Longbow

Apache

Promises Kept

MCDONNELL DOUGLAS

Something Special for Special Forces.

Comanche/Special Ops Team. Increasing mission speed and effectiveness.

The armed reconnaissance RAH-66 self-deploys and provides mission planning and rehearsal en route.

On arrival, Comanche is:

- ready to fight within minutes
- available around the clock/in any weather
- maintained with minimal support

Comanche operates undetected and uses next generation sensors to pinpoint and identify threats. Its precision target data is downlinked in real time, enabling shooters to enhance surgical strikes – minimizing fratricide and non-combatant casualties.

Briefings

MG Ronald E. Adams turned over leadership of the Aviation Branch, U.S. Army Aviation Center (USAAVNC), and Ft. Rucker, AL to **MG Daniel J. Petrosky** during the Change of Command ceremonies held on 12 September 1996. MG Adams has been selected for assignment as Assistant Deputy Chief of Staff for Operations and Plans for Force Development, Washington, DC. MG Petrosky's former assignment was as Deputy Chief of Staff for Plans and Operations, U.S. Army Europe and Seventh Army. Previously, he had served as Deputy Commanding General of USAAVNC and Ft. Rucker.

The **Boeing Sikorsky RAH-66 Comanche** Prototype Number 1 took to the air on 17 September 1996, accumulating approximately 5.9 hours of flight time. Among the maneuvers completed were hover out of ground effect with various control inputs, 90°, 180°, and 360° slow hover turns, forward flight to 80 knots, and rearward flight to 50 knots. 1.2G load in level pull-ups. The aircraft performed as expected during the flight, which has expanded significantly on maneuvers demonstrated during the prototype's earlier flights.

Tom Fichter has been promoted to Vice President of the **DynCorp Aerospace Technology Business Unit**, which is responsible for approximately \$300M in annual revenues. Mr. Fichter's previous position was with DynCorp's Marketing and Business Development division in Fort Worth, TX.

Xetron Corp., a subsidiary of Northrop Grumman Corp., has received a \$23M contract from the **U.S. Army Communications and Electronics Command (CECOM)** to produce the Frequency Hopping Multiplexer (FHMUX) for the Army's Single Channel Ground and Air Radio System (SINGARS). The initial contract is for FY96. Follow-on options would bring the total value to more than \$50M through FY97, and \$135M through FY98. The FHMUX is a VHF frequency-hopping multicoupler which links four tactical radios to a single antenna. The radios can be operated independently of each other and in any combination of receive, transmit, frequency-hopping, or single channel modes of operation.

Diagnostic/Retrieval Systems (DRS) of Parsippany, NJ announced that its DRS OMI Corp. subsidiary has received a \$2M contract award from **Lockheed Martin Electro-Optical Systems** to provide Eye-Safe Laser Range Finder (ESLRF) systems for the U.S. Army's Simulation, Training, and Instrumentation Command (STRICOM). The award was received under a three-year Ordering Agreement with two one-year additional options for a total program value of approximately \$16M. The ESLRF system will be initially used on the AH-64A Apache, with future implementation planned for the AH-64D Longbow Apache, OH-58D Kiowa Warrior, and the Field Artillery Ground/Vehicle Laser Locator Designator, known as the Hellfire Ground Support System.

STAY IN TOUCH

The human dimension — the spirit, intelligence, dedication, and courage of our soldiers and civilians makes our Army what it is — the best in the world. People are our centerpiece, and ARMY AVIATION Magazine's Blue Book edition provides a link to the men and women of our Branch — the people of Army Aviation.

At the United States Army Aviation Center we work hard to help facilitate the flow of information, and ARMY AVIATION Magazine is a big part of that. It is primarily through our interaction with soldiers in the field, industry, civilians and retirees alike that we truly make the most significant gains in passing the word, in shaping thought and opinion, in striving to "speak with one voice."

Another channel for information travel is the United States Army Aviation Center's "Army Aviation Home Page," accessible through the world wide web (<http://www-rucker.army.mil/>). It is designed so that one can have access to current Branch and Center information. Additionally, the Army Aviation

*The Blue Book,
the USAAVNC
home page, and
symposia
are all
part of
the picture!*

Warfighting Bulletin and its back issues can be accessed through the home page. This is your tool to learn about current Branch issues and new developments, while avoiding the information lag time sometimes encountered in the field. You also have the ability to submit your comments and suggestions to the DOTDS Deficiency

Analysis Section through the home page.

As a recent example of our continuing efforts, on 30 May, the United States Army Aviation Center hosted the 1996 Aviation Brigade Commanders world wide Video Teleconference (VTC). This was our second annual such event. Ft. Rucker linked with aviation brigades throughout the world to work resolution of current aviation issues, to brief new issues, and to provide participants an opportunity to provide feedback from their organizations. It helps set the stage for the Annual Aviation Brigade Commanders/Senior Leadership Conference, another event designed to capture lessons learned and facilitate the (STAY — continued on page 16)

**It's ready to earn
more stripes.**

For more than 30 years, the T55 engine has given the U.S. Army's Chinook helicopters all the power they've needed, whenever they've needed it. Now, the upgraded T55-L-714 is ready to carry the Chinook tradition into the next 30 years.

Today's army mission demands a versatile helicopter with more power, longer range and greater payload capability. It also requires a fleet of helicopters that are easy to maintain and efficient to operate.

The T55-L-714 meets and then exceeds all of these requirements. It has 20% more power, 5% better SFC and logistics support already in place. More important, the T55-L-714 is ready to enter service now, with the core engine having already been field tested aboard the SOA MH47E.

Tough, reliable, cost-effective and ready to go now. The T55-L-714 is the best solution for the Army's expanded mission requirements.

AEROSPACE

AVIATION TRAINING SYSTEMS UPDATE FROM THE NTC

An AH-64 attack helicopter company occupies a battle position, un.masks, and begins engaging a motorized rifle battalion. Within five minutes, 21 OPFOR combat systems are destroyed with no losses to enemy fire. Suddenly, Chalk 3 yells on the radio that he is hit and is going down. A single, unobserved BMP has approached the battle position from behind. Due to a lack of BP security it has destroyed one Apache and is preparing to engage another...

