased to thirty by Romulus, to thirty-one by Julius Cæsar; but Augustus reduced it to its present number. The ancient Saxons called it Berst monath, or Barley month, because at this time the barley harvest was gathered in.

October was called by our Saxon forefathers Wyn monath, or Wine month, and sometimes Winter fylleth, from the approach of Winter. It was the eighth month of the Alban calendar, in which it had thirty-nine days. Its name is derived from the Latin Octo, eight, and Imber, a shower of rain. Romulus reduced it to thirtyone days; Numa, to twenty-nine. Julius and Augustus each added one, and this number has not since been altered.

November.-The early Saxon inhabitants of England called this Blott monath, or slaughter month, because in those primitive days winter food was so scarce in England that it was usual to kill and salt the greater part of their winter meat this month; they called it also *Wind* monath or *Wind* month, from the tempestuous weather with which it is commonly accompanied.

December.—The month of December, so named by the Romans from being the tenth month of their year, has been denominated by the Saxons Winter monath, but after Christianity they piously gave it the name of Holy month, o High monath,

NEW YORK PI

In the year 1903 there will be two Eclipses of the Sun and two of the Moon. WHAT IS AN ECLIPSE!

March 28-29.—An Annular Eclipse of the Sun. Invisible throughout the British Isles.

This Eclipse is visible nearly throughout Asia, east of the Caspian Sea, the Philippine Islands, Japan, Alaska, and the more western parts of Canada.

April 11-12 .- A Partial Eclipse of the Moon.

Visible throughout the British Isles.

The first contact with the Shadow occurs at April 11, 10^h 34^m p.m.; the middle of the Eclipse at April 12, 0^h 13^m a.m.; and the last contact at April 12, 1^h 52^m a.m. At the middle of the Eclipse only about one-thirty-seventh part of the Moon's diameter will be unobscured.

> Middle of Eclipse April 12, oh 13m a.m.

Eclipse begins Apr 11 10h 34 p.m.

Eclipse end April 12 1h 52m a.m.

September 21.- A Total Eclipse of the Sun.

Invisible throughout the British Isles. This Eclipse is visible throughout German East Africa, the Transvaal, Orange River Colony, Natal, Madagascar, and the southern coast of Australia, Tasmania, and the southern

island of New Zealand. October 6.- A Partial Eclipse of the Moon.

Partly visible throughout the British Isles. At London the Moon rises at $5^{h} 32^{m}$ p.m., obscured by the penumbra which passes off at 6h 7m p.m.

THE HARVEST MOON.

When does the Harvest Moon occur? is a

question frequently asked. The Full Moon which happens on or nearest to the Autumnal Equinox (about Sept. 23rd) is called the Harvest Moon because it rises from night to night after the full, more nearly after sunset than any other Full Moon in the year, and is therefore favourable for evening work in carrying late crops. The succeeding Moon is called the Hunters' Moor

BRITISH OBSERVATORIES.

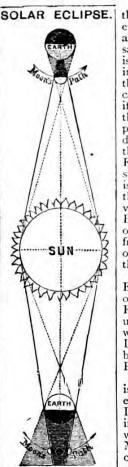

GREENWICH, lat. 51° 28' 38'1" N. Opened 1675, under the direction of Flamstead, Astro-nomer Royal. The chief centre for observations Opened on astronomy and navigation.

CAMBRIDGE, lon. o^h o^m 22'75^s E.; lat. 52° 12' 51'6'' N. Founded by the University in 1824. OXFORD-Radcliffe, lon. o^h 5^m 2'6^s W.; lat. 51° 45' 35'4" N. Erected about 1772. OXFORD UNIVERSITY, lat. 51° 45' 34'2" N. Celebrated for its 12<u>1</u>-in. equatorial refractor. LUREPOOL Established x828-transformed to

LIVERPOOL. Established 1838—transferred to Birkenhead in 1867. Lon. o^h 12^m 17'35^s W. ; lat. 53° 24' 4'8" N. Kew, lon. o^h 1^m 15'1^s W. ; lat. 51° 28' 6" N. This is the chief meteorological observatory of the United Kingdom.

LUNAR ECLIPSE.

same thing, by the passage of the Moon's Shadow over the observer. It will be seen, however, from the diagram that since the apparent angular diameters of the Sun and Moon are very nearly the same, it is only when the spectator is on, or very close to, the line joining the centres of those two bodies that a Total Eclipse of the Sun can take place; and, indeed, even if he be on that central line, should the Moon be in the more distant portion of her orbit, her apparent diameter may be less than that of the Sun, so that even in a Central Eclipse a small view of the Sun is still visible. This constitutes what is known as an Annular Eclipse; there is only one of the Eclipses visible in 1903 of this character. But even when the Eclipse is total on the central line, an observer far from that line will only see a portion of the Sun hidden, as the lines of

An Eclipse of the Moon is caused by its passage.

through the Shadow of the Earth; an Eclipse of the Sun by the interposition of the Moon between

the Sun and the observer, or, what comes to the

the diagram clearly indicate. In an Eclipse of the Moon the Eclipse is due to a real cutting off of light from the Moon. A Lunar Eclipse, if total for any place, must usually be total for every place from which the Moon can be seen. Lunar Eclipses are not, however, by any means always total. Two Partial Eclipses occur in April 1903.

The axis of the Earth's Shadow is always directed to a point exactly opposite to the Sun. Did the Moon move accurately in the plane of the ecliptic she would be eclipsed at every Full Moon, but since her plane is inclined at about 5° to that of the ecliptic, she will pass into the Shadow and suffer Eclipse only, if, at the time of the Full Moon,

she is near one of the nodes of her orbit. As this seldom happens, we find that there cannot be more than three Lunar Eclipses in the year (and this only if the Full Moon is at a node early in January), and there may be none. Usually, however, we have two Lunar Eclipses in the year, Total only if the Moon passes fairly near to the centre of the earth's shadow.

DURHAM, lon. oh 6m 19'75' W. ; lat. 54° 46' 6'2" N. Founded 1841. Is under the direction of the University Professor of Mathematics.

EDINBURGH—Calton Hill, Ion. 0^h 12^m 44'2^s W.; lat. 55° 55' 28'0" N. Erected in 1818. GLASGOW, Ion. 0^h 17^m 10'55^s W.; lat. 55° 52' 42'8" N. Opened in 1840. On the north side of the city near Gartnavel.

DUBLIN, lon. o^h 25^m 21'1^s W. ; lat. 53° 23' 13'1" N. Opened in 1785. Is under direction of Irish Astronomer Royal.

Erected in 1878.

Original from NEW YORK PUBLIC LIBRARY

Two comets known to revolve round the Sun in short periods are due to return in 1903, and both will probably be seen in the autumn. The first is Faye's comet, and was discovered at Paris in 1843. It was bright with a small tail, but was never visible to the naked eye. Calculation showed that it had a period of about 71 years in length; and at the next return it was first seen by James Breen at the Cambridge Observatory towards the end of November 1850. When nearest the Sun, this comet is distant about 157 millions of miles from him, a distance slightly greater than that of the planet Mars; when furthest from the Sun, at aphelion, it is 551 millions of miles, and some-what exceeding that of Jupiter. At its next return Faye's comet was first descried by Bruhns at Berlin on the 8th of September, 1858; it was an exceedingly faint object even in the telescope, but was observed until the 16th of October. The next return to perihelion took place on Valentine's Day 1866; but the comet was observed about six months before. Observations in 1873 were not made until September, and the comet is described as being very difficult to see. But in 1880 Dr. Common caught sight of it at Ealing on the 2nd of August, and it was observed with the great Washington telescope until the end of March 1881. At the return in 1888 it was first seen at Nice on the 9th of August. The last time it was nearest the Sun was on the 19th of March, 1896; at Nice the comet was seen by M. Javelle towards the end of September 1895. The next return will be in 1903.

A much shorter record is to hand of the other comet, which is not discernible without good telescopic assistance. D'Arrest discovered it at Leipzig in June 1851. The period was calculated to be less than 6½ years in length, and the late Sir Thos. Maclear succeeded in observing it at the Cape of Good Hope in the winter of 1857. Being unfavourably placed in 1864, it was not seen; but was re-detected by Winnecke at the end of August 1870. At the next return in 1877 the comet was again observed. There was small hope of seeing it in 1884, being unfavourably placed. It was however seen in 1890; and in 1897, the perihelion passage taking place on the 21st of May. Another will be due in the autumn of 1903. The nearest distance of this comet from the Sun is about 109 millions of miles, or 17 millions greater than the Earth's mean distance; and its greatest distance from the central luminary about 536 millions, or about 30 millions greater than that of Jupiter when furthest from the Sun.

It is probable that both these comets, which when in aphelion are near the orbit of Jupiter, were, so to speak, captured and permanently brought within the solar system by its attraction, its mass being less than a thousandth part of that of the Sun. When the impulse had been given, the motion finally resulting was in an elliptic orbit. Comets of short period revolve in the general direction followed by the planets, but many of the comets of long period move in the reverse direction. For instance, with the most interesting historically of all the comets, Halley's, its return was predicted in 1682. It appeared in 1758 and 1835, and it is known that its history can be traced for many centuries earlier, and there is little doubt that it will be seen again in 1910.

LUNAR OCCULTATIONS, 1903.

An Occultation of a fixed star or planet, like an Eclipse of the Sun, is caused by the Moon, in her eastward course from right to left, passing between the star and the spectator, and so intercepting it from his view. On page 40 the reader will find, as usual, a full table for the present year, 1903, giving the particulars for the principal Occultations visible in Great Britain.

The most interesting examples are the Occul-tations of the following comparatively bright stars. The letters D and R in the diagrams following indicate the points of disappearance and reappearance of the star, and are measured from the vertex or point of the Moon's limb nearest the Zenith.

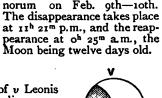

The occultation of a Cancri occurs on Jan. 14th. The disappearance takes place at 8^h 14^m p.m., and the reappear-ance at 9^h 8^m p.m., the Moon being sixteen days old.

The occultation of 68 Gemi-

The occultation of λ Geminorum on Feb. 9th. The disappearance takes place at 3^h 56^{m} p.m., and the reappearance at 4^{h} 49^m p.m., the Moon being twelve days old.

The occultation of v Leonis on Feb 14th. The disappearance takes place at 4h 47" a.m., and the reappearance at 5h 45m a.m., the Moon being sixteen days old.

The occultation of a Cancri on March roth. The disappearance takes place at 4^h 59^m p.m., and the reappearance at 5^h 50^m p.m., the Moon being eleven days old.

The occultation of χ Ophi-uchi on March 19th. The disappearance takes place at 4^{h} 1^m a.m., and the reappear-ance at 5^{h} 25^m a.m., the Moon being twenty days old.

The occultation of v Leonis April 9th—10th. The dison April 9th—10th. appearance takes place at 11^h 48^m p.m., and the reappear-ance at 0^h 23^m a.m., the Moon being twelve days old.

The occultation of 38 Ari-etis on July 19th. The disappearance takes place at 1h 50^{m} a.m., and the reappear-ance at $2^{h} 47^{m}$ a.m., the Moon being twenty-four days old.

The occultation of a Tauri on Oct. 10th. The disappearance takes place at 8h 18m p.m., and the reappearance at 9^h 11^m p.m., the Moon being twenty days old.

THE PLANETARY SYSTEM.

The following shows the approximate Diameter in thousands of miles (D) and Distance from Earth in millions of miles (M) :---

Sun D 852 M	92'9	Mercury D 3 M	56'9 Uranus D 33 M 2,698'8
Moon D 2 M	260	Mars \dots D $4\frac{1}{4}$ \dots M	56'9 Uranus D 33 M 2,698'8 48'6 Venus D 72 M 25'7
Earth D 8 M		Neptune D 37 M 1,68	
Jupiter D 85 M	360'4	Saturn D 70 M 79	93.2

OLD ENGLISH HOLIDAYS.

THESE holidays, with their names, had their origin in mediæval England when the State religion was that of the Church of Rome, and they are still observed in some parts of Great Britain.

JANUARY 7. TWELFTH DAY was 12 days after Christmas, and is sometimes called Old Christmas

Day. Many social rites have long been connected with Twelfth Day. FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during

the year. FEBRUARY 14. ST. VALENTINE'S DAY: The custom of sending a "valentine" to one's sweetheart was very general 50 years ago, but, since the introduction of Christmas Cards, has almost

died out. February 15, Old Candlemas. MARCH 25. LADY DAY: Annunciation of the Blessed Virgin Mary. April 7 is Old Lady Day.

JUNE 24. MIDSUMMER DAY: Feast of the Nativity of St. John the Baptist. July 7 is Old Midsummer Day. AUGUST 1. LAMMAS DAY: Originally in

England the festival of the wheat harvest. One of

Digitized by Google

the Scotch quarter days. Old Lammas Day is August 14.

SEPTEMBER 29. MICHAELMAS : Feast of St. Michael the Archangel. Old Michaelmas Day is October 12.

NOVEMBER I. ALLHALLOWS : All-hallows, or All-Saints' Day. The previous evening is Allhallow-e'en, observed by home gatherings and oldtime festive rites.

NOVEMBER 2. ALL SOULS' DAY : Was formerly regarded as a day of prayer for the souls of the dead.

MARTINMAS : Feast of St. NOVEMBER 11. Martin. Scotch quarter day. Old Martinmas is November 24

DECEMBER 28. CHILDERMAS: Holy Innocents' Day.

MOTHERING SUNDAY is Mid-Lent Sunday, in which the old rural custom obtains of making presents of cakes, &c.

METEOROLOGICAL NOTES.

THE BAROMETER.-Atmospherical Pressure is measured by the Barometer, which should be a mercurial one. The readings of the baro-meter are "corrected" for instrumental errors and reduced to 32° and to sea-level. These

are necessary, since the mercury expands when the temperature rises and the column is lengthened, and two similar barometers cannot read alike unless at the same temperature. In the same way, since the height of the column of mercury measures the weight of the column of air of equal sectional area above it, if two similar barometers be placed one directly above the other it is evident that there will be a less quantity of air above the former than above the latter instrument, and it will read lower.

The following are conditions for a high barometer : (1) When the air is very cold, for then the lower strata are denser and more contracted than when it is warm. The contraction causes the upper layers to sink down, bringing a greater number of air particles, that is to say, a greater mass of air into a given vertical column of the atmosphere supposed unable to expand laterally, so that the pressure at its base is greater. (2) When the air is dry, for then it is denser than when it is moist. (3) When in any

way an upper current sets in towards a given area, for this compresses the strata underneath.

Conversely, the barometer stands low when (1) the lower strata are heated, causing the surfaces

of equal pressure to rise, and the upper layers to slide off as already described, for by this means the mass of air pressing on each unit of area below is reduced. (2) When the air is damp, for as the density of aqueous vapour, at the temperature of 60° and pressure of 30 ins., is = 0.622, air being = 1, the mixture is lighter the more vapour it contains, and consequently damp air does not press so heavily as dry on the unit of area below. (3) When the air from any causes has an upward movement, for this of course acts in the same manner as

(1). From these principles it fol-lows that a fall in the barometric reading usually betokens rain and wind, or an increase in both; but a rise the reverse. The direction of the wind, and the temperature, must be noted, however, for

bad weather may accompany a rise, if the wind be from a cold quarter, the north-east winds tending to raise the barometer the most.

The mean height of the barometer at the level of the sea is nearly the same at all places, and is but slightly affected by the fluctuations of temperature; but in the higher regions of the atmosphere it is greatly affected by these causes.

Great falls of the barometer are generally accompanied by a temperature above the mean for the season, and great rises by one below the same.

a given number of degrees Fahrenheit into grade, deduct 32, multiply by by 5, and divide by 9.

The greatest depression of the barometer occurs daily about 4 a.m. and p.m., and its highest elevation about 10 a.m. and p.m.; in summer, these extreme points are reached from one to two hours earlier in the morning, and as much later in the afternoon.

> To convert English Barometri-cal readings into French (inches into millimètres) or vice versa the following table will be useful.

Mil.	In.	Mil.	In.	In.	Mil.

into Reaumur, deduct 32, multiply by 4, and divide by 9. To convert degrees Centigrade into Fahrenheit, multiply by 9, divide by 5, and add 32. To convert Reaumur into Fahrenheit, multiply by 9, divide by 4, and add 32. The diagram on previous page shows corresponding degrees.

SELF-RECORDING INSTRU-MENTS.

These have, of late years, come into very general use; they enable the observer to ascertain the movements of the barometer or thermometer at any hour of the day, and require very little attention. A properly-prepared chart is placed round a slowly-revolving cylinder, actuated by clockwork movement, and against this a pen, filled with pre-

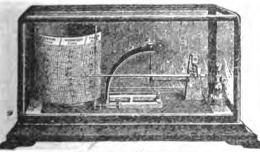

Self-Recording Barometer.

pared ink, is lightly placed; this is held in position by a slender arm, the other end of which is connected with the instrument itself. As the chart slowly revolves the barometer fluctuations in the weather are indicated by slight marks from the pen as shown in the diagrams. The following instructions for the use of these instruments may be interesting :—

Having removed the cover of the instrument, first throw the pen off the cylinder carrying the chart, by turning the milled-head nut in the baseplate.

Wind the clock by the attached key, holding the cylinder firmly in position in the left hand the covered hole *near* the key gives access to the regulator of the clock movement, and should be kept closed.

To place a chart in position, turn the milledhead nut at the top of the retaining spring-band (which is hinged at the bottom), the catch at the upper end being released it will fall downwards—

Self-Recording Thermometer,

remove the used chart (if there is one on the cylinder), and put a new one into position, being careful that its edge rests on the projecting rim at the bottom of the cylinder; one end of the chart should overlap the other, and the junction come where the retaining spring-band, when replaced, will hold the paper firmly to the cylinder. Digitized by GOOGIC

Fill the pen with the prepared ink, draw a piece of paper lightly and carefully across the nibs to see that the ink will flow.

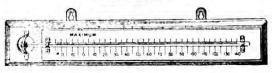

Turn the milled-head in the base-plate and allow the return of the pen to the face of the chart. The pressure of the pen upon the chart should be as light as possible, only sufficient to ensure the pen marking distinctly with the ink. This pressure can be regulated by turning the milled-head screw at the other end of arm which carries the pen.

The cylinder with chart must then be turned upon its centre, until the pen points to the correct *time*.

To set the pen to the correct reading of a Standard, turn very gently the milled head marked "Set Pen," and the arm carrying the pen will be depressed or elevated accordingly.

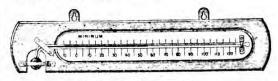

The change of chart should be made on Monday morning between the hours of seven and twelve—this period being duplicated on the chart for the purpose.

REGISTERING THERMO-METERS.

Maximum Thermometer.

The index in this thermometer is formed by small portion of the mercurial column being separated from the main thread of mercury by a minute air-bubble; this portion is pushed on before the column when the temperature rises, but does not return with it when it falls. The detached portion of the column therefore rests at the extreme position to which it has advanced, and the end of it farthest from the bulb registers the highest temperature which has been attained. A slight shake, holding the bulb of the thermometer downwards, resets the instrument.

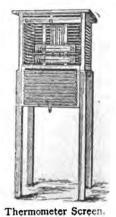

Minimum Thermometer.

The fluid comprised in this instrument is spirit, and in it there is immersed an index. When the

temperature falls the spirit draws the index along with it, but on rising again the spirit passes the index, leaving it at the lowest point to which it has been drawn, the end farthest from the bulb thus registering the minimum temperature. The instrument is reset by raising the bulb and allowing the index to slide to the end of the column of spirit.

Stevenson's Screen is the standard adopted in this country. It secures the thermometer being always in the shade. It is a box formed of double louvres

Original from

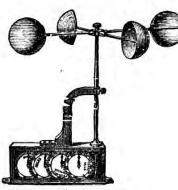

NEW YORK PUBLIC LIBRARY

which slope in opposite directions, so that whilst the air has free access to the thermometers inside, rain and radiant heat cannot enter. The screen should be well exposed to the sun's rays, and the thermometers should be about 4 feet above the ground.

WINDS AND STORMS.

The motion of the air, both in direction and velocity, is regulated by the distribution of atmospherical pressure at the surface of the earth, which is shown by the distribution of the readings of the barometer in the weather chart.

The force of the wind, as distinguished from its direction, is related to the amount of difference of barometrical pressure over a given distance, and

thisisdefined asthe"gradi-ent." Where the lines of equal barometric pressure (the "isobars" ') are close together, we have a steep gradient, and hence may expect strong winds to restore the atmospheric equilibrium. The force of

Anemometer.

the wind therefore does not depend on the absolute height of the barometer at any given station, but on its height as compared with that for the surrounding districts.

CYCLONES .- There are two great classes of atmospheric systems, anti-cyclonic and cyclonic.

Anti-cyclonic systems, antrevetonic and cyclonic. Anti-cyclonic systems are characterised by very slow circulation of the air (light winds), by low temperature in winter, great "absolute" dryness of the air, at least at their centres, and consequent absence of rain, though fog may be very prevalent.

Cyclonic systems on the other hand are characterised by rapid circulation of the air causing strong winds-which appear to flow towards the centre, so that the air is supplied from below and ascends in the centre-a comparatively high temperature, much moisture, and therefore heavy At the rear of the disturbance it may be rain. very dry.

These are the winter conditions. In summer

they are exactly reversed, at least in temperature. One great distinction between cyclones and anti-cyclones is that the former move over more or less large areas, whilst the latter are usually stationary. The actual force of the wind is stationary. The actual force of the wind is measured in a meteorological observatory by an anemometer, of which an illustration is given above.

WEATHER FORECASTING.

For the purpose of official weather forecasting the Meteorological Office receives numerous reports by telegraph from all parts of the British Islands and from many places situated in different parts of Western Europe. Such telegrams are received at three times each day, viz. at 8 a.m., 2 p.m., and 6 p.m. The reports contain observa-

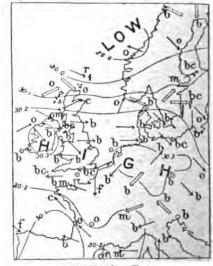

Digitized by GOOS

tions of barometer, temperature, wind, weather, and sea disturbance. This telegraphic information was primarily intended for the issue of storm warnings to various places around our coasts, but the general public asked for daily weather forecasts, and such information has now been given for several years. The observations when received are entered on a chart, and isobars or lines of equal barometer readings are drawn so that any change in the general distribution of atmospheric pressure can be readily traced. A collection of these charts shows that there are various types of weather, some being associated with fine and dry weather, and others with wind and rain. As in our Islands most of our weather changes approach from the Atlantic and move from W. to E., or from N.W. to N.E., they can be generally well traced. A change which is shown to be commencing on our west coasts is likely to develop, and in the ensuing 24 hours will probably extend to other parts of the United Kingdom. The specimen charts which are given to illustrate types of fine and bad weather are drawn from actual observations, and they will probably serve to illustrate the general principle which underlies the system of weather forecasting. There are numerous weather types, but they are all more or less associated with the two general types given. The Fine Weather Type is not infrequently

characterised by the most brilliant summer weather; the conditions are generally dry and the day temperatures usually high. In the winter these conditions are usually accompanied by frost and frequently, if the winds are light, by fog.

It will be noticed that the region of relatively highest barometer is situated over our Islands, and any disturbances arriving from the Atlantic are compelled to follow a course which takes them well to the northward of the British Isles.

The Bad Weather Type is one of the commonest and one of the most persistent experienced. During its prevalence pressure remains relatively high over Central and Southern Europe, while the barometer is low over our Islands and the westward of our shores, and cyclonic disturbances pass with con-siderable frequency along our West coasts. In winter when the barometer differences are great,

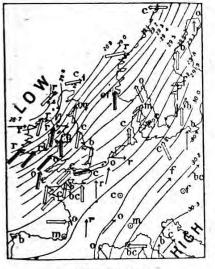

Fine Weather Type.

gales are experienced. The barometer falls as the wind draws S.Wly., and rises as it shifts to the W. and N.W. These changes are constantly recurring. The conditions are those which char-

> Original from NEW YORK PUBLIC LIBRARY -

acterise a broken and unsettled summer, or a mild and wet winter.

When the barometer is comparatively high over Scandinavia and there is a similar region of high

Bad Weather Type.

barometer over France and Spain, with a relatively low barometer over our Islands the weather with us is usually very disturbed, gales occurring When in winter and thunderstorms in summer. once this type of weather sets in it commonly lasts several days, and often for a week or two. There is a tendency always for a persistence of the same weather conditions, that is, when anti-cyclonic conditions are prevailing there is a reluctance for unsettled weather to set in, and similarly when the prevailing conditions are cyclonic there is a great tendency for the recurrence of the rapid changes which are associated with the arrival of the disturbances on our coasts from the Atlantic. When cyclonic disturbances arrive in proximity to our Islands there is a tendency for them mostly to skirt our shores and not to strike inland. Secondary or subsidiary disturbances are commonly formed in the southern segment of the storm area, and they usually travel at a much higher rate than the parent disturbance and frequently develop quite as much energy. A heavy northerly gale is commonly experienced after the barometer commences to rise from a very low point, and this is often due to the travelling high barometer in the rear of the storm moving faster than the area of low barometer with which it is associated. An and a rapid rise of the mercury is not to be trusted. A rapid fall of the barometer is a fairly sure sign of bad weather, wind or rain, and per-haps both. The rise and fall of temperature and the ever-changing character of the clouds as well as the general aspect of the sky all aid materially in weather forecasting, skill in which is only to be obtained by constant and prolonged practice.

