SENT VIA EMAIL

This letter is the National Nuclear Security Administration's (NNSA) final response to your January 10, 2021, Freedom of Information Act (FOIA) request for a copy of the following:

“A copy of the FOIA Case Log for the NNSA for each of the calendar years 2016 through 2020. I would expect the FOIA Case Log to include the subject/topic of the records being requested, since it is included in the log. This request is not for any commercial purpose.”

Your request was received in this office on January 11, 2021.

The NNSA FOIA office conducted a search of the FOIAExpress database for responsive records. The search yielded one responsive document titled, “Requests Report 01-01-2016 to 12-31-2020” (168 pages). The document is being provided to you with deletions pursuant to 5 USC § 552(b)(6) (Exemption 6 of the FOIA). See justification below.

Exemption 6 permits the withholding of “personnel and medical files and similar files” when the disclosure of such information “would constitute a clearly unwarranted invasion of personal privacy.” The purpose of Exemption 6 is to protect individuals from the injury and embarrassment that can result from the unnecessary disclosure of personal information. To determine whether disclosure would constitute a clearly unwarranted invasion of personal privacy, the public interest in disclosure, if any, must be balanced against the privacy interests that would be invaded by disclosure of the information. In this case, the personal information of contractor employees has been withheld. Release of this information pertaining to those contractor employees will cause inevitable harassment and unwarranted invasion of personal privacy for those individuals and could cause unwarranted scrutiny by persons or entities harboring political or philosophical or other objections to the mission related to reactors and nuclear material. In addition, release of this information would not shed light on the operations of the federal government. Since its release will not reveal anything of significance to the public, the interest in protecting against the invasion of privacy that would result to the individuals in question far outweighs the public interest in such disclosure.

It is widely held that federal employees have no expectation of privacy regarding their names, titles, and duty stations. See 5 CFR § 293.311; Core v. United States Postal Serv., 730 F.2d 946, 948 (4th Cir. 1984); National W. Life Ins. Co. v. United States, 512 F. Supp. 454, 461 (N.D. Tex. 1980). Therefore, the disclosure of such information about federal employees would involve little or no invasion of privacy. Contractor employees and community members, however, are not federal employees. Rather, they are private individuals. The Supreme Court has long found a privacy interest in the personal information of private individuals significant enough to warrant protection from disclosure under Exemption 6.

The Department of Energy (DOE) regulations 10 CFR § 1004.1 provide that documents exempt from mandatory disclosure under the FOIA shall be released regardless of their exempt status, unless DOE determines that disclosure is contrary to public interest. For the reasons described above, NNSA has determined that release of the information described above is not in the public interest.

Pursuant to 10 CFR § 1004.7(b)(2), I am the individual responsible for the withholding of information pursuant to Exemption 6 of the FOIA.

You may appeal our decision to withhold information pursuant to 10 CFR § 1004.8(a). Such an appeal must be made in writing within 90 calendar days after receipt of this letter, addressed to the Director, Office of Hearings and Appeals, HG-1, U.S. Department of Energy, 1000 Independence Avenue SW, L'Enfant building, Washington, DC 20585. Your appeal must contain a concise statement of the grounds for the appeal and a description of the relief sought. Please submit a copy of this letter with the appeal. Please clearly mark both the envelope and the letter "Freedom of Information Appeal." You may also submit your appeal by email (preferred method) to OHA.filings@hq.doe.gov, including the phrase "Freedom of Information Appeal" in the subject line. Thereafter, judicial review will be available to you in the District of Columbia or in the district where (1) you reside, (2) you have your principal place of business, or (3) the Department's records are situated.

You may also contact me, NNSA's FOIA Public Liaison, Office of the General Counsel, at 1-866-747-5994, or by mail to Department of Energy, National Nuclear Security Administration, Office of the General Counsel, PO Box 5400, Albuquerque, NM 87185, for further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at (202) 741-5770; toll free at 1-877-684-6448; or facsimile at (202) 741-5769.

There are no fees chargeable to you for the processing of this request. If you have questions, please contact Ms. Kristen Duran by e-mail at Kristen.Duran@nnsa.doe.gov or write to the address at the top of the first page. Please reference Control Number FOIA 21-00085-KD.

