VENDÉE DEPARTMENT

This year, the Vendée Globe celebrates its 10th edition, and I want to continue to make it a huge popular celebration! The public will be able to discover the village and the museum dedicated to it, admire the boats and meet the skippers.

With a maximum of 40 skippers on the starting line, it's a new record which illustrates that offshore racing is carried by the wind of success. We owe it to the men and women who set sail alone and make us dream by taking us with them to all the seas of the globe. But we also owe it to our partners and sponsors, without whom nothing would be possible.

I was keen to strengthen the environmental dimension of the race. As an internationally renowned sporting event, the Vendée Globe acts to limit its impact on the environment and to raise public awareness of the urgent need to protect the ocean and the planet.

As well as raising public awareness, particularly among our young people, of the need to preserve the ocean, which produces 50% of our oxygen needs and absorbs 25% of carbon dioxide emissions, the Vendée Globe must become a testing and research laboratory. The boats will soon be showing how it is possible to do without fossil fuels on board; they will also gradually be setting an example in terms of the materials used. They also offer immense opportunities to observe the oceans and take measurements that can be used for science. That's why we're launching the Vendée Globe Foundation.

Alain LEBOEUF,
*President of the Vendée Department,
President of SAEM Vendée*

SODEBO

The Vendée Globe is part of Sodebo's history and represents a special moment for the company, which is based in Vendée.

25 years ago, we embarked on this legendary race as a sponsor of Thomas Coville. Then, in 2004, we went on to become the event's official partner. Each edition is unique. Each edition of the Vendée Globe illustrates the incredible evolution of the world of offshore racing, which has never stopped progressing. You only have to look at the evolution of the boats to understand that, with each edition, we've entered a new era, but there's still room for everyone. What we have in common are the stories of these men and women who are embarking on an adventure that is bound to change them. At Sodebo, we have also experienced these transformations linked to the desire and audacity to innovate and perform in our sector of activity in order to respond ever better to the expectations of our consumers. Over the last 20 years, Sodebo's name recognition has increased 12-fold. So how could we not want to continue this incredible adventure for these reasons, and to support a race that highlights some incredible personalities. The 10th Vendée Globe will set off next November and we are proud to be partnering it for the sixth time in a row. The number of boats entered, the return of women skippers to the competition, the presence of several foreign skippers, the diversity of the participants, the arrival of new foilers alongside the more tried and tested boats... all point to an exceptional race. This 2024 edition will once again be a not-to-be-missed event in French and international sport. The public will be there and so will we. We look forward to seeing you on our stand so that our teams can tell you more about the company and its products. Beyond the adventure, the Vendée Globe will be a great popular, respectful, family and human celebration, which promises to set new records!

Patricia BROCHARD,
Co-President Sodebo

EDITO

LES SABLES D'OLONNE

This is Les Sables d'Olonne, home of the Vendée Globe.
This is Les Sables d'Olonne, the home of the solo round the world race.
Our mythical channel carries the ultimate dreams of great sailors and hunters of distant horizons. This is the birthplace of adventure, the legend of the Vendée Globe.

From Titouan Lamazou to Yannick Bestaven, via Michel Desjoyaux, many have sailed along our docks and met the admiring gaze of thousands of enthusiasts.
From the Golden Globe Race to the Mini Transat and the Vendée Globe, the great adventure of single-handed ocean racing is being written right here in the Vendée.

This year, we celebrate the 10th edition of the Everest of the Seas.

This year, we celebrate the heroes of the race, whose exploits reflect the courage of the people of the seas: our fishermen, our sailors, our rescuers...
Those who brave the oceans and set out to conquer new horizons.

November 10th will be a milestone in their lives.

They will go down our channel to the applause of thousands of enthusiasts.

This is Les Sables d'Olonne, home of the Vendée Globe.

We invite you to set sail and share this crazy adventure in one of the most beautiful bays in the world.

Yannick MOREAU,
Mayor of Les Sables d'Olonne

EDITO

THE PAYS DE LA LOIRE REGION

Every four years in Les Sables-d'Olonne, the start of this extraordinary adventure takes place. The Pays de la Loire region is a long-standing partner of this great popular event, which attracts sailing enthusiasts and lovers of great spectacles from the four corners of France as well as from other countries.

The huge success of the Vendée Globe demonstrates the ability to believe in the wildest bets while remaining true to strong values: audacity, courage, innovation and team spirit. The adventure is unique. With the legendary 24 Hours of Le Mans race, the hosting of events for the Olympic and Paralympic Games in 2024 and the creation this year of a new cultural event, «Ma Région Virtuouse», Pays de la Loire has resolutely become a land of major events, rich in emotion and performance, and a land of challenges.

The Pays de la Loire Region's commitment to the 2024 edition is based on both sporting and ecological challenges. Protecting the oceans and our maritime heritage, so precious to the future of our planet, is at the heart of our concerns and our actions. The beauty of our landscapes, of our rich coastline - this unique ecosystem that blends sea and land and which we must take care of - is also what makes us a great tourist destination.

The Pays de la Loire Region looks forward to meeting you and writing together a new chapter in this exceptional human and maritime adventure that is the Vendée Globe.