STORM AND WIND SIGNALS OF THE METEOROLOGICAL OFFICE.

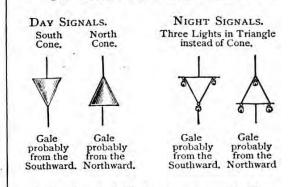

The Cone point downwards means that gales or strong winds are to be expected, at first from the Southward, viz., from S.E. round by S. to N.W. The South Cone is hoisted if it appears

2009le

Vigitized by

probable that a gale will begin from between E. and S.E., and also that it is likely to veer towards S. or S.W.

The Cone point upwards means that Northerly gales or strong winds are probable, viz., from N.W. round by N. to S.E. If it is probable that a gale will begin from between W. and N.W.,

and also that it is likely to veer towards N. or

N.E., the North Cone is hoisted. The Signal is kept hoisted until dusk, and then lowered ; hoisted again the following morning at daylight, and so on for 48 hours from the time at which the message was issued from the Interview of the the message was issued from the Meteorological Office, unless otherwise ordered. At dusk, when a Signal ought to be flying, the Night Signal should be hoisted in place of the Cone—point downwards for South Cone, point upwards for North Cone.

The object of these warnings is only to make known the greater and more general disturbances of the atmosphere, and the hoisting of the Signals is a sign that an atmospherical disturbance is in existence, which will *probably* cause a gale, from the quarter indicated by the Signal used, within a distance of about 50 miles of the place where the Signal is hoisted.

A Southerly wind is more likely to veer rapidly to a point North of West than a Northerly wind is to veer to a point South of East; a gale from the Eastward is more likely to back to the Northward than to veer to the Southward.

NEW YORK PUBLIC LIBRARY

INLAND LETTERS.

The rates for Inland Letters are as follows :

10 ozs. ...21d. | 16 ozs. ...4d. 4 ozs. ...1d.
 12 0ZS. ...3d.
 18 0ZS. ...41d

 14 0ZS. ...31d.
 20 0ZS. ...5d.
 18 ozs. ...41d. 6 ozs. ... $1\frac{1}{2}d$. 8 ozs. ...2d. and so on for greater weights at $\frac{1}{2}d$. extra for every additional 2 ozs. No letter may exceed 24 in. long, 12 in. wide, or 12 in. deep. Letters posted unpaid are charged double postage on delivery; those insufficiently paid, double the deficiency.

EXPRESS DELIVERY.-Letters and parcels are accepted at most of the principal offices for express delivery, at an extra charge of 3d. for every mile or part. The cost of cab hire extra if required. The packet must be handed over counter at the Post Office, with postage and fee affixed in stamps, and "Express Delivery"

boldly written at top left corner. Single letters not exceeding 4 ozs. in weight can be sent by railway. The postage must be paid by stamps, and a fee of 2d. must be paid to the railway servant receiving such letter, and he will affix and obliterate a special label. Such letters *must be* taken to a passenger station, and will be sent to destination by first available train. They may be addressed to the Parcel Office at the station of destination "to be called for," or if so desired will be posted in the nearest Post Office to the station to which addressed for delivery by ordinary post.

INLAND NEWSPAPERS.

The ordinary postal rate on unregistered news-papers is a halfpenny for every 2 ozs.; but publications which consist wholly or in great part of news, or articles on current topics, and which are printed and published in the United Kingdom at intervals of not more than seven days, may-for an annual fee of 5s.—be registered for trans-mission by post in the United Kingdom at the newspaper rate of a halfpenny each, irrespective of weight. No newspaper packet may be above 5 lbs. in weight, 24 in. long, 12 in. wide, or 12 in. deep.

NEWSPAPER WRAPPERS.-Halfpenny stamp, ³d. each, 7 for 4d., or 225. rod. per 480; Penny Stamp, 1¹d. each, 8 for 8¹d., or 215. 3d. per 240. Sheets of halfpenny wrappers may be obtained at two days' notice in packets of 120 sheets of 14 wrappers each at £3 18s.

INLAND BOOK POST.

• The rates for Book Packets are as follows:

II lbs. is the limit allowed.

POST CARDS, REGISTRATION, &c.

POST CARDS .- Post Cards are sold at the POST CARDS.—Post Cards are sold at the following rates :—Stout Cards $\frac{3}{4}$ d. each, 6d. for 10, or 5s. for 100. Thin Cards $\frac{3}{4}$ d. each, 5d. for 10, or 11s. for 240. Uncut sheets can be obtained at any Post Office at two days' notice in packets of 120 sheets (containing 42 cards each, or a total of 5,040 cards) at £12 6s. for stout cards, and £11 8s. for thin cards. *Reply* Post Cards are issued at double these rates, but are not sold in uncut sheets Official Post Cards or private cards sheets. Official Post Cards, or private cards embossed by Office of Inland Revenue with a halfpenny stamp, may be used for correspond-ence throughout the United Kingdom, and private cards bearing an adhesive halfpenny stamp may also be used provided they are composed of ordinary cardboard, not thicker than official cards, and are of about the size of official cards,

being not less than 31 in. by 21 in. LETTER CARDS.—Letter Cards are sold at

14d. each, 4 for 44d., or 8 for od. REGISTRATION & INSURANCE.—The fee for registering an Inland Letter, Packet, Parcel, &c., is 2d. over and above the ordinary Parcel, &c., is 2d. over and above the ordinary postal rate, and in the event of loss or damage this covers compensation up to $\pounds 5$. The packet *must* be enclosed in a strong cover, securely fastened, and if containing coin, *must* (to gain the benefit of the Post Office guarantee) be enclosed in a *special Registered Letter envelope*, sold at all post offices. The packet *must* be given to a Post Office official, and a receipt obtained for it, and if, contrary to this rule, it should be dropped into a letter box, it becomes liable to a fee of 4d. on delivery. Letters con-taining coin, iewellery, or watches, if posted taining coin, jewellery, or watches, if posted without registration, are liable to a similar fee on delivery.

PRIVATE LETTER BOXES.—Posting boxes may now be fixed in private houses in London on the following conditions. The box must be approved by the Postal authorities, and must be fitted with a lock supplied by them at the cost of the user, who will not be allowed access to the interior of the box. The box must be easily accessible from the street for the purpose of collection. The annual fees are as follows :-Initial fee, 205. for two collections other than the "general," and 105. for each additional collection. For the "general" collection, 405.

District, 5.30 p.m., or with 2d. late fee, 6 p.m. At other Branch and Sub-offices, 5 p.m. Inquiries for Missing Letters should be made

at the Secretary's Office, St. Martin's-le-Grand, between 10 a.m and 4 p.m. (Saturdays 10 and 1). The Poste Restante is at the General Post Office; the Returned Letter Office is at Mount Pleasant, and the Money Order Office is at Nos. 18-20, Fore St., E.C.; the Post Office Savings Bank is at 144A, Queen Victoria Street.

FOREIGN POST.

LETTERS.—The rate of postage on letters addressed to most British possessions is 1d. per do oz.; to the Australian colonies, Rhodesia, and some minor colonies, and to all foreign countries the rate is 21d. per 1 oz. No letter may be more than 24 in. long, and 12 in. wide, or

deep. NEWSPAPERS AND BOOKS.—The rates for Newspapers and other printed matter are given in the table below; circulars in identical form from type-written originals, or printed in imitation type-written characters, are admitted if in numbers of not less than twenty and specially handed over the counter at a Post Office and attention called to their nature. Upon Commer-cial Papers the lowest rate is 2¹/₂d. for any weight less than 10 ozs., but those under 1 oz, for British possessions other than those above named may be sent cheaper as letters (which see). Limit-ation of size for Foreign countries of the Postal Union is 18 in. long by 12 in. wide or deep, and to other places abroad the limit is 24 in. long by 12 in. wide or deep. If in form of a roll the

limits are 30 in. long by 4 in. diameter in either case. Limitation of weight is 4 lbs. to Foreign countries in Postal Union, and 5 lbs. to other countries.

SAMPLES.-Bond fide trade samples, not being liable to Customs duties, and not sent in execution of an order, or by one private individual to another, may be sent by post to the Colonies and all Foreign countries at book post rate, but the lowest rate is rd. The packet must be open at ends, but samples of seeds, drugs, &c., may be sent in boxes or bags fastened so that they may be easily opened. Such samples must not be of saleable value, or of a dangerous or prohibited nature. Limit of size to any Foreign country in Postal Union is 12 in. long by 8 in. wide and 4 in. deep, or for packets in the form of a roll, 12 in. long and 6 in. diameter. To other Countries and British Colonies the limit is 24 in. by 12 in. by 12 in. The weights allowed are 12 ozs. to Foreign countries in the Postal Union, and 5 lbs. to other countries.

POST CARDS may be sent to all countries at one penny each for single, and twopence each for Reply cards. Regulations same as Inland.

REGISTRATION.—Fee and regulations same as Inland. Coin, jewellery, &c., is permitted to be sent to some countries, but value of contents must not be marked on outside. Letters containing bank notes, bonds, &c., can be insured when sent to some countries. By prepayment of an extra fee of 21d. an acknowledgment of the receipt of a registered packet when sent to a country of Postal Union may be obtained from the addressee.

MONEY ORDERS.

INLAND .- The Rates for Inland Money Orders are as follows :-

N	lot exce	eding £	I			2d.
E	Exceedin	g £1 an	d not ex	ceedin	g £3	3d.
	,,	£3	,,	,,	£10	4d.
				nay be	issued i	for a
highe	r amour	t than #	510.			
Mo	ney ma	ay be	transmi	tted b	by teleg	raph

between all post offices which transact Telegraph and Money Order business. The rate of commis-sion is, not exceeding \pounds_3 , 4d.; above \pounds_3 , and not exceeding \pounds_{10} , 6d.; in addition to the cost of official telegram, the minimum being 6d.

FOREIGN MONEY ORDERS are issued in the United Kingdom to Foreign Countries at a uniform rate of 6d. for sums not exceeding £2; of 1s., not exceeding £6; of 1s. 6d. not exceeding £10. And Money Orders can be advised by Telegraph to various Foreign Countries, particulars of which can be obtained on application at any Money Order Office.

POSTAL ORDERS.

Postal Orders are now issued at all Money Order Offices at the following rates :-

IS. and IS. 6d	td.
25., 25. 6d., 35., 35. 6d., 4s., 4s. 6d., 5s.,	201
75, 6d., 105., and 105, 6d	Id.

..... 1 d. 155., 205.

Odd pence (not exceeding 5) may be affixed to the face of Postal Orders as value.

POST OFFICE SAVINGS BANKS.

Sums of one shilling or of any number of complete shillings are received at all Money Order Offices, on deposit, but no one may deposit more than £50 in one year, ending December 31, and no deposit account can exceed \pounds_{200} . Interest is allowed at the rate of \pounds_{2105} . per cent. per annum. Smaller sums may be saved by purchasing penny postage stamps, and affixing them on a form, supplied at any post office; twelve stamps so affixed will be received as a deposit of one shilling. INVESTMENTS. — Depositors can invest sums in Government stock, and all dividends in respect of such stock will be credited to the deposit account in the same amount as interest

deposit account in the same manner as interest. The commission charged for investments or sales is as follows :- £25, 9d. ; £50, 15, 3d. ; £75,

NEW YORK PUB

15. 9d. ; $\pounds 100$, 25. 3d. ; and for every additional $\pounds 100$ up to the limit of $\pounds 500$, 6d.

INSURANCES AND ANNUITIES.—The Postmaster-General is empowered to insure the lives of persons between the ages of 14 and 65 for not less than \pounds_5 or more than \pounds_{100} , and to grant annuities of not more than \pounds_{100} , and to lives of persons of the age of 5 and upwards. A life in the 30th year may be insured for \pounds_{100} by a single payment of \pounds_{46} 115. 6d., or by an annual payment through life of \pounds_{235} , or by an annual payment up to the age of 60 of £2 10s., or in quarterly, monthly, or fortnightly payments in proportion.

INLAND TELEGRAMS.

The charge for telegrams throughout the United Kingdom is 6d. for the first 12 words and 1d. for every additional word, the names and addresses of sender and receiver being counted. Names of places consisting of more than one word will be charged as one; London District initials will be counted as one word; figures will be counted as 5 for a word.

Porterage is charged at the rate of 3d per mile (reckoned from the Telegraph Office), if the telegram is for delivery beyond 3 miles from that Office (or beyond the town postal delivery). The sum paid for delivery is telegraphed to the delivering office, and if under calculated, the

deficiency is charged on delivery, whilst any excess is refunded on application to the Secretary. Telegrams bearing the words "by post," or "by train" (which must be paid for) after the address, are forwarded by post or train from the delivering office, a deposit of rs. being payable by sender when sent by train to cover cost of consender, when sent by train, to cover cost of con-

veyance. Telegrams repeated at the request of the sender are charged at one half the ordinary tariff; fractions of one halfpenny being reckoned as a half-penny. The money will, however, be refunded if it should turn out that the telegram has been inaccurately transmitted.

The cost of a reply, not exceeding 48 words in length, may be prepaid, and the reply may be sent, from any Telegraph Office, at any time within two months after the date of the original telegram. A reply form may be used for an

original message. Telegraph Offices are, as a rule, open from 8 a.m. to 8 p.m. on week days and Bank Holidays, and from 8 a.m. to 10 a.m. on Sundays, but there are several in London and provincial towns which are open continuously.

FOREIGN TELEGRAMS.

The following are the rates from any part of the United Kingdom. Address of receiver must be paid for as well as that of sender, if transmitted.

mitted. Aden, 3s. od. per word; Antigua, 4s. 4d.; Argen-tine Republic, 3s. 11d. and 4s. 2d.; Austria, 3d.; Azores, 9d.; Bahamas, 2s. 5d.; Barbados, 4s. 9d.; Belgium, 2d.; Bermuda, 2s. 6d.; Brazil, 3s. to 5s. 7d.; British Borneo-Labuan, 4s. rod., other places, 5s.; Burmah, 2s. 6d.; California, 1s. 6d.; Canada, 1s. to 3s. 6d.; Cape Colony, 3s.; Ceylon, 2s. 7d.; China, 5s. 5d. to 5s. 9d.; Cuba, 1s. 8d. to 1s. rod.; Denmark, 3d.; Egypt, 1s. 7d. to 2s. 6d.; France, 2d.; Germany, 2d.; Gib-raltar, 3d.; Holland, 2d.; Hungary, 3d.; India, 2s. 6d.; Italy, 3d.; Jamaica, 3s.; Japan, 6s. 2d. to 7s. 9d.; Labuan, 4s. rod.; Madeira, 1s.; Mauritius, 3s.; Mexico, 1s. 6d. to 2s. 7d.; Natal, 3s.; New Brunswick, 1s.; Newfoundland,

'Zululand, 2s. 3s. ; Zululand, 3s. No word may exceed 15 letters.

PRIVATE TELEGRAPH WIRES.

Private wires are fixed by the Post Office authorities between two or more places at the

following rates per annum :----In London, over house or under ground, per mile, £5; on the roads, £4. Double wire for Telephone lines, £7 and £6 respectively. Other parts of the United Kingdom, over

house or under ground, per mile, \pounds_4 ; on the roads, \pounds_3 . Double wire for Telephone line, \pounds_6 and £5 respectively.

Rental of Instruments, including maintenance and repairs :-

A B C, per set (communicator, indicator, and bell), if rented from the department, per annum......£4 Single Needle and Battery, per annum ... Printer and Battery, per annum...... 10 Telephones per set (transmitter, re-ceiver, bell, and battery) 2 2 0

TELEPHONE NOTES.

POST OFFICE LONDON TELEPHONE SYSTEM.

The Post Office has opened a Telephone Ex-change System in the London Exchange area. The rates of subscription (including one telephone at the subscriber's premises) are as follows :

Ordinary Message-rate Service.—(a) Connec-tion with any exchange in County of London within 2 miles of subscriber's premises, Ann. sub. £5, and, in addition, 1d. for each call to a subscriber on any London exchange, and 2d. on any other exchange. (b) Connection with any exchange outside County of London within 2 miles of subscriber's premises, Ann. sub. £4, and, in addition, Id. for each call to a subscriber on same exchange, or 2d. on any other exchange.

Minimum yearly amount for message fees, 30s. Party-line Message-rate Service.—(a) Con-

nection with any exchange except Central by a line used by one or two subscribers, $f_{3.}$ (b) Con-nection with any exchange outside the County of

London for 3 to 10 subscribers, £2. Message fees for calls same as above; minimum yearly, £3.

Subscriptions at party-line rates cannot be accepted from subscribers on the Central Exchange, or at the lower party-line rate from sub-scribers on any exchange in the County of London.

Unlimited Service.-Connection with any ex-change within 2 miles of subscriber's premises, and an unlimited number of calls. (a) First line,

 \pounds_{17} . (b) Each additional line, \pounds_{14} . Call Offices.—Fee 2d. both to subscribers and non-subscribers.

All agreements are for one year, and are then terminable by 3 months' notice. P. O. subscribers have the right to communicate

with subscribers of the National Telephone Company in the London Exchange area at the same

rates of charge as for communication with other P. O. subscribers, as well as the privilege of com-municating with the Continent by their Exchange Lines on payment of the appropriate fees.

The terms for Telephone Exchange circuits and for circuits to Post Offices, for use in connection with the Telephone Trunk lines may be ascertained on application to the Secretary, General Post Office, E.C.

Payments for Conversation.—Where Tele-phone exchanges in different towns are connected by Trunk lines, such lines may be used for a three-minute conversation by local subscribers and the general public on payment of the follow-

RATES, TAXES, LICENCES, STAMP DUTIES, &c.

Affidavits .- An Affidavit or Statutory Declaration must be stamped with a half-crown stamp.

Except such as are to be used in any court or required by any Board of Revenue, or by law and made before any Justice of the Peace, or required at the Bank of Eig. or Ire, to prove the death of any proprietor, or for the transfer of stock, &c., or as to the loss, &c., of any bank note or bank post bill, or declaration required in order to a marriage without licence, or Declaration forming part of an application for a patent.

Agreements or Contracts.-If under hand only of the value of $\pounds 5$ or more and not otherwise charged, the duty is sixpence, which may be affixed by an adhesive stamp.

Agreements under ξ_5 or for hire of labourers or manual servants or for sale of goods, &c., or between master and men of a ship for wages need not be stamped.

Appointment of a New Trustee by any instrument except a Will, 10s.

Appraisement or Valuation. -£5-3d.; £10-6d.; and for every £10 up to £50-6d.; above £50, not above £100-5s.; £200-10s.; £500-15s.; above £500-20s.

Apprentices' Indentures.-To be binding, these must be in proper legal form stamped with a half-crown stamp—an ordinary form of agreement will not suffice. The length of term, premium to be paid, remuneration to apprentice, &c., vary with the nature of the trade and the will of the A statute of Queen Elizabeth fixed the parties. term of apprenticeship at 7 years, and though this was repealed in 1814 that period is still regarded as the most satisfactory. An indenture is usually determined by the death of the master. In London, if bound to a member of one of the great City Companies, the apprentice is entitled to take up the "freedom of the City" at the expiration of the seven years on payment of a small sum.

Armorial Bearings, 215.; on carriage, 425. The term "Armorial bearings" includes any crest, coat of arms, or ensign, whether registered at the College of Arms or not, and whether used on plate, jewellery, paper or otherwise, but a licence to use on a carriage includes use in any other manner. Licences expire Dec. 31.

Armorial bearings used solely as Trade Marks or for Trade purposes or by any Corporation or Public Com-pany in their Corporate capacity are exempt.

Attorney, Letter or Power of-

For appointing Proxy at any single meeting, or adjournment thereof, 1d.

For receiving Wages or Prize Money, 1s. For the sale, transfer or acceptance of Govern-ment Stock, where the nominal value does not exceed £100-2s. 6d. Any other kind, 10s.

Bills of Exchange-

Digitized by Google

A Bill of Exchange payable on demand, at a period not exceeding three days after date, on

sight or on presentation, 1d. A Bill of Exchange or Promissory Note of any other kind negotiated in the U. K.:

Not above	£50	1	1	Not above	£50.	0	6	
"	100	2		"	75			
	250	0		<i>"</i> .	100	-	~	

And for every £100, or any fractional part of £100, 15.

Bills of Exchange drawn out of the United Kingdom, when negotiated here, exceeding £50 and not exceeding £100, 6d; exceeding £100, 6d, for every £100 or part thereof. A Bill of Exchange is an unconditional written

order given for a consideration by one party (the drawer) upon another (the drawee). Such a document is of no commercial value till it is "accepted," and the acceptor then becomes primarily responsible for payment, the drawer only secondarily so, provided that if not paid at maturity the document is immediately "noted" in the proper manner. Before it can be paid, the Bill must be "endorsed," or signed across the back by the drawer. The customary form of acceptance for Form No. 1 would be "accepted, payable at (such and such) a bank," and the acceptor's signature.

The person to whom a Bill is payable may

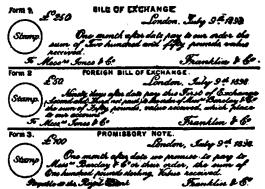

assign it to another by writing above his signature the words "pay to the order of" so and so. Instead of "one month after date," or "ninety days after date," any other period may be stated, or the Bill may be made payable at so many days or months "after sight" (*i.e.* after being presented for acceptance); or, again, immediately on presentation, by the substitution of the words "at sight."

A Promissory Note does not require to be accepted," but must be endorsed by the payee "accepted,

before value can be received. Three days' "grace" are allowed after the date when a Bill becomes due, but this does not apply to Bills payable at sight. In foreign

countries the number of days of grace varies. Bills of Exchange and Promissory Notes due on any bank holiday are payable the day follow-ing; those due on Good Friday, Christmas Day,

or on a Sunday are payable the day previous. The following are ordinary forms of Bills of Exchange and Promissory Notes :--

Bonds.—A Bond, Covenant, or Instrument, which is the principal security for any sum or sums of money at stated periods for a definite period, is liable to an *ad valorem* duty for the

whole sum (see MORTGAGE). If it is for life or other indefinite period, for every £5 or part of £5 of sum periodically payable, 25.6d.

In the case of any superannuation annuity: for every £5 or part of £5 of the annuity or sum periodically payable, 6d. Bonds, by Acts of Parliament or by Customs or Inland Revenue, where penalty does not ex-ceed £150, duty as in MORTGAGE. In any other

case 55. A Bond on obtaining Letters of Administration in England or Ireland, or a confirmation of testa-

in Edgiand G. Linguand G. S. ment in Scotland, £5. Carriage Tax.—The duty on carriages of all Carriage South 4 or more kinds (except Hackney Carriages) with 4 or more wheels drawn or fitted to be drawn by 2 or more horses or mules or propelled by mechanical power is 42s.; if by one horse or mule only, 21s.; with less than 4 wheels, 15s.; Hackney Carriages, 15s. Only half the amount is charged if the licence is taken out after Oct. 1 in any year, but all licences expire on Dec. 31. On Motor Cars, in addition to the Carriage Tax a further duty

is payable as follows: Weight, without water, fuel or accumulator, from r to 2 tons, 42s.; above 2 tons, \pounds_3 3s. (See also under Armorial Bearings and Servants.)

Carriages, Carts. Waggons, &c., used solely for convey-ance of goods for Trade purposes are exempt if the name, &c., of owner are legibly painted on them.

Contract Note, advising sale or purchase of Stock of the value of £5 and under £100-1d.; £100 or upwards, 1s.

A note advising sale or purchase of more than one description of Stock will be deemed to be as many notes as there are descriptions of Stock.

Conveyances.—A Conveyance or transfer, whether on sale or otherwise, of Bank of Eng-land Stock, is liable to a duty of 7s. 9d.; of Canadian Stock, inscribed in books kept in the United Kingdom, and Colonial Stock registered under the Colonial Stock Act, 1877, of 28. 6d. for every £100 or fraction of £100.

Conveyance or transfer on sale of any property (except such Stock as aforesaid), where the purchase or consideration money is not above £5-6d.

For every additional \pounds_5 , up to \pounds_{25} —6d.; for every \pounds_{25} , up to \pounds_{300} —2s. 6d.; for every addi-tional \pounds_{50} —5s.

Of any other kind, 105.

See also under Securities.

Dog Tax.—The duty on any dog of the age of six months, no matter of what description, in England, Wales and Scotland, is 7s. 6d. Dogs under six months are not liable, but a licence must be taken out as soon as they attain that age. Dog licences are issued at all Voney Order Offices and expire on Dec. 31. The penalty for Offices and expire on Dec. 31. The penalty for keeping a dog without a licence is \pounds_5 . In Ireland the licence duty for each dog is 2s.; the certificate of registration bears a sixpenny Petty Sessions stamp, but one stamp suffices for each licence which may include several dogs.

