PREFACE

The Annual Report of Hospitals in Canada for the year 1941, as in previous years, deals with (a) public hospitals as defined under the various Provincial Hospitals Acts, (b) private hospitals and (c) Dominion hospitals. Statistics covering mental hospitals and tuberculosis sanatoria appear in separate annual reports.

Under Dominion hospitals, statistics are given only for those hospitals operated by the Department of Pensions and National Health and the Department of Mines and Resources. Due to the rapid changes occurring in hospitals under the control of the Department of National Defence, the list of these hospitals operating in 1941 is omitted but an up-to-date list will appear in our Annual Report for 1942.

The thanks of the Dominion Bureau of Statistics is extended to all who contributed the material appearing in this report.

The report was prepared under the supervision of James C. Brady, Chief of the Institutional Statistics Branch by A. D. Ault and J. H. Melanson who had charge of the compilation and tabulation of the data.

S.A. Cudmore.

Dominion Statistician.

PREFACE

Le rapport annuel sur les hôpitaux canadiens pour l'année 1941, comme les années précédentes, porte sur (a) les hôpitaux publics tels que définis par les diverses lois provinciales sur les hôpitaux, (b) les hôpitaux privés et (c) les hôpitaux fédéraux. Les statistiques concernant les hôpitaux pour maladies mentales et les sanatoriums pour tuberculeux paraissent dans des rapports annuels séparés.

Les statistiques relatives aux hôpitaux fédéraux n'ont trait qu'à ceux qui sont dirigés par le Ministère des Pensions et de la Santé Nationale et le Ministère des Mines et Ressources. En raison des changements rapides qui se produisent dans les hôpitaux relevant du Ministère de la Défense Nationale, la liste de ces hôpitaux en opération en 1941 est omise, mais une liste à jour paraîtra dans notre rapport annuel pour 1942.

Le Bureau Fédéral de la Statistique remercie tous ceux qui ont contribué à ce rapport en fournissant des données.

Ce rapport a été préparé par A.D. Ault et J.H. Melanson, chargés de la compilation et de la mise en tableaux des données, sous la direction de James C. Brady, chef de la Branche de la Statistique des Institutions.

S.A. Cudmore.

Statisticien du Dominion.

The series of tables presented in this report cover the operation of public, private and Dominion hospitals for the year 1941 and are so arranged as to supply information of practical value to all interested in hospital statistics.

As by far the most considerable portion of medical care and treatment for all classes of the population is provided by public hospitals, the greater part of the report is devoted to these hospitals. It is hoped that the tabular information submitted for those hospitals will show how important is the part played by public hospitals in looking after the health of the people of Canada.

Tables 1 to 16 are general information tables in which are shown the number and types of public hospitals operating in each province, their bed capacities, bed complement, the number of doctors, interns and graduate nurses on their staffs and total personnel. Additional information covers the number of approved schools of nursing, number of student nurses, number of hospitals with organized medical staffs and services and other information dealing with their administration and organization.

Tables 17 to 48 deal with Movement of Population during the year under the following main headings: Number of patients in hospital at beginning of year; admissions, discharges and deaths during the year; Total patient days, daily average number of patients under care; average length of stay of discharged patients and the percentage of bed occupancy for each type of hospital.

Tables 49 and 50 give the movement of patients in Tuberculosis and Contagious Diseases' units attached to public hospitals and Table 51 gives the movement of patients in Incurable hospitals and statistics covering Private hospitals are shown in Tables 55 and 54.

Statistical data on Dominion hospitals were supplied by the Departments of Pensions and National Health and of Mines and Resources.

A brief analysis of the tables is herewith submitted.

Table 1. Out of a total of 598 public hospitals operating in 1941, 592 or 99.0 per cent submitted reports in time for publication.

The 592 hospitals reporting had a bed capacity of 49,890 beds and cribs and 5,768 bassinets. Four hundred and forty-four hospitals or 75 per cent of reporting hospitals had capacities of less than 100 beds, with a total of 17,469 beds, cribs and bassinets or 31 per cent of the total bed capacity of all hospitals. One hundred and forty-eight or 25 per cent had bed capacities of over 100 beds with 38,849 or 69.0 per cent of the total bed capacity reported. The average bed capacity of all public hospitals was 195.1; that of hospitals having 100 beds or less 39.3 and in hospitals of over 100 beds the average bed capacity was 262.5.

