"Students in the university obtain more from the atmosphere of its great personalities than they do from books..."

JACK PICKFORD AND HIS BRIDE

Jack Pickford, motion picture actor and brother of Mary Pickford, and his bride, Mary Mulhern, former New York stage actress. They are shown at Pebble Beach, Cal., just prior to their marriage.

Orchestra to Give Concert With Chorus

Presentation of the final university group concert of the summer season, the university orchestra and chorus will join in a program of five groups of numbers in the main lounge of Iowa Union, Sunday at 7 p. m.

AS HAWKS CROSSED THE U.S. IN 12 1/2 HOURS

Capt. Frank Hawks, flying from Los Angeles, Cal., to New York, in 12 hours, 25 minutes and 3 seconds, smashed all records, including that recently made by Col. Charles A. Lindbergh.

Negus Talks of Changes: No Action Yet

Possibility of a slight increase in traction fares, following the replanting of street cars by motor busses on city lines, is being considered by Henry Negus, receiver for the Mississippi Valley Electric company, operators of the city street car lines.

All's Well on Board R-100 Over Atlantic

CARDINGTON, England, Aug. 15 (AP)—Officials of the British airport here believed tonight that if the dirigible R-100, homeward bound from Canada, maintained her present speed she would arrive at the home hangar about 10 o'clock tomorrow morning.

Dirigible Due to Arrive in England During This Morning

The dirigible radiated the air ministry at 2 p. m., (C.S.T.), that she expected to cross the first European land at Galway bay about 9 p. m., (E.S.T.)

Man Admits He Murdered Jerry Buckley

TOLEDO, O., Aug. 15 (AP)—Two Detroit detectives who arrested Stryker, Ohio, announced they did not want the man held there who is alleged to have confessed to the murder of Gerald E. (Jerry) Buckley, radio announcer at Detroit, several weeks ago.

Toledo Police Receive Signed Confession of Slaying

TOLEDO, O., Aug. 15 (AP)—Detroit detectives went on their way to Stryker, O., near here, tonight in an effort to identify a man who said he killed Gerald E. ("Jerry") Buckley, radio announcer of station WMBE in Detroit several weeks ago.

Three Farm Groups Will Help Hoover

WASHINGTON, Aug. 15 (AP)—Reports of continued rain in many sections of the drought area reached the white house today as President Hoover received assurances from representatives of three farm organizations of support in his program for relief.

Law College May Have New Schedule for Next Summer

Several important changes in the courses offered by the college of law during the summer session are being contemplated, said Dean Eugene A. Gilmore.

1,327 Students Worked Part Time, '29-'30

During its first year of operation the newly organized student employment bureau received 1,390 applications during the school year, obtaining for its applicants 763 permanent positions.

New Troops to Strengthen Border Line

SIMLA, India, Aug. 15 (AP)—The powerful garrison on the north west frontier today, was reinforced with formidable contingents of British and Indian infantry, fully equipped to meet an attack threatened by fierce Afghanistans tribesmen from beyond Khyber pass.

British, Indian Infantry Enforces Martial Rule in India

Mr. Hoover was told by Louis J. Taylor, manager of the national grange, C. C. Talbot, chairman of the board of directors of the farmers union, who also represented the farmers national grain corporation, and Sam H. Thompson, president of the American farm bureau federation, that the relief organization outlined at the governors conference was the most workable plan yet presented.

Officers Nab Zuta's Boxes

CHICAGO, Aug. 15 (AP)—Underworld secrets that gunmen sought to seal in Jack Zuta's safe were seized by authorities today after forcing open two safety deposit boxes used by the Elgin gang leader.

Dr. Fieseler Starts Today for California

Dr. Walter R. Fieseler, assistant in the department of genito-urinary surgery and former supervisor of athletics leaves this morning for Los Angeles, where he will be medical supervisor of the football team of the University of Southern California.

THE WEATHER

IOWA—Partly cloudy, some possibility of local showers Saturday and in west portion Saturday; not much change in temperature.

Dr. Steindler of Iowa Will Go to Paris

Dr. Arthur Steindler, head of the orthopedic surgery department of the university, has been invited to an international meeting of orthopedic specialists to be held in Paris Oct. 6.

Hotel Clerk Missing

CEDAR RAPIDS, Aug. 15 (AP)—Police have received a request to watch for James Leashby, 32, chef at a hotel here. He has been missing since Aug. 7 and his mother, Mrs. Ollie Oman of Wakefield, Neb., fears he may have become deranged by worry over a recent illness of his wife.

Masson City Pair Fined

MASSON CITY, Aug. 15 (AP)—Arrested for disorderly conduct, Albert Yarouchek and Glenn Stricklin of Albert Lea, Minn., were fined \$100 and \$50.

Fluors Still Going

ST. LOUIS, Aug. 15 (AP)—Dale Jackson and Forest O'Brien showed no sign of weakening tonight as they unfalteringly circled Lambert-St. Louis field and hourly made the world refueling flight record less and less inviting as a target for rival endurance flyers.

William Lane Souht

OMAHA, Aug. 15 (AP)—Police were searching for William Lane of Sidney, Ia., whose car was found abandoned along Carter lake last Tuesday.

1,000 Years of Reading!

That's What 367,750 Books in Libraries Could Provide

Books—367,750 of them. If a freshman upon entering the university were to read one book a day, he would have to remain more than 1,000 years to finish all the volumes contained in regular university libraries. Then, if still alive, and possessed of his eyesight and ambition, he might tackle the 76,900 volume collection of the Iowa state historical society or the 27,000 city library books.

Included in the general library total are 51,700 law books and other collections for each college, school, and department, most of them in branch libraries.

All university library books are indexed in a card catalog in natural science building from which the student makes his selection of title, author or subject, giving this data and the book's catalog number on a signpost slip to student employees at the central desk who locate the book in the "stacks" and bring it back for signing out.

Literature may thus be obtained for outside readings, assigned work, or for purposes of entertainment.

Most books in which assignments are made for university classes are placed on shelves at the reserve library in the old men's gymnasium and may be used only in that building, which also houses a study hall at which these 11,500 books are obtainable. Study space for about 1,500 students is available in all the libraries, space for 369 in the reserve library alone.

Periodicals and documents share quarters in the reserve library building, with room for 112 and 26 readers in their respective locations. Many of the works in the latter group are historical documents used chiefly by M. A. or Ph.D. degrees.

There are also special collections of rare books and works of historical value.

First consideration in allotment of study hall space is given to freshman, then sophomores. A card is included in registration materials giving those who wish study desks a chance to sign for them without making a special visit for that purpose.

Iowa Honors Her Mothers

Mother's day, an annual event planned for a May week end, gives mothers of students a two day glimpse of the university life of which their sons and daughters are a part.

Special university theater performances, athletic events, a reception at the president's home, a woman's dance drama, campus tour, special church services, and entertainments at fraternity and sorority houses and dormitories feature the yearly event.

Climaxing the program planned by Mortar Board, honorary senior women's organization, is the mothers-daughter banquet at Iowa Union Saturday night, with an attendance of nearly 1,000, including about 500 mothers.

Placement Exams Provide Index to Collegiate Career

Placement examinations which test the individual's knowledge in fundamentals of literature, science, history, and general ability are given to incoming freshmen each year in the field house.

The results of these examinations are tabulated for future reference and used in dealing with situations which arise during the student's college course. A student's grades do not depend on the mark he makes in these tests.

Students who are numbered among the upper 10 per cent in these tests will have special faculty advisers appointed. Records show these students tend to rank similarly in scholastic achievement.

Examinations this year will be given from 2-4 p.m. Friday, Sept. 19, and 10-12 Saturday, Sept. 20.

No freshman registration is complete until these tests have been taken.

Way Open for Freshmen to Join Activities

Social, Religious Work Help in Affording Self-Expression

Activities are open to the freshman student who is interested in making friends and developing leadership. Literary, musical, dramatic, religious, athletic, professional, forensic, and social opportunities are given to every student in the university.

Literary societies join in maintaining university forensics which furnish training in debate, artistic reading, and writing. Eight literary societies, six for women, and two for men, choose representatives which form the forensic council, which in turn is represented on the student council. Athena, Erodolphiian, Hamlin Garland, Octave Thanet, Hesperia, literary organizations for women, and Irving Institute and Zetaganthian, literary societies for men, each send three delegates to the council.

Cooperation with Iowa city churches finds its contact point in student societies, most of which have Sunday evening meetings. Local churches also conduct students as part of their morning congregations and Sunday schools and have special events for their university communicants.

In the music department, the orchestra, band, and chorus provide an opportunity for musically inclined students. In dramatics, the university players, debate work, studio theater productions, and stage and costume planning all afford opportunities for the student to enter into activities.

Every student in the university is a member of Student Publications, Inc., a nonprofit, self-supporting organization formed for the purpose of printing student publications. The company is governed by a board of trustees composed of five students elected by the student body, and four faculty members. This board elects the editor and business manager of The Daily Iowan, Hawkeye, and Fri-vol. It also has supervision over the business policy of The Transit, and The Journal of Business.

Although receiving income from invested funds and lands originally granted from private resources, the university depends chiefly upon biennial appropriations from the state legislature.

Pentacrest is the title given a group of five limestone buildings on the east campus. Centered about Old Capitol are university hall and natural science, liberal arts, and physical buildings.

Future Explorers Learn Taxidermy From Homer Dill

What? Stuffing birds and mounting them for display in the university museum a training for explorers? Yes. Several Iowa alumni who have been in charge of exploring trips, or served in the personnel received their training under Homer R. Dill, curator of the university museum. Most of them are specialists in birds, like their former tutor.

Under Director Dill's direction exhibits of birds, fish, and mammals are arranged in scenes approximating natural habitat. Students practiced from work on common specimens and in preparing gifts to the museum for exhibition. Modeling and casting of animal forms is part of the work.

No Questions Too Hard for Service Desk

'Oracle of Iowa' Aims to Know All, Tell All

The Iowa Union service desk is the oracle of the university. Above all other services, the desk is to stand out as a source of information for freshmen and other students. It is the aim of attendants to be able to answer any general question which may be asked.

Loyse Fisher and Margaret Echlin, with the help of two students, will have charge. One feature is the United States postal station which gives postoffice service. Mail is distributed to sorority and fraternity mail boxes at 7:35 a.m., 9:20 a.m., and 2:30 p.m. Collections are made at 7:45 a.m., 2:20 a.m., 3:30 p.m., and 9 p.m.

Registrations which the desk handled during the last school year include freshmen registrations, Iowa newspaper conference, state boy scout meeting, Homecoming, Dad's day, waterworks conference, fine arts meeting, Mother's day, civic play production contest, state music festival, state academic meet, and the high school play production contest. Reservations for all functions held in Iowa Union are made through this desk. Photograph records to be played on the machines in the lounges are checked here. Road, railroad, bus, and city information is given.

