

ABOUT

1994

“CIDO Grupa” (original name - Cido Pārtikas Grupa) was founded in 1994, taking over the production of soft drinks by SIA RyBarg, which was established in 1993, and the state-owned company - the beverage factory Milgravis.

SIA RyBarg, which was the predecessor of Cido Pārtikas Grupa, filled the first bottles with the wild strawberry syrup and the sparkling beverage SunSet in 1993. Since then, the company has much invested in the production of juices in order to meet the world's highest standards.

1996

The company was the first in the Baltics to produce natural juice in a pack with a cap.

1998

Two years later, the company invested in a new production line in order to fill juices in small 0.2 liter packs.

2004

“Royal Unibrew” acquired company “Cido grupa”.

2005

“Cido grupa” got the quality standard ISO 22000.

2006

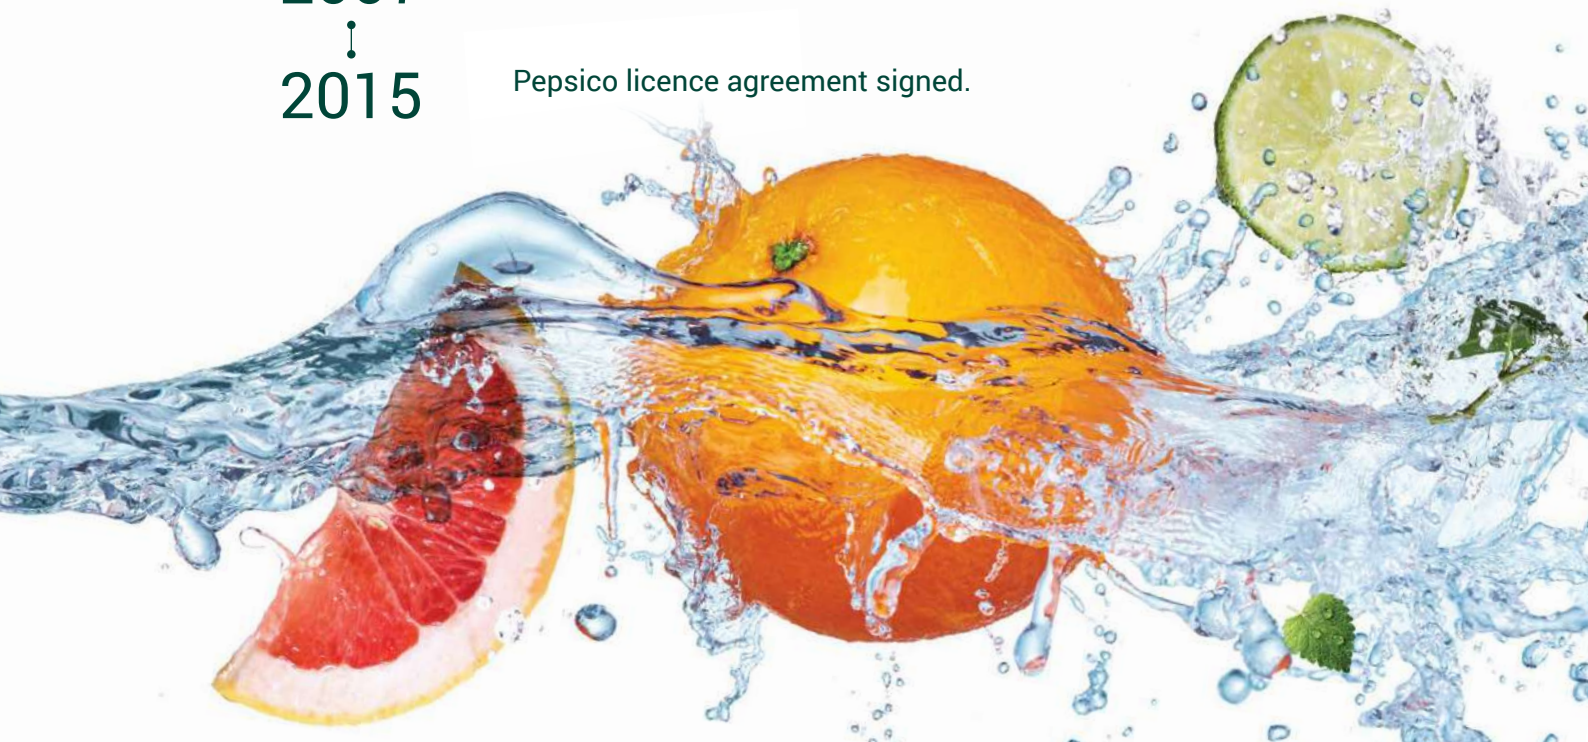

The company invested in a new production line in order to fill juices in half-liter packs and FSSC in PET.

2007

Investmet to expansion of Tetra Pack formats: 1.5 L format.

2015

Pepsico licence agreement signed.

"Cido grupa" is the No.1 Producer of Juice/Nectars/CSD drinks within Baltic region.

Widest portfolio of flavors in Baltic region, with more than 40 different product tastes.

Cido production plant has 5 production lines:

- 1,5 L Tetrapak slim line
- 1L Tetrapak Prisma line
- 0,5 L Tetrapak Prisma line
- 0,2 L Tetrapak slim line
- 1,5 L PET line
- 0,75 L PET line
- 0,5 L PET line

Number of employees	330
Plant capacity, L	258 000 000
Product categories	JNSD, CSD, Water
Production lines	Glass, PET x 3, Tetra Pack x 4

RICH IN MINERAL SALTS

MANGALI

Natural mineral water

Mangali natural mineral water was first bottled in 1994, and it is the first natural mineral water certified and bottled in Latvia.

Carbonized Natural mineral water "Mangali" is sourced from 213 m deep borehole "Mangali-2". Its mineral content is unique and rich in mineralsalts, dated back for more than 36 000* years. During this time, the water has been filtering through various layers of the earth - protected from the pollution while attaining superior clarity and becoming enriched with natural minerals.

Still Natural mineral water "Mangali" is sourced from 70 m deep borehole "Mangali-1", with lower content of mineralsalts and reaching 7,5 PH level. Available in still and light sparkling versions.

The latest novelty "Mangali Vitafruit" provides consumer a wide choice of near waters for those who are bored of just plain water. Enabling to have a healthier choice for those who prefer taste of soft drinks with only 12-18 kcal in 100 ml.

"Mangali Active" functional sports drinks are specially created for active lifestyle, meeting different consumer needs, with different sport drink properties to recharge, energize or rehydrate.

* The precise age was determined by the scientists at Tallin University of Technology using carbon dating method on the water from Mangali bore-hole. It is confirmed also by an issued certificate from TTÜ.