Dogs kept and used solely by blind persons are exempt, and farmers and shepherds may obtain exemption for 2 or more dogs kept solely for guarding sheep, on making the necessary declaration.

Estate Duty.-This duty is payable upon the principal value of all property, real or personal, settled or not settled, which passes on a death. In estimating the value of the estate for duty, the funeral expenses and all outstanding debts and liabilities should first be deducted. The following are the rates of Duty :— $\pounds_1\infty$ to $\pounds_5\infty$, 1 per cent.; $\pounds_5\infty$ to \pounds_1,∞ , 2 per cent.: \pounds_1,∞ to \pounds_10,∞ , $x_{1,000}$ to $x_{1,000}$, y_{2} per cent. : $x_{1,000}$ to $x_{10,000}$, $y_{25,000}$ to $x_{50,000}$, $4\frac{1}{2}$ per cent. ; $x_{50,000}$ to $x_{75,000}$, 5 per cent. ; $x_{75,000}$ to $x_{100,000}$, $5\frac{1}{2}$ per cent. ; $x_{100,000}$ to $x_{150,000}$, 6 per cent. ; $x_{150,000}$ to $x_{250,000}$, $6\frac{1}{2}$ per cent. ; $x_{250,000}$ to $x_{500,000}$, 7 per cent. ; $x_{500,000}$ to $x_{1,000,000}$, $7\frac{1}{2}$ per cent. ; above $x_{1,000,000}$, 8 per cent. In addition to the above, where property liable

In addition to the above, where property liable to Estate Duty is settled by the will of the deceased, or having been settled on or after Aug. 1, 1894, by some other disposition passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty called Settlement Estate Duty is payable at the rate of $\pounds I$ per cent. on the settled property, but from that payment the ad valorem stamp duty charged on the settlement may be deducted.

But where the net value of the property, real and personal, does not exceed $\pounds 1,000$, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from

Legacy or Succession Duties. Small estates up to £300 and £500 gross, are charged with fixed duties of 30s. and 50s., and are exempt from all other death duties.

Interest at 3 per cent. per annum is also pay-able on the Estate Duty from the date of the death down to the date of the delivery of the affidavit, or the expiration of six months after the death, whichever first happens.

The duty at the rate of 1 per cent. payable under the Acts relating to Legacy or Succession Duties, and the additional Succession Duties imposed by Sec. 21 of the Customs and Inland Revenue Act, 1888, are not leviable in respect of property chargeable with Estate Duty in cases where the deceased died on or after Aug. 1, 1894.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, with interest at 3 per cent. per annum, but arrears of Estate Duty are chargeable with interest at 4 per cent. per annum.

In small estates, where the gross value does not exceed \pounds_{300} , probate and letters of ad-ministration may be obtained through an Inland Revenue Officer.

Game and Gamekeepers' Licences .-- No one may use a gun without a proper licence. To carry a gun or firearm of any description the licence costs ros. and expires July 31. An annual licence for killing game, expiring July 31, costs \pounds 3; for 14 days only, 205. A short period licence frow Aug. 1 to Oct. 31, or from Nov. 1 to July 31, costs \pounds 2. A gamekeeper's licence costs \pounds 2, and any one having the right to kill game in England any one having the right to kill game in England or Scotland can take an annual licence out for any assessed servant to act as a gamekeeper for the same sum. Such licences expire July 31.

In Ireland the licence for a gamekeeper acting under a deputation registered with supervisor for a whole year costs \pounds_3 ; from Aug. 1 to Oct. 31, or Nov. 1 to July 31, £2.

Persons holding game licences, soldlers, sailors and volunteers, when using or carrying a gun in the execu-tion of their duty, or when engaged in target practice, need not have a gun licence, 33 & 34 Vict. c. 57, sec. 7. sub-section 1.

In England the word "game" includes phea-sants, partridges, grouse, black, heath or moor game, bustards and hares, but *owners* may kill hares without a licence. The penalty for killing ame or using a gun without licence is £20.

Shooting game on a Sunday is also illegal. General Rato.—This rate is one for meeting various items of expenditure, such as paving, lighting, cleansing, &c. In counties it goes by the name of THE COUNTY RATE, in the Metro-polis it is called TUE CONSOLUTER DATE. polis it is called THE CONSOLIDATED RATE, and in a few Parishes and in all Boroughs THE GENERAL DISTRICT RATE. It sometimes in-cludes the School Board Rate. It is based on the same assessment as that used for the Poor Rate, and varies according to circumstances. As a rule

it is payable quarterly (half-yearly in Boroughs). The General Rate covers the expenses of watching, street lighting, repair and watering of streets and sewers, and the expenses of the Health Department and Hospitals.

Improvement Rate .- This provides for repayment of expenses of street improvements, quays, &c.; the General District Rate is mainly for parks; the City Rate is applied to meet deficiencies in the City Fund for Criminal Prosecutions, salaries of officials, cost of markets, baths and wash-houses, weights and measures, registration expenses, fire brigade, &c.

It may be well here to say that the remarks in these columns concerning Rates can only be taken generally the whole system of making and collecting Rates differs materially in different parts of the kingdom and no definite rule can be stated in regard to them. Inhabited House Duty.—This is payable annu-

ally in January. The rate of duty is fixed by the Commissioners quinquennially on the full estimated annual value of all houses of the rental value of £20 or more, less local rates. The guinquennial assessment of 1900 is at present in force for the metropolis, the present rate of duty being as follows:—On inhabited houses the annual value of which exceeds $\pounds 20$ but does not exceed $\pounds 40$, if used for the sale of goods, the shop or warehouse being on the ground floor; or for the retail of beer, wines or spirits; or if occupied by any person carrying on the business of an hotelkeeper, inn-keeper, or coffee-house keeper, al-though not licensed to sell therein by retail, ale, wine, or other liquors ; or is occupied by a tenant or farm servant for husbandry purposes only, for every 20s. of annual value, the sum of 2d. not so used or occupied, 3d. If

When the annual value exceeds \pounds_{40} but does not exceed £60, if used or occupied as above, 4d. If not so used or occupied, 6d.

When the annual value exceeds £60, if used or occupied as above, 6d. If not so used or occu-pied, 9d. Lodging houses, if registered, are sub-ject to the reduced duty only. Artisans' dwellings (where the annual value of each dwelling does not amount to £20) are exempt.

Tenements, or parts of tenements, occupied solely for purposes of trade, or for purpose of any profession or calling, are exempt from duty (see

44 Vict. c. 12, s. 24). Income Tax is collected under five Schedules. Schedule A is the landlord's tax, and is based on the rent or annual value of the property rated, less the statutory deduction for repairs.

These are as follows :

Lands (inclusive of the farm-house and other buildings, if any) one-eighth of the full annual value.

2. Houses or buildings (exclusive of farm-houses or buildings assessed with lands) onesixth of the full annual value; but where a tenant pays cost of repairs, the deduction is not to exceed such a sum-not being more than one-sixth of the annual value—as will reduce the net assessment to the actual amount of rent.

The tenant pays this tax, but, as is shown above, is entitled to deduct from the next payment to the Landlord for rent the whole amount, or such part of it as represents the actual annual rental, (See below.)

Schedule B is for incomes derived from the use of land by farmers and others, and is based on the rent paid, the assessment being one-third of the rent or annual value, including Tithe Rent

charge (if any). Schedule C applies to incomes derived from Government dividends and annuities.

Schedule D is for trade and professional incomes, and those not included in any other Schedule. Under this Schedule the tax is payable annually on or before January 1, and is based, not on a person's actual income for the past year, but on an estimate of what it is likely to be for the coming year (or rather on the year ending April 5 ensuing), such estimate being obtained by ascertaining the *average* of the three years ending April 5 immediately preceding that date (January i) on which the person's accounts were made up to. The rate per \pounds varies accord-ing to the requirements of the Government, as

indicated in the Annual Budget. The Finance Act of 1897 enacts that where the total joint income of a husband and wife does not exceed \pounds 500, and they are engaged in *separate* businesses, if the income of *each* is under the limits within which abatements may be claimed, they shall nevertheless be entitled to claim same.

Digitized by GOOgle

Persons who pay life assurance premiums are entitled to deduct the amount of annual premium from the estimated income to the extent of one-sixth of the income by filling up the space left on the official forms for the purpose. But should the income thereby be reduced below the above limits, such deduction will not entitle to total or partial exemption.

Schedule E is for persons employed by public companies, corporations, &c.

The rate of Income Tax for the present year is 15. 2d. in the £ under each Schedule. Relief is given in certain cases under Schedule A to the extent of $\frac{1}{2}$ or $\frac{1}{2}$ of the assessment. Under Schedule B the tax is charged at the full rate on one-third of the full annual value of the lands without any deduction.

Incomes not exceeding the following sums are entitled to the abatement named against each :-

Not exceeding $\pounds 400$ an abatement of $\pounds 100$; $\pounds 500$ of $\pounds 150$; $\pounds 600$ of $\pounds 120$; $\pounds 700$ of $\pounds 700$. The following shows amount payable on in-comes varying from $\pounds 200$ to $\pounds 1000$:-

Tax,	Tax.	Tax,

	100	,

The Land Tax is payable under Schedule A of the Income Tax and is paid by tenant and deducted from rent. There is a fixed quota for each parish which, under the Finance Act, 1896, is not to exceed one shilling in the £.

Under the Finance Act of 1898, owners of property whose incomes do not exceed £160 are relieved of payment of land tax, while an allowance of half the tax is made to owners whose incomes exceed £160 but do not exceed £400. When land tax has been assessed, a certificate

from the surveyor of taxes allowing total exemption or abatement, as the case may be, must be produced before the amount of the assessment has been paid,

The owner of any land may in any year re-deem the Land Tax charged on such land by payment of a capital sum, equal to thirty times the sum assessed on such land by the assessment last made and signed, and such sum may be paid either in a single payment or by such annual instalments as may be agreed upon with the Commissioners of Inland Revenue, and interest at the rate of three per cent. per annum on so much of the capital sum as remains unpaid shall be payable with each instalment, and all the instalments remaining unpaid may be paid at

Leases.—For a definite term under a year of Leases.—For a definite term under a year of which does not exceed the rate of £10 a year the stamp duty is 1d.; of any furnished dwelling, or apartment, the rent of which exceeds £25 a year for such term, 2s. 6d.

Legacy Duty.-Legacy Duty is payable on all legacies willed by a deceased person, on the following scale :- To children of the deceased, or their descendants, or to the father or mother or other lineal ancestor of the deceased, £1 per cent.; to brothers and sisters of the deceased, or their descendants, £3 per cent. ; to an uncle or aunt or their descendants, £5 per cent. ; to a great-uncle or great-aunt, or their descendants, £6 per cent. ; to any person in any other degree of collateral consanguinity, or to a stranger in blood to the deceased, fro per cent. Legacy to a husband or wife is chargeable with Estate Duty, but not Legacy Duty. (See also Estate Duty.) Limited Liability Companies.—The Capital of Companies with Limited Liability, otherwise than under the Companies det is liable to a starme duty

under the Companies Act, is liable to a stamp duty of 2s. for every £ 100. Statement of capital is to be delivered to the Commissioners of Inland Revenue within one month after date of letters patent or passing of Act, under a penalty of 10 per cent. per month for every month after the first month.

Companies Limited by Shares are liable upon the nominal capital, original or increased, to a

duty of 5s. per cent. Male Servants of any age require a licence which costs 15s. and expires Dec. 31, but a person who is bona fide engaged to serve for part only of each day and does not reside in his employer's house is exempt.

Marketable Security.-(1)Marketable Security.

(a) A Colonial Government Security, or (b) a Security not transferable by delivery, or (c) a Security transferable by delivery. The same ad valorem duty as upon a mortgage.

(d) A Foreign Marketable Security issued abroad and interest payable there if assigned, transferred or negotiated in the United Kingdom after Aug. 1, 1899. For every £10 or part thereof, 1s.

(2) Transfer, Assignment, &c., of a Marketable Security-

Upon a sale thereof, see Conveyance Upon a mortgage thereof, see Mortgage of Stock or Marketable Security.

In any other case, ros. (3) Marketable Security (except a Colonial Government Security), transferable by delivery.

For every £10 or part thereof, 15. (4) Marketable Security (except a Colonial Government Security) as last aforesaid given in substitution for a like security duly stamped in conformity with the law in force at the time when it became subject to duty

For every £20 or part thereof, 6*d.* Mortgage Bond, &o. (except a marketable security):

(1) Being the only or principal or primary security (other than an equitable mortgage) for the payment or repayment of money-Not exceeding

For every £100 or fractional part, 1s.

(4) Transfer, Assignment, Disposition, or As-gnation of any mortgage, bond, debenture, or signation of any mortgage, bond, debenture, or covenant (except a marketable security), or of any money or stock secured by any such instrument or by any warrant of attorney to enter up judg-

For every \$100 or part thereof (exclusive of interest which is not in arrear), 6d.

(5) Re-conveyance, Release, Discharge, Sur-render, Re-surrender, Warrant to Vacate, or Renunciation of any such security as aforesaid-

For every £100 or part thereof, 6d. Poor Bate.—This is an important rate, as the amount of assessment for Poor Rate is taken as a basis for all other local rates. A valuation list is prepared periodically by the Overseers, and, after publication, is sent to the Poor Law Guardians. After hearing any objections that may be made, they modify the list as they think fit and sign it. It is then taken as the basis for making various rates for the ensuing twelve months; taxpayers should therefore be particular to see that the amount of their assessment for this rate is correct. An important point to note is that where the tenant does the repairs,* one-sixth of the Gross Rental is allowable for doing them, and this reduced amount is the amount on which the rate is payable. Notice is usually given of the rateable value, and not of the gross value, except in the quinquennial year, when the gross value is notified. This gross value is arrived at, in cases of leases, or where the tenant repairs and pays insurance, by adding a percentage according to the duration of the lease or agreement; thus, say the rent is $\pounds 60$, to per cent, would be added for a supposed lease = $\pounds 65$, and one-sixth being deducted from this would give $\pounds 55$ as the rateable value. The tenant seeing that this was less than the rent would be satisfied, but should there be no lease, and should repairs be done by the tenant, the proper amount would be f_{00} less one-sixth = f_{00} .

The proper time to object is before the assessment list has been signed by the Guardians; after that, the only appeal from their decision is to quarter sessions, or on structural alterations or

new lettings. **Police or Watch Rate.**—By the 2nd and 3rd Victoria for regulating the Police in the City whether of London, all premises in the City, whether occupied or otherwise, are liable for this rate. The amount payable is arranged on the basis of the Poor Rate Assessment; it varies according to circumstances, but is usually 5d. in the L. Of this 2d, is payable for the first quarter, and 1d, each for the other three quarters. In other places this rate is included in the Borough rate (Muncipal Corporations Act, 1882), and the amount is collected with the Poor Rate.

Probate Duty Grant.-The probate duty grant to local authorities was replaced in 1894 by a grant out of the estate duty derived from personal property of a sum of one and a half per cent. on the net value of the property which would, but for the substitution of estate duty, have been chargeable with probate duty. Railway Passengers' fares.—(Except fares not

exceeding 1*d*. per mile). Urban District traffic 2 per cent. ; other 5 per cent. **Receipts** for the payment of £2 or up-

wards, id. The School Board Rate is levied upon the total rateable value (Poor Rate), and the amount varies according to the expenditure of the local School Board. In some places the School Board issue a precept on the Council for the

• In some places it is where the *landlord* does the repairs that the deduction is made, as it is assumed that when the tenant does the repairs he is getting the premises at a lower rental than he otherwise would.

amount they require, and the Council in turn issue a precept on the Overseers or Guardians who collect the School Board Rate with the Poor Rate.

Water Rate.—This varies very considerably both in amount and in basis in different localities, but is usually payable half-yearly at Lady Day and at Michaelmas. One of the oldest London Companies is the New River Company, and the manner in which their charges are arranged may be taken in some measure as fairly representative of others.

By the Water Rate Definition Act (1885) the "Annual Value" is declared for the purposes of this Company within the Metropolitan area to be the rateable value of the premises as settled by the local authorities. If such value does not exceed \pounds_{200} , 4 per cent. is charged for the water supply; if it exceeds \pounds_{200} , 3 per cent.; services more than 160 ft. above Trinity high water mark are charged 1 per cent. extra.

A further charge is made for baths and water closets as follows :-

If annual value exceeds-

£30 but not £50, 4s. for one w.c. or bath.

£50 £100	,,	£100, 6s.	,,		,,
£100	"	£200, 8s.	,,		,,
£200	,,	£300, 10s.	"	on both	half th

And for each additional w.c. or bath halt the above rates.

Supplies for warming purposes, washing carriages, fountains, watering gardens, &c., are not included, and are charged for extra ad val.

PROVINCIAL BANKING DIRECTORY

AND LIST OF

MARKET AND EARLY-CLOSING DAYS, FAIRS, &c.

N.B.—This list is limited to towns having Fairs authorised by Original Charters, Acts of Parlia-ment, Orders in Council, &c. Unofficial Fairs are not included. No trouble has been spared to make the list reliable, but it has been found in practice that the owners of many of the Fair rights change the dates from year to year without authority, and in other cases authorised Fairs are not held. The publishers cannot, therefore, hold themselves responsible for loss or inconvenience which may arise from inaccuracy, but will be grateful to have their attention drawn to any apparent error.

ABBREVIATIONS USED: Days of the week-Sn., M., T., W., Th., F., S.; Ev. d., Every day. pecial Days, &c.-Whit., Whitsuntide; Eas., Easter; Xm., Christmas; Mich., Michaelmas; Mid., Special Days, Gr.-w nit., whitsunde; Eas., Easter; Am., Christians; Mich., Michaelmas; Mich.,
 Midsummer. Months-Jan., Feb., Mar., Apr., May, Ju., Jy., Aug., Sep., Oct., Nov., Dec.
 b., bacon; bu., butter; c., cattle; ch., cheese; co., corn; h., horses; hi., hiring; la., lamb; pi., pigs;
 pl., pleasure; sh., sheep; w., wool; wtr., winter; smr., summer.
 The figures and letters in parenthesis after name of town indicate the Market Day, Early-closing
 Day and Hour, and Population in thousands (census 1901).

The figures in heavier type at the end of each paragraph refer to the list of London Banks on page roo, and to the list of Head offices of Country Banks on page 99, thus enabling the reader to ascertain the names of all Bankers or branches of Banks carrying on business in each place.

Every description of Life Assurance and Annuity **Business Transacted.**

Invested Funds, £42.000.000.

The Last Annual and Valuation Reports can be obtained on application.

PEARL LIFE ASSURANCE COMPANY, LIMITED.

Chief Offices :- LONDON BRIDGE, CITY, E.C.

£1,005,000 £230,000 **Claims** Paid £3,100,000

SPECIAL ADVANTAGES.

ORDINARY BRANCH.—A fixed Cash Surrender of 40 per cent. of the Premiums paid will be allowed under Table No. I Whole Life to those Policy-holders who have paid Three Years' Premiums. Policy-holders have every benefit consistent with perfect security. DIVISION OF PROFITS.—Eighty per cent. of the declared divisible profits under the Ordinary Branch will be apportioned among the Policy-holders under the participating tables. The profits are ascertained and distributed every year, and may be applied, at the option of the Policy-holders, in any one of the following ways :-

- (a) Amount added to sum assured.
 (b) Equivalent cash payment.
 (c) Reduction of all future Premiums.

Bonuses vest after the Third Annual Premium has been paid. The Reversionary Bonus declared at the last Valuation, December 31, 1901, was at the rate of 25s. per annum on each £100 assured under the "with profit" tables.

LIFE ASSURANCE and PENSION on arriving at age 50, 55, 60, 65.

EXAMPLE.—A person aged 25 years next birthday may, by a quarterly payment of 10s. 3d., secure an annuity of $\pounds 20$ on reaching the age of 65. In the event of earlier death, $\pounds 25$ Life Assurance, together with a maximum Cash Surrender of 75 per. cent. of the Premiums, will be paid.

P. J. FOLEY, Managing Director.

DACR

106 **READ THIS.**—It may mean Life, Success and Happiness to You. Medical Science has conclusively proved

that the Nervous System controls all the functions of the body, therefore all diseases are started by loss of Nerve force, and to build up again the Nervous system is the only way to throw off the enemy. The Brain is to the body what the cylinder is to a steam engine the moving power. So we must send a trusty messenger there. We have a well-tried servant who will reach and fulfil what is desired of him. Our Remedies have proved in thousands of cases that they do build up the Nervous System—and that the special compounds for the Blood tissues and other functional parts do their work in harmony. There is hope for badtempered men and women, also those who have lost energy and make burdens of small troubles, for all these ailments (or diseases, which they really are) will fly away and leave a Contented disposition and make business a pleasure if our instructions are carried out. Small sizes, each remedy $1/1\frac{1}{2}$.

A SPECIAL OFFER.

To bring OLD MOORE'S INVALUABLE REMEDIES more forcibly to your notice, and induce you to give them a trial, we make a Special Offer of a 4/6 Remedy, of any one kind, at 2/9, postage paid, within the United Kingdom.

We do this knowing that where we can introduce our Remedies into a Household, their own benefiting value will give them a lasting recommendation to you and your circle of friends. In ordering, please use the attached Coupon Order.

COUPON ORDER FORM. AVAILABLE until July 30th, 1903.

This Coupon entitles you to a 4/6 Remedy of any one kind of **OLD MOORE'S REMEDIES**, at 2/9 by post-paid package, within the United Kingdom. We guarantee safe delivery. Should a Trial Remedy be required for a friend or relative, you may order also for them at the same time.

Orders may be sent after the above date. If we are not then giving Coupons the money will be returned.

To W. FOULSHAM & CO.,

4, Pilgrim Street, Ludgate Hill, London, E.C.

Please forward to me one 4/6 Trial Remedy, namely,

___by post, for which I enclose postal

order and stamps, value 2/9.

THE MONTHLY GUIDE TO STOCKS AND SHARES.

Certified by the most reliable City experience by men of acknowledged integrity. Reference permitted.

SEPHARIAL

publishes to his private clients, on the first of each month, all the chief movements of the Share Markets, showing their rises and falls, the special features and general Market Tones. Eighth year of publication.

This private information can be had for one month on trial for 10s.

Second and subsequent monthly issues, 20s. Specific Stocks and Dates given. This is good information and is not sold cheaply.

Calculation of PERIODIC INFLUENCES, showing what to do and when to do it, of great use to business men, supplied at the rate of 5s. per month.

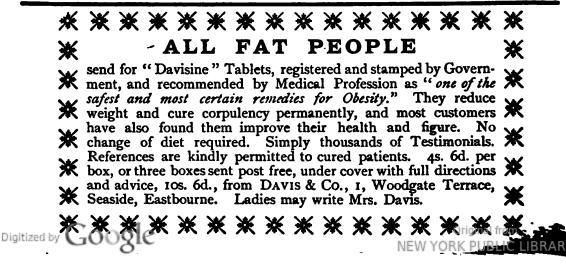

N.B.—These calculations have no relation to Sepharial's Market Forecasts, but are based on the individual time of birth, the date and time of which must be given.

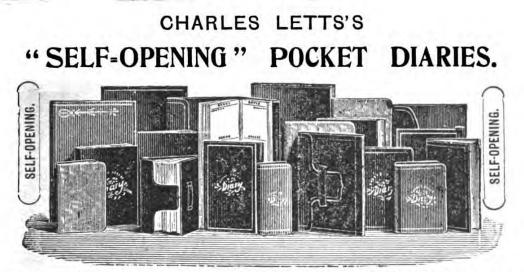

Address : SEPHARIAL, c/o Alan Leo, 9, Lyncroft Gardens, W. Hampstead, N.W.

PHOSPHORUS QUININE & PEPSINE PILLS

Have a wonderful effect in restoring Strength, especially when Debility sets in from overwork or anxiety, or from whatever cause it may be due. Phosphorus soothes the brain; Quinine increases the appetite; and Pepsine (one of the greatest discoveries of the age) assists Digestion. 28. 9d. per case, sent post free under cover to any address from the Proprietors, H. DAVIS & Co., 1, Woodgate Terrace, Eastbourne, Sussex. These Pills are an unfailing remedy for Neuralgia, Nervous Dyspepsia, Anamia, Brain-fag, Depression, Impoverished Blood, Rheumatism, Sleeplessness, Indigestion, Influenza, Nervous Headaches, Debility, and all Disorders consequent upon a reduced state of the nervous system. Davis's Phosphorus Quinine and Pepsine Pills, stamped by Government, are the most powerful nerve and recuperative Tonic known. They remove mental depression, want of tone, and nerve power. They have remarkable health-riving, strength-riving energising and reinvenating effects. No other

Davis's Phosphorus Quinine and Pepsine Pills, stamped by Government, are the most powerful nerve and recuperative Tonic known. They remove mental depression, want of tone, and nerve power. They have remarkable health-giving, strength-giving, energising, and rejuvenating effects. No other medicine has received such absolute proof of its extraordinary properties in restoring shattered constitutions, and in giving back to the prematurely aged new life and vigour. References allowed to cured patients. [Mention "Letts's Moore's Almanac."]

