OUR STORY.

Our story began in 2010: a young, enthusiastic team with the goal of securing a place in retail shops and a warehouse fitting business.

Fully committed to our mission, we worked hard and gathered experience. We made every effort to choose the best suppliers and most reliable partners. With them and our clients, we entered the world where we are firmly positioned and recognised. Today, we are exactly where we wanted to be: surrounded by great partners and satisfied customers.

The network we created is growing and adapting to the demands of clients, industries, and the times we live in.

Our team consists of professionals with expertise in every aspect of furnishing retail establishments and warehouse spaces. Together, they cover the entire process, customising it for each partner.

IDEAS COMING TO LIFE

Our vision is to be clients' first choice for comprehensive solutions and support in projecting and fitting retail and warehouse spaces in Serbia and the region. We understand the collaboration with foreign and domestic partners is the key to our success. It allows us to offer the best possible service, from the initial idea to the materialisation of the concept, with the optimal price and logistics and a fast and efficient assembly.

THE SUCCESS OF OUR CLIENTS IS OUR SUCCESS.

#MECHANIC ENTRANCE SYSTEMS

#BARRIERS

In our operations, we observe all parts of the process from the consumer perspective. Guided by this principle, we create tailor-made solutions for our partners. In the entrance area, the most frequent one, this means a smooth, unhindered flow of customers. The principles that guide us are aesthetics, safety and security. We use technologies and products that help us achieve the highest standards.

ITAB entrance solutions are available in several versions and price ranges so they can fit into all sales formats and budgets. Today we see them in markets all over Europe and the world. Our offer consists of automatic and mechanical gates, barrier fences, theft protection sensor systems, and visitor counters, able to create an optimal customer path and improve the flow of clients.

EASYGATE

A unique design of pillars assures back-to-back gate assembly adaptable to your needs.

DIMENSIONS (mm)
Height: 1122 x fi 133,6
Gate arm max 1086,4

100% ECONOMIC
Easy, simple, flexible assembly

DESCRIPTION

- Manual alarm reset
- Opening angle 0°-90°
- Change the opening direction with our service
- Adjustable panic alarm
- Synchronisation via GateCOM interface
- Multiple opening modes
- Asymmetric orientation
- Integrated connections for barrier pipes
- Connection to the fire alarm control panel option
- Cleaning mode
- Back-to-back setting
- Power supply from the ceiling option

ALPHAGATE

Scan master barcode/QR reader provides high security and increases protection of self-service cashier solutions (SCO).

DIMENSIONS (mm)
Height: 1117 x fi 120
Gate arm length 600-1100

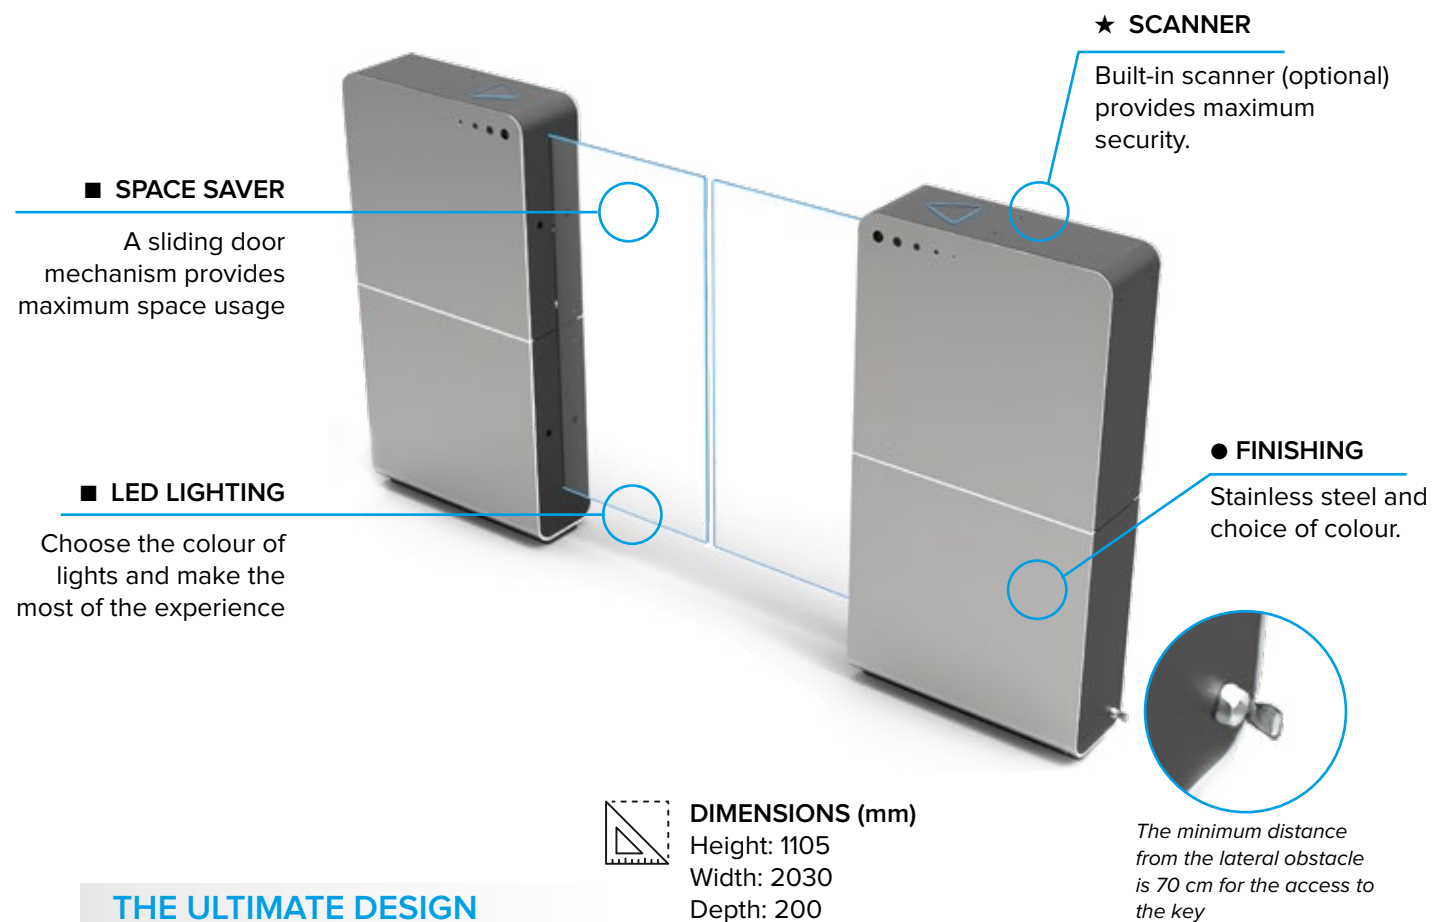

BEST-SELLER
Easy transformation to a modern digital solution

DESCRIPTION

- Automatic alarm reset
- Degree operation 0°-180°
- Changing the direction of the opening with the help of a switch (without service)
- Adjustable panic alarm
- Synchronisation via GateCOM interface
- Multiple opening modes
- Soft stop in the last 10°
- Connection to the fire alarm control panel option
- Cleaning mode
- Back-to-back setup with one barrier tube
- Possibility of power supply from the ceiling
- Child safety sensor
- ★ Integration with SCO (self-service checkouts)

SIGMAGATE

The most advanced solution in the category of entrance systems. A sliding door mechanism is a space saver, making this entrance extremely functional. With a full spectrum of accessories, it can be integrated with modern self-checkout systems.

