

AGUAZ

Reliability, Performance, Purity

AGUAZ WATER PRIVATE LIMITED
visits us at www.aguaz.in

AGUAZ is a fully automatic compact standalone unit which purifies, chills and dispenses water. It is designed keeping in mind to improve water quality and sanitation standard in school, colleges, institutions, and hospitals, public places etc. Aguaz keeps 24 x 7 eyes on water quality remotely and can be controlled remotely. It is a perfect compliment for digital India campaign and smart city or village project. Aguaz has got several sensors to fetch real time data of TDS, Temperature, PH, water level in Tank, Dispensed quantity. It is just to ensure every drop of water dispensed is pure. Water ATM machine in it can do transaction through all Indian coin and Card to dispense water. We can set price of water with quantity as per demand. Machine Data can be accessed and controlled by client through mobile app or web. Besides keeping an eye on water quality client or Aguazteam can control TDS, Temperature of water, quantity per dispense manually through mobile app.

Water Tank of cooler in schools, offices etc are not cleaned regularly which results in deposit of microbes on walls that can be felt by touching inside wall of tank (feel sticky or deposits white layer). Aguaz has got an exciting feature of auto cleaning product water tank that can be scheduled by client or Aguazteam through mobile app.

Aguaz has auto temperature control feature for water cooling which reduces water temperature 12 degree lower than ambient temperature. It makes water drinkable in all weather. It has touch-less dispensing for better user experience and makes it hygienic.

Clean Drinking Water For India

Aguaz Water ATM 1000 LPH

Water Purification Capacity: 1000 LPH
 Fully automatic: Yes
 Number of Dispensing point: 04
