

22mm Push Button Selection Guide

Allen-Bradley

**Rockwell
Automation**

Bringing Together Leading Brands in Industrial Automation

Unparalleled Flexibility— 800E Push Buttons

Allen-Bradley's 22 mm 800E Push Buttons are designed to provide unparalleled flexibility and quality to meet the global product needs of our customers.

Variety. Rockwell Automation offers the widest selection of front-of-panel operators and back-of-panel options and accessories in the 22 mm market.

Installation Ease. We designed the 800E line of operators for single person installation to provide installation time savings and total cost savings.

Performance. 800E push buttons carry on the Allen-Bradley tradition of performance, reliability, and safety.

22 mm Push Buttons and Enclosures...

- **Superior Design**
- **Manufactured Quality**
- **Product Flexibility**
- **Time-Tested Reliability**
- **Best Value**
- **World-Wide Solutions**
- **Support**

A large industrial machine with multiple cylindrical components and a red button.

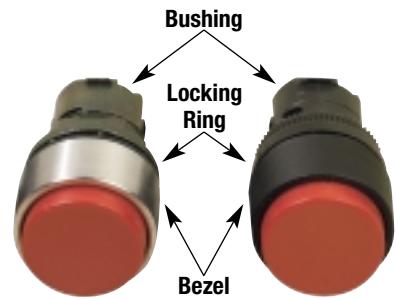

Application Solutions

Demanding Environments Command Durable Metal Operators.

- Die-cast metal operators offer ruggedness and durability in demanding applications.
- Operator bushings and locking rings are constructed of die-cast zinc alloy and finished with corrosion-resistant chromate plating.
- Aluminum bezels with metal finish or black anodized finish.

Corrosive Environments Require Resistant Plastic Operators.

- Operator bushing and mounting ring constructed of industrial grade thermoplastic for the best corrosion-resistant solution in the industry.
- Bezels constructed of black industrial-grade thermoplastic or aluminum with metal finish.

Superior Design

Expect the Best

The 800E line is designed and manufactured to meet demanding performance specifications. Using state-of-the-art solid modeling techniques and finite element analysis, every component built into 800E push buttons are optimized for durability and performance.

Materials

- 800EM and EB lines are constructed of tough, die-cast zinc alloy, finished with corrosion-resistant chromate.
- 800EP, ES, and EQ lines are made of industrial-grade thermoplastic for superior corrosion resistance.
- Illuminated operators have nylon lenses designed for superior UV resistance and strong chemical resistance.

Safety

- Selector switches provide unique positive detent for safe application switching.

Two-Color Plastic Caps

- Saves space and simplifies installation by eliminating the need for separate legend plates.
- Two-color molding is more durable and longer-lasting than surface printing techniques. Lettering is molded in a separate color throughout the entire cap so it will not wear away.

Aesthetics

- Choose from round or square operators to enhance equipment aesthetics.
- Round operators are available with either black or shiny metal bezels.
- Square operators feature black bezels.

World-Wide Solutions

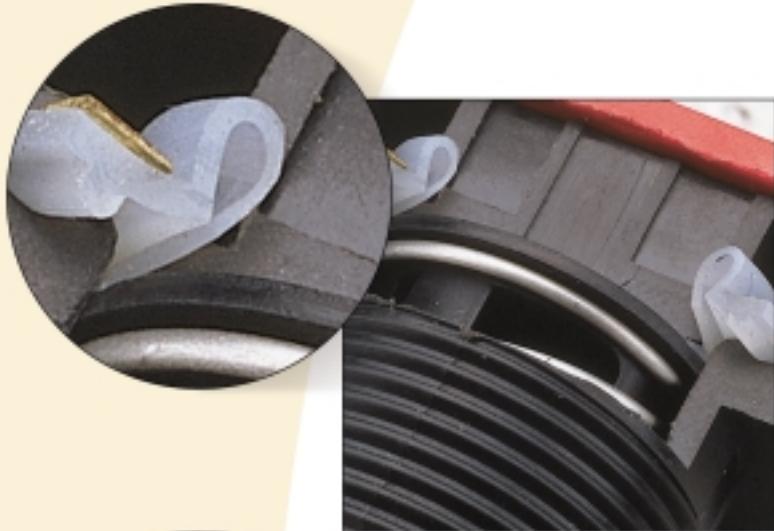

- Designed to meet world wide standards.
- UL Listed, CSA Rated, CE Marked, DEMKO Approved.
- Operator caps, legend plates, and inserts available with international symbols, foreign languages, and custom markings.

