The Aldo Moro Murder Case Richard Drake 1995 Aldo Moro's kidnapping and violent death in 1978 had much the same effect in Italy as the assassination of President John F. Kennedy had in the U.S., with both cases giving rise to endless conspiracy theories. Italian Syntax L. Burzio 2012-12-06 In the course of our everyday lives, we generally take our knowledge of language for granted. Occasionally, we may become aware of its great practical importance, but we rarely pay any attention to the formal properties that language has. Yet these properties are remarkably complex. So complex that the question immediately arises as to how we could know so much. The facts that will be considered in this book should serve well to illustrate this point. We will see for example that verbs like *arrivare* 'arrive' and others like *telefonare* 'telephone', which are superficially similar, actually differ in a large number of respects, some fairly well known, others not. Why should there be such differences. we may ask. And why should it be that if a verb behaves like *arrivare* and unlike *telefonare* in one respect. it will do so in all others consistently, and how could everyone know it? To take another case, Italian has two series of pronouns: stressed and unstressed. Thus, for example, alongside of reflexive *se stesso* 'himself' which is the stressed form, one finds *si* which is unstressed but otherwise synonymous. Yet we will see that the differences between the two could not simply be stress versus lack of stress, as their behavior is radically different under a variety of syntactic conditions.

Abortion in Latin America and the Caribbean Ligia De Jesús Castaldi 2020-06-25 Abortion in Latin America and the Caribbean is the first major book to analyze the abortion laws of the Latin American and Caribbean nations that are parties to the American Convention on Human Rights. Making use of a broad range of materials relating to human rights and abortion law not yet available in English, the first part of this book analyzes how Inter-American human rights bodies have interpreted the American Convention's prenatal right to life. The second part examines Article 4(1) of the American Convention, comparing and analyzing the laws regarding prenatal rights and abortion in all twenty-three nations that are parties to this treaty. Castaldi questions how Inter-American human rights bodies currently interpret Article 4(1). Against the predominant view, she argues that the purpose of this treaty is to grant legal protection of the unborn child from elective abortion that is broad and general, not merely exceptional. Abortion in Latin America and the Caribbean offers an objective analysis of national and international laws on abortion, proposing a new interpretation of the American Convention's right-to-life provision that is nonrestrictive and provides general protection for the unborn. The book will appeal not only to students and scholars in the field of international human rights but also to human rights advocates more generally.

How to Find a Habitable Planet James F. Kasting 2010 The amazing science behind the search for Earth-like planets Ever since Carl Sagan first predicted that extraterrestrial civilizations must number in the millions, the search for life on other planets has gripped our imagination. Is Earth so rare that advanced life forms like us—or even the simplest biological organisms—are unique to the universe? *How to Find a Habitable Planet* describes how scientists are testing Sagan's prediction, and demonstrates why Earth may not be so rare after all. James Kasting has worked closely with NASA in its mission to detect habitable worlds outside our solar system, and in this book he introduces readers to the advanced methodologies being used in this extraordinary quest. He addresses the compelling questions that planetary scientists grapple with today: What exactly makes a planet habitable? What are the signatures of life astronomers should look for when they scan the heavens for habitable worlds? In providing answers, Kasting explains why Earth has remained habitable despite a substantial rise in solar luminosity over time, and why our neighbors, Venus and Mars,

haven't. If other Earth-sized planets endowed with enough water and carbon are out there, he argues, chances are good that some of those planets sustain life. Kasting describes the efforts under way to find them, and predicts that future discoveries will profoundly alter our view of the universe and our place in it. This book is a must-read for anyone who has ever dreamed of finding other planets like ours—and perhaps even life like ours—in the cosmos.

The Politics of Anti-Corruption Agencies in Latin America Joseph Pozsgai-Alvarez 2021-11-29 This book investigates the history, development, and current state of anti-corruption agencies in Latin America. In recent decades, specialized anti-corruption agencies have sprung up as countries seek to respond to corruption and to counter administrative and political challenges. However, the characteristics, resources, power, and performance of these agencies reflect the political and economic environment in which they operate. This book draws on a range of case studies from across Latin America, considering both national anti-corruption bodies and agencies created and administered by, or in close coordination with, international organizations. Together, these stories demonstrate the importance of the political will of reformers, the private interests of key actors, the organizational space of other agencies, the position of advocacy groups, and the level of support from the public at large. This book will be a key resource for researchers across political science, corruption studies, development, and Latin American Studies. It will also be a valuable guide for policy makers and professionals in NGOs and international organizations working on anti-corruption advocacy and policy advice.
