Grants and Contracts Office

**Funding Opportunities Monthly Edition
March 2023 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in March 2023. The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount	
	Synopsis	<p>This Funding Opportunity Announcement (FOA) supports preclinical and early phase clinical research, as well as correlative studies, directly related to advancements in cancer treatment, diagnosis, prevention, comparative oncology, symptom management, or reduction of cancer disparities. This includes (but is not limited to) development and testing of the following: new molecular agents or biologics for cancer treatment; management strategies for cancer-related symptoms or treatment-related toxicity; cancer screening or diagnostic tools, such as imaging techniques; cancer preventive agents or approaches; predictive and prognostic biomarkers for patient selection or stratification; clinically relevant in vivo or in vitro tumor models (including genetically engineered mouse models, patient-derived xenograft models, organoids, and cell lines); and strategies to address therapeutic outcome disparities among underserved populations. In addition to novel agents, new treatment strategies may involve repurposed agents or novel combinations of interventions (including radiation), based on established mechanisms of action. Comparative correlative studies in cancer patients with age, gender, racial/ethnic, or health disparities are encouraged to explore mechanisms underlying their differential responses (efficacy and toxicity) and resistance to therapeutic interventions. Comparative oncology studies in dogs investigating strategies for treatment and diagnosis of human disease are supported as well. This FOA does not support research that focuses on basic cancer biology (such as studies of cancer-related pathways, molecular mechanisms, or mechanisms of metastasis), late-stage clinical trials, risk assessment studies, epidemiological studies, or studies of behavioral interventions. These applications will be deemed not responsive to this FOA and will not be reviewed (see below for a more detailed description of studies that are not responsive for this FOA). The R21 mechanism is intended to encourage exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to breakthroughs in particular areas, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on cancer research (preclinical or clinical).</p>

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Synopsis | The purpose of this funding opportunity announcement is to encourage collaborations between the life and physical sciences that: 1) apply a multidisciplinary bioengineering approach to the solution of a biomedical problem; and 2) integrate, optimize, validate, translate or otherwise accelerate the adoption of promising tools, methods, and techniques for a specific research or clinical problem in basic, translational, or clinical science and practice. An application may propose design-directed, developmental, discovery-driven, or hypothesis-driven research and is appropriate for small teams applying an integrative approach to increase our understanding of and solve problems in biological, clinical, or translational science. This FOA will support clinical trials that test functionality or validate performance in the chosen setting. This FOA is not intended to support conventional clinical trials that lack translation as the primary motivation. Applications that propose phase III clinical trials in any area of research are not sought by and will not be supported through this FOA. This FOA does not propose to support commercial production.

105645	Integration of Imaging and Fluid-Based Tumor Monitoring in Cancer Therapy (R01 Clinical Trial Optional)	National Cancer Institute/NIH/DHHS	PAR-21-290	07-Jan-2023	499,999 USD

Synopsis	National Cancer Institute (NCI) invites applications for research projects that integrate imaging and fluid-based tumor monitoring (liquid biopsy) assays during cancer therapy in patients to determine the optimal use of those modalities in the characterization of therapy response and/or emergence of resistance. This FOA will use the NIH Research Project (R01) award mechanism.

108323	Notice of Special Interest (NOSI): Disparities Affecting Healthcare Utilization and Health Outcomes Among Childhood Cancer Survivors	National Cancer Institute/NIH/DHHS	NOT-CA-22-029	28-Dec-2022	Not Specified

	Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits grant applications proposing exploratory research projects focused on the early-stage development of highly innovative technologies offering novel molecular or cellular analysis capabilities for basic, clinical, or epidemiological cancer research. The emphasis of this FOA is on supporting the development of novel capabilities involving a high degree of technical innovation for targeting, probing, or assessing molecular and cellular features of cancer biology. Well-suited applications must offer the potential to accelerate and/or enhance research in the areas of cancer biology, early detection and screening, clinical diagnosis, treatment, control, epidemiology, and/or address issues associated with cancer health disparities. Technologies proposed for development may be intended to have widespread applicability but must be focused on improving molecular and/or cellular characterizations of cancer biology. Projects proposing the application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not responsive to this solicitation and will not be reviewed. This funding opportunity is part of a broader NCI-sponsored Innovative Molecular Analysis Technologies (IMAT) Program.</p>

Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits grant applications proposing exploratory research projects focused on the early-stage development of highly innovative technologies that improve the quality of the samples used for cancer research or clinical care. This includes new capabilities to address issues related to pre-analytical degradation of targeted analytes during the collection, processing, handling, and/or storage of cancer-relevant biospecimens. The overall goal is to support the development of highly innovative technologies capable of maximizing or otherwise interrogating the quality and utility of biological samples used for downstream analyses. This FOA will support the development of tools, devices, instrumentation, and associated methods to preserve or protect sample integrity, or establish verification criteria for quality assessment/quality control and handling under diverse conditions. These technologies are expected to accelerate and/or enhance research in cancer biology, early detection and screening, clinical diagnosis, treatment, or epidemiology, or address issues associated with cancer health disparities, by reducing pre-analytical variations that affect biospecimen sample quality. Projects proposing the application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not responsive to this solicitation and will not be reviewed. This funding opportunity is part of a broader NCI-sponsored Innovative Molecular Analysis Technologies (IMAT) Program.</p>

	Deadline Dates (ALL)	30-Jan-2023 [Optional][LOI/Pre-App], 01-Mar-2023 , 02-Aug-2023 [Optional][LOI/Pre-App], 01-Sep-2023			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits grant applications proposing exploratory research projects focused on further development and validation of emerging technologies that improve the quality of the samples used for cancer research or clinical care. This includes new capabilities to address issues related to pre-analytical degradation of targeted analytes during the collection, processing, handling, and/or storage of cancer-relevant biospecimens. This FOA solicits R33 applications where major feasibility gaps for the technology or methodology have been overcome, as demonstrated with supportive preliminary data, but still require further development and rigorous validation to encourage adoption by the research community. The overall goal is to support the development of highly innovative technologies capable of maximizing or otherwise interrogating the quality and utility of biological samples used for downstream analyses. This FOA will support the development of tools, devices, instrumentation, and associated methods to preserve or protect sample integrity, or establish verification criteria for quality assessment/quality control and handling under diverse conditions. technologies are expected to accelerate and/or enhance research in cancer biology, early detection and screening, clinical diagnosis, treatment, or epidemiology, or address issues associated with cancer health disparities, by reducing pre-analytical variations that affect biospecimen sample quality. Projects proposing to use existing technologies where the novelty resides in the application of the technology or the biological or clinical question being pursued, and not the technical capabilities being developed, are not appropriate for this FOA and will not be reviewed. This funding opportunity is part of a broader NCI-sponsored Innovative Molecular Analysis Technologies (IMAT) Program.

Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to encourage revision applications from currently funded NCI U01 research projects. The applicants should propose to expand upon the original research question(s) or otherwise accelerate progress for the parent study by incorporating a new technical approach or instrument developed through support from the NCI Innovative Molecular Analysis Technologies (IMAT) program. Awards from this FOA are meant to incentivize independent validation and accelerate the suitability of these emerging technologies for appropriate research communities. As a component of the NCI IMAT program, this FOA aims to promote interdisciplinary collaboration in the development of innovative tools and methods that enable cancer research and accelerate scientific discovery.

Applications submitted under this FOA are expected to propose a multi-site feasibility clinical trial to assess whether the intervention can be delivered with fidelity across sites; demonstrate feasibility of recruitment, accrual, and randomization of participants across sites; demonstrate participant adherence to the intervention, as well as retention of participants throughout the study across sites; and/or demonstrate feasibility of data collection across sites in preparation for a future fully powered, multi-site efficacy/ effectiveness trial. The need for multi-site feasibility trials is expected to be justified by sufficient preliminary data from previous single site feasibility or acceptability trial(s) or the published literature. This FOA will not support clinical trials that determine efficacy or effectiveness. The data collected should be used to fill gaps in scientific knowledge and be necessary to develop a competitive fully powered multi-site clinical trial that has the potential to make a significant impact on public health Prior to submitting to this FOA, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application.</p>				
104706	Feasibility Clinical Trials of Mind and Body Interventions for NCCIH High Priority Research Topics (R34 Clinical Trial Required)	National Center for Complementary and Integrative Health/NIH/DHHS	PAR-21-240	21-Feb-2023	450,000 USD

---------	---------------	--------------	----------------	---------------	----------------

that have been identified by NCCIH as high priority research topics. This funding opportunity is intended to support feasibility clinical trials, which will provide data that are critical for the planning and design of a subsequent clinical efficacy or effectiveness study, or a pragmatic trial. The data collected should be used to fill gaps in scientific knowledge necessary to develop a competitive full-scale clinical trial, including, but not limited to the following: examining feasibility and acceptability of interventions lacking published data; adapting an intervention to a specific population; refining the intervention to determine the most appropriate frequency or duration; determining feasibility of recruitment, retention and data collection procedures; refining and assessing the feasibility of protocolized multimodal interventions; or examining acceptability and adherence of control conditions. This FOA will not support randomized clinical trials that test or determine efficacy or effectiveness; nor will this FOA support repetition of feasibility or acceptability research that has been previously conducted in the same or similar patient population with the same or similar intervention. Applications that propose solely to write a protocol or manual of operations or to develop infrastructure for a clinical trial are not appropriate for this announcement. Applications must propose to conduct a feasibility clinical trial. The subsequent larger trial should have the potential to make a significant impact on public health.