Sealing Techniques

We offer IP66 and Type 4/13 ratings across the 800E line with superior sealing techniques. Three types of seals are used on our operators:

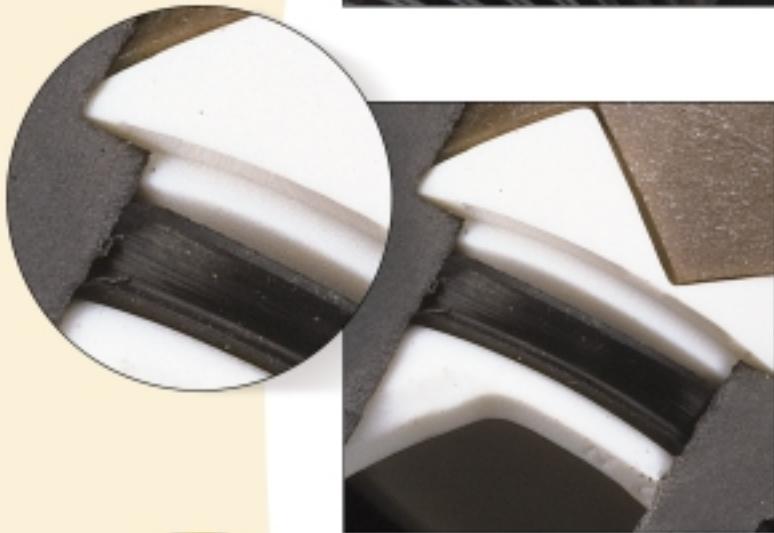

Diaphragm Seals

- Used throughout the 800E line on linear travel devices.
- Diaphragm seals flex with the operation of the button.
- Life and performance are not dependent on lubrication.

K-Seals

- Used on rotating devices like selector switches and twist-to-release operators.
- Dual wiping action provides high-pressure sealing performance while lubrication trapping extends sealing life.

Panel Gasket

- Installed on all devices.
- Oversized, bi-directional gasket seals both panel and mounting hole for superior performance.
- Provides operator retention for one person installation.
- Ensures Type 4/13, IP66 ratings.

Modular Design

Any Operator + Any Back Of Panel Component = The Greatest Flexibility In The 22 mm Market!

Using a consistent latching approach, any latch can be used with either metal or plastic operators. Permits a wide variety of front-to-back of panel solutions.

Two-Across Latch and Contact Blocks

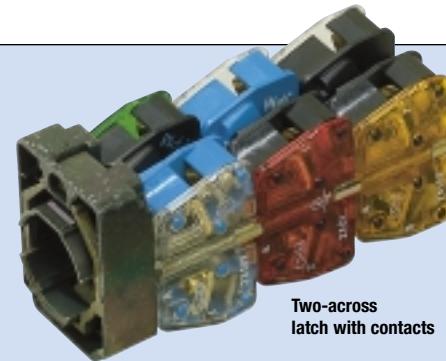

- Heavy-duty metal
- Screw down contact blocks
- All zinc die-cast metal latch
- 2 blocks across by 3 blocks deep
- Color-coded for contact identification

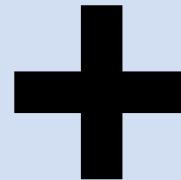

800 EQ
Plastic bushing
Square plastic bezel

800 EB
Metal bushing
Black metal bezel

Two-across latch with contacts

Three-Across Latch and Contact Blocks

- Heavy-duty plastic snap-on latch
- Rotating collar for easy removal
- Corrosion resistant
- Snap-down contact blocks
- 3 blocks across by 2 blocks deep
- Color-coded for contact block identification

800 ES
Plastic bushing
Aluminum with metal finish bezel

Variety and Style

We offer the most extensive line of 22 mm push buttons available anywhere. The combination of colors, styles and sizes is almost limitless – and certain to meet any application requirement.

Specialty Operators

- 2-, 3-, 4-position selector switch
- Monolithic pilot light
- 2- and 4-position joy sticks
- Wobble stick
- Reset operators
- Multi-function
- Potentiometers
- Selector/Jog

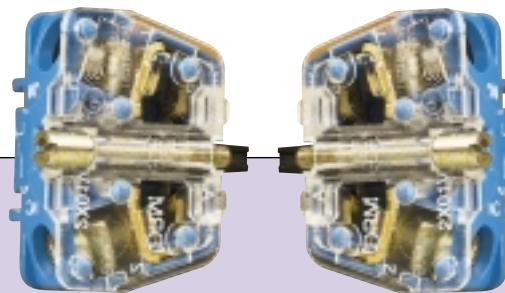

Back of Panel

The 800E push button system offers a variety of contact block combinations to fit both space and use requirements. What's more, contact and latch assembly is literally a snap – tools are not required.

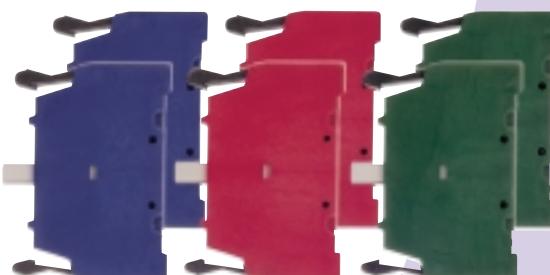

Two-Across System

- Heavy-duty zinc metal die cast latch.
- 30 x 40 mm (1-3/16" x 1-9/16") mounting matrix.
- One hand latch removal.
- Snap fit, tools not required to attach latch.
- Blocks can be stacked two blocks across by three blocks deep for a total of six circuits.
- Contact blocks can be stacked on full voltage power.
- Screw-down contact blocks provide superior reliability in high vibration environments.
- Power Module Types:
 - Transformer (120V AC...600V AC)
 - Resistor (120V AC/DC and 240V AC)
 - Full Voltage (6V AC/DC...120V AC/DC)
 - Dual Input Diode (24V AC/DC and 120V AC)
- Two-Across Bifurcated Contact Blocks feature:
 - Transparent color coded sides for easy contact inspection and circuit identification.
 - Angled terminal screws provide clear access to stacked blocks for ease of wiring.
 - Excellent contact wiping and optimal switching reliability.
- Contact blocks available: N.O., N.C., N.O.E.M., N.C.L.B, also see PenTUFF Low Voltage and Self-monitoring contact blocks on proceeding pages.