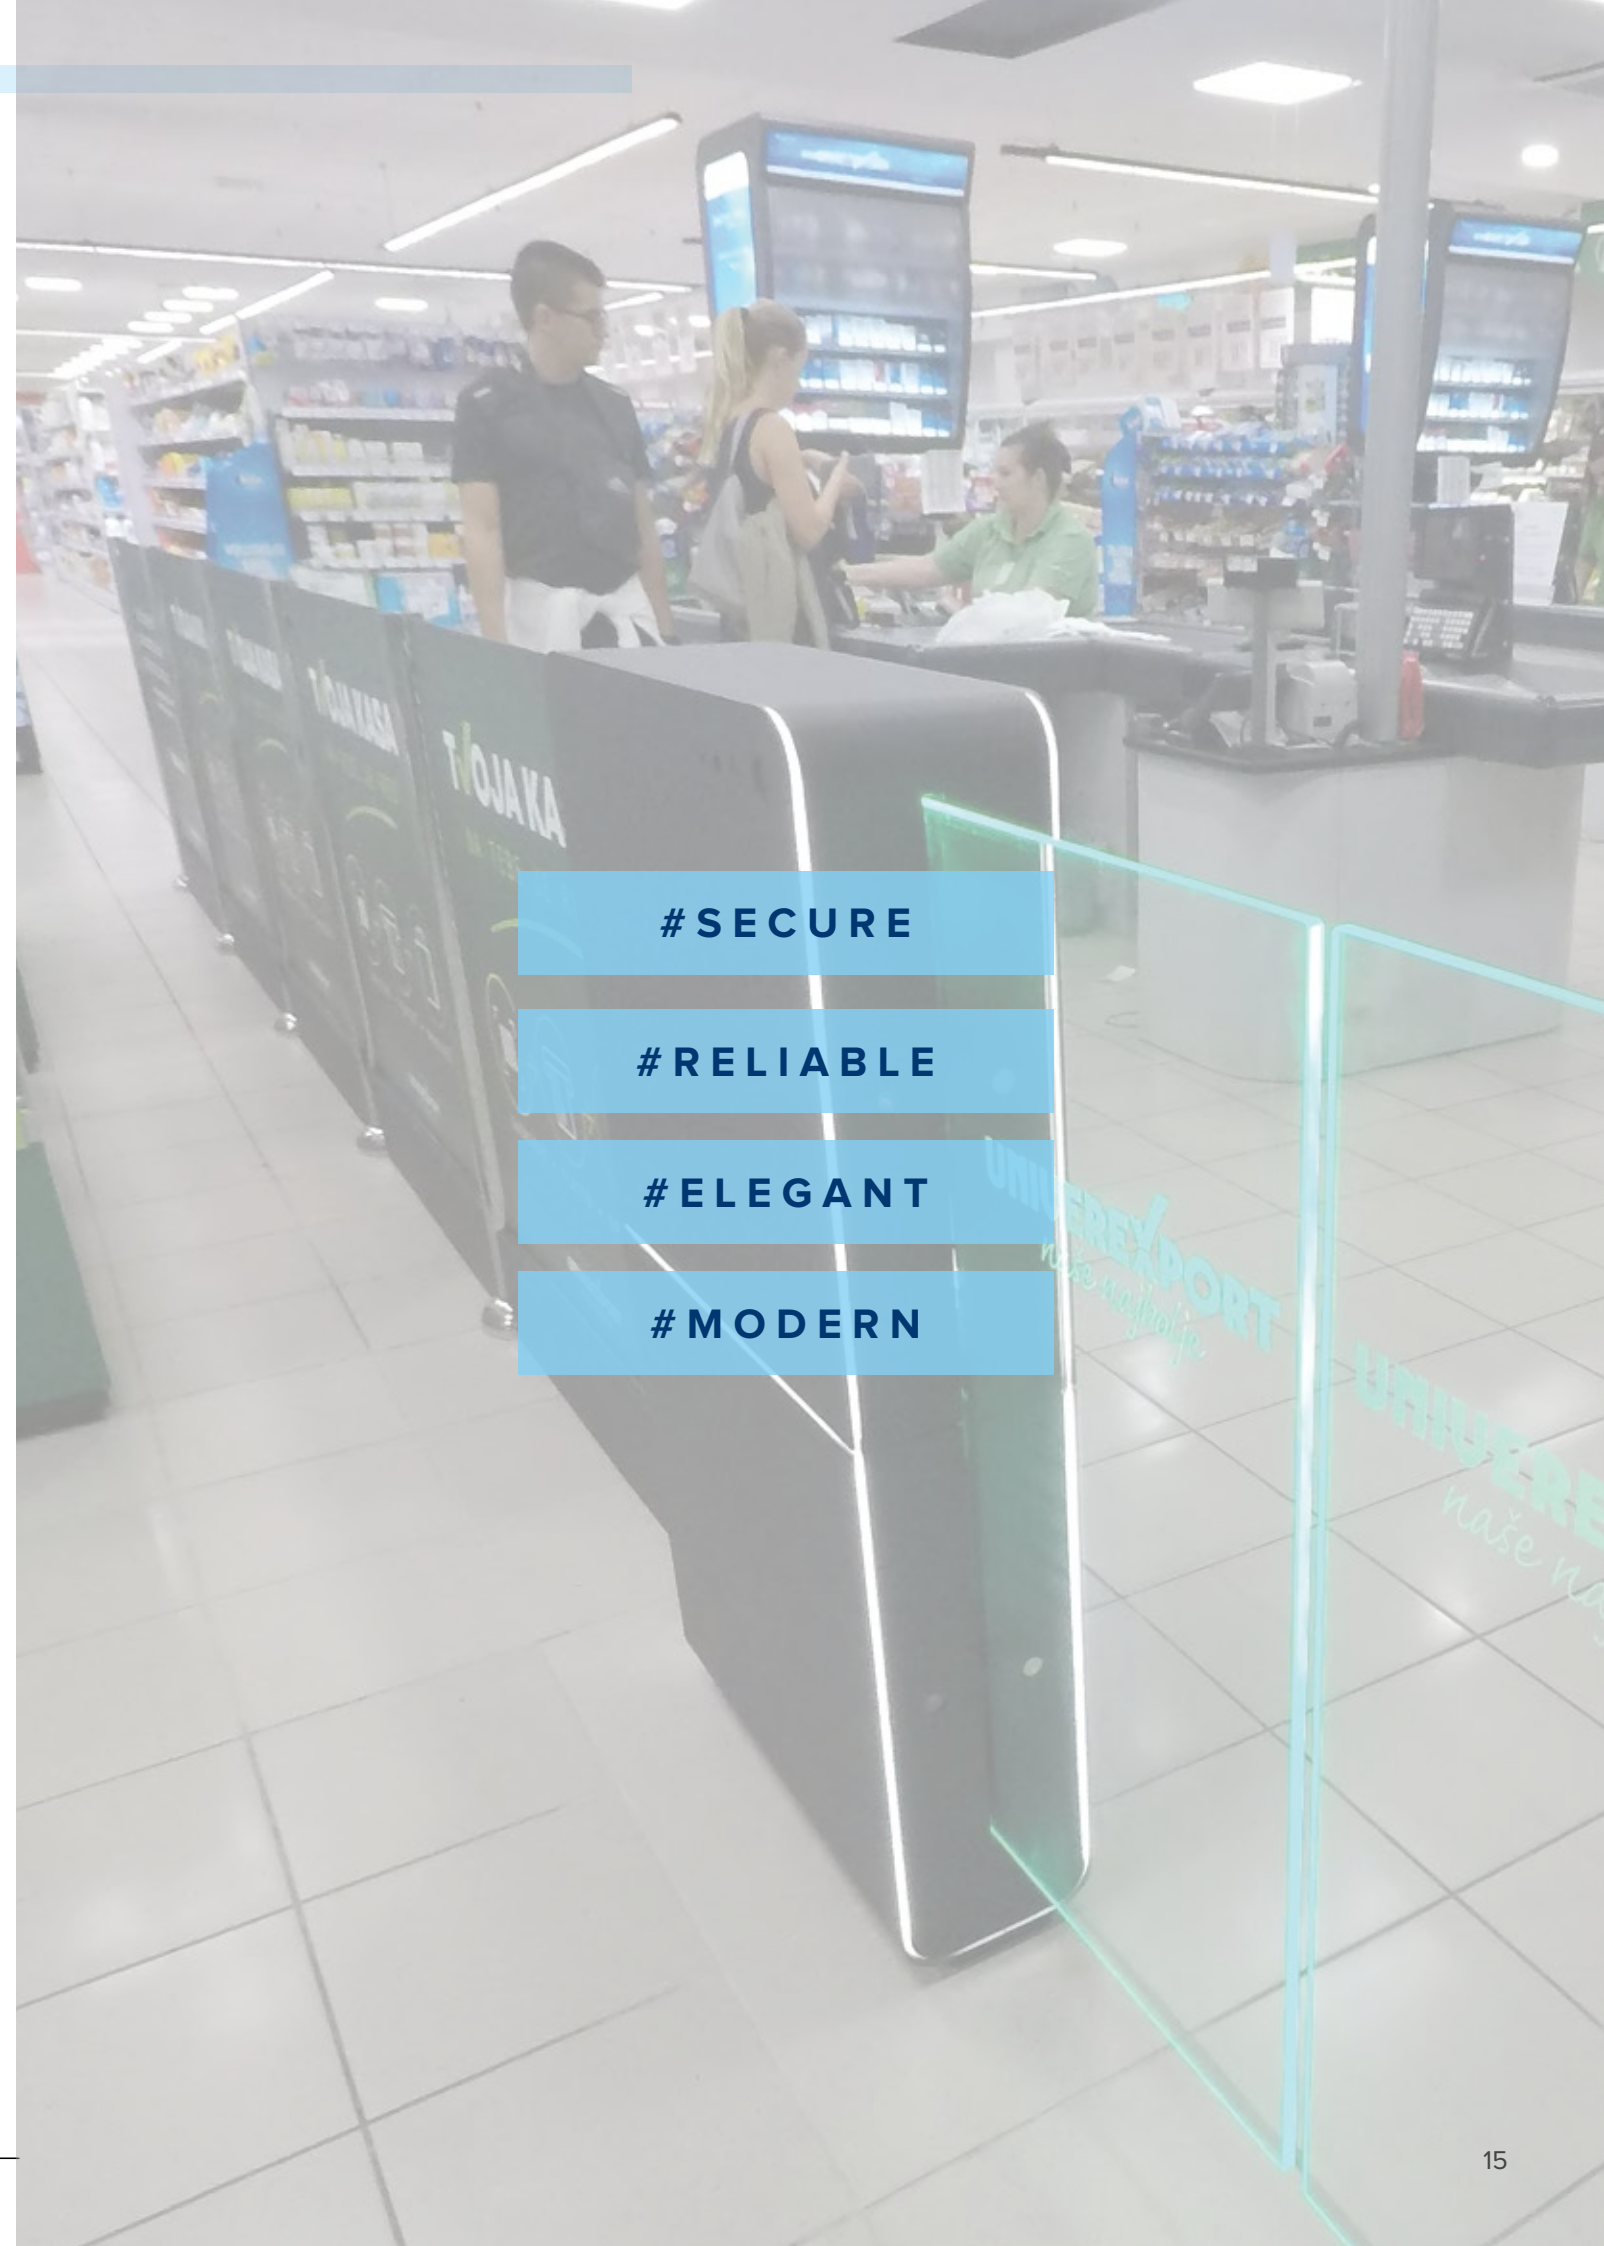

THE ULTIMATE DESIGN

A top-notch design and multiple options

DESCRIPTION

- ★ SCO operation mode
- Radar and PEC motion sensors
- ★ SCAN master – a powerful barcode QR scanner
- Adjustable opening and closing time
- Stand-alone or POS integration
- Possibility of connecting to an alarm system
- ★ LAN connection
- Panic open function
- ★ Possibility of integration with the SESAME system
- Open mode for cleaning or entering goods

THE GATE

A solution designed to offer transparent and simple customer flow without excessive security requirements.

● **DURABLE MECHANISM**

Arm carrying mechanism provides unlimited number of openings 0°-180°

● **QUICK ASSEMBLY, ANYWHERE**

The absence of electronic parts allows assembly in any place.

● **SMALLER UPRIGHT DIAMETER**

Upright diameter of 60 mm fits perfectly into the barrier system, becoming a space saver.

DIMENSIONS (mm)
Height: 1075 x fi 60
Arm length max 1100

FUNCTIONAL

The economic, optimal, reliable organiser of the entry-exit zone.

DESCRIPTION

- Manual reset of the panic option
- Opening angle 0°-180°
- Automatic panic reset
- Options of one-way and two-way system
- Bidirectional gate assembly option
- Possibility of opening the gate in specific security situations
- Easy assembly in any space (without a power supply)

ROTATING GATE

When it comes to mechanical entrance systems, rotating gate is a definitive solution and one of the first choices. Compared to Gate, it provides higher security and transparent customer flow.

● **OPTIMAL PASS**

Only one person is allowed to pass in one moment.

● **ONE WAY GATE**

The rotating gate controls the customers flow only in the desired direction, increasing security and theft prevention.

● **CART SPACE**

Three dimensions 1000/1500/2000 mm

DIMENSIONS (mm)
(cart space excluded)
Height: 1075/1250
Width: 1331
Upright diameter: fi 60

MAXIMUM SECURITY, OPTIMAL PRICE

Increase security with minimum investment

DESCRIPTION

- Bidirectional rotation
- Change the opening direction (our service)
- Easy opening (passage 1200-1300mm) expands the passage for the entry of goods or panic situations
- The safest solution in the category of mechanical entrances.

BASIC

An easy and quick assembly provides efficient and controlled consumer flow and/or more space for additional equipment, such as shopping carts and baskets.

FLEXIBILITY
High modularity

Make your own combination and assemble a structure that will optimise and decorate the entrance. This will increase the user experience and the aesthetic impression for your customers!

ELEGANCE

When it is necessary to create a separated area with high aesthetic standards, temporarily or permanently, Elegance modular system of barrier fences is the right solution.

THE PERFECT LOOK
Simple setting of vertical barriers.

Wood filling for elegance and warmth.

Chrome or powder-coated batten in RAL to your liking is making machine cleaning of the space easier and more comfortable, protecting the store equipment and fixtures from impact damage caused by shopping carts.