PERSONNEL. One hundred and seventeen hospitals reported 521 full-time doctors and 256 part-time doctors on salary. Of this total, 455 or 79.0 per cent were on the staffs of general public hospitals. Of the 577 doctors on salary, the province of Quebec had 235 or 40.0 per cent, Ontario 144 or 25.0 per cent and British Columbia 70 or 12 per cent.

One hundred and three hospitals reported 850 interns of which number 741 or 90 per cent were on the staffs of general public hospitals. Seven Women's hospitals had 18, six Children's hospitals 45, seven Contagious Diseases hospitals 21 and three Special hospitals 7 interns on their staffs.

Five hundred and ninety-one public hospitals reported 7,855 graduate nurses, 9,158 student nurses and 1,559 probationers. One hundred and seventy-two approved schools of nursing reported 2,765 nurses as having graduated during the year. Twenty-seven hospitals with schools of nursing failed to report the number of nurses graduating during the year.

Les tableaux présentés dans ce rapport portent sur les hôpitaux publics, privés et fédéraux pour l'année 1941; ils sont disposés de façon à fournir des renseignements de valeur pratique à tous ceux qu'intéressent les statistiques sur les hôpitaux.

Comme les hôpitaux publics dispensent de beaucoup la plus considérable partie des soins et traitements médicaux aux différentes classes de la population, la majeure partie du rapport est consacrée à ces hôpitaux. Il est à espérer que les renseignements continus dans les tableaux relatifs à ces institutions démontreront combien est important le rôle joué par les hôpitaux publics qui veillent à la santé de la population canadienne.

Les tableaux 1 à 16 sont des renseignements généraux sur le nombre et le genre d'hôpitaux publics en chaque province, leur capacité en lits, le nombre de lits, le nombre de médecins, d'internes et d'infirmières diplômées faisant partie de leur personnel et leur personnel complet. D'autres renseignements portent sur le nombre d'écoles d'infirmérie reconnues, le nombre d'infirmières élèves, le nombre d'hôpitaux avec personnel médical organisé et services organisés, leur administration et leur organisation.

Les tableaux 17 à 48 traitent du mouvement des patients pendant l'année sous les principales rubriques suivantes: nombres de patients à l'hôpital au commencement de l'année; admissions, sorties et décès durant l'année; total de jours-patients, nombre quotidien moyen des patients en traitement, durée moyenne du séjour pour chaque genre d'hôpital.

Les tableaux 49 et 50 donnent le mouvement des patients dans les sections des hôpitaux publics affectées aux tuberculeux et aux malades contagieux; le tableau 51 présente le mouvement des patients dans les hôpitaux pour incurables; les statistiques relatives aux hôpitaux privés paraissent dans les tableaux 55 et 54.

Les statistiques sur les hôpitaux fédéraux ont été fournies par les Ministères des Pensions et de la Santé Nationale ainsi que des Mines et Ressources.

Voici une brève analyse des tableaux:

Tableau 1. Sur un total de 598 hôpitaux publics en opération en 1941, 592 ou 99.0 p.c. ont soumis des rapports en temps pour publication.

Les 592 hôpitaux qui ont fait rapport avaient une capacité de 49,890 lits et lits d'enfants ainsi que 5,768 berceaux. Quarante-huit hôpitaux ou 75.0 p.c. des hôpitaux qui ont fait rapport avaient une capacité de moins de 100 lits; ils disposaient de 17,469 lits, lits d'enfants et berceaux, soit 31 p.c. de la capacité en lits de tous les hôpitaux. Cent quarante-huit ou 25 p.c. avaient une capacité de plus de 100 lits et disposaient de 38,849 lits, soit 69 p.c. de la capacité globale en lits. La capacité moyenne en lits de tous les hôpitaux publics était de 195.1; celle des hôpitaux ayant 100 lits ou moins, 39.3 p.c.; celle des hôpitaux ayant plus de 100 lits, de 262.5.