Tickets for football games, dramatic productions, and university parties may be purchased here. Newspapers, magazines, campus pictures, fraternity and sorority pictures, and

Students Rub Elbows With Iowa Customs

University Traditions Converge About Old Capitol

From the time he first dons his freshman cap to the singing of "Old Gold" at his commencement the University of Iowa student is in contact with Hawkeye traditions.

Central among them all, just as it is the focus point for campus buildings, Old Capitol is oldest of Iowa traditions and of them all most symbolic of the university.

Football season introduces the new student to "On Iowa" and "Iowa Fights." Hawkeye pep songs, and "Old Gold," university hymn.

It is a campus tradition that students do not take short cuts across the lawns.

Homecoming is a time for disclosing traditions. Each year engineering students erect a corn monument which stands at the east approach to Old Capitol, remaining after the

candy will be sold at the desk during the coming year. A refrigerated counter is to be installed for the display of candy. Checking is another of the services of the Iowa Union desk, at which there is always an attendant.

game as evidence of Iowa spirit. Bars of corn are also used in construction of an arch at the top of engineering hill.

Each Homecoming also sees a sign placed on the physics building roof by students in electrical engineering, flashing the Homecoming badge design to night observers.

Fathers of university students are guests at the football game on Dad's day, when other campus events are put on in their honor. Mother's day is an annual spring event. For each there is a banquet with a student-faculty-parent toast program.

Courtesy to visiting athletic teams and other guests is an Iowa tradition, included in the ideal of Iowa sportsmanship. New among Iowa traditions is Iowa-Nebraska day, which will come Nov. 22 this year when the Cornhuskers are football guests of Coach Burt Ingwersen's Hawkeyes.

In February comes Founder's day, Feb. 25. Next winter 84 candles will be lit on the university's birthday cake at a symbolic banquet, the program of which is broadcast to alumni groups and other radio listeners who care to tune in.

An annual event for the college of engineering is Mecca week, which takes place during April. A show featuring a male chorus, a dance, and an open house for display of work done in the college are phases of the week. Another electrical sign is made then to tell the campus that it is the engineers' gala week.

Besides the regular university parties, various colleges have traditional events. Law students have the Braxters Ball, commerce the Commerce Mart, medicine the Aesculapian Ball, journalism the Pica Ball and Wayz-

Benares, India, who spoke on philosophy; and Prof. Hans Prinzhorn, Frankfurt, Germany, who delivered several addresses in the field of psychology.

At a conference on administration and supervision, a group of university and departmental heads assembled at Old Capitol. Among them were President L. D. Coffman of the University of Minnesota, Prof. N. L. Engelhardt of Columbia university, Prof. Douglas Waples of the University of Chicago, and W. W. Theisen of Milwaukee, Wis.

Scientists in various branches of their field were present at the science conference held during the year. Among these were President D. W. Morehouse of Drake university, Prof. R. L. Abbott, Iowa State Teachers college; John Paul Goode, professor emeritus, University of Chicago; Prof. H. S. Conrad, Grinnell college; Lillian Heathershaw, Drake university; G. O. Hendrickson, Iowa State Teachers college; and F. G. Anibal, University of Chicago high school.

University lectures on various themes have been given by Prof. John

goose banquet.

Accompanying the tradition that there is no hazing at Iowa is another that all freshman men wear old gold and black caps designed for their use.

Dads to Have Day as Guests

Every Iowa dad may have his day. Officially, that day for all Iowa dads will be Oct. 18, when Iowa meets Purdue in its only Western conference football game during 1930. Last year fathers of students saw Coach Burt Ingwersen's Hawkeyes beat Minnesota, 9 to 7.

The Dad's day program begins Friday, Oct. 17, with an all university party at night. Saturday morning there will be a tour of the campus and a cross country run, Saturday night a banquet with a toast program planned by A.F.I., senior honorary society for men.

A special stadium section is reserved for university dads, their sons and daughters.

During the regular fall semester about 2,500 students are enrolled, 6,500 of them on the campus.

More than 1,000 persons take correspondence work in the University of Iowa, some by radio.

There are accommodations in general and special chemistry laboratories for 2,750 students.

ists are provided for. Three doctors, a nurse, and a secretary comprise the student health staff, handling 6,000 cases yearly from their 11-room headquarters in the new general hospital.

Seven Fined in City Court

H. A. Stonebrook Fined \$100 for Disturbing the Peace

After a layoff of more than a week where only one or two cases a day pestered the judge, matters picked up yesterday. Seven names were on the docket and fines varied from \$100 to one lone dollar.

H. A. Stonebrook was fined the \$100 charged with disturbing the peace by improper conduct on city streets. Judge C. L. Zaser suspended \$50 of the fine because of previous good record and pending good behavior. Stonebrook paid the balance and costs.

Those fined \$1 and costs were Robert H. Smith, parking too far out in the street from curb; J. W. Leaming, parking with motor running unattended; J. L. Chamberlain, parking in a bus stand; William Walsh, driving through a red stop light; and J. H. Mace, parking in a bus stand.

Case of Kingsley Close, fined \$1 for driving through a red light, is court Thursday, was posted yesterday.

Drivers Cautioned on New Parking Zones; Skipping Stop Lights

Auto drivers are cautioned against the new restricted parking zones and again on the matter of lights by Police Chief C. F. Benda and Judge C. L. Zaser.

No parking spaces have been marked out on both sides of Linn street south of the intersection with Washington street for bus stops according to the chief. Two persons who parked there yesterday were fined.

Failing to observe the red light on stop signs as well as glaring headlights and parking without tail lights also came under cautions from city officials. Officers are especially watching the signal lights and have nabbed three non-stoppers in two days. Repeaters will get heavy assessments the judge warned.

A. C. Gustafson to Face Fraud Charge

DES MOINES, Aug. 15 (AP)—A. C. Gustafson, former secretary of the republican state central committee and chief clerk of the Iowa house of representatives, was charged with fraud today in a suit filed in district court by A. A. Cooper of Indiana.

Cooper alleges that Gustafson in 1927, through "misrepresentation and false statements," persuaded him to purchase \$2,000 worth of stock in a corporation which was to be organized to buy Iowa land at 50 cents on the dollar and sell it at 100 cents on the dollar. He claims he has not received a stock certificate.

Fowl Play, Some 60 Chicks Swiped

"Where, oh where are my chickens?" is the song that James Doan, Harden township, is singing as the result of a robbery at his home Tuesday night in which thieves made away with 60 to 75 hens.

The theft was reported to Sheriff Frank L. Smith, but no trace of the missing fowls has been found up to date.

Thompson Defends Welterweight Title

CLEVELAND, O., Aug. 15 (AP)—The welterweight boxing title will be defended again just three weeks from tonight. Young Jack Thompson of Los Angeles, will defend his crown in Cleveland Sept. 5 against Lanny Freeman of Cleveland.

Contracts for the bout were signed here today. It will be a 15 round match in the league park, with Thompson to receive \$37,500. Freeman will get a nominal percentage. The fighters will weigh 147 pounds.

Local Men to Study Airport

Part of National Groups Investigating Air Terminal Sites

Four Iowa City men make up a committee for detailed study of local airport conditions and practices as part of more than 100 sub-committees throughout the United States appointed by the American Engineering Council of New York city.

Three such groups have been organized in Iowa, at Cedar Rapids, Des Moines, and Iowa City, by the national council and the findings, it is expected, will serve as a guide in the developments of future air terminals on cross country flying lanes.

Allen Wallen, city engineer, heads the Iowa City committee. His associates are D. L. Yarnell, 644 Dearborn street, civil engineer, Dean C. C. Williams of the university engineering college, and Prof. S. M. Woodward of the mechanical and hydraulic engineering department.

The Des Moines group is M. L. Patzig, J. M. Tipple, Des Moines city engineer, and Arthur Thomas, of the city building department. Arthur Huntington, H. R. Green, F. E. Young, and Dan Hunter, make up the Cedar Rapids committee, according to the Associated Press.

East hall, largest building east of pentacenter, was formerly the university hospital but has been converted from a home of healing to a hall of learning, now serving as headquarters for graduate study.

Thief Takes Purse From Local Women

A purse-snatcher, after an absence of several months, made his appearance in Iowa City at 8:30 p.m. yesterday. Mrs. H. Kuhmen and Hildegard Proehl, 610 E. Bloomington street, were his victims.

The women were near the city high school grounds at Market and Johnson streets when a well dressed man, about 25 years old, walked up behind them, snatched Mrs. Kuhmen's purse and fled in the shadows behind the school building. Mrs. Kuhmen had such a firm grip on the pocketbook that the handle was jerked completely off and left dangling in her hand.

About \$5 in cash in addition to a pair of glasses were in the purse. The thief was said to be wearing a dark blue suit. Police had no clues last night.

Good Things in Life Free

Learning Outside of Books Comes to Iowa in Various Lecture Bills

As varied as the list of human accomplishments is the array of personalities, and world figures, brought to address the student body each year by the board of university lectures.

Explorers, authors, dramatists, and political figures have been included among lecturers of the past. One scientist and explorer and two authors have already been engaged for the current year, to appear before the holidays. These men, Capt. Sir Hubert Wilkins, explorer, scientist, author and lecturer; Louis K. Anson, dramatist and author of such plays as "Tristan and Isalde," and "Daddalums"; James H. Cousins, Irish poet and educator who has twice before lectured at the university, will be followed by others.

It is possible that Vilhjalmur Stefansson, arctic explorer and alumnus of the university, who has already appeared several times before Iowa audiences, will be included in this year's program.

One "Professorship"

These lectures are free to students and faculty members, having been provided for by a fund equal to one university professorship. Five or six persons are usually brought to Iowa City through this fund each year.

Such names as Vilhjalmur Stefansson, John Cowper Powys, Everett Dean Martin, Harriet Monroe, Will Durant, Hamlin Garland, Lewis Browne and others have appeared on university lecture programs in the past.

More great men have been brought to the Iowa campus during the last 15 years than to any other university campus in the United States, according to Prof. Benj. F. Shambaugh of the political science department and chairman of the senate board of university lectures.

Other Series

Three other lecture series on the campus bring to the university speakers of a different type and appeal. The graduate college lectures, under the auspices of the graduate college, are given by men of accomplishments in special fields and while the lectures themselves are open to everyone their appeal is not so universal as in the case of those sponsored by the university.

Another series, known as public lectures, is given by men recommended by the various departments of the university, and is also open to everybody. Lorado Taft, sculptor and artist, has appeared on this series several times on the recommendation of the department of graphic and plastic arts.

Professors of the university and authorities in the various fields of arts and sciences also appear on a program made up of weekly lectures, known as Baconian lectures. These are also under the auspices of the graduate college and are designed for persons interested in recent developments in fields of learning outside their specialty.