"This excellent Series maintains its position as being 'first in the field,'" and is strongly recommended as covering every conceivable want. All (except Nos. 3, 4, 15, & 16) are provided with self-opening attachment.

CHARLEG LETTS'S OFFICE & SCRIBBLING DIARIES. GREATLY IMPROVED FOR 1903.

All the following Diaries contain the \pounds 500 Insurance as on preceding page, the "Best Cloth" and "Best Scribbling Editions" (Non-Interleaved Editions), are, with the exception of those marked \bullet , fitted with our Patent Self-Opening Blotting Tablet; this device not only ensures the book instantly opening at the place in use, but also, for all practical purposes, secures the advantages of an Interleaved Diary, without the extra expense and increased bulk. The Interleaved Editions of these two series are, with the exception of those marked \bullet , fitted with a Self-Opening Tablet made of erasable slate, giving daily space for record of the week's engagements.

CHILDREN TEETHING.

Mothers who value their own comfort and the welfare of their children should never be without a packet of

'Doctor Stedman's Teething Powders?"

for use throughout this critical period. Be sure you get the "Teething" Powders, and observe the Trade Mark, a Gum Lancet, on each packet and powder. 1/11 & 2/9 per packet, of all chemists.

125, New North Road, London, N.

BOYD'S BANANA MALTED FOOD.

An ideal Cereal-Fruit Food for Athletics, Brain Workers, and Children. It is the only Food containing all the con-stituents requisite in a "one food" diet, combining as it does all the phosphates and mineral saits of the best English-grown wheat, the solid constituents of pure cow's milk containing 93 per cent. of Proteid, extract of mail, choice Banana meal, etc., necessary for building up the human body—Bone, Blood, Muscle, Brain, and Teeth. The Lancet says:—"Boyd's Banana Food' is rich in Phosphates, and contains a good proportion of proteids, carbo-hydrates, and Phosphatic constituents in well-planned ratio, and the method of manufacture is calculated to render the elements easily assimilable."

SIR HENRY M. STANLEY, the great African Explorer, writes :-

"Your excellent preparation of ' Boyd's Banana Malted Food' is a very delicate Food, retaining the full fragrance of the ripe Banana. Sir Henry finds it very acceptable during his illness."

AVOID IMITATIONS. ASK FOR BOYD'S PREPARATIONS.

Of all Chemists, Grocers, and Stores. Price 15., 15. 9d., and 35. 3d. per Tin. Or by post 15. 3d., 25., and 35. 7d. of the Manufacturers,

THE MEDICAL SPECIALITIES COMPANY, Manufacturing Chemists, 300, Clapham Road, LONDON, S.W.

"Chaldean Astrology"

By GEO. WILDE.

Price 7s. 6d. post free.

It contains the reading of the famous Test Horoscope of Mr. C. A. Pearson, published by W. T. Stead.

The book will tell you how to cast the horoscope and read the stars. Mr. Wilde was the only successful Astrologer among about a dozen competitors, who accepted the Test.

The Scotsman says :-- "Mr. Wilde's work has a literary interest."

The *Morning Post* says :— "Those who want to know what Astrologers can do should study Mr. Wilde's profound work."

W. T. STEAD, Esq., the Editor of the "Review of Reviews," writes :-

GEO. WILDE, ESQ.

August 23rd, 1893.

DEAR SIR,—I yesterday read over your Horoscope to the subject of it—the test case, I mean You will be pleased to know that both he and I were immensely staggered by your success. You had hit off with extraordinary accuracy so many events of his past life that it was quite wonderful.

I am, Yours very truly, (Signed) W. T. STEAD.

NOTES ON THE TWO HUNDRED AND SEVENTH ISSUE

MOORE'S ALMANAC.

To observant persons it is no uncommon experience that those minds which are apparently the most eager in the pursuit of knowledge and the most apt in the expression of natural laws, are frequently blind to the paramount evidence of some special aspect of the truth. Thus while wireless telegraphy has familiarised the scientific mind to the phenomenon of sympathetic vibration at a distance, and while the theory of the electronised atom is eagerly accepted by modern scientists, the stupendous fact of the solidarity of the great Solar Atom with its interaction of planetary electrons (of which our Earth is but one of many), appears to have altogether escaped their recognition. But the day is not far distant when the "vicious circle" of human thought will bring the scientific searcher after truth into the fuller knowledge of old-world beliefs, and chief among them will be the recognition of planetary influence in human affairs. Already the fact of Lunar action in the production of Earthquakes has received scientific recognition. The rest will follow as surely as that every effect depends immediately upon its own cause. Our task is not a fruitless one, and what has been termed "a lingering belief in old-world superstitions" will to-morrow, or the next day, receive the recognition of every honest thinker and every correct observer.

> FRANCIS MOORE, Physician.

NOTES ON THE YEAR.

During the first five centuries after the birth of Christ, the Christians, comparatively few in number, and scattered among different and distant peoples, used in their records no other mode of expressing dates than those which prevailed amongst the nations of which they severally formed a part. In 532 A.D., when their numbers and importance had augmented, Dionysius Exiguus, a monk of Scythian birth, proposed that all Christians should adopt the epoch of the birth of Christ as their point of departure in counting time and in the expression of dates. This rendered necessary an investigation into the question of the date of that event. Dionysius made historical researches, and finally assigned the birth of Christ to the 25th day of December

in the 753rd year	from the	foundation of	Rome
in the 753rd year (but this is now ad	mittedly e	erroneous).	

It might have been expected, therefore, that the first Christian year would commence on that day, and that its anniversary would be the first day of each succeeding year. It was, however, found inconvenient to change the commencement of the year, and it was resolved to adhere to that of the Roman year heretofore used by the Church —that is, to the 1st January, and that the first year of the Christian era should be the 754th year from the foundation of Rome. According to the mode of reckoning finally adopted, therefore, the year 1 A.D. was that which commenced at the moment of the midnight between the 31st December in the 753rd year, and the 1st January in the 754th year of Rome.

Dominical Letter	for the	year 19	04	СВ	Solar Cycle for the year	1904	
	,,	"		5	Roman Indiction		
Epact	,,	,,	••••••	13	Julian Period, Year of	,,	6617
1							•

The Dominical or Sunday Letter is the letter of the alphabet used to indicate the incidence of the Sundays in the Ecclesiastical Calendar—thus in 1904 (leap year) the first Sunday will fall on the third day, and the letter C (3rd letter) will fall opposite the first and every following Sunday for that year till Feb. 28, when B (2rd letter) takes its place.

The Golden Number is the number of years elapsed in the Lunar Cycle or period of 19 years, at the end of which period the same aspects of the moon recur within an hour and a half of the same times.

. The Epact is a number representing the age of the moon on the first day of the new year.

Digitized by GOOgle

The Solar Cycle is a period of 28 years, within which the Dominical or Sunday Letters, and those that express the other festivals, &c., return in the same order as before.

The Roman Indiction is a period of 15 years, used by the Romans for the time of taxing their provinces.

The Julian period contains 7980 years (being the Lunar Cycle of 19, the Solar Cycle of 28, and the Roman indiction of 15 multiplied together). The Julian period is reckoned as having begun 4713 years before our era, so that the year 1904 corresponds with 6617 of that period. It is used in astronomical and chronological calculations throughout the world.

MOORE'S FULFILLED PREDICTIONS OF 1902.

PREDICTIONS.

"The winter quarter will be very cold and heavy cyclones will do much damage."

"Our Colonial interests will prosper, and about the beginning of February there will be especial cause for gratification in this direction."

"Fiscal reforms are imperative ... The general import is in the direction of sweeping reforms and initiations of a progressive nature."

"January—Unusual indications of financial stress. Fiscal problems of the nation will come in for unusual attention and Army supplies will be a sore point with the financiers."

"February — Financial questions will be much discussed in the House, and a strong opposition will be in evidence. Our colonies will make rapid strides, and the expansion of the Empire will give cause for satisfaction."

"March—The condition of the public service department will cause angry comment. The affairs of the Army do not go well. An outbreak of typhoid fever is to be feared.

Digitized by Google

FULFILMENTS.

The extreme cold of the season caused great suffering among the poor and did much to paralyse trade.

This marked the Diplomatic operations of Mr. Chamberlain in South Africa, where the foundations for a racial coalition were laid.

The Budget was satisfactory. Several points of pressure were relieved, and the introduction of the Corn Tax' was certainly the most sweeping reform contemplated.

The financial condition of the country was well reflected in the City, where everything was at a point of great depression. The "phantom corps" of the Minister of War were severely criticised.

The Budget reforms were generally of a satisfactory nature, but the Opposition ran the Government close more than once on financial points. The prosperous condition of Canada and the more restful state of South Africa were much commented upon.

The "ragging " of subalterns in the Army caused a terrible scandal at this time. The returns of the Registrar-General showed a surprising increase in cases of typhoid during the month.

> Original from NEW YORK PUBLIC LIBBAR

The above notes constitute a few examples of the power of forecasting the probable trend of events in the political, social, and financial worlds. As time goes on the possibility of using this power in individual and national affairs will become ever more popular. It is futile to suppose that men like Tycho Brahe, Kepler, Sir Isaac Newton, Sir George Mitchell, Russell of Killowen, and men of similar calibre, could subscribe their belief to a mere superstition. Ignorance of the *modus operandi* of the planets in human affairs is unfortunately all too prevalent, but that circumstance does not negative the operation of natural laws, and it is only the untrained mind that takes refuge in such phrases as "coincidence" and "chance." All coincidences are expressions of natural law, and where Law reigns Chance can have no place. The Winter Quarter.'

The Winter Quarter begins on December 23, 1903, and ends on March 21st. The horoscope of the Nation for this Quarter cannot by any chance be called a fortunate one. Strikes will be numerous and extensive and considerable lawlessness will result. Our Treasury will be fairly competent to meet all demands made upon it, and the position of the Government will be stable. Railway traffics will be considerably greater than for some time past, and some improvements will be made in methods of traffic.

The Quarter will not be far advanced before there is a financial panic, probably due to Bank failures either here or on the Continent. This event will transpire about the end of January, 1904.

Shortly after Christmas, at the end of 1903, there will be trouble in the West, and shipping questions are likely to come into prominence.

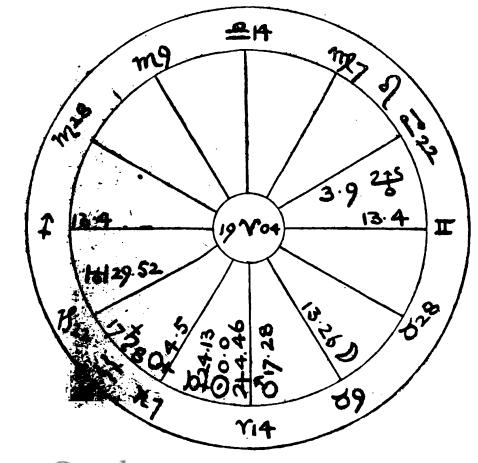

The public health during the quarter will be remarkably good, and the death-rate should be below par on that account.

The King will enjoy good health, but may suffer some domestic affliction. It is probable that a scheme for popularising winter residence on the Continent will make prominent headway during this period.

The following forecasts are put forward as included in the probable events of the Quarter :

December 26, 1903, shipping accidents out West, violent gales. Rupture in foreign relations. January 7, financial questions. Big rise in railway Stocks. End of January, financial crisis, fall of Stocks. Bank failures. February 5, financial adjustment. Treasury returns unsatisfactory. March

The Sun enters Aries, March 21st, 1904, at oh 59^m a.m.

5 3

Digitized by Google

7

7, big increase in traffics. At the beginning of February and middle of March strikes are organised.

The Spring Quarter

Commences on March 21, 1904, and ends on June 21. The horoscope for this Quarter indicates a state of some tension in the labour market, trade returns still unsatisfactory, railway traffics still good and improving. Strikes are still much to the fore. Accidents occur on railways in the East and North. Shipping accidents occur round our coasts. Loss of life happing small. The Educational question is again prominent. The rising generation will be afflicted in health, and affairs relating to theatres and places of amusement will not proceed well. The condition of the public health will be fairly satisfactory, but some outbreak of smallpox is likely. Heavy destruction of property by fire will be experienced in this country. Our foreign relations are strained and will need careful handling. South Africa becomes a thorn in our side once more. Intrigues and sedition are likely to make headway. The Government is strong. Royalty may experience sickness, and a journey may be necessary.

The following indications are prominent during the Quarter :

March 26, diplomatic relations strained. Strong gales round our coasts. Increase in railway traffics. April 8, great fires chiefly in the East and North, probably in Birmingham or Leicester. Outbreak of zymotic disease. May 9, fall in Stocks, bad trade returns, financial stringency. Heavy rains. Trouble in theatres and places of amusement. Overcrowding of children is under discussion. Strikes. Middle of June, public unrest, dissatisfaction, strikes.

The Summer Quarter

Begins on June 21, and extends to September 23. The indications this Quarter are not favourable to public health, and infectious disease will be unusually prevalent, especially in London where an extensive outbreak is to be feared. Our diplomatic relations will be far from satisfactory, and trouble is liable to occur in the West. Financial questions in relation to our African possessions will become prominent. The general condition of the people will show marked improvement as the summer advances. Railway returns will be more than ever satisfactory, and considerable advance in the prices of Stock should result. Some outbreak and disorder will occur in connection with one of our prisons or reformatories, but will be suppressed. Royalty is disposed to travel in foreign lands. America may be the recipient of honours. Shipping interests will prosper. Educational reforms will progress. The financial condition of the country will be in most respects satisfactory.

The following predictions are put forward in connection with this quarter : End of June, foreign relations strained. Diplomatic errors. Cyclones in America and Canada. July 9, shipping accidents. End of July, outbreak of fever. August 14, heavy weather. Drowning fatalities. Troubles in Germany. September 16, cholera and dysentery abound, death-rate high. September 20, excitement in hospitals and prisons.

The Autumn Quarter

Commences on September 23, and extends to December 22. The indications are not so favourable as during the last Quarter The financial condition is worse, and railway traffics fall off in consequence of the tightness of money and decrease in trading returns. The position of the Government is none too secure at this period of the year. The Exchequer will sustain heavy expenditure satisfactorily. Violent gales will do extensive damage to shipping on the high seas and around our coasts. An outbreak of fire on one of the gunboats is likely to occur. Foreign trade will not be satisfactory. The

Digitized by Google

Original from NEW YORK PUBLIC LIBRARY public health will be fairly good, but affections of the head and kidneys are likely to make headway. Strikes are likely to be ended and differences adjusted during the quarter. The public mind is exercised on account of the sequestration of Royalty. It is probable that the health of the Sovereign will be precarious and a subject of anxiety. Strange deaths will be reported frequently, and deaths from drowning will be more than usually frequent. A new element of mystery is imported to certain cases during the Quarter, and will create discussion. The general indications are favourable to our operations abroad, and to most other departments of national life except shipping interests and finance.

The following predictions are for the Autumn Quarter :

October 2, mysterious deaths occur. A great mariner may pay his last debt to Nature. October 15, the Treasury scores a success. November 8, railway collision. Financial position unsatisfactory, fall in Stocks. November 18, explosion or fire on board a man-of-war or gun-boat. December 9, severe loss in shipping, wrecks and loss of life. December 19, danger of trade dispute or strike, probably adjusted very speedily.

The following Eclipses will occur during the year 1904:

Two Eclipses of the Sun, one annular and the other total. The particulars of these eclipses and their astrological significance are here stated :

Annular Eclipse of the Sun, March 17, 1904, at 5^h 46^m a.m. Invisible at Greenwich.

The eclipse is central at noon in longitude 93 degrees East. The line of eclipse begins in the Indian Ocean just north of Mauritius. The central eclipse begins in Madagascar and travels Eastward, is central at noon over the Malay Peninsula, crosses the Philippine Islands, and ends S.E. of Japan in longitude 157 E. and latitude 25 N.

Falling in the last decanate of Pisces, this eclipse threatens an outbreak of military lawlessness, sedition, cruelty and inhumanity among soldiers. Insurrections and riotous proceedings will disturb the populace of those parts which come under this eclipse, notably the Malay Archipelago. Earthquakes will follow within three months of this eclipse. There will be a great dearth of fish, and many outbreaks among prisoners in various parts. A notable Judge or Chancellor will die. It is evil for all the nobility who were born about March 17 or September 18 in any year. In England the eclipse falls in the 1st House, and threatens considerable mortality among the people, probably due to fish poisoning, and also indicates strong religious factions and dissensions. It is evil for the Government of the country, and changes may be expected shortly.

Total Eclipse of the Sun, September 9, 1904, at 8^h 49^m p.m.

The eclipse begins in the Marshall Islands of the Pacific, and travels East and South, crossing the Equator in about longitude 140 W. of Greenwich, crossing Chili and ending in the N. of Argentina Republic.

Falling in the second decanate of Virgo it indicates a deadly famine and pestilence, which will chiefly affect those parts where the eclipse is visible, namely the Islands of the Pacific and some parts of S. America. As the Moon will then be in perigee, there will be a terrible earthquake and great destruction of crops and property in S. America, most probably in Ecuador or British Columbia. There will be fighting in the Congo State of Africa. The worst effects of this eclipse will be felt about October 27. In England there will be great mortality among children, due to some outbreak of cholera, and our food supplies will need more than ordinary thought and care. In France there will be terrible accidents to places of amusement, theatres, etc., and a malignant fever threatens the younger generation of these parts.

EXPLANATION OF THE CALENDAR, ASPECTS, &c.

THE first columns of the left page show the day of the month, week, and year—the figures in the latter column indicating the number of days from the beginning of the year.

The column headed "Notes" shows the Sundays, Church festivals and Holy days, Aspects (as to which see below), Astronomical and other notes. (The Saints' days printed in italics are *not kept* by the Church of England.) The right ascension of the principal planets at certain dates is also given. The thick rule on left of this column indicates the duration of the various Law Sittings.

The columns headed "Moon" show—1st. The moon's age (that is, the nearest number of days, without fractions, that have elapsed since the preceding New Moon). (This is sometimes useful in estimating roughly the time of High Water in localities where the usual tide-tables are not available.) 2nd. Duration of Moonlight from 6 to 9 and 9 to 12 p.m., and 12 to 3 and 3 to 6 a.m. (It will of course not be lost sight of that at certain periods of the year the rising or setting of the Moon must occur in daylight. As the object of the column is solely to show the hours when there is Moonlight, no notice is taken of the fact that there may also be Daylight.) 3rd, 4th, and 5th : The hour of rising (Greenwich mean time), when the Moon is due south and has attained her greatest altitude (astronomically when the Moon Transits or passes the meridian), and the hour of Setting. In these columns where a waved rule line occurs it indicates a period *post meridiem*, whilst a dotted rule line indicates ante meridiem.

The columns headed "Sun" show —Ist. The Rising and Setting of the Sun(Greenwichtime). 2nd. Equation of Time, or the period which is needed to adjust civil to astro-

Digitized by Google

nomical time. 3rd. The Sun's declination.

On the right page is given the time of High Water at London Bridge, morning and afternoon, the time of Ecliptic conjunction with the Moon of principal planets, Weather Forecasts (as to which see below), Voice of the Stars for the month, and Notes on Birthday influences.

The dates of very High Tides are accurately predicted as a useful warning for localities adjacent to the river. Precaution is, however, urgent only when atmospheric disturbances are prevalent, more especially high north winds and a low state of the barometer with continued rain. A very high spring tide is unusually sensitive, and is much affected by these disturbing influences.

Explanation of the Aspects. Conjunction, d. - Two heavenly bodies are in conjunction with one another when both have the same longitude. Semi - quartile. - Two heavenly bodies are in mutual semiquartile when the difference of their longitudes is exactly 45°. Sextile, *. -A difference of longitude of 60°. Quintile.—A difference of longitude of 72°. Quartile or Quadrature, \Box . -A difference of longitude of 90°. Trine, Δ .—A difference of longi-tude of 120°. Opposition, 8.— A difference of longitude of 180° (half the circle). Sesquiquadrate.—A dif-ference of longitude of 135°. Biquintile.—A difference of longitude of 144°. The major aspects are the conjunction, sextile, quartile, trine, and opposition. The minor aspects (determined by Kepler, the great astronomer) are the 30°, 36°, 45°, 72°, 135° and 144°. The conjunction 135° and 144°. varies in nature according to the natures of the planets forming it. The sextile and trine are benefic ; the quartile and opposition are malefic

aspects. Of the minor aspects the 45° and 135° are malefic, the rest are benefic.

When two planets have the same declination they are said to be in *parallel declination*, and this, like the conjunction, varies in nature according to the natures of the planets. The conjunction is weak when the conjoined planets are far apart in declination.

Nature of the Planets. — All the planets are capable of exerting a good and bad influence, according to the aspects they form to the Sun, Moon, and the angles of the figure for any ingress, lunation, &c. The simple natures of the planets are known by the effects attending their conjunctions with these Significators, as they are called. In this respect Jupiter and Venus are benefic, and also Mercury when not afflicted by evil aspects. Neptune, Uranus, Saturn, and Mars are evil.

The Weather.—The influence of the planets over the atmospheric changes constantly occurring on the earth is a fact already well established. Prof. Falb of Vienna has a cyclic period of 79 years which corresponds to the periodic conjunction of the planets Mars and Mercury, which form their conjunctions every 79 years on the same day of the year. His failures are due to the fact of his not having taken the other celestial bodies into account. The predictions in this Almanac are based on the Solar configurations with all the celestial bodies, and the mutual aspects of the planets among themselves as seen from the Earth. It will be generally noticed that there is a downfall of some sort, according to the season of the year, about the day of the Change and Full of the Moon. It is true that the conjunction of Mars and Mercury has a disturbing effect upon the weather in the production of violent storms, which was observed by Jerome Cardan, and afterwards certified by the great

Digitized by Google

astronomer Kepler, but it is futile to suppose that all the changes of the weather can be predicted from only one source. The science of Astrometeorology, while far outstripping the efforts of all other systems, especially in its storm-periods, is yet far from perfect. Thus, while it is evidently the fact that all the great storms can be predicted with great certainty and precision, the particular locality which may be affected is largely a matter of speculation.

Lunar Influence. — This influence on mundane affairs varies according to the nature of the body with which the Moon forms configurations in her rapid course. When the Moon is in sextile or trine with the Sun it is a good time for asking favours, seeking employment, or travelling for health. With Saturn, for dealing with farmers, miners, and old people; for purchasing houses or land; and for planting or sowing. With Jupiter, for opening new business, dealing with merchants, bankers, and rich people. With Mars, for consulting surgeons, engineers, and mechanical people. With Venus, for courting, pleasure-seeking, marrying, engaging maidservants, visiting friends, and taking lessons in music. With Mercury, for seeking employment; writing letters or articles, or books; dealing with printers, editors, publishers, or lawyers; for sending children to school for the first time, binding apprentices, and travelling. With Uranus, for scientific work, dealing with electrical engineers, or for learning astronomy or astrology. Astrologers find that affairs begun under such configurations proceed more successfully than at other times -Solomon found that "to everything there is a season, and a time for every purpose under the heavens." It is important to ascertain, however, that the moon has no evil aspect (quartile or oppostion) or conjunction with either Saturn, Mars, or Uranus at the time selected, or the good influence will be nullified.

JANUARY XXXI Days.

MOORE'S

All hail ! my friends—another year begins ; Oh ! at this time let us forsake our sins ; And seek that mercy Heaven designs for those Who turn from evil, and obey his laws ; With this new year let us new lives display, Adore our God, and walk in Virtue's way.

In Janiveer, if sun appear, March and April pay full dear.

The month opens with fine open weather, but strong winds blowing for a day or two. The 7th brings high winds again, then fine and moderately warm air till the 15th. Some downfall about the 17th, wind and rain on the 27th, finishing cold and bleak.

は 主文 パイ 寄り住む

The portents of the heavens for this month are favourable for the Government of the country, and any test of its strength will result in expressions of confidence and large majority votes. Deaths will be numerous among the financial magnates, the moneyed classes, and the extreme aged. The general health of the public will be moderately good. Shipping interests will suffer, and fatalities upon the ocean will be very numerous. Trade will show a falling off during the month. The elevation of the planet Jupiter at the New Moon of the 17th inst., and its good aspect to the luminaries, is a portent of some particular good to the Government of this country. The position of Saturn and Mars, both in the sign of Aquarius, is of evil import for certain governmental centres on the Continent, and among the most prominent who are likely to suffer disturbance and excitement Brussels may be mentioned. Russia also will be the scene In South Africa there will be of some extensive violence. seditious movements, and many aggressive projects will be on Death duties are likely to undergo some revision. foot. Portugal gains some advantage in governmental circles owing to favourable changes in its administration. A Bank failure will cause panic.