PERSONNEL. Cent dix-sept hôpitaux déclarent avoir 521 médecins salariés en service continu et 256 en service intermittent. De ce total, 455 ou 79 p.c. font partie du personnel des hôpitaux publics généraux. Des 577 médecins salariés, le Québec en a 235 ou 40 p.c.; l'Ontario, 144 ou 25 p.c.; la Colombie Britannique, 70 ou 12 p.c.

Cent trois hôpitaux ont 850 internes, dont 741 ou 90 p.c. font partie du personnel des hôpitaux publiques généraux. Sept hôpitaux pour femmes en avaient 18; six hôpitaux pour enfants, 45; sept hôpitaux pour malades contagieux, 21; trois hôpitaux spéciaux, 7.

Cinq cent quatre-vingt-onze hôpitaux publics ont 7,855 infirmières diplômées, 9,158 infirmières-élèves et 1,559 stagiaires. Cent soixante-douze écoles d'infirmérie reconnues déclarent que 2,765 infirmières ont été diplômées pendant l'année. Vingt-sept hôpitaux qui ont des écoles d'infirmérie n'ont pas fait rapport du nombre d'infirmières qui ont été diplômées durant l'année.

INTRODUCTION

vi

The number of graduate nurses per 100 patients in all public hospitals was 21.7, varying from 10.8 in Prince Edward Island to 28.6 in British Columbia. The figures for the provinces are: Prince Edward Island, 10.8; Nova Scotia, 18.7; New Brunswick, 17.0; Quebec, 19.7; Ontario, 21.8; Manitoba, 18.2; Saskatchewan, 23.7; Alberta, 25.5; British Columbia, 28.6 and Yukon and Northwest Territories, 18.9.

One hundred and seventy-eight public hospitals reported 281 graduate dietitians and 159 student dietitians.

The total personnel of all public hospitals in 1941 was 40,868.

ORGANIZED MEDICAL STAFFS. Two hundred and sixty-one public hospitals reported having organized medical staffs with 9,854 staff doctors in attendance, while 281 hospitals with non-organized staffs reported 1,447 attending doctors.

ORGANIZED SERVICES IN GENERAL PUBLIC HOSPITALS (Table 10). In every province, X-ray, General Surgery, General Medicine and Obstetrics head the list of organized services in general public hospitals. Table 10 shows by provinces the services organized. These services are interpreted to mean those organized under a departmental head. Table 10 must not be confounded with Table 11, which shows both organized and unorganized X-ray, Clinical Laboratory and Physiotherapy departments in public hospitals. Thus of 407 general public hospitals reporting X-ray services, 156 were under a departmental head. Although many public hospitals have no organized X-ray or Clinical Laboratory departments, it does not follow that such services are not available in such hospitals, since a public hospital under modern standards cannot well function without these services.

SOCIAL SERVICE DEPARTMENTS. Thirty-five hospitals reported having Social Service Departments with 89 paid workers. In 1940, 34 hospitals reported a similar department with a total of 82 paid workers.

ORGANIZED OUT PATIENT DEPARTMENTS. Forty-two hospitals reported having an organized out-patient department. The collection of uniform statistics for public out-patient departments and the value of the information received are still far from satisfactory. The reason for this condition is not due to failure on the part of hospitals to fill in the schedule for public out-patients but is due to the fact that there is lack of agreement among hospital authorities as to what items should be recorded.

Of the forty-two returns received, thirty supplied full information as asked on the schedule, viz., the number of patients visiting the out-patient department and the number of treatments or visits made to the different clinics. Eleven reported visits only and one kept a record only of patients and ignored the number of visits or treatments made or received.

In view of the important place the public out-patient departments of public hospitals will occupy in the post war period, it would seem advisable for hospital bodies to agree upon the recording of statistics of this important branch of hospital service on a uniform basis so that the published statistics will show general trends that will provide hospitals with data of considerable value.

MOVEMENT OF POPULATION

The five hundred and ninety-two public hospitals reporting showed a bed complement of 46,842, with 69.4 per cent of occupancy. The percentage of beds occupied in the various types of public hospitals was as follows: - General Public, 70.0; Women's, 76.0; Children's, 78.5; Contagious Diseases, 42.0; Convalescent, 66.0; Red Cross, 45.9 and Unclassified, 77.1.

