

What's New with RDi V9.6 (and 9.6.0.1)

Eric Simpson Rational Developer for i - Developer, Release and Install lead esimpson@ca.ibm.com

IBM

Agenda

- Why RDi
- What's New in 9.6 November 2017
 - Eclipse
 - IBM i tooling
 - Code Coverage
 - ACS Integration
 - Modernization Tools, Java Edition
- 9.6.0.1 December 2017
- Feedback and direction setting

IBM

RDi currency

Which is most recent version actively used in your shop?

- 1. Green screen only (1970-1990)
- 2. CODE/400 (1990-2000)
- 3. WDSc (2000-2009)
- 4. RD Power 7.x or 8x (2010-2012)
- 5. RDi 9.0.x (2013)
- 6. RDi 9.1.x (2014)
- 7. RDi 9.5-9.5.0.3 (2015 Sep)
- 8. RDi 9.5.1-9.5.1.2 (2016 Sep)
- 9. RDi 9.6 (2017 Nov)

11

Rational Developer for i

- Modern, Eclipse-based, development tools for IBM i
- Visual editors, outline views, content assist, hover/hyperlink, integrated language help
- Integrated file management, search, edit, compile/build, debug capabilities
- Analysis tools (application diagram, call hierarchies, type hierarchies)
- Easily debug batch, interactive, and Web applications with a common visual debugger
- Analyze code coverage of tests

© 2016, 201

- Visual DDS design tools: Screen and Report Designer
- Supports RPG, COBOL, CL, C, C++, SQL, DDS

Cognitive Systems

Where to get RDi

- Trial Nov 16 https://www.ibm.com/developerworks/downloads/r/rdi/
 - Web Install (for manual web install you need Installation Manager 1.8.7 minimum)
 - Product zips download
- Passport Advantage Nov 16
 - Product zips and activation kits
- Entitled Software Site (ESS) Nov 21
 - Product zips and activation kits
- To install Rational Developer for i at the latest level on multiple developer machines, see http://www-01.ibm.com/support/docview.wss?uid=swg21668005

Editions

- Based on Eclipse 4.6.3
- For 9.6, the editions available are:
 - RPG and COBOL Tools
 - Modernization Tools, Java Edition
- No Modernization Tools, EGL Edition for 9.6
- All editions currently bundle in IBM Data Studio 4.1.2
 - Not updated for Eclipse 4.6 so do not shell share **RDi 9.6.0.1 can install with Data Studio 4.1.3**

RDi 9.6 Platform support

- Added Mac OS 10.12
 - Dropped Mac OS 10.11.
- Linux
 - Dropped several versions.
 - Supported: Red Hat (RHEL) 7 64-bit Ubuntu 16.04 LTS 64-bit
- Windows
 - Dropped 32-bit Win 7. Dropped Win 8. Likely to drop 32-bit JDK.

– Supported:	Windows	OS	JDK
	7	64-bit	32,64
	8.1	64-bit	32,64
	10	64-bit	32,64
	Server 2016	64-bit	32,64

9.6 Eclipse 4.6.3

- Editor Close Tabs to the left/right
- PAYROLLEEE PROLE SY IBM i RSE Getting Started ✓ *EMPTY4.RPGLE EMDTV2 PDCLE Close Replace Line 25 Column 14 Close Others Close Tabs to the Left 000100 **FREE Close Tabs to the Right 000101 ctl-opt Dftactgrp(*no); 000102 Close All PROGRAM NAME - Payroll 000200 DESCRIPTION - Time reporting master file maintenance using 000300 externally described workstation processing. 000400 000500 000600 INDICATORS USED
- Print toolbar button now hidden by default
 - Customize Perspective to add it back to the toolbar

9.6 Eclipse 4.6.3

To save space in the toolbar, the perspective switcher has been changed to show only the icons of perspectives by default. You can show the text again via the context menu.

New default:

Old default:

😰 📳 Remote System Explorer 🖬 i Projects 🐵 DDS Design 🎋 Debug

Settings Transfers

When you switch your workspace you can select settings than will be transferred to the new workspace. These settings are supplied by the org.eclipse.ui.preferenceTransfer extension.

The SDK supplies transfers for:

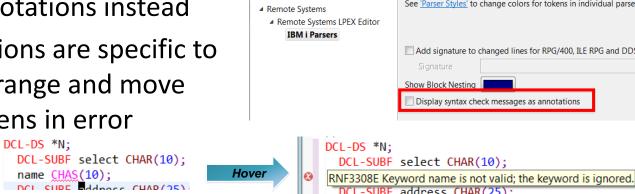

- · Workspace Layout: Opened views, their size, and selected perspectives.
- · Working Sets: The user defined working sets.