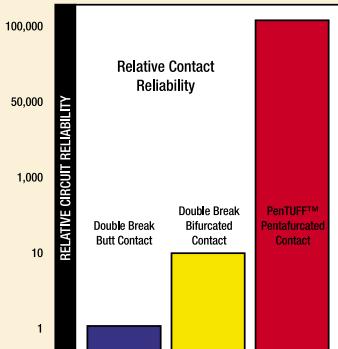

Three-Across System

- 30 x 47.5 mm (1-3/16" x 1-7/8") mounting matrix.
- Heavy-duty molded plastic latch with secure snap fit.
- Rotating collar for easy one-hand latch removal.
- Tools not required to attach contact blocks to latch.
- Blocks can be stacked three blocks across by two blocks deep for a total of six circuits.
- Gold-plated bifurcated contact blocks for optimal switching reliability in low current levels.
- Contact blocks available: N.O., N.C., N.O.E.M., N.C.L.B, low voltage, and self-monitoring
- Two contact block mounting styles (Base and Latch mount).
- Power Module Types:
 - Transformer (120V AC...600V AC)
 - Full Voltage (6V AC/DC...120V AC/DC)
 - Resistor (240V AC)

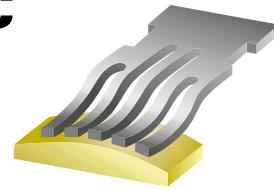

PenTUFF™ – A Low-Voltage PLC Interface Exclusive

Direct drive pentafurcated contacts are revolutionizing the market for low-voltage switching. Pentafurcated contacts feature spanners with five “fingers” on each side of the spanner allowing 961 different possible current paths. Each path can carry the full rated load of the contact. Pentafurcated contacts features include:

- Self-cleaning contact wiping for increased contact reliability and life.
- No contact bounce between the spanner’s “fingers” and the stationary surface it makes contact with.
- Operates sequentially, with each finger making contact independently.
- A spanner made of an inert precious metal to resist corrosion.
- Are excellent for low voltage applications, like PLC® circuits, with the advantage of a direct drive mechanism.
- Increased communication reliability in PLC®, SLC™, and MicroLogix™ devices.

Pentafurcated 5-finger spanner

Self Monitoring™ Contact Blocks – Enhance E-Stop Reliability

Rockwell Automation now offers improved E-Stop reliability for critical process control applications with new Allen-Bradley Self Monitoring™ Contact Blocks (SMCB) for use with 800E push buttons. The **patented** Self Monitoring Contact Blocks monitor whether or not they are properly installed on the E-Stop operator.

Why You Need SMCBs

Proper contact block installation is critical to ensure that the normally closed contacts will open when the E-Stop is actuated. Separation of the contact blocks from the E-Stop operator will prevent the E-Stop from shutting down the controlled process in an emergency. Consider the following dangerous scenarios that could potentially result in contact block separation:

- Contact block mounting screws were not completely tightened and later came loose
- Mounting screws were over-tightened, resulting in stripped threads
- Contact block latch not completely “snapped-on” to the E-Stop operator
- Contact block or latch is accidentally damaged during maintenance
- Contact block or latch is removed and not reinstalled during maintenance

The new Self Monitoring Contact Block eliminates these separation concerns by actually monitoring its own installation. If the SMCB is separated from the E-Stop operator for any reason, the controlled circuit will automatically open.

Cat. No. 800E-2LX01LS

Cat. No. 800E-3LX01S

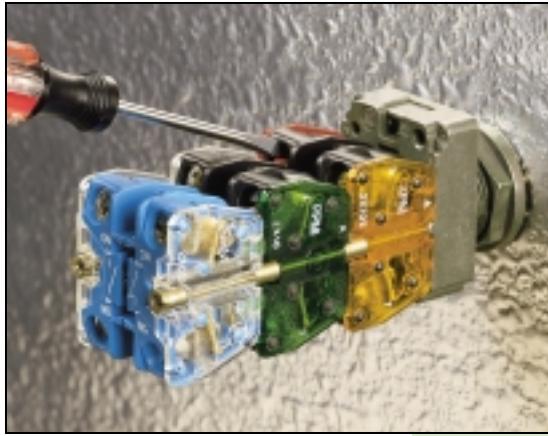

Additional Product Features

- Same ratings as existing 800E standard contact blocks
- Color-coded yellow for easy identification
- IP2X finger safe protection
- Terminals identified with IEC style markings

