A Know-Nothing Country.

In a recent issue, the editor of the Alban of islands that dot the blue Pacific, just off the castern shore of Asia, upon whose snow-capped mountains, tall eamphor trees and quaint, fantas tic houses, the passing mariner gazes with euri-In those islands is the Paradisc of Nativism: the Utopia of "Sam." The doctrines of the Know-Nothing order have been in full faith and force there f r seven hundred years. No foreign foot may tread that soil: no foreign eye profane its sights. Foreigner and Devil are evnonymous terms in the language spoken in that happy realm. There are no emigrants there: no Naturalization Laws. There is no "Foreign Vote" The mace of office is wielded by native hands alone. The one great, fundamental principle of ernment is, that none but Japanese she'l rule

The foreign ship that puts into those quiet herbors, in famine or distress, is warned by lev elled matchlocks to up anchor and heave about The American seaman who is shipwrecked on those sunny shores is straightway put in prison as a thief. The stranger who begs there fo bread invariably gets a stone-sometimes a dozen or two at once. For, as the Japanese benev elently remark, "What business have the d-d foreign paupers to come here!"

None vote in that fortunate Empire but men bers of the Grand Council, and they are sworn always to vote as the Spiritual Emperor bids hem. But if one votes according to his own private judgment, they only publicly placard him aitor, and brand, condemn, and execute him. And it is astonishing what unanimity of sentient exists on most occasions between the Spiritual Emp ror and the Grand Conneil.

T anks to vigilant exertion, it is believed that there is not a copy of the Douay Bible in the Empire. There are no Catholic orphan asylums and no convents in that favored clime. Such l'ttle vagrants as have not devout Japanese parents are left to starve in the streets-that ourse being conducive to the great glory of God, and the stability of true religion.

LOUISVILLE WEEKLY COURIER, Kentucky Hemp-Naval Purpo-

Hon. R. H. Stanton, senior editor of the May ville Express, by his long experience in Conge is well-qualified to speak understandingly of the cause preventing the use of American home in our navy. He save in a recent number of his paper that he is well convinced that it is not be cause our hemp is inferior in quality, or that our farmers are not experienced in its culture and preparation, that it is excluded from use i the American navy; but because there are othe interests and influences which conflict with ours, and entrol the action of the authorities. Th law now requires that American hemp shall be obtained provided it is of equal quality and costs no more than the Russia article. Yet, strang o say, the Department at Washington has amon ts records the evidence of its superior streng

and durability; is well advised of the extent t which it can be produced, and of the fact that : can be produced by our farmers at a much les cost than the foreign article, and has not for two outy and longing. The Enchanted Isle of the veers longht one single jound of the America article for naval purposes! During the greate part of these two years, the Russian Lemp pur chased has cost near \$500 per ton. The reason of this strange result any one may find out, if he will take the trouble to visit the Naval Burers a' Washington, and make the necessary explorations. Let him exhume some of the must

records, see who are the merchants who suppl the Department with hemp, where they resid hew long they have enjoyed the meno oly, and what influences keep them in favor. Let him demand copies of the instructions sent to the comp agen's at Lexington and St. Louis, and read the embarrassing and utterly impracticable quisitions made of these officers in the purchas of our farmers, and he will not be long in finding out the reason why American he ap is not used in the American navy.

If the Navy Department will make a contract for the purchase of all the hemp needed in the Navy, which is about six hundred tens per year. the farmers of any three of the good henop coup ties in Kentucky will take it, and agree that it shall be equal to the best Russian article, an bear a test of 200 lbs more than is now required of the foreign article; 4,200 lbs is the departmental standard for naval hemp, and our best article will average from 4,500 to 4,900, as has een proved by tests nov on record in the Navy epartment. Such a contract would be taken too, at a cost less than the average price paid for Russia hemp by the Department in the last three cears. If the Deportment has no authority to make such a contract, Mr. Mallory can easily have such authority conferred, and we commen to him these suggestions, that he may direct his attention to the subject

CONDITION OF NEW ORLEANS .- The influence which the railroads, now penetrating the West, re exerting upon the commerce of New Orleans is beginning to excite a good deal of attention i that city. The New Orloans Daily Delta was tive first to publish the fact that the exports from Orleans exhibited a decline too remarkable to be unwillingness to serve under any but a Republieconnted for by the scarcity of breadstuffs, and other domestic products during the past year. The Delta takes up the annual statements of the commerce of New Orleans for the year 1853. '4, '5, and shows, by incontestible evidence hat the exports "for the year ending June 30th.