The percentage of bed occupancy for all hospitals by provinces was: Prince Edward Island, 72.2; Nova Scotia, 72.8; New Brunswick, 69.7; Quebec, 76.9; Ontario, 70.1; Manitoba, 69.7; Saskatchewan, 60.2; Alberta, 57.8; British Columbia, 66.7; and Northwest Territories, 58.1.

Le nombre d'infirmières diplômées par 100 patients dans tous les hôpitaux publics est de 21.7; il varie de 10.8 dans l'Île du Prince-Édouard à 28.6 en Colombie-Britannique. Les chiffres pour les provinces sont les suivants: Île du Prince-Édouard, 10.8; Nouvelle-Ecosse, 18.7; Nouveau-Brunswick, 17.0; Québec, 19.7; Ontario, 21.8; Manitoba, 18.2; Saskatchewan, 23.7; Alberta, 25.5; Colombie-Britannique, 28.6; Yukon et Territoires du Nord-Ouest, 18.9.

Cent soixante-dix-huit hôpitaux publics déclarent avoir 281 diététiciennes diplômées et 159 diététiciennes-élèves.

Le personnel total de tous les hôpitaux publics en 1941 se chiffre à 40,868.

PERSONNELS MÉDICAUX ORGANISÉS. Deux cent soixante et un hôpitaux publics déclarent avoir un personnel médical organisé avec 9,854 médecins attachés à ce personnel, tandis que 281 hôpitaux n'ont pas de personnel organisé auquel sont attachés 1,447 médecins.

SERVICES ORGANISÉS DANS LES HÔPITAUX PUBLICS GÉNÉRAUX (Tableau 10). Dans toutes les provinces, les rayons X, la chirurgie générale, la médecine générale et l'obstétrique sont à la tête des services organisés dans les hôpitaux publics généraux. Le tableau 10 donne les services organisés par province. Par ces services on désigne ceux qui sont organisés sous la direction d'un chef de service. Il ne faut pas confondre le tableau 10 avec le tableau 11 qui donne les services organisés et non organisés de rayons X, de laboratoire de clinique et de physiothérapie dans les hôpitaux publics. Ainsi, des services de rayons X dans 407 hôpitaux publics généraux, 156 relèvent d'un chef de service. Bien que plusieurs hôpitaux publics n'aient pas de services organisés de rayons X et de laboratoire de clinique, il ne s'ensuit pas que ces services n'existent pas dans ces hôpitaux, puisqu'un hôpital public moderne ne peut pas bien fonctionner sans ces services.

DÉPARTEMENTS DE SERVICE SOCIAL. Trente-cinq hôpitaux déclarent avoir des départements de service social avec 89 zélateurs rétribués. En 1940, 34 hôpitaux avaient semblable département avec un total de 82 zélateurs rétribués.

DISPENSAIRES PUBLICS ORGANISÉS POUR PATIENTS EXTERNEs. Quarante-deux hôpitaux déclarent avoir un dispensaire public organisé pour patiente externe. Le relevé de statistiques uniformes sur les dispensaires publics organisés pour patients externes et la valeur des renseignements reçus sont encore loin d'être satisfaisants. Ce n'est pas que les hôpitaux ne remplissent pas la formule à cet effet, mais les autorités des hôpitaux ne s'entendent pas sur les détails à consigner.

Sur quarante-deux rapports reçus, trente ont fourni des renseignements complets comme le demandait la formule, c.-à-d. le nombre de patients visitant le dispensaire pour patients externes et le nombre de traitements ou de visites aux différentes cliniques. Onze n'ont mentionné que les visites, tandis qu'un a fait le relevé des patiente seulement et a ignoré le nombre des visites faites ou des traitements reçus.

Etant donné la place importante qu'occuperont après la guerre les dispensaires publics pour patients externes des hôpitaux publics, il semble à propos que les hôpitaux s'entendent et trouvent une base uniforme pour la consignation des statistiques de cet important service hospitalier, de sorte que les statistiques publiées indiqueront les tendances générales qui fourniront aux hôpitaux des données d'une valeur considérable.