Installation Ease

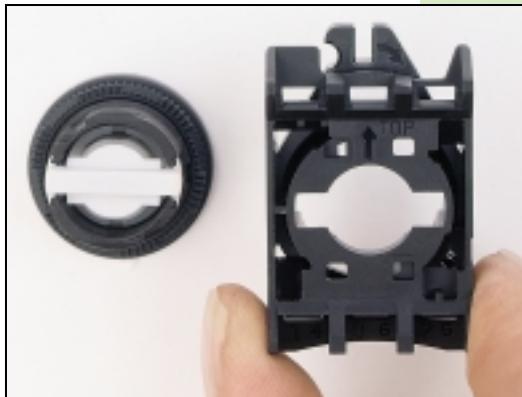

Two-Across System

- No tools required snap-on latch.
- Contact blocks stack two-across by three deep with offset screws for easy terminal access.
- Easy one-hand latch removal.

Three-Across System

No tools required snap-on installation.

- Operators and latches designed for low installation cost.
- Quick operator and legend changes without disassembly or rewiring the back-of-panel components.

Operators, latches and circuit components are designed for easy removal.

- No tools required snap-on latch.
- Contact blocks stack three-across by two deep.
- Collar rotates to unlatch, remaining unlatched until it is removed from bushing.
- Once latch is off bushing, collar rotates back to install position.

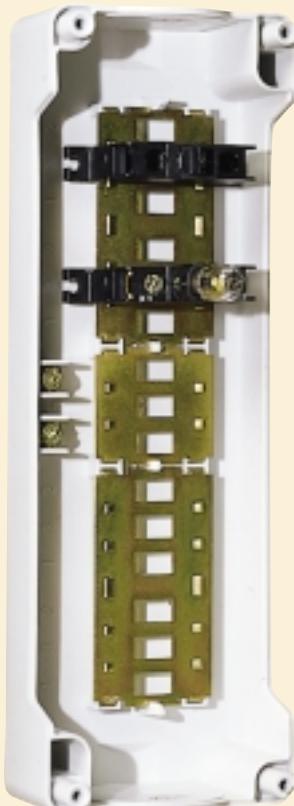

Anti-rotation Bushing Tab

- Provides accurate alignment and eliminates operator and legend plate rotation.
- Tab is easily removed for use in panels without notches.

Mounting Rings

- Metal mounting rings have bonding teeth that cut through paint on metal enclosures to enhance safety and provide a positive grounding point.
- Metal mounting rings tighten with either a standard 15/16" socket or our convenient hand tool.
- Plastic mounting ring tightens by hand or with convenient hand tool.

Base mounted contacts and power modules

Enclosures

- Available in metal and plastic.
- 1-, 2-, 3- and 5-hole configurations available.
- 1-hole plastic or metal versions available in yellow.
- Metal enclosures accept two- and three-across latch-mounted contact blocks and three-across base-mounted contact blocks with a base mounting adapter.
- Plastic enclosures accept three-across base mounted contact blocks only.
- Metal enclosures rated IP66 and Type 4/13.
- Plastic enclosures rated IP66 and Type 4/4X/13.

Base or latch mount configurations

Variety Of Illumination

Choose from the largest selection of nylon lens caps in the industry. Allen-Bradley caps have superior resistance to breakage and material degradation. Optical enhancements are molded into lens caps for superior illumination. Diffuser style lens caps are also available. Colors are available in amber, blue, clear, green, red and white.

Power Solutions. Power modules and lamp options are designed to meet all your application needs. And we offer three power solutions: full voltage, resistor, and transformer. Lamp types are available in incandescent and LED.

Illumination Options. Table 1 highlights the variety of lamp types and voltages available. Incandescent lamps are available in three power module types: full voltage, resistor, and transformer, with a voltage range from 6V to 600V. LED lamps are available in full voltage and transformer, from 6V to 600V.

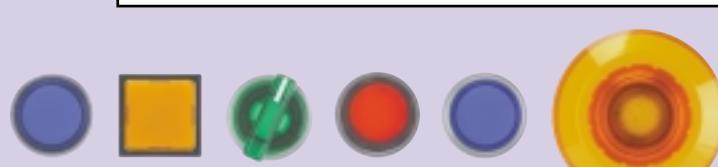

Illumination Performance. Table 2 highlights the performance and thermal life expectancy of specific lamps and power modules.

- **Incandescent Lamps** have the widest selection of colors, the highest level of illumination and are the most economical.
- **LED Lamps** offer the greatest value by providing the longest lamp life and the best resistance to shock and vibration. In addition, they have an internal shunt resistor for use with solid state outputs. They last up to 100,000 hours. That's almost 11 years of 24-hour continuous usage!

Illuminated Operators. Our complete line of illuminated operators feature superior sealing, illumination, and environmental protection. Illuminated operators offer two way communication – push buttons send signals through illumination and receive signals through the operator function.

Accessories

Legend Plates

- Two-piece style with legend frames and inserts allow you to change legends easily, even after panel assembly.
- One-piece legend plate style features low-tack adhesive to assist the installation process.
- E-Stop legends come in two different sizes: 60 and 90 mm diameter.
- International symbols, foreign languages, and custom markings are available.
- Legends available in five languages.

