## TABLES

---

Table A1	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Bangladesh 2017-18 .....	3
Table A2	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Burkina Faso 2010 .....	6
Table A3	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Democratic Republic of the Congo 2013-14 .....	10
Table A4	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Ethiopia 2016.....	13
Table A5	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Ghana 2014.....	17
Table A6	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Guatemala 2014-15.....	25
Table A7	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Haiti 2016-17 .....	35
Table A8	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Honduras 2011-12.....	38
Table A9	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Kenya 2014 .....	48
Table A10	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Cambodia 2014 .....	52
Table A11	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Mali 2018 .....	59
Table A12	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Malawi 2015-16 .....	63
Table A13	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Mozambique 2011 .....	66

Table A14	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Nepal 2016 .....	71
Table A15	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Nigeria 2018 .....	73
Table A16	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Rwanda 2014-15 .....	96
Table A17	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Rwanda 2019 .....	99
Table A18	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Senegal 2019 .....	101
Table A19	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Tajikistan 2017 .....	104
Table A20	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Tanzania 2015-16 .....	108
Table A21	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Tanzania 2015-16 .....	115
Table A22	Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Zambia 2018.....	121

## FIGURES

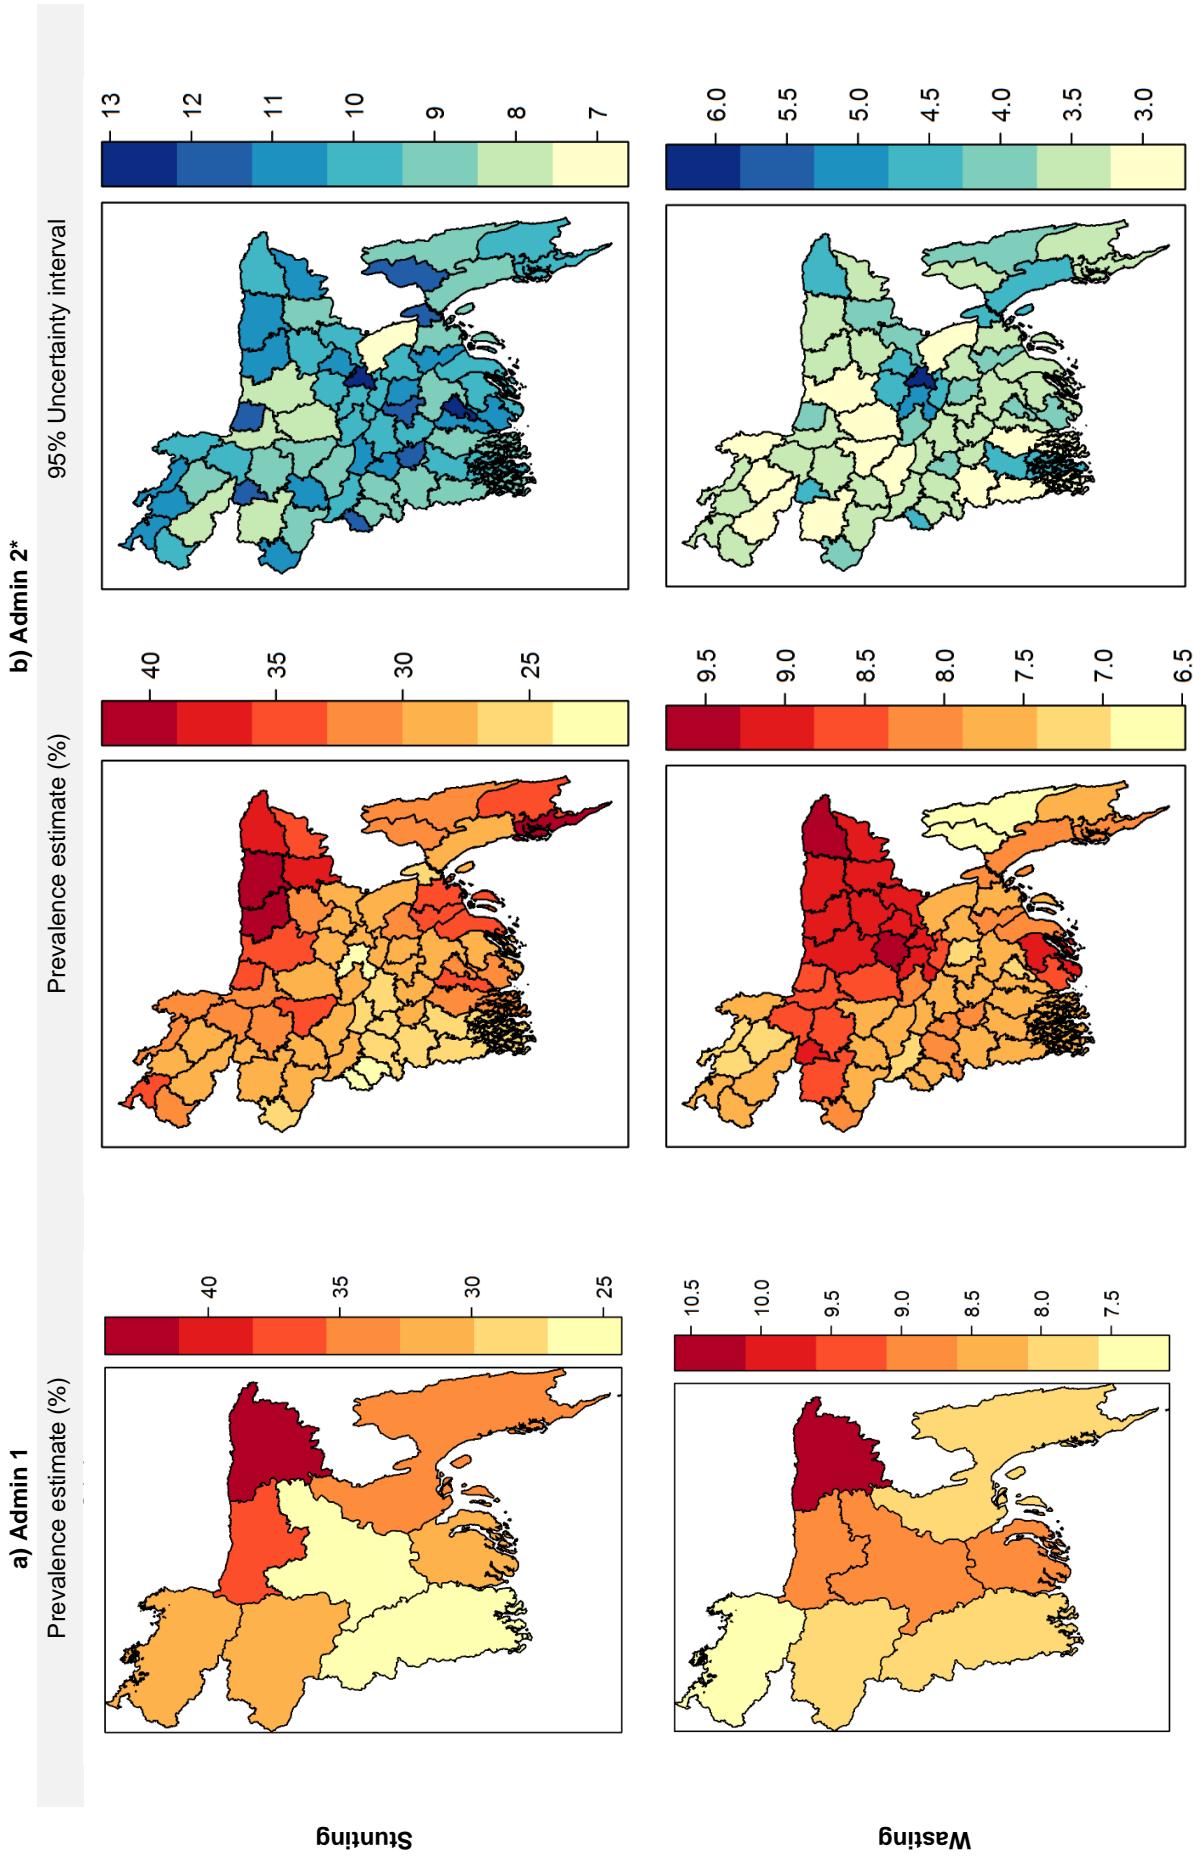

---

Figure A1	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Bangladesh 2017-18 .....	1
Figure A2	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Burkina Faso 2010 .....	5
Figure A3	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Democratic Republic of the Congo 2013-14 .....	8
Figure A4	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Ethiopia 2016 .....	12
Figure A5	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Ghana 2014.....	15
Figure A6	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Guatemala 2014-15 .....	23
Figure A7	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Haiti 2016-17 .....	34
Figure A8	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Honduras 2011-12 .....	37
Figure A9	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Kenya 2014 .....	46
Figure A10	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Cambodia 2014 .....	50