Three hours following the change of mission instructions, the company commander attends a battalion "instrumented" after action review (AAR). He has the opportunity to view a "playback" of the entire battle on a large computer monitor. He sees the positive effects of a detailed fire distribution plan and the negative effects of failing to address BP security in his plan. He reviews the results of the "big picture" battalion mission and can relate his company's successes and failures to the battalion's mission outcome. He has become a better commander, due to both his realistic battlefield experience

*New systems
allow
Army Aviation
to demonstrate
its capabilities.*

and the capability to review his company's performance.

This chain of events occurs many times during a National Training Center (NTC) rotation. The quality of this type of training would be significantly reduced without the aviation training systems available at the NTC. Specifically, this article will address the Multiple Inte-

grated Laser Engagement System (MILES)/Air-to-Ground Engagement System (AGES) II, the Small On-board Data Interface Module (SMODIM), and the Data Communications Interface (DCI) unit. It will also describe each system and briefly present pertinent information regarding home station training and NTC preparations for battle.

MILES/AGES II. MILES/AGES II performs the standard functions universal to MILES systems: laser detection coupled with a system to inform the operator of near miss/hit/kill codes, as well as a target engagement capability for weapons platforms. The Army is acquiring four different MILES/AGES II systems: the AH-64A, UH-60A/L, CH-47D, and the

MILES/AGES II

Meeting the Challenge

BECAUSE THE FIRST CHANCE IS YOUR ONLY CHANCE . . .

You can depend on MILES Air to Ground Engagement System (MILES/AGES II) for the most realistic in-flight weapon systems simulation available. Fully MILES compatible, MILES/AGES II integrates aviation completely into individual through force-on-force training. Simulation fidelity allows the aviator to create mission success, or failure, using the full complement of weapons and sensors without restriction. These are the same tools available in real

combat. Full integration into the Combat Training Centers, and the Precision Range Integrated Maneuver Exercise (PRIME) for home station training and after action review in an instrumented environment has begun.

Now fielded to the U.S. Army the AH-64A has established the baseline from which the Kiowa Warrior has been developed and the Longbow Apache is evolving.

LOCKHEED MARTIN

OH-58D Kiowa Warrior (KW). There are no plans to outfit the AH-1, UH-1 or OH-58A/C as they are being phased out of Army units. However the MILES/AGES II systems are compatible with the older MILES systems being used on these aircraft. Therefore these aircraft may still be utilized on the MILES II battlefield.

The MILES/AGES II systems, produced by Lockheed Martin Electro-Optical Systems (LMEOS), offer significant improvements over the original MILES/AGES systems. Improvements common to all variations of MILES/AGES II include the following:

- simulation of Aircraft Survivability Equipment (ASE) effects on threat weapons systems
- visual and audio warnings of system failures
- visual warnings and audio identification of hostile fire
- a power-up, continuous monitoring, and/or "on demand" built-in-test (BIT)
- event data storage for retrieval for AARS

The AH-64 MILES/AGES II system is a sophisticated training device which accurately replicates the requirement for strong crew gunnery skills for effective killing. Major components include an eye-safe laser rangefinder/designator (LRF/D), an Area Weapons System (AWS) simulator mounted on the 30mm gun, two launcher assembly pods mounted in the inboard pylons, a laser detector set, Aircraft Kill Indicator (AKI), and a Cockpit Kill Indicator (CKI).

The system interfaces with the Apache's 1553 databus, which allows it to determine ASE status, aircraft firing information, and other information critical to simulating weapons effects of both the aircraft and the threat. The kit simulates Hellfire missile remote and autonomous engagements, AWS engagements, and

LRF/D operations. The MILES/AGES II system may be partially disconnected with select components removed to allow the aircraft to participate in live fire operations. The partial disassembly/reassembly requires time consuming maintenance support but pays huge dividends by getting a large percentage of the rotational unit's aircraft into both force-on-force and live fire battles at the NTC.

Current limitations of the AH-64 MILES/AGES II include the following: the inability to simulate rocket engagements, laser spot tracking, or internal boresighting, required removal of the Wirestrike Protection System (WSPS) on the 30mm, and the inability to mount on an aircraft equipped with auxiliary fuel tanks. Engineering Change Proposals (ECPs) are currently funded to fix the internal boresight and WSPS problems on production units.

The AH-64 MILES/AGES II system is now in full production. Thirty production models of the AH-64 kits have been completed and delivered to the Army. The NTC saw the first full rotation utilizing production kits in November 1995, when 1-24th Attack Helicopter Battalion participated in the Initial Operational Test and Evaluation (IOT&E) of the system. Initial indications pointed to an effective MILES training system, capable of simulating weapons effects and aircraft vulnerability with a high degree of fidelity and reliability. Following the IOT&E, the Army awarded LEOS with a contract to purchase 62 additional kits for fielding in Korea, Hohenfels, and Forces Command (FORSCOM) Combat Training Centers (CTCs).

The UH-60A/L and the CH-47D MILES/AGES II kits are passive systems which provide the aircraft with a realistic "be killed" capability. Both systems include a laser detector set, MILES/

Consider This Warrior Prepared For Anything, Anytime.

© 1996 Bell Helicopter Textron Inc. All rights reserved.

When it comes to the most versatile armed reconnaissance helicopter in the world, only one offers air transportability, survivability, weapons capability and marinization. It is the OH-58D Kiowa Warrior. ♦ Famed for its combat-proven long-range day and night target acquisition, the Kiowa Warrior can deliver an array of ordnance from selected combinations of HELLFIRE and STINGER missiles, Hydra 70 mm rockets and a 50 caliber machine gun. Its low maintenance demands give the OH-58D the highest readiness rate of any Army warfighting helicopter. The Kiowa Warrior's low acoustic and IR signature, coupled with its ability to be masked and still acquire targets, significantly reduces its vulnerability to hostile fire. What's more, two armed Warriors can be ready to fight less than 10 minutes after being off-loaded from a C-130. ♦ Projecting the Kiowa Warrior into the 21st century are improvements including increased engine performance, GPS, inertial navigation, high-rate processors, additional situational awareness features and multi-service digital communications. So for the combat power, versatility and preparedness needed in today's potential conflicts, nothing else compares to the OH-58D.