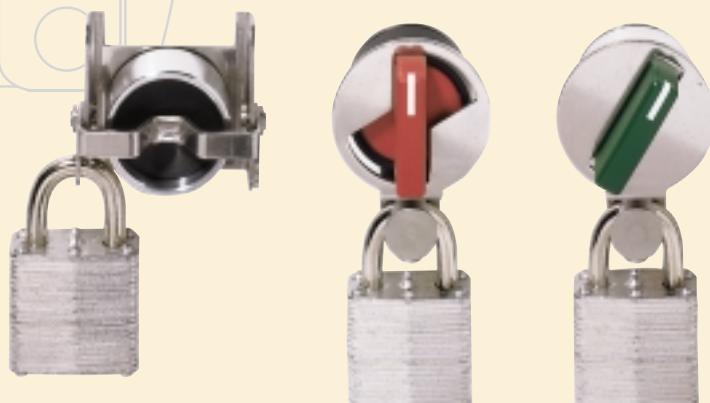

Clear Assembly Instructions

- Assembly instructions are on or in all packages.
- Perforated tear strips allow easy bag opening.
- Clear viewing window allows quick identification of product.

Complete Packages

Complete push button packages are available with easy composite catalog numbering. Packages include:

- Operator
- Latch
- Contact blocks

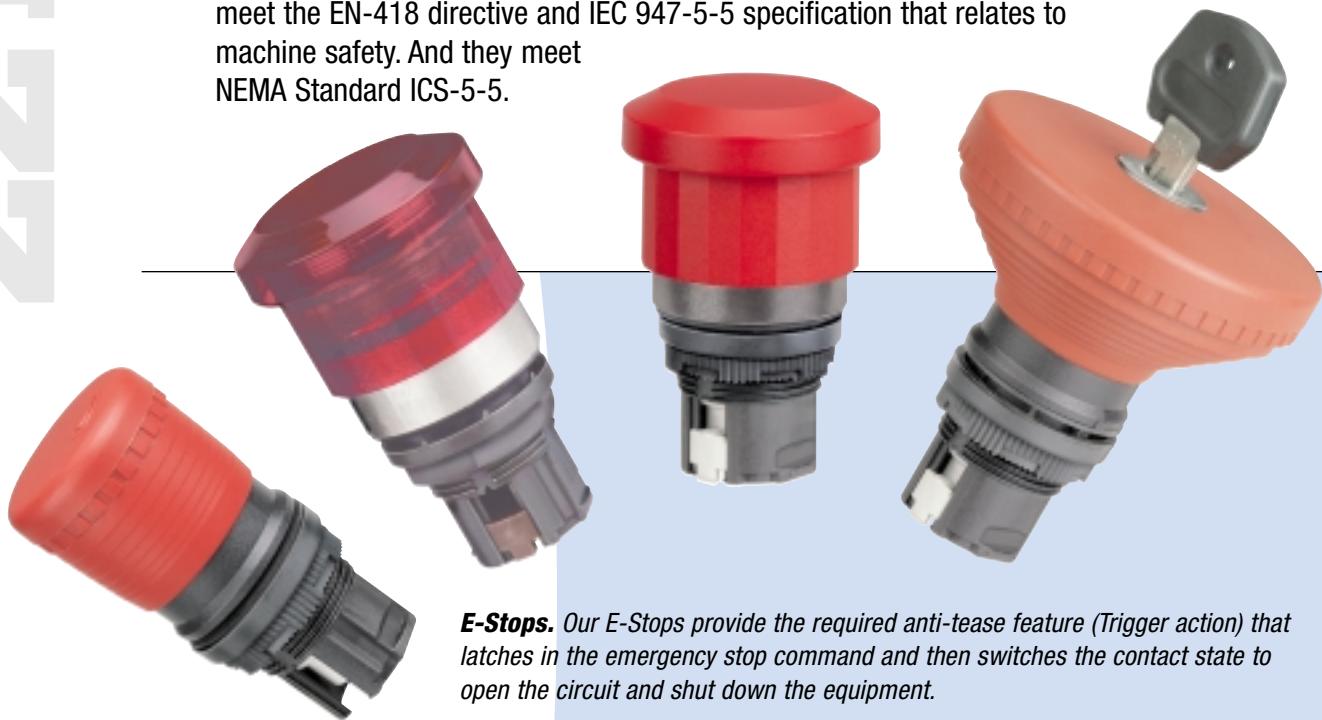

Accessories

- We offer the greatest selection of accessories in the market.
- The selection of security accessories ranges from guards to locking covers and locking attachments.

Emergency Stops

Reliability where it's needed the most. When activated, E-Stops will instantly cut off power to any operating equipment where an unsafe condition may have occurred. Our E-Stops and contact blocks have been tested and certified by a European Testing Agency to meet the EN-418 directive and IEC 947-5-5 specification that relates to machine safety. And they meet NEMA Standard ICS-5-5.

E-Stops. Our E-Stops provide the required anti-tease feature (Trigger action) that latches in the emergency stop command and then switches the contact state to open the circuit and shut down the equipment.