Religion Has Day Once Each Month

Akin to university lectures but devoted to religious purposes are the vesper services of the university held one Sunday a month throughout the year. Men in social welfare and religious circles are brought to Iowa City to address student audiences.

Last year's list of speakers included Norman Thomas of New York, onetime candidate for the presidency of the United States on the socialist ticket; Rabbi David Phillipson of Cleveland, Ohio; Albert Brit, president of Knox college at Galesburg, Ill.; the Rev. Edwin B. O'Hara, member of the clergy of the Catholic church of Eugene, Ore.; the Rev. Charles W. Gilkey, pastor of the Elm Park Methodist church, Chicago; the Rev. H. Crane, of Scranton, Pa., and the Rev. George S. Buttrick of New York city.

Two services at Christmas and Easter are given over entirely to music by the university chorus and stringed orchestra. These two organizations also appear at every other vesper service.

A local minister or faculty man usually acts as chaplain.

Special Requirements

High school elective requirements are as follows: not less than one unit in physics, chemistry, or any foreign language if offered; not less than one half unit in any single subject or one third unit when the secondary school has its term divided into periods of 12 weeks each.

Sept. 22, Monday—University induction ceremony, 8 a.m. Eight o'clock classes immediately following ceremonies.
Nov. 11, Tuesday—Armistice day; classes suspended.
Nov. 14, 15, Friday, Saturday—Homecoming; classes suspended.
Nov. 27, Thursday—Thanksgiving day; classes suspended.
Dec. 19, Friday—Holiday recess begins, 6 p.m.
Jan. 6, 1931, Tuesday—Work resumed 8 a.m.
Jan. 31, Saturday—First semester ends, 6 p.m.

Second Semester
Feb. 2, Monday—Second semester begins, 8 a.m.
Feb. 3, Tuesday—University convocation.
Feb. 25, Wednesday—Foundation day.
April 1, Wednesday—Easter recess begins, 6 p.m.
April 7, Tuesday—Work resumed, 8 a.m.
May 30, Saturday—Memorial day; classes suspended.
June 1, Monday—Second semester ends; Commencement, 9 a.m.

First Year at Iowa Largely Requirements

Two Electives Permitted; Others Prescribed

Variation in the individual capacities of students has been provided for according to the theory of a plan of study adapted for freshmen two years ago which will be followed again this year.

Normally, a freshman is required to take 13 1-2 or 14 1-2 hours of work under the present plan instead of the 16 hours formerly required.

Students who intend to major in chemistry or social work may specialize at once. None of the professional colleges, however, with the exception of engineering and pharmacy, are open to first year students.

Course Mapped Out
The typical freshman study list includes five courses plus work in physical education and military. In addition to these courses, every freshman is required to attend freshman lectures which are given for a brief period at the beginning of the year and are designed to orient the student with his surroundings.

These five courses include: English rhetoric, speech, and foreign language. One elective from each of two of the following three groups may be selected: 1—American government, American history, commercial geography, industrial history, European history, or logic, ethics; 2—botany.

(CONTINUED ON PAGE 10)

Student Pays as He Wills for Education

Luxuries "Optional" in Budgeting of Year Finances

Supply and demand play little part in the cost of a university education. The purchase price of a four year college course varies directly with individual demand for the pleasures and luxuries of life.

Minimum \$600 to \$800
However, definite statistics from the office of the deans of men and women give the average cost for a woman student as \$750 while for men \$600 to \$800 is considered a conservative estimate.
These figures are based on actual expenditures that a student must make for living, books, fees, and incidentals.
Figures from the office of the dean of women show expenses for women to be as follows: tuition, \$96, out of state, \$40 more; matriculation \$10; board and room \$450; books and supplies \$25 or more; and incidentals \$100. These expenditures will allow the student to live comfortably.

Expenses for men are largely the same as for women. Lonzo Jones, assistant dean of men, gives the following quotations: tuition \$96; matriculation \$10; room in the quadrangle \$108; board \$216; military deposit \$10; books \$25 to \$40. Incidental and recreational expenses depend upon the individual.

Professional Tuition Higher
Tuition fees for the various colleges are listed in the university catalog as follows: per year, liberal arts \$96; education \$96; commerce, \$96; engineering \$106; law \$123; medicine \$192 dentistry \$192 pharmacy \$106; and graduate college, \$96. Student nurses are now charged a fee of \$50 for each of the first and second semesters of the freshman year.

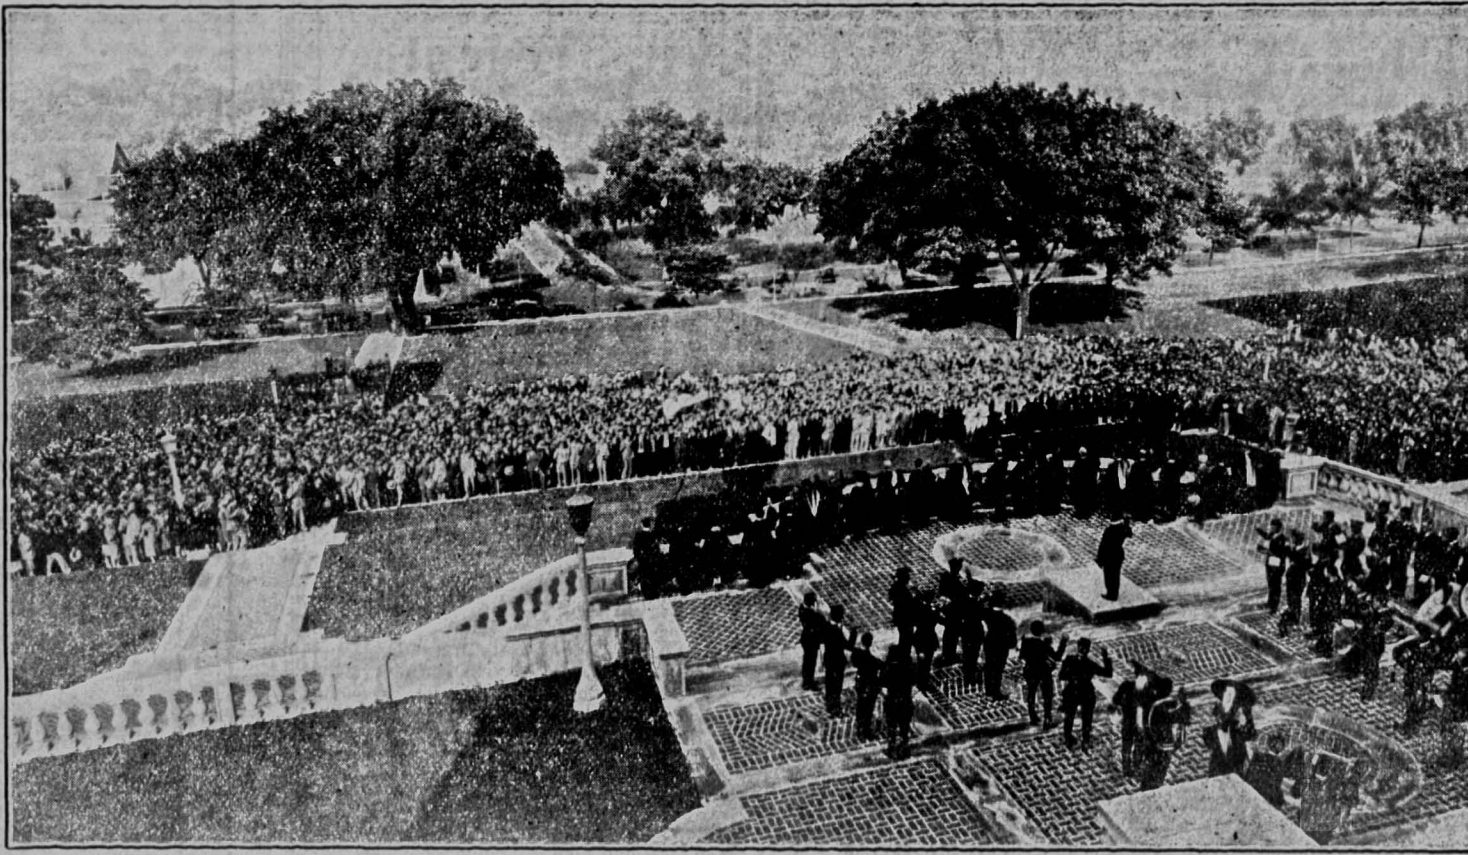

Follow These Steps During Registration

Freshman registration begins Wednesday, Sept. 17, and will proceed as follows:

1. Go to the north entrance of the natural science building at 2 p.m., Wednesday to get registration materials.
2. Have fees assessed in room 1A and pay fees in room 2 of university hall starting Thursday at 8 a.m.
3. Go to Iowa Union to select courses immediately following payment of fees.
4. Take qualifying examination part 1 at field house from 2 to 4 p.m., Friday.
5. Take qualifying examinations part 2 at field house from 10 to 12 a.m., Saturday.

Students who register in the graduate college are expected to take a medical examination one month after admission.

Old Gold Opens University Doors to Class of '34 During Freshman Week

A tradition now is the ceremony held each fall on the west approach to Old Capitol, at which the assembled student body pledges allegiance to the university and its ideal of scholarship.

Six thousand voices repeat in unison, "I pledge, here and now, lifelong loyalty to the ideals of scholarship and character of the founders of this institution to the end that I may loyally serve this university, this commonwealth and this nation," while 6,000 uplifted hands point to the stars and stripes and the flag of the university floating over Old Capitol.

This induction ceremony has been a part of school's opening procedure for eight years. Begun in 1922, the ceremony was first held at Iowa field, and has since been held success-

fully on the campus east of Old Capitol and west of the physics building. For the last four years it has been held on the west approach.

The ceremony is simple. When the students have assembled, President Walter A. Jessup and the administrative officers appear on the west portico of Old Capitol in academic costume.

The university band plays one verse of "Star Spangled Banner," and one of "Old Gold." The flags of the nation and the university are raised.

After an invocation, President Jessup welcomes the student body, the pledge is repeated and one more induction has become the cornerstone of another academic year.

H. S. Credits Must Total 15

Engineers Need Extra Math Basis for Entrance

Any graduate of a four year Iowa high school is eligible for unqualified admission to the University of Iowa. Satisfactory evidence of having completed the high school course or a four year course in some private institution will allow the student to enter the university without examination. He will be allowed to make-up certain required credits if his high school course has not included them.

If the applicant is not a graduate, but has proof that he has fulfilled the specific requirements for admission, plus a statement from the principal

of his high school that he is in good standing, he may be admitted to the university. He must have 14 acceptable year units and must make up all deficiencies within one year after admission.