Bell Helicopter
TEXTRON
A Subsidiary of Textron Inc.

P.O. Box 482 • Fort Worth, TX 76101 • FAX: (817) 280-3631 • For further information, call 1-800-FLY-BELL (1-800-359-2355)

AGES II console, AKI, and CKI. The kits are linked to the ALQ-144 infrared jammer and the M130 chaff dispenser, allowing the proper use of these ASE systems to reduce the aircrafts' vulnerability to specific threat weapons.

The UH-60A/L and the CH-47D MILES/AGES II kits are currently in full production. The Army will acquire 228 UH-60 kits and 28 CH-47 kits (budget dependent) for fielding at CTCs and units worldwide. Currently the NTC has ten UH-60A/L and five CH-47D MILES/AGES II kits on hand (as well as ten older UH-60 MILES kits). Both the UH-60 and CH-47 MILES/AGES II kits were first used at the NTC in December 1995. Both aircrews and observer/controllers (O/Cs) reported favorably on the performance and reliability of these kits.

The OH-58D KW MILES/AGES II system is currently being developed in limited numbers for use in the Army Warfighting Experiment (AWE) in March 1997. Original OH-58D AHIP MILES/AGES II kits will be modified into the KW configuration to give crews the capability to engage and kill the threat on the battlefield. Eight kits are currently targeted for fielding for the AWE. The system will include an eye-safe LRF/D, CKI, AKI, laser detector set, and one pylon-mounted assembly pod.

Like the AH-64 kits, the OH-58D KW kits will be integrated into the 1553 databus, allowing it to interact with the fire control computer (FCC), ASE systems, and other critical components. It will also be capable of simulating remote and autonomous Hellfire engagements, as well as .50 cal engagements and laser ranging/designation operations. Unlike the AH-64, the KW MILES/AGES II system will be capable of simulating rocket engagements. More information on this

system will become available after fielding.

SMODIM and DCI. The SMODIM and DCI are two distinct systems which perform a variety of functions at the NTC. The combination of the two replaces the Range Data Measurement System (RDMS), previously utilized at the NTC for tracking vehicles and aircraft on the battlefield. The SMODIM/DCI combination was designed to provide all of the functions previously performed by the Micro-B ("gold box"), as well as improvements in providing aircraft information to the Tactical Analysis Facility (TAF, often referred to as the "Star Wars" building) for AAR purposes.

The DCI in simple terms, is a cellular telephone produced by Motorola. Interfacing directly with the SMODIM, it "calls" the TAF through any one of several antennae arrayed throughout the NTC. From the SMODIM the DCI obtains a variety of information (aircraft heading, position, firing data, etc.) and transmits the data to the TAF. This is the source of information for the TAF's computer tracking screens. Personnel in the TAF also have the capability of generating MILES/AGES II kill codes and reset codes through the two-way communication link with the DCI. The DCI is now the common component utilized throughout the NTC on all ground vehicles, manpacks, and aircraft for communication and tracking with the TAF.

The SMODIM, produced by Intercoastal Electronics (ICE), is a module which acquires aircraft and MILES data, then consolidates/translates the data into a format suitable for transmission by the DCI. The SMODIM interfaces directly with the MILES/AGES II, from which it obtains MILES status ("killed" or "alive"). It also interfaces with the FCC and ASE systems through the 1553 data-

GUARDIAN® RANGE EXTENSION FUEL SYSTEMS

ADD MISSION FLEXIBILITY.

Robertson Aviation's **GUARDIAN®** internal auxiliary fuel systems can provide added mission flexibility in today's military operations. The **GUARDIAN®** systems can increase range and endurance and also provide forward area refueling capability. Available in sizes from 60 to 800 US gallons these systems take minimum cargo/passenger space. After initial installation each tank can be installed or removed in 10 minutes or less -- *without tools*.

IN SERVICE WORLDWIDE.

The highly adaptable **GUARDIAN®** series of auxiliary fuel systems have been in service around the world since 1987 with both domestic and international military customers. Current installations include the Sikorsky H-60, H-53 and the Boeing CH/MH-47 helicopters.

TESTED AND QUALIFIED.

The fully crashworthy **GUARDIAN®** series of auxiliary fuel systems are not only **combat proven** but are **tested and qualified** against today's stringent military standards.

Gunfire tested and qualified:
.50 caliber and 20mm.

Slosh/vibration tested and qualified:
25+ hours.

Drop tested and qualified:
65 feet.

ROBERTSON AVIATION, L.L.C.

of Tempe, Arizona sets the world standard for the design, development and production of crashworthy range extension fuel systems for both helicopters and fixed wing aircraft. For more information, call (602) 967-5185, fax (602) 968-3019, or write P.O. Box 968, Tempe, AZ 85280.

ROBERTSON

AVIATION

Range Extension Fuel Systems

bus to obtain aircraft engagement information (laser or weapon system firing, heading, range, missiles on board and ASE status). A global positioning system (GPS) installed within the SMODIM also provides the DCI with constant position updates.

The SMODIM/DCI will eventually be installed in all AH-64s, UH-60s, CH-47s, and OH-58D KWs at the NTC. DCIs will be made available as SMODIM installation kits are produced for the various aircraft. Thirty AH-64 kits, 20 UH-60 kits, and 12 CH-47 kits are due for delivery to the NTC by 30 July 1996. SMODIM installation platforms are still being designed for the OH-58D KW, and procurement goals call for seven to ten kits available for the AWE.

Home Station Preparation. Different contractor/logistic support (CLS) packages exist for different aircraft MILES/AGES II systems. More complex systems (AH-64/OH-58D KW) require a higher degree of support. At this time, Simulation, Training, and Instrumentation Command (STRICOM) is proposing a consolidated CLS support umbrella which encompasses all CTCs and MILES systems, with the exception of the AH-64 and OH-58D KW systems.