Requests Received between 01/01/2016 and 12/31/2020

Request ID	Received Date	Requester Name	Organization	Request Description
FOIA 21-00078-M	12/28/2020	Ravnitzky, Michael	-	A copy of each CITATION in LANL internal files and/or in the LANL records managed by Triad National Security, SI-RMS, (all years) resulting from a search for report titles or keywords containing any of the following words: ANOMALY or ANOMALOUS or ANOMALIES or UNEXPLAINED or INEXPLICABLE or MYSTERIOUS. Please search all years. I do not anticipate that this will result in voluminous records.
FOIA 21-00077-AG	12/22/2020	Freels, Paul	Ridenour and Ridenour	Medical Records, Personnel Security File, Personnel Records, and Radiation Exposure Records
FOIA 21-00076-KD	12/22/2020	Graham, Delores	-	Medical Records, Personnel Records, X-Ray Reports, Radiation Exposure Reports, Occupational and Industrial Records
FOIA 21-00075-NC	12/22/2020	Marritz, Ilya	New York Public Radio	New York Public Radio seeks a copy of forms SF-50 (Notification of Personnel Action) and SF-52 (Request for Personnel Action) for the position of Foreign Affairs Specialist, Department of Energy, in the following locations: Riyadh, Saudi Arabia, Brussels, Belgium (Mission to the European Union), Kyiv, Ukraine, Athens, Greece, and Warsaw, Poland. I am seeking these records for the current incumbents of these positions, including any that are pending (if applicable.)
FOIA 21-00074-DD	12/21/2020	Greenewald, John	The Black Vault	Request a listing of all videos uploaded to your agency's YouTube channel, but are marked as UNLISTED or PRIVATE. If such a list does not exist, and your agency will not create one to fulfill this request, I will agree to accept a printout of the YouTube's content channel page, listing only those videos shown as UNLISTED or PRIVATE (this is easily shown using the "filter" button at the top of the video listings). I believe this would be an agency record, as the video uploads and listings were created by your agency; are under control of your agency (can add and delete at will) and they are used by your agency for the work of your agency. Therefore, if no list exists, I believe this printout should be subject to the FOIA.
FOIA 21-00073-AG	12/21/2020	Capriglione, Salvatore	-	Any emails sent from, or received by, Adm. James F. Caldwell, Deputy Administrator for Office of Naval Reactors, Department of Energy between 1 August 2020 and 20 December 2020; where my name is in the body of the email or in the subject line of the email (Salvatore Capriglione, Salvatore R. Capriglione, or LTJG Capriglione) Also, any emails sent from, or received by, Adm. James F. Caldwell, Deputy Administrator for Office of Naval Reactors, Department of Energy, concerning a potential decision to disenroll me from the NNPTC. Also, any records, emails, or correspondence, held by Department of Energy as it pertains to my performance in the Naval Nuclear Power Training Command
FOIA 21-00072-M	12/18/2020	Marritz, Ilya	New York Public Radio	A copy of the current Overseas Personnel Advisory Board (OPAB)

FOIA 21-00071-NC	12/17/2020	Porto, Anthony	-	<p>My wife, Catherine E. Porto has been working to complete a memoir on my father, Anthony Libro Porto (deceased). Anthony L. Porto worked for GMX-3 Division at LANL from 1956-1981. We are seeking permission to include the following information, found in A. L. Porto's HR records. In addition, we wish to include a copy of a photo taken around 1976, in the book that we plan to publish: Information about A. L. Porto's work at LANL that we would like to include in Anthony's memoir, specifically reads: Human resource files give us some indication of the work Tony performed at LASL, GMX-3. As a mechanical engineer staff member, he wrote specification documents for HE (high explosive) manufacture and final assembly, guided, and approved the design of tooling, gauging, and assembly fixtures, and coordinated and approved process documents. Anthony L. Porto was responsible for production as a liaison at Bendix and Rocky Flats, two other national research laboratories, for many years, working as a high explosives plant liaison engineer. Human resources files revealed some of the projects Anthony worked on during his career as a mechanical engineer at LASL. One such project was work on the W76. The W76 is a United States thermonuclear warhead, designed for use on the UGM-96 Trident, sea-launched ballistic missiles. As a member of the W76 production subcommittee, Tony was present at LASL when the United States Navy recognized the GMX-3 Division for their contributions and partnership with the U.S. Navy on the W76 project. NOTE: The W76 information description was taken directly from google, not LASL records. I possess a picture of Anthony Porto, along with co-worker, Fred Kramer, the Lab's program manager, Richard B (Dick) Olwin and U.S. Navy Commander Homer Nakayama of the Navy's Fleet Ballistic Missile (PFM) Office. I am seeking permission to use this picture in the memoir/book. We think the picture was taken at a ceremony at LANL around 1976. We are requesting a search for the picture and seeking permission to publish the picture. Appreciate your assistance and permission to include the information above along with the picture in Anthony Libro Porto's memoir.</p>

