Meet the E&S Team

Evans & Sutherland has been distributing full-dome content for over 30 years and offers the largest catalog with over 200 shows. We have well-established relationships with full-dome and giant screen producers like National Geographic, NSC Creative, Softmachine, MacGillivray Freeman and Mirage3D and are committed to serving the industry's content needs. Our team is ready to help you through the entire process, from show selection, to licensing and delivery.

Estelle Pacalon

Show distribution and Sales Manager

Estelle Pacalon's knowledge and expertise in planetariums and giant screen cinema is at your disposal. She can personally guide you through the show selection process and find the right content to fit your mission.

Estelle Pacalon

BLACK HOLE

FIRST PICTURE
COMING SOON

2020

25 min

Languages: EN

Producer: Mirage 3D

Genre: Astronomy, Cosmology

Black Hole First Picture is a full-dome planetarium film currently in production featuring the human attempt to create the very first picture of a black hole with the Event Horizon Telescope. The Event Horizon Telescope consists of a network of 8 Radio telescopes at 6 remote locations in the world ranging from Europe, North and South America, Hawaii to Antarctica. For years, the Event Horizon Telescope has been staring into the hearts of the Milky Way and the galaxy Messier 87, trying to obtain a picture of the shadow of Sagittarius A*, our galaxy's central supermassive black hole and the black hole M87*.

ATLAS

of a Changing Earth:
Mapping Our Climate Future

COMING TO THEATERS
SUMMER 2021

2020 25 min

Languages: EN
Producer: Spitz Creative Media
Genre: Astronomy, Climate Change,
Global Warming

This is the story of how a revolution in one of the most basic of all human enterprises – the making of maps – is shedding new light on our planet's evolution in the wake of rising global temperatures. It builds on the success of two award-winning Earth science films distributed by Spitz and Evans & Sutherland: *Dynamic Earth: Exploring Earth's Climate Engine* (2012) and *Birth of Planet Earth* (2019).

Using stunning, latest-generation imagery from space, "Atlas of a Changing Earth" takes viewers into the dynamic processes causing coastal glaciers in Greenland and Antarctica to melt, and explores how rising seas could threaten coastlines the world over. These striking new images are produced by the confluence of satellites and supercomputers, revealing Earth in a degree of precise detail scarcely imagined a generation ago.

MARS

ONE THOUSAND ONE

2018

52 min, 42 min, 30 min

Languages: EN, GE, DU, FR, JP, MA

Producer: Mirage3D + E&S + GOTO Inc

Genre: Space Travel

An international crew of astronauts is about to embark on the first interplanetary journey in history, the first manned mission to the surface of Mars. Reporter Miles O'Brien is reporting live from his Space Headquarters TV Studio in New York while events unfold for the crew on their 1001 day long mission.

We will witness firsthand their brave attempts to put human footprints on Mars and return safely to Earth. This journey is made possible by the biggest engineering feat ever and loaded with scientific experiments. The explorers will be extending our knowledge of Mars and will be learning whether or not mankind has a future among the stars. Experience the thrill of the grandest mission of exploration ever undertaken!

BIRTH OF PLANET EARTH

2019

24 min

Languages: AR, CZ, EN, GE, KO, MA,
PT, RO, FR, RU, CA

Producer: Spitz Creative Media

Genre: Astronomy

Password:
pxEWEQqHdk3*JJaW

Birth of Planet Earth tells the twisted tale of our planet's origins.

Scientists now believe that our galaxy is filled with solar systems, including up to a billion planets roughly the size of our own. The film employs advanced, data-driven, cinematic-quality visualizations to explore some of the greatest questions in science today: How did Earth become a living planet in the wake of our solar system's violent birth? What does its history tell us about our chances of finding other worlds that are truly Earth-like?

Produced by Spitz Creative Media, NCSA's Advanced Visualization Lab, Thomas Lucas Productions, Inc., in association with Tellus Science Museum. This project has been made possible with support from the Commonwealth of Pennsylvania and the Greater Philadelphia Film Office; funded in part by the National Science Foundation.

ASTRONOMY & SPACE TRAVEL

Night of the Falling Stars

4K

2019 19 - 22 min

One night a boy sets out to observe meteors on his secret hill. But on this night a mysterious old gentleman is also there, and then shooting stars begin raining down on them like a shower.

The two begin a magical journey going above the clouds and beyond Earth's atmosphere to approach the shooting stars finally reaching high enough to overlook the whole Earth.

Through this experience, the boy gains insight into the origins of shooting stars and meteor showers and takes an important first step toward his dream of becoming a scientist.

Worlds Beyond Earth

2020 25 min

Narrated by Academy Award-winner Lupita Nyong'o, *Worlds Beyond Earth* tells the story of the surprisingly dynamic nature of the worlds that share our solar system and the unique conditions that make life on Earth possible.

Worlds Beyond Earth features immersive visualizations, groundbreaking space missions, and breathtaking depictions of our solar system.

In stunningly detailed scenes drawn from real data—including unparalleled visualizations of the alien landscape of Mars and a simulation of the evolution of Saturn's rings—*Worlds Beyond Earth* takes viewers on a remarkable journey around our solar neighborhood to explore whether there really is no place like home.

