Company Summary

We are one-stop solution for web development , design and IT related services.

At United Solutions, we have handled complexities, demands, specifications and challenges with great care, passion and confidence.

What We Do!

Designing, Installation, Implementation, Running, Maintenance, Supplying many Softwares & Equipment

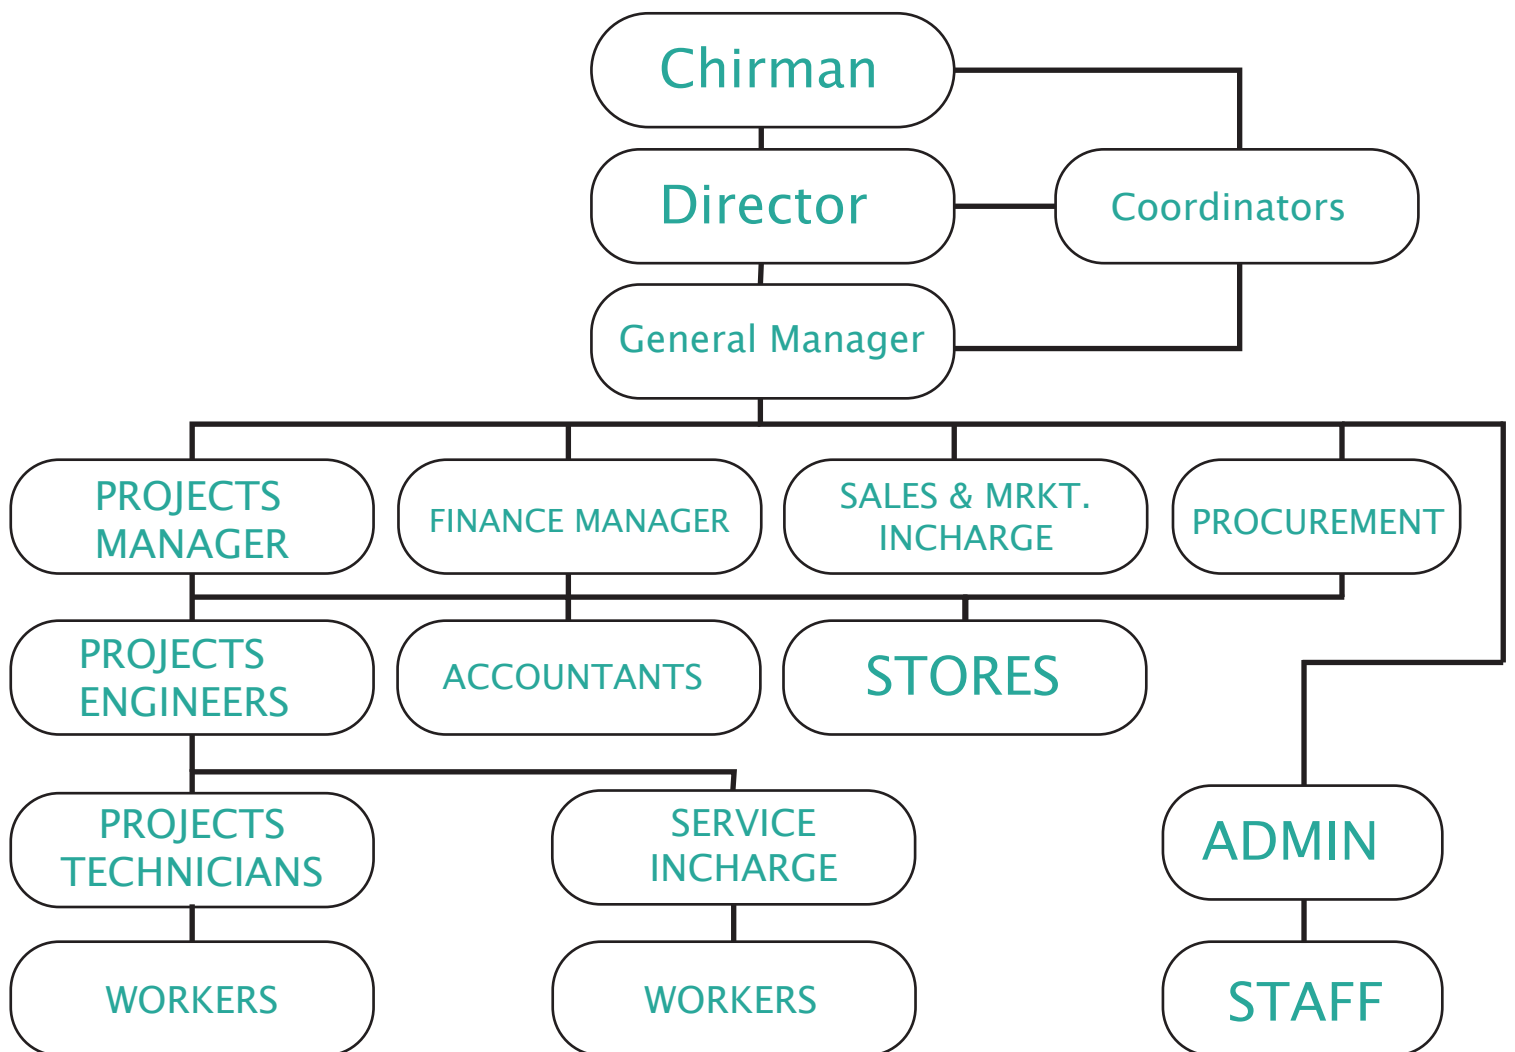

1. ERP (Enterprise Resources Planing)
2. IT Infrastructure (CCTV, Access Point, Networking)
3. Websites Designing
4. SMM (Social Media Management)
5. Mobile Apps
6. Validation and Verification and Testing Systems
7. E-education
8. Queuing Systems
9. Intruder Alarm System
- 10.TV Systems
11. Time Attendance & Bio Metric System
12. Fire Alarm Systems
13. GATE / ROAD BARRIERS
- 14.Access Control System
- 15.Metal Detectors
- 16.Turnstile system

Our Strength

A strong Infrastructure with competent Developers, Programmers, staff and Management professionals.