Synopsis	This Funding Opportunity Announcement (FOA) encourages applications for investigator-initiated multi-site clinical trials (e.g. efficacy, effectiveness or pragmatic trials) to study the effects of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) in NCCIH designated areas of high research priority. Clinical Coordinating Centers should develop and implement the proposed fully powered multi-site clinical trial. The objective of a Clinical Coordinating Center application is to present the scientific rationale and a comprehensive scientific and operational plan for the clinical trial. Clinical Coordinating Center applications are expected to describe plans for project management, participant recruitment and retention strategies, performance milestones, scientific conduct, and dissemination of results. Clinical Coordinating Center applications submitted under this FOA will utilize a two-phase, milestone-driven cooperative agreement (UG3/UH3) funding mechanism. In addition, an accompanying Data

The program supports mechanistic and hypothesis-testing studies to discover novel molecules, mechanisms, or regulatory pathways governing function of the human immune system in both healthy and vulnerable populations (i.e., across lifespan, organ/tissue transplant recipients, pregnant women). Studies of interest include immunity related to prevention or treatment of infectious diseases, immune-mediated pathogenesis/sequelae associated with infectious disease, and/or immune-mediated diseases. This FOA also supports technology development to advance studies of the human immune system. The overarching goal of the CCHI is to provide foundational information on human immune system function to support translation of immunology research into clinical benefits.</p>

	Deadline Dates (ALL)	03-Mar-2023 , 02-Jul-2023 , 03-Nov-2023			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) is to encourage Research Project Grant (R01) applications to pursue clinical observational (CO) studies to obtain data necessary for designing clinical studies for musculoskeletal, rheumatic, or skin diseases or conditions. A future clinical study may include a clinical trial or an observational study. Research data from observational studies supported by this FOA can enhance clinical study design by providing essential information about disease symptoms, stages, and timing of disease progression; comorbid conditions; availability of potential research participants; and outcomes that are important to patients. They also can facilitate efforts to develop and/or validate objective biomarkers or subjective outcome measures for use in a future clinical study. Applicants to this FOA are encouraged to propose studies that address significant obstacles or questions in the design of a clinical project, such as determining the appropriate primary or secondary outcome measures or identifying the stages of disease during which patients are most likely to respond to an intervention. Only observational studies will be supported through this FOA.</p>

Deadline Dates (ALL) | 28-Mar-2023 , 28-Mar-2024 , 28-Mar-2025

Synopsis | The National Center for Medical Rehabilitation Research (NCMRR) Early Career Research (ECR) Award (R03) is intended to support both basic and clinical research from rehabilitation scientists who are establishing independent research careers. The research must be focused on one or more of the areas within the mission of NCMRR: Applicants are encouraged to refer to the NIH Research Plan on Rehabilitation for strategic priorities (<https://www.nichd.nih.gov/newsroom/news/110121-NIH-rehab-plan>). The NCMRR ECR Award R03 grant mechanism supports various types of projects including secondary analysis of existing data; small, self-contained research projects; development of research methodology; translational research; outcomes research; and development of new technology. Irrespective of the type of project, the intent of the NCMRR ECR Award R03 is for the Program Director(s)/Principal Investigator(s) (PD(s)/PI(s)) to obtain sufficient preliminary data for a subsequent R01 application.

 Deadline Dates (ALL) | 07-Mar-2023 , 06-Jul-2023 , 03-Nov-2023 , 06-Mar-2024

Synopsis | This Funding Opportunity Announcement (FOA) will accept applications for competing renewal or competitive revision of ongoing clinical trials supported by the National Institute of Dental and Craniofacial Research (NIDCR). Extension of an ongoing clinical trial through a competing renewal application will be supported when there is need for additional time to complete the trial or when an extended period of follow-up is well justified to assess longer term outcomes. Competitive revisions will be supported when there is compelling justification for modifying the scope of the ongoing clinical trial. Applicants are strongly encouraged to contact the appropriate Scientific/Research contact for the ongoing clinical trial for which they are planning a competing renewal or competitive revision prior to submitting an application to this FOA.

Deadline Dates (ALL)	07-Jan-2023 , 07-Feb-2023 , 07-Mar-2023 , 07-May-2023 , 06-Jun-2023 , 06-Jul-2023 , 07-Sep-2023 , 03-Oct-2023 , 03-Nov-2023 , 07-Jan-2024 , 06-Feb-2024 , 06-Mar-2024 , 07-May-2024
Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to encourage UG3/UH3 phased cooperative agreement research applications to plan and implement behavioral and social intervention clinical trials. Studies appropriate for this FOA include clinical trials to develop and test behavior change interventions related to dental, oral, or craniofacial conditions. Applications for NIDCR support of clinical trials research are expected to identify research proposals using the NIH Stage Model framework, described in detail here and incorporate an experimental medicine approach. Awards made under this FOA will initially support a milestone-driven UG3 planning phase for up to 2 years, with possible transition to a UH3 clinical trial implementation phase (UH3) of up to five years. The UG3 phase for behavioral and social intervention clinical trials will permit both scientific and operational planning activities. Scientific planning activities include small-scale data collection to assess the feasibility and/or acceptability of a planned behavioral or social intervention and associated study procedures (e.g., acceptability of study content or mode of delivery; feasibility of proposed data collection procedures; preliminary testing of intervention training and fidelity monitoring procedures). Operational planning activities include, at a minimum, development of: the final clinical protocol; the intervention manual or equivalent; the data management system and other tools for data and quality management, safety and operational oversight plans; recruitment and retention strategies; and other essential documents. The UH3 phase will support the conduct of investigator-initiated intervention research at all stages, from early mechanistic research and intervention development (e.g., Stages 0/ I) through implementation and health services research (Stages IV/V). This FOA may also support basic behavioral experimental studies with humans that are considered clinical trials based on the NIH's revised clinical trial definition (please see Clinical Trial Requirements for Grants and Contracts for guidance).</p>

	<p>Contact Telephone 301-435-0486</p> <p>Contact Email christine.maric-bilkan@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 30-Mar-2023 , 01-Aug-2023 , 30-Nov-2023 , 02-Apr-2024 , 01-Aug-2024 , 03-Dec-2024 , 01-Apr-2025</p> <p>Synopsis The purpose of the Kidney, Urology or Hematology (KUH) Predoctoral to Postdoctoral Transition Award (F99/K00) is to recruit truly exceptional graduate students, who are currently not involved in Kidney, Urology or Hematology (K, U or H) research, and provide them a stable transition into a postdoctoral research experience focused on K, U, or H research. Strong candidates will bring novel approaches and diverse perspectives from fields including, but not limited to, engineering, statistics, data science, imaging, biochemistry, neuroscience and genetics. Graduate students who are already involved in K, U, or H research are not eligible for this F99/K00 award and are instead encouraged to apply for the Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship (Parent F31, PA-21-051). Prospective applicants are strongly encouraged to contact the NIDDK Program Official early in the process to discuss eligibility and program goals. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

	Synopsis	The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) announces a program that provides NIDDK-supported K01, K08, K23, and K25 recipients the opportunity to apply for Small Grant (R03) support during the latter years of the award period of their K award. Through the use of this mechanism, the NIDDK is seeking to enhance the capability of its K01, K08, K23, and K25 award recipients to conduct research as they complete their transition to fully independent investigator status. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. The R03 is, therefore, intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application.