Product Overview

800EP/EQ/ES Plastic Operators

- NEMA Type 4/13, NEMA Type 4/4X/13, IP65/66
- 2-, 3-, and 4-across mountability
- Engineered grade thermoplastics
- Corrosion-resistant for harsh environments
- Black plastic bezel (800EP/EQ)
- Optional clear anodized shiny metal bezel (800ES)

800EP Round Operators —
Plastic Bushing with Black Plastic Bezel

800EQ Square Operators —
Plastic Bushing with Black Plastic Bezel

800ES Round Operators —
Plastic Bushing with Shiny Metal Bezel

800EM/EB Metal Operators

- NEMA Type 4/13, IP65/66
- 2-, 3-, and 4-across mountability
- Die cast metal construction
- Corrosion-resistant chromate plating
- Clear anodized shiny metal bezel (800EM)
- Optional black anodized metal bezel (800EB)

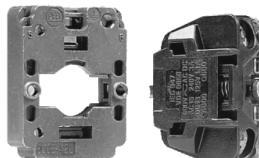

800EM Round Operators —
Metal Die Cast Bushing with Shiny Metal Bezel

800EB Round Operators —
Metal Die Cast Bushing with Black Anodized Metal Bezel

2-Across x 3-Deep (6 Circuits)

- Heavy-Duty
- Zinc die cast latch
- Screw down stackable contact blocks
- One hand latch removal
- Color-coded contact blocks for contact identification

2-Across Mounting Latch

3-Across x 2-Deep (6 Circuits)

① Trigger action operators are compliant with EN418 Standards and can be used with standard N.C contact blocks.

② 40 mm plastic or metal color caps (Codes **MP** and **MMP** under Operator Type) available with 800ES and 800EM operators.

③ To be compliant with EN418 standards, N.C.L.B contacts must be used.

BP	10 per package

① Selecting option 9 (no knob) is only valid when ordering option S (standard knob).

② Operators with an overlapping cam allow selector switch contacts to make before the contacts of the previous position break. The overlap will occur in both directions.

③ Overlapping cams are not valid with spring return operator functions.

2-Across Mounting Latch**3-Across Mounting Latch****Back-of-Panel Components, Non-illuminated Operators**

See page 24 for back-of-panel components configurator tables.

Note: To order 4-across back-of-panel components, see page 103.

- ① 30 mm hole spacing will not work if a knob lever is used. See page 123 for recommended operator panel spacing.
- ② Selecting option 9 (no knob) is only valid when ordering option LS (standard knob).
- ③ Option DL5 does not have a shunting resistor when used with an LED. Option DL6 has a shunting resistor for LEDs and can be used for 120V DC applications.
- ④ 120V resistor module available in 2-across and 4-across mounting only.

- ⑤ Available in 3-across mounting only.

- ⑥ Refer to page 114 for LED selection.

- ⑦ Available in 6V, 24V and 120V AC/DC only.

- ⑧ If contact blocks on both sides of the latch are required, full voltage module must be used.

- ⑨ Patented PenTUFF contacts supplied only with 2-across mounting; gold-plated contacts supplied only with 3-across mounting.

① To achieve IP66 NEMA Type 4, add protective boot accessory Cat. No. 800E-AUB2 or 800E-AUB3.

② Position 1 of the latch (left position when viewed from the back) corresponds to position **C** of the operator. Position **2** of the latch (right position when viewed from the back) corresponds to position **A** of the operator. Position **3** of the latch (center position when viewed from the back) is reserved for the power module.

③ Option **DL5** does not have a shunting resistor when used with an LED. Option **DL6** has a shunting resistor for LEDs and can be used for 120V DC applications.

④ Available in 3-across mounting only.

⑤ Refer to page 114 for LED selection.

⑥ Available in 6V, 24V and 120V AC/DC only.

⑦ Supplied with gold-plated contacts.

Maximum power	2 W with max. wiper current of 200 mA
Rotational torque	14 in.-oz
Stopping torque	7 in.-lbs

Composite Cat. Nos.
Ordering Information

You can order Bulletin 800E operators with power modules and/or contact blocks shipped in one package. Operators, power modules, and/or contact blocks are shipped in one package, unassembled. To order, use a composite cat. no. Select appropriate operator from this publication and add desired code(s) as shown below.

For cat. no. combinations not shown, consult your local Allen-Bradley distributor.

Example Composite Cat. Nos.

To order a plastic, flush, green, non-illuminated push button with 2 single circuit N.O. 3-across contacts:

800EP-F3 + 3LX20 = 800EP-F33LX20

Operator from page 27.

Code from table above.

To order a metal, amber, extended head push button with a 24V full voltage module and 1 N.C. 2-across contact:

800EM-LE5 + 2DL3 + X01 = 800EM-LE52DL3X01

Operator from page 39.

Code from table above.

22.5 mm Push Buttons

Complete Units — Round Operator with Latch and Contact Blocks

① Use square legends for base mounting only, **Cat. No. 800E-19AE100**.