MOUVEMENT DE LA POPULATION

Les 592 hôpitaux publics faisant rapport disposent de 46,842 lits dont 69.4 p.c. sont occupés. Le pourcentage de lits occupés dans les divers genres d'hôpitaux publics est le suivant: publics généraux, 70.0; pour femmes, 76.0; pour enfants, 78.5; pour maladies contagieuses, 42.0; de convalescence, 66.0; de la Croix-Rouge, 45.9; non classifiés, 77.1.

Le pourcentage de lits occupés dans tous les hôpitaux est le suivant par province: Île du Prince-Édouard, 72.2; Nouvelle-Ecosse, 72.8; Nouveau-Brunswick, 69.7; Québec, 76.9; Ontario, 70.1; Manitoba, 69.7; Saskatchewan, 20.2; Alberta, 57.8; Colombie-Britannique, 66.7; Yukon et Territoires du Nord-Ouest, 58.1.

PATIENTS AT BEGINNING OF YEAR. There was a total of 22,423 patients under care in public hospitals at the beginning of the year, an increase of ten per cent over the number in residence at the beginning of the previous year. Of this number, 29,311 were adults and children and 3,118 newborn. Of the total under care, 14,758 were males and 16,671 were females.

The number of admissions to all public hospitals during the year was 1,019,869, an increase of 7.2 per cent over the number of admissions in 1940. Male admissions showed a percentage increase over the previous year of 6.6 per cent and female admissions of 7.8 per cent.

A breakdown of Table 18 shows the number of males and females per 1,000 of each sex in the general population who were admitted to general public hospitals in each province during the year:-

| Province | Par 1,000 of population | | Province |
|----------------------------|-------------------------|------------------|-----------------------------|
| | Male Hommes | Female Femmes | |
| Prince Edward Island | 67 | 85 | Ile du Prince-Edouard |
| Nova Scotia | 83 | 114 | Nouvelle-Ecosse |
| New Brunswick | 65 | 77 | Nouveau-Brunswick |
| Quebec | 55 | 68 | Québec |
| Ontario | 76 | 104 | Ontario |
| Manitoba | 90 | 150 | Manitoba |
| Saskatchewan | 80 | 118 | Saskatchewan |
| Alberta | 102 | 159 | Alberta |
| British Columbia | 116 | 150 | Colombie Britannique |

PATIENTS UNDER CARE. A total of 1,052,298 patients were under care in public hospitals during the year, an increase of 7.2 per cent over the number under care in 1940. Of the total under care, 926,876 were adults and children and 125,422 were newborn. Based on the general population, the figures show that 8 out of every 100 of the general population received care in public hospitals during the year.

DISCHARGES. The total number discharged from all public hospitals was 984,197 or 93.5 per cent of the total under care. Of the total male patients under care, 92.1 per cent were discharged and of females under care 94.6 per cent.

DEATHS. Total deaths were 55,885, of which 52,370 were adults and children and 3,515 newborn. Of all deaths, 10,644 or 32.9 per cent occurred within 48 hours of admission to hospital. The remaining 25,239 or 67.1 per cent died 48 hours or more after admission. The death rate of adults and children per 1,000 under care was 55 and of the newborn, 28.

PATIENTS IN PUBLIC HOSPITALS AT END OF YEAR. Patients remaining in hospital at end of year numbered 32,218, of which number 28,689 were adults and children and 3,529 were newborn.

DAYS OF HOSPITAL CARE OF DISCHARGED PATIENTS IN PUBLIC HOSPITALS. The total days' care of all patients who were discharged or who died was 12,725,281 which gave an average stay in hospital of 12.5 days for all patients; 12.7 days for adults and children and 10.5 for newborn. The average days' stay of adults and children in general public hospitals was 12.1 and of infants born in hospital, 10.5 days.

TOTAL PATIENT DAYS DURING THE YEAR. The total patient days of all patients under care during the year were 15,158,885 and their average stay was 12.5 days. The daily average number of patients under care was 15,043.5.

PATIENTS AT BEGINNING OF YEAR. Il y a 22,423 patients qui reçoivent des traitements dans les hôpitaux publics au début de l'année, augmentation de 10 p.c. par rapport à l'année précédente. De ce nombre, 29,311 sont des adultes et des enfants et 3,118 sont des nouveau-nés. Le total comprend 15,758 hommes et 16,671 femmes.