The units required for unconditional entrance in the college of liberal arts must total 15. The grouping of the units is as follows:

Iowa: English 3, history, civics, economics, sociology, 1 1-2; algebra 1; plane geometry, 1.

From the elective group additional work to make 4 1-2 units is necessary. This group includes: English, foreign language, history, civics, economics, sociology, mathematics and natural science.

The remaining four units may be selected from the secondary school course, if they were counted by his high school toward graduation and conform to the regulations of the Iowa board on secondary school relations.

When classes begin Sept. 25 the University of Iowa will be commencing its seventy-fifth year of instruction.

Latch Strings Out to Future Sons of Iowa

Registration Period of Orientation for Newcomers

Registration, once considered open season on freshmen, has been transformed into open house for freshmen at the University of Iowa.

Two days before upperclassmen are slated to begin their registration, during a period known as freshman week, university doors are thrown open to freshmen. More than 100 campus leaders will be on hand to help orient the newcomers into their changed surroundings.

Business, Pleasure
The week of Sept. 17-22 has been laid out in a definite program for all freshmen to follow. Routine work is mingled with intermittent pleasures in an effort to make these first few days as enjoyable as possible.

Special teams will meet all incoming trains during the time that first year students are arriving in Iowa City to help with the locating of rooms and boarding places.

New students will have opportunity to learn the locations of university buildings and to get acquainted with each other and with their instructors so that opening classes which begin Monday, Sept. 22, will not be so much of a bewilderment as they are so often pictured.

Zero Hour Wednesday
Wednesday, Sept. 17, registration materials will be dispensed from the natural science building, beginning at 2 p.m. All freshmen will assemble at the north entrance to receive initial materials and instructions. Thursday, registration will begin at university hall and Iowa Union. Thursday at 7 p. m. a freshman assembly will be held at Iowa Union at which time the class of '34 will have an opportunity to hear the president of the university and the president of the Iowa Union.

Dances Vary Campus Life From Routine

Iowa Union Furnishes Background for 15 Parties

By HESTER HISE
(Daily Iowan Society Editor)
"On with the dance! let joy be unconfined."
No sleep till morn, when Youth and Pleasure meet."
Life at the university is lightened by the gaiety of the all university parties, some formal and some informal, held at Iowa Union. Diversion after a week of classes, these parties have been attended by as many as 800 couples.

The main lounge of Iowa Union, 90 feet by 136 feet in size, is the scene of all university dances, and beautiful in itself, is seldom decorated. Only the orchestra platform, set against the north wall, is decorated, and usually presents the theme of the dance, along with the programs which often are a replica of the orchestra setting.

Chaperons, Supervision

All parties are chaperoned by students and by faculty members, and are under direct supervision of the university committee on social organizations and affairs. Among the 10 faculty members of this committee are Rufus H. Fitzgerald, director of the Iowa Union, Adelaide L. Burge, dean of women, and Robert E. Rienow, dean of men. It also includes six student members. With the exception of the Junior Prom, the Senior Hop, the Sophomore Cotillion, and the Military Ball, all dances end at midnight.

Social affairs begin with the freshman party, planned by members of the freshman class. This is informal. Other class parties are the Sophomore Cotillion, the Senior Hop, and Junior Prom, with committees chosen by each class president. These dances are all formal. The Military Ball is the only other all university formal.

Informals

Informal dances given during the year are the Barrister's Ball, the Pica Ball, given by the journalism students, the Mecca Ball, engineer's party, I Blanket Hop, sponsored by A.F.I.; Pep Jamboree, given by Phi Epsilon Pi, pep fraternity; the Homecoming party, Commencement ball, Commerce Mart, given by the commerce students; the Aesculapian Frolic, sponsored by the medical students; and the May Frolic, sponsored by Mortar Board. Outstanding among dances given by Greek letter organizations are the women's and men's pan-hellenic parties.

Iowa Men Behave "Like Gentlemen" Don't Have Rules

No written regulations govern the conduct of men at the University of Iowa other than the regular rules for class attendance and scholastic regularity.

Study hours and hours that a student keeps are entirely up to the individual himself.

"However," says Lonzo Jones, assistant dean of men, "there is an unwritten law of the university, that all Iowa students will conduct themselves as gentlemen at all times and abide by the laws of the country."

"Anyone who breaks the laws of common decency is marring the good name of the university and will be dealt with by the discipline committee."

"So far as I know," Jones continued, "there is no written rule against drinking in the university. However, the rule of the country against drinking makes the act a grave offense in the eyes of the discipline committee."

The university maintains a clinic in speech pathology where stutters are taught to write left handed as a means of cure.

Dean of Women

ADELAIDE L. BURGE

Rushes Will Meet Sept. 15

Sororities to Entertain Potential Pledges Three Days

Preference system of bidding is used in the rushing of sororities on the Iowa campus. In order to understand this system fully, and the rules and penalties of the rushing period, a meeting of all rushes will be held Monday, Sept. 15, in the liberal arts auditorium, attendance at which is compulsory. In case of an unavoidable absence, an excuse is to be presented at the office of the dean of women.

Invitations for rushing dates were mailed Aug. 15, to which no acceptance should be made before Sept. 1. The period of rushing will begin Sept. 15, and continue until Sept. 17. The last night of rushing is open house for every group and no sorority may entertain at a preferred party or force a rusher to stay at any house. All rushing shall end at 10 p.m. Sept. 17 and shall not be resumed until Sept. 23. No invitation to join a sorority may be issued before Sept. 18 at 9 p.m.

Preferred parties scheduled for Monday, Sept. 15, include: Alpha Xi Delta, Chi Omega, Delta Delta Delta, Delta Gamma, Delta Zeta, Gamma Phi Beta. Tuesday preferred parties will be: Kappa Alpha Theta, Kappa Delta, Kappa Kappa Gamma, Phi Omega Pi, Pi Beta Phi, and Phi Mu. Sororities having preferred parties on Wednesday are: Sigma Kappa, Theta Phi Alpha, Zeta Tau Alpha, Alpha Chi Omega, and Alpha Delta Pi.

Latch Strings Out to Future Sons of Iowa

(CONTINUED FROM PAGE 9)

various deans in welcoming addresses.

Beginning at 9 a. m. on Friday, there will be a presentation and explanation of the various activities on the campus by men in charge.

The first part of university qualifying examinations for freshmen will be held in the field house from 2 to 4 p. m. Friday, and the second part from 10 to 12 a. m. Saturday.

An all freshmen party at which the newcomers will be introduced to Iowa social life is scheduled to take place Saturday night beginning at 8:30 p. m.

Some members of the faculty will address the group Sunday morning at the east side of the natural science building at 10:15. All freshmen are expected to attend this meeting.

During the entire registration process guides and advisers will be posted about the campus to answer any

Women Must Get Home by Closing Time

May Live at Sorority, Dorm, or With Parents

Housing regulations for university students are passed by the committee on student housing, which is given such authority by the state board of education. All students are required to live in quarters approved by the university.

Since September, 1929, all freshman women are compelled either to reside with their parents, in the university dormitories Corrier hall, Eastlawn, and Westlawn, or in an approved sorority house which complies with the regulations of the university in matters pertaining to location, construction, supervision, and matters of scholarship and discipline. Women students, except freshmen, may also live in approved rooming houses.

A married student when living with his or her husband or wife, as the case may be, is permitted to live in an apartment or rooming house not approved as a student rooming house, but may be required to move from such if the housing committee deems it to be unfit for student residence. Any student who lives in quarters not approved by the university will be reported to the discipline committee.

All sororities and similar groups are required to have house mothers, approved by the dean of women. Fraternities are encouraged to make a like provision. Zones defining the location of sorority and fraternity houses have been established, and any group planning a change of residence must consult with the committee on social organizations and affairs.

The hour for closing houses to visitors except on Friday and Saturday is 10 p. m. Women attending university parties must be in at 12:30 a. m. with the exception of the Sophomore Cotillion, Military Ball, Senior Hop, and Junior Prom. Permission to be out after hours must be obtained from the dean of women. Permission for any exception to the housing rules must be obtained from the offices of the dean of men or dean of women.

Various Colleges Branded by Garb

By their apparel shall you know the various professional upperclassmen.

Senior laws swing cases which have their names inscribed on metal bands. Derbies are the mark of senior dental students. Commerce students wear black felt hats with red feathers. Fourth year engineers appear in suede leather jackets bearing a yellow castle on a dark background. Professional uniforms are worn by medical students and nurses.

questions that the freshmen may have. The offices of the dean of men and women will function all during registration and both the deans and their cohorts will be ready to render assistance.

Dean of Men

ROBERT E. RIENOW

First Year at Iowa Largely Requirements

(CONTINUED FROM PAGE 9)

chemistry, geology, group science, mathematics, physics or zoology; and graphic and plastic arts, home economics or music.

May Postpone Speech

By special permission a student may postpone speech until his sophomore year and register for an additional subject from the above courses.

Each course must be continued for the entire year and not more than one course may be taken in any one department.

Any student who has completed in high school four units in a single language or two units in each of two foreign languages, may be excused from the university requirements in this subject. At the university he may elect German, French, Spanish, Latin, or Italian.

Freshmen women must take three periods weekly of physical training. Freshmen men have one period weekly of physical education and three of military training.

Extra Work Disapproved

Any student who wishes to carry more than the normal requirement for freshman work must be authorized by the dean of men or women, and students who must undertake outside work are advised against it, even though their high school scholarship has been superior.

Normally, the freshmen will have earned at the end of the first year either 25 or 28 hours of credit.

Freshman study hours are governed by no set rules, but many instructors plan their work to require two hours of preparation for every hour in class. Study desks, where the student may study during his free periods are available at the library annex.

Student May Begin Work in Religion as Sophomore

Renewal of Aid From Rockefeller Gives \$20,000 Yearly

Religion has its place in the University of Iowa curriculum. Courses are available to students in liberal arts with the rank of sophomore.

Unique in American education, the school of religion has functioned during three school years through support from an endowment by John D. Rockefeller, Jr., and provision from three religious faiths—Catholic, Jewish, Protestant each maintaining a faculty member.

Given for three years, the millionaire's original grant expires Sept. 1, 1930, but a renewal authorized last summer will extend the work for another year period.

Teaching Staff Members. By means of this \$20,000 annual provision, administrative and general expenses are paid, including the salary of Prof. M. Willard Lampe, director of the school.

Other staff members for 1930-31 are Rabbi Moses Jung and Prof. Charles A. Hawley, former Congregational minister. Any sect can maintain a chair in the school by paying for its professorship.

Courses taught by the three faculty members include the religion of the Old Testament; life and teachings of Jesus; history of biblical literature; religious education and the church school; religious interpretation of life; methods of religious work with university students, and biography of religious leaders.

