Based on the above listed information Ecology has determined that, at this time, the release of petroleum hydrocarbons and metals to the soil no longer poses a threat to human health or the environment.

Therefore, Ecology is issuing this determination that **no further action** is necessary at this site under the Model Toxics Control Act (MTCA), Ch. 70.105D RCW. However, please note that because your actions were not conducted under a consent decree with Ecology, this letter is not a settlement by the state under RCW 70.105D.040(4).

This determination is made only with respect to the release identified in the independent remedial action reports listed above. This no further action determination applies only to the area of the property affected by the release identified in the reports at 12th Avenue and Eastern Street, Spokane, Washington. It does not apply to any other release or potential release at the property, any other areas on the property, nor any other properties owned or operated by U.S. Bancorp Financial Inc.

Ecology does not assume any liability for any release, threatened release or other conditions at the site, or for any actions taken or omitted by any person or his/her agents or employees with regard to the release, threatened release, or other conditions at the site.

Ecology will update its database to reflect this "No Further Action" determination. Your site will not appear in future publications of the Confirmed & Suspected Contaminated Sites Report.