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 08-Feb-2023 [Optional][LOI/Pre-App], 08-Mar-2023 , 19-Oct-2023</p> <p>Synopsis The overall goal of the Fostering Research with Additional Resources and Development (FORWARD) Urology Centers program is to foster and expand the urology (excluding cancer) research community. The objective of each FORWARD Urology Center will be to support a Research Project designed and conducted by a collaborative, multidisciplinary team comprising primarily of junior investigators with at least one Early Stage Investigator (ESI) and/or researcher new to urology. Research Project data are expected to support one or more follow-on independent grant applications (e.g., R01s) submitted by Research Project Team investigators. The Center PD(s)/PI(s) will lead an Administrative (Project Support) Core to provide guidance to the Research Project Team to help ensure the research aims are met and to aid them in their successful integration into the broader urologic research field. The Center will leverage intra- and extra-institutional resources, collaborations and facilities and engage as a member of NIDDK's CAIRIBU (Collaborating for the Advancement of Interdisciplinary Research in Benign Urology) Program.</p>				
114249	RFA-ES-22-010 -- Environmental Health Sciences Core Centers (EHSCC) (P30 Clinical Trial Optional)	National Institute of Environmental Health Sciences/NIH/DHHS	RFA-ES-22-010	19-Mar-2023 [Optional][LOI/Pre-App]	3,400,000 USD

As intellectual hubs for environmental health science research, the EHS CC is expected to be the thought leaders for the field and advance the goals of the NIEHS Strategic Plan (http://www.niehs.nih.gov/about/strategicplan/). The Core Centers provide critical research infrastructure, shared facilities, services and/or resources, to groups of investigators conducting environmental health sciences research. An EHS CC enables researchers to conduct their independently-funded individual and/or collaborative research projects more efficiently and/or more effectively. The overall goal of an EHS CC is to identify and capitalize on emerging issues that advance improving the understanding of the relationships among environmental exposures, human biology, and disease. The EHS CC supports community engagement and translational research as key approaches to improving public health.</p>

career development programs must conduct ongoing evaluations to monitor the success of the training and mentoring activities and are expected to disseminate their outcomes to the broader community. The supplement awards will provide funds to enhance the institutional evaluation capacity to help meet these expectations for program evaluation. Plans for sustainability of the enhanced evaluation capacity beyond the funding period should be included in the supplement application

that can advance the understanding or care of neurological disorders and conditions within the NINDS mission. In this phased award funding mechanism, applications are required to systematically and comprehensively perform cross-project data harmonization and curation, assessed using go/no-go data-quality metrics, prior to performing secondary analyses of existing clinical data. Consistent with the FAIR (findable, accessible, interoperable and reusable) data principles, this funding opportunity expects open-source cataloging of the processes and tools used for harmonization, curation, and analysis, as well as controlled access to the curated datasets.

103697	RFA-NS-21-012 -- NIH Blueprint and BRAIN Initiative Diversity Specialized Predoctoral to Postdoctoral Advancement in Neuroscience (D-SPAN) Award (F99/K00 Clinical Trial Not Allowed)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	RFA-NS- 21-012	15-Mar-2023 [Optional][LOI/Pre-App]	Not Specified

Deadline Dates (ALL)	15-Mar-2023 [Optional][LOI/Pre-App], 14-Apr-2023 , 15-Nov-2023 [Optional][LOI/Pre-App], 15-Dec-2023
Synopsis	The purpose of the NIH Blueprint Diversity Specialized Predoctoral to Postdoctoral Advancement in Neuroscience (D-SPAN) Award is to support a defined pathway across career stages for outstanding graduate students from diverse backgrounds, including those from groups underrepresented in biomedical and behavioral sciences. This two-phase award will facilitate completion of the doctoral dissertation and transition of talented graduate students to strong neuroscience research postdoctoral positions, and will provide career development opportunities relevant to their long-term career goal of becoming independent neuroscience researchers. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor

	<p>approaches to understanding the complex biology of AD to fill critical knowledge gaps or to examine critical areas of AD biology that have not been adequately addressed in the past. Applicants are encouraged to use or develop state-of-the-art research and analytical tools and to integrate the use of human data and biosamples with cell-based and animal models.</p>				
108278	Notice of Special Interest (NOSI): Selective Cell and Network Vulnerability in Aging and Alzheimer's Disease	National Institute on Aging/NIH/DHHS	NOT-AG-21-040	10-Mar-2023	Not Specified
	<p>Contact Name Bradley C. Wise, Ph.D. Contact Telephone 301-496-9350 Contact Email WiseB@mail.nih.gov Sponsor Website Program URL Link to program URL Deadline Dates (ALL) 10-Mar-2023 , 10-Jul-2023 , 13-Nov-2023 , 11-Mar-2024 , 09-Jul-2024 , 12-Nov-2024 Synopsis The goal of this Notice of Special Interest (NOSI) is to stimulate research to define and characterize neural cell populations (e.g., neurons and glia), neural activity and circuits, structural and functional networks, and brain regions that are vulnerable (or resistant) in brain aging and AD and the mechanisms underlying such selective vulnerability. Genetic and molecular signatures of different types of neurons and glial cells across the adult lifespan, in AD compared to other dementias of aging, and in different stages of AD will implicate cell processes and pathways mediating selective vulnerability in AD. Defining cell types by physiological measures such as electrophysiology and connectivity and manipulating neural activity in circuits and networks will provide a functional index of selective vulnerability. Applicants are encouraged to use new approaches to generate sophisticated data on molecular signatures of brain cells and on structure and function of brain circuits and networks. Understanding the mechanisms underlying selective vulnerability from cells to networks in AD is critical to fully define the disease process and to develop effective therapies.</p>

Deadline Dates (ALL)	10-Mar-2023 , 10-Jul-2023 , 13-Nov-2023 , 11-Mar-2024 , 09-Jul-2024 , 12-Nov-2024
Synopsis	This Notice of Special Interest (NOSI) is intended to promote behavioral and social research on the dementia care workforce and the impact of workforce factors on outcomes for persons living with Alzheimer's disease or Alzheimer's disease-related dementia (AD/ADRD) and their families. Applications focused on care of persons living with dementia and the systems that provide care may cite NOT-AG-21-046, and applications focused solely on unpaid dementia care partners/caregivers may cite NOT-AG-21-047 in the Agency Routing Identifier field (box 4B). PLEASE NOTE: Applications proposing clinical trials will not be considered a high priority for this NOSI. Studies proposing dementia care intervention research are encouraged to explore whether PAR-21-307 Dementia Care and Caregiver Support intervention Research (R01 – Clinical Trial Required) or PAR-21-308 Pragmatic Trials for Dementia Care and Caregiver Support (R61/R33 – Clinical Trial Required) would be more appropriate.

candidate with a robust body of background data in the basic science and early discovery phases to be ready for transition to the preclinical and clinical phases of development. Data may include having sufficient bioactivity, stability, manufacturability, bioavailability, in vivo efficacy and/or target engagement, and other favorable properties that are consistent with the desired clinical application. Projects responsive to this announcement could be undertaken at any point along the drug development continuum, from late discovery (i.e., lead optimization/early safety) up to early-stage clinical trials. For small molecules, the earliest stage of eligibility for this Award is already having small-molecule compounds with proof of desired pharmacological activity. For biologics, the profiling of promising product candidates in animal models of AUD or AAOD will be allowed as the earliest entry point. The ultimate purpose and goal of this FOA is to advance molecules closer to U.S. Food and Drug Administration (FDA) approval. Milestones will be commensurate with the project proposed and the purpose of this FOA. This FOA supports early-phase clinical trials, although these are not required. Women-owned and socially or economically disadvantaged small businesses are encouraged to apply.