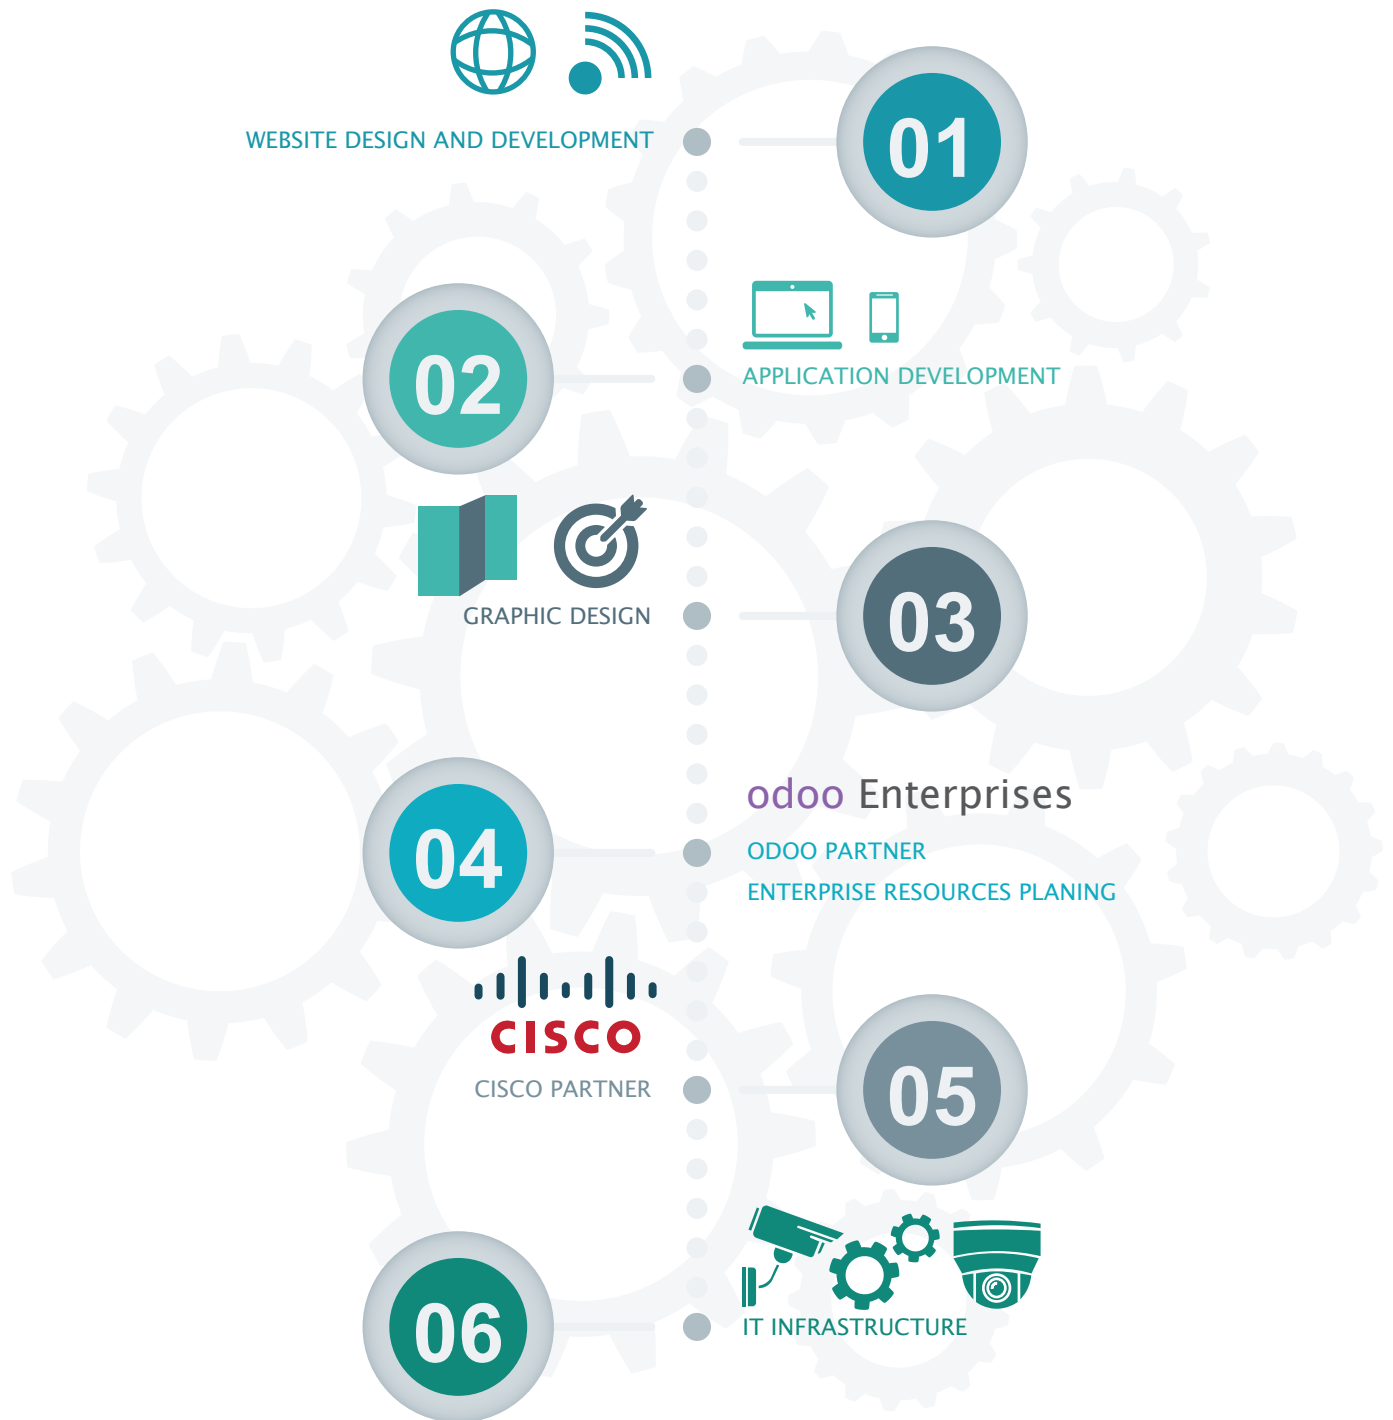

Organization Chart

A strong Infrastructure with competent Developers, Programmers, staff and Management professionals

Our Services

A strong Infrastructure with competent Developers, Programmers, staff and Management professionals

Our Services

★ Website Design and Development

We believe that a truly professional and well designed website can prove to be an effective marketing tool. It can also work towards enhancing the business and profit prospects of an organization. Hence our team of professionals concentrates on providing the ultimate when it comes

★ Application Development

We also provides a truly responsive applications, either for Android or for IOS. We only believe in doing our work with full dedication. Our clients are satisfied with our team of professionals. Hence we are only concentrating on providing best services.

Our Services

★ CCTV

We are supplying, Installation, and Maintenance of CCTVs and surveillance systems for homes, offices and government provides physical security, remote monitoring, intrusion detection and all-round protection to meet the security concerns for people, assets and systems.