Les admissions à tous les hôpitaux publics durant l'année se chiffrent à 1,019,869, augmentation de 7.2 p.c. comparativement à 1940. Les hommes admis accusent une augmentation proportionnelle de 6.6 p.c. en regard de l'année précédente et les femmes, 7.8 p.c.

Un recouplement du tableau 18 montre le nombre d'hommes et de femmes par 1,000 de chaque sexe dans la population générale qui ont été admis aux hôpitaux publics généraux, dans chaque province, pendant l'année:

PATIENTS EN TRAITEMENT. Pendant l'année, 1,052,298 patients reçoivent des traitements dans les hôpitaux publics, augmentation de 7.2 p.c. en regard de 1940. De ce nombre, 926,876 sont des adultes et des enfants et 125,422 sont des nouveau-nés. Basés sur la population en général, les chiffres indiquent que 8 p.c. de la population générale ont reçu des traitements dans les hôpitaux publics durant l'année.

SORTIES. Il est sorti un total de 984,197 patients de tous les hôpitaux publics, soit 93.5 p.c. des patients traités. Il est sorti 92.1 p.c. des hommes traités et 94.6 p.c. des femmes traitées.

DECES. Les décès s'élèvent à 55,885, dont 52,370 adultes et enfants et 3,515 nouveau-nés. De tous les décès, 10,644 ou 32.9 p.c. sont survenus moins de 48 heures après l'admission des patients et le reste, 25,239 ou 67.1 p.c., 48 heures ou plus après l'admission. Le taux de mortalité des adultes et des enfants par 1,000 patients traités est de 55 et celui de la mortalité, de 28.

PATIENTS DANS LES HOPITAUX PUBLICS A LA FIN DE L'ANNEE. Les patients qui restent à l'hôpital à la fin de l'année se chiffrent à 32,218, dont 28,689 adultes et enfants et 3,529 nouveau-nés.

JOURS D'HOSPITALISATION DANS LES HOPITAUX PUBLICS DES PATIENTS SORTIS. Les jours d'hospitalisation de tous les patients sortis ou décédés s'élèvent à 12,725,281, ce qui donne un séjour moyen à l'hôpital de 12.5 jours pour tous les patients -- 12.7 jours pour les adultes et les enfants et 10.5 jours pour les nouveau-nés. Le séjour moyen des adultes et des enfants dans les hôpitaux publics généraux est de 12.1 jours et celui des enfants nés à l'hôpital, de 10.5 jours.

TOTAL DES JOURS-PATIENTS DURANT L'ANNEE. Le total des jours-patients de tous les patients traités durant l'année est de 15,158,885 et leur séjour moyen est de 12.5 jours. La moyenne quotidienne des patients traités est de 15,043.5.

BIRTHS. The total number of births in public and private hospitals was 135,473, of which number 126,365 or 90.3 per cent occurred in public hospitals and 9,108 or 9.7 per cent in private hospitals. Of the total births, 131,228 or 96.9 per cent were live births and 4,245 or 3.1 per cent still births. The total births in Canada during the year were 250,950, of which 244,116 or 97.5 per cent were live births and 6,834 or 2.7 per cent were still births.

It is interesting to note that 97.5 per cent of all births in the province of British Columbia occurred in hospitals and that this province had the lowest percentage of still births of any province in Canada with 1.9 per cent of total births.

The following breakdown of Table 29 shows the trend of births in hospitals by provinces:-

NAISSANCES. Il est né 135,473 enfants dans les hôpitaux publics et privés, soit 126,365 ou 90.3 p.c. dans les hôpitaux publics et 9,108 ou 9.7 p.c. dans les hôpitaux privés. Les naissances vivantes s'établissent à 131,228 ou 96.9 p.c. du total et les mortalités, 4,245 ou 3.1 p.c. Le total des naissances au Canada pendant l'année est de 250,950, dont 244,116 ou 97.5 p.c. sont des naissances vivantes et 6,834 ou 2.7 p.c. sont des mortalités.

Il est intéressant de noter que 97.5 p.c. de toutes les naissances en Colombie Britannique sont survenues dans les hôpitaux et que cette province a le plus faible taux de mort-nés de toutes les provinces du Canada, soit 1.9 p.c. du total des naissances.