BUMPER SYSTEMS

When your store is fitted the way you want, it is necessary to protect your investment. Shock-absorbing bumpers are designed to keep your stores and fixtures looking good and protect your inventory.

● PIPE BUMPER

Easy assembly on the wall or pavement with limitless combinations of lengths and structure. Stainless steel for both internal and external use.

● BUMPER SYSTEMS FITTING

Corner sections, joining spigots, guides and end caps are completely separated and modular. This system solution makes assembly and maintenance easy.

PROTECTING YOUR ASSETS, LOOKING CLEAN AND MODERN
For perfect space organisation.

The most common use of bumper systems is in the organisation of cart and trolley sections. They are efficient in preventing damage of the walls and inventory in the area they are installed in.

BUMPERS

It is often required to protect the assets or part of the interior from unwanted contact or damages. The bumpers are a great choice for this.

● PVC CORNER BUMPERS

Available in three colours and dimensions
Height: 300/450/600 mm

● CORNER PROTECTION

Efficient, optimal solution for assets and inventory protection. Available in chrome, zinc or RAL. Height: 600 mm, steel thickness 5 mm.

ELEGANCE AND SECURITY
Keeps your investment safe.

Cooling systems are expensive and delicate. Do your best to protect them!

Angles can become a painful obstacle for your customers. Make them visible and safe.

SESAME SOLUTION

A system improving the customer experience during exit processes in self-checkout areas. The Sesame sensor verifies movement inside the checkout area and tracks each consumer from the validated payment at the self-checkout counter (SCO).

ADVANCED SELF-CHECKOUT SYSTEM

SCO
x50

Surveils up to 50 SCO in one area (option of more separate areas)

The ceiling sensor surveils up to 200 customers simultaneously.

Recommended ceiling height from 3 to 15 metres. The sensor covers up to 64 m²

Simple integration to the existing POS system

FEATURES

- ★ Consumers no longer need to scan the receipt to validate exit.
- ★ The system verifies and allows exit only to paying customers
- ★ Communicates with AlphaGate and SigmaGate
- ★ Can be integrated into any POS system
- ★ Maximum security
- ★ Increases theft security and removes friction in the SCO area
- ★ Alarm system for the cases of exit without the bill

A SECURE SCO SOLUTION

REDUCING RISK OF LOSSES

IQM – IN QUEUE MERCHANDISE

Increase impulse sales in the checkout area and secure return of investment within a year

QUEUE ORGANISATION

#SALES INCREASE

#STOCK OPTIMISATION

#QUICK RETURN OF INVESTMENT

#FAIR TREATMENT OF CUSTOMERS

FEATURES

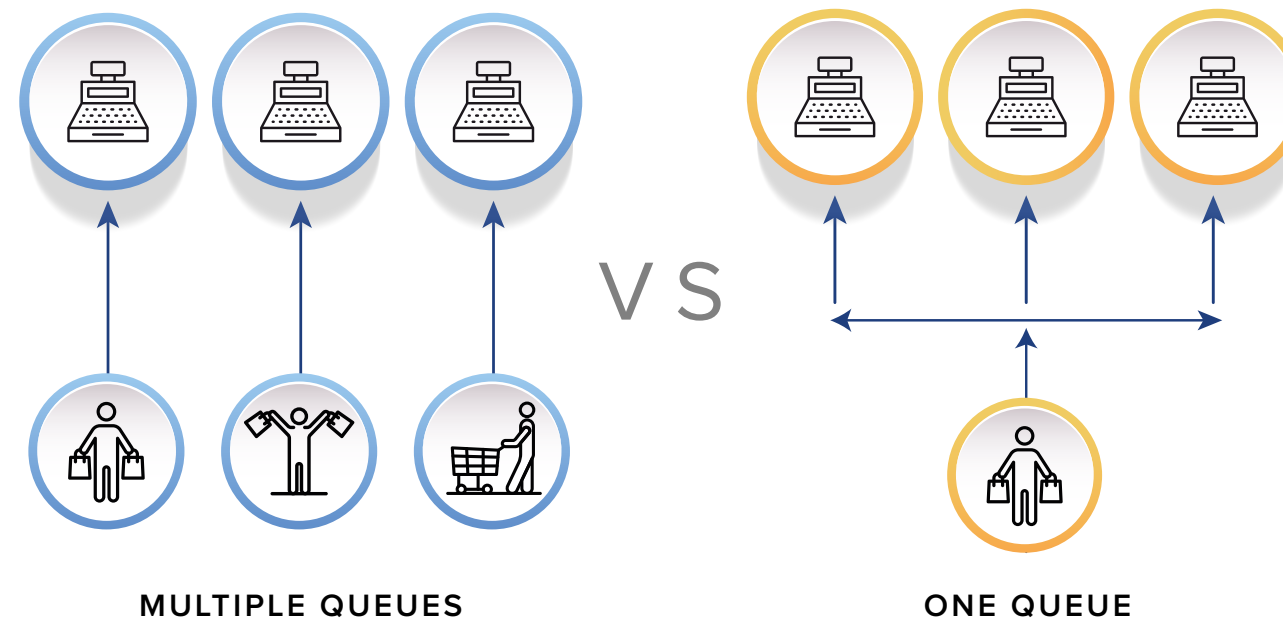

- ★ Completely tailor-made – a series of elements optimising the queue based on your needs
- ★ Queuing time becomes shopping time – the customer queuing is still a customer. IQM system increases the turnover through impulse sales

- ★ Increases customer satisfaction – optimising the buyers' moving makes the way of arriving at the checkout fairer and quicker.