★ Graphic Design

Today is your day. It's time to stop thinking about your website, brand, business cards or promotional materials and actually start creating them. Whether you're a shiny new business, or you're ready to become one; United Solutions Graphic can deliver the creative oomph you need to get started in a big way. We'll get those brilliant ideas out of your head and into the market - so you can start making your dreams a reality.

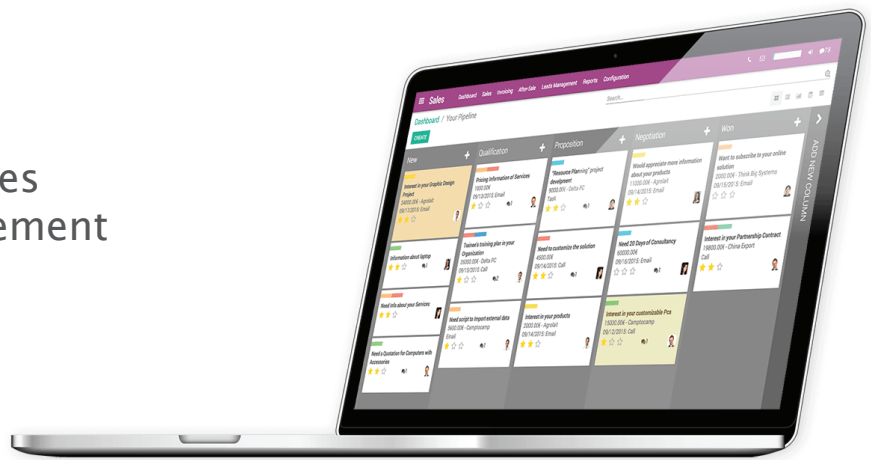

Our Services

★ odoo ERP

We provide Odoo ERP. you can't build the business of tomorrow with a legacy system. Grow your business smarter, faster, and more reliably with Odoo ERP Cloud.

Accounting
Sales
Human Resources
Projects Management
Inventory
TimeSheet
and more...

One Need, One App

2 Million Users
Grow their
Business with

odoo

Our Services

★ Cisco Partner

Access technical and sales training Leverage Cisco co-branded marketing materials and services to drive incremental revenue Training increases your ability to successfully sell, design and deploy solutions: To assist you in your marketing and to generate incremental opportunities for your business you will have access to customizable.

