VOLUME 1, ISSUE 1

FEB. 2023

Anthariksha-2022

Anthariksha-2K22 is a Technical Symposium organized by our department on 3rd December 2022. To provide a platform for students to develop technical knowledge by sharing their view in various fields and to improve their presentation skills. Sri. B.C. Nagaraj, Founder & Chairman was presided the function and Dr. M. Vinoth Kumar gave keynote speech was very helpful for our students to take further decision in their life on skill improvement

We had conducted Paper presentation, Coding, Debugging, Technical Quiz, Poster Presentation and Web Designing as Technical events. And Dumb Charades, Logo identification, Connections as Non-technical Events. 100+ students from various colleges are participated and enjoyed the program.

Anthariksha-2K22

Chairman Sri. B.C. Nagaraj facilitating Chief Guest Dr. M. Vinoth Kumar on the occasion of Anthariksha'22

Coding Club Activities

Coding club is a platform where the students will be able to develop and learn various skills like computer coding, Application development, Web development etc., The club focusing on conducting event like project expo, Technical Quiz, Technical Talk by students, Workshop, Seminar etc.,

Mr. Cheranjeevi, IV B.Tech., CSE, had given technical talk on Java programming and tips for technical interview attending

Ms. Shilpa and team organized Technical Quiz program

Students Achievements

- ⇒ Nagi Reddy from III Year CSE participated Anveshana Science & Engg. Fair organized by Agastya Foundation in partnership with Synopsys on 30th January 2023.
- ⇒ M. Sandhya and T. Ramanjaneyulu from IV B.Tech presented paper on National Symposium at Vemu Institute of Technology on 17-06-2022.
- ⇒ K. Usha Bala and A. Gayathri from IV B.Tech Participated Technical Quiz organized by Vemu Institute of Technology on 17-06-2022.
- ⇒ L. Ganesh Kumar Reddy and A. Gayathri participated in Technical Symposium organized by Aditya college of Engineering.
- ⇒ K.S. Jhanavi, K. Anitha and K. Renuka participated in Technical Symposium organized by Vemu Institute of Technology on 17-06-2022.

Alumni Corner

I am **Aleena Mary Peter, 2020** passout batch from KEC. The department provides internship programs, seminar and workshop by expertise. Our college also

provides facilities like library, lab with all required software and modern equipment and good teachers. Our department faculty members are very helpful. They always try to motivate the students and give practical knowledge I enjoy our College Annual Day Sports Day events at College. Our depart-

ment organized Technical Symposium and National Conference every year with students team. It helps us to improve our team work ability, leadership quality and presentation skill. It was a great experience to be a part of KEC.

**-Ms. Aleena Mary Peter
Software Engineer,
ATOS Syntel,**

Project Undergone

1. "CNN based Bone Fracture Detection using Radiographic Image"

Fractures are typically classified based on their location, direction and extent. Bone fractures appear as breaks or discontinuities in the bone structure on a radiographic image. The detection of bone fractures is an important task in the field of medical image analysis. In this project, we propose a method for bone fracture detection using combination of Convolution Neural Network and Support Vector Machines. This proposed method consists of two stages. In the first stage, we use a CNN to extract features from X-ray images of bones. The CNN is trained on a large dataset of X-ray images and it learns to identify features that are relevant for fracture detection. In the Second stage, we use an SVM to classify the X-ray images as either normal or fractured based on the features extracted by CNN. The SVM is trained on a smaller dataset of labeled X-ray images, and it learns to make accurate predictions based on the features extracted by the CNN.

2. "Prediction of Low Birth Weight features using deep neural network algorithm"

Low Birth Weight is the major problem for the new born. Low birth weight is a term used to describe babies who are born weighing less than 2,500 grams. Almost 40 percent of the new born suffer from underweight. Predicting birth weight before the birth of the baby is the best way to help the baby get special care as early as possible. It helps us to arrange for doctors and special facilities before the baby is born. There are several factors that affect the birth weight. Through past studies, it has been observed that the factors which affect the child birth range from biological characteristics like the baby's sex, race, age of mother and father, weight gained by the mother during pregnancy to behavioural characteristics like smoking and drinking habits of the mother, the education and living conditions of the parents. In this project wide and deep neural network model is developed using TensorFlow library in Google cloud environment.

**Unlocking endless possibilities in
Computer Science &
Engineering Education**

Vision of the Department

Strive for excellence in Computer Science and Engineering producing competent professionals with ethical values and social responsibility.

Mission of the Department

The students will be able to achieve quality education by providing Competent faculty members, Innovative teaching - learning process, Computing facilities and Skill Development Training in the field of Computer Science.

M1: Attaining academic excellence through competent faculty, innovative teaching-learning process and creating Centre of excellence in leading areas of Computer Science.

M2: To create ambiance for effective learning and skill development by promoting research culture with industry institute interaction.

M3: To inculcate professionalism adherence to ethical and social values.

Career Guidance Program

The program was organized in association with ACE Engineering Academy, Hyderabad on 21-12-2022

This program helps our students to choose right career path based on their educational and professional choices. Students are also given details of various competitive examinations and indirect benefits. Students can plan and execute any decision they make in their career.

III and II B.Tech. Students attended "Career Opportunities & Guidance" program through virtual mode on 21-12-2022

Teachers Day

Teachers Day celebrated on 05-09-2022

Engineers Day

Students participated and receiving prizes on Engineers Day celebration on 15-09-2022
