[REDACTED]

Re: NASA FOIA Tracking Number [REDACTED]

[REDACTED]

This responds to your Freedom of Information Act (FOIA) request to the National Aeronautics and Space Administration (NASA), dated December 25, 2020, and received in this office on December 28, 2020. Your request was assigned the above-referenced tracking number. You seek:

I request a copy or printout of the YouTube Creator's Page for each of the two primary NASA Headquarters YouTube account/channels (those are entitled NASA and NASA Video). Specifically, I request a listing of videos on each of the two NASA Headquarters primary YouTube channels, marked as UNLISTED or PRIVATE. This is a listing showing those videos marked unlisted or private on the NASA Headquarters YouTube Creator's page.

We combined this request with your other requests for the YouTube accounts/channels of the other NASA centers: Stennis Space Center, Ames Research Center, Kennedy Space Center, Johnson Space Center, Marshall Space Flight Center, Glenn Research Center, Armstrong Flight Research Center, Goddard Space Flight Center, and Jet Propulsion Laboratory (JPL) and are providing this consolidated agency response.

In response to your request, we conducted a search of the NASA YouTube accounts. The search returned no record listing the videos. As a matter of discretion, we have created screenshots to provide the information you requested. We reviewed the responsive records under the FOIA to determine whether they may be disclosed to you. Based on that review, this office is providing the following:

194 page(s) are released in full (RIF);
10 page(s) are released in part (RIP);

In regards to the request directed to JPL, under the provisions of the Freedom of Information Act (FOIA), 5 U.S.C. § 552, the NASA Management Office (NMO) requested that JPL provide records responsive to the following request:

A copy or printout of the YouTube Creator's Page for the primary NASA Jet Propulsion Laboratory (JPL) YouTube account/channel.

Specifically, I request a listing of videos on the JPL primary YouTube channel, marked as UNLISTED or PRIVATE. This is a listing showing those videos marked unlisted or private on the JPL YouTube Creator's page.

JPL determined that no responsive records exist and declined to create a new record to respond to this request. JPL explained: "Per the FOIA, agencies are not required to create a record to satisfy a request. Therefore, per NASA Prime Contract '80NM0018D0004' H-11(d)(1) JPL would not be required to create a record."

NASA redacted from the enclosed documents certain information pursuant to the following FOIA exemptions:

Exemption 6, 5 U.S.C. § 552(b)(6)

Exemption 6 allows withholding of "personnel and medical files and *similar files* the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." 5 U.S.C. § 552(b)(6)(emphasis added). NASA invokes exemption 6 to protect the identities and images of students participating in NASA programs.

Provisions of the FOIA allow us to recover part of the cost of complying with your request. In this instance, because the cost is below the \$50 minimum, there is no charge.

Appeal

You have the right to appeal my action regarding your request. Your appeal must be received within 90 days of the date of this response. Please send your appeal to:

Administrator
NASA Headquarters
Executive Secretariat
ATTN: FOIA Appeals
MS 9R17
300 E Street S.W.
Washington, DC 2054

Both the envelope and letter of appeal should be clearly marked, "Appeal under the Freedom of Information Act." You must also include a copy of your initial request, the adverse determination, and any other correspondence with the FOIA office. In order to expedite the appellate process and ensure full consideration of your appeal, your appeal should contain a

brief statement of the reasons you believe this initial determination should be reversed. Additional information on submitting an appeal is set forth in the NASA FOIA regulations at 14 C.F.R. § 1206.700.

Assistance and Dispute Resolution Services

If you have any questions, please feel free to contact me Stephen.g.rowe@nasa.gov. For further assistance and to discuss any aspect of your request you may contact:

Stephanie Fox
Chief FOIA Public Liaison
Freedom of Information Act Office
NASA Headquarters
300 E Street, S.W., 5P32
Washington D.C. 20546
Phone: 202-358-1553
Email: Stephanie.K.Fox@nasa.gov

Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services it offers. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

Important: Please note that contacting any agency official including myself, NASA's Chief FOIA Public Liaison, and/or OGIS is not an alternative to filing an administrative appeal and does not stop the 90 day appeal clock.

Sincerely,

Stephen Rowe

Stephen Rowe
FOIA Public Liaison

NASA Marshall 360° Tour: Propulsion Research & Development Laboratory

Like rockets? Take a 360° look around three labs inside NASA's hub for advanced propulsion research and technology development at Marshall Space Flight Center in Huntsville, Alabama. 00:10 — Our Thrust Vector Control Lab tests the systems that steer rockets. When NASA's Space Launch System rocket flies, thrust vector control actuators can move the rocket's RS-25 engines and solid rocket booster nozzles to point their thrust in a different direction. 00:41 — The System Integration Lab and Softw