Some of these are courses in practical religious activity, some in history and interpretation.

Y. M. C. A. Leadership. New on the school of religion staff this fall will be William H. Morgan, who will devote his time chiefly to extra curricular work in connection with the university Y. M. C. A. Relationship is also maintained by the school with the Y. W. C. A., Newman club, Philo club, and other religious or church groups of students.

Majoring in religion may include

M. WILLARD LAMPE

No Hezting at Iowa; Special Caps Worn by Freshman Men

Hezting has been banished from the Iowa freshman's kingdom and in its place a symbolic crown given him to wear in token of his first year status.

This year for the first time the headpiece will be in old gold and black, school colors, instead of the traditional green. The new type is a hat resembling a polo hat with the brim turned up. Formerly caps were worn. "By this sign shall you know them," is campus tradition concerning freshman caps as soon as first year students have registered.

In late fall the freshman caps are burned in a bonfire as a token that the period of pledgeship is over and the student a full fledged member of the student body.

Enthusiastic activities not so small as to be overrun by the college Iowa City with its 15,000 population presents almost a happy medium.

There are 15 blocks to the city's business district. For the most part campus and city are separated although one business street is bordered on the east by college shops and on the west by principal university buildings.

Street Improvements. Airlines, bus lines, railways, and electric interurban, and highways serve to facilitate transportation and make the city a shopping mart for a trade area of 19 to 30 miles in diameter depending on which direction one travels. Street railway lines within the city were supplanted this summer by new motor coaches and the new paving plan has called for the removal of trolley tracks in certain areas of the business district where new paving was laid. Street signs have also been added this summer.

The city boasts four high schools, two parochial, one public and one university controlled, in addition to one junior high, a university elementary school, and six public grade schools.

Time State Capitol. As the name implies the city was created to serve as the state's principal city and served as that from 1839 to 1846, when it was territorial capital and from 1846 to 1856 as state capital. The old capitol building is

State Capital Then, Home of SUI Now

With 16,000 Residents Iowa City Has 15 Store Blocks

By H. STANLEY WOODRING (Daily Iowan City Editor)

Iowa City is the ideal city for a large university. This has been the opinion of students and visitors for years and is one of the chief talking points of both the chamber of commerce and the university itself.

Neither so large as to engulf the university and put a damper on its

as well as courses in the school, sections of others bearing on religion in various departments.

The school is under the direction of a board of trustees whose 16 members represent the University of Iowa and communicants in the three

faiths throughout Iowa.

Journalism Students Make Daily Iowan Their "Lab"

Arts, Science Courses Required Besides Technique

What's in the news today?

For a corps of more than 100 embryo newspaper men and women at the University of Iowa the task of furnishing timely "coverage" on all current happenings in and about Iowa City is but part of the required work in journalism.

Newspaper training, as outlined by the Iowa school, must include practice as well as theory, and must provide the student with a cultural background as well as technical skill.

Emphasis on Background. Two-thirds of the journalism student's work must be done in the arts and sciences to help give him the background he needs for writing.

The theory of newspaper work is taught in the classroom by five instructors and professors who have themselves been newspaper men and

now used as university administrative offices.

Rigid building ordinances keep business, industrial and residential districts separated and serve to group fraternity and sorority houses so that each section of the city is in its proper atmosphere. Because of its location and facilities as seat of the state university, Iowa City calls itself "the Athens of Iowa."

women. Prof. Frank L. Mott is director of the school.

Students receive instruction in reporting, copyreading, newspaper organization and management, editorial and feature writing, journalistic history and ethics, advertising, and the arts of printing and engraving.

The school of journalism and The Daily Iowan have grown hand in hand, the latter to become an eight page daily newspaper, the former from a department offering four courses by one man in a corner of the liberal arts building. From that one room journalism has expanded since 1921 to occupy a building of its own.

Journalism's "Laboratory". Laboratory facilities for putting into practice the things they have learned in class are offered to students in various campus publications.

The Daily Iowan, a daily morning newspaper, is edited by students. A corps of more than 50 student reporters cover every phase of news from football games, university parties, and conferences down to the "personals" in the society columns. These stories are read, corrected, and "headed up" by student copyreaders, and arranged to make up a good looking paper by a student night editor.

There is also a student business manager. Editorials on topics of current interest are written by students of the editorial writing class, while features

of every conceivable nature are turned out by student writers. Few prominent men visit the Iowa campus and leave without having been interviewed by a reporter from The Daily Iowan. A humor column, sports column, and a column of comment on local city events provide outlets for those who have things to "say."

Literary-Feature Supplement. An eight page Sunday tabloid magazine section, introduced last year to take care of Sunday feature material, also provides an outlet for expression of a literary nature.

Four other campus publications are handled by students: The Hawkeye, Iowa's yearbook and official organ of the junior class under the direction of an editor and business manager from the class; Frivol, university comic; Journal of Business, edited by college of commerce students, and Transit, issued by the college of engineering. These are all printed in the same plant.

Student Publications incorporated, under the management of Harry S. Bunker, himself an Iowa graduate and Daily Iowan trained man, guarantee self support and undergraduate control of the various publications.

Modern devices and shop equipment include leased wires from The Associated Press, with automatic printer machines which keep the Iowan in constant touch with the outside world. Four modern linotype machines and up to the minute equipment enable the shop men—some of them students—to complete the work of the editorial staff.

A university power plant on Iowa river transforms water power into light and burns coal to make heat for all university buildings, piped over the campus in heating tunnels.

Prof. Sherman M. Woodward of the college of engineering has been named consulting engineer for a projected national hydraulics laboratory at the United States bureau of standards.

The First Thing TO DO—

When you come to Iowa is to subscribe for **The Daily Iowan**

Reasons

Why The Daily Iowan is Necessary—

1. Contains the official University Bulletin.
2. Lists a daily program of events.
3. Gives news of campus, city, state, and nation.
4. Forms your contact with the University and with the world.

IN GENERAL

5. Comes to your door each morning. Read it with your breakfast coffee.
6. AP leased wire service.

Until you become acquainted at Iowa, your best friend will be one who can keep you informed of the campus news—of the schedule of events—of the university activities in general. The Daily Iowan, then, you will find, will be your best friend—it will guide you through the tedious job of registration and the uncertain weeks to follow.

When you come to Iowa subscribe for

The Daily Iowan

"First With The News"

ACROSS FROM CAMPUS

A Word to the Smart Young Miss Getting Ready for School

Soon you and Mother will start out to look for fall clothes. Mother, as usual, will have her troubles in reconciling your uncommon good taste with Dad's good common sense. Every girl wants to be in style with university women. It is at school that a girl is really on exhibition.

However, we are not worrying about the outcome; you will be able to take care of that. Our purpose is to caution you not to be cajoled into making a selection until you have seen the smart things we have been getting together for stylish young ladies like you.

Expert stylists who know what the sub-debs of Smith, Vassar, and Bryn Mawr choose have helped us, and when you make your selection at Helen Donovan's, you are assured of receiving apparel that will be exactly in keeping with the university mode for Iowa women.

Moderately Priced!

Iowa River Bisects 386 Acre Layout

50 Buildings of Campus Extend Out From Old Capitol

With Old Capitol as the focal point 50 buildings scattered over more than 386 acres of land comprise the University of Iowa campus. Present plans of the university call for grading and landscape gardening as well as improvement and replacement of several older buildings.

Most of the buildings on the east side of Iowa river, which is the dividing line between the east and west campus, have been constructed within the last century in Italian renaissance style of architecture. Those on the west campus of more recent construction, are in modified early English.

Pentacrest the Hub

About Old Capitol, the first state house of Iowa, completed in 1846 and remodeled in 1924, are grouped four other buildings. Pentacrest is the name given to the group including liberal arts, natural science, physics, university hall and Old Capitol.

North of this nucleus are the law and geology buildings, women's gym, dentistry and chemistry buildings. Iowa Union, constructed in memory of university men and women who have died for their country, now has two of six proposed units completed. The third part will include a university theater.

Currier hall, university residence for women; university schools building, including elementary and high school divisions, and the home of Pres. Walter A. Jessup, about a half mile north of Old Capitol, complete the north group.

East hall, housing the graduate and education colleges and graduate units of philosophy, psychology, speech, and child welfare is the largest building on the east campus. Others are the journalism building, with offices and plant of student publications, incorporated, electrical engineering and zoology buildings.

South and southwest from pentacrest are the engineering building, hydraulic laboratory and testing plant, and the hydroelectric power plant on the east end of the dam across the Iowa river. Iowa field and the library annex complete this group.

EASTLAWN, WESTLAWN, ALL ABOUT TOWN

Reading from top to bottom on left, Currier hall, westlawn, and quadrangle; right, above, eastlawn.

Currier hall, dormitory for women, is a fireproof building of brick and limestone, three blocks north of Old Capitol campus, which accommodates 300 women. Rooms are equipped with electricity, telephones, and hot and cold running water, and also furnished with rugs, shades, single cots, dressers, study tables, and chairs.

Westlawn is the dormitory for student nurses, and is situated on the west side near the hospitals. It accommodates 400 women. The quadrangle, dormitory for men, is also situated on the west campus, near the field house, and is a home for 700 men. As in the case of the women's dormitories, student government is a feature. In addition to furnished individual rooms, the "quad" is provided with club and dining room facilities, has its own post office and cafeteria.

Eastlawn, a four story brick building, three blocks east of Old Capitol campus on Iowa avenue, has double rooms for 84 women. This building, as well as Currier hall, has dining room service for its occupants. Women living in the three dormitories observe university hours.

nurses home; the quadrangle, university golf course, are the major city residence for men; field house buildings of more recent construction, and Finkbine field, the uni-

DRY CLEANING adds freshness!

Why is it that pictures and plays dealing with life in the Congo dwell so much on the theme of soiled, wrinkled clothes? There's a reason. It is because sloppy attire actually has a psychological effect, carrying an aura of dismal depression. Keeping your clothes spic and span not only enhances your appearance but truly adds to your personal feeling of freshness and cheer. Let US do it!

You will find our service prompt and our employees courteous.

Apparently... As alike as two Peas in a Pod

Two quarts of Milk are set before you. They look alike. Both are white and opaque and both, we shall say, show the same amount of cream. In so far as the eye can tell there is no difference.

But back in their production, in their handling, may lie a world of difference, a difference which will manifest itself in the safety of the Milk, in its wholesomeness, and in the time it will remain sweet.

SIDWELL Pasteurized Milk is under a constant vigil from the time it is produced until it reaches your doorstep. The Milk from each of the selected farms supplying us is tested to see that it is properly cooled, that it is free from sediment, and that the bacteria count is low. Any that fails to meet our requirements is rejected.

And then for your Protection all of our Milk is Pasteurized. Pasteurization, you know, is recognized by leading scientists everywhere as the only way to render milk safe.