The current CLS support concept for AH-64s requires LEOS representatives to arrive at the rotational unit's home station 45-60 days prior to the start of the rotation. The contractors install the kits with assistance from unit maintenance personnel. ICE also visits the rotational unit at home station to install hardware required for SMODIM operation (GPS antennae, wiring, platforms, etc.).

During installation, LEOS representatives also provide classroom instruction to aircrews and support personnel on the operation of the system. Although the MILES/AGES II system is transparent to

the user in most aspects of operation, there are a few significant differences from the aircraft. Training for the MILES/AGES II system should include unit prepared classes based on the operator's manual to supplement the contractor classes.

Once installation is complete, the unit should conduct MILES/AGES II crew training. Hands-on training should include: power-on cockpit familiarization prior to flight, a range-type engagement area with at least one MILES armored vehicle target, and an STX against a MILES equipped armored OPFOR, if possible. A training program of this depth greatly enhances killing potential on the NTC MILES battlefield.

Rotational units must also emphasize the training of the III/V platoon and armament section personnel. Any individuals involved in loading armament onto the aircraft must undergo classroom instruction as well as hands-on training on the MILES/AGES II Controller Device (CD). This handheld computer is utilized to set armament loads on the aircraft and is utilized in FARPs to upload armament during the rotation.

Installation/home station training for the OH-58D KW MILES/AGES II will likely reflect AH-64 support and training packages when fielded. The relative simplicity of the UH-60A/L and CH-47D kits allows for installation upon arrival at the NTC. The rotational unit has the primary responsibility for installing these systems at the NTC. NTC support contractors and O/Cs from the Eagle Team are available to provide assistance as needed. A STRICOM video tape will supplement instructions provided in the MILES/AGES II manuals. These tapes should be available to users by October 1996. ICE will visit UH-60 and CH-47D units at home station to install the required SMODIM hardware

Magnavox Electronic Systems Company is now Hughes Defense Communications.

Unimagined advances in technology will mark the new millennium. They will be forged by companies that have the foresight to combine their strengths. That's why Hughes Aircraft Company acquired Magnavox Electronic Systems Company to form a new technology vanguard, Hughes Defense Communications.

**The next millennium will bring
a whole new world of technology.
Together, we'll be ready.**

This newly structured organization matches the forefront of communications technology with an unparalleled ability to bring superior defense products to market. It's a combined force that's setting new standards for customer satisfaction.

Technology that performs. Systems that deliver. A company that responds. That's the new Hughes Defense Communications.

Magnavox
Electronic Systems Company

**HUGHES
DEFENSE
COMMUNICATIONS**

A HUGHES ELECTRONICS COMPANY

in the aircraft.

Reception, Staging, and Onward Improvement (RSOI) Week. The RSOI week of the NTC rotation, previously known as Prep Week, gives the rotational unit the opportunity to complete preparation for battle prior to entering "the box." UH-60 and CH-47D units will begin their MILES preparations by drawing their MILES/AGES II kits from the warehouse at Bicycle Lake Army Airfield. The unit is encouraged to accomplish this task on Monday of RSOI week, since that will provide them the maximum amount of time to install the systems. When the unit begins installation, NTC MILES support contractors and Eagle Team O/Cs will provide assistance and advice. Once installation is complete, O/Cs will conduct checks on every aircraft in order to ensure the systems are fully functional prior to entering the training area. MILES rules the battlefield, and an inoperative MILES system will result in the inability of that aircraft to participate in operations.

AH-64 and OH-58D KW units will first utilize RSOI week to verify operability of the already installed systems. LEOS personnel will verify the boresights utilizing a target on Bicycle Lake and make corrections as needed. They will also verify the health of the systems and replace components if necessary. Once each aircraft is fully prepared, aircrews conduct validation engagements on site at Bicycle Lake. The Eagle Team provides an armor MILES system for use as a target, which the unit emplaces on the far end of Bicycle Lake. Each aircraft is required to engage the target in multiple fields of view and multiple sensors with multiple weapons systems to ensure the killing capability of the aircraft and the crew. The validation process is crucial to the unit's success in its initial MILES battles at the NTC.

Conclusion. The capability of aviation units to participate in battles at the NTC is critical for a number of reasons. It gives our

company and battalion commanders visibility on their unit's status and areas needing training. It allows Army Aviation to view and analyze the state of readiness of our combat aviation units by observing trends in units throughout FORSCOM. It allows us to verify tactics, techniques, and procedures for general support, assault, attack and cavalry units. Finally, it allows Army leadership from all branches to accurately view the vast capabilities of our aviation assets on a fluid, dynamic battlefield. Army Aviation, STRICOM, and the National Training Center have acquired superb training systems which will allow units to participate in high quality training well into the 21st century.

exchange of ideas.

Branch oriented symposiums are another means of interacting with various members of the team. We've had a series of meetings to shape our simulation strategy involving key players from STRICOM, PEO Aviation, the National Guard Bureau, and USAVNC. AAAA will host a similar symposium in Washington (4-6 September 1996) open to industry. We have one on Special Operations planned for 2-3 October 1996 at Ft. Rucker.

Clearly, people are our Army's most valuable resource. The Army Aviation Blue Book helps us stay in touch with those who are part of our Branch. Use it to inform and "stay in touch" with the issues as well as the people of Army Aviation.

★ ★

**Pratt powerplants are
built on a single premise:
Offer the best value
on the market.**

Period.

The facts speak for themselves. Pratt & Whitney Canada (P&WC) is the world leader in small gas turbine engines. We supply and support the lion's share of the commercial world market. And in the military market, we are the powerplant for the T-1A, C-XX and JPATS, the largest U.S. government training aircraft production order of the decade.

Simply put, P&WC offers the best value on the market. If you're considering the purchase of small turbine-powered aircraft, we should be at the top of your shortlist. End of story.

For more information call Brett Rhodes,
Government Programs Manager, at (561) 796-2794.

