

Vermont Marble Color Plates

Vermont Marble Company, Proctor, Vermont
Branches in the Larger Cities

Excerpts from the “Introduction”:

“The quarries of the Vermont Marble Company, including the deposits in Colorado, Montana and Alaska produce many different kinds of marble. Some of the more important varieties are reproduced in this book....”

“Illustrated in the back of the book are some of our shops, mills and quarries, as well as a few representative installations. Our large finishing plants in Vermont, coupled with subsidiary plants in Philadelphia, Cleveland, Chicago, Dallas, San Francisco, Tacoma, Peterboro, Ontario, enable us to serve the trade efficiently and over a wide area.

“These pages deal only with American products, but it should be remembered that we also provide, finish and install all kinds of Foreign marble.

“Vermont Marble Company”

This book, which begins on the next page,
is presented on the Stone Quarries and Beyond web site.

INTRODUCTION

THE quarries of the Vermont Marble Company, including the deposits in Colorado, Montana and Alaska, produce many different kinds of marble. Some of the more important varieties are reproduced in this book.

While it is undeniably true that paper and ink cannot bring out the life and luster of marble, they can be so combined as to present an accurate picture of the color and veining. That result has been accomplished in this series.

Illustrated in the back of the book are some of our shops, mills and quarries, as well as a few representative installations. Our large finishing plants in Vermont, coupled with subsidiary plants in Philadelphia, Cleveland, Chicago, Dallas, San Francisco, Tacoma and Peterboro, Ontario, enable us to serve the trade efficiently and over a wide area.

These pages deal only with American products, but it should be remembered that we also provide, finish and install all kinds of Foreign marble.