\$53, amounted to \$98,988,166; in 1854, to \$83,-926,728; in 1855, ro \$82,332,102-a decrease in two years of sixteen million of dollars." The ause of this diminution in the export trade is very justly attributed to "the railroads construct ed by Northern, Eastern and Western enter prise, which have tapped the tributaries of the dississippi within the last two years and a half, and transferred to their own routes the produce and freight whic's used to find its natural enrepot' in New Orleans."

At the outset the novelty of the whole scene, and the constant recurrence of new objects to be looked at, banished all hought of our unusual position. We had no poportunity, being engaged so busily otherwise, enjoy the sensations said to be incident to norices in such excursions. As a matter of course, herefore, we were deprived of those emotions onmon to a departure from this terrestrial phere. Indeed it is not necessary that we hould gloss over the truth in denying the absence of fear. Swinging in mid air several thouarrier between safety and destruction, we were

BRIDGE OVER THE GASCONADE BROKES TEN CARS IN TWENTY FEET WATER

(From the St. Lou's late' pe cer. Fr. a,]
Messrs. Rumbold and Bisnop, well known citiens of St. Louis, came to our office last evening aster, which happened on the P che Rallros esterday, between one and two o'c c's o the excursionists to Jefferson City. W. o language at command to expression to receive or have occasion to receive or have occasion to renore shocking intelligence

The gentlemen who bring the sad things were on their way to the city as passengers on the Ber Bolt, and saw the train of cars pass up with the company on hoard and exchanged salutation The boat soon came to a landing and the train proceeded on to the Gasconade river, about eight miles distant. Before the boat was ready to eave a locomotive, which had followed the tri r the purpose of rendering assistance in cas of accident or of seeing that all was right along the road, came hack from the river with the word that the hridge over the Gasconade, standing hirty-five feet above the water, had broken dow while the train was crossing, and that ten or eleven cars, with their occupants, had been pre-cipitated into twenty feet water. The consternaon of the men with the locomotive was so gree hat they could barely announce the fac, only adding that they thought at least one hundred and fitty persons had got out of the cars to walk over the bridge. There were probably five hundred persons in the company. Two of our mattery companies were along, the Grays and the National Guards, as were also many members of the press

nd private citizens. The locomotive came down to the train bound for St. Louis, which was immediately taken by he Surerintendent and his men back to the seen saving many lives.

Messrs. Rumboid and Bishop at once prevailed upon the ticket agent and engineer, at Hermann, to come immediately to the city with the news, which was consented to, and a locomotive and paggage car were despatched, on which our in firmants took passage, to bear the mournful tilings to the friends who had with joyous hearts out just before, as it were, bid fathers, brothers susbands and associates God speed, and regret

ng that they themselves were not of the party. The gentlemen deserve much eredit for the comptness with which they acted in getting to ne city with the heart-rending news. They also tate that the Ben Bolt would lay-to at Miller's anding until something more was heard from the scene, and hold herself in readiness to take on the wounded and bring them to the city. The Polar Star was also expected along every momentand would of course stop at Hermann, where rould be in her power to render assistance, which

we hope, has been the case.

As we are writing we hear that an expres train has gone up the road, and we defer any fur ther statements or comments until its return o ntelligence is received by some other channel.

Mr. Crittenden Declines:

Not a candidacy for the Presidency. Ah, no While the lamp holds out to burn, and there i the slightest glimmering light to guide his foot steps in any way towards the White House, h will cherish the hope of being installed there at Chief Magistrate, and labor to achieve that end But he does decline to lecture before the people of Boston on the subject of sl very, as invite in company with other distinguished Southern

Shall we give Mr. Crittenden credit for this declension? We are half inclined so to do, vet we know that slavery is a very delicate ques ion, not to be handled even with the polished and perfumed sentences of our Senator, but at the risk of injury. Hence, with the prospects of the Presidency ahead, it is scarcely proper to damag a national reputation by discussing a section question. Were he mild and apologetic in la defense of our peculiar institution at Boston, th hotapurs of the South would disclaim him. Vice he bold and fearless in advocating slavery, as divine origin and beneficient operation, the North would eschew him. So cherishing the aspirati he does. Mr. Crittenden finds himself between hawk and buzzard.