Le recouplement suivant du tableau 29 retrace la tendance des naissances dans les hôpitaux par province:-

| Province | Total births in province | Total births in hospitals | Per cent of Total births in hospitals | Still births in hospitals | Per cent of still births in hospitals | Gross death rate per 1,000 births in hospitals | Province |
|------------------------|--|---|--|----------------------------------|--|---|-------------------------|
| | Total des naissances dans la province | Total des naissances dans les hôpitaux | P.c. du total des naissances dans les hôpitaux | Mort-nés dans les hôpitaux | P.c. des mort-nés dans les hôpitaux | Mortalité brute par 1,000 naissances dans les hôpitaux | |
| Prince Edward Island . | 2,149 | 757 | 35.2 | 25 | 3.3 | 1.7 | Île du Prince-Edouard . |
| Nova Scotia | 13,221 | 7,694 | 58.2 | 286 | 3.7 | 2.9 | Nouvelle-Ecosse |
| New Brunswick | 11,996 | 5,931 | 53.0 | 151 | 3.8 | 5.5 | Nouveau-Brunswick ... |
| Quebec | 86,559 | 21,954 | 25.4 | 964 | 4.4 | 3.7 | Québec |
| Ontario | 70,561 | 50,371 | 71.0 | 1,672 | 3.3 | 2.7 | Ontario |
| Manitoba | 15,127 | 10,715 | 70.0 | 293 | 2.7 | 2.4 | Manitoba |
| Saskatchewan | 19,716 | 12,223 | 62.0 | 271 | 2.2 | 2.5 | Saskatchewan |

| British Columbia | 14,104 | 13,758 | 97.5 | 271 | 1.9 | 2.0 | Colombie Britannique .. |

TUBERCULOSIS UNITS IN PUBLIC HOSPITALS. Twenty-three public hospitals reported tuberculosis units, of which number Nova Scotia had 7 with 232 beds, Quebec 13 with 1,026 beds and Alberta 3 with 201 beds. The number of patients in these units at beginning of year was 1,254, admissions during the year 2,226 and total under care during the year 3,480.

The number discharged during the year was 1,619, while the number of deaths was 522 or 15 per cent of the total under care. Total days' care was 485,579 with an average stay of 139.5 days.

CONTAGIOUS DISEASES UNITS IN PUBLIC HOSPITALS. Thirteen hospitals reported having contagious diseases units of which two were in New Brunswick, three in Quebec, five in Ontario, one in Manitoba and two in Alberta. The bed capacity of these units was 288. Admissions totalled 2,760 and the total under care during the year 2,891. Discharges totalled 2,678 and deaths 67. Patient days totalled 41,995 with an average days' stay of 14.5 days.

UNITES POUR TUBERCULEUX DANS LES HOPITAUX PUBLICS. Vingt-trois hôpitaux publics déclarent avoir des unités pour tuberculeux, dont 7 en Nouvelle-Ecosse avec 232 lits, 13 dans le Québec avec 1,026 lits et 3 en Alberta avec 201 lits. Ces unités comptent 1,254 patients au commencement de l'année; 2,226 patients sont admis et 3,480 sont traités durant l'année.

Les sorties s'élèvent à 1,619 au cours de l'année, tandis que les décès se chiffrent à 522 ou 15 p.c. des patients traités. Les jours d'hospitalisation s'établissent à 485,579 et le séjour moyen est de 139.5 jours.

UNITES POUR MALADIES CONTAGIEUSES DANS LES HOPITAUX PUBLICS. Treize hôpitaux déclarent avoir des unités pour les maladies contagieuses, soit deux au Nouveau-Brunswick, trois dans le Québec, cinq en Ontario, un au Manitoba et deux en Alberta. Ces unités disposent de 288 lits. Les admissions se placent à 2,760 et le nombre de patients traités pendant l'année est de 2,891. Les sorties s'élèvent à 2,678 et les décès, à 67. Les jours-patients se chiffrent à 41,995 et le séjour moyen est de 14.5 jours.