Directional Infrared Countermeasures System

The most practically suited Directional IRCM for aircraft ranging from C-130s to small helicopters.

Our consortium's success in working with the British Ministry of Defence and the United States Special Operations Command sets us apart from all competition. Using proven technology, Nemesis is the world's most operationally capable directional infrared countermeasures system. Our unique turret ensures superior stabilization for precision tracking and maintaining jamming energy on-target. Nemesis can detect, acquire, track and jam growing numbers of infrared threats - even those with all-aspect attack capabilities. Further, Nemesis is user-friendly, has a low, known cost and is available near term. And, being laser-ready, Nemesis ensures system currency and capability well into the 21st century. Northrop Grumman. The right technologies. Right now.

Standard Apache System

875-line recorded picture

New! TEAC Merlin System — 40% Sharper

525-line scan-converted
picture increases horizontal
resolution dramatically and
improves image definition
during playback.

Now Apaches Can See What They've Been Missing!

The TADS/PNVS system is critical to the Apache's mission. And now TEAC and Merlin have teamed to produce a new scan conversion video system to provide a 40% improvement in image quality and resolution over the existing Apache video system. Plus, the system's Hi-8mm videotape format delivers twice the recording time (2 hours) using standard inexpensive videocassettes and standard commercial video playback equipment. So debriefs don't require special equipment — even for network news use.

But the real payoff is in combat. Where a 40% improvement in image resolution and a square pixel format can make the difference in finding, identifying, and acquiring your target. Yet TEAC's new system costs the same as the present Apache video recorder and is a drop-in, mil-qualified replacement. And, as with the other airborne video recorders that we manufacture for U.S. military aircraft, TEAC guarantees full product support for the life of your program.

Already demonstrated in Apache flight testing, TEAC and Merlin are ready to help the Apaches see what they've been missing!

WORLD LEADER

In Threat Simulation

Sierra is proud to have developed and is producing electronic warfare threat emitters for the U.S. Armed Services. ASET IV (Aircraft Survivability Equipment Trainer IV - Army) is a manned highly mobile training test system emphasizing tactical realism in operations. MoTES (Mobile Threat Emitter System - Air National Guard) also highly mobile, is designed for remote control operation. UMTE (UnManned Threat Emitter - Air Force) is palletized for fixed site deployment and remote control operation. All are integrated with existing range instrumentation systems.

ASET IV, MoTES, and UMTE utilize state-of-the-art technologies to provide accurate threat representation. Logistical support is enhanced by incorporating many common hardware/software configuration items.

Proven performance, reconfigurable designs, logistics supportability, and Sierra's vast system integration experience allow us to offer EW range integrators the flexibility to meet unique requirements at an affordable cost. Call us today to discuss solutions for your threat simulation needs.

No Margin for Error

LORAD LPX-160 Portable X-Ray Systems

Even the tiniest flaws in critical metal and composite components are unacceptable. For critical detection, LORAD LPX-160 constant potential portable x-ray systems are the clear choice.

Superior Performance

- Discrimination of less than 1-1T

True Portability

- On-board, clean, high-voltage power — no heavy, stand-alone generator and bulky cables
- So lightweight and flexible you can use them all day on a wide range of applications, materials and thicknesses

Efficiency and Convenience

- Continuous testing at 5-160kV at .1-5.0mA — with no cool-down required
- Pinpoint positioning of the x-ray beam from up to 75 feet away
- Digital controls, with automatic warm-up program, test data display and self-diagnostics

When there's no margin for error, choose LORAD.
The alternatives are simply unacceptable.

CONCEPT TO REALITY

ENGINEERING... Mainly known as the manufacturer of the most versatile high performance night vision systems available (DARK INVADER® and "OWL"), B.E. Meyers & Co., Inc. also specializes in "System Integration" which is "CONCEPT TO REALITY ENGINEERING". Often this is the modification or adapting of existing off-the-shelf components together with innovative designs that form new sophisticated imaging related systems that achieve and exceed a specific purpose. Here are examples of the many products developed from our "CONCEPT TO REALITY ENGINEERING".

Helicopter application →

Advanced Crew Served Weapon Infrared Laser Night Vision Targeting System
• Illuminates large targets at long range and projects the reticle onto the target • Allows tracking of individual fired rounds without the use of tracers
• Ideal for helicopter and shipborne applications as well as multi use as a target designator/marker for air/ground operations • Now in use by US Navy

ADVANCED "OWL"™ DIGITAL STABILIZED CAMCORDER SYSTEM

Optically couples "OWL"™ to new 10x to 25x camcorder optics
• Long range infrared zoom laser enhancement • Removes bounces and wobbles when used in high power through digital stabilization
• Ultra low lux sensitivity • Standard and Hi-8 for more resolution
• Laser beam expansion for wide field illumination

B.E. MEYERS & CO. INC.
ELECTRO OPTICS

17525 N.E. 67th Court, Remond, WA. 98052

5003 DAY/NIGHT GATED 3RD GENERATION CAMERA

Like no other camera in the world • Use any lens or telescope - no iris needed • Produces perfect images on the darkest of night and can stare at the sun with no damage • Now in use by Federal Agencies

OWL Most versatile 3rd generation night vision system available anywhere
• 400% increase in low light sensitivity • Built in "Image Guard"™ tube protection system
• Adaptable to all camcorders, 35mm and CCD systems • Perfect for digital video and professional news gathering video cameras • Adaptable to rifles and their telescopic sights • Available with new long range "Infrared Zoom Laser Illuminator"™

TSLIS Wide 6" diameter super biocular and laser enhanced targeting system for crew served weapons • Allows perfect night vision sighting even in rough terrain or conditions • Perfectly suited for use on moving vehicles and tanks as well as high speed craft in heavy seas
• Now in use by US Navy

2,000,000

Our Safety Record is No Accident.

The lives of our nation's aviators and millions of dollars in equipment are in our hands.

And, we leave nothing to chance. That's why DynCorp is the first contractor ever to reach the milestone of two million flying hours without a

maintenance-related accident. It's an achievement we're proud of and a reputation we plan to live up to.

