## MEDICATION MEMORANDUM

**TO: Recreation Participants, Parents, Guardians, and Staff**

**RE: Medications on Field Trips**

This memo is to clarify how medications will be handled while on recreation activities. The following is the procedure for the administration of medications:

- A. Only licensed medical personnel are given the authority to administer medication during recreation activities unless the participant can administer his/her own medication independently.
- B. The medication may be kept by the participant or with the recreation staff assigned to the activity.
- C. If the participant, while on a recreation activity, will be self-administering medication, written notification must be given to Recreation Services staff prior to that activity regarding:
  1. Name of Medication
  2. Date and time medication is to be administered
  3. Dosage and quantity of medication to be administered

Please note that Recreation Services staff must have written notification of individuals taking meds at least 24 hours prior to the activity. This policy will be strictly adhered to and participants cannot attend activities without prior notification.

Recreation will also need to know who will hold the meds, as well as, any reminders or assistance these people might need in administering their own meds.

Thank you for your cooperation in assisting us to ensure everyone's safety during these activities. Our fax number is 440-350-5135.
