1. INTRODUCTION

This report describes the current Baseline NADIN subscriber data base in terms of existing terminal types, population, and circuit configuration for Service B; National, Pacific and Caribbean AFTN. Also, included is current Service A weather and request reply subscriber data.

It is recognized that this data base is dynamic and subject change. Therefore, this report will be updated periodically to reflect these changes.

2. DATA BASE DESCRIPTION

A print out of the current data base is given in Appendix A. The structure is one record (one line of print) per terminal. Each record contains (from left to right).

- . Location name
- . Location state
- . Terminal type
- . Three character identifier
- . Circuit number
- . Type of facility
- . Telephone Co. V&H coordinates
- . Latitude and longitude
- . *Current circuit activity (in messages entered per hour)
- . Projected circuit activity 1984 (in messages entered per hour)
- . Date listing was compiled
- . *Entries of 0.000 indicate no data available