QUEUE MANAGEMENT SOLUTIONS CAN REDUCE WAITING TIMES AND CUSTOMERS CHURN MORE THAN 95%

We analysed the example of a retailer with a chain of 20 stores. Customers irritated by long queues and monotonous waiting leave the store without getting their purchase done, leaving the basket with the merchandise. If per one week, 250 customers change their idea about shopping, the retailer is left without 78.000 euro per year.

REASON ENOUGH TO RETHINK YOUR APPROACH TO THE CHECKOUT AREA!

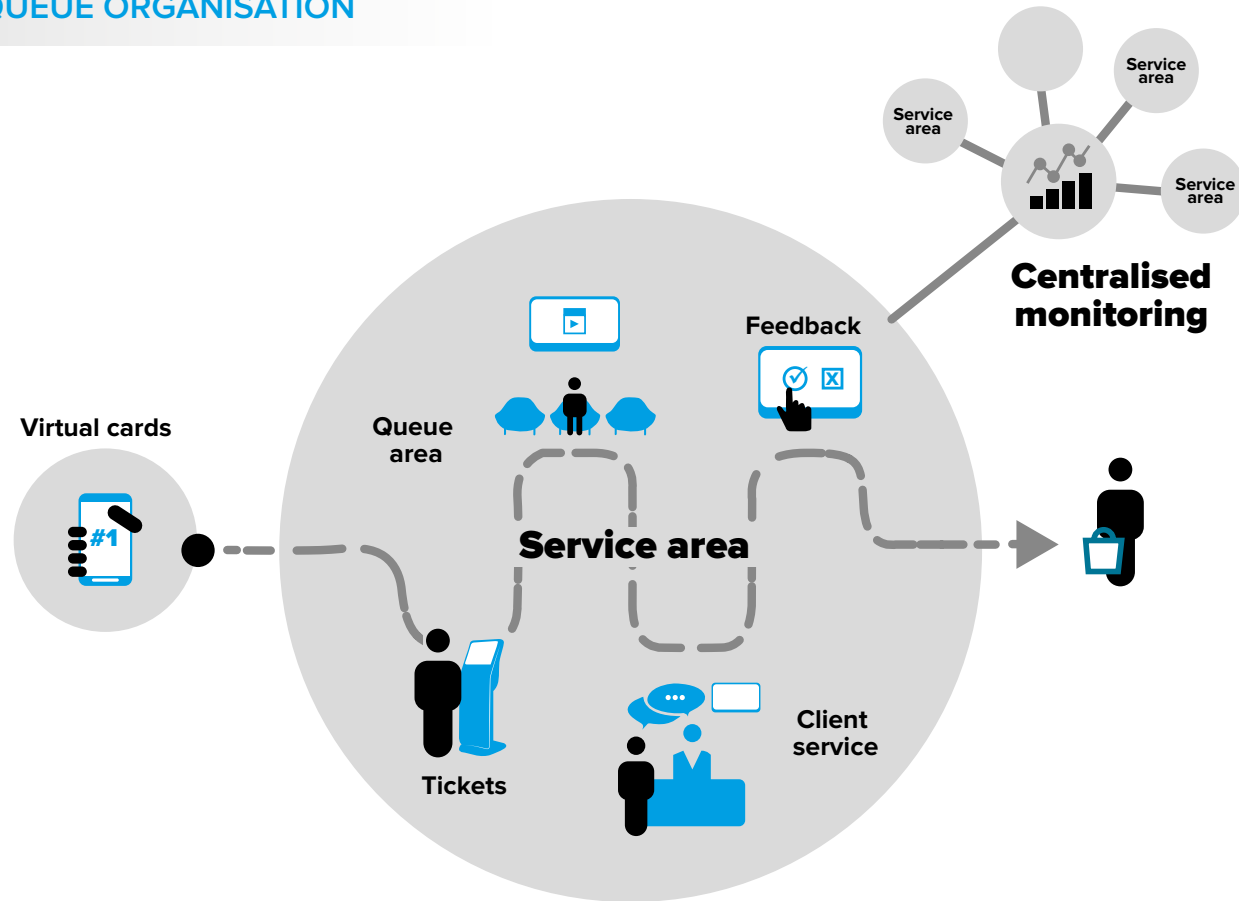

QUEUE MANAGEMENT SOLUTIONS

Our virtual queue organisation systems are robust and easy to implement and use. We provide hardware for ticket printing and the possibility of using a mobile phone without needing to install the app.

QUEUE ORGANISATION

ITAB QUEUE MANAGEMENT

FEATURES

- Reduces queuing time
- ★ Provides a transparent queuing time for a customer at the digital displays in the store and on the mobile phone through notifications
- Possibility of scheduling a time slot for the service on multiple product categories
- Setting the screen to customer's liking
- Additional marketing video communication channel
- Stand-alone or integrated with POS or digital signage systems.

- REDUCE QUEUING TIME
- FAIR AND TRANSPARENT QUEUE
- ADVANCED ANALYTICS AND MONITORING
- A SIMPLE USERS INTERFACE
- ADDITIONAL MARKETING COMMUNICATION CHANNEL

SHELVING SYSTEMS ACCESSORIES

SPECIALISED SHELVING SYSTEMS

Shelving systems are a crucial part of every project. They represent the major part of interior space, shaping it and creating a pleasant environment for shopping. Around them, most part of interactions with customers is going on.

From investors' point of view, shelving systems have to meet the criteria of endurance, modularity, adaptability and quick assembly, with high aesthetic standards for the display of the assortment in the most convenient and attractive way for the customer.

INPUT aims to achieve all of these criteria and the latest trends, offering shelving systems solutions applicable in all kinds of retail stores.

P25 SHELVING SYSTEM

Fine adjustments of the vertical shelves and EVO middle back are some of the advantages of this system. One of the most elegant systems on the market, with exceptional performance and functionality.

ULTIMATE DESIGN

● EVO UP MIDDLE BACKPANEL

Possible setting of the system with just one backpanel

■ RACK LIGHTING

Display your products and give them proper bright lighting to create a good shopping atmosphere. The system we offer is easy to install and flexible to set up.

● SYSTEM 10

A thin shelf of only 10 mm has been developed for this system. This is how we increase the possibility of vertical compression of the displayed merchandise.

● 8-10% MORE SPACE

With EvoUp backpanel and System 10 shelves, it is possible to display 8-10% more items

DIMENSIONS
Make your own setup that meets your requirements

S RACK SYSTEM

By combining the modules of the classic shelf system in the base and S elements, we created an S rack system of exceptional aesthetics and functionality.

■ S UPRIGHT

An additional upright at the front of the system supports heavy-weight shelves and brackets.

■ S SHELF

By combining an S shelf and a bracket additional 20 cm is gained. That way, it is possible to highlight specific items in larger spaces.

■ S BRACKET

A bracket with a hanging system between the classic and S upright for a bigger load capacity.

■ ADDITIONAL LOAD CAPACITY

The S bracket brings the load capacity to 250 kg per shelf.

DIMENSIONS
Create the setup that meets your requirements.

A CLASSIC SHELVING SYSTEM + S ELEMENTS

A system for maximum load capacity

IN TIP AESTHETICS AND LOAD CAPACITY IN THREE STEPS

1. Adding the front upright with a cross-section 3x3 highlights the setting of the items on the shelves
2. S bracket increases load capacity
3. Adding an extra shelf increases the capacity

S ELEMENTS

ADDITIONAL STRENGTH AND AESTHETICS

S UPRIGHT

Adding the S upright with a cross-section 3x3 increases the load capacity and makes the setting of the items on the shelf more orderly.

DIMENSIONS (mm)
Height: 2000/2600/3000

S SHELF EXTRA

Increases the depths of the classic shelf system to 20 cm

DIMENSIONS (mm)
Width: 1000/1250/1330
Depth: 200

S BRACKET

A click system bracket is lying on both uprights, increasing the load capacity to 30 %.

DIMENSIONS (mm)
Depth: 470/570/670/770

S KONZOLA EXTRA

Place your merchandise in the foreground.

DIMENSIONS (mm)
Depth: 200

INTEGRATED RACK

Combining a classic shelving system and light rack results in an integrated shelving system of extraordinary features.

SHELVING SYSTEMS INTEGRATION SOLUTION WITH EXTRAORDINARY FEATURES

● FRAME

Responds to all stores' product display requirements in retail stores and warehouses.

■ INTEGRATION

Easy integration with classic shelving structures

■ CONVENIENT AND INCREASED STORAGE FOR DISPLAY AND STOCKING

Element for easy integration of classic shelving systems into a lite rack elements

■ FUNCTIONALITY

A variety of accessories for the display of any merchandise. Mainly used for large formats of DIY retail.