LEASTING INFORMATION

The 3rd of this month will bring a year of reversal to those born thereon; the 13th is productive of domestic happiness and pleasant events; the 9th and 17th changes, and a year of activity and travelling; the 18th sickness and misfortune; the 20th excitement, fevers, and accidents. The 21st is the most fortunate day of the month, and gives a year of increase; the 28th gives disappointments and separations, grief; and the month ends with lowering clouds on the horizon of those about to begin their year.

Days. FEBRUAR

14

Vast is the Power that form'd this lovely ball, Immense the Being who presides o'er all ; At his command from chaos order rose, He on creation harmony bestows; Let universal Nature then proclaim The glorious Author of this beauteous frame.

MOORE'S

If February give much snow, a fine summer it doth foreshow.

						(る) Mars (4) Jupiter	Moon.	,, 5 ,, 6

6 3 North R. Brown R. M.

15

The month opens cold and dreary with considerable downfall especially in the North. Easterly winds blow about the 2nd for a day or two and then go more northerly for storms about the 5th. Warmer weather succeeds to the New Moon when there will be some downfall. Cooler and changeful about the following days. Storms on the 25th and 26th, with shifting winds. Mild to the end of the month.

Storm periods, 2nd, 5th, and 25th.

The position of Saturn, the malefic planet, in the mid-heaven of the horoscope for the New Moon this month, is a portent of evil to the ruling powers. There will be trouble in high places, and the month is filled with some sense of dread and apprehension of evil. The Exchequer will be called upon to make heavy disbursements. The attention of the country appears to be centred on the Government and its prospects, and the ruling powers are in danger by the hand of a sinister fate. The public health will be good during this lunation. Some breach will occur between our country and one of her colonies. Spain is troubled by the presence of Uranus in its ruling sign, but will make good its cause and will continue to claim the confidence of its allies. Daring scenes will be enacted in **Portugal.** The king of that country is disposed to act rashly. The condition of affairs on the Continent is not satisfactory, and both Russia and Germany are capable of giving us a great deal of trouble at this time. The conjunction of Mars and Jupiter this month will produce heavy thunder-storms about the 24th of the month.

- キキズだがたたい 455 記憶したりにたい

The 1st will prove an unkind day for those born thereon, and the year will be unfortunate for the male side of the family, and for the general fortunes of those born thereon. The 12th increases the social success of those born thereon, and gives a happy year to its subjects; the 13th produces activity not exempt from worry and anxiety; the 14th is evil for females and for the fortunes of those born thereon; the 16th brings changes in the life during the course of the year. The 18th is exciting, feverish and accidental, but good fortune attends all efforts. The 25th will produce a year of speculative enterprise and heavy disbursements, ending in self-reproach.

Feb. 1, Length of Day, 9^h 2^m; 29th, 10^h 45^m. , 5, Sun's time of Semi-passage, 1^m 7'7'; Semi-diameter, 16' 14'8". , 20, Sun's time of Semi-passage, 1^m 6'1'; , 20, Sun's time of Semi-passage, 1^m 6'1';

,, 20, Sun's time of Semi-passage, 1^m 6'1'; Semi-diameter, 16' 12'0''.

,, 2, Moon in Perigee; 16th, Apogee. Mercury is in Aquarius, and may be well seen before sunrise at the beginning of the month. Venus is a Morning Star in Capricornus, near the Moon on the 12th.

Mars is an evening star in Pisces, setting about two hours after the Sun.

Jupiter is an evening star in Pisces, near the Moon on the 18th.

Saturn in Aquarius is in conjunction with the Sun on the 1st.

MARCH XXXI Days

MOORE'S

All space is conscious to the ruling Mind, Who happy reigns, unrivall'd, unconfined : Angels and men to him their beings owe, With different ranks of creatures here below : Let men and angels then his praise proclaim, Declare his goodness, and adore his name.

He who lops freely in March will get a lap full of fruit.

- Mars is an Evening Star in Aries, and visible for about an hour and a half after sunset.
- Jupiter in Aries is in conjunction with the Sun on the 27th. Saturn is a Morning Star in Aquarius rising about
- an hour before the Sun.

APRIL XXX Days.

Summer and Spring return at his command, Who spreads a table with a liberal hand; For birds, beasts, insects, he their food provides, Directs the just, and o'er his fate presides; And bids the planets, in their mystic rings, Their influence shed on all terrestrial things.

APRIL 1904.

The 10th day, at 0 h. aftern. (h) Saturn The 13th day, at 11 h. aftern. (φ) Venus The 14th day, at 5 h. aftern. (2) Jupiter	is in ecliptic	HIGH TIDES.
The 16th day, at 6 h. aftern. (3) Mars The 17th day, at 9 h. morn. (3) Mercury	conjunction with the Moon.	,, 2 ,, 3 ,, 4

WEATHER FORECASTS.

The month opens with misty mornings and nights, and some degree of cold. On the 7th storms with heavy rain. Continuing fair to the 15th, when some showers will fall. Moderate and even cool temperature, variable skies to the 22nd, then fine and warm. The month ends with lifting winds. Storm period, 7th.

VOICE OF THE STARS.

Great mortality due to fish poisoning will soon make itself a conspicuous feature of public discussion. The hospital question will also be much to the fore. An outbreak of typhoid or other virulent fever will show itself, and throat affections will be very prevalent. There will be some heavy hailstorms before the month is out. Accidents and collisions on railways will add their fatalities to the list of evils. The weather will begin to show a genial and nourishing warmth after some few preliminary breaks and outbursts. Deaths from drowning and casualties on the high seas will be a matter of extensive comment. Changes and innovations will take place in the theatrical world. In Ireland there will be some sanguinary affrays with civilians and police. There are signs of growing dissatisfaction and unrest in the National Service, particularly in the Army, and measures may have to be adopted to check the free expression of this feeling. The indications are evil for the public health, for all matters relating to food supplies, for travelling on the ocean and by waterways. Farming interests appear to have more favour than has been accorded to them of late years. The general indications are not favourable to the peace and welfare of the country internally during the month.

BIRTHDAY INFLUENCES

The 7th shows some sickness and misfortune. The 8th quarrels and contentions. The 10th sickness and losses. The 13th a quiet and happy year. The 14th good fortune. The 15th reverses of fortune. The 16th dangers of fevers and hurts to the arm. The 22nd indifferent fortunes and some sickness. The 29th loss of prestige, ill success with superiors, and little advancement.

Astronomical Notes.

 Apr. 1, Length of Day, 12^h 51^m; 30th, 14^h 41^m. n, 5, Sun's time of Semi-passage, 1^m 4'4'; Semi-diameter, 16' 0'4''. n, 20, Sun's time of Semi-passage, 1^m 5'0'; Semi-diameter, 15' 56'3''. n, 10, Moon in Apogee; 26th, Perigee. Mercury is in Aries, and well placed for observation after sunset about the 20th. Venus is a Morning Star in Aries; near the Moon on the 13th, and Jupiter on the 22nd. Mars in Taurus, sets shortly after the Sun. Jupiter is a Morning Star in Aries, rising shortly before the Sun; near the Moon on the 14th. Saturn is a Morning Star in Aquarius, rising about two hours before the Sun.

MAY XXXI Davs

MOORE'S

Th' aspiring mountains and the mossy rocks, He stores with numerous herds and bleating flocks ; With lovely corn the humble valley fills, With herbs and fragrant flowers, and murm'ring rills; The streams in sweet meanders gently play, Or in a rapid torrent urge their way.

	A drye May and a dripping June bring all things into tune.

WEATHER FORECASTS.

Moderately fair weather characterises the month, with rather lower temperature than usual at first. The 12th to 17th will produce storms and much rain. Then more settled, the month ending with a spell of fine bright weather, with South and S.E. winds prevailing.

Storm peirods, 12th to 15th.

VOICE OF THE STARS.

The lunation takes place on the 13th of the month. Neptune will be just setting, and the luminaries will be conjoined in the 6th division of the Heavens. This indicates that there will be some serious plots against the stability of the Empire, and dangerous seditions are likely to arise in South Africa, especially in Cape Colony. Trade will be bad, and a serious falling off The public health will be largely in the returns will follow. disturbed by fevers, lung complaints, nervous affections and casualties. Railway traffics will improve, and there should be a corresponding rise in the price of Stocks. Some serious irregularities in our hospitals will be discerned, and will cause considerable comment and criticism, all of which will be conducive to marked improvements. There will be a heavy thunder-storm in this country on the day of the New Moon, and the weather generally will be highly disturbed through-out the month. While Jupiter continues in Aries there will be a general tendency to take a wholesome and optimistic view of the national condition, and during the middle of the month this will be reflected in a considerable rise in the price of Home Stocks.

BIRTHDAY INFLUENCES.

The 3rd will bring a year of clouds and hindrances; the 5th loss of position; the 8th good fortune and increase of influence; 11th, activity; 12th, changes; 13th, strife and disputes; 18th, dangerous impulses and irregularities of life; 19th, reversals, sudden changes, losses, and danger of bereavement or personal hurt; 27th, loss of position, deception and fraud; 29th, domestic affliction.

Astronomical Notes.

June 1, Length of Day, 16^h 13^m; 30th, 16^h 30^m. ,, 5, Sun's time of Semi-passage, 1^m 8'4';

- Semi-diameter, 15' 47'1". 20, Sun's time of Semi-passage, 1^m 8'7";

Semi-diameter, 15' 45'7". ,, 5, Moon in Apogee; 17th Perigee. Mercury is in Cancer, and may be seen before sunrise about the 19th.

- Venus is in Cancer, and fast approaching the Sun; near the Moon on the rath, Mars on the 18th, and Neptune on the 29th.
- Mars is in Gemini, too near the Sun to be well seen. Jupiter is a Morning Star in Aries, rising soon

after midnight, near the Moon on the 8th. Saturn is a Morning Star in Aquarius, rising before midnight and visible till sunrise.

MOORE'S

Deluded men by jarring passions toss'd, Pursue their false advices and are lost; Pleasures, the fancy flattering, dance in view, Still they elude men, yet they still pursue ! Some short-lived joys, perhaps in vice they find, Which leave a sting, remorse, and fears behind !

The general public health will be exceptionally good and the death-rate will be temporarily lower. The afflic- tion or death of a notable Judge will cause sorrow in legal circles. The demise of a foreign potentate born under Jupiter will be added to the list of the month's adverse indications, which happily are but few. The chief points of notice are finance, railways, waterways and shipping which appear to attract special attention this month. There will be some general improvement of the affairs of Ireland owing to the entry of Jupiter into the ruling sign of that country. Affairs in China and at the Cape will be in better condition before the month elapses. The financial

ž

The month opens with brisk winds, cool air, misty mornings and chilly nights. Warmer after the 4th, stormy about the 12th, then fine to the 17th. Breaking for colder weather, with rain and wind about the 20th. Unsettled to the 25th. Fine and breezy at the end of the month.

At the New Moon of the 9th inst., the ruling planet is Venus, and she is in conjunction with Mercury and afflicted by Mars. Consequently we shall soon have another outbreak of typhoid in certain centres where the water supply is vitiated. Enteric fever, dysentery and diarrhœa will be very prevalent. An outbreak of fever will disseminate the younger population, and schooling will be seriously interfered with. A fire will do heavy damage to life and property either in a place of religious instruction or in a school. Theatres and places of amusement generally will be subject to many adversities this month. The Exchequer will have considerable strain put upon it towards the end of the month, but will sustain the draught as usual. There will be some serious accidents on the seas around our isle, and passage boats may meet with some peculiar accidents. There will be some improvement in the condition of our prisons and hospitals, and initiations for the relief of those under restraint. A Minister of State is liable to be called to his account within the limits of this month. This lunation is an Eclipse of the Sun, and is especially sinister to children and young females, and to all matters relating to the physical well-being of the younger generation, among whom sickness of wide-spread nature will speedily appear.

The 4th will produce a year of happiness and contentment; the 7th is dangerous and has many excitements in store; the oth is dangerous and signifies great changes, strange mutations; the 10th will produce a busy and anxious year; in some cases there will be disposition to marriage; the 15th is full of new projects and enterprises, much activity and many small changes. The 18th has a store of evil in the shape of separations and estrangements, losses and disputes; the 20th is dangerous to health and fortune; the 26th is fortunate, and those born thereon will have a prosperous year.

,, throughout the British Isles.

Mercury is in Virgo; in inferior conjunction with the Sun on the 16th.

- Venus is in Libra, setting shortly after the Sun, near the Moon on the 10th.
- Mars is in Leo, rising some three hours before the Sun.

Jupiter is a Morning Star in Aries, rising about an hour after sunset; near the Moon on the 26th.

Saturn is an Evening Star in Aquarius, setting in the early morning.

OCTOBER . XXXI Days.

Happier the man whose joys from virtue flow, And strives himself and his own good to know; Calm are his comforts, and his joys sincere, Unhurt by envy, undisturb'd by fear : The real wants of nature are but few ; Look not on honours then with envious view.

MOORE'S

Much rain in October, much wind in December.

WEATHER FORECASTS.

Opens cold and dreary, with some rain from the 1st to 6th, and moderately high winds. Much rain about the 15th, unsettled to the 19th, then finer and more temperate air. Finishing moderately warm but cloudy.

VOICE OF THE STARS.

At the lunation of the 7th inst., Jupiter will be rising in the horoscope of England, and from this position alone it is possible to predict a temporary release from many of the dangers and difficulties that have recently beset the country. Nevertheless, there is sufficient indication that these troubles are not yet entirely overcome. During the month there will be a vacancy created in the Ministry. Death will be busy with his scythe, and will reap with a free hand. The rate of mortality will be exceptionally high. Some of these deaths will be due to explosion of inflammable oils. The weather will be wet and tempestuous, and destruction of property will result from floods and inundations of the land. Bowel complaints will still be prevalent. The transit of Mars over the place of the recent eclipse will stir up a pestilence. The financial condition of the country will be easier. The transits are bad for the Ottoman Empire, where there will be some excess of zeal and undue severity will be resented. Spain will suffer from internal dissensions and strife of parties. Our foreign relations will be satisfactory, and our exports rather above the average.

BIRTHDAY INFLUENCES.

The 3rd is disputatious and exciting, restless and unduly ambitious; the 7th brings changes, and those sinister and unfortunate; the 9th brings some domestic event of importance and good augury; the 14th is evil for the health of women and the fortunes of men; the 16th will bring grief and disappointment to lovers and bereavement to others; the 19th is fortunate, and will produce a year of prosperity and increase; the 24th is indicative of ill-health or bad fortune and some reversal.

WEATHER FORECASTS.

35

Opens with fresh cold weather and high changeful winds. Unsettled to the 5th. Some heavy rain about the New Moon. Then mild weather will prevail up to the 20th, when high winds and changeful skies will succeed, the air being crisp and raw till the 26th. Then rain and cyclonic winds finishing with cold boisterous weather.

Storm periods, 17th, 20th, 30th.

VOICE OF THE STARS.

The weather this month will be cold and cheerless. High gales and cyclones will effect great damage at sea. Some mysterious railway accidents will occur. In one of our prisons there will be a determined attempt at freedom, and this will be The general health of the people will successful for a period. The financial position be much improved during the month. will be fairly good. Railway interests will suffer, and a falling off of prices in Stocks will result. The Army will have some The Government are distinctions and favours conferred on it. disposed to change of policy on some financial point. The question of Protection of the country against Foreign Imports will become prominent. Damage will be done to property through the inclemency of the weather. Seditious affairs at the A train running Cape and in China will need to be suppressed. south will leave the track and cause considerable damage to life The year ends, as always, in the midst of hopes and and limb. The wise man foreseeth the evils and hideth himself, and tears. the ignorant pass on and are hurt.

BIRTHDAY INFLUENCES.

The 1st is unfortunate, and requires moderation of its subjects as the condition of success; the 3rd will bring worries, annoyances, criticism, and contentions; the 7th gives changes of scene and work; the 8th is full of business, but is not profitable; the 9th is fortunate for those engaged or married; the 11th is bad for the health and prospects during the year; the 16th is particularly fortunate, and will give prosperity through the year; the 21st will bring a share of honours involving changes; the 22nd is evil for the position and for those in the employ of others; the 27th brings cause for grief and repining; the 28th is full of deceit and treachery; the 30th is contentious and violent; the 31st gives new projects and many journeys.

31 Astronomical Notes. 1, Length of Day, 8^h 8^m; 31st, 7^h 50^m. 5, Sun's time of Semi-passage, 1^m 10'4"; Venus is an Evening Star in Aquarius; near the Dec. HINTS TO FARMERS AND GARDENERS. Best Times for Sowing and Planting.

The best times for the advancement of all vegetation, and especially for the initial process of sowing and planting, are regulated by the Moon's position. The influence of the Moon over the tides is now no longer a matter of speculation in scientific minds. That its effects upon the rest of the fluidic bodies in nature is proportionately great can be proved by simple experiment. The vegetative effects of the Moon act through the saps of all seeds and plants, its action being to augment the moist heat in vegetable life and so to produce germination.

The correct time to sow and plant is at the increase of the Moon, when the Moon is above the horizon, and this as a general rule will be found eminently satisfactory. But there are certain influences attaching to the Moon's angular distances from the Sun during each month of the year, and as these vary according to the Sun's position in the Zodiac, the following table has been prepared for the year 1904.

JANUARY.—Generally, from the 17th to end of month. Special : 20th aftn. to 22nd aftn., 26th morn. to 27th aftn., 30th morn. to 31st aftn.

FEBRUARY.—Generally, from the 15th to end of month. Special: 7th morn. to 9th morn., and 17th morn. to 19th morn.

MARCH.—Generally, from the 16th to 31st. Special: 17th morn., 20th morn. to 22nd morn., 24th aftn. to 26th aftn.

APRIL.—Generally, from the 15th to 29th. Special: 16th morn. to 18th noon, 21st morn. to 22nd aftn., 29th morn. to end of month.

Digitized by Google

MAY.—Generally, from the 14th to 28th. Special: 18th morn. to 20th morn., 26th aftn. to 28th aftn.

JUNE.—Generally, from the 13th to 27th. Special: 14th aftn. to 16th aftn., 22nd aftn. to 25th morn.

JULY.—Generally, from the 12th to 26th. Special: 12th morn. to 13th aftn., 20th morn. to 22nd morn.

AUGUST.—Generally, from the 1 1th to 25th. Special : 16th morn. to 18th aftn., and 25th aftn.

SEPTEMBER.—Generally, from the 9th to 25th. Special : 13th morn. to 14th aftn., 22nd morn. to 23rd noon.

OCTOBER.—Generally, from 8th to 24th. Special: 10th morn. to 12th morn., 19th morn. to 21st aftn., and 24th morn. to 25th morn.

NOVEMBER.—Generally, from the 7th to 23rd. Special: 7th aftn. to 8th aftn., 21st morn. to 23rd morn.

DECEMBER.—Generally, from the 7th to 22nd. Special : 13th morn. to 15th noon, 18th morn. to 20th noon.

NOTE.-The time on each day during which the Moon is above the horizon can be found in the calendar, where the time of the Moon's rising is given and the time of its setting. Or, if we take the time of its Southing, and allow about four hours on each side—that is to say, from four hours before its Southing to four hours after its Southing-there will be eight hours during which, on the above dates, germination will be enhanced. The above dates are the result of long experience in gardening and agriculture, and those who attend to them closely will be able to report a better yield than others.

meridiem (p.m.).

hours each.

of Time).

The division of the *week* is found only among Aryan nations and in regions into which they have penetrated. The day is, for convenience, divided into twenty-four equal parts, and is the period of a single revolution of the earth upon its own axis.

. .

A solar or astronomical day commences at *mean* noon, and the hours are counted continuously from 1 to 24. This method is adopted by Italy and some other countries.

In civil reckoning the day commences at *midnight*, and is divided into two equal portions of 12 hours each—those before noon being termed.

NOTES ON THE TWELVE MONTHS.

January was placed as leader of the months by Numa Pompilius, when he added two months (Jan. and Feb.) to the Alban Calendar, though it was not admitted to the same precedence in this country until a motion was made to that effect on March 18, 1750. The name is derived from Janus, the god of the year, in the Roman mythology. The idol Janus was placed over the gate of a temple at Rome, and was represented with two faces, the one that of an old man, being typical of his retrospect of the past; the other a youthful countenance, denoting prospect of the future. He presided over gates and avenues, thus symbolically he admitted the new year, and attended the departure of the old.

February was made the second of the 12 months by Numa Pompilius. Its name was derived either from Februa, a title which the Romans gave to the Feralia sacrifices; or more probably from Februs, to purify, because this being originally held to be the last month of the year, the people offered an explatory sacrifice for their twelve months' sin.

March.—March with the ancients ranked the first month of the year, and was named in honour of Mars, the supposed father of the founder of Rome. Our Anglo-Saxon ancestors called it *Lenet monath*, that is Lent, or Spring month. Marriages in this month were seldom solemnised, as they were counted to become inharmonious and unhappy. March 15, or according to the Roman calendar, the Ides of March, was the Paricidium, the day on which Julius Cæsar was murdered in the Senate house by Brutus and Cassius, with other conspirators.

Cassius, with other conspirators. April.—By the Saxons April was called Ostr monath, probably from the same word from which Easter is supposed to have been derived. The Dutch and Germans called it Grass month. The name is derived from the Latin word Aperio, to open or disclose. The term applies to the opening of the year, or to the unfolding of the buds and flowers, by the influence of the genial warmth and moisture of Spring.

May.—The Hebrews named this month Sivan, from a Sanscrit word, signifying "to rejoice." The Anglo-Saxons knew it as *Tri-milchi*, because their cows, stimulated by the fresh herbage, were so productive of milk as to enable the proprietors to bring them with advantage to the pail three times a day. The Romans offered sacrifices to Bona Dea or Maia on the first day of the month.

June was the *Thamur* or *Tamuz* of the Hebrews, that is after their escape from the Babylonish captivity; for previously to that they had simply distinguished their months by aid of numeration. Tamur or Tamuz signifies con-

ante meridiem (a.m.), those after noon post

The Chinese week consists of 5 days, which are named after iron, wood, water, feathers, and

earth; they divide the day into 12 parts of 2

The Anglo-Saxons named the days of the week after the following Deities: Sunday, the Sun; Monday, the Moon; Tuesday, Tuesco (God of War); Wednesday, Woden (God of Storms); Thursday, Thor (God of Thunder); Friday, Freya (Goddess of Love); Saturday, Saturn (God

tinuance and perfection, alluding, probably, to the almost uninterrupted daylight, maturation of fruit, &c., which occur during its continuance. July.—The fifth month of the Roman calen-

July.—Ine fith month of the Roman calendar received the name of *Quintilis* to denote its numerical position. It was sacred to Jupiter, and had in the Alban calendar 36 days. Romulus took from it 5 days. Numa reduced it to 30, but Julius Cæsar enlarged it to 31, the present number. In honour of the latter, Mark Antony changed its name from Quintilis to Julius—hence our July.

August derived its name from Augustus, the Roman Emperor; it was called Sextilis, or the sixth month in the Alban calendar, in which it had only 28 days assigned to it. Romulus added two, and Augustus a third, which number it has since retained. The Anglo-Saxons called it either Barn monath, alluding to this being the period when their barns were commonly filled, or Wood monath, clothing month, alluding to their fields being then clothed with corn, just as the Romans dedicated this month to Ceres, the goddess of harvest.

September.—In the Latin and Roman calendar this was the seventh month; and hence its name. The month had only sixteen days assigned to it in the Alban calendar; these were increased to thirty by Romulus, to thirty-one by Julius Cæsar; but Augustus reduced it to its present number. The ancient Saxons called it Berst monath, or Barley month, because at this time the barley harvest was gathered in.

the barley harvest was gathered in. October was called by our Saxon forefathers Wyn monath, or Wine month, and sometimes Winter fylleth, from the approach of Winter. It was the eighth month of the Alban calendar, in which it had thirty-nine days. Its name is derived from the Latin Octo, eight, and Imber, a shower of rain. Romulus reduced it to thirtyone days; Numa, to twenty-nine. Julius and Augustus each added one, and this number has not since been altered.

not since been altered. November.—The early Saxon inhabitants of England called this *Blott monath*, or slaughter month, because in those primitive days winter food was so scarce in England that it was usual to kill and salt the greater part of their winter meat this month; they called it also *Wind* monath or *Wind month*, from the tempestuous weather with which it is commonly accompanied.

December.—The month of December, so named by the Romans from being the tenth month of their year, has been denominated by the Saxons *Winter monath*, but after Christianity they piously gave it the name of *Holy month*, or *High monath*.

In the year 1904 there will be two Eclipses, both of the Sun.

March 17.-An Annular Eclipse of the San.

Invisible throughout the British Isles.

This Eclipse is visible throughout Eastern Africa, Arabia, Hindostan, Cochin China, China, Manchuria, and the Japanese and East Indian Archipelagoes. The central line of Annularity

passes to the North of Madagascar, and to the South of Ceylon; just touches BOLAR ECLIPSE. the most northerly point of Sumatra, and then crosses the Malayan peninsula and Cochin China.

