TELEPHONE CO.

"CUTS IN" NEW SERVICE MON.

On September 22, 1941 the Northern Ohio Telephone Company will convert the Plymouth Exchange from the present magneto service to a modern type known as the common battery or central energy system. The office will be located on the first floor of the telephone building which has been recently remodeled and will be in charge of Murlie Vinson as local agent, Mr. W. O. Heabler, District Manager of Willard stated today. This new type of service will be much appreciated, since it will only necessitate lifting the receiver to get central.

The Plymouth Exchange is one of the oldest exchanges in the Northern Ohio Telephone Company's system and was among the group, namely, Willard, Plymouth, Havana, Greenwich, New London and Monroeville district to be taken over and made a part of the Frank A. Knapp properties at the turn of the century.

Until 1927 the local exchange was known as the Huron County Telephone Co. and during that year Mr. Knapp reorganized his holdings and incorporated under the name of the Northern Ohio Telephone Company.

Remodeling of the office was started last December and the conversion of the equipment shortly thereafter, but due to the inability of the company to get equipment has delayed the completion of the work until now.

Improvements in other exchanges of the system are also being held up because of the fact that telephone companies have no priority ratings for equipment and supplies with the government.

In 1930 Plymouth had 312 telephones and in 1933 dropped to 201. Since 1934 the local exchange has enjoyed a steady growth and at the time of the cut-over they will have gained back 96% of their loss or 91 stations for a total of 292 telephones.

388 PUPILS ARE ENROLLED HERE

A SLIGHT INCREASE SHOWN OVER LAST YEAR'S ATTENDANCE.

Vacation time was over for 388 students of the Plymouth school district when the school term began a Monday morning. Enrollment shows a slight increase over that of last year and six or eight more students are expected to return this week.

The enrollment, according to classes, are as follows: First, 40; Second, 30; Third, 32; Fourth, 33; Fifth, 41; Sixth, 37; Seventh, 44; Eighth, 34; Ninth, 25; Tenth, 30; Eleventh, 27; Twelfth, 26; Post Graduates 3.

The students were greeted by many changes when they arrived at the high school. The grade room from 10 to 14 have been moved to the second floor. Partitions in the old commercial room, and study hall have made it possible for each grade to have a separate room, which is a decided improvement over last year's arrangement. All high school classes are meeting downstairs where use of the front corridor and main hall training room have greatly helped crowded conditions. Thus far a great improvement has been noted over last year's set up and the students have quickly settled down to their work.

Parents are cordially invited to visit the school and to see how well facilities have been arranged to take care of the students needs this year.

In the Ann Arbor News of Ann Arbor, Mich., in a recent issue was a splendid picture of Vance Wood, Middletown, and an article relating to his work that will be of interest to many in our community.

All the women of Mt. Hope Missionary society were grateful

and appreciative of the cooperation of the Ladies Aid for the clean basement, the table cloths and flowers for the occasion. Also those who were unable to attend but contributed bouquets.

MUST OBEYANCE ORDINANCE

BICYCLE RIDING ON SIDEWALKS PROHIBITED; TO ENFORCE LAW.

Many years ago as far back as '88, Shiloh boasted of their side walks. Nearly all were board walks, in good repair and a few were concrete. At that time bicycles made its appearance. The walks were the proper place to ride, so thought the boys, and it was good reasoning, because Main street in town had to be scraped regularly in order to keep the ruts closed.

And during the rainy seasons and winter the road was almost knee deep with mud. Property owners complained that bicycles were worn out, they walk, actually tearing the nails right out of the boards. The result was that the town council met and passed an ordinance prohibiting the riding of these destroyers on the side walks. And what did the boys do? They thought of their own council as being regular "dads" and with true sportsmanship smiled and obeyed. Nearly all of those boys became prominent citizens, here and in other states.

Again in about 1910 for riding on sidewalks, struck the town, and again the town council reviewed its ordinance and said, "No more riding on sidewalks," and they thought of their own council as being regular "dads" and with true sportsmanship smiled and obeyed. Nearly all of those boys became prominent citizens, here and in other states.

Here's hoping that every boy will place a value on safety, civic pride and sportsmanship and respect the laws of the town, because they are working for the welfare of all and for very little compensation.

