

WILLIAM BERKSON

FIELDS OF FORCE

THE DEVELOPMENT OF A WORLD VIEW
FROM FARADAY TO EINSTEIN

ROUTLEDGE AND KEGAN PAUL
LONDON

<i>Preface</i>	ix
<i>Introduction</i>	
The place of field theory in the history of science	1
Science and the mystery of the universe	4
Meyerson's theory of scientific explanation	5
The insolubility of the mystery of the universe	7
Science and metaphysics	10
Problems and the advance of science	12
1 <i>Faraday's Problem Situation</i>	
Faraday's aim	16
Competing world views: Newton	19
Anti-Newtonian metaphysics	23
Science in Faraday's time	28
Attractiveness of anti-Newtonian ideas to Faraday	31
The discoveries of Oersted and Ampère	34
Faraday's discovery of the electromagnetic rotations	39
Explanation of the electromagnetic rotations	46
2 <i>Faraday's New Metaphysics and the Discovery of Electromagnetic Induction</i>	
Faraday's innovation in metaphysics	50
Faraday's attitude toward metaphysics	55
The influence of Faraday's metaphysics on his science	58
Problems leading to the discovery of electromagnetic induction	60
The discovery of electromagnetic induction	65
Experimental researches in electricity	67
Revision of the theory of electromagnetic induction	68
3 <i>The Search for a Crucial Experiment</i>	
Electrochemistry in Faraday's time	74
Faraday's principal discovery in electrochemistry	77
The discovery of specific inductive capacity	81
The introduction of unified field theory	86

Applications of the theory to electricity	88
Rotation of a ray of light	93
Diamagnetism: its discovery	96
Thoughts on ray vibrations	97
Theory of diamagnetism, and arguments	100
4 <i>Faraday's Field Theory</i>	
Physical lines of force	104
Last experiments	109
Gravity	112
Problems in Faraday's theory of force	116
Conservation of force	119
Summary of Faraday's contributions to field theory	124
5 <i>Maxwell's Problem Situation</i>	
Introduction	126
The action-at-a-distance theories, and Ohm's law	127
Conservation of energy	131
William Thomson (Lord Kelvin)	136
Maxwell	139
'On Faraday's Lines of Force'	141
6 <i>Maxwell's Field Theory</i>	
'On Physical Lines of Force'	148
Maxwell's mechanical model of the electromagnetic field	152
Mechanical and electromagnetic quantities	155
Laws of the electromagnetic field	158
The electromagnetic theory of light	163
The velocity of light, an electromagnetic constant	165
The unsatisfactoriness of 'On Physical Lines of Force'	170
'A Dynamical Theory of the Electromagnetic Field'	172
Development of the theory without the mechanism	176
Maxwell's attitude toward the interpretation of his theory	180
7 <i>Questions Raised by Maxwell's Theory</i>	
The changed problem situation in metaphysics	185
What is charge?	189
Current without charged particles	194
Oliver Heaviside	197
The problem situation as Helmholtz saw it	205
Helmholtz on open currents	206
Helmholtz's influence in England and on the Continent	209

8	<i>Hertz's Discovery</i>	
	Introduction: The discovery of rapid oscillations	213
	Electromagnetic induction between open currents	217
	The idea of electromagnetic waves	222
	Detecting the field	228
	The idea of the experiment	231
	The experiment	235
	Reflection of waves	236
	The impact of the experiments	240
	Crucial experiments	241
	Guides to research	247
9	<i>Lorentz</i>	
	Ether theories: problems of the ether	256
	Ether mechanics	258
	The ether and moving bodies	261
	Michelson's experiment	265
	Lorentz: the creation of the theory of electrons	268
	Lorentz's transformations	274
	Problems and discoveries in the theory of electrons	280
	The new mechanics	285
10	<i>Einstein</i>	
	Einstein's problem situation	291
	The philosophical part of the problem situation	294
	Relativity: the new point of view	296
	The relativity of simultaneity	299
	The deduction of the relativistic transformations	302
	Applications of the transformations	305
	The novelty of the theory: why relativity is difficult to understand	308
	Examples of Lorentz's and Einstein's interpretations of relativity	314
	Thoughts on Faraday, Einstein and the ether	317
	Faraday versus Einstein	323
	Conclusion	330
	<i>Appendix: Other Books on Field Theory</i>	331
	<i>Notes</i>	340
	<i>Name Index</i>	361
	<i>Subject Index</i>	364