Our routes pass your door. Phone us your order or stop our route man.

Athletic Plant on West Side Sport Center

\$1,050,000 for Stadium Seating 42,184, Field House

The Hawkeye athletic plant includes the stadium, field house, tennis courts and golf links on the west side, and Iowa field and tennis courts on the east side.

The stadium erected at a cost of \$500,000, has a seating capacity of 42,184 permanent seats, with a possible 5,000 more to be added by the erection of temporary bleachers at the ends of the horse shoe. It was dedicated last Homecoming, when Captain Willis Glasgow ran 75 yards for a touchdown on the second play.

Only home football games are now held in the stadium, although present plans are to gradually transfer all sports to the west side. In preparation for this move, the arena surrounding the stadium is being considered, and a track will be constructed around the playing field in time.

5,000 Basketball Seats
The field house, a \$550,000 structure completed in 1929, is equipped with a basketball amphitheater in which all home contests are played. Wrestling meets and university boxing championships are also held on the basketball floor. Permanent stands for 5,000 spectators are at the sides of the basketball floor, and temporary bleachers for 2,000 more may be erected.

The armory, west of the amphitheater, and constructed as a continuous building, has space for field events of indoor track meets, military drill, spring football practice and rifle meets while a cinder track, used for home indoor track meets, runs around the basketball floor and the armory parade ground, six laps to the mile.

Class rooms are on both sides of the armory. The north wing of the field house is given over to a large gymnasium where the gymnastic team conducts both meets and workouts. Four basketball courts, which may be converted into volleyball courts, and varied gymnastic apparatus, is housed in this wing. Gym classes are conducted on the basketball courts.

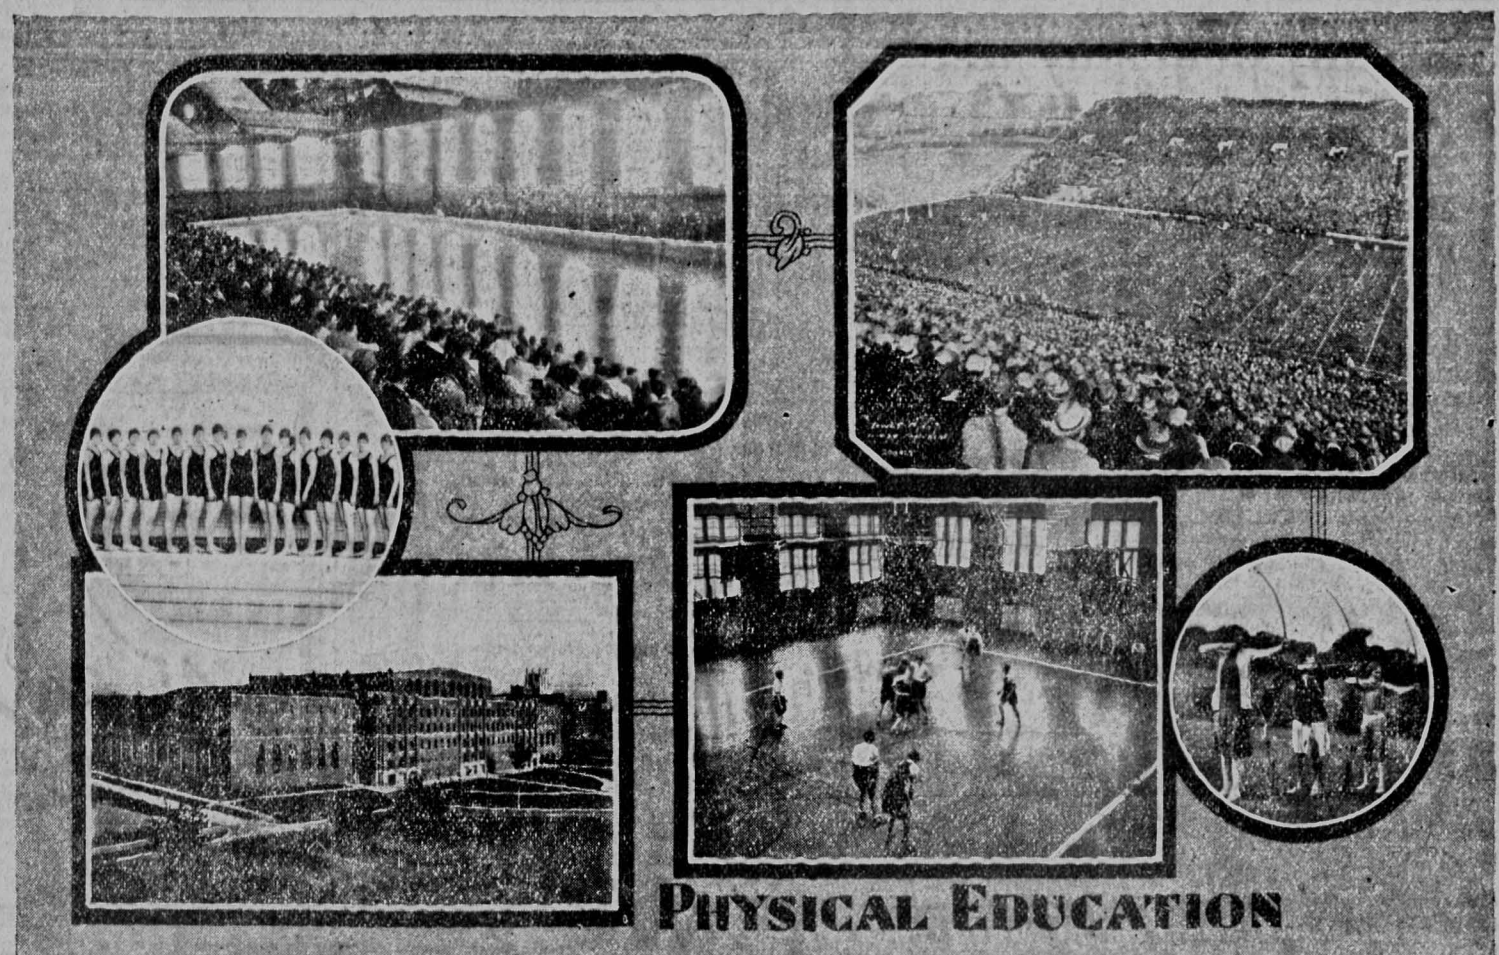

In the basement of the south wing, the Iowa tank, largest indoor pool in the Western conference, is the major point of interest, with dressing rooms and showers adjoining. In the tunnel between the east and west wings, 22 shower baths are provided, and lockers and showers are also supplied to the various smaller varsity dressing rooms. A large locker room, taking up the entire basement under the north wing, provides dressing and locker space for 1,500 men.

Offices of the athletic department and practice mats for wrestling are provided on the second and third floors of the center section.

Old Iowa field on the east side, with many historic athletic contests as a background, is now used for football practice, outdoor track meets, and baseball. The stands around the old football field and track seat 20,000 spectators, and those to the east and north of the baseball diamond seat 3,000.

Sam Barry, former Hawkeye basketball coach, now turning out winning teams at the University of Southern California, is a member of the basketball coaching school which will be conducted at Frankfort, Ind., next week.

Cosch Albert Baumgartner of the gymnastic team has acquired a deep chest of tan driving a truck for the construction work on Finkbine field.

PHYSICAL EDUCATION

First, Second Year Men Must Take Military Drill

Bandmen Get Excuse; Parades Feature Activities

Required of all physically fit freshman and sophomore men in liberal arts, engineering, and pharmacy, military training provides about 1,250 cadet members for the Iowa R.O.T.C. regiment, including upperclassmen who elect the advanced officer training.

Under Lieut. Col. Converse R. Lewis, commandant, 15 commissioned and non-commissioned officers detailed from the United States army drill and instruct students in military.

Parades Armistice day, "Governor's day," during inspection by war department representatives and on other occasions during the year feature R.O.T.C. work. Underclassmen who make the university band are excused from military drill, but participate in parades with the band.

Awards are given at the end of each school year to the cadets pronounced "best drilled" in infantry, engineering, medical, and dental units. Individual and company prizes are given.

Women's Phys. Ed. Has Building, Field
Physical education classes for women are conducted in the women's gymnasium, a three story brick building 73 by 141 feet, with a three story annex adjoining. There are locker and dressing rooms, shower baths, and a white enamel swimming pool 24 by 60 feet.

Offices, remedial room, and an exercise room are on the first floor, while exercise halls and other rooms are on the second floor.

Outdoor sports, such as hockey and archery, are held on the women's athletic field one-half block from the gymnasium and extending a block and a half along the Iowa river.

New Tennis Courts Bring Total to 34

Tennis courts now being constructed for use during the coming year bring the university's total up to 34. Of these, 27 are on the west side, with the field house as a base, and seven others are on the east side lots next to the reserve library.

Present plans, in conformation with the policy of removing all sports to the west side, call for abandonment of the east side courts when the reserve library is demolished to make way for the building program of the university.

ably met in dual meets, although definite arrangements have not yet been completed. Coach Bresnahan said this week that another meet might also be lined up. The Big Ten conference meet will be held at Columbus, Ohio, Nov. 22.

No captain will be chosen for the year as last year's plan of selecting a captain for each meet and electing an honorary leader at the end of the season will be followed.

Outstanding candidates for this year's team, in addition to Kelly and Wickey are Henry Fairchild of Iowa City, E. H. Gunderson of Belmond, Dick Parrish of Webster City, A. E. Stanley of Corning, L. A. Thurston of Clinton, H. L. Tennant of Seymour, E. G. Trout of Iowa City, J. A. Welter of Marshalltown, and Norman Rosenberg of Weehawken, N. J.

State and national church organizations of several denominations maintain student pastors on the campus, and several have special student centers for conferences and socials.

First call for cross country candidates will be issued Tuesday, Sept. 23, with two major "I" winners of last year expected back as a nucleus for the squad. Tom Kelly of Parnell and H. W. Wickey of Pomeroy, the veterans, will be supported by a squad of about 60 men who have been invited to report by Coach George T. Bresnahan.

William H. Everingham of Ft. Madison, another major letter man of last year, has reported that he probably will not be in school during the coming year.

Missouri and Minnesota will probably

Sport Briefs

Charles R. Brookins, freshman track coach, is holder of the world's 220 yard low hurdle record at 23 seconds flat.

Harold "Mike" Howard, wrestling mentor of the University of Iowa, has turned out seven individual conference champions and one Olympic wrestler during his nine years of service.

The pedometer worn by a person who walked around the main lounge of Iowa Union 12 times would register a mile of travel, according to the new student desk's information bureau.

George T. Bresnahan, Hawkeye track mentor, has been invited to serve as an official at the National A.A.U. championships at Pittsburgh Aug. 23.