September 9.- A Total Eclipse of the Sun.

Invisible throughout the British Isles. This Eclipse is visible throughout the Central and South Pacific Oceans and the Western half of South America. The central line of totality lies wholly over the Pacific Oceans.

WHAT IS AN ECLIPSE?

An Eclipse of the Moon is caused by its passage through the Shadow of the Earth; an Eclipse of the Sun by the interposition of the Moon between the Sun and the observer, or, what comes to the same thing, by the passage of the Moon's Shadow over the observer

It will be seen, however, from the diagram that since the apparent angular diameters of the Sun and Moon are very nearly the same, it is only when the spectator is on, or very close to, the line joining the centres of those two bodies that a Total Eclipse of the Sun can take place; and, indeed, even if he be on that central line, should the Moon be in the more distant portion of her orbit, her apparent diameter may be less than that of the Sun, so that even in a Central Eclipse a small view of the Sun is still visible. This constitutes what is known as an Annular Eclipse; one of the Eclipses visible in 1904 is of this character. But even when the Eclipse is total on the central line, an observer far from that line will only see a portion

of the Sun hidden, as the lines of the diagram clearly indicate.

In an Eclipse of the Moon the Eclipse is due to a real cutting off of light from the Moon. Lunar Eclipse, if total for any place, must usually be total for every place from which the Moon can be seen. Lunar Eclipses are not, however, by any means always total. No Eclipse of

GREENWICH, lat. 51° 28′ 38′1″ N. Opened 1675, under the direction of Flamstead, Astro-nomer Royal. The chief centre for observations on astronomy and navigation.

CAMBRIDGE, lon. o^h o^m 22'75° E.; lat. 52° 12' 51'6'' N. Founded by the University in 1824.

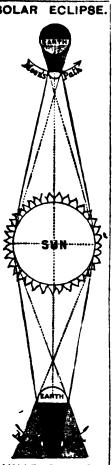

OXFORD—Radcliffe, lon. ob 5^m 2'6' W.; lat. 51° 45' 35'4" N. Erected about 1772. OXFORD UNIVERSITY, lat. 51° 45' 34'2" N. Celebrated for its 121-in. equatorial refractor.

LIVERPOOL. Established 1838-transferred to Birkenhead in 1867. Lon. ob 12m 17'35 W.; lat.

 $53^{\circ} 24^{\prime} 4^{\circ} 8^{\prime}$ N. KEW, lon. o^h 1^m 15'1^a W.; lat. 51° 28' 6" N. This is the chief meteorological observatory of the United Kingdom.

Digitized by Google

the Moon occurs in 1904. The axis of the Earth's Shadow is always directed to a point exactly opposite to the Sun. Did the Moon move accurately in the plane of the ecliptic she would be eclipsed at every Full Moon, but since her plane is inclined at about 5° to the to f the adjustic she will pase into the

LUNAR ECLIPSE.

BRITISH OBSERVATORIES.

Erected in 1878. Original from

that of the ecliptic, she will pass into the Shadow and suffer Eclipse only, if, at

the time of the Full Moon, she is near one of the nodes of her orbit. As this seldom happens, we find that there cannot be more than three Lunar Eclipses in the year (and this only if the Full Moon is at a node early in January) and there may be none. Usually, however, we have two Lunar Eclipses in the year, total only if the Moon passes fairly near to the centre of the earth's shadow.

THE HARVEST MOON.

When does the Harvest Moon occur? is a question frequently asked. The Full moon which happens on or nearest to the Autumnal Equinox (about Sept. 23rd) is called the Harvest Moon because it rises from night to night after the full, more nearly after sunset than any other Full Moon in the year, and is therefore favourable for evening work in carrying late crops. The succeeding Moon is called the Hunters' Moon.

THE ZODIACAL LIGHT.

A brightness is sometimes observed in the Zodiac resembling that of the galaxy or Milky Way. This is the galaxy or Milky Way. This is the Zodiacal Light. It appears at certain seasons, viz. towards the end of winter and in spring, after sunset; or before his rising in autumn and the beginning of winter, resembling the form of a pyramid, lying lengthways with its axis along the Zodiac, its base being placed obliquely with respect to the horizon. This phenomenon was first described and named by the elder Cassini, in 1683. It was afterwards observed by Fatio and also by Kirch observed by Fatio and also by Kirch

and Eimmart. According to Mairan the Zodiacal Light was the Solar atmosphere. The length of the light varies sometimes in reality and some-times in appearance only from various causes. It is now generally acknowledged that the electric fluid is the cause of the Aurora Borealis, and it is conjectured that the Zodiacal Light is a not dissimilar modification.

NEW YORK PUBLIC LIBRARY

Two periodical comets are expected to re-appear this year, one of which is our most constant friend amongst the comets, and has never failed to put in an appearance since its return in 1818, on which occasion its periodicity was es-tablished; and as that period is by far the shortest of any comet, the recorded returns have been the most numerous amongst this class of bodies. But one known as Winnecke's will be due earlier in the year. It was first discovered by that most successful of all comet discoverers, Jean Louis Pons (who died at Florence in 1831), in the month of June 1819, but was not seen again until 1858, when it was rediscovered by the late Prof. Winnecke at Bonn, and is usually called by his name in accordance with the rule to name a comet after the astronomer who discovers it at the appearance when its periodicity is established. The period of this is about 51 years, which has lately somewhat increased; the comet was not seen either in 1863 or 1880, when it was unfavourably placed, but it was observed at the returns in 1869, 1875, 1886, 1892 and 1898, passing its perihelion on the last occasion on the 20th of March. Another return will be due early this year.

The other comet (to which we have already alluded) is called Encke's, because that astronomer completely determined its orbit at the appearance of 1818, though he himself always called it Pons's, in recognition of the fact that Pons was the discoverer on that occasion. The comet (which is sometimes visible to the naked eye) had been seen several times before, but each time was supposed to be new. Mechain was in fact the first discoverer at Paris in 1786, and Miss Caroline Herschel independently discovered it in 1795, really the third return since the first discovery. After that two more unobserved returns must have taken place before it was again discovered in 1805. Encke even then suspected its periodicity, but did not establish the length of this until after Pons's rediscovery in November 1818. The period was about 31 years, or 1212 days, but this has since diminished by about 3 days. The comet returned according to prediction in 1822, and has been observed at each return since, the last time in the year 1901, when it was first seen in August and passed its perihelion on the 15th September, so that another return will be due towards the end of the present year. A very interesting circumstance connected with this comet is the gradual shortening of its period, which for many years was regular in amount, and was confidently attributed by Encke to the effect of a resisting medium in space, diminishing its distance from the Sun, so that its journey round him was accomplished more quickly. But the subsequent decrease in amount of diminution showed that this could not be the true cause, which still awaits a satisfactory explanation.

LUNAR OCCULTATIONS, 1904.

An Occultation of a fixed star or planet, like an Eclipse of the Sun, is caused by the Moon, in her eastward course from right to left, passing between the star and the spectator, and so intercepting it from his view. On page 42 the reader will find, as usual, a full table for the present year, 1904, giving the particulars for the principal Occultations visible in Great Britain.

The most interesting examples are the Occul-tations of the following comparatively bright stars. The letters D and R in the diagrams following indicate the points of disappearance and reappearance of the star, and are measured from the vertex or point of the Moon's limb nearest the Zenith.

The occultation of o Leonis occurs on Jan. 5th. The disappearance takes place at 10^h 13^m p.m., and the reappear-ance at 11^h 9^m p.m., the Moon being eighteen days old.

The occultation of a Leonis on Feb. 29th. The disappear-

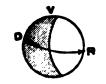

ance takes place at $8^{h} 53^{m}$ p.m., and the reappearance at 9^{h} 46^{m} p.m., the Moon being

thirteen days old.

The occultation of a Tauri on Feb. 24th. The disappearance takes place at 5^h 57^m p.m., and the reappearance at 7^h 15^m p.m., the Moon being eight days old.

The occultation of θ^1 Tauri on March 22nd. The disappearance takes place at 10h o^m p.m., and the reappearance at 10^h 41^m p.m., the Moon being six days old.

The occultation of λ Geminorum on March 25th. The disappearance takes place at 9^h 2^m p.m., and the reappear-ance at 10^h 11^m p.m., the Moon being nine days old.

The occultations of θ^1 and 6² Tauri on July 10th. The disappearances take place at 2^h 5^m a.m., and 2^h 12^m a.m., and the reappearances at 2^h 5^{8m} a.m. and 3^h o^m a.m., the Moon being twenty-six days old.

The occultations of θ^1 and θ^2 Tauri on Sept. 30th. The disappearances take place at and the reappearances at 2^h som a.m., and the reappearances at 2^h som a.m., the Moon being twenty days old.

The occultation of a Tauri on Sept. 30th. The disappearance takes place at 6^{h} 42^{m} a.m., and the reappearance at 7^{h} 10^m a.m., the Moon being twenty days old.

The occultation of y Tauri on Dec. 20th. The disappearance takes place at 6^{h} I^m p.m., and the reappearance at 7^{h} 4^{m} p.m., the Moon being fourteen days old.

THE PLANETARY SYSTEM.

The following shows the approximate Diameter in thousands of miles (I) and Distance from Earth in millions of miles (M) :---

Sun D 852 M		Mercury D 3 M	56'9	Uranus D 33 M 2,698 8
Moon D 2 M	260	Mars D 41 M	∡8 •6	Venus D 71 M 25'7
Earth [,] D 8 M		Neptune D 37 M		
Jupiter D 85 M	360'4	Saturn D 70 M		

OLD ENGLISH HOLIDAYS.

THESE holidays, with their names, had their origin in medizeval England when the State religion was that of the Church of Rome, and they are still observed in some parts of Great Britain.

JANUARY 7. TWELFTH DAY was 12 days after Christmas, and is sometimes called Old Christmas

Day. Many social rites have long been connected with Twelfth Day. FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Candles were largely used in churches on this day to typify Christ, the light of the world, whence the name of Candlemas. FEBRUARY 14. ST. VALENTINE'S DAY: The custom of sending a "valentine" to one's sweet-

heart was very general 50 years ago, but, since the introduction of Christmas Cards, has almost

died out. February 15, Old Candlemas. MARCH 25. LADY DAY : Annunciation of the Blessed Virgin Mary. April 7 is Old Lady Day.

JUNE 24. MIDSUMMER DAY: Feast of the Nativity of St. John the Baptist. July 7 is Old Midsummer Day. AUGUST I. LAMMAS DAY: Originally in

England the festival of the wheat harvest. One of

the Scotch quarter days. Old Lammas Day is August 14.

SEPTEMBER 29. MICHAELMAS : Feast of St. Michael the Archangel. Old Michaelmas Day is October 12.

NOVEMBER I. ALLHALLOWS : All-hallows, or All-Saints' Day. The previous evening is Allhallow-e'en, observed by home gatherings and oldtime festive rites.

NOVEMBER 2. ALL SOULS' DAY : Was formerly regarded as a day of prayer for the souls of the dead.

NOVEMBER 11. MARTINMAS : Feast of St. Martin. Scotch quarter day. Old Martinmas

is November 24. DECEMBER 28. CHILDERMAS : Holy Innocents' Day.

MOTHERING SUNDAY

is Mid-Lent Sunday, in which the old rural custom obtains of making presents of cakes, &c.

sure is measured by the Barometer, which should be a mercurial one. The readings of the baro-meter are "corrected" for instrumental errors and reduced to 32° and to sea-level. These are necessary, since the mercury THE BAROMETER.-Atmospherical Pres-

expands when the temperature rises and the column is lengthened, and two similar barometers cannot read alike unless at the same temperature. In the same way, since the height of the column of mercury measures the weight of the column of air of equal sectional area above it, if two similar barometers be placed one directly above the other it is evident that there will be a less quantity of air above the former than above the latter instrument, and it will read lower.

The following are conditions for a high barometer : (1) When the air is very cold, for then the lower strata are denser and more con-tracted than when it is warm. The contraction causes the upper layers to sink down, bringing a greater number of air particles, that is to say, a greater mass of air into a given vertical column of the atmosphere supposed unable to expand laterally, so that the pressure at its base is greater. (2) When the air is dry, for then it is denser than when it is moist. (3) When in any

way an upper current sets in towards a given area, for this compresses the strata underneath.

Conversely, the barometer stands low when (1) the lower strata are heated, causing the surfaces

of equal pressure to rise, and the upper layers to slide off as already described, for by this means the mass of air pressing on each unit of area below is reduced. (2) When the air is damp, for as the density of aqueous vapour, at the temperature of 60° and pressure of 30 ins., is = 0'622, air being = 1, the mixture is lighter the more vapour it contains, and consequently damp air does not press so heavily as dry on the unit of area below. (3) When the air from any causes has an upward movement, for this of course acts in the same manner as (1). From these principles it fol-

lows that a fall in the barometric reading usually betokens rain and wind, or an increase in both; but a rise the reverse. The direction of the wind, and the temperature, must be noted, however, for

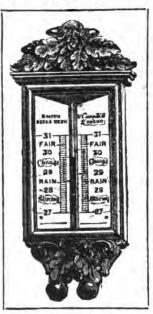

bad weather may accompany a rise, if the wind be from a cold quarter, the north-east winds tending to raise the barometer the most.

The mean height of the barometer at the level of the sea is nearly the same at all places, and is but slightly affected by the fluctuations of temperature; but in the higher regions of the atmosphere it is greatly affected by these causes.

Great falls of the barometer are generally accompanied by a temperature above the mean for the season, and great rises by one below the same.

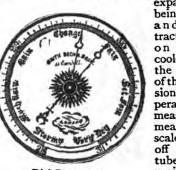

Digitized by Google

The greatest depression of the barometer occurs daily about 4 a.m. and p.m., and its highest elevation about 10 a.m. and p.m.; in summer, these extreme points are reached from one to two hours earlier in the morning, and as much later

THE THERMOMETER.-The determination of the temperature of the air is open to much uncertainty owing to the great difficulty of securing an unexception-able exposure for the thermometers. An ordinary thermometer consists of a fine glass tube with a bulb (cylindrical or spherical)

SELF-RECORDING INSTRU-MENTS.

These have, of late years, come into very general use; they enable the observer to ascertain the movements of the barometer or thermometer at any hour of the day, and require very little attention. A properly-prepared chart is placed round a slowly-revolving cylinder, actuated by clockwork movement, and against this a pen, filled with pre-

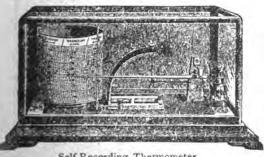

Self-Recording Barometer.

pared ink, is lightly placed; this is held in position by a slender arm, the other end of which is connected with the instrument itself. As the chart slowly revolves the barometer fluctuations in the weather are indicated by slight marks from the pen as shown in the diagrams. The following instructions for the use of these instruments may be interesting :-

Having removed the cover of the instrument, first throw the pen off the cylinder carrying the chart, by turning the milled-head nut in the baseplate.

Wind the clock by the attached key, holding the cylinder firmly in position in the left handthe covered hole near the key gives access to the regulator of the clock movement, and should be kept closed.

To place a chart in position, turn the milledhead nut at the top of the retaining spring-band (which is hinged at the bottom), the catch at the upper end being released it will fall downwards-

Self-Recording Thermometer.

remove the used chart (if there is one on the cylinder), and put a new one into position, being careful that its edge rests on the projecting rim at the bottom of the cylinder; one end of the chart should overlap the other, and the junction come where the retaining spring-band, when re-placed, will hold the paper firmly to the cylinder.

Digitized by Google

Fill the pen with the prepared ink, draw a piece of paper lightly and carefully across the nibs to see that the ink will flow.

Turn the milled-head in the base-plate and allow the return of the pen to the face of the chart. The pressure of the pen upon the chart should be as light as possible, only sufficient to ensure the pen marking distinctly with the ink. This pressure can be regulated by turning the milled-head screw at the other end of arm which carries the pen.

The cylinder with chart must then be turned upon its centre, until the pen points to the correct time.

To set the pen to the correct reading of a Standard, turn very gently the milled head marked "Set Pen," and the arm carrying the pen

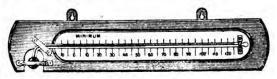

will be depressed or elevated accordingly. The change of chart should be made on Mon-day morning between the hours of seven and twelve-this period being duplicated on the chart for the purpose.

REGISTERING THERMO= METERS.

Maximum Thermometer.

The index in this thermometer is formed by a small portion of the mercurial column being separated from the main thread of mercury by a minute air-bubble; this portion is pushed on before the column when the temperature rises, but does not return with it when it falls. The detached portion of the column therefore rests at the extreme position to which it has advanced, and the end of it farthest from the bulb registers the highest temperature which has been attained. A slight shake, holding the bulb of the thermometer downwards, resets the instrument.

Minimum Thermometer.

The fluid comprised in this instrument is spirit, and in it there is immersed an index. When the

temperature falls the spirit draws the index along with it, but on rising again the spirit passes the index, leaving it at the lowest point to which it has been drawn, the end farthest from the bulb thus registering the minimum tempera-The instrument is ture. reset by raising the bulb and allowing the index to slide to the end of the column of spirit.

Stevenson's Screen is the standard adopted in this country. It secures the thermometer being always in the shade. It is a box formed of double louvres Thermometer Screen.

which slope in opposite directions, so that whilst the air has free access to the thermometers inside, rain and radiant heat cannot enter. The screen should be well exposed to the sun's rays, and the thermometers should be about 4 feet above the ground.

WINDS AND STORMS.

The motion of the air, both in direction and velocity, is regulated by the distribution of atmospherical pressure at the surface of the earth, which is shown by the distribution of the readings of the barometer in the weather chart.

The force of the wind, as distinguished from its direction, is related to the amount of difference of barometrical pressure over a given distance, and

this is defined asthe"gradi-ent." Where ent." Where the lines of equal barometric pres-(the sure "isobars" `) are close together, we have a steep gradient, and may hence expect strong winds to restore the atmospheric equilibrium. The force of

Anemometer.

the wind therefore does not depend on the absolute height of the barometer at any given station, but on its height as compared with that for the surrounding districts.

CYCLONES .- There are two great classes of atmospheric systems, anti-cyclonic and cyclonic.

Anti-cyclonic systems are characterised by very slow circulation of the air (light winds), by low temperature in winter, great "absolute" dryness of the air, at least at their centres, and consequent absence of rain, though fog may be

very prevalent. Cyclonic systems on the other hand are cha-racterised by rapid circulation of the air causing strong winds—which appear to flow towards the centre, so that the air is supplied from below and ascends in the centre-a comparatively high temperature, much moisture, and therefore heavy rain. At the rear of the disturbance it may be very dry.

These are the winter conditions. In summer they are exactly reversed, at least in temperature.

One great distinction between cyclones and anti-cyclones is that the former move over more stationary. The actual force of the wind is measured in a meteorological observatory by an anemometer, of which an illustration is given above.

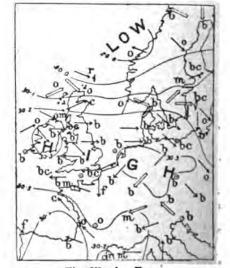

WEATHER FORECASTING.

For the purpose of official weather forecasting the Meteorological Office receives numerous reports by telegraph from all parts of the British Islands and from many places situated in different parts of Western Europe. Such telegrams are received at three times each day, viz. at 8 a.m., 2 p.m., and 6 p.m. The reports contain observations of barometer, temperature, wind, weather, and sea disturbance. This telegraphic information was primarily intended for the issue of storm warnings to various places around our coasts, but the general public asked for daily weather forecasts, and such information has now been given for several years. The observations when re-ceived are entered on a chart, and isobars or lines of equal barometer readings are drawn so that any change in the general distribution of atmo-spheric pressure can be readily traced. A collection of these charts shows that there are various types of weather, some being associated with fine and dry weather, and others with wind and rain. As in our Islands most of our weather changes approach from the Atlantic and move from W. to E., or from N.W. to N.E., they can be generally well traced. A change which is shown to be commencing on our west coasts is likely to develop, and in the ensuing 24 hours will probably extend to other parts of the United Kingdom. The specimen charts which are given to illustrate types of fine and bad weather are drawn from actual observations, and they will probably serve to illustrate the general principle which underlies the system of weather forecasting. There are numerous

weather types, but they are all more or less as sociated with the two general types given. The Fine Weather Type is not infrequently characterised by the most brilliant summer weather; the conditions are generally dry and the day temperatures usually high In the winter day temperatures usually high. In the winter these conditions are usually accompanied by frost

and frequently, if the winds are light, by fog. It will be noticed that the region of relatively highest barometer is situated over our Islands, and any disturbances arriving from the Atlantic are compelled to follow a course which takes them well to the northward of the British Isles.

The Bad Weather Type is one of the commonest and one of the most persistent experienced. During its prevalence pressure remains relatively high over Central and Southern Europe, while the barometer is low over our Islands and the westward of our shores, and cyclonic disturbances pass with con-siderable frequency along our West coasts. In winter when the barometer differences are great,

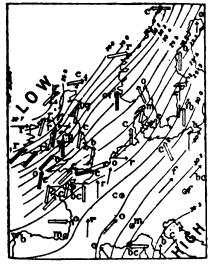

Fine Weather Type.

gales are experienced. The barometer falls as the wind draws S.Wly., and rises as it shifts to the W. and N.W. These changes are constantly recurring. The conditions are those which char-

acterise a broken and unsettled summer, or a mild and wet winter.

When the barometer is comparatively high over Scandinavia and there is a similar region of high

Bad Weather Type.

barometer over France and Spain, with a relatively low barometer over our Islands the weather with us is usually very disturbed, gales occurring When in winter and thunderstorms in summer. once this type of weather sets in it commonly lasts several days, and often for a week or two. There is a tendency always for a persistence of the same weather conditions, that is, when anti-cyclonic conditions are prevailing there is a reluctance for unsettled weather to set in, and similarly when the prevailing conditions are cyclonic there is a great tendency for the recurrence of the rapid changes which are associated with the arrival of the disturbances on our coasts from the Atlantic. When cyclonic disturbances arrive in proximity to our Islands there is a tendency for them mostly to skirt our shores and not to strike inland. Secondary or subsidiary disturbances are commonly formed in the southern segment of the storm area, and they usually travel at a much higher rate than the parent disturbance and frequently develop quite as much energy. A heavy northerly gale is commonly experienced after the barometer commences to rise from a very low point, and this is often due to the travelling high barometer in the rear of the storm moving faster than the area of low barometer with which it is associated. An unsteady barometer indicates unsettled weather, and a rapid rise of the mercury is not to be trusted. A rapid fall of the barometer is a fairly sure sign of bad weather, wind or rain, and per-haps both. The rise and fall of temperature and the ever-changing character of the clouds as well as the general aspect of the sky all aid materially in weather forecasting, skill in which is only to be obtained by constant and prolonged practice.

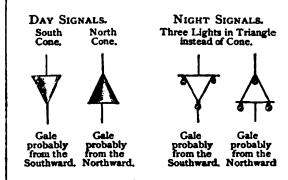

STORM AND WIND SIGNALS OF THE METEOROLOGICAL OFFICE.

The Cone *point downwards* means that gales for strong winds are to be expected, at first from the Southward, viz., from S.E. round by S. to N.W. The South Cone is hoisted if it appears

probable that a gale will begin from between E. and S.E., and also that it is likely to veer towards S. or S.W.

The Cone point upwards means that Northerly gales or strong winds are probable, viz., from N.W. round by N. to S.E. If it is probable that a gale will begin from between W. and N.W.,

and also that it is likely to veer towards N. or

N.E., the North Cone is hoisted. The Signal is kept hoisted until dusk, and then lowered; hoisted again the following morning at daylight, and so on for 48 hours from the time at which the message was issued from the Meteorological Office, unless otherwise ordered. At dusk, when a Signal ought to be flying, the Night Signal should be hoisted in place of the Cone—point downwards for South Cone, point upwards for North Cone.

The object of these warnings is only to make known the greater and more general disturbances of the atmosphere, and the hoisting of the Signals is a sign that an atmospherical disturbance is in existence, which will *probably* cause a gale, from the quarter indicated by the Signal used, within a distance of about 50 miles of the place where

the Signal is hoisted. A Southerly wind is more likely to veer rapidly to a point North of West than a Northerly wind is to veer to a point South of East; a gale from the Eastward is more likely to back to the Northward than to veer to the Southward.

INLAND LETTERS.

The rates for Inland Letters are as follows :

4 ozs1d.	10 0252 ¹ d.	
6 ozs 1 d.		18 ozs4 ¹ d.
8 ozs2d.	14 ozs31d.	20 ozs5d.
and so on for	greater weights	at 1d. extra for
	l 2 ozs. No let	
	n. wide, or 12 in	
posted unpaid	are charged dou	ible postage on
delivery; those	insufficiently p	aid, double the
deficiency.		-
-		

EXPRESS DELIVERY.-Letters and parcels are accepted at most of the principal offices for express delivery, at an extra charge of 3d. for every mile or part. The cost of cab hire extra if required. The packet must be handed over counter at the Post Office, with postage and fee affixed in stamps, and "Express Delivery" boldly written at top left corner.