DIMENSIONS
Create the setup that meets your requirements.

LITE RACK ELEMENTS

ULTIMATE CAPACITY AND FUNCTIONALITY

FRAME

A frame structure for extremely heavy loads (up to 15t) and height.

DIMENSIONS (cm)
Depth: 60/70/80/95/115/135/155
Height: 220-550

TRAVERSE

The criteria for traverse choice are the module's width and the filling type.

DIMENSIONS
Width 125/133/200/250/266/
273/300

ADAPTER

Element for easy integration of classic shelving systems into a lite rack elements

DIMENSIONS (cm)
U profile: 6 x 2,25
Height: 220-500

FILLING

The filling is the right solution if you are not placing your stock on pallets.

- 1 WOOD
- 2 RACK FOR PALLETS
- 3 RACK FOR FILLING
- 4 PERFORATED
- 5 FULL PANEL SHELF

DIMENSIONS
The decision about dimensions and filling depends on the depth of the frame and traverse. Make sure to hear our team's advice!

IN TIP

The width of one light rack module containing a classic shelving system is sufficient for two classic shelving modules. The usual width of the light module is 200/250/266 cm.

IN TIP

Pay attention to storing the merchandise (pallets of shelves) and distributing the weight of the stock in storage space.

3x3 SHELVING SOLUTION

The 3x3 system has met the requirements of flexibility, versatility and applicability in all industries. A simple transformation and setting system can bring almost any design idea to life.

3x3 PRIME

IDEAS COMING TO LIFE

INPUT – ONE PLACE FOR EVERY SOLUTION

For the result to be superb, every project phase must be flawless. Together, we will reach the result we aim for, depending on your needs and desires. We create functional, completely personalised solutions with top-notch aesthetics.

When we start working together, we will listen to your needs, wishes and ideas for fitting your retail. We will examine the possibilities and begin planning, and our designers will analyse your facility and create blueprints and drafts. The initial proposal we deliver will consider your wishes, functionality, visual effect and the latest trends.

Each space has its features, characteristics and atmosphere. Together, we will get the result we aim for: we will listen to your comments and requests for modifications and create the final solution. With respect for your brand, visual identity and specific requirements, we will create a tailor-made solution just for you. We will personalise and adapt to your needs all the products you will use to fit your space.

SHELVING SYSTEMS COMPLEMENTS

A variety of display elements, sorting and signing the products. Besides traditional elements like PVC price holders or hooks, modern elements like lighting for shelves or digital price holders are available.

BETTER DISPLAY – BIGGER SALES

● **HOOKS FOR BLISTER PRODUCTS**

- Slat board
- Perforated backpanel
- OK holder
- Wire backpanel

● **PUSHERS**

● **COVER**

● **PRICE HOLDERS**

- T hook
- Batten 52 mm
- Batten 40 mm
- Self-adhesive batten

● **DIVIDERS**

● **PLINTH**

● **FENCES**

● **SHELVING SYSTEM LIGHTING**

A unique supply system provides the setting of the shelf with lighting anywhere.

● **WITHOUT PUSHERS**

Just 20% of the displayed items will have the chance to be purchased

★ **WITH PUSHERS**

63% of the displayed items will have better chance to be purchased

BAKERY "PANIS"

BAGUETTE

- OPTIMAL SPACE FOR BAGUETTE

Modul with ideal shelf spacing for the display of french baguettes

- TAILOR-MADE STRUCTURE

Each module consists of minor modular elements, which allow the personalised design of shelves structure.

FRESH

- OPEN SHELF FOR THE SMELL OF THE FRESH

An open display space allows an accessible overview and choice, as well as the pleasure of the smell of fresh bread.

PASTRY

- DELAYED DOOR CLOSING

The mechanism allows the gradual closing of the door open by the customer after retrieving the bread.

- NATURAL MATERIALS

The materials used in the construction of modules are fully natural and safe for food storage. The shelves are made in the beech tree, while the door and the shelves are in tempered glass.

Imagine a loaf of bread with a crunchy texture, perfectly visible under carefully chosen lighting in a closed, transparent space, easily accessible for the display and the customer's reach. Our solution is all about that while respecting ecological and hygiene standards. This functional configuration can be executed in modular wooden elements for bread and pastry display.

LAYOUT

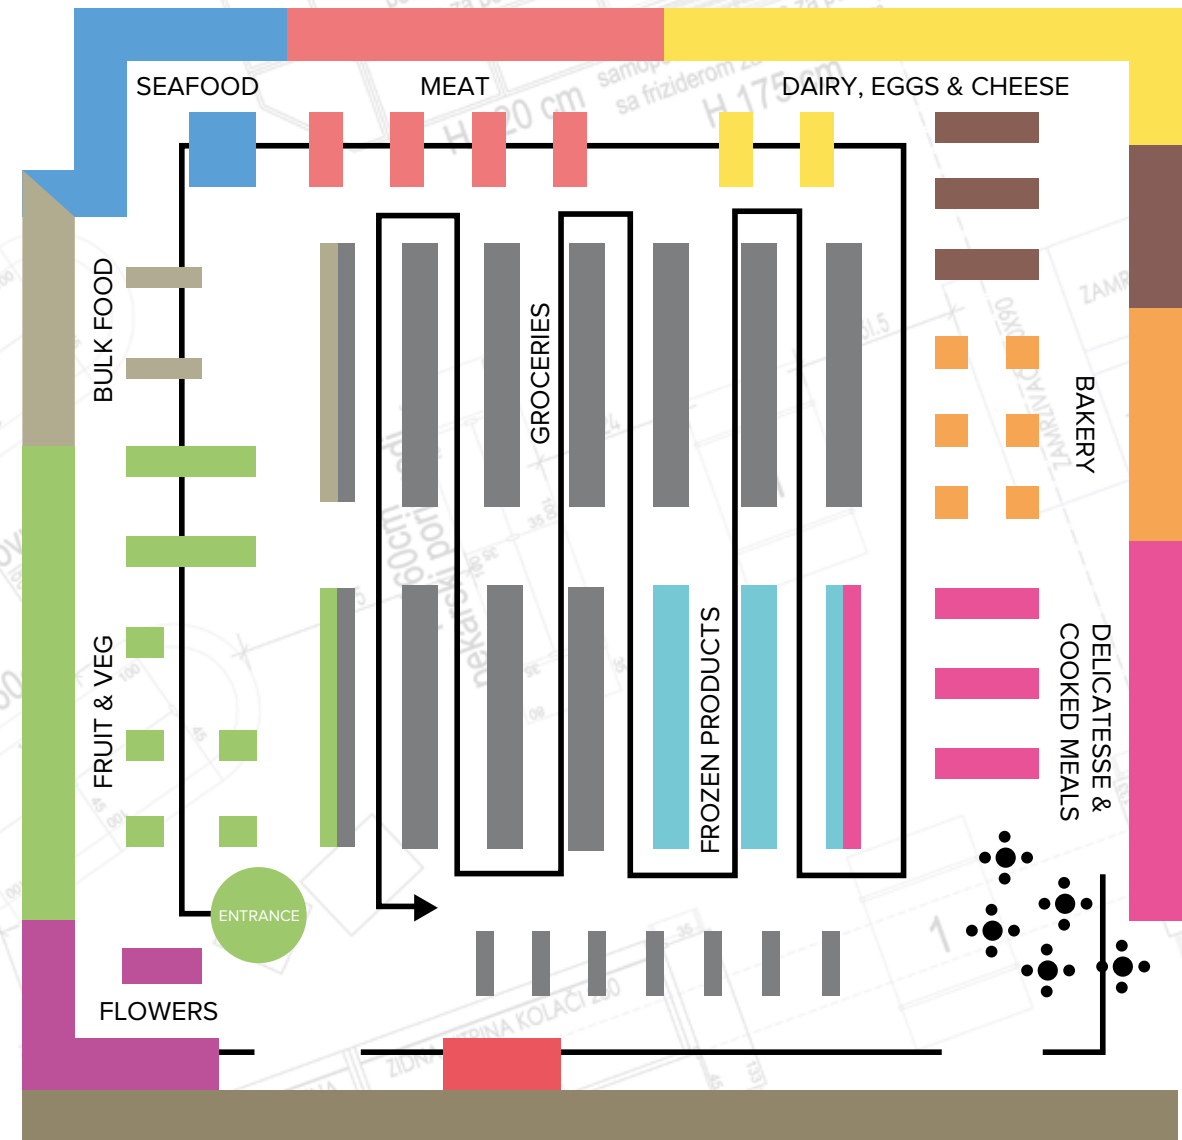

CREATE A UNIQUE EXPERIENCE

The retail store layout is a strategic space organisation intending to boost the shopping experience. Interaction of the customers with displayed merchandise has a great deal of influence on their shopping habits.

The store layout has two components:

- **Store design:** Application of strategic planning methods and space organisation, including disposition and description of furniture, windows, lighting and signage.
- **Customer flow model:** behaviour pattern and how customers move through the store. Understanding the customer flow and behavioural patterns of customers interacting with the merchandise is critical for the management in retail. These are the two key components to start from when creating a layout and to be considered when organising a retail space.