FOIA 21-00069-R	12/15/2020	Nazzise, Janine	-	<p>Any and all communication about me (Janine Nazzise) to or from any individual via email, and / or text, call on company phones or any other recorded media from the following individuals; Mark Bayless (b) (6) @lanl.gov, Tracey Speyre (b) (6) @lanl.gov, John Elliott (b) (6) @lanl.gov, Russel Stone (b) (6) @lanl.com. I don't have the employer provided phone numbers of all of these individuals, I'm sure LANL can provide this. From 4/1/2018 to 10/1/2019</p>
FOIA 21-00068-DD	12/14/2020	Wright, Kevin	Independent researcher	<p>I am trying to find details of remote sensor equipment air dropped by CIA owned U-2s on the Chinese Lop Nor nuclear testing grounds on 7 May 1967, with a follow up mission on 31st August 1967 and then later C-130 missions to air drop another remote sensor on the same testing ground at a later date. The only details I have of the equipment dropped is that they were designed and built by Sandia Labs or general reference to 'Los Alamos.' I have more information about the missions flown to drop the equipment: Mission C167C launched from Takhli on 7 May 1967 using U-2 Art. 383. Flown by Nationalist pilot 'Spike' Chuang. The brief equipment description I have assembled is that: 'The U-2s normal photographic payload removed, replaced with an extra fuel tank installed in the Q-Bay (although the tracker camera was retained). Two underwing remote sensors, developed by the Sandia Laboratories in conjunction with the CIA, were mounted underwing for the flight to Lop Nor and described as 'Rock Radar'. They were jettisoned over the testing grounds, released within 60 seconds of each other at some point between way points G to I. The payload nose was intended to pierce the desert surface and solar panel 'petals' deployed to power the sensors and transmit unspecified data. Chang omitted way points D going out and M coming back.' C287C on 31 August 1967, flown by Hsieh 'Bill' Chang and used Art 383 again. This time his payload was a trailing-wire antenna to ascertain if the 'spikes' were working. I have numerous CIA documents that refer to the flight, including detailed route, that I can supply, but I don't think any of them will help in locating documents concerning the payload.</p>

FOIA 20-00226-K	8/26/2020	Trail, Wayne	-	My father, Carroll Clark Trail, as an enlisted soldier was in Army Operation Crossroads in July of 1946 detonating the nuclear bombs at the Bikini islands. I have his discharge papers which indicate that. I am looking for any more details I can get, such as which boat he was on; we believe it was either the USS Cumberland Sound or the USS Albemarle. He ended up being strongly influenced by that experience and became a nuclear physicist as a career. We would love to know which scientists were on that mission as well. Maybe a list of the people on the boats, or at least on his boat. Prior to that mission he was a guard at Los Alamos National labs. He said he was a guard at the lab where the famous Louis Slotin accident happened on 21 Aug. of 1945 (He was not on duty at the time of the accident.) I am wondering if you can confirm this.

The report we seek is probably numbered ORI-CA-2020-008 and entitled, "Causal Analysis For TA-55 Glove Breach and Pu-238 Dose Event of June 2020." This report details what happened at Los Alamos National Laboratory (LANL) Technical Area 55, Plutonium Facility (PF-4), in a contamination event on Monday, June 8, 2020. This event was reported by the Defense Nuclear Facilities Safety Board (DNFSB) in their LANL weekly staff reports. A glovebox operator was weighing and packaging plutonium-238 oxide powder when he pulled out of the glovebox gloves and received significant contamination. This caused airborne radioactivity and contamination in the room which exposed an additional fourteen workers who were also in the room.