Tap dancing will be listed among the physical education courses open to men students this fall.

Women Choose Phys. Ed. Menu in Cafeteria Fashion

Ability to Swim, Health Work Required of Frosh, Sophs

Required of all first and second year women in the college of liberal arts, physical education is now mainly a matter of choosing among courses offered. Under the direction of Prof. Elizabeth Halsey, head of the physical education department for women, freshmen may have their choice of sports from a list including field hockey, golf, swimming, archery, canoeing, volleyball, tennis folk dancing and basket ball.

Although this is required only of freshman and sophomore women, upper class students are urged to take some kind of physical education in order to keep in good health.

Requirements
Ability to swim the length of the pool using the side stroke, to dive from the side of the pool and to float 30 seconds are required by the end of the sophomore year. Another requirement is the course in the fundamentals of health for freshmen. This course includes the study of the laws of health and the development of poise and agility. Conference interpreting for each student records of physical examinations, basing work on the findings of the examination, and measuring progress of all first year students.

Cooperating with the physical education department is the women's athletic association, whose goal is athletic accomplishment and good sportsmanship. Organized in 1913, the society has grown to a membership of more than 150. Any woman in the university is eligible for active membership.

W. A. A. Points
To enter the organization, a girl must earn 50 points. These points may be won by participation in any sport. Intramural tournaments are put on by the W.A.A. Sororities and other organizations may and do enter these tournaments, the winner of which is awarded a silver loving cup.

The association also endeavors to provide social life for the college women, and besides its regular meetings, entertains with a number of parties. An annual dance drama includes dramatic themes, short dramatic forms, and humorous sketches.

Tap dancing will be listed among the physical education courses open to men students this fall.

Frosh May Select Phys. Ed. Course

Iowa offers a choice of physical education courses for men with fencing, clog dancing, boxing, gymnastics, wrestling, and swimming on the bill of fare. In addition to these, there are the regular gym classes assigned to freshmen and sophomores who have no preferences, besides special classes designed to correct deficiencies.

During the fall, outdoor sports, such as soccer football, will be taken up and intramural sports, basketball, volleyball, water polo, swimming and physical efficiency contests, will be inaugurated in the winter and spring. Outdoor spring sports will be tennis and golf.

Candidates for varsity or freshman teams are excused from physical education class work, as long as they are members in good standing of the squad.

All assignments to classes are preceded by a medical examination. E. G. Schroeder, director of physical education, will be in charge of the department, and will be assisted by instructors in the various courses.

Elizabeth Halsey

Golf Course Gets Addition, Facilities

Finkbine field, university 18 hole golf course, is being lengthened from 6,630 yards to 6,650 yards. Three new greens now under construction will be ready for play next spring, and the new locker and shower room will be in service this fall.

College Procession Passes Between Iowa Union Doors From Time of Registration

Student Activity Center House, Concerts, Parties, et al

Designed to furnish university students with a cultural environment for their activity center, Iowa Union enters the life of a freshman as one of three stations in the registration process.

From then until his final senior banquet there the student finds his path coming back to Iowa Union—for concerts, parties, university lectures, university parties, dinners, literary society meetings, Y. M. C. A. or Y. W. C. A. work, lounging, bridge tournament, studio theater productions, information from the student service desk, employment through the student bureau.

That R. H. Fitzgerald is director of this building and of the new school of fine arts predicts something of Iowa Union's destiny as three projected units are added to the two already constructed.

The 96 by 134 foot main lounge where freshmen choose their courses has its walls decorated with paintings, its desks with statuary during the year. The statues are permanent, but art exhibits are changed periodically.

Music is now represented by concerts, drama by the studio theater work, graphic and plastic arts by the paintings and etchings. The three departments thus symbolized are units of the school of fine arts which eventually will be housed in Iowa Union.

One wall of a broadcasting studio for radio station WSUI at Iowa Union is of plate glass, enabling persons in the main lounge to see performers.

From the east entrance a visitor

R. H. FITZGERALD

walks into the main lobby, facing the student service desk. At his left are the women's lounge and Y. W. C. A. headquarters, at his right lounge furniture, newspapers to read, and the Y. M. C. A. office. Fraternity and sorority post office boxes are to the left.

Ahead past the service desk is the main lounge, used for registration, university parties, and functions requiring large seating space. Adjoining it on either side are offices and private dining rooms, while beyond is a sun porch circling the west end. This can be curtained off for group dinners, literary society meetings, and the like.

Beneath the sun porch, down stairs, is the river room, used for group parties and mixers, recently redecorated. The studio theater is at the extreme west end of the building. At the east end is a cafeteria and grill.

New Theater May Climax 10 Years of Dramatic Activity

New Courses, Projects Included in Fall Schedule

Building of the new university theater, for which plans are at present still indefinite, may form a climax to 10 years of activity for university dramatics. The proposed theater will be part of a third Iowa Union unit.

With 10 years of service in the speech department and as director of dramatics, Prof. E. C. Mable is planning an extensive program of courses in dramatic art and a schedule of projects for the present studio theater in Iowa Union.

Original plays by students in advanced play production are being presented there this summer and will be continued during next year. Complete plans will not be released until early in the fall, according to Professor Mable.

Acting, Stage Technique
Several new courses covering all phases of acting, directing, makeup, and set designing have been added in the dramatic art department for next year. A course in acting, including principles of character interpretation, principles of scenic design and stage costuming, stage lighting, and dramatic production are among the possibilities open to those interested in theater work.

Freshmen as well as others interested may try out for studio plays. The number of persons accepted for these plays is usually small and only those who show special interest in the theater are admitted.

Workshop Laboratory
Students in scenic design classes assist in building sets in the theater workshop, while costuming is in charge of students interested in that phase of the work. Lighting, building properties, and makeup are all placed in the hands of students, providing a laboratory for practicing the theory of classroom work.

Ten plays were produced by the university players last year in addition to a commencement production and several private studio presentations. They ranged from light comedies to tragic recitations of Shakespeare, O'Neill and Shakespeare.

"Dark Hours" by Don Marquis, portraying the life of Christ, was directed by Professor Mable. George Bernard Shaw's "Pygmalion," directed by Vance M. Morton, assistant professor in dramatics, was the second play of the year.

Shakespeare Play
"As You Like It" was the only Shakespearean play performed during the regular school year, although during the first term of the summer session an outdoor production of "A Midsummer Night's Dream" was given. Eugene O'Neill's "HarryAPA" was co-directed by Professor Mable and A. Dale Riley of the speech department.

Other university theater plays were "The Zoo" by James Gleason and Richard Taber; "The Guardsman" by Franz Malm; "The Silver Cord" by Sidney Howard; "Secret Service" by William Gillette; "The Butler and Egg Man" by George S. Kaufman; and "The Royal Family" by George S. Kaufman and Edna Ferber.

Y.M.C.A.-Y.W.C.A. Unite for Program of Social Religion

Religious and social work are on the University of Iowa activity calendar.

Combined last year in the Christian Association, the university Y.M.C.A. and Y.W.C.A. cooperate in certain phases of their work while maintaining separate departments for men and women students.

Both have headquarters in Iowa Union, with lounge and office space. They unite in providing entertainment for patients at university hospitals and the state tuberculosis sanatorium at Oakdale.

Through the two daily visits are made to sick persons in the hospital, relations with foreign students are stressed, and discussion meetings are provided. Each association has a student cabinet and a general secretary, the latter being Genevieve Chase and William H. Morgan.

Eleven studios in two buildings are available for students in graphic and plastic arts.

Three University of Iowa debaters toured the British Isles in the summer of 1929, arguing against representatives of nine British institutions including Oxford and Cambridge universities.

Foreign student relations are the concern of the university's Cosmopolitan club, a student activity.

The university offers golf as an elective in the physical education department, with Coach Charles Kennett as instructor.

Musically Bent May Mix Activity With Class Work

Orchestra, Glee Clubs, Band Open to All for Tryouts

Music, said to be "the speech of angels," is offered in a combination of class work and group activity by the music department, a unit of the newly organized school of fine arts.

"The universal language of mankind," is taught to students in connection with glee clubs, band, and orchestra, each of which has tryouts immediately after the start of school to select new members. Class work does not have to accompany membership in a music organization.

Most commonly known for its contribution to pep at athletic events, the university band also gives a concert of classical pieces in the spring and plays during commencement week. Usually at least one trip is made with the football team and pep tunes are played at home football and basketball games. Dr. O. E. Van Doren is band director.

Excused From Military
Because the band plays for military parades and functions, its freshmen and sophomore members are excused from the university R.O.T.C. regiment. With a reserve unit of 50 pieces for pep and military music, the band has been increased to 125 pieces.

Climax of the university orchestra's year program is a spring concert, but other programs are given during

PHILIP GREELY CLAPP

the year and members participate with other music groups in giving entertainment. Prof. Frank E. Kendrick is director.

With Prof. Walter Leon directing, the men's and women's chorus appears in operas and concerts, includ-

ing broadcasts over radio station WSUI.

Summer Innovation

On the staff under Prof. Philip Greeley Clapp, department head, each summer are leaders of work for newly organized all state high school music groups, with personnel selected as a result of the annual music festival here in May. Begun in 1929 with glee clubs and orchestra, the program was expanded this summer with the addition of an all state band.

Students from the department give recitals as part of their work toward a degree, and from their number and the music faculty talent is drawn for WSUI programs and other campus entertainment.

School of Fine Arts Year Old

"To integrate the fine arts with the university, to coordinate the fine arts, to offer many types of training, to provide for student expression, and to train students to know the true value of art" were the avowed purposes for which the school of fine arts was founded in October, 1929.

Established as a part of the college of liberal arts, the school includes the departments of music, dramatic art, graphic and plastic arts, and the his-

tory of art. Its curriculum leads to the degree of bachelor of arts. All advanced courses are accredited to the graduate college toward the degrees of master of arts and doctor of philosophy.

This university was one of the first to give the same credit toward a bachelor of arts degree for work done by students in the fine arts as for work performed in other subjects.

The founding of this school has made possible opportunities for training those endowed with special abil-

ity, those who expect to teach fine arts, those interested in art and industry, and those who are capable of becoming professionals through graduate study.

However, one of the chief aims of the school is "to send into society a continuous flow of young men and women who themselves have through associations with good art come to know its cultural value and who will demand that good art shall have its place in every community."

First Year's Credits Apply Toward Major in Science

Potential Teachers, Others May Specialize With 40 Hours Total, 16 in One Subject Rest Scattered

Science, the basis of practically everything in modern civilization, reaching not only into all branches of industry but into philosophy as well, is not merely taught at Iowa. To put it in the words of Prof. George W. Stewart, head of the physics department, "Science is made at Iowa."

