STATE OF MICHIGAN

DEPARTMENT OF NATURAL RESOURCES & ENVIRONMENT

LANSING

REBECCA A. HUMPHRIES DIRECTOR

December 3, 2010

Mr. Robert J. Lewis, Director Division of Materials Safety and State Agreements Office of Federal and State Materials and Environmental Management Program United States Nuclear Regulatory Commission Washington, DC 20555-0001

Dear Mr. Lewis:

This is in response to your letter dated September 14, 2010, requesting an update on the State of Michigan's plans to enter into an Agreement with the United States Nuclear Regulatory Commission (NRC).

On July 31, 2007, Governor Jennifer M. Granholm signed a "Letter of Intent" indicating that Michigan would pursue an Agreement with the NRC. Since then, staff has worked with stakeholders and completed draft rules corresponding to Title 10 of the Code of Federal Regulations (CFR), Part 19, Notices, Instructions and Reports to Workers: Inspection and Investigations; and to 10 CFR? Part 20, Standards for Protection Against Radiation. We have also drafted statutory changes necessary for Michigan to 2009 of implement an Agreement with the NRC 2009 of 10 CFR? Part 20, Standards for Michigan to 2009 of implement an Agreement with the NRC 2009 of 10 CFR? Part 20, Standards for Michigan to 2009 of 10 CFR? Part 20

Our current implementation plan for an Agreement includes a four-year time line commencing when funding becomes available either through a statutory amendment or other avenues. The plan indicates that a complete draft application package would be formally submitted for NRC staff review about 2-1/2 years into the process. If a source of funding becomes available by March 2011, the application package would be submitted no earlier than September 2013.

In January 2011 Michigan will have a new Governor and Legislature. We are planning to brief the new department director and Governor's office staff so they can determine if Michigan becoming an Agreement State will be a priority during their administration.

While the spirit behind-the "Letter of Intent" is still alive, progress toward meeting the letter's objectives has stalled and should be considered on hold. The proposed date should be considered on hold. The proposed date should be considered as "note be determined," to worker as an accurate with the NBC. Since then, stall has worked stage, the proposed date should be considered as "note be determined," to worker as a with stake proposed date should be considered as "note of the 10 of the Code of stage, the proposed date should be considered as "note be determined," to worker as an accurate the considered as "note of the 10 of the Code of with stake proposed date should be considered as "note be determined," to worker as a more observable of the code of the stake proposed date should be considered as "note be determined," to worker as the code of the stake of the code of the stake of the