"TRAIN LIKE YOU FIGHT"

Arcata Associates' **Television Ordnance Scoring System (TOSS)** is a field proven system, delivering accurate and immediate feedback to **helicopter, armor and artillery crews**. Scores are automatically calculated with center of impact relayed to crews within seconds. **TOSS** is rugged, reliable and requires minimal maintenance. **TOSS** may be configured as a deployable range package or as a mobile system for easy transportation and setup at various ranges.

- Sustained Operational Rates of Over 99%
- Multiple Target Scoring (Day or Night)
- Multiple Helicopter Engagements
- Laser Spot Detection & Scoring
- Range & Ordnance Footprint Mapping
- Detects & Scores 6,000 RPM - 95% Accuracy
- Video, Hardcopy & Floppy Disc for Crew Debrief

When Performance Is Critical - Lucas

Proven in military and civil service around the world, Lucas Externally and Internally Mounted Personnel Rescue Hoists have set the industry standards for reliability, durability and performance with their patented design features, operational characteristics, safety features and ease of operation that cannot be found in other rescue hoists. Lucas hoists meet stringent military requirements. Give Lucas a try and we will demonstrate why militaries worldwide rely on Lucas more than any other hoist supplier in the world.

It's in the bag... with Buddy Start!

ARMY
QUALIFIED

When your aircraft is grounded in a remote and/or hostile area due to an APU or electrical failure, the lightweight Buddy Start™ provides pneumatic and/or electrical starting power from another aircraft. In emergency situations, the Buddy Start can **save lives, missions and expensive aircraft**. For information on Buddy Start kits for the H-60, AH64, CH47 and other aircraft, call Kaiser at (714) 250-1015, ext. 548.

SILENT SENTINEL™

ELECTRONIC SUPPORT

A New Generation ES/ELINT Payload For All Airborne Platforms

SILENT SENTINEL™ is a passive payload that detects, identifies and locates ground-based radars.

Using the latest generation fully developed software and a SPARC based laptop computer, Silent Sentinel can be operated from any aircraft that is equipped with a standard weapons rack.

The lightweight modular design of the system allows it to be easily integrated into any U.S. Army platform.

DASSAULT ELECTRONIQUE

This is a cooperative effort based on Dassault Electronique's Phalanger program.

Natural born leader.

For some, it's all in the genes.

At Hughes Training, on the other hand, we believe our world leadership in vertical lift simulation technology for over 25 years has been built on a solid foundation of product innovation and customer service.

The facts speak for themselves. At Hughes Training we've provided simulators for

over 85 military helicopter types around the world. Through this period we've built simulators for all but one of the U.S. Army's helicopter platforms and for the entire U.S. Marine Corps vertical lift fleet.

Today our commitment has never been stronger to provide superior vertical lift training solutions. That's why Hughes Training can be seen setting

the pace in helmet mounted display development, simulator reconfigurability and modular design that will support concurrent upgrades to existing trainers as aircraft configurations change.

To prepare your natural born leaders to take command of the battlefield, turn to Hughes Training for advanced helicopter simulation solutions.

At Sanders, protecting aircrews means mission success. We're now developing the Advanced Threat Infrared Countermeasure (ATIRCM) system, a next-generation laser-based countermeasure system, and the Common Missile Warning System (CMWS) to sense and defeat even the most advanced threats. This cutting-edge

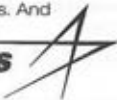

"There's a lot of pride
in the work we do here.
But then again,
look at the aircrews
we're doing it for."

Andy Whitaker,
ATIRCM/CMWS
Program Director

technology will ensure more pilots make it home, and their aircraft along with them. ATIRCM and CMWS are just two of the revolutionary products we're working on for military and commercial markets. And they're two examples of how Sanders is building inventions for life.

Raytheon Aerospace Company provides quality worldwide support through its **Contract Field Teams** — from aircraft and vehicle performance upgrades to battle-area maintenance and logistics. Raytheon is ready to dispatch diversified, quality technicians to perform depot maintenance, field maintenance, and modification on-site for aircraft,

engines, electronics, missiles, support equipment, tanks, vehicles, and other military systems. Usually a Contract Field Team can be directed to a work site in a matter of hours after Delivery Order Notification. Raytheon Contract Field Teams offer a responsive, cost-

effective way to modify or maintain today's military equipment and systems. **Contract Field Team Operations**

THE CASA C-212: FOR SHORT TAKEOFFS AND TIGHT BUDGETS.

The CASA C-212 is the proven choice for today's multi-mission aircraft. It can handle a 1,500-ft. takeoff distance, while clearing a 50-ft. obstacle. On an unpaved surface, it only needs 1,000 ft. to get airborne. In addition, its flexible design allows you to configure the aircraft to

meet your diverse requirements — from combat support to high capacity air ambulance. Equally important, its low acquisition and maintenance costs guarantee excellent value over years of operation. For short takeoffs and tight budgets, no one can match the CASA C-212.

UNC LEAR SERVICES 

We Keep Making A Name for Ourselves

UNC has combined two great companies, UNC Aviation Services and UNC Lear Services, and two traditions of ongoing service excellence.

That's why UNC's Contract Field Teams continue to refurbish, repair and modify Army helicopters and ground vehicles after 35 years, and why in May 1995 CECOM chose UNC for their first Omnibus systems integration contract. Through 9 years and a contract rebid, UNC still trains Army, Air Force and foreign pilots at Fort Rucker.

Now and in the future, two names to rely on.

"FILL IT UP"
MEANS A GREAT
DEAL MORE THAN
IT ONCE DID.

**(E)XTERNAL
(F)UEL
(S)YSTEM**

In use by 14 U.S. Army
National Guard Aviation
Units with more coming
on line.