But we really think that the gentleman has acted wisely in declining. We are pleased at it. too, for the sake of his own reputation, which, as a part and parcel of that of Kentucky, some what concerns us. We are satisfied that Mr. Crittenden would not have been equal to the emergency had he consented to lecture as desired; that he would have placed the cause l espoused in a weak position, and lessened his own fame. Not but that his phraseology would he and his sentences grammatical. But then w fear that Mr. Crittenden has not that deep insight and thorough conversance with subjects of a po litico-economic bearing, such as slavery, as son of his compeers. He has not that profound view of State subjects that others of the nation have He could not, we are sure, be original in any thing he migh' utter in defense of savery, and of course he would be unimpressive.

Mr. Crittenden is an ingenious, ready, skillful and sarcastic debater, and saving that we compress his intellectual calibre into its proper d mensions. He entered the United States Senate in 1817, and retired in 1848-serving in all a pe riod of fifteen years, longer, indeed, by one year than Mr. Clay. And what record have we any great speech that Mr. Crittenden ever made (without his tart reply to Chinese Gong Allen on the Oregon question, be so considered, by stretch of the imagination)-what great princi did he ever ennunciate and maintain-what gre party did he ever lead? What Mr. Sumner Saw.

In a speech at Boston, on Friday evening ast, the Hon. Charles Sumner is reported to have used the following language:

No words were too strong to d pict the enormity of slavery. He hal seen a human being knocked off at auction as if he had been a horse and other Last summer this distinguished Abolitic Senator paid our State a visit, and as it was the first time he had ever crassed the sententrions ine, he seent several days in studying our pecu a institution and its workings. At Lexingto, he first became acquainted with slavery, and suc an effect did its "horrors" have upon him that he ould not resist acknowledging to gentlemen of ur acquaintance how egregiously he had hereto ore been mistaken. It happened, fortunately hat he passed the Sabhath in Lexington, and tended the African Baptis' church. The sight of so many well-dressed and well-behaved slaves opened his eyes. When he saw that they vas further astonished, and when he studied heir demeanor and countenances, all indicative of perfect happiness and contentment, he could out confess that his previous belief concerning

Mousieur Tonson Come Again.

It is not quite two years since Col. William Walker monopolized the attention of the newspaper press. He figured in the news columns headed by capital letters, more astounding than his own petite army. He furnished editors with an exhaustless theme for leading articles. In this way was the redoubtable fire-foot hero serceable, and in none other, that we remember. But it was not long ere the Republic of Sonora nished into thin air, and Walker sunk into his iginal oblivion.

He was not to be kept there, however. From afar he descried the political troubles in Nicaraua, and with a chosen troop "pitched in."-Again he is before the public, sharing the colng any triumph. With the smallest of forces he has conquered the capital city, subjected the country and gained an offer of the Presidency. This last tempting proposition, however, he de clines, with more modesty and discretion than we had given him credit for.

The career and successes of such men as Walker are inexplicable. They puzzle us to acunt for them, for there is no reason nor inspiraion at the battom of them. unsel was sincere. For the first time Metastasio took his illustri us pupil by the hand, and in drawing it to his ps he said in a trembling voice:

'Maria, awake from your dream.' Among the many princes who until then had sed for the hand of the daughter of the Empeor Charles VI none had succeeded to inspire th eart of the Archduchess with love during the last four years her great and noble soul inoved in a circle of beautiful dreams, the centre of which was her much admired tutor, to whom she clung with youthful enthusiasm, with glowing inspiraon, with religious fanaticism. Her love, free rom the dross of worldly sensuality, was pure was an intellectual love; she loved in him the oel, whose fame, like a meteor, attracted the ttention of the civilized world. With his oems in her hands, she sat for hours absorbed n thoughts, which, like the planets, revolved round a sun whose name was Mctastasio. Often did she walk with Petro among the dark foliage f a forest, to enjoy the raptures of a quiet m al life and a pure unostentatious leve! In thes reams she saw herself as a shepardess, nea the declivity of a green hillock, with a murmur ng brook passing rapidly at its foot, surrounded by a flock of snow white lambs, and awaiting or the faithful guide, whose greeting of the shalm she could hear from afar. Oh, how her eart was moved at such thoughts! How often id the bright tears shine forth from the dark eye shes, which like dew drops, fell down upon the ed of flowers of his poems. In such moments, Maria Theresa, the heiress of one of the most owerful empires in the civilized world, envied he poorest peasant girl, as their is no restraint han to follow the affections of he eart: she is at liberty to choose the beloved one ccording to her own desire and taste, and not coording to the hypocritical and formal claims of sudden death caused profound sorrow to her the courts, by which too often two hearts are united which remain forever alien to each other, in spite of the blessings bestowed on them by

the parents and priests. "Maria," said the Emperor to his daughter, "it is high time that you should select a husband from among the crowd of admirers who sue for your and and heart. It would afford much consolaion to the heart of your father-who, as you are aware, loves you above all-to see you married. Who knows how soon I may be called away from his world! I should not die calmly were I to eave hehind a dangiter, loaded with all the cares and sorrows of the government, and without a faithful spouse at her side to advise and protec her. At the side of a prudent spouse, who has xperience in politics, you will succeed in van uishing your enemies, and thus be the pride nd support of the throne which I leave you Select then a spouse who is worthy of you.

Maria Theresa burst into tears. "My child,' asked her father, 'what is it tha oubles you?

'Nothing, father-nothing at all,' rejoined the laughter, arresting her tears." 'Confide in the most faithful of all your friend you have a secret entrust it to me.'

'Father, my dear father, I am pained by the reboding that my conjugal state will not be appy one.'

'And why do you entertain fears about that!' Because I feel an irresistible inclination to re ain tree and single until the end of my life.' 'This indeed is not a good plan. A wome ithout a husband is like a house without a roof ike a door without a bolt, and exposed to all kinds of weather, and much more so an Empress vithout a spouse can easily become the victim of bad counsellors.'

I ut, my father, if I should feel myself power is enough to protect and advise myself without he aid of a husband!"

'You are obstinate, Maria! You ought to yield little more in order to delight your father in is old age by presenting him with a grand child. Already do I see you enjoy happiness with a child on your arms, which, at a futur day, will render both you and me immortal.' The Archduchess flew into the arms of he

Awos KENDALL .- Of the political bingraphie which are to instruct the next generation, per-haps none will be more entertaining than those of Amos Kendall, the "Oliver le Dain" of Gen. Jackson's administration. Amos Kenda'l is an extraordinary character, and has played an extraordinary part in the history of this country. His early career, as the protege and friend of M Clay, he will probably treat very lightly, but his connection with General Jackson, over whom his offuence was far greater than that of any othe ptible of easy demonstration, that with but paring Jackson's signature, while he was Presi-ent, was written by Mr. Kendall. The excep in is the "Proclamation," from the hand of Ec ward Livingsion. And such was Mr. Kendali's influence over the President, that it is believed by iany who had good opportunities for gaining a ceurate opinion in the matter, that all the Sec-staries of Departments he ever had about him condall's advice. Murder In De Witt County, Ill. From the Courier of the 19 hult, we learn that most horrible and blood-thirsty murder occurred the town of Clinton, in the neighbor ng town of DeWitt, on Friday of last week, the particulars f which may be summed up as follows:

There had been a difficulty existing between anson Rusk and Isaac Wyant since June ast, t which time Wyant altacked Rusk with a large nife: Rusk tried to av id a e ision, but in vain, nd as the only chance for saving his life, as he elieved, he drew a revolver and shot his assa lnt in the arm. Wyant s arm had to be ampu-

ow'y watched the movements of Rusk.

On the day above name, Rusk went to Clinton on business, where he was to lowed by Wyant, until the former entered the office of the County Clerk. He was followed up by Wyant; and, while standing behind the stove with his arms folded. Wyant commenced firing upon him with dead. Wyant then stood over the body of his victim, put the pistol to his head, and fired the fourth shot. The hall passed entirely brough the head, and from the orifice made the brauns of ave been destroyed.