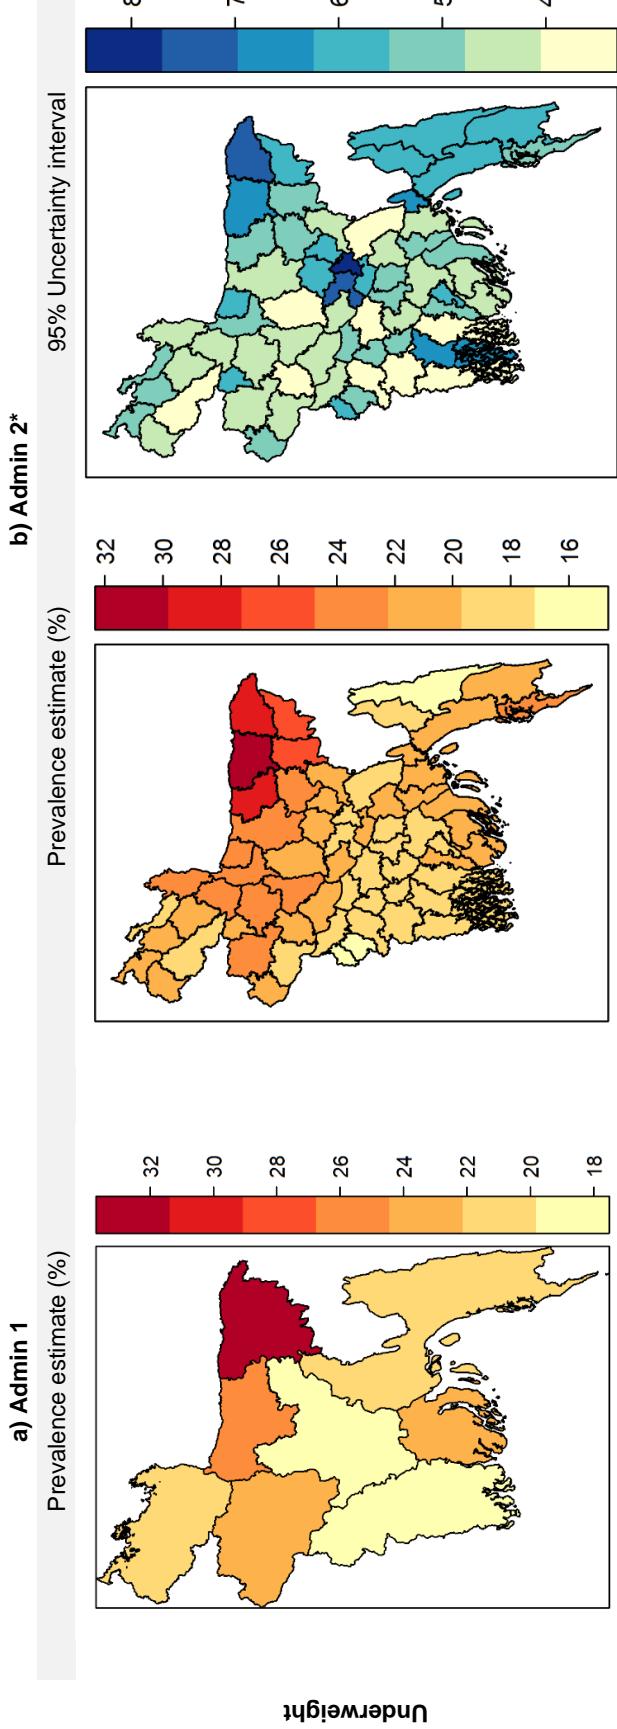

Figure A11	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Mali 2018.....	57
Figure A12	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Malawi 2015-16 .....	61
Figure A13	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Mozambique 2011.....	64
Figure A14	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Nepal 2016 .....	70
Figure A15	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Nigeria 2018 .....	72
Figure A16	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Rwanda 2014-15 .....	94
Figure A17	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Rwanda 2019 .....	97
Figure A18	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Senegal 2019 .....	100
Figure A19	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Tajikistan 2017 .....	103
Figure A20	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Tanzania 2015-16 .....	106
Figure A21	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Uganda 2016.....	113

Figure A22	Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Zambia 2018 .....	120
------------	--	-----

**Figure A1** Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Bangladesh 2017-18

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

**Table A1** Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Bangladesh 2017-18

<sup>a</sup> Admin 1 is the first subnational administrative level e.g. region. The local terminology for this level can vary by country.<sup>b</sup> Admin 2 is the second subnational administrative level e.g. district. The local terminology for this level can vary by country.