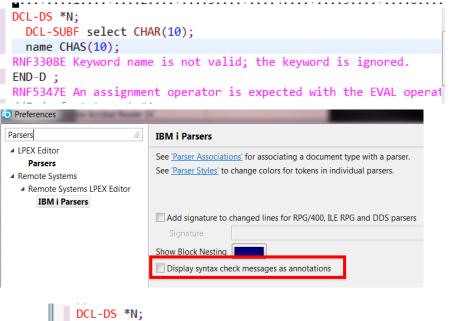

Colipse Lau	🙆 Eclipse Launcher 🛛 🔂

9.5.1 Syntax Errors as Annotations

- Syntax checker errors used to be shown a pink lines inserted into the source
- Now you can choose to show ۲ them as annotations instead
- The annotations are specific to ٠ the column range and move with the tokens in error

9.6 Compiler/Verifier Errors as Annotations

- This was requested as RFE82757 because the error location is out of date after line addition/deletions
- To configure use the Error List view menu

ds2 likeds(ds2);

end-ds:

🧕 Error List 🛛	👔 Code Coverage Results		× %	$\langle \Rightarrow \Rightarrow \rangle$	~		
					Show Se	everity	>
	Severity	Line	Location	Connec	Messag	es	>
					Automa	tically Remove	
					Automa	tically Insert	>
			Show messages as annotations		Messag	e Style	>
						DDCU-4	

 The hover will show you the all the errors and give you a link to get the language help dcl-pr functionB liked×(ds1); end-pr; dcl-ds ds1 qualifie
 RNF3308 - Keyword name is not valid; the keyword is ignored.

9.6 Unused ILE RPG variables are annotated

 If a declaration is never used, an informational annotation is given

• This behaviour can be configured on or off

	ds dsQual qualified; all char(3); b1	Global Definitions Definitions Definitions

Command Line Code Coverage

- Code coverage added to RDi in 9.1 and updated in 9.5 with significant performance boost. Covers batch, interactive, SEP.
- PTFs are now available for RDS with command-line Code Coverage tool
- Use RDi to view the results
- Enables you to include code coverage runs in your builds
- Freely available with RDS option 60 on the IBM I

IBM i	MRM	MRI
V7R3	PTF 5770WDS SI65229	2924 PTF 5770WDS SI64655
V7R2	PTF 5770WDS SI65228	2924 PTF 5770WDS SI64544

• Full details: https://www.ibm.com/developerworks/community/files/app#/file/d54ac305-6ca0-4ba8-9552-e61f6c88331b

Requirements on job environment

- Programs and service programs for instrumentation must be compiled with one of the following debug options:
 - DBGVIEW(*SOURCE)
 - DBGVIEW(*LIST)
 - DBGVIEW(*ALL)
- Command-line code coverage tools are located under the QDEVTOOLS library
 - Add it to the library list: ADDLIBLE QDEVTOOLS
- Main command: QDEVTOOLS/CODECOV

Code Coverage Mandatory Parameters

- Two parameters are mandatory:
 - Command to run: The full command line that will run in code coverage instrumentation mode
 - Use CALL command for running a program, specify program parameters using the PARM parameter:
 - CALL LIBNAME/PGMNAME PARM(...)
 - Also support customized user command:
 - MYCOMMAND MYPARM (...)
 - Command length restriction: 6000
 - At least one entry in the MODULES list
 - Include at least one program or service program for code coverage instrumentation
 - Does not have to be the main program

Code Coverage Output options

- Two parameters to control output options:
 - Output directory and Output stream file
 - They cannot be specified at the same time
 - Error message is issued if they are specified at the same time:
 - Parameters OUTDIR and OUTSTMF cannot be used at the same time
- Output directory:
 - Code coverage result file is saved to this directory.
 - Use generated name for code coverage result file
 - Generated result name format:
 - ProgramName_TimeStamp.cczip
 - The default output directory is *CURRENT.
- Output stream file:
 - Fully qualified IFS file name for code coverage result file
 - If the base name does not have extension
 - Extension .cczip is appended to the base name
 - If the base name has an extension, it must be .cczip, otherwise an error is issued:
 - The extension for the result name ... is not .cczip.