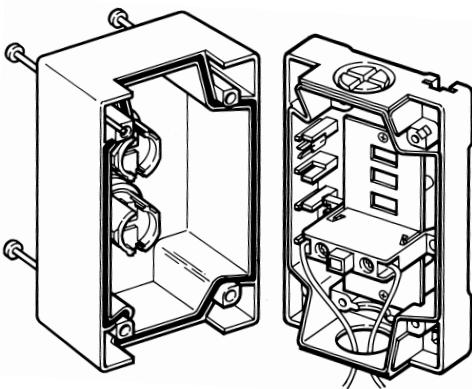

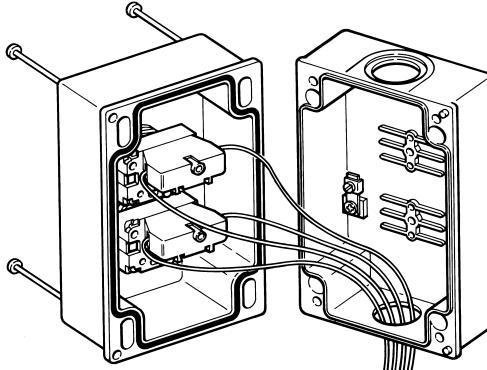

② Legend plates will not function with base mounted contact blocks; use two-color molded legend cap operators.

③ 4-across contact blocks, or power modules, cannot be installed in these enclosures.

④ When legend plates are specified, the enclosure must be mounted horizontally and latch mounted contact blocks must be used.

⑤ 2-across transformer modules, or two levels of 2-across contact blocks, cannot be installed in these enclosures.

⑥ Do not install base mount contact blocks in center position when using non-illuminated push buttons.

Base Mounting Only**Latch Mounting or Base Mounting with Adapter, Cat. No. 800E-A3BA**

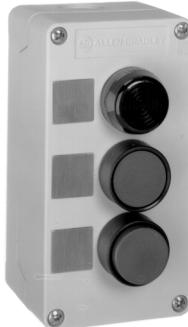

Accessories — Page 100

Legend Plates — Page 115

Approximate Dimensions — Page 127

Complete Assembled Stations

- Uses 800E 22 mm push button operators.
- Base-mounted 3-across contact blocks and power modules designed to be finger-safe — IP2X rated to meet global standards.
- Horizontal or vertical mounted assembled stations.
- Ratings — Type 4/4X, 12, and 13, and IP66 for plastic enclosures and 800EP operators. CE marked.

- ① Selector Switches in a vertical mount enclosure will be mounted with a horizontal orientation.
- ② Legended color cap options A through L from Table d can only be used with Operator Type options A, B, and C from Table c.
- ③ Operator Types N and P from Table c must choose Color/Text option X from Table d.
- ④ Legend Frame provided is 800E-120; legend insert needs to be ordered separately.
- ⑤ Enclosure Style/Legend options G and H from Table b can only select one operator from Table c. Valid options are K, L, M, and T. Also see Note 4.
- ⑥ This is an 8-in/4-out device. 2-in and 1-out are assigned to each hole position in the enclosure. If a 2-hole enclosure is selected, 4-in and 2-out are assigned internally and up to 4 unassigned I/O points can be assigned to external connectors. This device contains up to two physical external I/O connectors. The “+” symbol in the Description field of Table e indicates that two external connectors exist. If an E-Stop connector is used, 2 unassigned I/O points can be assigned to the other connector.
- ⑦ External I/O Versions F, L, M, Q, T, and U receive only one contact block for the external E-Stop string. These connectors are rated to 3 A. If more than 3 A of current is needed or if there are two E-Stop strings, use External I/O Versions G, N, P, R, V, and W. These versions receive two contact blocks. This allows for 6 A of switching or for two E-Stop strings.
- ⑧ Operator Types K, L, M, and T from Table c may be used as E-Stops. To be valid as an E-Stop, the operators must use Color/Text option 4 from Table d and it must be placed in the last hole position in the enclosure. An E-Stop connector also must be chosen from Table e. Also see Note 8.
- ⑨ Operator Types K, L, and T from Table c only available in red - Color/Text Option 4 from Table d.

Accessories**2-Across Back-of-Panel Components**

	Description	Cat. No.
	2-Across Mounting Latch These are zinc-plated, metal die cast mounting latches. Sold only in multiples of 10. Order (quantity of) 10 to receive one package of 10 pieces.	800E-A2L
	Sold only in multiples of 50. Order (quantity of) 50 to receive one package of 50 pieces.	800E-A2L-BP
	Dove Tail Interlock Provides an extra level of stability by interlocking common levels of contact blocks and/or power modules. Sold only in multiples of 100. Order (quantity of) 100 to receive one package of 100 pieces.	800E-A2DT
	Lamp Socket Assembly Sold only in multiples of 10. Order (quantity of) 10 to receive package of 10 pieces.	800E-ABS2
	Ground Screws These are self-tapping #6-32 (M3.5) green ground screws for metal latches. Sold only in multiples of 10. Order (quantity of) 10 to receive one package of 10 pieces.	800E-AGS1

Special Fonts

When ordering special font sizes for standard text or ordering special engravings, do not exceed the maximum letters and lines listed in the table below.