★ IT Infrastructure

we are in United Solutions doing any IT related Services for all Establishments, We can Supplying, Installation, Runnig, Setting and Maintenance for all IT Equipment & Systems.

Technique for everything

Our Services

★ GATE / ROAD BARRIERS

A road barrier is the most functional and at the same time attractive solution for controlling public and private vehicle transit and access to rest areas, even with high traffic volumes. Barriers are designed to professionally control every type of access:

car parks, shopping centers, hotels, hospitals, exhibition centers, amusement parks, airports and railway stations, as well as all other types of small or large public facility.

Our Services

★ Access Control System

Access control enables you to control who has access to your building. Locks and keys also allow you to secure your building, but when keys are lost or stolen, the inconvenience and expense of changing locks and re-issuing keys can be considerable. Keys may also be copied, creating even more security risks.

All businesses, whether small, medium or large, have assets that need to be protected from theft. There is also the issue of protecting staff and their property. It is common in buildings that are secured by locks and keys for doors to be left unlocked all day. This opens up the possibility of opportunist theft and malicious damage.

Our Services

Access control can also offer flexible control over users' access rights. For example, all staff can gain access through the main door of a building, but access to internal areas may be restricted to those who have a specific need to be there. Access may also be restricted by time, only granting access to particular users at certain times of day or night.

Access control offers a secure, convenient, flexible and cost effective way of controlling who has access to your building and when that access is allowed. Access control gives organizations the security they need.

Our Services

★ Time Attendance & Bio Metric System

Time and Attendance software reduces the risk of human error and ensures an easy, impartial, and orderly approach in addressing specific needs without any confusion. In fact, Time and Attendance software has been shown to have an accuracy rate of more than 99% versus manual systems by eliminating errors in data entry and calculations.

Time and attendance software together with biometric data collection devices may be used to control employee access to certain areas within a facility and track employee entry. Biometric data collection devices eliminate buddy punching and also help reduce costly liabilities, including theft of equipment or property.

Productivity increases because the process is seamless and makes day-to-day operations more efficient and convenient. Eliminating legacy practices frees up employees' time, decreases staffing overhead, and provides supervisors with timely labor data to more effectively manage their operations.

Our Services

Implementing a technology based time and attendance solution with biometric devices will immediately help to reduce your labor costs. Manually collecting, managing, calculating and processing time data to process payroll can take a lot of time, but with an automated time and attendance solution, companies are able to increase efficiency and save money.

Time Attendance is the best time tracking tool available for restaurants, retail businesses, hotels, motels, and other businesses involved in the hospitality, retail, and food-service industries. Whatever your needs are, Time Attendance can accommodate them.

Our Services

★ Metal Detectors

A metal detector is an electronic instrument which detects the presence of metal nearby. Metal detectors are useful for finding metal inclusions hidden within objects, or metal objects buried underground. They often consist of a handheld unit with a sensor probe which can be swept over the ground or other objects.

Metal detectors are used for airport and building security to determine whether guns, knives, or other weapons are being transported onto aircraft or into public buildings. The technology and efficiency of a security metal detector is much more advanced than that of an amateur treasure-hunting detector. There are two types of security metal detectors: the walk-through detector, and the wand detector.

Our Services

★ Turnstile system

A turnstile, also called a baffle gate or turnstile, is a form of gate which allows one person to pass at a time. It can also be made so as to enforce one-way traffic of people, and in addition, it can restrict passage only to people who insert a coin, a ticket, a pass, or similar.

Thus a turnstile can be used in the case of paid access (sometimes called a faregate or ticket barrier when used for this purpose), for example to access public transport, a pay toilet, or to restrict access to authorized people, for example in the lobby of an office building.

24 x 7 Support

We strongly believe that our customers will be able to realize higher value from our products and services if they get requisite service and timely support. In line with our vision, we are fully committed to customer service and provide support in various ways.

Vision

To Be The First Creative Choice for Technique for Everything

Mission

Excellence in Work, Prompt Action, Keeping Clients Requirements Confidential and Clients Ultimate Satisfaction
