Dear Campus Community,

As part of the Central Utility Plant Replacement (CUPR) project, new solar photovoltaic (PV) panels will be installed in parking lots <u>P5 and P6</u>. These canopies, in addition to providing shaded parking stalls, will generate 4.5 MW of electricity during peak hours, which will help to reduce the campus' reliance on the electrical grid.

The work will start on January 5 and will continue in <u>phases</u> throughout the spring semester. ADA parking will be temporarily relocated to $\underline{P5}$. A portion of P5 will be fenced off throughout this work to allow for storage.

Please share with any fellow colleagues and students who would benefit from receiving these updates.

Additional Resources:

- For up-to-date ADA pedestrian path of travel during this project, be sure to access the interactive map available on Facilities Management website or the Fresno State Mobile App.
- Contact Facilities Management at 559.278.2373 if you have any questions. Feedback can also be provided here.
