FOR IMMEDIATE RELEASE:

The SLIM CD Has Been Certified by Paymentech

Certification Allows Paymentech Merchants to Process High-Speed Credit Card Transactions Through Their PC Using the Internet and NetConnect

Coral Springs, FL Jan. 13, 2005 – SLIM CD, INC, a software developer and service provider, announces certification of the Slim CD software on the Paymentech platform. The Slim CD point-of-sale software supports both card-swipe and keyed transactions. The Paymentech certification allows retail, restaurant, hotel, direct marketing, and e-commerce merchants to use the Slim CD software with Paymentech. Transactions are generally processed in 2-5 seconds through Slim CD's NetConnect connectivity to Paymentech, without requiring the merchants to have a leased line or dedicated Internet connection.

"We feel that support for the Paymentech platform rounds out the processing capability of the SLIM CD software," said Sami Slim, CEO and President of SLIM CD, Inc. "The SLIM CD's support of most major industry types allows Paymentech and its ISOs to provide one of the latest POS software products to their clients."

The Slim CD package includes a desktop application, virtual terminal, and a choice of shopping carts. The software also features data on demand capability, built-in gateway services, fraud detection services and backup dial-in connectivity. The SLIM CD runs on any IBM-compatible personal computer with Internet connectivity or a modem. Low-cost card swipes, signature-capture devices, and receipt printers are supported. An Enterprise Edition is available to perform merchant-level recurring billing.

The SLIM CD software product is provided to ISOs, banks, and other financial institutions for distribution to their merchants. SLIM CD products are distributed through the merchant services channel partners. Use of the hosted shopping carts and per-transaction fraud screening services are bundled with the SLIM CD. More information about SLIM CD, Inc and the SLIM CD products is available at http://www.slimcd.com.
