

Dynair Condu-Plugs

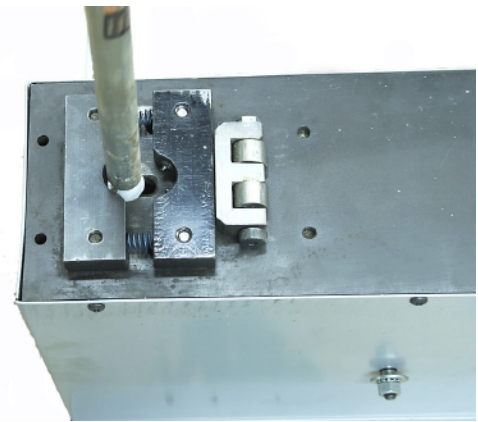

“Internal reinforcement Conduit plugs”

FEATURES AND BENEFITS

- Condu-Plugs are easy to install and offer labour savings compared to conventional reinforcement systems
- Condu-Plugs are crimped inside conduit and have been tested to hold from 1000 to 5000 lbs pressure
- Condu-Plugs come complete with outside gasketed washer to seal potential leaks

With our ConduPlugs you can cut installation time in half, allowing a single person to install conduit into ducts for internal reinforcement. ConduPlugs are "crimped" inside conduit and have been tested to hold from 1,000 to 5,000 lbs. pressure. Another unique feature is that ConduPlugs come complete with an outside gasketed washer to protect against any potential air leak.

DYNAIR CONDU-PLUGS

| Part Number | Description |
|-------------|------------------------------|
| 318762 | CONDU-PLUG 1/2" (250) |
| 318763 | CONDU-PLUG 3/4" (250) |