Single letters not exceeding 4 ozs. in weight can be sent by railway. The postage must be paid by stamps, and a fee of 2d. must be paid to the railway servant receiving such letter, and he will affix and obliterate a special label. Such letters must be taken to a passenger station, and will be sent to destination by first available train. They may be addressed to the Parcel Office at the station of destination "to be called for," or if so desired will be posted in the nearest Post Office to the station to which addressed for delivery by ordinary post.

INLAND NEWSPAPERS.

The ordinary postal rate on unregistered newspapers is a halfpenny for every 2 ozs.; but publications which consist wholly or in great part of news, or articles on current topics, and which are printed and published in the United Kingdom at intervals of not more than seven days, mayfor an annual fee of 5s.—be registered for trans-mission by post in the United Kingdom at the newspaper rate of a halfpenny each, irrespective of weight. No newspaper packet may be above 5 lbs. in weight, 24 in. long, 12 in. wide, or 12 in. deep.

NEWSPAPER WRAPPERS.—Halfpenny stamp, ²d. each, 7 for 4d., or 225. 10d. per 480; Penny Stamp, 1²d. each, 8 for 8¹/₂d., or 215. 3d. per 240. Sheets of halfpenny wrappers may be obtained at two days' notice in packets of 120 short of a wrapper work of the 26 sheets of 14 wrappers each at £3 18s.

INLAND BOOK POST.

The rates for Book Packets are as follows :

2 OZS.	<u></u> ₽d.	8 ozs.	2d.	14 OZS.	31d.
4 ,,	ıd.	10 ,,	2] d.	16 ,, 18 ,,	₄d.

3 "	5d.	7 "	os. 9d. os. 10d.	11 ,,	15. úd.
4 ,,	6d.	8,	os. 10d.	l	
	I	1 lbs. is	the limit a	llowed.	

POST CARDS, REGISTRATION, &c.

POST CARDS .- Post Cards are sold at the following rates :--Stout Cards 2d. each, 6d. for 10, or 5s. for 100. Thin Cards 2d. each, 51d. for 10, or 11s. for 240. Uncut sheets can be obtained at any Post Office at two days' notice in packets of 120 sheets (containing 42 cards each, or a total of 5,040 cards) at \pounds_{12} 6s. for stout cards, and \pounds_{13} 8s. for thin cards. *Reply* Post Cards are issued at double these steeps double these rates, but are not sold in uncut sheets. Official Post Cards, or private cards embossed by Office of Inland Revenue with a ence throughout the United Kingdom, and private cards bearing an adhesive halfpenny stamp may also be used provided they are composed of ordinary cardboard, not thicker than official cards, and are of about the size of official cards, being not less than $3\frac{1}{4}$ in. by $2\frac{1}{4}$ in.

LETTER CARDS .- Letter Cards are sold at 1 d. each, 4 for 4 d., or 8 for 9d.

REGISTRATION & INSURANCE.—The fee for registering an Inland Letter, Packet, Parcel, &c., is 2d. over and above the ordinary postal rate, and in the event of loss or damage this covers compensation up to £5. The packet *must* be enclosed in a strong cover, securely fastened, and if containing coin, *must* (to gain the benefit of the Post Office guarantee) be enclosed in a special Registered Letter envelope, wild at all post office The product envelope. sold at all post offices. The packet must be given to a Post Office official, and a receipt obtained for it, and if, contrary to this rule, it should be dropped into a letter box, it become liable to a fee of 4d. on delivery. Letters containing coin, jewellery, or watches, if posted without registration, are liable to a similar fee on delivery.

PRIVATE LETTER BOXES.—Posting boxes may now be fixed in private houses in London on the following conditions. The box must be approved by the Postal authorities, and must be fitted with a lock supplied by them at the cost of the user, who will not be allowed access to the interior of the box. The box must be easily accessible from the street for the purpose of collection. The annual fees are as follows :-Initial fee, 205. for two collections other than the "general," and 105. for each additional collection. For the "general" collection, 405.

LONDON ARRANGEMENTS.

The latest time for posting letters for the Night

The latest time for posting letters for the Night Mails generally is as follows :--St. Martin's-le-Grand.--Letters, 6; ex. 1d., 7.30. Foreign and Colonial, 6; ex. 1d., 7; ex. 2d., 7.15; ex. 3d., 7.30. News and Book Packets, 5.30; ex. 1d., 6.45; ex. 1d., 7.15. Foreign and Colonial ditto, 6; with ex. 1d., 6.45; ex. 1d., 7.15. Lombard St., Gracechurch St., 47, Cannon St. Eastcheap, Floet St., Throgmorion Av., Mart Lane, Leadenhall St., Throadmeetile St., Langett Circus,-Letters 6: ex. 1d., 7: Foreign and

Circus.-Letters 6; ex. id., 7; Foreign and Colonial, 6; ex. 1d., 7; all News and Book Packets, 5.30.

District Offices.—Letters, 6; ex. 1d., 7.30; For. and Col. 6; ex. 1d., 7; Newsand Book Pack., 5.30. Receiving Houses and Pillar Boxes.—Letters,

6 p.m. Special late fee boxes are affixed at the barriers on platforms of the Railway Stations from which Mail Trains start each morning and evening and Sunday evening, in which Letters, &c., for the Provinces can be posted if paid a fee of $\frac{1}{2}d$. in addition to the postage.

At the G.P.O., at West Strand Telegraph Offices, the Chief District and some suburban Offices and the Termini of principal railways, letters posted on Sunday before 6 p.m., and paid id. for Inland and id. for the Continent, in addition to postage, are forwarded by Night Mails.

Late Letters, &c., for Continent generally can be posted at Cannon St. and Charing Cross Stations, and those for Holland, Germany, and North of Europe can be posted at Holborn Viaduct and Victoria Stations each week-day evening, up to a short time before departure of train, and must bear a fee of 4d. in stamps in addition to postage. On Sunday evening, letters, &c., can be similarly posted with an additional fee of 1d. At Euston Station, those for the United States, Canada, &c., can be posted on Wed. up to 8.45 p.m., and on Sat. up to 4.10 p.m., and those for Canada up to 8.45 p.m. on Thursday; those for the Cape, &c., can be posted at Waterloo up to 1.45 p.m. on Saturday, and those for the West Indies and Pacific up to 11.25 a.m. on alternate Wednesdays, with a fee of 2d. in addition to postage. Registered Letters must not be posted in these Boxes.

in these Boxes. The latest time for registering letters at St. Martin's-le-Grand with ordinary fee is 5.30 p.m., or on payment of 2d. late fee, 6 p.m.; of 4d., 6.30 p.m.; of 6d., 7 p.m.; and of 1s., 7.30 p.m. At Lombard St. Branch Office with ordinary fee, 5.30 p.m.; with late fee of 2d., 6 p.m.; of 4d., 6.30 p.m.; and of 6d., 6.55 p.m. At the District Offices and the Chief Branch Offices in E.C. District, 5.30 p.m., or with 2d. late fee, 6 p.m. At other Branch and Sub-offices, 5 p.m. Inquiries for Missing Letters should be made

Inquiries for Missing Letters should be made at the Secretary's Office, St. Martin's-le-Grand, between 10 a.m and 4 p.m. (Saturdays 10 and 1). The Poste Restante is at the General Post Office; the Returned Letter Office is at Mount Pleasant, and the Money Order Office is at Nos. 18-20, Fore St., E.C.; the Post Office Savings Bank is at Blythe Road, West Kensington.

FOREIGN POST.

LETTERS.—The rate of postage on letters addressed to most British possessions is 1d. per $\frac{1}{2}$ oz.; to the Australian colonies, Rhodesia, and some minor colonies, and to all foreign countries the rate is $\frac{1}{2}$ d. per $\frac{1}{2}$ oz. No letter may be more than 24 in. long, and 12 in. wide, or deep.

deep. NEWSPAPERS AND BOOKS.—The rates for Newspapers and other printed matter are given in the table below; circulars in identical form from type-written originals, or printed in imitation type-written characters, are admitted at printed matter rate, if in numbers of not less than twenty and specially handed over the counter at a Post Office and attention called to their nature. Upon Commercial Papers the lowest rate is add. for any weight less than 10 ozs., but those under 1 oz. for British possessions other than those above named may be sent cheaper as letters (which see). Limitation of size for Foreign countries of the Postal Union is 18 in. long by 12 in. wide or deep, and to other places abroad the limit is 24 in. long by 12 in. wide or deep. in form of a roll the

Digitized by Google

limits are 30 in. long by 4 in. diameter in either case. Limitation of weight is 4 lbs. to Foreign countries in Postal Union, and 5 lbs. to other countries.

SAMPLES.—Bonà fide trade samples, not being liable to Customs duties, and not sent in execution of an order, or by one private individual to another, may be sent by post to the Colonies and all Foreign countries at book post rate, but the lowest rate is 1d. The packet must be open at ends, but samples of seeds, drugs, &c., may be sent in boxes or bags fastened so that they may be easily opened. Such samples must not be of saleable value, or of a dangerous or prohibited nature. Limit of size to any Foreign country in Postal Union is 12 in. long by 8 in. wide and 4 in. deep, or for packets in the form of a roll, 12 in. long and 6 in. diameter. To other Countries and British Colonies the limit is 24 in. by 12 in. by 12 in. The weights allowed are 12 ozs. to Foreign countries. POST CARDS may be sent to all countries

POST CARDS may be sent to all countries at one penny each for single, and twopence each for Reply cards. Regulations same as Inland.

for Reply cards. Regulations same as Inland. REGISTRATION.—Fee and regulations same as Inland. Coin, jewellery, &c., is permitted to be sent to some countries, but value of contents must *not* be marked on outside. Letters containing bank notes, bonds, &c., can be insured when sent to some countries. By prepayment of an extra fee of 21d. an acknowledgment of the receipt of a registered packet when sent to a country of Postal Union may be obtained from the addressee.

MONEY ORDERS.

INLAND.—The Rates for Inland Money Orders are as follows :—

Not exceeding \pounds_1 Exceeding \pounds_1 and not exceeding \pounds_3							2d. 3d.	
	,,	£3	,,	,,	£10	•••	4d.	
No	Single	Money	Order	may	b e is sue	d fo	n a	

N

higher amount than fire. Money may be transmitted by telegraph from any Money Order Office which is a *des-patching* office for Telegrams, and may be paid at any M. O. office which is a Telegram *delivery* office. The rate of commission is, not exceeding £3, 4d.; above £3, and not exceeding £10, 6d.; in addition to the cost of official telegram, the minimum being 6d.

FOREIGN MONEY ORDERS are issued in the United Kingdom to most Foreign Countries and British Colonies at a uniform rate of 6d. for sums not exceeding $\pounds z_i$; of is., not exceeding $\pounds 6$; of is. 6d., not exceeding $\pounds to$. And Money Orders can be advised by Telegraph to various Foreign Countries, particu-lars of which can be obtained on application at any Money Order Office any Money Order Office.

POSTAL ORDERS.

Postal Orders are issued at all Money Order Offices for any sum from 6d. to 20s., increasing by 6d. The commission chargeable is: For Orders up to 1s. 6d. inclusive, d.; from 2s. to 105. 6d. inclusive, 1d.; from 115. to 205. inclusive, ıłd.

Postage stamps for odd pence (not exceeding 3) may be affixed to the face of Postal Orders as value.

POST OFFICE SAVINGS BANKS.

Sums of one shilling or of any number of complete shillings are received at all Money Order Offices, on deposit, but no one may deposit more than \pounds_{50} in one year, ending December 31, and no deposit account can exceed \pounds_{200} . Interest is allowed at the rate of \pounds_{2} 10s. per cent. per annum. Smaller sums may be saved by purchasing penny postage stamps, and affixing them on a form, supplied at any post office; twelve stamps so affixed will be received as a deposit of one shilling.

INVESTMENTS. — Depositors can invest sums in Government stock, and all dividends in respect of such stock will be credited to the deposit account in the same manner as interest. The commission charged for investments or sales is as follows: — £25, 9d.; £50, 15. 3d.; £75, 15. 9d.; £100, 25. 3d.; and for every additional £100 up to the limit of £500, 6d.

INSURANCES AND ANNUITIES.—The Postmaster-General is empowered to insure the lives of persons between the ages of 14 and 65 for not less than \pounds_5 or more than \pounds_{100} , and to grant annuities of not more than \pounds_{100} on the lives of persons of the age of 5 and upwards. A life in the 30th year may be insured for \pounds_{100} by a single payment of \pounds_{46} 11s. 6d., or by an annual payment through life of \pounds_2 3s., or by an annual payment up to the age of 60 of \pounds_2 10s., or in quarterly, monthly, or fortnightly payments in proportion.

INLAND TELEGRAMS.

The charge for telegrams throughout the United Kingdom is 6d. for the first 12 words and 1d. for every additional word, the names and addresses of sender and receiver being counted. Names of places consisting of more than one word will be charged for as one; London District initials will be counted as one word; and figures will be counted as 5 for a word.

Porterage is charged at the rate of 3d. per mile (reckoned from the Telegraph Office), if the telegram is for delivery beyond 3 miles from that Office (or beyond the town *postal* delivery). The sum paid for delivery is telegraphed to the delivering office, and if under calculated, the deficiency is charged on delivery, whilst any excess is refunded on application to the Secretary.

Telegrams bearing the words "by post," or "by train" (which must be paid for) after the address, are forwarded by post or train from the delivering office, a deposit of 1s. when sent by train being payable by sender, to cover cost of conveyance.

Telegrams repeated at the request of sender or receiver are charged at half ordinary tariff; fractions of a halfpenny being reckoned as a halfpenny. In the case of a telegram repeated at receiver's request, the sum paid for repetition will be refunded if the telegram has been inaccurately transmitted.

The cost of a reply, not exceeding 48 words in length, may be prepaid, and the reply may be sent, from any Telegraph Office, at any time within two months after the date of the original telegram. A reply form may be used for an original message.

Telegraph Offices are, as a rule, open from 8 a.m. to 8 p.m. on week days, and from 8 a.m. to 10 a.m. on Sundays (Scotland 9 a.m. to 10 a.m.), but there are several in London and provincial towns which are open continuously.

FOREIGN TELEGRAMS.

The following are the rates from any part of the United Kingdom. Address of receiver must be paid for, as well as that of sender, if transmitted.

Aden, 2s. 6d. per word; Antigua, 4s. 4d.; Argentine Republic, 3s. 11d.; Austria, 3d.; Azores, 9d.; Bahamas, 2s. 5d.; Barbados, 4s. 9d.; Belgium, 2d.; Bermuda, 2s. 6d.; Brazil, 3s. to 5s. 7d.; British Borneo—Labuan, 4s. 10d., other places, 5s.; Burma, 2s. 3d.; California, 1s. 6d.; Canada, 1s. to 3s. 2d.; Cape Colony, 2s. 6d.; Ceylon, 2s. 4d.; China, 5s. 5d. to 5s. 7d.; Cuba, 1s. 8d. to 1s. 10d.; Denmark, 3d.; Egypt, 1s. 7d. to 2s. 6d.; France, 2d.; Germany, 2d.; Gibraltar, 3fd.; Holland, 2d.; Hungary, 3d.; India, 2s. 3d.; Italy, 3d.; Jamaica, 3s.; Japan, 6s. 2d.; Labuan, 4s. 10d.; New Brunswick, 1s.; Newfoundland, 1s.; New South Wales, 2s. 10d.; Norway, 3d.; Nova Scotia, 1s.; Orange River Colony, 2s. 6d.; Penang, 3s. 4d.; Philippine Islands, 5s. 7d. to 6s. 2d.; Portugal, 3fd.; Queensland, 2s. 10d.; Ruosia, 5fd.; Singapore, 3s. 4d.; South Australia, 2s. 10d.; Suitzerland, 3d.; Tasmania, 2s. 10d.; Transvaal, 2s. 6d.; Tinindad, 5s. 7d.; United States, 1s. to 1s. 6d.; Vancouver's Island, 1s. 6d.; Victoria, 2s. 10d.; Zululand, 2s. 6d.

No word may exceed 15 letters.

TELEPHONE NOTES.

The rates of subscription to the Post Office London System including one telephone at the subscriber's premises are as follows :--

Ordinary Message-rate Service.—(a) Connection with any exchange in County of London within 2 miles of subscriber's premises, Ann. sub. £5, and, in addition, 1d. for each call to a subscriber on any London exchange, and 2d. on any other exchange. (b) Connection with any exchange outside County of London within 2 miles of subscriber's premises, Ann. sub. £4, and, in addition, 1d. for each call to a subscriber on same exchange, or 2d. on any other exchange.

Minimum yearly amount for message fees, 30s.

Party-line Message-rate Service.—(a) Connection with any exchange except Central by a line used by one or two subscribers, \pounds_3 . (b) Connection with any exchange outside the County of London for 3 to 10 subscribers, \pounds_2 .

Original from NEW YORK PUBLIC LIBRARY 5. - to B

RATES, TAXES, LICENCES, STAMP DUTIES, &c.

Affidavits.—An Affidavit or Statutory Declaration must be stamped with a half-crown stamp.

Except such as are to be used in any court or required by any Board of Revenue, or by law and made before any justice of the Peace, or required at the Bank of Eng. or Ire. to prove the death of any proprietor, or for the transfer of stock, &c., or as to the loss, &c., of any bank note or bank post bill, or declaration required in order to a marriage without licence, or Declaration forming part of an application for a patent.

Agreements or Contracts.—If under hand only of the value of \pounds_5 or more and not otherwise charged, the duty is sixpence, which may be affixed by an adhesive stamp.

Agreements under \mathcal{L}_5 or for hire of labourers or manual servants or for sale of goods, &c., or between master and men of a ship for wages need not be stamped.

Appointment of a New Trustee by any instrument except a Will, 10s.

Appraisement or Valuation. $-\pounds_5$ -3d.; \pounds_{10} -6d.; and for every \pounds_{10} up to \pounds_{50} -6d.; above \pounds_{50} , not above \pounds_{100} -5s.; \pounds_{200} -10s.; \pounds_{500} -15s.; above £500-20s.

Apprentices' Indentures.-To be binding, these must be in proper legal form stamped with a half-crown stamp—an ordinary form of agreement will not suffice. The length of term, premium to be paid, remuneration to apprentice, &c., vary with the nature of the trade and the will of the A statute of Queen Elizabeth fixed the parties. term of apprenticeship at 7 years, and though this was repealed in 1814 that period is still regarded as the most satisfactory. An indenture is usually determined by the death of the master. In London, if bound to a member of one of the great City Companies, the apprentice is entitled to take up the "freedom of the City" at the expiration of the seven years on payment of a small sum.

Armorial Bearings, 215.; on carriage, 425. The term "Armorial bearings" includes any crest, coat of arms, or ensign, whether registered at the College of Arms or not, and whether used on plate, jewellery, paper or otherwise, but a licence to use on a carriage includes use in any other manner. Licences expire Dec. 31.

Armorial bearings used solely as Trade Marks or for Trade purposes or by any Corporation or Public Com-pany in their Corporate capacity are exempt.

Attorney, Letter or Power of-

For appointing Proxy at any single meeting, or adjournment thereof, 1d.

For receiving Wages or Prize Money, 13.

For the sale, transfer or acceptance of Government Stock, where the nominal value does not exceed \pounds_{100} -2s. 6d. Any other kind, 10s.

Bills of Exchange

A Bill of Exchange payable on demand, at a period not exceeding three days after date, on

sight or on presentation, 1d. A Bill of Exchange or Promissory Note of any other kind negotiated in the U. K.:

Not above	£50	1	Ł	Not above	£50.	0	6	
	100			"	75			
	25 0	8		100	1	0		

And for every £100, or any fractional part of £100, IS.

Bills of Exchange drawn out of the United Kingdom, when negotiated here, exceeding £50 and not exceeding £100, 6d.; exceeding £100, 6d. for every £100 or part thereof. A Bill of Exchange is an unconditional written

order given for a consideration by one party (the drawer) upon another (the drawee). Such a document is of no commercial value till it is "accepted," and the acceptor then becomes

primarily responsible for payment, the drawer only secondarily so, provided that if not paid at maturity the document is immediately "noted" in the proper manner. Before it can be paid, the Bill must be "endorsed," or signed across the back by the drawer. The customary form of acceptance for Form No. 1 would be "accepted, payable at (such and such) a bank," and the acceptor's signature.

The person to whom a Bill is payable may

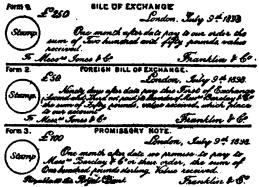

assign it to another by writing above his signature the words "pay to the order of" so and so. Instead of "one month after date," or "ninety days after date," any other period may be stated, days or months "after sight" (*i.e.* after being presented for acceptance); or, again, immediately on presentation, by the substitution of the words "at sight." A Promissory Note does not require to be

"accepted," but must be endorsed by the payee

before value can be received. Three days' "grace" are allowed after the date when a Bill becomes due, but this does not apply to Bills payable at sight. In foreign

countries the number of days of grace varies. Bills of Exchange and Promissory Notes due on any bank holiday are payable the day follow-ing; those due on Good Friday, Christmas Day, or on a Sunday are payable the day previous.

The following are ordinary forms of Bills of Exchange and Promissory Notes :--

Bonds.-A Bond, Covenant, or Instrument, which is the principal security for any sum or sums of money at stated periods for a definite period, is liable to an *ad valorem* duty for the whole sum (see MORTGAGE)

If it is for life or other indefinite period, for every £5 or part of £5 of sum periodically payable, 2s.6d.

In the case of any superannuation annuity: for every $\pounds 5$ or part of $\pounds 5$ of the annuity or sum periodically payable, 6d. Bonds, by Acts of Parliament or by Customs or Inland Revenue, where penalty does not ex-

ceed £150, duty as in MORTGAGE. In any other

Case 55. A Bond on obtaining Letters of Administration in England or Ireland, or a confirmation of testa-

ment in Scotland, £5. **Garriage Tax.**—The duty on carriages of all kinds (except Hackney Carriages) with 4 or more wheels drawn or fitted to be drawn by 2 or more horses or mules or propelled by mechanical power is 42s.; if by one horse or mule only, 21s.; with less than 4 wheels, 15s.; Hackney Carriages, 15s. Only half the amount is charged if the licence is taken out after Oct. 1 in any year, but all licences expire on Dec. 31. On Motor Cars, licences expire on Dec. 31. in addition to the Carriage Tax a further duty

is payable as follows: Weight, without water, fuel or accumulator, from 1 to 2 tons, 422.; above 2 tons, \pounds_3 3s. (See also under Armorial Bearings and Servants.)

Carriages, Carts, Waggons, &c., used solely for convey-ance of goods for Trade purposes are exempt if the name, &c., of owner are legibly painted on them.

Contract Note, advising sale or purchase of Stock of the value of £5 and under £100-1d.; £100 or upwards, 1s.

A note advising sale or purchase of more than one description of Stock will be deemed to be as many notes as there are descriptions of Stock.

Conveyances.—A Conveyance transfer, or whether on sale or otherwise, of Bank of Eng-land Stock, is liable to a duty of 7s. 9d.; of Canadian Stock, inscribed in books kept in the United Kingdom, and Colonial Stock registered under the Colonial Stock Act, 1877, of 2s. 6d. for every £100 or fraction of £100.

Conveyance or transfer on sale of any property (except such Stock as aforesaid), where the purchase or consideration money is not above £5-6d.

For every additional \pounds_5 , up to \pounds_{25} —6d.; for every \pounds_{25} , up to \pounds_{300} —2s. 6d.; for every addi-tional \pounds_{50} —5s.

Of any other kind, 10s.

See also under Marketable Security. Dog Tax.—The duty on any dog of the age of six months, no matter of what description, in England, Wales and Scotland, is 7s. 6d. Dogs under six months are not liable, but a licence must be taken out as soon as they attain that age. Dog licences are issued at all Money Order Offices and expire on Dec. 31. The penalty for keeping a dog without a licence is $\pounds 5$. In Ireland the licence duty for each dog is 28.; the certifi-cate of peristration hears a sizener wetter cate of registration bears a sixpenny Petty Sessions stamp, but one stamp suffices for each licence which may include several dogs.

Dogs kept and used solely by blind persons are exempt, and farmers and shepherds may obtain exemption for 2 or more dogs kept solely for guarding sheep, on making the necessary declaration.