Viewing code coverage results on RDi

- Steps to view code coverage results in RDi:
 - Create a local or IFS directory and store all the *.cczip files there
 - Open the **Code Coverage Results** view using the following steps, if this view is not opened yet:
 - From the main menu, select Windows > Show View > Other...
 - Select Code Coverage > Code Coverage Results, and click OK
 - Right click inside Code Coverage Results view and select "Add Result Location..."
 - Click the "Local File System..." or "Remote Systems" button, browse to select the directory you created at step #1 that contains all the *.cczip files, click OK
 - You should see a new result location in the Code Coverage Results view
 - Expand this result location, and you will see all the results
 - Double click on a result
 - A "File Level Code Coverage Results" report is opened in the editor area
 - Expand each of the source files in the File Report to reveal the procedures under it
 - Double click on a procedure in the File Report
 - An editor session is opened for the source file and the pointer is positioned to the selected procedure
 - Now you can look at the code coverage annotation to see which lines are hit or not hit

Why ACS and which ACS

- ACS is being invested in heavily by IBM and will continue to see enhancements.
 - The emulator is best of breed
 - Lots of SQL tooling, from building/executing queries to detailed performance analysis
 - It installs and runs anywhere (using Java)
- RDi will launch the version of ACS you already have installed if it is recent enough and you have access to all its other functions

(it is free from http://www-03.ibm.com/systems/power/software/i/access/solutions.html)

• If ACS is not installed, RDi will launch a copy shipped with RDi. As of RDi 9.6, the bundled version of ACS is 1.1.7.1

9.5.0.3 Run SQL queries from the selection in your editor

- Access Client Solutions (<u>ACS</u>) now has Run SQL Support. RDi provides tight integration with it.
- Select the SQLRPGLE source in the editor
- From the Source menu
 - 'Launch Run SQL Scripts'

-110

9.5.0.3 Run SQL queries from the selection in your editor

- Launches the ACS Run SQL Statements
- Connects to the database on the system that the member was on
- Some editing my be required to replace RPG variables with literals, etc.

9.5.0.3 Run SQL queries from the selection in your editor

- However RSS does not set up the same LIBL as in RSE
- You can do this using one of the following commands:

cl:chglibl lib1 lib2 lib3; cl:call setmylibl; set schema prodlib;

1 set schema reinhard; 2 select empno,

• You also should then set the naming to *SYS

Cognitive Systems

9.6 More ACS launch menus

9.6 Improvements to new ACS shipped with RDi 9.6

• July 2017 – Version 1.1.7.1

- General enhancements:
 - Option to disable end users from accepting "trusted" signers (RFE 99153)
 - Option to enable SSL by default (RFE 100725)
 - Enable "Check for updates" from command line (RFE 96516)
 - Provide better error details (RFE 99599, RFE 105977)
- Enhancements to 5250 Emulation:
 - Screen History Archiving
 - Toolbar buttons for launching Navigator for i, Schemas, and SQL Performance Center
- Enhancements to Printer Output:
 - Combine date/time into single column with most current entry displayed first (RFE 93655)
 - Date/Time filter (RFE 99212)
 - Filter Reset button (RFE 104310)
- Enhancements to Data Transfer:
 - Automatically truncate extra columns during upload (RFE 106407)

9.6 ACS 1.1.7.1 enhancement contd

- Enhancements to Schemas:
 - Added Health Center
 - Additional filters for object folders
 - Action for checking permissions
 - Added View Entries to Journals
- Enhancements to Run SQL Scripts:
 - Added SQL Performance Monitor
 - Added headings to text type output (RFE 91120)
- Enhancements to SQL Performance Center:
 - Added Import SQL performance data
 - Support for adding SQL Performance Monitors, Plan Cache Snapshots, SQL Plan Cache Event Monitors
 - Properties for SQL Performance Monitors, Plan Cache Snapshots, and SQL Plan Cache Event Monitors
- Enhancements to Visual Explain:
 - Added icon Help text
- Several fixes

9.5.1.2 Improvements to new ACS shipped with RDi 9.5.1.2

List of ACS enhancements

- March 2017 Version 1.1.7.0
- Many actions on database objects
- Such as:
 - Manage definitions
 - Generate SQL
 - Work with properties
 - Object rename
 - Create new database object
 - Show object references
 - Index advisor (raw and condensed)
 - Explain SQL
 - Table data actions
- © 2016, 2017 IBM Corporation (view, clear, copy, initialize)

9.5.1.2 Improvements to new ACS shipped with RDi 9.5.1.2

- Enhancements to Run SQL Scripts
 - Added CL Prompter
 - Added upload results
 - Improved formatting
 - Enhanced SQL highlighting
 - Many new 'Insert from Examples' (built using SQL Services)
- January 2017 Version 1.1.6.2
- Enhancements to Printer Output filter:
 - multiple output queues
 - User-Specified Data

