IMSA 2020 - V2 PROTOCOL ON CLOUD & ON SITE

Timekeeping Services | Race Control Solutions | TV Graphics | Digital Signalling
LED Solutions | IT Solutions | Internet Services | Mylaps Preferred Partner

V2 PROTOCOL

To facilitate the data distribution and access, Al Kamel Systems has developed the **V2 Protocol**. This software is entirely accessible via a dedicated cloud, and further features:

» Live data stream, incorporating all timing information

» Protocol feeds SBG, HH Timing, and many others

» Updated at each timing loop around the specified circuit

» Real Time Data integrated into team's own software

» Low bandwidth consumption

» Effortless resume in case of connection drop

The protocol gives teams the opportunity to work with all timing data, integrated within any teams' specific software, in real time.

The distributed data is fully compatible and easy to integrate with most of the software distributions available in the market (SBG, HH timing, etc).

Main features:

» Session details, name, duration, time remaining

» Windows layout, configurable

» Classification overall and by category

» Sectors point passings

» Pit Entry, Pit Exit and duration of the stop

» Works with Windows 7 and 10

» Synchronization with timing data, so you can connect at any time during the session and receive all the data

» Positioning screen

This cloud service is accessible from any location, allowing for key staff to access and follow the results live.

V2 cloud is the solution teams use to address the post-COVID situation. Minimizing transportation of team members and enabling them to operate remotely with equal efficiency is essential.

HOW TO CONNECT

You can connect your software client through the following host:
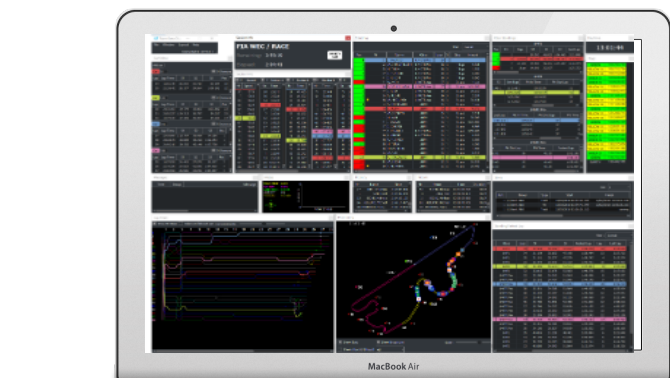

http://datapublisher.alkamelsystems.com

User, password, and port will be provided once purchasing the connection, through email, as well as all steps to connect.

HOW TO ORDER

In order to access the software, you can to purchase the connection on the Al Kamel Systems e-commerce page:

https://imsa-store.alkamelsystems.com/

- If you haven't already created an account, sign up with your professional email
- After signing up, you will receive an email with your account details, as well as a password
- You will be able to login with these details and buy the desired connection

V2 Protocol can be divided into two types of services:

- » On-Site access to V2
- » Cloud access to V2 (for users not on site)

V2 – ON SITE

~~$ 750.00 / Race~~

IMSA 30% disc.

$ 525.00 / Race

$ 5,250.00 / IWSC Season (11 events)

$ 2,100.00 / IPC Season (5 events)

$ 4,200.00 / IMPC Season (9 events)

Includes:

- » 2 connections to V2 Protocol
- » 2 TDC accesses
- » Simulator Service

V2 – ON CLOUD

~~$ 950.00 / Race~~

IMSA 30% disc.

$ 665.00 / Race

$ 6,650.00 / IWSC Season (11 events)

$ 2,660.00 / IPC Season (5 events)

$ 5,320.00 / IMPC Season (9 events)

Includes:

- » 2 connections to V2 Protocol
- » 2 TDC accesses
- » Simulator Service

We solve our clients' matters.