FEATURES:

- 140 gallons of additional fuel extends endurance by approximately 1.5 hours
- Improved flight characteristics
- Full utilization of cabin space
- MIL - T - 27422B crashworthy 50 caliber self sealing fuel cell bladder
- Also available, FAR 29.952 crashworthy fuel cell bladder
- Attaches to existing hard points
- Fuel shut-off valve to isolate external fuel system
- Inertia switch to remove all electrical power to system
- Frangible, quick-disconnect fittings
- Independent control system with fuel gauge mounted in center pedestal or on glare shield
- Night vision compatible instrumentation
- First fielding, September 1994
- FAA Approved
- Patent Pending

\$160,500 to Benefit Members

COL John Marr, Ret.

President, AAAA Scholarship Foundation, Inc.

Once again, the AAAA Scholarship Foundation and the AAAA Awards Committee under the direction of Chairman MG John Riggs, has had the pleasure of recognizing academic excellence among you, our membership, and your families.

On 20 July 1996 we awarded \$160,500 to 71 outstanding students including enlisted, warrant officer, and company grade officer personnel, as well as spouses and children of AAAA members.

I wish you could all participate with us in the selection process to see for yourselves the character and caliber of all our applicants. If you need a little shot of optimism, a brief look through these files would convince you that these people are the best and the brightest. The future of the nation and the Army will remain in good hands.

The AAAA Awards Committee broke down into work groups and individually voted every file in typical military promotion board fashion. The individual scores were tallied and an Order of Merit List (OML) was assembled using only file ID numbers which did not reveal the name of the applicant, or their rank or that of their AAAA member relative.

Only freshmen competed against freshmen, upperclassmen against upperclassmen, and graduate students against graduate students. Likewise, for the dedicated scholarships, only spouses, enlisted soldiers, AWO and company grade officers competed against their respective groups.

The integrity of the process is unsurpassed. Once the OML is established, the scholarships and interest-free loans are assigned in descending order by dollar amount.

This year we had 237 applications, our second greatest number ever. The successful applicants once again were truly impressive in their credentials. For example, 15 of the top 17 awardees had a 4.0 average!

Unfortunately, we were not able to recognize more of these outstanding students for the simple reason that we have relatively limited resources. If we had more, we could give more. Please consider donating to the AAAA Scholarship Foundation, Inc. Because its administrative costs are borne directly by AAAA, the SFI is able to bring 100% of your donation to bear as awards or award endowments.

As an aside, in the six years since the loan program was instituted, 100% of our loan recipients have made good on their repayments!

Congratulations to all our applicants and winners. Please take a few minutes to review these pages and share our pride in these fine individuals.

AAAA National Scholarship - \$12,000 (\$3,000 a year for four years) Frank W. Petty, son of LTC Frank S. Petty, Philadelphia, PA - Harvard University.

GEN Frank S. Besson, Jr. Memorial Scholarship - \$12,000 (\$3,000 a year for four years) Jeremy J. Ross, son of Mr. James M. Ross, Washington, PA - Harvard University.

LTC William B. Bunker Memorial Scholarship - \$10,000 (\$2,500 a year for four years) Matthew G. Williams, son of COL Ronald N. Williams, Ret., Glen Carbon, IL - Northwestern University.

BG Robert M. Leich Memorial Scholarship - \$5,000 (\$1,250 a year for four years) Maija A. Fenell, daughter of MAJ David L. Fenell, Colorado Springs, CO - Georgetown University.

BG O. Glenn Goodhand Memorial Scholarship - \$5,000 (\$1,250 a year for four years) Jaclyn E. Pruitt, daughter of LTC Ken W. Pruitt, Ret., Fort Leavenworth, KS - Texas A&M University.

AAAA President's Message

(Eleventh in a Continuing Series)

MG Richard E. Stephenson, Ret.

Wow! Isn't it amazing when some "Beltway Bandit" produces a vague, voluminous, pseudo-authentic looking document ("Assessment of Current Comanche Development Problems" by Mr. Robert McDaniel) reinforcing predetermined and preconceived conclusions harbored literally for decades, and everyone, someone, or anyone cares—only in Washington! While this sort of nebulous nay-saying continues to amuse, the unbridled and categorically unfounded character assassination goes well beyond the pale...particularly when this same author has been virtually a party-of-the-first-part to all of this for over 30 years. The conclusions are just as facile as the entire document—and just as useless. He sheds great light where there is no darkness. Can Cheyennegate be far behind? P.S. Bob...Comanche is already back in the air!

Second "pet rock" of the summer of '96—at the risk of offending some tenderlings, our USAF friends do a world-class job of full and complete integration of their Air National Guard and their active operational flying organizations. Or they do a masterful job of masking difficulties that our Army insists on playing out, usually at the wrong time and before the wrong audience. Certainly, there are reasons for the USAF successes, perhaps peculiar to the USAF; however, the synergistic effects of a one-service position and posture clearly keeps the DCers of DC (the first DCer notation is for *dividers* and *conquerors*) at bay and involves the air guard in every contingency, exercise, or planning process early enough into the game to be up and counted as dues-paying members. Why can we not come to a comparable closure in our Army Reserve/National Guard aviation and our active Army Aviation family? Some progress is emerging, but more needs doing.

August is almost gone and our next NEB meeting in conjunction with the AUSA annual convention is upon us. We hope to have an ED-designate by 1 October 1996, so that he/she can have their adequate prep-time for the AAAA Annual Convention in Louisville, KY on date.

Our first annual Army Aviation Training and Simulation Symposium in the DC area, co-sponsored with the AUSA (also a first since the early 1960s), 4-6 September 1996 will precede the changing of the guard at our aviation branch by just a few days. (P.S., the Symposium was a great success!) Thanks to Ron and Ardee Adams for steady, sure hands at the helm of Fort Rucker and welcome to DA, DCSOPS, Ron. Welcome too to Dan and Barb Petrosky as they come home to the home of the Army Aviation Branch. Dan's overwatch on Bosnia and the last year's activities throughout Europe and the Middle East provide keen information and an insight into Army Aviation in the field for our youngsters.

Let's have a big, big hand as we change the guard once again. *Hoo-ahh!!* More AAAA happenings next issue. Enjoy the rest of summer 1996.

AWARD NOMINATIONS SUSPENSE 15 OCT 1996

Contact the AAAA National Office for nomination forms for these awards that will be presented at the AAAA Awards Banquet sponsored by the Aviation Center Chapter, 15 January 1997, at Ft. Rucker.