NASA Marshall 360° Tour: ISS Payload Operations Integration Center

Science on the International Space Station? We coordinate that here! Take a 360° look behind the scenes of NASA's 24/7 command post for space station science at Marshall Space Flight Center in Huntsville, Alabama. 0:15 — In Payload Control Area-1, our dedicated team of flight controllers interacts with astronauts on the space station as they conduct experiments and demonstrate new technologies that help us explore, expand what we know, and make life better on Earth. 1:01 — The Laboratory Traini

NASA Marshall 360° Tour: Flight Hardware Development Facility

From clean welds on NASA's Space Launch System to clean air and water on the International Space Station, get a 360° look around two of the high bay facilities that make human space exploration possible at NASA's Marshall Space Flight Center in Huntsville, Alabama. 0:07 — Here at the Advanced Weld Facility, you can catch a glimpse of two segments of the launch vehicle stage adapter--one of three pieces at the top of the rocket that support the Orion spacecraft--we're building for the Artemis II

NASA Michoud July 14, 2020 All-Hands remarks from Facility Director Robert Champion
NASA Michoud July 14, 2020 All-Hands remarks from Facility Director Robert Champion

Fueling the Mission: Celebrating Workforce Alums from Historically Black Colleges, Universities

Each February, NASA's Marshall Space Flight Center in Huntsville, Alabama, honors Black History Month with a celebration of its diverse workforce -- the men and women who devise, build and test the rockets, engines, space systems hardware and science missions that continue to expand humanity's reach into the cosmos. This year, Marshall has turned its commemorative spotlight on a vital resource that is "fueling the mission": historically black colleges and universities.

NASA Motor Test Part of Next-Generation Booster Development

Teams at NASA's Marshall Space Flight Center tested a small solid rocket motor Dec. 5 that will help the agency build next-generation solid rocket boosters for future Space Launch System flights. The 20-second hot fire, conducted on a 24-inch-diameter, 20-foot-long subscale test motor at Marshall's East Test area, produced 56,000 pounds of thrust and temperatures of more than 5,000 degrees Fahrenheit. The test will help NASA and prime contractor Northrop Grumman evaluate the effect the new prop

3, 2, 1... Lift-Off of the Artemis 1 Mission to the Moon

Hear the countdown and see how NASA's Space Launch System (SLS), the world's most powerful rocket, will send the Orion spacecraft to the Moon on the Artemis 1 Mission. This video takes you through the pre-launch sequence at NASA's Kennedy Space Center in Florida and through all the flight operations as SLS launches Orion and sends it on to lunar orbit. For more information: <https://www.nasa.gov/artemis-1>

Essential to the Mission: Pam Bourque

Pam Bourque is the assistant chief council of general law in the Office of Chief Council at Marshall Space Flight Center.

Essential to the Mission: Pam Bourque 2

Pam Bourque is the assistant chief council of general law in the Office of Chief Council at Marshall Space Flight Center.

Essential to the Mission: Emily Naderi

Emily Naderi is as an equal employment specialist in the Office of Diversity and Equal Opportunity at NASA's Marshall Space Flight Center.

Essential to the Mission: Tiffany Lockett

Tiffany Lockett is a project systems engineer in the Project Engineering division of Marshall's Space Systems Department.

Essential to the Mission: Wil Malone

Wil Malone is a system safety engineer in the Safety and Mission Assurance Directorate. (NASA)

Built to Explore: NASA's Deep-Space Rocket, the Space Launch System

NASA's Space Launch System, the world's most powerful rocket, will enable a new era of exploration. With NASA's Orion spacecraft, SLS will launch astronauts on missions to the Moon, Mars and beyond. Exploration Mission-1, the first integrated flight of SLS and an uncrewed Orion, will be the first in a series of increasingly complex missions that will provide the foundation for human deep-space exploration and demonstrate NASA's commitment and capability to extend human existence beyond low-Earth

Essential to the Mission: Adesh Singhal

As project manager for research, planning and integration in the International Space Station Projects Office at Marshall, Adesh Singhal coordinates testing of science payloads to ensure they will work properly before they launch to the space station.

Michoud Safety Training 2018

Essential to the Mission: Emily Adams

Emily Adams is a research associate through UAH and regional science coordination lead for Eastern and Southern Africa for NASA's SERVIR project.

2018 Annual 'State of NASA' Speech to Highlight Agency Goals for Space Exploration~large

On Feb. 12, NASA centers across the country hosted "State of NASA" events, following President Trump's Fiscal Year 2019 budget proposal delivery to the U.S. Congress. The events included an address, by acting NASA Administrator Robert Lightfoot, to the agency's workforce, from NASA's Marshall Space Flight Center,

in Huntsville, Alabama. During his speech, Lightfoot highlighted how the budget would help the agency achieve its goals for space exploration.

Essential to the Mission: Stanley McCaulley

Stanley McCaulley works in the Engineering Cost Office in Marshall's Office of Strategic Analysis and Communications. As a senior cost engineer, his primary focus is serving as a cost lead for NASA's Space Launch System.