FOIA 20-00179-EW	6/22/2020	Aftergood, Steven	Federation of American Scientists	We request a copy of a 2011 NNSA report to Congress on Nuclear Test Readiness. The requested report was referenced in the FY2020 Stockpile Stewardship and Management Plan on page 3-26: "Finally, the test readiness strategy is to reconstitute underground testing elements when needed, rather than maintaining obsolete facilities and capabilities. Additional details that remain valid can be found in the 2011 Nuclear Test Readiness Report to Congress, Appendix B. This report is largely based on a 2006 study, which for key skills noted that significant retirements had occurred in key positions."

FOIA 20-00178-KD	6/18/2020	Turse, Nick	-	I request your FOIA logs from January 1, 2019 to the date that this request is perfected. I request you search all electronic and paper-based records systems and databases for these materials and provide any/all of these records in electronic format if possible. I also request a cross-reference search. I specifically request that you include so-called "non-responsive" material per the Court of Appeals for the District of Columbia Circuit in American Immigration Lawyers Association v. EOIR, 830 F.3d 667 (D.C.Cir. 2016) which found that FOIA "does not provide for . . . redacting non-exempt information within responsive records." As declared by the court, "once an agency identifies a record it deems responsive to a FOIA request, the statute compels disclosure of the responsive record—i.e., as a unit—except insofar as the agency may redact information falling within a statutory exemption." Also, under "FOIA Improvement Act of 2016" "each agency, in accordance with published rules, shall make available for public inspection in an electronic format ... copies of all records, regardless of form or format ... that have been requested 3 or more times." This clause is within (a)(2), which has no provision whatsoever for fees. The statute explicitly says "requested", not "provided." If my request is rejected, I will file two additional requests so that it will meet the requirements of the statute.

A letter from the Lawrence Radiation Laboratory to the Coors Porcelain Company, dated September 27, 1960, memorializing the understandings of the parties to Subcontract No. 165, which included the understanding that the Coors Porcelain Company would need about 20,000 kilograms of BeO. 4. Subcontract No. 256 to Contract W-7405-eng-48, between the Regents of the University of California and the Coors Porcelain Company, which was executed on September 25, 1963. 5. The Coors Porcelain Company's "Final Progress Report for Research and Development Program" under the Pluto Project covering the period October 1, 1963 through June 30, 1964. Among other things, this report described the arrival of government-owned BeO at the Coors Porcelain Company from Brush Wellman, Inc. in powder form. 6. An August 7, 1986 Rocky Flats Plant Report entitled "Pluto Program Overview, Fuel Element Fabrication for Tory 11-C Reactor," tracing the history of the Coors Porcelain Company entering into Subcontract No. 165 on September 9, 1960 to fabricate 756,000 fuel elements (4.5-inch long hexagonal tubes) for this AEC program, and an extension known as Subcontract No. 256. 7. An April 5, 1965 letter from the Argonne National Laboratory to the Coors Porcelain Company that requested a quote for the fabrication of six nuclear fuel specimens. 8. Contract or Memorandum of Understanding between Coors Porcelain and the Rocky Flats plant to provide personnel and/or equipment during the Decontamination and Demolition era which began approximately in 1992.