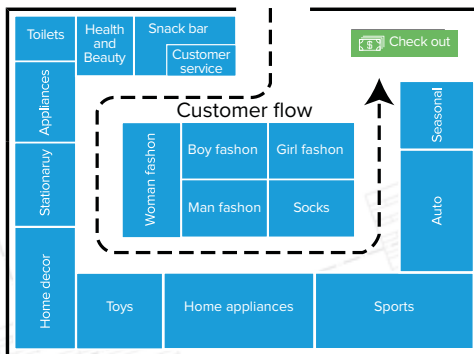

Control the customer flow with „slowing down“ systems

Your store layout has to be pleasant for customers. Occasionally, customers must be „slowed down“ on their way through the store. In most cases, it is done by attractive displaying on the customer flow pattern. 3x3 desks are the right choice for special promotions, sales or attractive decorative displays.

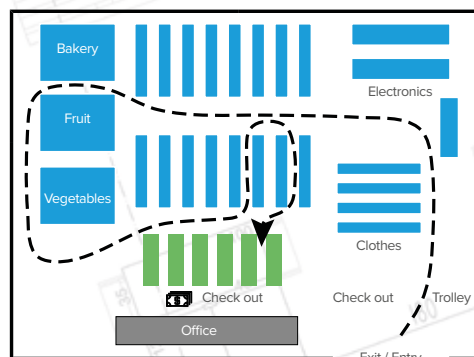

FORCED PATH FLOOR PLAN

The principle of the predetermined path has many advantages. One of the world's most famous retailers, IKEA, applies this principle perfectly.

LOOP FLOOR PLAN

Recommended for bigger spaces (over 500 m2). Flooring design can create the path, containing appealing promo offers or similar messages.

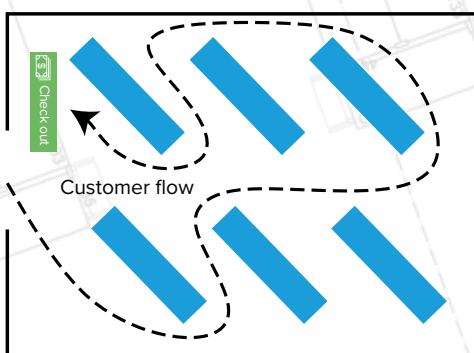

GRID FLOOR PLAN

The most common approach. Customers move fast through the space, choosing the shortest path to the items they search for.

STRAIGHT LAYOUT

A good solution for the spaces with entrance and exit at opposite ends.

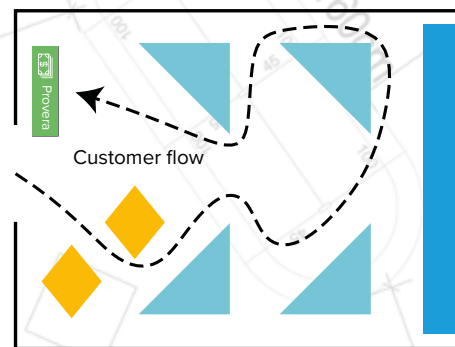

DIAGONAL FLOOR PLAN

Better shelving systems and merchandise visibility is an excellent value of this plan.

ANGULAR FLOOR PLAN

A typical organisation of designer or speciality shops (designers, artisans, curated or limited collections)

GEOMETRICAL LAYOUT

Often used for trendy displays, especially important for millennials and gen Z.

FREE FLOW PLAN

A customer has the complete freedom to choose how he will browse the offer. Investors are fitting this kind of space with great design and merchandising.

BOUTIQUE LAYOUT

A shop-in-shop concept. The categories are separated and limited by more extensive displays at the borders.

MIX LAYOUT

Combination of more styles, typical of spaces with multiple offers

system50 **system25**

evoUP middle backpanel

ADDITIONAL DISPLAY SPACE

system25

Increase your display space using a middle backpanel and up-right with a perforation pitch of 25 mm.

FINER TUNING

DIGITAL SHELF SYSTEM digital transformation

+2% turnover

Cefla is the leader in the innovation and optimisation of shelving systems. Upgrading the production technology resulted in a shelf model with a thickness of just 10 mm, with the same weight capacity. As a result, additional vertical compression of the displayed items is possible. The items on the highest shelves are more accessible to the customers, and extra shelves for the stock increase in retail space are possible.

10 mm

24.5 mm

WIRE PLUS modularity

The benefits of SYSTEM25 and SYSTEM10 solutions include additional space for promotions or smaller warehouse /retail space.

SHELF PARASITE

A fantastic way to display the essential items.

PROMOTIONAL ELEMENTS

Best way to display the most attractive items in your catalogue on pallet positions.

WHY DO WE NEED TO OBSERVE AND LISTEN TO OUR CLIENT'S CLIENT?

Promotions and sales are solid tools for fostering customer loyalty. From a retailer's perspective, there's always the question of what is the right measure. If the activities in this segment are intense, the customers will perceive us as a discount store and buy only the most affordable products. Otherwise, the market can start avoiding us because of our prices. That's why the researches are a great way to engage in suitable promotional activities.

And when we set our global strategy, it is essential to display the products in our stores in the best possible way.

INPUT offers the best solutions for pallet positions, promotional elements and impulse positions that will support your strategy and operational goals.

We are passionate about studying new trends, habits shifts and market niches. We do that by collaborating with our clients and observing the needs of their clients. It is a comprehensive approach enabling us to become a strategic partner for your business goals.

CHECKOUTS

I like to pay in cash!

I want to be able to choose! A self-checkout or a traditional checkout?

I do my shopping only in stores with self-checkout systems!

EXPRESS CHECKOUTS

BELTED CHECKOUT COUNTERS

NON-BELTED CHECKOUT COUNTERS

TAILOR MADE CHECKOUT COUNTERS

SELF-CHECKOUT COUNTERS

Checkout is the final stage in the shopping process, and in it, we strive for efficiency, speed and preciseness – both for a customer and a retailer. In the past, these criteria depended on the efficiency and speed of the employees at the checkout counters. Today, with the progress of technologies, advanced solutions are at our disposal, providing a more simple process, eliminating possible mistakes and increasing speed.

Checkout counters can upgrade and optimise the described process. The solutions vary from economic ones to sophisticated systems capable of checking out without the presence of a man. INPUT offers a broad spectrum of solutions for checkout areas, including checkout counters as their most important element, but also numerous accessories increasing impulse sales.

FUTURA ELEGANCE by CEFLA

Besides functionality and reliability, the Futura Elegance checkout counter has exceptional design and aesthetics. The atmosphere in the area of the checkout counter will be completely different, creating a unique shopping experience.

EXCEPTIONAL DESIGN

EQUIPMENT:

● STANDARD:

Aluminum bumper, photocell, curved base, plinth, cable guide

■ ADDITIONAL:

Plexi, POS terminal bracket, monitor bracket, plexi for change, foot pedal, trough divider, printer bracket, scanner protection, bumper LED lighting, base LED lighting, LED indicator open-closed, power supply pole,

number, additional base shelf, cash drawer, wire basket for bags, LED plexiglass, sockets, gate closed, central part with or without opening, slat next customer, slat guide, bag hooks, handheld scanner mount...

IN TIP

Why does the organisation of the working space matter?

By choosing the right accessories, you will organise the cashiers' space and enhance the merchandise manipulation and checking out of items. Make sure to let our team know which equipment you will install at the counter, and our solutions will enhance the speed and efficiency of your work.

C-MAX by ITAB

Belt module, central module and basin are separate elements, all optimized for transport. That way we reduce the expenses of logistics and delivery of a larger number of counters.

ULTIMATE MODULARITY

ALCO by ITAB

Great design comes with a great price. A vast standard equipment package is an additional reason for ALCO to be the first choice of clients.

A MODERN LINE:

EQUIPMENT

● STANDARD :

Scanner slot, rear base door, photocell, bag hook, metal-rubber bumper, slat guide next buyer

■ ADDITIONAL:

Plexi, POS and monitor support, divider in the trough, display holder, plexi printer protection, high cigarette box, cigarette drawers, additional shelf in central module, central base door, bags shelves, gate closed, slat next customer, cash drawers

EQUIPMENT

● STANDARD :

Plexi protection, POS terminal or monitor holder, scanner slot, shelves for bags, two-colour option, slat guide, photocell, advertisement in the base

■ ADDITIONAL:

Cover of the central module, monitor or POS terminal holder, divider in the trough, slat next customer, gate closed, cash drawer

FUTURA PLUS by CEFLA

Futura Plus checkout models meet the French X-35 and Austrian ON for ergonomics standards. That way employees can use less effort, and their efficiency is increased.

BIGGER PURCHASE? NOT A PROBLEM!

FUTURA PROXI by CEFLA

A modern line with a regular shape will fit perfectly into any interior. Diverse accessories will fully upgrade the checkout process.