Membership in the AAAA is not a requirement for consideration. The contributions of the nominees should have been initiated and completed during the award period encompassing September 1, 1995 through August 31, 1996.

1996 AAAA AIR/SEA RESCUE AWARD

Background & Eligibility

Sponsored by Lucas Aerospace, the AAAA Air/Sea Rescue National Award will be presented "to the crew or crewmember who has performed a rescue using a personnel rescue hoist that saved the life or eased the suffering of an individual or individuals during the awards period

encompassing September 1, 1995 through August 31, 1996."

A candidate for this AAAA National Award must be U.S. Army, Active or Reserve Component, and must have had an active role in an air rescue effort using a personnel rescue hoist.

1996 AAAA TRAINER OF THE YEAR AWARD

Background & Eligibility

Sponsored by Hughes Training Inc., Link Division, the AAAA Trainer of the Year Award will be presented "to the trainer who has made an outstanding individual contribution to Army Aviation during the awards period encompassing

September 1, 1995 through August 31, 1996."

A candidate for this AAAA National Award may be a military or civilian nominee and must be actively involved in Army Aviation training.

1996 ARMY AVIATION MEDICINE AWARD

Background & Eligibility

Sponsored by Gentex Corporation, this National Award will be presented "to the flight surgeon or aeromedical physician assistant who best exemplifies the contribution to Aviation during the awards period encompassing September 1,

1995 through August 31, 1996."

A candidate for this AAAA National Award must be a U.S. Army, Active or Reserve Component, and must be actively involved in Aviation Medicine support to Army Aviation.

1996 ARMY AVIATION FIXED WING UNIT AWARD

Background & Eligibility

Sponsored by FlightSafety International, the Army Aviation Fixed Wing Unit Award will be presented "to the unit or detachment with fixed wing aircraft that has achieved the highest level of excellence in training, safety, logistics, operations and support during the awards period

encompassing September 1, 1995 through August 31, 1996."

A candidate for this AAAA National Award must be a U.S. Army, Active or Reserve Component, unit or detachment with fixed wing aircraft that has met the foregoing criteria.

AAAA AIR TRAFFIC CONTROL AWARDS

Background & Eligibility

Sponsored by AAAA, the Air Traffic Control Awards will be presented "to the facility, platoon, manager, maintenance technician, and controller that has achieved the highest level of excellence in training, safety, logistics, operations and support during the awards period encompassing September

1, 1995 through August 31, 1996."

Candidates for this AAAA National Award may be a military or civilian nominee and must be actively involved in Army Aviation Air Traffic Control.

L u c a s A e r o s p a c e

Through its sponsoring of the annual
AAAA Air/Sea Rescue Award,
Lucas salutes the men and women
of U.S. Army Aviation Crews around
the world who save the lives of others,
often at great personal risk.

Lucas

Aces

The following member has been declared an Ace for signing up five new members.

CPT Susan M. Lind

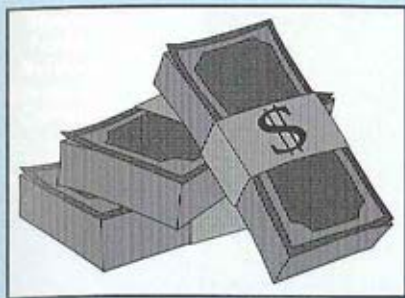

Below: COL Daniel J. Rubery, Ret., ATCOM Deputy Commander and Lindbergh Chapter President, accepts a \$5,000 check from Mr. Joe Durant, President of Weststar Corporation, for the initial funding of a new scholarship Weststar has established for the Lindbergh Chapter. The check was presented in St. Louis, MO.

As part of the 1996 AAAA Annual Convention in Fort Worth, TX, the North Texas Chapter sponsored a golf tournament that attracted over 240 players. The proceeds derived from the event helped to support the NTC Scholarship Fund. The North Texas Chapter expresses its sincere appreciation to the following listed corporate sponsors and contributors (**=Special Recognition):

Bell Helicopter**	Avtel Services
Dallas Airmotive Inc.**	Canadian Marconi Co.
E-Systems**	Chadwick Helmuth
G.E. Engines**	Chrysler Technology
James Wood Chevrolet**	Composite Technology
Northrop Grumman CSF**	EFW Inc.
Parker Hannifin**	FLIR Systems
Texas Instruments**	Graco Supply Co.
Premier Aviation	Honeywell
Raytheon Aerospace Co.	Howell Instruments
Sikorsky Aircraft	Hughes Aircraft
Smith Industries	Innovative Systems
SMF Mortgage/Ebby Halliday	Korry Electronics
U.N.D. Aerospace	Lockheed Electronics
McDonnell Douglas HS	Lockheed Martin
Mo Beta	Loral Vought Systems Corp.

The AAAA Scholarship Foundation, Inc. (AAAASFI) is now part of the Combined Federal Campaign (CFC), a workplace charitable fund drive conducted by the U.S. Government for all federal employees. It is the single largest workplace fund drive in the country, raising approximately \$195M in pledges annually.

Please consider making a CFC-sponsored contribution to the AAAA Scholarship Foundation this year. AAAA's code number for the Fall 1996 CFC is **2121**.

April 1997

■ **Apr. 23-26.** AAAA Annual Convention, Kentucky Fair and Exposition Center, Louisville, KY.

The digital battlefield

The U.S. Army specified the performance levels. Make it eyes-out, easy to learn and simple to use. It had to include high connectivity, with embedded automatic link establishment (ALE), data modem and electronic counter countermeasures (ECCM).

Rockwell's Collins Avionics & Communications Division delivered it all, including full digital signal processing, field programmable ADA software and a spare card slot. The AN/ARC-220 Nap-of-the-Earth (NOE) high frequency communications system is the result of a true partnership with the Army. We're proud to be able to place this technology in our soldier's hands.

In the U.S., call (800) 321-CACD (2223), outside the U.S., call (319) 395-5100, or fax (319) 395-4777.