**Figure A5**

Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Ghana 2014

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

**Table A5** Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Ghana 2014

<sup>a</sup> Admin 1 is the first subnational administrative level e.g. region. The local terminology for this level can vary by country.<sup>b</sup> Admin 2 is the second subnational administrative level e.g. district. The local terminology for this level can vary by country.

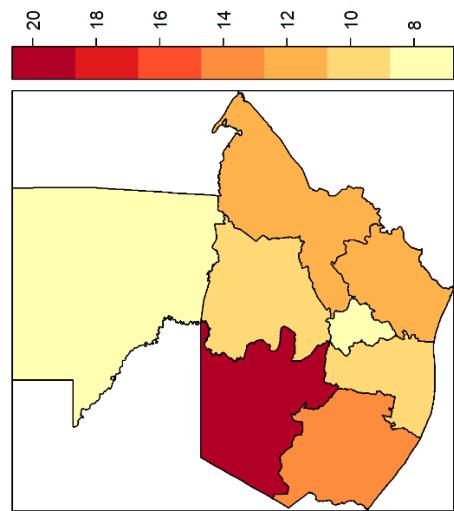

**Figure A6** Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Guatemala 2014-15

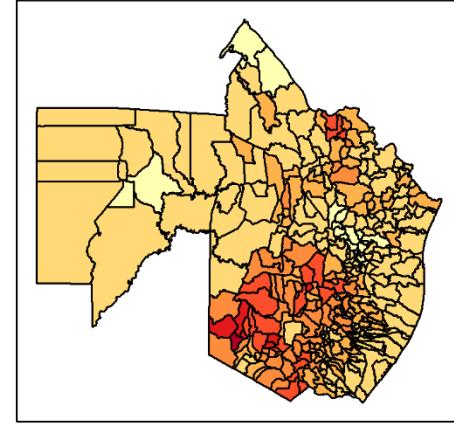

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

**a) Admin 1**

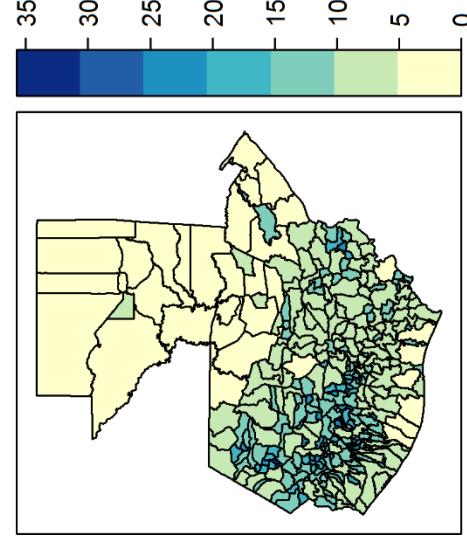

Prevalence estimate (%)

**b) Admin 2\***

Prevalence estimate (%)