	Deadline Dates (ALL)	08-Mar-2023 , 10-Aug-2023 , 08-Mar-2024			
	Synopsis	The National Institute on Drug Abuse (NIDA) Cutting-Edge Basic Research Award (CEBRA) is designed to foster highly innovative or conceptually creative research related to the etiology, pathophysiology, prevention, or treatment of substance use disorders (SUDs). It supports high-risk and potentially high-impact research that is underrepresented or not included in NIDA's current portfolio that has the potential to transform SUD research. The proposed research should: 1. develop, and/or adapt, revolutionary techniques or methods for addiction research or that show promising future applicability to SUD research; and /or 2. test an innovative and significant hypothesis for which there are scant precedent or preliminary data and which, if confirmed, would transform current thinking.			
111018	Behavioral & Integrative Treatment Development Program (R34 Clinical Trial Optional)	National Institute on Drug Abuse/NIH/DHHS	PAR-22-183	21-Mar-2023	450,000 USD

	Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to encourage research grant applications on the development and testing of behavioral and integrative treatments for substance use and dependence. This FOA reaffirms			

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>the continued commitment of NIDA to major programs of research on behavioral and integrative treatments. The term "behavioral treatments" is used here in a broad sense and includes but is not limited to psychotherapies, cognitive, relapse prevention, remediative, rehabilitative, skills training, counseling, family, and exercise therapies. Screening, brief, computerized, adherence, prevention interventions for HIV risk behaviors, and interventions that target therapist training and fidelity also are included. Integrative refers to combinations with other treatments, including pharmacotherapies or other complementary approaches. The development and testing of putative targets and mechanisms of behavior change, as well as the use and development of valid and reliable assessment tools are crucial to the three stages of treatment research supported under this initiative: Stage I (treatment generation, refinement) encompasses all activities related to the creation of a new behavioral intervention. This stage also includes the modification, adaptation, or refinement of an existing intervention (Stage IA). Stage I culminates in feasibility and pilot testing (Stage 1B). For example, one can conduct Stage I studies in research settings, with research therapists and research subjects, or in community settings with community providers. Stage II ("Efficacy") research consists of experimental testing of promising behavioral interventions in research settings, with research-based therapists/providers. Stage III ("Efficacy in Real-World") research consists of experimental testing of promising behavioral interventions in community settings, with community-based therapists/providers and patients, while maintaining a high level of control necessary to establish internal validity. Stages I, II, and III all include a focus on theory-derived, targets/putative moderators, mediators, and change mechanisms that underlie the treatment, and studies that optimize combined, sequential, or integrated behavioral/pharmacological treatments.</p>

Deadline Dates (ALL)	02-Mar-2023 , 26-Jul-2023 , 04-Mar-2024
Synopsis	<p>The purpose of the NIDA Animal Genetics Program is to identify genetic, genomic, and molecular (epi)genetic variants that underlie: 1. Phenotypes associated with addictive behaviors and/or vulnerability to distinct stages along the substance use disorder (SUD) trajectory (e.g. initial/acute use, escalation of use, acquisition of tolerance, dependence, uncontrolled use, abstinence and relapse or recovery); 2. Behaviors associated with SUD (e.g. impulsivity, novelty seeking, delayed discounting, and other genetically-associated phenotypes); and 3. Comorbidities that demonstrate genetic correlations with phenotypes and behaviors linked with SUD (e.g. anxiety, stress, poor maternal care, social defeat, and other paradigms). Applications may examine any type of variant, including single nucleotide variants (SNVs), indels, large and small structural variants, and all types of mobile DNA. NIDA encourages applications that take genomics, multi-omics, and/or data-based approaches that integrate multi-level 'omics data, delineate gene networks, and/or uncover the function of known or newly discovered genetic or epigenetic variants. NIDA expects these studies to uncover novel mechanisms that contribute to SUD and facilitate the discovery of targets for intervention and guide the development of individualized therapeutics to treat these different aspects of SUD.</p>

	Synopsis	The mission of the Division of Neuroscience and Behavior of NIDA is to discover, facilitate and promote outstanding basic animal and human research aimed at identifying the causes and consequences of drug addiction across the lifespan and to guide treatment strategies. As a component of the Division, the Chemistry and Pharmacology Branch supports research on all aspects of the chemistry and pharmacology of addictive drugs. The Branch develops and oversees a broad portfolio encompassing research on substance use disorders (SUD) and overdose designed to: 1) elucidate mechanisms of action, synthetic and biosynthetic methodologies, structure-activity relationships, pharmacology and toxicity of addictive drugs, and determination of 3D structures of ligands bound to biological targets, 2) develop new receptor type and subtype specific agents, and 3) discover and advance the pre-clinical development of new pharmacotherapies for the treatment of SUD and overdose, emphasizing the pre-clinical stages of target identification through hit-to-lead.

	Synopsis	The mission of the Division of Neuroscience and Behavior (DNB) is to facilitate and promote outstanding basic animal and human research aimed at identifying the causes and consequences of substance use and substance use disorders (SUD) across the lifespan and to guide treatment strategies. The Integrative Neuroscience (IN) Branch within DNB supports research on the cellular mechanisms and circuitry that underlie substance use and SUD. Research supported by the Branch covers: 1) the regulation and plasticity of neurotransmitter and neuromodulatory systems induced by chronic or intermittent exposure to, and/or withdrawal from, addictive substances, 2) the study of substance-induced neurotoxicity, 3) neuron-glia interactions and their modification by substance use and SUD 4) neuroendocrine modulation of neural systems in relation to substance use and SUD , and 5) neuroimmune modulation of the brain including the influences of neuroAIDS and substance-induced neuroinflammation.

Synopsis | The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this NIDA R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation's biomedical, behavioral and clinical research needs. This FOA is intended to support research education activities that enhance the knowledge of substance use (SU) and substance use disorder (SUD) research. The program is intended for those in clinically focused careers and/or those training for careers as clinicians/health service providers, clinical researchers, or optimally a combination of the two. This mechanism may not be used to support non-research-related clinical training. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on Courses for Skills Development and Research Experiences. The proposed research education programs must include both courses for skills development and research experiences with primary emphasis on research experiences. Proposed courses should be developed in conjunction with and support research experiences to enhance skills development.

Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL)	Rachel Grana Mayne, PhD 240-276-5899 granar@nih.gov Link to program URL 07-Jan-2023 [Optional][LOI/Pre-App], 08-Mar-2023 Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to invite R21 applications to stimulate exploratory research relevant to the mission of the Food and Drug Administration (FDA) - Center for Tobacco Products (CTP) using existing (publicly available) biospecimens currently stored in repositories in the United States. This will include, but not be limited to, collections associated with the Population Assessment of Tobacco and Health (PATH) Study, the National Health and Nutrition Examination Survey (NHANES), the National Heart, Lung and Blood Institute's (NHLBI) Biologic Specimen and Data Repository Information Coordinating Center (BioLINCC), and the Prostate, Lung, Colorectal and Ovarian (PLCO) Cancer Screening Trial. Proposed research should seek to maximize the scientific value of these stored collections and to provide researchers with an opportunity to generate preliminary data for subsequent research proposals. Other publicly available datasets would be considered, depending on analyses to be conducted. These applications need to provide justification why the data set is unique, and the research questions cannot be answered from a publicly available, nationally representative, data set. The awards under this FOA will be administered by NIH using funds that have been made available through FDA-CTP and the Family Smoking Prevention and Tobacco Control Act (P.L. 111-31). Research results from this FOA are expected to generate findings and data that are directly relevant in informing the FDA's regulation of the manufacture, distribution, and marketing of tobacco products to protect public health. Research Projects must address the research priorities related to the regulatory authority of the Food and Drug Administration (FDA) - Center for Tobacco Products (CTP).

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to invite R21 applications proposing the innovative analysis of existing (publicly available) nationally representative U.S. cross-sectional and longitudinal data, to investigate novel scientific ideas and/or to generate new models, systems, tools, methods, or technologies that have the potential for significant impact on biomedical or biobehavioral research in areas relevant to the Food and Drug Administration (FDA) - Center for Tobacco Products (CTP). Other publicly available data sets would be considered depending on the analyses to be conducted; however, nationally representative analyses will receive priority. Applications not using nationally representative data sets will need to provide justification why the data set is unique, and why the research questions cannot be answered from a (publicly available) nationally representative data set. This FOA encourages the analyses of public use datasets that may inform tobacco regulatory actions in the United States (U.S.). The awards under this FOA will be administered by NIH using funds that have been made available through FDA-CTP and the Family Smoking Prevention and Tobacco Control Act (P.L. 111-31). Research results from this FOA are expected to generate findings and data that are directly relevant in informing the FDA's regulation of the manufacture, distribution, and marketing of tobacco products to protect public health. Research Projects must address the research priorities related to the regulatory authority of the Food and Drug Administration (FDA) - Center for Tobacco Products (CTP).</p>

	<p>Synopsis The purpose of the International Research Scientist Development Award (IRSDA) is to provide support and protected time (three to five years) to advanced postdoctoral U.S. research scientists and recently-appointed U.S. junior faculty (applicants must be at least two years beyond conferral of doctoral degree) for an intensive, mentored research career development experience in a low- or middle-income country (LMIC), as defined by the World Bank (http://data.worldbank.org/about/country-classifications/country-and-lending-groups), including "low-income," "lower-middle-income," and "upper-middle-income" countries) leading to an independently-funded research career focused on global health. This Funding Opportunity Announcement (FOA) invites applications from postdoctoral research scientists and junior faculty from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of the LMIC under the mentorship of LMIC and U.S. mentors. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary study to an ongoing clinical trial as lead investigator should apply to the companion FOA (PAR-21-105).</p>

