SI11-14		OPT-E-242	Cylinder, Side <i>Cilindro Lado</i>
SI11-15		ET-4	Motor & Fan Mount Cabinet <i>Gabinete para Motory Montage de Ventilador</i>

Signal originally produced the OptiBulk Prebulker and an upgrade of the Superba prebulker known as EX Top or EZ Conversion. Recent installations now use the more efficient Epic Prebulker (see section on Epic Prebulker).

Because many of the original Signal Prebulklers are in service, Epic offers the spare parts for Optibulk and EZ Top or EZ Conversion.

Epic products are intended as replacements for worn or damaged parts in OEM products. OEM Part numbers in (parenthesis) indicate either 1) Improved design 2) the part serves the same function as the OEM part, but may differ from the OEM design, or 3) it is a component of an assembly where no OEM reference number is available, or 4) it is a repair service for the referenced OEM part.

Parts with EE designations are manufactured by Epic and are not authorized by the original equipment manufacturers.

The information herein falls within the normal range of product properties and is based on typical usage results within the industry of the products. Epic assumes no obligation or liability for any advice or information supplied by Epic. The user assumes all responsibility for determining the results and suitability of the products within the user's plant. All such information is provided gratis and user assumes sole responsibility for results obtained.