Professors who lecture a few hours each day before university classes often spend a much greater time in their own laboratories and many are recognized as authorities in the particular fields. Professor Stewart reports, "Projects are at present under way in the various laboratories which may have important bearings on scientific ideas of the future, according to this Iowa physicist."

Fields to which Iowa scientists have contributed most include optics, electrical problems, acoustics, sex determination and control, hydraulics and water purification.

Seven Departments

Instruction in science is divided into seven separate departments: astronomy, botany, chemistry, geology, mathematics, physics, and zoology. Aside from mathematics, science courses and departments have evolved out of a common course known as "natural philosophy."

In 1855, a \$500 appropriation was raised for the study of physics and chemistry. Today, each of these two sciences has a department devoted to its study and a building of its own. The original appropriation would not be sufficient, now, to buy a single piece of apparatus for the study of a single problem in either of the two departments.

Special Major Helps

With regards to a general science major, specific legislation was enacted in 1929 by the liberal arts faculty, so that freshmen are granted the privilege of having their first year science work count toward their science major. No other course in the university has this ruling.

For the third consecutive year, a

special "group science" science course will be offered to a limited number of freshmen students who have had high school physics but not chemistry. This course includes lectures in the fundamentals of all sciences, but does not require any laboratory work. Fifty students will be admitted to the course.

Credits on Science Major

Credit received in this work will apply on the science major for any student who later wishes to do scientific work. Professional students are not allowed to enroll in the course, however.

To obtain a general science major, 40 semester hours in physics, chemistry, botany, zoology, and geology are required. Sixteen hours must be taken in some one science. One fundamental course of not less than four semester hours must be taken in each department.

For Science Teachers

This course has been designed to prepare students for the teaching of science. A student may receive his first grade certificate allowing him to teach general science after graduation by taking the science major plus 15 hours in education and six hours in psychology.

Prospective teachers are able to prepare themselves by this provision to teach more than one thing. According to Professor Stewart, the teaching combinations most often found in the state involving general science are: general science and physics; general science and mathematics; and general science and biology.

Physics, General Science

Records show physics and general science are taught in practically all state high schools. Biology is taught in a large number and chemistry in about 10 per cent.

The scientific requirements of the general science course are so strict that the fundamentals are taught in all the sciences in addition to the background available through gross work.

The student may also take work in other departments.

University Grows From 64 in 1858-9 to 9,705 in '29-30

57 Per Cent Increase During Jessup Regime

Registration at the University of Iowa during the year 1929-30 was more than 150 times as great as it was during the first year of instruction.

Seventy-two years ago 64 students registered for classes in the new University of Iowa during the 1858-59 session. Today, as preparations for the reception of incoming freshmen gets underway, records in the office of H. C. Dorcas, registrar, show that 9,705 students attended the university during 1929-30, the year which ended with the June commencement.

Figures from the same records show that since the opening of the university doors in 1855 student registrations total 156,600 or an average registration of 2,175.

Compared with the numbers of recent years, this average seems low. However, this is explained by the fact that the greatest growth has taken place in the last 15 years, during the presidency of Walter A. Jessup.

In 1906-07 the attendance had reached the 2,000 mark, and in 1916 when President Jessup began his regime the rolls showed 4,523 names. After the war, in 1921-22 the enrollment had reached the 5,000 mark, and has shown a gradual growth since that time.

The 1929-30 figure of 9,705 represents an increase of 57 per cent during the 16 years of President Jessup's administration.

WALTER A. JESSUP

Earning Expenses

Many students earn part or all of the expenses connected with a college education. Part time employment and board jobs reduce the actual amount of reserve cash necessary for the student, but the university recommends a minimum of \$150 for starting the year, and advises students financially able to get through without work to do so.

A new library, dormitory for men, mechanical engineering laboratories, and the new Iowa Union unit are part of the extension program.

Invest Brains for Dividends

Scholarship Pays at Iowa, but Booger Man Gets Flunker of 'e Don' Watch Out!

By ALVIN COONS

Scholarship reaps its own reward at the University of Iowa, but stupidity and laziness must look elsewhere for their bed of roses.

There is hardly a department in the university which does not hold out for honor students certain scholarships and prizes as rewards for merit. More than 190 scholarships and prizes, ranging from fellowships carrying a stipend of \$1,000 annually to election to honor societies are listed in the university catalog.

Iowa students may also qualify for the benefits of a three-year course in Oxford university, Oxford, England, made possible by the Rhodes scholarships. The holder of the scholarship will receive nearly \$2,000 per year and may pursue work in the study of arts, sciences, theology, or law.

Needy Students Aided

Needy and deserving students find opportunities for aid through various scholarships and loan funds. The Strong scholarship is given to each of about nine worthy students who need aid in gaining an education. The La Verne Noyes scholarship is given to needy students who either served in the World War or are blood relation of a person who did. In addition to these and others, the board of education has provided a limited number of fee exemptions for worthy students.

Scholarship Regulations

These scholarship regulations read in part as follows:

"Any freshman who does not pass one-half of the hours for which he is registered shall be dropped, unless permitted to continue on probation by special administrative action. If he passes one-half but does not pass as many as two-thirds of the hours for which he is registered he shall be placed on probation for the next succeeding semester.

"If during the semester in which a student is on probation he fails to pass with the mark of C or better in each one of 10 hours or two-thirds of

Professional Students Build Various Vocational Careers on Liberal Arts Foundation

Fundamentals Follow "Pre" Work or Courses Can Combine Technical Degree, L. A. Background in 4 to 5 Years

How much money will a course in philosophy enable me to make? What does it matter whether I can write polished English or not if I can go to design bridges?

Students entering the professions and professional colleges often ask these questions when told that before setting into their specialized fields they must take the prescribed general courses in liberal arts, or must take non-professional work as part of their training.

A professional education as outlined by the University of Iowa is based upon two principles: first, that such an education should provide the man or woman with that information or technical craftsmanship which will be necessary in following the chosen profession; and second, that it should also provide the student with a general cultural background.

Seven Colleges, Four Schools

Seven separate colleges of the university are devoted to training men and women for the professions: law, medicine, dentistry, pharmacy, engineering, education and commerce.

A school of journalism prepares students for the newspaper profession, and a school of nursing, run in cooperation with the college of medicine, turns out certified nurses. Training in music, acting and forensics is provided by a school of fine arts.

These professional courses are open to both men and women. Of the

hours for which he is registered he shall be dropped.

Stiffer for Upperclassmen

If he does not pass 10 hours, or two-thirds of the work for which he is registered, an upperclassman will be dropped, and may be reinstated on probation only by special faculty action. After reinstatement he may have his registration cancelled any time he does not maintain the required standards.

Fraternities are required to maintain a specified grade point average to keep their social privileges, and most groups require a student to make better than this average before he may be initiated.

professional colleges, education and commerce have the largest enrollment of women, while engineering and law, due to limited opportunities for women graduates, have the smallest.

Laboratory Opportunities

Hospitals, laboratories, shops and other facilities are offered. The university hospitals, where indigent patients from all Iowa receive free or partially free treatment, furnish clinical laboratories for the training of doctors and nurses.

Students of pharmacy are given practical work dispensing under the personal supervision of the hospital pharmacist at university, children's, psychopathic hospitals. The college of pharmacy has pharmaceutical laboratory facilities and equipment. Student dentists receive their practical experience in the dental clinic where they work off practical requirements by actually performing the operations under supervision.

Engineering Plants

Opportunities for experience are offered engineers in such laboratories as the mechanical power laboratory, materials laboratory, hydraulic laboratory, manufacturing laboratory, and the hydraulic testing plant.

For those persons who are going into education, the Iowa pre-school laboratories and the elementary and university high schools offer opportunities for practice teaching. Future teachers may compete on various athletic teams of the university, or as participants in the intramural athletic program.

Commerce students make an annual tour through the larger industrial plants in this part of the country for observation trips.

Entrance Requirements

Law preparation of three years of resident law college study and the completion of law courses aggregating 82 credit hours. Entrance requirements are a B.A. or B.S. degree or three years of liberal arts with a completed major.

Medicine is a four year course, with an entrance requirement of two years of "pre medic" work. Dentistry is likewise a four year

course, with one year of liberal arts work required for admission. Pharmacy, which has been a three year course heretofore, will, after July 1, 1932, require four full years of at least 36 weeks each for graduation. This is in accordance with action of the American association of colleges of pharmacy. There is no liberal arts prerequisite for this course.

Commerce, Engineering

Courses in the other professions require a total of four years for the completion of the technical courses and prerequisites. Commerce requires two years of liberal arts and two years or the completion of 48 semester hours in the college of commerce.

Work in engineering is mostly prescribed; one complete course, extending through four years must be covered in order to secure the bachelor's degree in engineering.

A certificate in education requires the completion of 15 hours in the college of education and six hours in psychology in addition to liberal arts work.

The resident nurse's course is ordinarily a three year course but by combination with a liberal arts course requiring five years, a B.S. degree and the certificate of a graduate nurse may be taken.

All Roads Lead to "Athens of Iowa"—by Rail, Road, Air

"Transportation routes to everywhere," could well be Iowa City's slogan, for highways, railways, electric lines, and air routes stretch from the city to all points of the nation.

Three paved highways already enter the city and by fall the fourth will be completed, offering connecting links in four directions from the city.

There are direct hard surfaced and paved arteries to Chicago, Des Moines, Cedar Rapids, Waterloo, and by rail to Council Bluffs and Omaha, while paving is progressing on a southern outlet to Burlington and Keokuk.

The main line of the Rock Island railroad connects Iowa City with Illinois, Missouri, and Nebraska as well as directly to points in Iowa while the Cedar Rapids and Iowa City interurban company offers service to Cedar Rapids and thence a northern and northwestern outlet.

The Boeing air transportation company has a 50 year lease on the Iowa City airport and passenger and mail planes are scheduled through the city by day and night in addition to government and commercial airlines.

ON the BANKS OF THE IOWA

COME TO IOWA

Enjoy the advantages of an education in a large school. Enjoy the fellowship that comes only between college men and women. Enjoy the beauties of Iowa's campus and buildings.

"Follow the Crowds to the Banks of the Iowa"

Overlooking the Iowa river is one of the University's largest buildings, Iowa Union. As a home of student social life it is becoming more and more the center around which campus activities gravitate.

The Union is continually in the foreground of a student's life, from the initial use as freshman headquarters during freshman week to its final service as the senior banquet hall. In it the student dances, meets his friends, and loafs.

Downstairs in the Union is the Union Grill with cafeteria service on week days and a la carte service on Sundays. During the year a student orchestra provides music during meals. The Grill is the student eating place.

On the river side of the Union is the Sunporch where undergraduates hold their tete-a-tete's and loaf or study between and after classes. A fountain service makes it convenient for light lunches and cozy breakfasts.