Deadline Dates (ALL)	17-Mar-2023
Synopsis	<p>This Funding Opportunity Announcement (FOA) invites applications from investigators who strive to expand their research trajectories through the acquisition of new knowledge and skills in the areas of basic psychological processes, sociological processes, and/or biomedical pathways—expertise that is beyond and enhances their current areas of expertise. The program will support career development experiences and a small-scale research project that will provide experienced investigators with the scientific competencies required to conduct independent research projects that more thoroughly investigate interrelationships among behavioral, biological, endocrine, epigenetic, immune, inflammatory, neurological, psychological, and/or social processes. Eligible candidates are independent investigators at mid-career faculty rank or level. Applicants may propose research career development projects that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical and/or behavioral outcomes in humans to understand fundamental aspects of phenomena (see, NOT-OD-18-212). These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants who plan to gain research experience within an existing clinical trial or basic experimental study with humans led by another investigator, or who propose to gain research experience in purely basic human or model animal research, or in data sciences, must apply to companion FOA, PAR--20-211, Independent Clinical Trials Not Allowed. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind.</p>

Synopsis	The purpose of this funding opportunity announcement is to support research that uses human tissue or cells to generate comprehensive datasets for the discovery and characterization of functional genetic elements, epigenetic signatures, and molecular/cellular pathways that underlie human pain transduction, transmission, and processing. This FOA will support concerted multidisciplinary team science efforts that apply large-scale high-throughput approaches on tissues involved in human pain processing as part of the NIH HEAL Initiative’s Program to Reveal and Evaluate Cells-to-gene Information that Specify Intricacies, Origins, and the Nature of Human Pain (PRECISION Human Pain). U19 Centers will operate as a cooperative network to promote collaboration and coordination of research activities. U19 Centers will also coordinate with

	Synopsis	This funding opportunity announcement (FOA) invites basic and/or methodological research projects that seek to illuminate or measure independent and interdependent health-related effects within dyads. For the purpose of this FOA, a dyad is a unit of two individuals whose interactions and influences on one another are nested within larger social contexts and networks. Both animal and human subjects research projects are welcome. Types of projects submitted under this FOA include but are not limited to, observational studies involving humans, or existing/synthesized datasets studies. Researchers proposing basic science experimental studies involving human participants (i.e., experimentally manipulate independent variables) should consider the companion FOA PAR-21-280" Dyadic Interpersonal Processes and Biopsychosocial Outcomes (R01 Basic Experimental Studies with Humans)."

	Synopsis	This funding opportunity announcement (FOA) invites research to develop, characterize, and rigorously validate non-rodent mammalian models of pain, associated outcome measures and/or endpoints that will significantly advance translational research for effective pain management. These models are expected to recapitulate molecular, cellular, pathological, behavioral, and/or cognitive aspects of human pain disorders and conditions. Research supported under this FOA is expected to provide well-validated models and measures that facilitate the development of non-opioid analgesic therapeutic interventions with little or no addiction liability.

	<p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2023 , 05-Feb-2023 , 07-Feb-2023 , 16-Feb-2023 , 17-Feb-2023 , 10-Mar-2023 , 07-May-2023 , 05-Jun-2023 , 06-Jun-2023 , 16-Jun-2023 , 10-Jul-2023 , 07-Sep-2023 , 05-Oct-2023 , 16-Oct-2023 , 13-Nov-2023 , 07-Jan-2024 , 05-Feb-2024 , 06-Feb-2024 , 16-Feb-2024 , 11-Mar-2024 , 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 09-Jul-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 12-Nov-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 16-Jun-2025 , 07-Sep-2025 , 05-Oct-2025</p> <p>Synopsis The purpose of this Notice is to highlight interest in addressing the role of violence in health outcomes and integrating violence-related screening and interventions into health care settings. This Notice is to encourage intervention research focused on addressing exposure to violence - including but not limited to child maltreatment, intimate partner violence/teen dating violence, elder mistreatment, peer violence/bullying, and community violence – to improve individual-level health processes and outcomes.</p>				
104865	Notice of Special Interest (NOSI): Navigating Pediatric to Adult Health Care: Lost in Transition	National Institutes of Health/DHHS	NOT-HD-21-027	07-Jan-2023	Not Specified
	<p>Contact Name Sonia Lee, PhD</p> <p>Contact Telephone 301-594-4783</p> <p>Contact Email leesonia@mail.nih.gov</p> <p>Sponsor Website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2023 , 05-Feb-2023 , 16-Feb-2023 , 07-Mar-2023 , 07-May-2023 , 05-Jun-2023 , 16-Jun-2023 , 07-Sep-2023 , 05-Oct-2023 , 16-Oct-2023 , 05-Nov-2023 , 07-Jan-2024</p> <p>Synopsis The purpose of this Notice of Special Interest (NOSI) is to encourage applications in high-priority research areas related to pediatric health care transition for youth with chronic physical/medical conditions or intellectual/developmental disabilities. Research applications that will advance our understanding of promising practices designed to facilitate successful health care transitions (HCT) from pediatric to adult care settings as well as barriers and facilitators to such transition are encouraged. The ultimate goal is to improve care quality and patient and family outcomes during and after HCT.</p>				
107763	Notice of Special Interest (NOSI): Electronic Nicotine Delivery Systems (ENDS) and Alternative Nicotine and Tobacco Delivery Systems: Population, Clinical and Applied Prevention Mechanisms of Health Effects	National Institutes of Health/DHHS	NOT-OD-22-023	07-Jan-2023	Not Specified

Research on alternative nicotine and tobacco delivery systems [e.g., heated tobacco products (also called heat-not-burn)] will also be considered. Research with a focus on other non-combustible nicotine and tobacco products will be considered on a case-by-case basis. Studies should examine population-based, clinical, and applied prevention of disease, including etiology and epidemiology of use, potential risks, benefits and impacts on other tobacco use behavior among different populations. Studies exclusively examining smokeless tobacco or combustible tobacco products (e.g., cigarettes, cigars) will be considered non-responsive.</p>

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 16-Jan-2023 , 16-Mar-2023 , 07-May-2023 , 16-Jun-2023 , 16-Jul-2023 , 07-Sep-2023 , 16-Oct-2023 , 16-Nov-2023 , 07-Jan-2024 , 16-Feb-2024 , 16-Mar-2024 , 07-May-2024 , 16-Jun-2024 , 16-Jul-2024 , 07-Sep-2024 , 16-Oct-2024 , 16-Nov-2024 , 07-Jan-2025 , 16-Feb-2025 , 16-Mar-2025 , 07-May-2025 , 16-Jun-2025 , 16-Jul-2025 , 07-Sep-2025 , 16-Oct-2025 , 16-Nov-2025 , 07-Jan-2026</p> <p>Synopsis This Trailblazer Award is an opportunity for NIH-defined New and Early Stage Investigators (https://grants.nih.gov/policy/early-investigators/index.htm) to pursue research programs of high interest to the NIBIB that integrate engineering and the physical sciences with the life and/or biomedical sciences. A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.</p>				
114331	RFA-HD-24-006 -- Using Archived Data and Specimen Collections to Advance Maternal and Pediatric HIV/AIDS Research (R21 - Clinical Trial Not Allowed)	National Institutes of Health/DHHS	RFA-HD-24-006	27-Feb-2023 [Optional][LOI/Pre-App]	275,000 USD

	Deadline Dates (ALL)	20-Mar-2023 , 16-Jun-2023 , 16-Oct-2023 , 16-Feb-2024 , 16-Jun-2024 , 16-Oct-2024 , 16-Feb-2025 , 16-Jun-2025 , 16-Oct-2025			
	Synopsis	<p>The INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndrome (INCLUDE) Project encourages exploratory and innovative research to develop, characterize, or improve animal models and related biological materials for Down syndrome (DS) related research and to improve access to information about or from the use of animal models for DS research. The animal models and related biological materials developed must have utility in targeted or basic science studies in areas highly relevant to DS. With this funding opportunity announcement, the INCLUDE Project encourages, but is not limited to, projects focusing on development of various animal models, genetic resources, atlases at a single cell or subcellular level, advanced informatics technologies including artificial intelligence (AI) or machine learning (ML), and integration of multiple animal models and technology platforms for enhancing rigor and reproducibility of preclinical DS research.</p>