Type of Legend Plate						
One-Piece			Two-Piece			
Font Size	Maximum Characters per Line	Maximum Number of Lines ①		Maximum Characters per Line	Maximum Number of Lines ①	
		30 x 40	30 x 50		30 x 40	30 x 50
Small	16	2	5	15	2	5
Standard	14	2	3	13	1	3
Large	10	1	3	9	1	3

① Two lines are the recommended maximum to use with mushroom operator.

The standard legend texts listed on pages 117...119 are available in other font sizes. To order, select the desired legend plate with text from pages 115...119 and add the desired font code from the table below to the cat. no.

Special Font Code ②		
Font Size	Approximate Size	Font Code
Small	SAMPLE	K
Standard ③	SAMPLE	S
Large	SAMPLE	L

② A code from this table **must** be entered into the cat. no. for special engraving.

③ Character height used on standard engraving.

Special Engraving

Besides the standard text and symbols listed on pages 117...119, special legend plates are readily available.

To order:

1. Select desired legend plate without text from pages 115 and 116.
2. Add desired font code from the table above.
3. Specify desired text.

	Red with white legend text	800E-35RJ□□□
	Aluminum with black legend text	800E-35AJ□□□

Ordering Information: 1. Select cat. no. for appropriate text and legend color from table above.

2. Complete cat. no. by adding suffix number selected from table below.

Example: Cat. No. 800E-35WJ503 identifies a white, 30 x 50mm legend insert with left/right arrows engraved on it.

③ Legend button cap supplied loose for customer installation [→], [], [], [].

④ Use cap colors black, green, red, blue, and gray only.

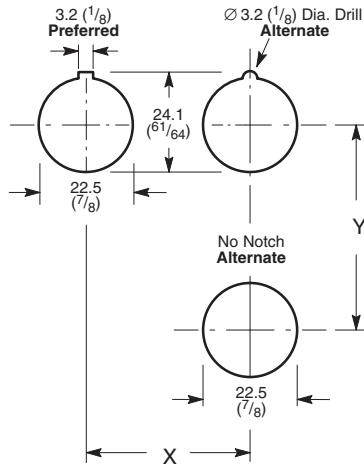

⑤ Use cap colors white or yellow only.

22.5 mm Push Buttons

IP66, Type 4/4X/13 (Plastic) — IP66, Type 4/13 (Metal)

Approximate Dimensions for Round and Square Operators

Dimensions in millimeters (inches). Dimensions are not intended to be used for manufacturing purposes.

Note: Panel thickness range 1.0...6.0 mm

(3/64...15/64"). Maximum panel thickness reduced when optional legend plates are used.

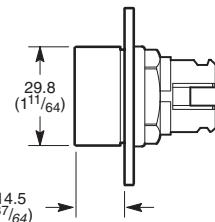

Panel Hole Spacing (Minimum)			
Operator	Legend Plate Used	X	Y
Standard with single circuit contact	None/30x40 mm legend plate ①	30 (1-3/16)	40 (1-37/64)
	30x50 mm legend plate	30 (1-3/16)	50 (1-31/32)
Standard with double circuit contact	Any	30 (1-3/16)	50 (1-31/32)
	40 mm push-pull/T-T-R, mushroom/mushroom with single circuit contact ②	40 (1-37/64)	40 (1-37/64)
40 mm push-pull/T-T-R, mushroom/mushroom key release w/double circuit contact ②	30x50 mm legend plate	40 (1-37/64)	50 (1-31/32)
	Any	40 (1-37/64)	50 (1-31/32)
Knob lever selector switch with single circuit contact	None/30x40 mm legend plate ①	48 (1-57/64)	40 (1-37/64)
	30x50 mm legend plate	48 (1-57/64)	50 (1-31/32)
Knob lever selector switch with double circuit contact	Any	48 (1-57/64)	50 (1-31/32)
	60 mm round legend plate	60 (2-3/8)	60 (2-3/8)
Any	90 mm round legend plate	90 (3-9/16)	90 (3-9/16)

① If a 3X latch is used a 30 x 50 mm minimum spacing is required.

② If a 60 mm operator is used a 60 x 60 mm minimum spacing is required.

Note:

EC Declaration of Conformity

The undersigned, representing the following supplier
and the authorized representative established within the
Community,
Rockwell Automation, subsidiary of
Rockwell International GmbH
Dinslakener Str. 15
D-42781 Haan Germany

herein declare that the Products

IEC 22.5 mm Push Buttons

Product identification (Brand and
catalogue number/part number):

Allen-Bradley 800E
(reference the attached list of catalogue numbers)

are in conformity with the provisions of the following EC Directive(s) when installed as accordance with the
instructions herewith contained in the product documentation:

73/23/EEC*

Low Voltage Directive as amended by 92/68/EEC

and that the standards and/or technical specifications referenced below have been applied:
(See the attached list for the applicable standards)

EN 60947-5-1 : 1997
Low voltage switchgear and controlgear - Part 5: Control circuit devices and
switching elements - Section 1: Electromechanical control circuit devices
EN 418: 1994
Safety of Machinery - Emergency stop equipment, functional aspects -
Principles for Design
EN 60947-5-5: 1997