Modernization Tools, Java Edition

- Added WAS 9 tools, dropped WAS 7/8 tools
- Using Rational Application Developer 9.6.1 components

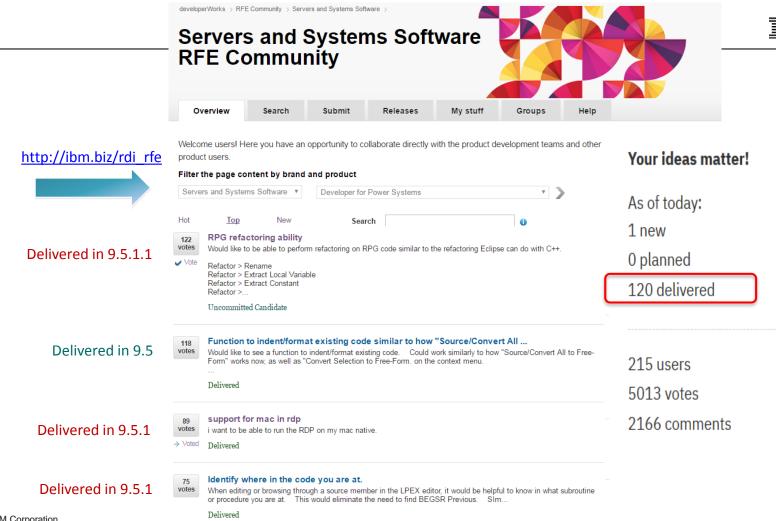

9.6.0.1 December 2017

- Available December 15, 2017
 - enable IBM Data Studio 4.1.3 to install into same package group as RDi 9.6.0.1
 - SE68489 RDI 9.5.1.2 QSYSEDITABLEREMOTESOURCEFILEMEMBER.SETCONTENTS NOT PROPERLY ADDING SOURCE PREFIX WHEN LINES EXCEED 9999
 - SE68514 In SQLRPGLE source, hovering over a variable fails after the edit view has been split into two views
 - Annotations added to the editor from the Error List now work for DDS compile messages
 - Annotations added from the Error List include the message ID in annotation messages like the pink messages do

Known issues

- SE68743 RDi 9.6.0.1 The hyperlink feature to move the cursor to a ulletreferenced declaration does not work in SQLRPGLE members
 - Work around: use 9.6.0.0
- SE68668 IBM RATIONAL DEVELOPER FOR 19.5.1.2 SNIPPET IMPORTED INTO RDI9.6 AFTER INSERT HANGS WORKBENCH
 - Work around: drag-drop snippet instead of Insert from menu. Otherwise, turn off annotations in the editor

Delivered in 9.0.1	65 votes Live Update of Content Assist In RDP 8.5, we received live outline refresh, which is great. However for me, I always associated the outline with content assist. Except the content assist does not have visibility of the live outl Delivered	IBM

RDi Fix List – RFEs delivered

http://ibm.biz/rdi_fix_list shows RFEs and APARs delivered by

release/fixpack

- 18 RFEs in RDi 9.5.1
- 7 RFEs in RDi 9.5.1.1
- 5 RFEs in RDi 9.5.1.2
- 12 RFEs in RDi 9.6