	Synopsis	<p>The goal of this initiative is to support action-oriented research that accelerates the translation of research to practice to address the overdose crisis. There remains an urgent need for research that advances the design of stigma-free patient-centered systems of care such that people who experience addiction can recover and sustain their recovery over the long-term. This FOA solicits applications that address understudied areas of opportunity, particularly those that focus on fundamental barriers or facilitators to reducing overdose deaths at the individual, provider, organizational, community, or system levels. Projects should be in alignment with the overall goals of the HEAL Initiative, and should focus on replicable, scalable, equitable approaches for accelerating the movement of evidence-based and promising treatments into routine use. This FOA invites phased applications to support projects for which preliminary or feasibility data is not available at the time of submission. This FOA is a companion to RFA-DA-23-054 , which solicits applications for which pilot data is available.</p>

Synopsis | This opportunity addresses a critical barrier to addressing the overdose crisis: ensuring a robust workforce to deliver interventions and services to people with substance use disorders and related comorbidities. Recruiting, training, and retaining a robust and highly qualified behavioral health workforce is essential to delivering effective services that address opioid misuse and addiction. However, workforce shortages and high rates of turnover among behavioral health services staff and increases in demand for care have substantially impacted access to, cost of, and quality of services. Further, these barriers undermine efforts to implement innovative approaches to care. In 2018, the Health Resources and Services Administration (HRSA) projected that demand for addiction counselors will exceed supply by approximately 38% in 2030; this trend has likely worsened in response to the COVID-19 pandemic. Workforce challenges were highlighted as one of the top priorities listed in the Office of National Drug Control Policy (ONDCP) 2022 Drug Control Strategy and an effective workforce undergirds all four elements (primary prevention, harm reduction, evidence-based treatment, recovery support) of the HHS Overdose Prevention Strategy. There are numerous individual-, organizational-, and system-level challenges to recruiting, training, and retaining behavioral health professionals. Unfortunately, little research has been conducted to develop and evaluate strategies to addressing these challenges. Therefore, research funded through this initiative must focus on interventions or strategies aimed at addressing barriers to recruiting, training, and retaining a highly qualified behavioral health workforce, with the ultimate goal of improving care quality and patient outcomes for people who use drugs.

 Deadline Dates (ALL) 09-Mar-2023

Synopsis The National Institutes of Health (NIH) participating Institutes and Centers (ICs), in collaboration with the Global Alliance for Chronic Diseases (GACD), invite applications for implementation research focused on addressing risk factors for common noncommunicable diseases (NCDs) in World Bank-defined low- and middle-income countries (LMICs) and American Indian/Alaska Native (AI/AN) populations in the United States (US). Air, water, and soil pollution; lack of greenspace; urban heat islands; lack of safe infrastructure for walking, cycling, and active living; lack of access to healthcare facilities, lack of health insurance, and cost of medications; housing condition; and wide availability of tobacco, alcohol, and unhealthy foods and beverages contribute to the NCD epidemic in city environments. In the context of this Funding Opportunity Announcement (FOA), "cities" include urban centers, informal settlements, slums, and periurban areas. This FOA supports applications that propose implementation research to reduce the risks of NCDs in the context of cities in LMICs and/or among AI/AN populations in US cities, with the potential to equip policymakers and practitioners with evidence-based strategies for prevention and/or management of NCDs among disadvantaged populations globally. NIH defines implementation research as the scientific study of the use of strategies to adopt and integrate evidence-based health interventions into clinical and community settings to improve individual outcomes and benefit population health. This FOA uses the bi-phasic, milestone driven R61/R33 grant mechanism. Awards made under this FOA will initially support a one-year

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

milestone-driven initiation (R61) phase, with possible transition to an implementation (R33) phase of up to four additional years. Only projects that meet the scientific milestones and award requirements of the R61 phase may transition to the R33 phase. Applications submitted in response to this FOA must address both the R61 and R33 phases. All applications must be within the scope of the mission of one of the Institutes/Centers listed above (see "Components of Participating Organizations," excluding the Fogarty International Center which manages this program but does not support awards). Applications will be accepted from US and World Bank-defined LMIC institutions only.

	Deadline Dates (ALL)	10-Jan-2023 , 09-Feb-2023 , 09-Mar-2023 , 11-Apr-2023 , 09-May-2023 , 09-Jun-2023 , 11-Jul-2023 , 09-Aug-2023 , 08-Sep-2023 , 09-Oct-2023 , 10-Oct-2023 , 11-Dec-2023 , 09-Jan-2024 , 09-Feb-2024 , 08-Mar-2024 , 09-Apr-2024 , 08-May-2024 , 10-Jun-2024 , 09-Aug-2024 , 10-Sep-2024
	Synopsis	This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, sedentary behavior, and/or sleep) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not eligible for re-submission. It is intended that eligible applications selected for funding will be awarded within 4 months of the application due date; however, administrative requirements and other unforeseen circumstances may delay issuance dates beyond that timeline.

108216	Accelerating Innovations in Biomanufacturing Approaches through Collaboration Between NSF and the DOE BETO funded Agile BioFoundry (NSF-DOE/ABF Collaboration)	National Science Foundation	22-549	15-Mar-2023	Not Specified
	<p>Contact Name David Rockcliffe</p> <p>Contact Telephone 703-292-7123</p> <p>Contact Email drockcli@nsf.gov</p> <p>Sponsor Website Link to sponsor website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 15-Mar-2023</p> <p>Synopsis The National Science Foundation (NSF) and the Department of Energy’s Bioenergy Technologies Office (DOE BETO) recognize the critical roles that synthetic and engineering biology play in advancing the U.S. Bioeconomy. To translate advances in synthetic and engineering biology into products and processes that will impact the U.S. bioeconomy, there is a need to accelerate innovation and adopt new biomanufacturing approaches. The integrated Design-Build-Test-Learn (DBTL) capabilities of the DOE BETO funded Agile BioFoundry (ABF) offer a unique resource to the academic community to develop and implement innovative biodesign and biomanufacturing technologies and practices. To help advance the U.S. bioeconomy, these agencies invite proposals from researchers at institutions of higher education and non-profit organizations (eligible PIs). The proposals must leverage the unique DBTL capabilities available at the ABF to translate the latest advances in synthetic biology and engineering biology basic research into testable prototype processes and products that are potentially scalable and manufacturable and can be appropriately validated. Of particular interest are proposals that both leverage the DBTL capabilities of the ABF to translate basic science into bioeconomy-relevant innovation and also lead to the development of generalizable rules or theories of biological systems that enhance our understanding of basic science. In order to facilitate the utilization of the integrated DBTL capabilities available at the ABF and ensure the readiness of basic research projects for their translation to ABF platforms, NSF would support efforts of eligible PIs and their students, postdoctoral fellows, and other lab personnel on projects that can leverage the unique capabilities of the ABF. NSF support would be for all activity at the institution of higher education or non-profit organization that occurs in parallel to, or prior to, the work at ABF that readies the project for translation to practice. In order to increase collaboration across sectors and workforce development, NSF, through this program, can also support short term faculty fellows, post-doctoral fellows, graduate students or undergraduate student interns that are hosted by national laboratories or ABF. DOE BETO will cover the costs for implementation of approved projects at ABF. Partnering with industry is encouraged for technologies both to facilitate eventual scale up and regulatory approval.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
Foundation					
	<p>Contact Name Steven Breckler</p> <p>Contact Telephone 703-292-7369</p> <p>Contact Email sbreckle@nsf.gov</p> <p>Sponsor Website Link to sponsor website</p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 15-Mar-2023</p> <p>Synopsis Strengthening American Infrastructure (SAI) is an NSF program seeking to stimulate human-centered fundamental and potentially transformative research aimed at strengthening America’s infrastructure. Effective infrastructure provides a strong foundation for socioeconomic vitality and broad improvement in quality of life. Strong, reliable and effective infrastructure spurs private-sector innovation, grows the economy, creates jobs, makes public-sector service provision more efficient, strengthens communities, promotes equal opportunity, protects the natural environment, enhances national security and fuels American leadership. Achieving these objectives requires the integration of expertise from across all science and engineering disciplines. SAI focuses on how fundamental knowledge about human reasoning and decision-making, governance, and social and cultural processes enables the building and maintenance of effective infrastructure that improves lives and society and builds on advances in technology and engineering. Successful projects will represent a convergence of expertise in one or more social, behavioral or economic sciences, deeply integrated with other disciplines to support substantial and potentially pathbreaking fundamental research applied to strengthening a specific focal infrastructure.</p>