THE MOST POPULAR CHOICE

EQUIPMENT

● STANDARD :

Photo cell, Alu bumper, base module shelf, cable guide, two colours option, metal base panel, PVC base protection, switch side option

■ ADDITIONAL:

Plexi protection, POS terminal holder, monitor holder, plexi attachment for coins, pedal, divider in the trough, printer holder, scanner protection, LED lighting in the bumper, LED advertising in the base module, LED open-closed indicator, power supply pole, LED number, additional base modul shelf, cash drawer, wire basket for bags, LED kit for plexi protection, sockets, gate closed, central part with or without opening, slat next customer, slat guide, hooks for bags, handheld scanner holder

EQUIPMENT

● STANDARD :

Photo cell, Alu bumper, cable guide, two colours available, central module with or without opening

■ ADDITIONAL:

Plexi protection, POS terminal holder, display holder, plexi attachment for coins, pedal, divider in the trough, printer holder, scanner protection, LED bumper lighting, LED advertisement in the base module, LED indicator open-closed, power supply pole, number, additional base module shelf, cash drawer, wire basket for bags, LED kit for plexi protection, sockets, gate closed, central module with or without opening, slat next customer, guide slats, bag hooks, handheld scanner holder

CHECK MATE 500 by ITAB

Traditional checkout counter with maximum ergonomics for both employees and customers. The belts are installed in all three checkout zones, which increases the check-out speed by 30%.

ERGONOMICS FOR MAXIMUM RESULTS

6 SHOPPERS SIMULTANEOUSLY...

In a tandem setup, the checkout process can be executed for 6 customers at the same time. Scan the QR code and get more info.

800.000 kg...

...is the weight of the merchandise and equipment the checkout zone employee will not have to lift, in a one-year period, thanks to the belted central module.

 **DIMENSIONS (cm)**
Total length: 290-630

GLOBUS by ITAB

Because of the extreme comfort of the working space and various accessories, Globus is the first choice in bigger retail formats.

READY FOR GREAT ENDEAVOURS

A: 353.7 cm
B: 127.1 cm
C: 64.5 cm
D: 272.2 cm

 **DIMENSIONS (cm)**
Total length: 545-595

DID YOU KNOW...

In the course of one working day, a checkout employee has to move 4-5 tons of merchandise. Also, he/she makes 40km a week by walking at the workplace. This is no longer a problem with ITAB belted scale in the working area!

HOW TO CHOOSE THE RIGHT CHECKOUT COUNTER DIMENSIONS?

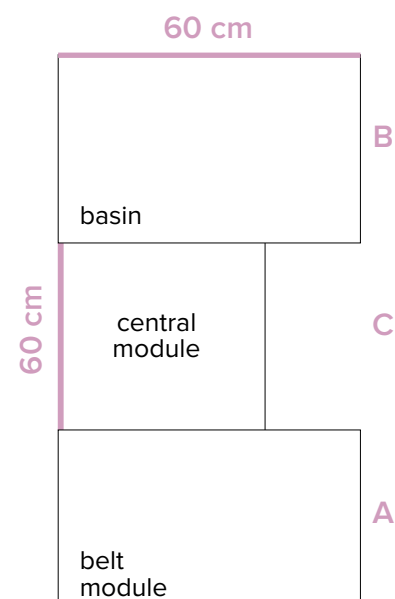

- The dimensions of the basin correlates with average receipt amount and number of customers you serve
- A minimal belt length correlates with the dimensions of the basin and the number of customers you serve
- By increasing the length of the belt the perception of waiting is changed and impulse shopping is being stimulated
- Adapt the length and structure the basin to enhance the speed of packing

B-MAX by ITAB

Non-belted checkout counters are a great choice for clients having bulky items in their assortment or with not too many items to check out.

A GREAT SOLUTION FOR SMALL SPACES

- A: 30 cm
- B: 60 cm
- C: 30 cm

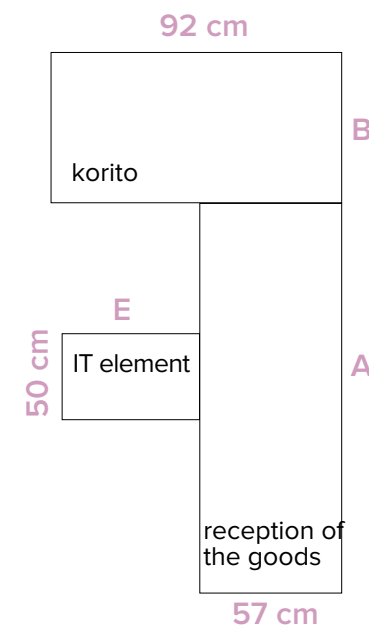

DIMENSIONS (cm)
Length: 120
Width: 60

ECONOMIC – A GREAT START

When the requirements are not too big and the basic functionalities are expected, Ekonomik is a great solution. The dimensions can be adjusted within the specified range, in increments of 10 cm.

AFFORDABLE CHOICE

- A: 40/50/60/70/80/90/100/110/120/130/140
- B: 60 cm
- E: 55 cm

DIMENSIONS (cm)
Total length: 100-200

Which option of the checkout zone is the best for you?

If you need flexibility and rational space with the same efficiency, the compact models of express checkout counters are a great solution, which will secure faster checkout for minor purchases.

If your retail is a place for bigger purchases, a traditional setup is a better choice. It is possible to make a good mix of these options – we will be happy to share our knowledge with you.

EQUIPMENT

● **STANDARD :**
Rubber bumper

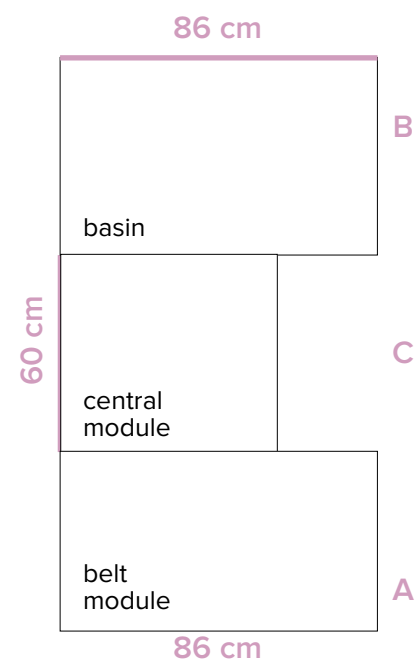

■ **ADDITIONAL:**

“WHY THE EXPRESS CHECKOUT COUNTER IS THE RIGHT CHOICE?”

1. The stainless steel basin is resistant to scratches and hits.
2. The counter can be executed with or without the belt.
3. The aesthetics is enhanced and communication with clients is easier thanks to the alternation of the colour of the light
4. Fewer cables on view: rationalised wiring paths.

“WHY THE EXPRESS CHECKOUT COUNTER IS THE RIGHT CHOICE?”

5. The part behind the cash counter can easily be transformed into a space for impulse sales.
6. The shopping basket holders will add to the commodity in the process of checking out.
7. A perfect fit with queue organisation systems (IQM)

POS DESIGN TAILOR MADE

If you have something special on your mind, and the checkout unit has to be exactly the way you imagined it, we will guide you through the process and make the ideas come true.

AS YOU REQUIRE

DIMENSIONS
Tailor-made for the client

COUNTERTOP DISPLAY RACK BOOST THE SALES IN THE CHECKOUT

The purchase is going on until the bill comes out of the printer. Countertop racks fit to the length of the belt and are used for “last minute” shopping.

SPEED. MODULARITY. ADAPTABILITY.

DIMENSIONS (mm)
Dužina: 700/1040/1340

Best practices and industry know how defined which products should be on the countertop display rack. Take a look at the product mix in the consumer basket on that position:

The stages if **INPUT** process:

1. We start by talking with you and analysing your requests and wishes.
2. We engage the experience and know-how and create projects to help you understand all the functionalities.
3. Your idea is coming true! We will use the best quality materials so you can count on the durability of the product.
4. We got it: we will deliver the product where needed and respect the deadlines.

Customer behaviour in the checkout zone

The purchase is not finished until the bill comes out.
In the checkout zone, the sales per square meter are 7 times bigger than in the rest of the shop.
Wrigley checkout zone research describes the behaviour of the customers in this zone.

MOVEFLOW CLASSIC

A smart organisation, minimalism and economic usage of the space offer the optimal functionality. The payment validation scale enables error prevention.

SLIM. SMART. PRACTICAL.

DIMENSIONS (mm)
 Mini: 795 x 625
 X1: 1347 x 625
 X2: 1775 x 625

MOVEFLOW MODULAR

A hybrid model enables flexibility between manual and self checkout. Fast to reconfigure in response to sudden shifts in customer flow, MODULAR HYBRID is the right choice if the frequency of customers varies in the course of the day.

CASH OR CARD? IT'S THE SAME!

DIMENSIONS (mm)
 Mini: 850 x 785
 X1: 1405 x 785
 X2: 1745 x 785

FEATURES

PAYMENT

Integrated card payment.

ERP INTEGRATION

Easy integration with the existing ERP through a simple interface.

COMPACT

Complete functionality on the surface of only 0.5m2..