Languages: EN, FR, GE, SP, IT, JP, MA

Horizon

2018 29 - 40 min

We have long tried to find out what is out there in an unknown world ever since we existed on earth. A feeling of curiosity with a question of "Why?" led us to develop a form of science and chase after the horizon in the vast universe.

From Geocentric theory to Heliocentric theory, from Steady-state cosmology to Big Bang theory, through the historical figures observing the stars, the fulldome digital planetarium film "HORIZON" gets to the bottom of the space exploration.

Great Barrier Reef

2018 40 min

Every year millions of visitors travel by way of fins, flippers and feet to see one of the seven wonders of the natural world: the Great Barrier Reef – a living treasure trove of biodiversity. There is still so much to learn and knowledge is the key to understanding more about this living Eden. A thriving metropolis populated by a cast of characters straight out of an adventure novel – heroes, bad guys, sidekicks, lovers and clowns – they're all players in this vast underwater drama.

Hurricane

2015 22-40 min

This is the true story of a 15,000-kilometre journey in the footsteps of one of the most devastating natural events on our planet: the Atlantic Hurricane. Our protagonist is both shatteringly destructive and vital to life on earth. A mere breeze at its conception, as it sweeps over the African Sahel it becomes a life-giving monsoon, before setting out across the Atlantic as a deepening depression. The hurricane is the film's main character. The supporting cast – the men, women, plants and animals that it encounters on its journey and affects in some way, for better or for worse.

Backyard Wilderness

2018 45 min

This large format digital film follows the daily dramas of common animals - like the turtle, heron, frog, raccoon and dragonfly - juxtaposed with the activities of nearby humans more concerned with their computer screens, mobile devices, and the endless pursuit of money and status. The film will tell the story of our disconnect with nature, with the aim of inspiring a new and transformative connection.

Amazon Adventure

2017 45 min

Discover the epic, true story of Henry Bates' 11-year journey through the visually stunning and bio-diverse Amazon rainforest as a young man who risks his life for science. Experience the compelling clues Bates unearths in his major science discovery of the rare phenomenon of mimicry. Bates made other crucial contributions: identifying 8,000 species new to science, putting forward the first ever case for the creation of a new species which Charles Darwin called the "beautiful proof" for his theory of Natural Selection.

Great Bear Rain Forest

2019 40 min

Journey to a land of grizzlies, coastal wolves, sea otters and the all-white spirit bear, the rarest bear on Earth, in the film "Great Bear Rainforest." Hidden from the outside world, the Great Bear Rainforest is one of the wildest places left on earth. Found on Canada's remote Pacific coast, it is the last intact temperate rainforest in the world—a place protected by the region's indigenous people for millennia. Now, for the first time ever, experience this magical world and discover the land of the spirit bear.

Extreme Weather

2016 39 min

Weather has always been one of the most dynamic and complex forces shaping our planet, and now it's intensifying in varied and complex ways. Among the melting tidewater glaciers of Alaska, Dr. Erin Pettit leads a young team of researchers into the splash zone, at the face of Dawes Glacier, aboard a boat custom-designed to get as close as possible to the calving ice. In the Great Plains of the US, J. Walker tries to place pods of sensors inside tornadoes as part of an effort to determine if tornado outbreaks are growing more extreme.

Life Under The Arctic Sky

2016 41 min

The Sami are some of Europe's last indigenous peoples, reindeer herders who for thousands of years have lived a nomadic lifestyle in the Arctic wilderness. In their homeland, spread across northern Norway, Sweden, Finland, and Russia, the notion of time is untethered from the cycles of the sun and is tied instead to something far more important: the movement of the reindeer. Experience spectacular aurora displays and visualizations of local folktales about the aurora as you accompany the Sami on their annual "reindeer walk" 200 miles north of the Arctic Circle. BTS Media, Mirage3D and Winner Pictures.

Robots

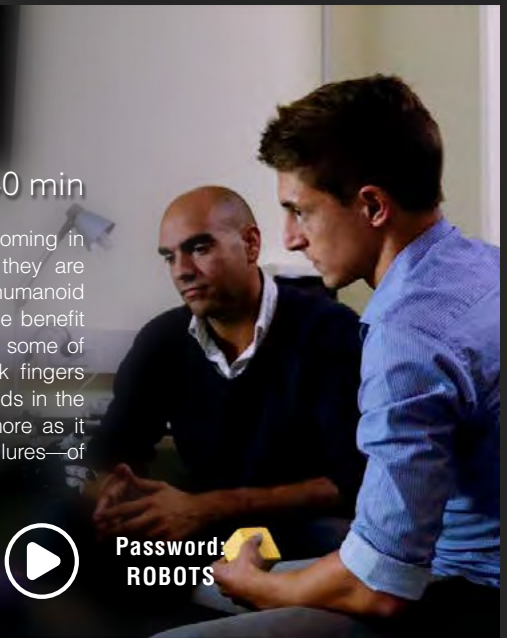

2015 40 min

Today's robots are nothing short of astonishing. Those coming in the not-too-distant future are simply revolutionary—and they are becoming eerily like us. What does it take to make a humanoid robot—a robot that can do anything we can do without the benefit of a human brain? How close are scientists to replicating some of the particularly challenging human characteristics? (Think fingers and toes.) Why are we even attempting to create humanoids in the first place? ROBOTS 3D answers these questions and more as it showcases the latest developments—the successes and failures—of robotics around the world.