	Sponsor Website	Link to sponsor website			
	Program URL	Link to program URL			
	Deadline Dates (ALL)	13-Mar-2023			
	Synopsis	<p>DMREF seeks to foster the design, discovery, and development of materials to accelerate their path to deployment by harnessing the power of data and computational tools in concert with experiment and theory. DMREF emphasizes a deep integration of experiments, computation, and theory; the use of accessible digital data across the materials development continuum; and strengthening connections among theorists, computational scientists (including data scientists), and experimentalists as well as those from academia, industry, and government. DMREF is committed to the education and training of a next-generation materials research and development (R&D) workforce that is diverse, equitable, and inclusive; well-equipped for successful careers as educators and innovators; and able to take full advantage of the materials development continuum and innovation infrastructures that NSF is creating with partners in other federal agencies. DMREF is the principal NSF program responsive to the National Science and Technology Council's (NSTC's) Office of Science and Technology Policy (OSTP) Subcommittee on the Materials Genome Initiative (MGI). Over its inaugural decade, the MGI has driven a transformational paradigm shift in the philosophy of how materials research is performed. DMREF is supportive of the 2021 MGI Strategic Plan and its three primary goals, i.e., unifying the materials innovation infrastructure; harnessing the power of materials data; and educating, training, and connecting a world-class materials R&D workforce.</p>

Program URL	Link to program URL
Deadline Dates (ALL)	02-Mar-2023
Synopsis	<p>To address ecological questions that cannot be resolved with short-term observations or experiments, NSF established the Long-Term Ecological Research Program (LTER) in 1980. Two components differentiate LTER research from projects supported by other NSF programs: the research is located at specific sites chosen to represent major ecosystem types or natural biomes, and it emphasizes the study of ecological phenomena over long periods of time based on data collected in five core areas. Long-term studies are critical to achieve an integrated understanding of how components of ecosystems interact as well as to test ecological theory. Ongoing research at LTER sites is expected to contribute to the development and testing of fundamental ecological theories and significantly advance understanding of the long-term dynamics of populations, communities and ecosystems. It often integrates multiple disciplines and, through cross-site interactions may examine patterns or processes over broad spatial scales. Recognizing that the value of long-term data extends beyond use at any individual site, NSF requires that data collected by all LTER sites be made publicly accessible. NSF currently supports 28 LTER sites. The program is on-going and proposals are periodically invited when a need is identified to balance the LTER portfolio or when funding opportunities arise to support new LTERs. These opportunities are announced through separate solicitations. This solicitation governs submission of renewal proposals for active LTER site awards.</p>

113769	Experiential Learning for Emerging and Novel Technologies	National Science Foundation	23-507	02-Mar-2023	Not Specified

Deadline Dates (ALL)	02-Mar-2023 , 14-Sep-2023
Synopsis	Through this new initiative, the Directorate for Education and Human Resources (EHR) and the newly established Directorate for Technology, Innovation and Partnerships (TIP) seek to support experiential learning opportunities for individuals from

National Science Foundation (NSF) Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

diverse professional and educational backgrounds that will increase access to, and interest in, career pathways in emerging technology fields (e.g., advanced manufacturing, advanced wireless, artificial intelligence, biotechnology, quantum information science, semiconductors, and microelectronics). As NSF seeks to support the development of technologies in such fields, similar support will be needed to foster and grow a diverse science, technology, engineering, and mathematics (STEM) workforce to contribute to such innovation. Large scale societal challenges like climate change and clean energy also require a STEM workforce that brings varied perspectives and expertise to further accelerate the translation of science and engineering discoveries into large-scale solutions. Moreover, as current and new emerging technologies continue to evolve, unforeseen issues around security, safety and privacy will impact the preparation of the workforce. Emerging technologies are also dynamic and rapidly changing, with career entry and advancement often requiring "learning-by-doing" experience, even for those with some STEM education. Therefore, NSF recognizes that a competitive emerging technology workforce must include individuals from traditional and nontraditional education pathways as well as those individuals who may have "stopped" out of traditional educational pathways.

111072	Dear Colleague Letter: Mid-Scale Research Infrastructure Incubators and Conferences for STEM Education Research with a Focus on Education Equity	National Science Foundation	NSF 22-085	01-Mar-2023	Not Specified
--------	--	-----------------------------	------------	-------------	---------------

Contact Name | Xiufeng Liu

 Program URL | [Link to program URL](#)
 Deadline Dates (ALL) | 01-Mar-2023

Synopsis | With this Dear Colleague Letter (DCL), the National Science Foundation's (NSF) Directorate for Education and Human Resources (EHR) notifies the community of a collaboration with the Bill & Melinda Gates Foundation, Schmidt Futures, and the Walton Family Foundation to offer Incubator and Conference proposal opportunities that support the development of Mid-Scale Research Infrastructure (RI) efforts, especially those that enable research on the assets and needs of those traditionally left out of STEM and that lead to greater education equity. Mid-Scale RI is a relatively new concept for the science, technology, engineering, and mathematics (STEM) education community because STEM education research has traditionally been distributed, individual, and less reliant on instrumentation. Improving the speed and scale at which STEM education research advances, however, requires national research infrastructures. Through this DCL, NSF aims to conceptualize and consolidate viable infrastructure ideas to support STEM education research that will transform teaching and learning. This DCL establishes an opportunity for the field to incubate Mid-Scale RI ideas in STEM education, allowing for

	<p>Synopsis The NSF SBIR/STTR programs support moving scientific excellence and technological innovation from the lab to the market. By investing federal research and development funds into startups and small businesses, NSF hopes to build a strong national economy and stimulate the creation of novel products, services, and solutions in the private sector; strengthen the role of small business in meeting federal research and development needs; increase the commercial application of federally supported research results; and develop and increase the US workforce, especially by fostering and encouraging participation by socially and economically disadvantaged and women-owned small businesses. The NSF SBIR/STTR programs solicit proposals from small businesses based on groundbreaking scientific discoveries or significant engineering breakthroughs consistent with NSF's mission to promote the progress of science; to advance the national health, prosperity, and welfare; and to secure the national defense.</p>

Synopsis With this solicitation, the National Science Foundation's (NSF) Directorate for Computer and Information Science and Engineering (CISE), in partnership with the Directorate of Mathematical and Physical Sciences (MPS), is launching a new, focused program to support methodologies, tools, and research infrastructure for Internet measurement spanning access (both wireless and fixed broadband) and core Internet. Currently, Internet measurement is conducted in a piecemeal and uncoordinated manner, and the infrastructure to collect, share, and process the data does not include data on all aspects of the network covering both wireless and wired Internet. The scope, complexity, and means of accessing the Internet have changed dramatically throughout its existence. Internet measurement work has mostly focused on the wired core networks for which existing Internet measurement repositories/infrastructure provides yeomen service. Methods, data collection, and data sharing have not kept up with the importance and proliferation of wireless and fixed broadband access networks. This leaves important aspects of the access network (both wireless and fixed broadband) in many geographic regions unmeasured or under-measured. With citizens now using cellular phones for accessing the Internet, more accurate and/or additional ways to measure and assess performance, connectivity, network topology, and service gap have also become necessary. The goal of the IMR program is to encourage, coordinate, and connect research in Internet measurement in a comprehensive manner. Such research is essential and timely to assess the health of the Internet more comprehensively, improve network technologies and systems, and develop new methods of networking, especially with the development of new methodologies and tools.

through the creation of a diversified investment portfolio in research and education that will lead to scientific and engineering breakthroughs, while securing a talent pipeline in a field where workforce needs of industry, government and academia continue to outgrow the available talent. The ExpandQISE program helps build and maintain a close connection between new efforts and existing impactful work done at the existing QISE Centers or leading QISE research Institutions, while creating and nurturing necessary critical mass at Institutions not yet fully involved in QISE. In keeping with the NSF goal of increasing the participation of all members of society in the scientific enterprise, institutions at which more than 50% of enrolled students come from groups that are currently under-represented in the sciences, e.g. minority-serving institutions (MSIs), are especially encouraged to apply.

	Synopsis	Cooperative agreements under the ADPI funding opportunity announcement (FOA), are intended to support and promote the development and expansion of dementia-capable home and community-based service (HCBS) systems in States and Communities. There are two application options contained in this single FOA: Grants to States (Option A) and Grants to Communities (Option B). No entity is eligible to apply for both State and Community options and no entity is eligible to hold more than one ADPI grant at any one time. The dementia-capable systems resulting from program activities under either option are expected to provide quality, person-centered services and supports that help individuals living with dementia and their caregiver remain independent and safe in their communities.