FOIA 17-00143-K	6/20/2017	McCoy, David	Citizen Action New Mexico	This request is pertaining to disposal of radioactive and hazardous waste of Sandia National Laboratories' (SNL) and the SNL Mixed Waste Landfill (MWL). 1. a. Provide documents regarding the "packages containing metallic sodium" 1. Include all memoranda, email, letters, notes or other documents of personnel from DOE/AL and Environmental Protection, b6, and Hazardous Waste Management regarding the disposal of the packages of metallic sodium. 2. Provide documents describing what the "PBE" experiments and other experiments that used metallic sodium were. Explain the meaning of "PBE" and the acronyms for any other experiments. 3. Provide documents about the facilities where the packages containing metallic sodium were assembled or produced, what else was contained in the packages, and the purpose of the metallic sodium used in the various packages. 4. Provide documents identifying each experiment that contained metallic sodium that was disassembled or not disassembled. 5. Provide documents that show the pathways for the disposal of each experimental package that was with or without metallic sodium. 6. Provide documents that show any process that was available at SNL to remove metallic sodium from "packages" after the use of the metallic sodium in experiments. 7. Provide documents that describe the composition of the "packages" of metallic sodium that were disposed of in the MWL from the experiments either previous or subsequent to 1984. Provide photos of the "packages" 8. Provide documents describing the containment material used for the packages of metallic sodium. Provide photos or written description of the containment, canisters, cans (or other terminology used) for the metallic sodium packages before and after their use. 9. Provide documents for the number of primary and secondary canisters, made in TA-V or obtained elsewhere, used for the severe accident nuclear reactor meltdown experiments, and the disposal record for each canister. 10. Provide documents regarding the dates of burial of metallic sodium at the MWL or other location at SNL. 11. Provide documents about any other chemical or radionuclide material that was in the packages of metallic sodium in addition to the metallic sodium. 12. Provide documents as to the location of all metallic sodium packages disposed of by burial at MWL in pits and in trenches. 13. Provide documents as to the volume of metallic sodium in each package buried in the MWL or elsewhere at SNL. 14. Provide documents about any packages of metallic sodium that were excavated subsequent to their burial and where and how those packages were excavated and disposed. 15. Include information as to the disposition of packages or metallic sodium that were not disposed of by burial and where and how those packages were disposed of, stored, or shipped offsite from SNL. 16. Provide documents that describe the process for disassembly of the metallic sodium and any facility where the packages of metallic sodium were disassembled. 17. Provide documents regarding the quantity of MWL disposal for metallic sodium that was used by the military and the Technical Area(s) that it came from. 18. Provide documents regarding the quantity of MWL disposal for metallic sodium from Technical Area(s0) that were non-military. ***PLEASE REFER TO THE REQUEST FOR FURTHER DESCRIPTION*****

FOIA 17-00027-R	12/1/2016	Toivanen, Henrietta	Princeton University	**Five requests aggregated into one** Requesting documents related to the following topics. (1) In the document "Restricted Data Declassification Decisions from 1946 to the Present(https://www.fas.org/sgp/othergov/doe/rdd-8.pdf . Any additional documentation on the declassification decisions in Section V (Nuclear Weapons and Related Technology), under "Radiation" on page 85. Specifically, I would like to know what enabled the declassification of those particular radiation characteristics, which agency/authority made these decisions, and what is referred to as "Nominal". Any other documentation relating to other radiation signatures and their use in verification would be welcome. (2) In the report "Joint U.S.-U.K. Report on Technical Cooperation for Arms Control" (by United States Department of Energy, National Nuclear Security Administration, Defense Nuclear Nonproliferation, Office of Nonproliferation and Arms Control, 2015) on page 24, it is mentioned that starting in 2012, the United States and the United Kingdom have been engaged in collecting a comprehensive database of its nuclear warhead and component signatures, with a potential disarmament verification purpose in mind. I would like to request documentation relating to this collaboration, relating to how it has been facilitates, what type of access has been granted for each state in each other's nuclear facilities, what measurement data has been collected, and how it has been protected in terms of classified information. (3) In the 2010 NPT Review Conference, in the document "Report of the United States of America Pursuant to Actions 5, 20, 21 of the 2010 Nuclear Non-Proliferation Treaty Review Conference Final Document" (http://www.state.gov/documents/organization/225576.pdf [1]) the United States refers to being engaged in collecting a comprehensive database of its nuclear warhead and component signatures, with a potential disarmament verification purpose in mind. I would like to request documentation related to these activities and their practical undertaking. (4) In the 2015 NPT Review Conference, in the document "Report of the United States of America Pursuant to Actions 5, 20, 21 of the 2010 Nuclear Non-Proliferation Treaty Review Conference Final Document," (http://www.un.org/en/conf/npt/2015/pdf/NPT-CONF2015-38.pdf [1]) the United States reiterated (from 2010 NPT Review Conference) that it is engaged in collecting a comprehensive database of its nuclear warhead and component signatures, with a potential disarmament verification purpose in mind. I would like to request documentation related to these efforts and their development. (5) With regard to the document "Restricted Data Declassification Decisions 1946 to the Present," (https://www.fas.org/sgp/othergov/doe/rdd-8.pdf [1]), has any of the declassification decisions been made particularly in the context of an arms control treaty whose verification provisions have required the implementation of that declassification decision?