PRIVATE HOSPITALS

There were 322 private hospitals operating in Canada in 1941. The number of beds and cribs was 3,957 and the number of bassinets 776. Patients in hospitals at beginning of year were 1,999, admissions during the year 45,362, of which number 36,513 were adults and children and 8,849 newborn. The total under care was 47,761. Discharges totalled 44,007 and deaths 1,299. Patient days during the year amounted to 789,468 and the daily average number of patients was 2,162.5 with an average stay for all patients of 16.6 days, for adults and children 17.9 days and for newborn 11.3 days.

The classes of patients cared for in private hospitals included the following:- Aged, Cancer, Chronic, Convalescent, Incurable, Maternity, Medical, Surgical, Nervous Diseases, Tuberculosis and emergency. Fifty-six private hospitals reported having X-ray facilities, 32 Clinical Laboratory, 30 Physiotherapy, 2 schools of nursing and 6 organized out-patient departments.

The personnel of all private hospitals was 1,762 of which total 99 were salaried doctors, 591 graduate nurses, 24 student nurses and all other employees, 1,048. The number of attending doctors was 5,035.

HOSPITALS FOR INCURABLES

The number of hospitals for incurables in 1941 was sixteen. In addition to these hospitals, four public hospitals had units for the care of incurable patients. Three of these units were in Quebec and one in Alberta.

The bed capacity of these hospitals and units was 3,415 and the bed complement 3,402. The total personnel attached to these hospitals was 1,222, of which number 16 were salaried doctors, 193 were graduate nurses with 178 attending doctors.

The number of patients under care at the beginning of the year was 2,947. Admissions during the year were 2,508, making the total under care 5,255. The number of discharges during the year was 1,083 and the deaths 1,055. The patients in hospital on the last day of the year totalled 3,117. Patient days amounted to 1,057,058, giving an average stay of 201 days. The percentage of beds occupied during the year was 85.1.

HOPITAUX PRIVES

Il y a 322 hôpitaux privés au Canada en 1941. Elles disposent de 3,957 lits d'adultes et d'enfants et 776 berceaux. Il y a 1,999 patients dans ces hôpitaux au commencement de l'année; les admissions au cours de l'année s'établissent à 45,362, dont 36,513 adultes et enfants et 8,849 nouveau-nés. Le total des patients en traitement est de 47,761. Les sorties se chiffrent à 44,007 et les décès, à 1,299. Les jours-patients pendant l'année s'élèvent à 789,468 et la moyenne quotidienne des patients est de 2,162.5; le séjour moyen est de 16.6 jours pour tous les patients, de 17.9 jours pour les adultes et les enfants et 11.3 jours pour les nouveau-nés.

Les catégories de patients traités dans les hôpitaux privés sont les suivantes:- vieillards, cancéreux, cas de maladies chroniques, convalescents, incurables, cas de maternité, cas de médecine générale, cas de chirurgie, malades nerveux, tuberculeux et cas urgents. Cinquante-six hôpitaux privés ont des appareils de rayons X, 32 ont un laboratoire de clinique, 30 ont la physiothérapie, 2 ont des écoles d'infirmières et 6 ont des dispensaires organisés pour les patients externes.

Le personnel de tous les hôpitaux privés s'élève à 1,762, dont 99 médecins salariés, 591 infirmières diplômées, 24 infirmières-élèves et 1,048 autres employés. Elles ont 5,035 médecins en service.

HOPITAUX POUR INCURABLES

En 1941 il y a 16 hôpitaux pour incurables. En outre, quatre hôpitaux publics ont des unités pour le soin des incurables, trois dans le Québec et un en Alberta.

Ces hôpitaux et unités ont une capacité de 3,415 lits et leur nombre de lits est de 3,402. Il y a 1,222 personnes attachées à ces hôpitaux, dont 16 médecins salariés, 193 infirmières diplômées et 178 médecins en service.

Il y a 2,947 patients en traitement au commencement de l'année. Les admissions au cours de l'année s'élèvent à 2,508, ce qui fait un total de 5,255 patients en traitement. Les sorties s'établissent à 1,083 pendant l'année et les décès, à 1,055. Les patients à l'hôpital le dernier jour de l'année se chiffrent à 3,117. Les jour-patients s'élèvent à 1,057,058, ce qui donne un séjour moyen de 201 jours. Le pourcentage des lits occupés pendant l'année est de 85.1.