SECURITY

Protected against mistakes and fraud attempts with weighing scale measuring 0-15 kg for purchase validation.

FEATURES

PAYMENT

In addition to card payments, a cash payment integrated module is available.

OPTIMAL STORAGE

Several shelving configurations available

ERP INTEGRATION

Easy integration with the existing ERP through a simple interface. (ITAB SCO-API or SCRIP)

SECURITY

A self-learning scale against mistakes and fraud attempts with weight-scale and purchase validation.

SCANMATE CLASSIC

An advanced 360° barcode scanner system can identify items with barcodes facing any direction. The integrated smart scale used for verifying the weight of the identified item and to sell weight-required items.

DOUBLE EFFICIENCY!

DIMENSIONS (mm)
 Length: 5450-6850
 Height: 1430
 Width: 1100

TWINFLOW MODULAR

The majority of self-checkouts today are designed for minor purchases with 6 items per basket. TwinFlow is a self-checkout belted counter increasing that limit to an average of 30 items per basket.

SELF-CHECKOUT FOR LARGER PURCHASES

DIMENSIONS (mm)
 Length: 4200-4700
 Height: 1450
 Width: 725-1180

FEATURES

1 CASHIER 6 CUSTOMERS

Top efficiency: one cashier can serve up to 102 customers per hour.

CONTACT FREE

No physical contact of the cashier with means of payment or merchandise needed

HUNDREDS OF KILOGRAMS

Save time and energy of your crew.

SECURITY

Preserve the health of customers and employees by reducing physical contact.

FEATURES

2 CLIENTS SIMULTANEOUSLY

Dual lane solution for a simultaneous serving of two customers Increases throughput and efficiency.

QUICK AND EASY ASSEMBLY

Eeasy integraton with the existing ERP.

SMART SCALE

It will automaticly identify fruits and vegetables.

SCAN - PAY - PACK

Disposition of equipment increases throughput and provides natural and optimal course of the checkout.

HOW CAN THE NUMBER OF BASKET-TO-BAG UNITS DETERMINE THE CHOICE OF SELF-SERVING CHECKOUT?

The following presentations show the performance of our self-serving checkouts depending on the number of basket-to-bag units.

 Green zone – The technology is adequate for the purpose. Customer acceptance is excellent and is considered an efficient investment for the volume of interactions.

 Yellow zone - The technology is inadequate for the purpose. The customers have trouble accepting the solution or the investment is not optimal.

 Red zone – The usage in this zone is not recommended. The customers will not feel the benefits and technology will not increase efficiency.

“From basket to bag” (MoveFlow)“

An optimal solution in case of no more than six items. Speed and complexity of service increase with the average volume of the purchase

1-6 7-10 11-15 15-29 29+

TwinFlow Single Lane & TwinFlow Dual Lane

The single lane is insufficient for bigger purchases, while Dual Lane is too big for minor purchases and an ideal solution for those with an average of 10-30 items per checkout.

Single Lane

Dual Lane

Easy Flow

Inadequate for smaller purchases, while in all other cases is an ideal solution.

The presented indicators are the result of the research executed by ITAB for one retail supermarket in the USA.

SHOPPING
TROLLEYS AND BASKETS

Scan the QR code and check why 1937 is such an important year for this product category.

#SHOPPING BASKETS
classic, telescopic, ergonomic

#SHOPPING TROLLEYS
classic, security, PVC, transport trolleys

#SHOPPING TROLLEY BOXES

Shopping baskets and trolleys are the first things the customers touch in the shop - which is why the primary goal is to provide comfortable shopping. We choose the best suppliers and offer a high-quality assortment of shopping trolleys and baskets with the best price-quality ratio.

When choosing, it is necessary to pay attention to the capacity, conditions and merchandise type for which the baskets and trolleys are used. From the point of view of the retail format, the nesting distance between trolleys and baskets is critical - it reduces the space for their disposal. Another important parameter is anti-theft protection, which is why the design has to provide the best visibility of the items inside them.

INPUT provides solutions that will satisfy your customers' most specific requests regarding baskets and trolleys.

CLASSIC

The first and the best choice for quick and easy shopping. A signature design makes this basket series an indispensable element of every retail space.

COLORFLEX

The ergonomic design for smooth moving and more items than a classic basket. Available colour options for top-notch aesthetics.

COMFORTABLE TO CARRY, STACKABLE TO SAVE SPACE

#CLICK & COLLECT

#SCALE DIGITAL SHELF

A digital grocery is a collection of modern solutions providing infrastructure integration between stores and digital technologies. The goal is a flawless shopping experience on every shopping channel, a necessity for contemporary customers.

Today, retailers need to use innovative digital technologies to create a close relationship with customers in the course of shopping, which for the most part, still ends at the physical place, the store. According to the research, 71% of customers remain loyal to a certain store thanks to efficient service and positive experience at the checkout.

The shopping habits are evolving, and millennials and younger generations are at our doors, both physical and digital. For them, full connectivity is a part of everyday life and a common expectation. Take a look at the solutions connecting the physical and digital worlds in the store.

SMART FITTINGS™ DIGITAL SIGNAGE

AROMA

AUDIO

COOL SHELF

Online sales have taken a significant market share; the forecasts are that by the end of 2025, they will reach 25% in certain countries. On the other hand, a physical store is still where customers' experience is complete – and supported by all senses. In creating a modern store concept, particular attention is given to implementing elements forming a cosy, pleasant environment.

The science of neuromarketing is researching the role of senses, emotions and customers' behaviour. INPUT is introducing solutions completing the experience of shopping to the market. Some of the answers have brought significant results sales-wise.

AROMA 650

AROMA 650 is a small, convenient, reliable air refresher and aroma streamer. Microparticles it emanates can refresh up to 100 m², with timer setting and types of scents to program and diffuse.

CREATE EMOTIONS WITH SCENTS

PROGRAMMING OPTION

LIGHTING

2700K CRI 100 2700K CRI 90 2700K CRI 80 2700K CRI 70

TAKE ALL FEATURES INTO CONSIDERATION WHEN YOU ARE BUYING LIGHTING ELEMENTS.

The example above demonstrates the influence of CRI on the display of an item. Quality lighting adapted to a particular space and merchandise can significantly increase sales and upgrade the space.

Energetic efficiency has always been a standard parameter when choosing LED lighting. With technology progress, prices of these solutions became affordable, and the clients noticed differences in how lighted objects look under a specific lighting system. Also, there was a need to adapt the colour of the light to types of merchandise and space. For example, it is recommended to use warmer colours to light the fruit, while daily colours are more suitable for the retail space. The features like the temperature of the light colour (CCT) and the index of colour reproduction (CRI) determine the quality and participate in decisions about light sources.

We will share our know-how with you, so you can use these parameters to obtain an ideal lighting setup for your retail space.

TRACKLIGHTS

Tracklights are an efficient, scalable, elegant lighting solution. By installing and directing a certain number of spotlights on the track, you will obtain the proper lighting for any retail interior.

ULTIMATE DESIGN AND MODERN TECHNOLOGY

Track-based spotlights can dissipate the light under different angles. Narrow angles highlight certain positions or items, while wider angles are used for equilibrated space lighting. During the space designing process, we aim for a pleasant environment and the proper lighting of your products.

DECORATIVE LIGHTING

Create a unique atmosphere using different lighting. Different spaces require different lighting solutions. Our offer consists of many hanging lighting items that will make the environment exciting and unique.

CREATIVE SOLUTION

Your customers deserve the best user experience. The decorative lighting will make the space more pleasant and stimulating, which according to market researches can increase the turnover up to 2%.

DOWNLIGHTS

You will find a variety of lighting models designed for retail spaces in our offer. Innovations used for their production qualify them at the premium position in regards to energy efficiency, durability and CRI (colour reproduction index)

WAREHOUSE — RE HOUSE ▶ USE

SHELVING
SYSTEMS

When designing a retail space, it is common to dedicate 15-25% of the total surface to the local warehouse. A solid system of easy racks will enable you to leave more space for sales.

MAXIMUM SPACE USAGE

SECURITY

DURABILITY

Total weight per module: 3200 kg
Module height: 1800-1900 mm
Shelf length:
800/1200/1500/1800/2100 mm
Shelf depth: 300/400/
500/600/700/800/900
/ 1000/1100/1200 mm
Finishing: zinc coating

Warehouse organisation is a particular discipline in our industry. INPUT offers solutions for every warehouse kind and format. Our portfolio contains a comprehensive system of heavy-duty shelving racks for warehouses and mobile archive systems.

Almost all retail systems have a warehouse of their own. For them, we recommend the ROSS Unizinc shelving program. We offer the entire portfolio, from the pallet and console racks to platform constructions for major warehouses, storage areas and logistic centres.

UNIZINC EASY is a light racks system with features and finishing making it a durable, optimal solution for your local warehouse.

OUR SUCCESS

IS THE SUCCESS OF OUR CLIENTS

Write and draw your ideas, make a sketch, and describe us the project you are working on. Scan the QR code and send us your drawings and notes – it will be the beginning of our collaboration!