Essential to the Mission: Wendy Sullivan

Wendy Sullivan is an information technology specialist in the Office of the Chief Information Officer, where she is product lead for the collaboration line of business in the Agency Application Office. (NASA/MSFC)

Marshall Launches Quick-Tempo Facility Upgrades With 4610 'Facelift'

In the time-lapse video above, facilities personnel at NASA's Marshall Space Flight Center paint new handicapped spaces and restripe the Building 4610 parking lot, kicking off a refurbishment effort that is giving one of Marshall's oldest, continuously used facilities a welcome facelift.

Martin Weisskopf Discusses Marshall's X-ray Astronomy Missions and Discoveries

Martin Weisskopf's relationship with NASA's Marshall Space Flight Center began more than 40 years ago. As a young assistant professor of X-ray astronomy at Columbia University in New York City, he worked closely with NASA's High Energy Astronomy Observatory Program, which was managed by Marshall. In 1977, Weisskopf became Marshall's chief scientist for X-ray astronomy as planning began for HEAO's successor, the Advanced X-ray Astrophysics Facility.

Understanding Communications Delays (Comm Delay Assessment)

You may get frustrated when a text takes more than a second or two to send, but crews heading to Mars will have to deal with extensive communications delays during their journey to and from, and while on the Red Planet. Comm Delay Assessment studies the effects of delayed communications for interplanetary crews that have to handle medical and other emergencies in deep space. In addition to time delays, uncertainty in performing a new, crucial task can affect crew performance and interaction.

Future Green Run Testing at Stennis Another Step on Journey to Mars

Stennis Space Center's Travis Martin talks about green run testing of the core stage of NASA's new rocket, the Space Launch System. SLS will be the most powerful rocket ever built for deep space missions, including to an asteroid and ultimately to Mars. Green run testing, planned for 2017, will fire up all four RS-25 engines on the core stage for testing on Stennis' B-2 test stand.

Heat Miser Talks Heat Safety at Marshall

Beat the summer heat with this fun video from NASA Marshall Space Flight Center interns Logan Moore and Zac Cameron.

2015 NASA on the Square

Footage of 'NASA on the Square' activities held June 20 in downtown Huntsville, Alabama. NASA's Marshall Space Flight Center filled the streets and sidewalks around Huntsville's historic Courthouse Square with exhibits, hands-on activities, live music and fun for all ages. NASA astronaut TJ Creamer, the first astronaut to become a payload operations director at the Marshall Center, visited with the public throughout the day. NASA Marshall's annual event is presented by Downtown Huntsville Inc. a

Space Station Astronauts Grow a Water Bubble in Space (Virtual Reality version)

Published on Nov 3, 2014 During Expedition 40 in the summer of 2014, NASA astronauts Steve Swanson and Reid Wiseman — along with European Space Agency astronaut Alexander Gerst — explored the phenomenon of water surface tension in microgravity on the International Space Station. The crew "submerged" a sealed GoPro camera into a floating ball of water the size of a softball and recorded the activity with a 3-D camera.

Tornado Recovery Ongoing at NASA's Michoud Assembly Facility, New Orleans LA

Teams at NASA's Michoud Assembly Facility in New Orleans are continuing with recovery efforts following a tornado strike at the facility Tuesday, Feb. 7. Michoud remains closed to all but security and emergency operations crews. For more than half a century, Michoud has been the space agency's premiere site for manufacturing and assembly of large-scale space structures and systems.

NASA Scientist Talks About Mission to Explore Hidden Details of Cosmic X-rays

NASA has selected a science mission that will allow astronomers to explore, for the first time, the hidden details of some of the most extreme and exotic astronomical objects, such as stellar and supermassive black holes, neutron stars and pulsars. Objects such as black holes can heat surrounding gases to more than a million degrees. The high-energy X-ray radiation from this gas can be polarized – vibrating in a particular direction. The Imaging X-ray Polarimetry Explorer (IXPE) mission will fl

NASA's Composites for Exploration Upper Stage Project is Pioneering Spacecraft Composites. Project Manager John Vickers explains the goal is to produce human rated full-scale composite structures that parallel the development of the Space Launch System. The first product of that effort is the CEUS forward skirt on the SLS upper stage. The primary benefit of composites is increased strength to weight ratios, which can amount to weight savings of 20 to 30% in the final structure.

Orion Flight Test Hardware Thrives Under Pressure

Hardware that will keep harmful gases away from the Orion's spacecraft during its first trip to space proved it won't bend under pressure during a recent test at NASA's Marshall Space Flight Center. The diaphragm for Exploration Flight Test (EFT)-1 was joined to an adapter prototype for pressurized testing. For the test, the adapter was sealed and a vacuum pump was connected to the diaphragm. The vacuum pressure simulates atmospheric conditions the hardware may experience during the mission. (NA