Estate Duty.-This duty is payable upon the principal value of all property, real or personal, settled or not settled, which passes on a death. In estimating the value of the estate for duty, the funeral expenses and all outstanding debts and liabilities should first be deducted. The following are the rates of Duty :— $\pounds100$ to $\pounds500$, 1 per cent.; $\pounds500$ to $\pounds1,000$, 2 per cent.: $\pounds1,000$ to $\pounds10,000$, £500 to £1,000, 2 per cent. : £1,000 to £10,000, 3 per cent. ; £10,000 to £25,000, 4 per cent. ; £25,000 to £50,000, 4 per cent. ; £50,000 to £75,000, 5 per cent. ; £75,000 to £100,000, 5 per cent. ; £150,000 to £150,000, 6 per cent. ; £250,000 to £500,000, 7 per cent. ; £500,000 to £1,000,000, 7 per cent. ; above £1,000,000, 8 per cent. In addition to the above, where property liable to Estate Duty is settled by the will of the de-ceased or having been settled on or after Aug t

ceased, or having been settled on or after Aug. 1, 1894, by some other disposition passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty called Settlement Estate Duty is payable at the rate of $\pounds r$ per cent. on the settled property, but from that payment the *ad valorem* stamp duty charged on the settlement may be deducted.

But where the net value of the property, real and personal, does not exceed £1,000, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from Legacy or Succession Duties.

Small estates up to £300 and £500 gross, are charged with fixed duties of 30s. and 50s., and are exempt from all "her death duties.

Digitized by Google

Interest at 3 per cent. per annum is also pay-able on the Estate Duty from the date of the death down to the date of the delivery of the affidavit, or the expiration of six months after the death, whichever first happens.

The duty at the rate of 1 per cent. payable under the Acts relating to Legacy or Succession Duties, and the additional Succession Duties imposed by Sec. 21 of the Customs and Inland Revenue Act, 1888, are not leviable in respect of property chargeable with Estate Duty in cases where the deceased died on or after Aug. 1, 1894.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, with interest at 3 per cent per annum, but arrears of Estate Duty are

chargeable with interest at 4 per cent. per annum In small estates, where the gross value does not exceed \pounds_{300} , probate and letters of administration may be obtained through an Inland

Revenue Officer. Game and Gamekespers' Licences.-No me may use a gun without a proper licence. To carry a gun or firearm of any description the licence costs ros. and expires July 31. An annual licence for killing game, expiring July 31, costs \pounds_3 ; for 14 days only, 203. A short period licence from Aug. 1 to Oct. 31, or from Nov. 1 to July 31. costs \pounds_2 . A gamekeeper's licence costs \pounds_2 , and any one having the right to kill game in England or Scotland can take an annual licence out for any assessed servant to act as a gamekeeper for the same sum. Such licences expire July 31.

In Ireland the licence for a gamekeeper acting under a deputation registered with supervisor for a whole year costs \pounds_3 ; from Aug. 1 to Oct. 31, or Nov. 1 to July 31, £2.

Persons holding game licences, soldiers, sailors and volunteers, when using or carrying a gun in the execu-tion of their duty, or when engaged in target practice need not have a gun licence, 33 & 34 Vict. c. 57, sec. sub-section 1.

In England the word "game" includes pha-sants, partridges, grouse, black, heath or mozsants, participes, grouse, olack, neath or mag game, bustards and hares, but oumers may bit hares without a licence. The penalty for killing game or using a gun without licence is fre Shooting game on a Sunday is also illegal. General Rate.—This rate is one for meetin; various items of expenditure, such as paving. lighting, cleansing, &c. In counties it goes by the name of THE CONSULTATE, in the Metr-polis it scalled THE CONSULTATE.

polis it is called THE CONSOLIDATED RATE, 17 in a few Parishes and in all Boroughs Thi GENERAL DISTRICT RATE. It sometimes in cludes the School Board Rate. It is based a the same assessment as that used for the Poor Ra:= and varies according to circumstances. As a reit is payable quarterly (half-yearly in Boroughed

The General Rate covers the expenses of wares ing, street lighting, repair and watering of sree and sewers, and the expenses of the Hezly Department and Hospitals. Improvement Bate.—This provides for repar-

ment of expenses of street improvements, quar-&c.; the General District Rate is mainly for parts the City Rate is applied to meet deficiencies r the City Fund for Criminal Prosecutions, salars of officials, cost of markets, baths and wast houses, weights and measures, registration es penses, fire brigade, &c.

It may be well here to say that the remarks = these columns concerning Rates can only te taken generally: the whole system of makes and collecting Rates differs materially in different parts of the kingdom and no definite rule cas = stated in regard to them. Inhabited House Duty.-This is payable and

The rate of duty is fixed by ally in January. the Commissioners quinquennially on the full estimated annual value of all houses of the rental value of £20 or more, less local rates. The quinquennial assessment of 1900 is at present in force for the metropolis, the present rate of duty being as follows :-- On inhabited houses the annual value of which exceeds £20 but does not exceed £40, if used for the sale of goods, the shop or warehouse being on the ground floor; or for the retail of beer, wines or spirits; or if occupied by any person carrying on the business of an hotelkeeper, inn-keeper, or coffee-house keeper, al-though not licensed to sell therein by retail, ale, wine, or other liquors; or is occupied by a tenant or farm servant for husbandry purposes only, for every 20s. of annual value, the sum of 2d. If not so used or eccupied, 3^d . When the annual value exceeds £40 but does

When the annual value exceeds £40 but does not exceed £60, if used or occupied as above, 4d. If not so used or occupied, 6d.

When the annual value exceeds $\pounds 60$, if used or occupied as above, 6d. If not so used or occupied, 9d. Lodging houses, if registered, are subject to the reduced duty only. Artisans' dwellings (where the annual value of each dwelling does not amount to $\pounds 20$) are exempt.

Tenements, or parts of tenements, occupied solely for purposes of trade, or for purpose of any profession or calling, are exempt from duty (see 44 Vict. c. 12, s. 24). **Income Tax** is collected under five Schedules.

Income Tax is collected under five Schedules. Schedule A is the landlord's tax, and is based on the rent or annual value of the property rated, less the statutory deduction for repairs.

These are as follows :--

r. Lands (inclusive of the farm-house and other buildings, if any) one-eighth of the full annual value.

2. Houses or buildings (exclusive of farmhouses or buildings assessed with lands) onesixth of the full annual value; but where a tenant pays cost of repairs, the deduction is not to exceed such a sum-not being more than one-sixth of the annual value—as will reduce the net assessment to the actual amount of rent.

The tenant pays this tax, but, as is shown above, is entitled to deduct from the next payment to the Landlord for rent the whole amount, or such part of it as represents the actual annual rental. (See below.) Schedule B is for incomes derived from the use

Schedule B is for incomes derived from the use of land by farmers and others, and is based on the rent paid, the assessment being one-third of the rent or annual value, including Tithe Rent charge (if any).

charge (if any). Schedule C applies to incomes derived from Government dividends and annuities.

Schedule D is for trade and professional incomes, and those not included in any other Schedule. Under this Schedule the tax is payable annually on or before January 1, and is based, not on a person's *actual* income for the past year, but on an estimate of what it is likely to be for the *coming* year (or rather on the year ending April 5 ensuing), such estimate being obtained by ascertaining the *average* of the three years ending April 5 immediately preceding that date (January 1) on which the person's accounts were made up to. The rate per £ varies according to the requirements of the Government, as indicated in the Annual Budget.

The Finance Act of 1897 enacts that where the total joint income of a husband and wife does not exceed £500, and they are engaged in *separate* businesses, if the income of *each* is under the limits within which abatements may be claimed, they shall nevertheless be entitled to claim same. Persons who pay life assurance premiums are entitled to deduct the amount of annual premium from the estimated income to the extent of one-sixth of the income by filling up the space left on the official forms for the purpose. But should the income thereby be reduced below the above limits, such deduction will not entitle to total or partial exemption.

Schedule E is for persons employed by public companies, corporations, &c. The rate of Income Tax for the present year is

The rate of Income Tax for the present year is 13. 3d. in the f_{0} under each Schedule. Relief is given in certain cases under Schedule A to the extent of $\frac{1}{6}$ or $\frac{1}{6}$ of the assessment. Under Schedule B the tax is charged at the full rate on one-third of the full annual value of the lands without any deduction.

Not exceeding £400 an abatement of £160; £500 of £150; £600 of £120; £700 of £70. The following shows amount parable on in-

The following shows amount payable on incomes varying from $\pounds 200$ to $\pounds 1500$:—

The Land Tax is payable under Schedule A of the Income Tax and is paid by tenant and deducted from rent. There is a fixed quota for each parish which, under the Finance Act, 1896, is not to exceed one shilling in the \pounds . Under the Finance Act of 1898, owners of

Under the Finance Act of 1898, owners of property whose incomes do not exceed £160 are relieved of payment of land tax, while an allowance of half the tax is made to owners whose incomes exceed £160 but do not exceed £400.

incomes exceed £160 but do not exceed £400. When land tax has been assessed, a certificate from the surveyor of taxes allowing total exemption or abatement, as the case may be, must be produced before the amount of the assessment has been paid.

The owner of any land may in any year redeem the Land Tax charged on such land by payment of a capital sum, equal to thirty times the sum assessed on such land by the assessment last made and signed, and such sum may be paid either in a single payment or by such annual instalments as may be agreed upon with the Commissioners of Inland Revenue, and interest at the rate of three per cent. per annum on so much of the capital sum as remains unpaid shall be payable with each instalment, and all the instalments remaining unpaid may be paid at any time.

Leases.—For a definite term under a year of any unfurnished dwelling the rent of which does not exceed the rate of \pounds to a year the stamp duty is 1*d*.; of any furnished dwelling, or apartment, the rent of which exceeds \pounds 25 a year for such term, 2s. 6d.

Legacy Duty.—Legacy Duty is payable on all legacies willed by a deceased person, on the following scale:—To children of the deceased, or their descendants, or to the father or mother or other lineal ancestor of the deceased, £1 per cent.; to brothers and sisters of the deceased, or their descendants, \pounds_3 per cent.; to an uncle or aunt or their descendants, £5 per cent. ; to a great-uncle or great-aunt, or their descendants, £6 per cent. ; to any person in any other degree of collateral consanguinity, or to a stranger in blood to the deceased, \pounds to per cent. Legacy to a husband or wife is chargeable with Estate Duty, but not

Legacy Duty. (See also Estate Duty.) Limited Liability Companies — The Capital of Companies with Limited Liability, otherwise than under the Companies Act, is liable to a stamp duty of 2s. for every £100. Statement of capital is to be delivered to the Commissioners of Inland Revenue within one month after date of letters patent or passing of Act, under a penalty of 10 per cent. per month for every month after the first month.

Companies Limited by Shares are liable upon the nominal capital, original or increased, to a

duty of 5s. per cent. Male Servants of any age require a licence which costs 15s. and expires Dec. 31, but a person who is bona fide engaged to serve for part only of each day and does not reside in his employer's house is exempt.

Marketable Security. -- (1) Marketable Security. (a) A Colonial Government Security, or (b) a Security not transferable by delivery, or (c) a Security transferable by delivery. The same ad valorem duty as upon a mortgage. (d) A Foreign Marketable Security issued

abroad and interest payable there if assigned, transferred or negotiated in the United Kingdom after Aug. 1, 1899. For every £10 or part thereof, 1s.

(2) Transfer, Assignment, &c., of a Marketable Security-

Upon a sale thereof, see Conveyance

Upon a mortgage thereof, see Mortgage of Stock or Marketable Security.

In any other case, 10s. (3) Marketable Security (except a Colonial Government Security), transferable by delivery.

For every £10 or part thereof, 1s. (4) Marketable Security (except a Colonial Government Security) as last aforesaid given in substitution for a like security duly stamped in conformity with the law in force at the time when it became subject to duty

For every \$20 or part thereof, 6*d.* Mortgage Bond, &c. (except a marketable security)

For every £100 or part thereof (exclusive of interest which is not in arrear), 6d.

(5) Re-conveyance, Release, Discharge, Sur-render, Re-surrender, Warrant to Vacate, or Renunciation of any such security as aforesaid-

For every £100 or part thereof, 6d. Poor Rate.—This is an important rate, as the amount of assessment for Poor Rate is taken as a basis for all other local rates. A valuation list is prepared periodically by the Overseers, and, after publication, is sent to the Poor Law Guardians. After hearing any objections that may be made, they modify the list as they think fit and sign it. It is then taken as the basis for making various rates for the ensuing twelve months; taxpayers should therefore be particular to see that the amount of their assessment for this rate is correct. An important point to note is that where the tenant does the repairs,* one-sixth of the Gross Rental is allowable for doing them, and this reduced amount is the amount on which the rate is payable. Notice is usually given of the rateable value, and not of the gross value, except in the quinquennial year, when the gross value is notified. This gross value is arrived at, in cases of leases, or where the tenant repairs and pays insurance, by adding a percentage according to the duration of the lease or agreement; thus the duration of the lease of agreement; thus, say the rent is $\pounds 60$, 10 per cent, would be added for a supposed lease $= \pounds 65$, and one-sixth being deducted from this would give $\pounds 55$ as the rateable value. The tenant seeing that this was less than the rent would be satisfied, but should there he as least should be satisfied, but should there be no lease, and should repairs be done by the tenant, the proper amount would be

Loo less one-sizth = £50. The proper time to object is before the assessment list has been signed by the Guardians; after that, the only appeal from their decision is to quarter sessions, or on structural alterations or new lettings.

Police or Watch Rate.—By the 2nd and 3rd Victoria for regulating the Police in the City of London, all premises in the City, whether occupied or otherwise, are liable for this rate. The amount payable is arranged on the basis of the Poor Rate Assessment; it varies according to circumstances, but is usually 5d. in the d. Of this 2d is payable for the first quarter, and id. each for the other three quarters. In other places this rate is included in the Borough rate (Muncipal Corporations Act, 1882), and the amount is collected with the Poor Rate.

Probate Duty Grant.—The probate duty grant to local authorities was replaced in 1894 by grant out of the estate duty derived from persona property of a sum of one and a half per cent. or the net value of the property which would, but for the substitution of estate duty, have been

chargeable with probate duty. Railway Passengers' fares. (Except fares not exceeding 1d. per mile). Urban District traffic 2 per cent.; other 5 per cent. Receipts for the payment of £2

or up wards, 1d.

The School Board Rate is levied upon the total rateable value (Poor Rate), and the amount varies according to the expenditure of the local School Board. In some places the School Board issue a precept on the Council for the

• In some places it is where the *landlord* does by repairs that the deduction is made, as it is assumed that when the tenant does the repairs he is getting the premises at a lower rental than he otherwise would.

amount they require, and the Council in turn issue a precept on the Overseers or Guardians who collect the School Board Rate with the Poor Rate

Water Rate.—This varies very considerably both in amount and in basis in different localities, but is usually payable half-yearly at Lady Day and at Michaelmas. One of the oldest London Companies is the New River Company, and the manner in which their charges are arranged may be taken in some measure as fairly representative of others.

By the Water Rate Definition Act (1885) the "Annual Value" is declared for the purposes of this Company within the Metropolitan area to be the rateable value of the premises as settled by the local authorities. If such value does not exceed $\pounds 200$, 4 per cent. is charged for the water supply; if it exceeds $\pounds 200$, 3 per cent.; services more than 160 ft. above Trinity high water mark are charged 1 per cent. extra.

A further charge is made for baths and water closets as follows :-

If annual value exceeds-

 \pounds 30 but not \pounds 50, 4s. for one w.c. or bath.

£50 £100	"	£100, £200,	6s.	"	,,

SEEDS TO SOW AN ACRE.

The following is necessarily approximate, the quantity will vary according to the nature of the soil and other conditions :-

Man and a

Lawn Grass, 35 lbs. Lucerne, 20 lbs. drilled, 15 lbs. Lupine, 3 bushels. Mustard, 20 lbs. Oats, 4 bushels. Parsnips, 8 to 9 lbs. Peas, 3 bushels. Potatoes, 24 bushels. Rape, 1 gallon. Rye, 3 bushels. Rye Grass, 3 bushels.

Rye Grass and Clover, 1 peck Grass, with 14 lbs. Clover. Sanfoin, in husk, 5 bushels. Sunflower, 8 lbs. Swedes, 4 lbs. Tares, Spring, 2 to 2½ bushels. Winter, 2½ bushels. Trifolium, 24 lbs. Turnips, 3 to 4 lbs. Wheat, 2 bushels.

SEEDING POWER OF WEEDS.

be following shows the number of seeds in a single plant of the various weeds named. This explains the rapid growth of weeds when allowed to go to seed.

orn Cockle	2,592	Shepherd's Purse 4 Cow Parsnip	,000	Corn Sow-thistle
Lusk Thistle	8,750	Common Dock 13, Oxeye Daisy 13,	,000	Stinking Chamomile

MANURES AND THEIR USE.

Name.	Suitable for	Quantity per acre.
one dust	Suitable for Grasslands, turnips, and wurzel	14 bushels.
ypsum	Clover, potatoes, grass	15 to 18 cwt.
ypsum itrate of Soda (with Salt)	Grain crops	1 1 cwt.
zruvian Guano	Crops of all kinds	11 to 3 cwt.
a pe Cake	Grain crops	
JĪt,	Wurzel, grain, &c.	1 to 2 cwt.
xda	Grain, potatoes, turnips	35 bushels.
1]phate of Ammonia (with Salt)	Grain crops] to 2 cwt.
perphosphate of Lime	Grain crops and turnips	3 to 5 cwt.

PROVINCIAL BANKING DIRECTORY

AND LIST OF

MARKET AND EARLY-CLOSING DAYS, FAIRS, &c.

N.B. - This list is expressly limited to towns having Fairs authorised by Criginal Charters, Asta of Parliament, Orders in Council, &o. Unofficial Fairs are not included.

No trouble has been spared to make the list reliable, but it has been found in practice that the owners of many of the Fair rights change the dates from year to year without authority, and in other cases authorised Fairs are not held. The publishers cannot, therefore, hold themselves responsible for loss or inconvenience which may arise from inaccuracy, but will be grateful to have their attention drawn to any apparent error.

ABBREVIATIONS USED: Days of the week-Sn., M., T., W., Th., F., S.; Ev. d., Every day. Special Days, & c. Whit., Whitsuntide; Eas., Easter; Xm., Christmas; Mich., Michaelmas; Mid., Midsummer. Months-Jan., Feb., Mar., Apr., May, Ju., Jy., Aug., Sep., Oct., Nov., Dec. b., bacon; bu., butter; c., cattle; ch., cheese; co., corn; h., horses; hi., hiring; la., lamb; pi., pigs; pl., pleasure: sh., sheen: w., wool: wr., winter: smr. summer

pl., pleasure; sh., sheep; w., wool; wtr., winter; smr., summer. The figures and letters in parenthesis after name of town indicate the Market Day, Early-closing Day and Hour, and Population in thousands (census 1901).

The figures in heavier type at the end of each paragraph refer to the list of London Banks on page 99-101, and to the list of Head offices of Country Banks on page 98, thus enabling the reader to asortain the names of all Bankers or branches of Banks carrying on business in each place.

CONSTIPATION.

DR. J. COLLIS BROWNE. N.B.-Numerous Testimonials from eminent Physicians accompany each Bottle. WHELPTON'S Sixty Years' For INDIGESTION, Success. URIFYING PILL HEADACHE.

HOROSCOPES AND PRIVATE ASTROLOGICAL CALCULATIONS.

Few persons are aware of the wonderful help and guidance obtained from an intelligent interpretation of a Horoscope, and how accurate and true are the delineations.

Mr. J. W. HERSCHELL, of FROME, SOMERSET,

will forward his circular to all applicants. He has been before the world for 18 years, and conducted a large correspondence, and calculated many thousands of horoscopes, and may be consulted on every phase of anxiety and trouble. Best work only.

106 RAPHAEL'S STANDARD WORKS ON ASTROLOGY.

The Guide to Astrology, Vol. I., cloth gilt, price 3s. A good book for beginners.
Raphael's Guide to Astrology, Vol. II., cloth gilt, price 3s. A new method of directing or calculating directions in a nativity void of abstruse calculations. Also an abridgment of Ptolemy's "Quadripartite." Also, the geocentric longitudes of the superior planets from 1892 to 1943 inclusive, being useful for reference when working directions for mundane affairs.
Raphael's Horary Astrology. Matching the Guides; price 3s. Complete in itself, and will answer questions relating to the past, present or future.
Raphael's Ephemeris each year from 1800 to 1903, 1s. each. Every one casting a Horoscope must have this for the year of birth.

RAPHAEL'S BOOK OF FATE.

A Handsome Volume of 180 pages, bound in cloth, price 1s., or post free, 1s. 12d.

CONTAINS-

The Grand Oracle of Fate. Table of the Celestial Signs. Table of Questions. The Mystical Table of Cards. Beginning of the Oracle of Fate. Fortune-Telling by Cards. Signification of different Cards. Dealing the Cards by 3, 7, 15, 21. The Italian Method of Consulting Cards. Present, Past, and Future.

To know if thou wilt get thy wish. English Method of Consulting Cards. English Method of Consulting Cards. Method of Telling Fortunes with Dominoes. Fortune-Telling with Dice. Sibylline : Questions of Destiny. The Grand Oracle of Human Destiny. Emblematical Tables of Letters. Another Method of Consulting the Oracle. Witchcraft : Remedies against, Charms, etc. The Mighty Oration for Theft. The Alphabet of Good and Evil, Truth, etc. Fortune-Telling by Tea and Coffee.

Also to match the above, Raphael's Key to Futurity, 1s. 11d., the Two for 2s. 3d.

RAPHAEL'S KEY TO ASTROLOGY.

Containing every information necessary for the practice of Natal Astrology.

Teaches the rudiments, explaining the signs, Planets, etc. Deals with the natures or influences of the Planets. Shows how to judge a Nativity. Explains "Directions," or the calculations of future events.

Bound in cloth, price 1s.; post free, 1s. 11d.

RAPHAEL'S BOOK OF DREAMS.

A Handsome Volume of 180 pages, price 1s.; post free, 1s. 11d.

It contains the Interpretation of every Dream by a true and correct method.—Be particular that you get RAPHAEL'S.—Refuse to take any other.—Thousands of Dream books sold as mine I never saw, which contain nonsense, and are compiled by those who do not understand anything about the interpretation of them; generally larger books, but absolutely useless, and to buy them is throwing money away.

RAPHAEL'S LESSONS ON ANIMAL MAGNETISM

(Manuscript). 7s. 6d.

Besides other information, the Lessons contain the following :- How to develop the magnetic besides other information, the Lessons contain the following :-- Flow to develop the magnetic power in yourself; how to operate on others; how to mesmerise animals, vegetables, water, furniture, etc.; how to produce sleep and clairvoyance; how to remove pain from one person to another; mental impressions, thought-reading, etc.; also, how to remove pains almost instantaneously; rheumatism, etc.; how to treat deafness, insanity, and mental affections; how to magnetise paper, water, flannel, cloths, baths for cures, etc.

W. FOULSHAM & CO., 4, Pilgrim St., Ludgate Hill, London, E.C.

READ THIS.—It may mean Life, Success and Happiness to Medical Science has conclusively proved You.

that the Nervous System controls all the functions of the body, therefore all diseases are started by loss of Nerve force, and to build up again the Nervous system is the only way to throw off the enemy. The Brain is to the body what the cylinder is to a steam enginethe moving power. We have a well-tried servant who will reach and fulfil what is desired of him. Our Remedies have proved in thousands of cases that they build up the Nervous System-and that the special compounds for the Blood tissues and other functional parts do their work in harmony. Small sizes, each remedy $1/1\frac{1}{2}$.

SPECIAL OFFER. A

To bring **OLD MOORE'S INVALUABLE REMEDIES** more forcibly to your notice, and induce you to give them a trial, we make a Special Offer of a 4/6 Remedy, of any one kind, for 2/9, postage paid.

We do this knowing that where we can introduce our Remedies into a Household, their benefiting value will give them a lasting recommendation to you and your circle of friends. In ordering, please use the attached Coupon Order.

OLD MOORE'S FAMILY PILLS. Headache, Varicose, Indigestion, Liver Complaints, Piles, Constipation, Flatulence. OLD MOORE'S RHEUMATIC PILLS. Sciatica, Gout, Lumbago, Rheumatism, Neuralgia. OLD MOORE'S BLOOD PILLS. Debility, Heart Disease, Obesity, Dropsy, Influenza, Skin Diseases. **OLD MOORE'S NERVE PILLS.** For Worry, Overwork, Hysteria, Vitus' Dance, Toothache, Depression, Debility, Loss of Vitality, Paralysis. Piles, Wounds, Scalds, Ulcers, Sores, Chilblains. OLD MOORE'S OINTMENT. OLD MOORE'S CORN REMEDY. Bunion Cure.

CHARLES LETTS'S OFFICE & SCRIBBLING DIARIES.

All the following Diaries contain the £1000 Insurance. The "Best Cloth" and "Best Scribbling Editions" (Non-Interleaved Editions), are, with the exception of those marked *, fitted with our Patent Self-Opening Blotting Tablet ; this device not only ensures the book instantly opening at the place in use, but also, for all practical purposes, secures the advantages of an Inter-leaved Diary, without the extra expense and increased bulk. The Interleaved Editions of these two series are, with the exception of those marked *, fitted with a Self-Opening Tablet made of erasable slate, giving daily space for record of the week's engagements.
