# NOTICE.

In publishing this Telegraphic Code, we have made it a special object to simplify it as much as possible, and while condensing, to have everything as distinct and well defined as is practicable in such a work.

The word "Cable" specifically, as such, has not been used in this book, since it will probably be used quite as much in the European and American continents as between countries divided by oceans.

## THE ALPHABETICAL ARRANGEMENT.

The headings and phrases being arranged alphabetically, the required sentences may be determined at a glance. Not only does this distinct and comprehensive arrangement apply to the heading, but to the entire plan as well; the alphabetical order even extending to the third and sometimes to the fourth word; unquestionably of great value for quick cabling purposes.

Phrases difficult of distinct classification will be found under the heading of Miscellaneous.

In order to facilitate ready reference, the Table headings have been arranged in the index whenever possible under more than one head; thus "Shipping by express" will be found indexed under "Shipping" as well as "Express," and so on.

## THE PROVISION FOR CURRENCY.

In all instances where Currency is provided for, it is understood (unless otherwise indicated), that same pertains to the countries wherein the order or business is executed—thus Pounds (£) for the United Kingdom, Dollars (\$) for the United States, Marks (M) for Germany, Francs (Frcs) for France, etc., and those terms may be omitted in messages, but this explanation naturally does not refer to the table of Currency on pages 692 to 696.

## DIRECTIONS.

It is well to notice that when a portion or ending of a sentence is followed with a dash, enclosed in brackets (—), the bracketed portion is without effect unless followed by an additional word or phrase in keeping with the tenor of the telegram; for example of this, see "Aalmolche," page 1.

It is understood that when a sentence or a word ends with a dash, enclosed in brackets, (—); as also, with a word enclosed in brackets; that the word or sentence with the dash is *alone* to be used, provided the required word to replace the dash be added, in which case the word without the dash becomes void; but if the suitable word to replace the dash be not used, then the word without the dash is intended—as instance of this, see "Aalstachel," page 1.

When a sentence carries two words, or terms, each in parenthesis, only one is to be used, and the subject matter following will readily indicate which one takes effect; see "Aanspeten," page 5.

Whenever practicable the pronouns "I" and "We" have been omitted, since they can be safely dispensed with, and their presence in a Code frequently interferes with proper alphabetical arrangement. For instance, from the phrase "Will fill your order next week," it may be understood that the party telegraphing "will fill your order," hence no occasion to precede the phrase with "I" or "We." The present arrangement, moreover, gives opportunity to precede the sentences with name of other party, or matter, if desired. When necessary, however, to use the pronoun, we have given the plural "We" the preference, and no one need have any fear of the message being misinterpreted.

## THE OFFICIAL VOCABULARY.

One especial recommendation of the present work is the fact that the Ciphers (of 5 to 10 letters) are taken solely from the "Berne Official Vocabulary," which will probably be declared obligatory for preconcerted telegraphic Code-words to and from Europe in the year 1903. While the introduction of a compulsory selection of Code Ciphers as projected by the International Telegraphic Bureau, is in some respects a public convenience, the adoption of the "Official Vocabulary" would not be altogether safe apart from expert supervision of the Ciphers it offers to cablers. Its adoption means new cable codes, and the cabling public must buy them, but extreme caution should be exercised in using only such words as offer the greatest safety. We claim that our Code is perfectly safe, a result reached only after careful supervision by some of the best talent known to international cable intercourse.

The selection of Ciphers alone has entailed a labor of many months, including the assistance of skilled experts thoroughly versed in the probability of ordinary and even extraordinary mutilation in passing of messages from one circuit to another, to say nothing of the almost inevitable errors arising from frequent imperfect working of the ocean cables; thus it presents the all-important feature of containing *only* such of the Ciphers as are most likely to obviate chances of mutilation, or confiction, to effect which the compilers of this work have exercised in the most cautious manner the elimination of such words as offered a positive objection by their close similarity, not differing either in character or meaning to an extent sufficient to preclude the possibility of misconstruction; for instance, we found such words as "colliding" and "colliding"; "confront" and "confront"; "citrons" and "citrons"; "cinnamon" and "cinnamon"; "calves" and "calves," etc.; also "cheap," "charge," "cargo," "collect," "bimonthly," "eighteenth," "eleventh," etc.; also "automotriz" should have been "automotriz," "Dansebunt" should be "Densebunt," "Crcciolino" should be Cucciolino, and "convictive" was before "conviction" (out of alphabetical order, not to speak of its close similarity), and many more instances we could give of the great danger there would have been had the words been used as given in the new "Official Vocabulary" as published. Words with *ij* have not been employed, as were the dots (·) to be omitted, the letter *y* would be the result.

Although we have used a large number of Ciphers in this Code, only those from "A" to "F" are employed, so a large scope is offered to cablers in the balance of the words pertaining to the "Official Vocabulary" for the purposes of arrangement in any manner that may be dictated as suitable for additions for private use and tabulating combinations, for which latter purpose each Cipher is numbered.

## THE WORD NUMBER.

The word number given to each and every Cipher has no meaning or significance in connection with the actual Code Cipher—the word numbers simply supplying a system which facilitates arrangements for combinations now so generally employed by the cabling public.

 Rubber Stamp given with each book: "LIEBER'S CODE USED."

N. B.—EXPLANATION.—The words stand for the figures at the top with the fractions on the extreme right or left added.  
 An application can be made with these tables to represent any sum (within these numbers) that may be desired, by adding after the code-words the name of the highest denomination of the money mentioned. For instance, \$1.43 would be represented by—Dedubim, dollars, Fcs. 2.30 by—Deducavate, francs, Marks 3.20 by—Dedocobit Marks. The Dollars, Marks and Francs as used a note, could be omitted if **LUCE** is bit one currency in use between the parties telegraphically.

QUOTATIONS.

## OPTION—REFUSAL.

It is understood that the limit will expire according to the standard time of city sending telegram.

	As per your authority we have given refusal until.	At what price can you give refusal until?	Can in all probability close it at — if you give us refusal until.	Cannot give refusal but would probably accept if in hand by —.

## OPTION—REFUSAL.

It is understood that the limit will expire according to the standard time of city sending telegram.

	As per your authority we have given refusal until.	At what price can you give refusal until?	Can in all probability close it at — if you give us refusal until.	Cannot give refusal but would probably accept if in hand by —.

# Private Codes

---

---

WHILE the general code, especially the Lieber, covers the conversational needs of practically any business, it is quite obvious that the details relating to the particular requirements of every line cannot be included in any one code.

The firm that can wire in the most economical, comprehensive and simple manner will obtain the business over competitors.

It is evident that the skill and care necessary in the compilation and preparation of a private code can only be gained by long experience in varied lines of industry.

Our prices are consistent with expert work and we aim to deliver a product that is satisfactory in every respect and maintain the confidence of the business community.