BIG CATCH
We have a lot of fishermen in town and occasionally some big fish stories. Here's one from a local native, a young fellow, Thomas Ruckman of Seattle, Wash., recently went fishing in the bluest of blue waters, Puget Sound, and caught a 20 pound King Salmon.

Avacation Trip Through "The SMOKIES"

(By J. E. LaDow)

(Continued from last week.)
Editor's Note - This is the last chapter of a story written by Mr. J. E. LaDow, of Mansfield, who recently visited the Great Smoky Mountains.

A program of naturalist-guided field trips with lectures is obtainable from June until the middle of October each year, which are free and they are maintained by the federal government. Plant and animal life is discussed; illustrated lectures often given during the evenings, mostly at the hotel in Gatlinburg, to acquaint tourist visitors with the natural history shown by the Great Smokies.

The United States is perhaps the only great nation that has set apart and maintains a national park system. There are now 11 nationally important recreational areas conserved and set apart for the inspiration and education and benefit of its people, which consist of over twenty-one and a half million acres, so the Interior Department informs us, to be of no charge for entrance in excess of sufficient revenue to pay for upkeep.

The system depicting by striking examples the great truths of nature and science and the progress of civilization in this country, as an instance the Grand Canyon of the Colorado which is a mile deep groove in the earth and has fantastically colored eroded rocks; the Yellowstone of Wyoming, world-famous for its geysers and hot springs, and the incomparable Yosemite Valley of California; Catalba Caverns of New Mexico, the largest yet discovered; the Mammoth Cave of Kentucky with its magnificent subterranean labyrinth; the tracts of Sequoia and California, the oldest living things on earth. These are the kinds of scenes that are truly conserved by the National Parks system.

The foregoing is part of the pattern making. On the staff at present in the pattern dept. are Markley, N. B. Wannamaker, Lotland and Dorian, while the carpenter shop we found Bob Hunter and "Red" Burns on the job.

IF THE AMERICAN TOBACCO Co. ever needs an auctioneer on its radio broadcast we'll gladly refer them to Bob Kuscine, over in the foundry. I heard him the other day on the radio, and he's better than the real McCoy in singing that chant... sold American.

VERA TELLS us her father has been quite ill during the past few months, but that he now shows slight improvement. Hurry, Robbie, and get well, for we miss you Saturday and Wednesday nights on the radio.

BETTY SAYS it wasn't a draftsman that wanted to know where the War Department was located, but states "that it was the super-duper chief engineer." This somewhat clarifies the situation, at least for this week.

IT DOESN'T cost anything to be courteous—even to those whom you dislike.

WALTER CRUM, ventilating expert and goat specialist, is in Chicago this week attending the National Goat convention. Crum says: "I like goats better than most people, because goats have a sense of humor, especially when they're chewing on a tin can." In fairness to Walter, we'll admit it wasn't his idea of putting a fan on the top of a goat's head. Let everyone should feel better and the cooling system should be a thing of the past.

STOPPED IN ON Harold Ross at the Standard Filling Station and he sends his regards to all the boys at FRH who are filling up with Sohio, Harold, as you know, was called by the paint department of the loco div., and he likes his new work very much.

DON SHAVER says he's going to will the village his \$1475, horn, and hopes it will help to keep the town alive.

MY THOUGHT for the week is as follows: "He who waits to do a great deal of good at once, will never do any."—Dr. Johnson.

Mr. and Mrs. Roy Johnson and children, Miriam June and Buddy returned home Sunday night after spending a week at LaVallette, and from time to time, we'll bring to you some of the intricacies of

bodiment of some of the arguments before Congress leading to the passage of the Bill enacted into law twenty-five years ago in 1916.

The principles were first explained by Hon. Cornelius Hodges, before Congress leading to the passage of the Bill enacted into law twenty-five years ago in 1916. Be Wise . . .

It is the height of folly to blow every dollar earned — to spend to the last cent every month.

In the spring time of life, we sow seeds of thrift — (save part of our income.)

Middle life is the harvest period when the seeds of thrift bring a harvest of success and prosperity. The winter of life follows and fortunate are they who have stored away something for this period.