95% Uncertainty interval

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

Underweight

**Table A6** Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Guatemala 2014-15

**Figure A10** Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Cambodia 2014

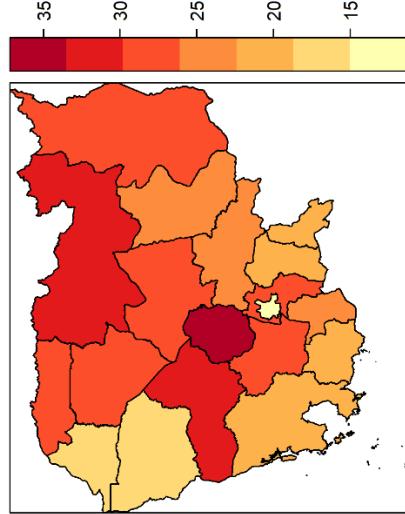

a) Admin 1

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

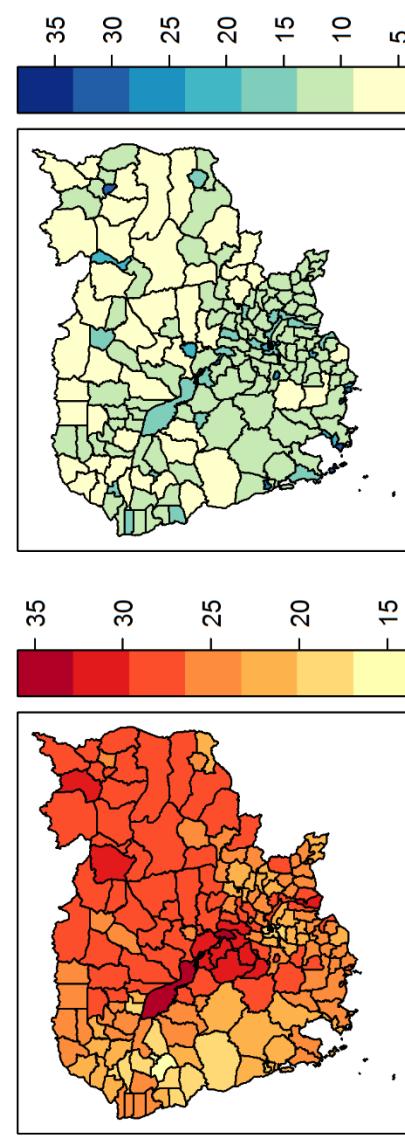

a) Admin 1

Prevalence estimate (%)

b) Admin 2\*

Prevalence estimate (%)

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

**Table A10 Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Cambodia 2014**

<sup>a</sup> Admin 1 is the first subnational administrative level e.g. region. The local terminology for this level can vary by country.<sup>b</sup> Admin 2 is the second subnational administrative level e.g. district. The local terminology for this level can vary by country.

**Figure A20** Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Tanzania 2015-16

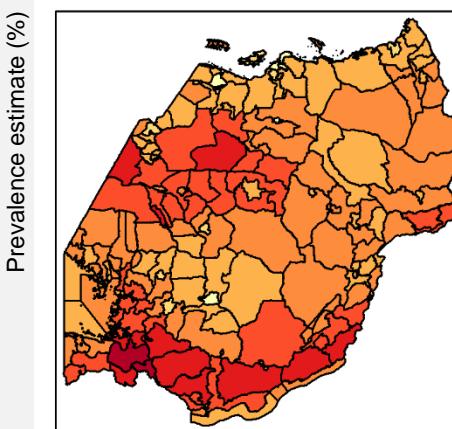

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

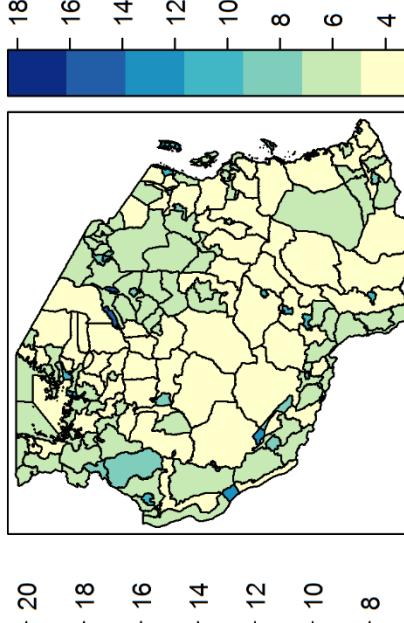

a) Admin 1

b) Admin 2\*

95% Uncertainty interval

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

**Table A20 Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Tanzania 2015-16**

<sup>a</sup> Admin 1 is the first subnational administrative level e.g. region. The local terminology for this level can vary by country.<sup>b</sup> Admin 2 is the second subnational administrative level e.g. district. The local terminology for this level can vary by country.

**Figure A21** Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Uganda 2016

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

**Table A21 Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Tanzania 2015-16**

<sup>a</sup> Admin 1 is the first subnational administrative level e.g. region. The local terminology for this level can vary by country.<sup>b</sup> Admin 2 is the second subnational administrative level e.g. district. The local terminology for this level can vary by country.

**Figure A22** Stunting, wasting, and underweight prevalence among children under age 5 at a) the first subnational administrative level (Admin 1) and b) the second subnational administrative level (Admin 2) and width of the 95% uncertainty interval, Zambia 2018

\* Indicators at the Admin 2 level are estimated using a geospatial modeling approach that produces the modeled Admin 2 estimates and the uncertainty interval.

**Table A22 Prevalence of stunting, wasting, and underweight among children under age 5 and the 95% uncertainty interval (UI) at the second subnational administrative level (Admin 2), Zambia 2018**