	Support for ILE RPG %PROC built-in function. For more information, see the documentation in: https://www.ibm.com
	/support/knowledgecenter/SSAE4W_9.6.0/com.ibm.etools.iseries.ilerpg.ref.doc/topics/bbproc.htm
RFE70905	Compare Doesn't Merge from RSE. The Compare tool in RSE nove enables the merge features when comparing remote members. Previously, this was only available when comparing focal members in it Projects or when comparing focal it members with their corresponding remote members in Remote Reconciler. In addition, differences like sequence nur san now be property disalpointed using the Text Compare solation in the Compare tool and will allow you to better works.
	and merge conflicts, for example, when using edit tools. NOTE: If multiple compare editors are open for the same sou members edit mode will be disabled.
RFE82757	Error list does not position to correct source line if any source lines have been added or deleted. Error List messages a
	now displayed as annotations in the editor instead of inserted as pink inline message text. Double clicking on verify o
	compile errors in the Error List view, will open the source member, insert the messages as annotations, highlight the
	error and allow you to hover over the code and click on a link to get the second level message help. If you prefer to go
	to the style where messages are inserted as text in the source, select the View Menu -> Message Style -> Show mess
	annotations (drop down arrow icon on the right hand side of the Error List view). Note: Syntax check errors are also se
	display messages as annotations by default. To turn this off, go to Window -> Preferences, then select Remote System
	Remote Systems LPEX Editor > IBM i Parsers. Uncheck 'Display syntax check messages as annotations'. Issue: Annot
	cannot be properly displayed for some DDS compile messages and should be turned off for this case. This is a known
	and will be corrected. For more information, see the documentation in:https://www.ibm.com/support/knowledgecent
	/SSAE4W_9.6.0/com.ibm.etools.iseries.rse.doc/topics/t_error_message_style.html
RFE36974	Change behaviour of TAB-key for /free lines. The Tab key will now insert spaces into free form ILE RPG source lines w
	pressed. Shift+Tab will outdent the free form line. If you select one or more free form lines and press Tab or Shift+Tab
	increase or decrease the indent respectively. To change the number of spaces used, go to Window -> Preferences, the
	select Remote Systems > Remote Systems LPEX Editor > IBM i Parsers -> ILE RPG -> Formatter. Set the value in 'Nun
	spaces to indent by'. If you prefer to go back to the behavior where Tab and Shift+Tab behave the same way on free fo
	lines as fixed form lines, go to Window -> Preferences, then select Remote Systems > Remote Systems LPEX Editor >
	Parsers -> ILE RPG -> Key Behavior. Uncheck 'Tab key inserts spaces for free form source.' Note: The 'Key Behavior'
	preference now includes all Key behavior settings previously found in the parent ILE RPG preference. Two new setting
	were added: 'Tab key inserts spaces for free form source.' for RFE36974 and 'Enter key splits line for free form source RFE25265.
RFE25265	LPEX Editor behavior when enter pressed/delete pressed. The Enter key will now split the line when Enter is pressed form ILE RPG source lines. The delete key has not been enabled to join lines, so Alt-3 should still be used to join RFE2B256 has been partially implemented and will remain open. If you prefer to do back to the original behavior for the state of the s
	Enter key, go to Window -> Preferences, then select Remote Systems > Remote Systema LPEX Editor > IBM i Parsera RPG -> Key Behavior. Uncheck 'Enter key splits line for free form source' Note: The 'Key Behavior' preference now inc
	all Key behavior settings previously found in the parent ILE RPG preference. Two new settings were added: 'Tab key in
	spaces for free form source' for RFE36974 and 'Enter key splits line for free form source' for RFE3265.
RFE74270	Show contextual warning about unused local variables. Warning annotations are now displayed in the editor for any
RFE74270	unreferenced definitions. To turn this off, go to Window -> Preferences, then select Remote System LPEX Editor > IBN
	Parsers > ILE RPG. Uncheck "Annotate unreferenced definitions". For more information, see the documentation in:
	https://www.ibm.com/support/knowledgecenter/SSAE4W_9.6.0/com.ibm.etools.iseries.rse.doc/topics/tannot_unref
RFE103832	Recognize fields renamed in RPG I-specs in RDi live outline. ILE RPG Fields that are renamed by externally-described
RFE103032	Recognize needs renamed in RFG 1-specs in RD live outline. ILE RFG Fields that are renamed by externally-described I-Specs are now fully supported.
RFE104305	RDi search should include PF38-SRC as well as PF-SRC
RFE89682	ILE RPG Display Parameters When Hovering Over External Procedure Calls
RFE77545	
	Trim Leading Spaces when joining lines (alt-J). Note: This now supports CL in addition to RPG.
RFE40701	Shortcut in Iprojects for Remote Actions - Push Selected, Compile Commands. i Project short cut key Alt+Shift+B can
	be used to launch a project build and Ctrl+Alt+R can be used from within the editor to retrieve errors from the last pro build
RFE26939	ILE RPG Named indicator should appear in the Fields section of the Outline view
RFE85666	IBM i command line tools for code coverage. PTFs are now available for IBM i 7.2 and 7.3 for RDS option 60 that provi

Future Product Goals

- Make RDi the most compelling development tool for the IBM i
- Make it seamless for SEU/PDM users to upgrade
- Attract young development talent to platform
- Improve the effectiveness of IBM i developers
 - Software Engineering Refactoring/Automated Test/Code Coverage

Conclusion

- RPG is evolving rapidly and RDi is keeping pace (SEU is not)
- Free-form RPG and RDi solves skill-depletion
- Goal to make green screen developers more comfortable and productive
- Lot's of goodies in RDi 9.6 worth upgrading
- Organization effectiveness enhanced through software best practices
- We are prioritizing investment according to your feedback via RFE

With RDi, IBM i programming is cool and productive!
