

AVEA® ventilator

Maximize your investment while minimizing cost

Hospitals today need cost-effective ventilation solutions. The AVEA® ventilator is a critical care ventilator for neonate to adult patients that you can upgrade with the latest market innovations and technology. This modular design helps continuously maximize your investment while minimizing costs.

AVEA upgrade part numbers

Part no.	Description
12283	AVEA upgrade kit, gas delivery engine and user interface module
12284	AVEA upgrade kit, gas delivery engine
12285	AVEA upgrade kit, user interface module
63865	Software key – Volume Guarantee and nasal CPAP/IMV
63733	Software key – Volumetric Capnography

Interoperability upgrades

The CareFusion approach to ventilator therapy extends beyond ventilation. Unlike other respiratory care companies, CareFusion offers a new system approach to ventilator therapy that combines our industry-leading platforms with new interoperability, analytic software, markers and retrospective reporting.

Respiratory Documentation Application: A handheld positive patient identification application that helps collect ventilator documentation data at the point of care to enhance vent check accuracy and efficiency.

CareFusion Knowledge Portal: An analytic and reporting tool that enables hospitals to measure clinical and process variability and aids ventilator-associated condition (VAC) reporting.

To identify your current AVEA ventilator configuration and optimum upgrade options, contact your local sales representative.
