ICT/COMPUTING SKILLS

The Avanthi Institute of Engineering and Technology's internal quality assessment cell (IQAC) has received input from students from all departments about programs that use ICT tools, and in order to develop computer abilities, as a result numerous programs have been run utilizing ICT tools.

Higher education systems have grown exponentially in the last few decades to meet the demands of quality education for all and the last two decades has witnessed the inclusion of ICTs for innovative teaching. Though it is a challenge to holistically integrate the technology in the management and delivery of learning programmes it has become absolutely necessary. It significantly contributes to good quality education and leads to improved student learning and better teaching methods. The introduction of ICTs in the college has had profound implications in the teaching process especially in dealing with key issues of access, equity, management, efficiency, pedagogy and quality. Every faculty is provided with a Samsung Tab and the class rooms have the necessary ICT required infrastructure for optimal usage of the ICT tools.

In order to enhance student skills various programs are conducted under **soft skills, language and communication skills, and life skills along with ICT /computing skills**. The following are the different programs conducted using ICT tools such as LCD projectors, smart boards, internet, you tube etc