Deadline Dates (ALL) 04-Feb-2023

Synopsis

Description: NASA Goddard Space Flight Center’s (GSFC) Wallops Flight Facility (WFF) is seeking to partner with one organization on a nonreimbursable (no exchange of funds) basis over the next five years to afford opportunities for youth to enhance their interest in science, technology, engineering, math, and related careers. NASA WFF has facilities and STEM opportunities that third parties could utilize to formulate informal education STEM outreach programs and camps for youth. To facilitate an orderly use of these opportunities, NASA is seeking to partner with one organization that will develop, manage and offer these informal education outreach opportunities to the public. Only proposals from U.S. entities will be considered. NASA seeks proposals from organizations with a commitment to and experience in high-quality student engagement. This AFP outlines the process for submitting a proposal to become a partner (“Partner”) with NASA for this coordinated effort and the expected partner responsibilities. NASA is interested in receiving responses from organizations with creative proposals for this opportunity to formulate informal education STEM-related outreach programs and camps at NASA WFF for youth. Those entities that can expand participation among youth STEM program community members with disabilities and/or from underrepresented or historically minoritized groups are encouraged to apply. This AFP is anticipated to result in the establishment of a nonreimbursable Space Act Agreement for the selected Partner that will define the full roles and responsibilities of NASA and the proposing organization(s) in a form similar to the model agreement shown in Exhibit A attached hereto (the “Model Agreement”) (for more information on Space Act Agreements, please see <https://www.nasa.gov/partnerships.html>). Background Over the past two decades, NASA WFF has been involved with supporting youth camp participants showcasing STEM-related careers by providing facility tours of WFF missions areas – Sounding Rockets, Scientific Balloons, Airborne Science, Range Control Center and Wallops Island Launch Pad tours – along with subject matter experts to engage with campers. NASA values this opportunity which advances inspiring the next generation of explorers and innovators, exposure to WFF, and recruitment efforts. NASA has found that partnering with other organizations with similar interests and complementary goals in supporting STEM exposure has been a successful way to respond and adapt to the needs of this diverse and growing community. Scope This request will be open for at least 45 days following the date of release of this announcement. All proposals must be received by 11:59 pm Eastern time, on January 31, 2023, to be considered. The successful Proposer will agree to coordinate any involvement for outreach (informal education) programs and summer camps with NASA consistent with the resulting Space Act Agreement. Partner responsibilities include at a minimum: Between the first week of June and the last week of August each year during the term of the Agreement, provide weeklong camp sessions primarily intended for students in middle and junior high school (ages 11 to 16 years) allowing for other age groups as program interest diversifies. Coordinate all activities on NASA WFF property with the Wallops Office of Communications (the Office of Communications will, in turn, coordinate activities with relevant organizations on Wallops and ensure outreach activities do not impact mission activities). Provide scheduling requests 30 days in advance of all WFF tours and lecture sessions, which are subject to approval by the Office of Communications prior to conduct of any activities. Meet annually with NASA WFF Office of Communication in advance of

Other Federal Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		<p>scheduling programs. While not anticipated, NASA support may vary depending on the availability of staff to support and scheduled missions, underscoring the need to have a plan for executing outreach programs from time to time with minimal NASA support. Provide one adult staff for each 10 youth participants at all times while on GSFC WFF premises. Offer technical and scientific expertise in topics such as astronomy, weather, rocketry, robotics, computer, model rocket launches, space mission simulations, robotic activities, problem solving exercises, aircraft tours, and weather balloon launches. Transport participants to and from WFF and provide for oversight of participants while at WFF to ensure their health and safety at all times. Arrange accommodation for any student that requires special accommodations and notify the GSFC WFF representative sufficiently in advance to enable WFF’s assessment of its ability to assist with such special accommodations. Provide adequate staff to support all academy activities with limited support for WFF personnel. Ensure that all rules applicable to any person while at WFF and all instructions provided by the WFF representatives, are observed by the participants and staff while at WFF.</p>

	Synopsis	<p>The United States Agency for International Development is announcing the Diversifying Partnerships in WASH Program (DiP-WASH). Through this Annual Program Statement (APS), USAID announces its desire to engage a diverse range of partners, including new, underutilized and/or locally-established partners, on innovative and evidence-based approaches that address persistent challenges in the safe drinking water, sanitation and hygiene (WASH) and water resources management (WRM) sectors that are not adequately addressed by other USAID investments, and that result in increasing the equitable availability and sustainable management of safe water and sanitation for the underserved and most vulnerable.</p>			
109492	FCO--AMENDMENT--2022 ERDC Broad Agency Announcement (BAA)	U.S. Army Corps of Engineers/Department of Defense	W912HZ-22-BAA-01	28-Feb-2023	Not Specified

attachment to this posting and is also available at <http://erdc.usace.army.mil>. The BAA is open until superseded by another announcement. Proposals may be accepted at any time. ERDC prefers to receive pre-proposals and proposals electronically. Pre-proposals and proposals for EL, GRL, GSL, ITL and UROC regarding this BAA should be submitted via email to ERDC-BAA@usace.army.mil. For inquiries, please contact the ERDC at ERDC-BAA@usace.army.mil. You may also contact either or both of the following: Ms. Andrea Knowles at 703-428-6519 or Andrea.D.Knowles@usace.army.mil or Ms. Gayle Rouse at Gayle.E.Rouse@usace.army.mil. Pre-proposals and proposals for CERL shall be submitted via email to CERL-CT-Quotes@usace.army.mil. For inquiries, please contact Ms. Andrea Thomas via email at CERL-CT-Quotes@usace.army.mil or phone at 217-373-6746. Pre-proposals and full proposals for CHL shall be submitted via email to CHL-BAA@usace.army.mil. For inquiries, please contact Ms. Christine Wilson via email at CHL-BAA@usace.army.mil or phone at 217-552-5258. Pre-proposals and proposals for CRREL shall be submitted via email to CRREL-BAA@usace.army.mil. For inquiries, please contact Ms. Melodie Fisher via email at CRREL-BAA@usace.army.mil or phone at 601-634-4687. Contact the technical personnel listed at the end of each topic area for questions concerning the topic areas themselves. The following information must be included in the body of the e-mail when submitting the proposal electronically: Laboratory Name and Topic number (Spell out the complete name of the laboratory. Do not use the acronym.) Vendor name and Address Proposal Title Total Dollar Amount Please note: Proposals should not be submitted to the technical personnel listed at the end of each topic area. Proposals shall be submitted as stated at Section 2, Paragraph C of the announcement.

	Synopsis	The Endocrine Fellows Foundation is an integral part of what it does to support fellows and junior investigators. Obtaining new grants is often dependent on prior grant recipient history and the ability of fellows to successfully initiate new research projects. This is critical for further long-term career development. A rigorous MD peer-reviewed grant process gives a very thorough high-level evaluation and feedback to all fellows who participate. Grant awardees whose projects pass this rigorous review can utilize these projects as springboard to future success in the field, creating our leaders of tomorrow. The grant award will be up to \$10,000.

	Synopsis	The Greenwall Foundation is requesting proposals for the Spring 2023 cycle of its bioethics grants program, Making a Difference in Real-World Bioethics Dilemmas. The Making a Difference program supports research to help resolve an important emerging or unanswered bioethics problem in clinical, biomedical, or public health decision-making, policy, or practice. The Foundation's vision is to make bioethics integral to decisions in health care, policy, and research. Its mission is to expand bioethics knowledge to improve clinical, biomedical, and public health decision-making, policy, and practice. Projects funded under the Making a Difference program should promote the Foundation's vision and mission through innovative bioethics research that will have a real-world, practical impact.

	Synopsis	The SWOG/Hope Foundation Impact Award is a funding program that encourages novel and innovative SWOG research by supporting early and conceptual stages of these projects. The work proposed should use resources from completed SWOG trials or be directly translatable to future clinical trials in SWOG and the National Clinical Trials Network (NCTN) in the foreseeable future. These studies may involve considerable scientific risk but may potentially lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on cancer research.

	Synopsis	Neurocritical care is one of the newest and fastest-growing specialties in medicine. Critical care neurology entails a multidisciplinary approach to treating life-threatening neurological diseases. The Neurocritical Care Division at Mayo Clinic in Rochester, Minnesota, is responsible for two services: a primary care service in their 20-bed Neuroscience Intensive Care Unit (ICU). The model of care in our ICU is closed: All orders in patients under their care are written by the team, in agreement with neurosurgery when pertinent. Anesthesia support is available for supervision of invasive procedures, but all procedures are expected to be performed by the neurocritical care fellow; and a consulting service, in which we staff neurological consultations in all other adult ICUs at Saint Marys and Methodist hospitals.