Christelle MORANÇAIS,
President of the Region Pays de la Loire

EDITO

EDITO

FRENCH SAILING FEDERATION

The 2024 Vendée Globe will conclude an extraordinary sailing year that will see three of the four greatest sailing events in the world take place. Indeed, alongside the Olympic Games, the America's Cup and The Ocean Race, the Vendée Globe is the 4th 'Ace' in this quartet of top events.

All the superlatives are appropriate to this event, whether they be adventure, surpassing one's limits, demanding or technical. The 2024 edition will be no exception. It promises to be exciting, both in sporting and human terms. I would like to congratulate all the skippers and their teams who are taking part in this project, as well as the sponsors who are supporting them.

The Vendée Globe is a major objective for the skippers in the IMOCA class. And in this sense, like the Olympic Games, the organisers have a responsibility and a heritage to preserve.

I would like to congratulate the SAEM Vendée teams who are working with the French Sailing Federation, the IMOCA class, the partners and the different players in their ecosystem to ensure that the event is a shared success.

See you on 10 November 2024 in Les Sables d'Olonne in the Vendée for the start of the 10th edition.

Jean-Luc DENÉCHAU,
President of the French Sailing Federation

IMOCA CLASS

As President of the IMOCA Class, it is a privilege to witness the remarkable evolution of our community. Our passion for sailing drives us to constantly push back the limits, a quest that we are successfully fulfilling. With a record fleet of 40 boats ready to take the start, the 2024 Vendée Globe is already shaping up to be a historic event.

Each IMOCA is the result of hard work and boundless creativity, reflecting the dynamic evolution of our sport. Our skippers and their teams are constantly improving, continually raising the level of their game, both in terms of their skills at sea and by integrating cutting-edge technologies. Over the last few races, the sailors have had to demonstrate an extremely high level at sea, clearly indicating that the pace of the co

The IMOCA Class is much more than a simple association of competitors; it is a veritable floating laboratory where innovation and adventure meet. The single-handed round the world race is a major challenge, with the level of competition between the boats and the solo sailors at an all-time high. The Vendée Globe is our playground for pushing back the boundaries of what is possible. The worldwide attraction of our Class motivates us to aim ever higher. This edition promises to be exceptional.

Antoine MERMOD,
President of the IMOCA Class

VENDÉE LE DÉPARTEMENT

With 250 kilometres of coastline, a wide open window onto the Atlantic Ocean and 13 ports, each with its own identity, the Vendée has many faces, not least its own distinct maritime face.

Since the beginning, the Vendée Globe has been the race of an entire département. Around the Vendée Departmental Council, the town of Les Sables d'Olonne, the SODEBO company and the Pays de la Loire Region, some thirty major Vendée companies have come together to make the Vendée the organiser of the world's greatest sailing races. The gamble paid off, as the Vendée Globe is not only a major sporting event, but is also followed in France and abroad by many enthusiasts who go far beyond those who love sailing.

2022 and now 2024 see the arrival of new complementary races, the 1st qualifier for the Vendée Globe 2024, the Vendée Arctique les Sables d'Olonne, in June 2022, and the last, the New York Vendée Les Sables d'Olonne, in June 2024. These events confirm the Vendée's reputation as a host to the world's greatest sailing races. The region comes alive around these international competitions, especially for youngsters, with the Vendée Globe Junior programme, which offers games, news and educational sheets for schoolchildren, young people and families. Each of these races is educational in nature: they introduce people to the oceans, continents, natural environments and species, and raise awareness of the need to preserve them.

vendee.fr

Our story is the story of a family full of fresh ideas.

Founded in 1973 in Saint-Georges de Montaigu in Vendée by Simone and Joseph Bougro, a couple of pork butchers and caterers, Sodebo has always been loyal to its territory. In 2000, the company passed to their three daughters: Marie-Laurence Gouraud, Bénédicte Mercier and Patricia Brochard. Since then, accompanied by teams of passionate people, they have continued to cultivate the family know-how, to create tasty meal solutions, made with love for the pleasure of all. Making good food is important. Doing it responsibly and sustainably is just as essential. And we pay attention to the smallest details to become better every day:

- We are committed to developing a healthier diet: 100% of our products display the Nutriscore, we have been reducing the number of additives since 2018, but also salt and fat since 2006.
- We are committed to reducing our environmental impact: the cartons of our products are 100% recyclable, and we have saved 63T of plastic per year by reducing the thickness of the container of our PastaBoxes*. Since 2013, we have been manufacturing our utensils in-house, and since last year our entire Salade & Compagnie range has included an eatable fork.
- We are committed to investing ever more in society: 40% of our eggs come from cage-free hens* and we are committed to meeting the Better Chicken Commitment criteria by 2026. Since 2018, Sodebo has been one of the founders of the association La Note Globale and our foundation has supported around a hundred solidarity projects a year since 2011. Keeping abreast of the times, constantly challenging ourselves, changing and evolving... that's the way we've always worked. The attention we have paid to the quality of our products for 50 years has led us to make continuous improvement our guiding principle on a daily basis. Our history is that of a family, full of fresh ideas.

2024 is a unique year for sport in our country. It's a unique year for major international events. It is the year of the Olympic and Paralympic Games, and we are proud to be hosting events and athletes here in Pays de la Loire. It's also the year of the 10th edition of the Vendée Globe, which promises to be an exciting one.

The Vendée Globe is the world's greatest sailing race and an integral part of our DNA and the identity of the Region: resolutely modern and imbued with the eternal values of daring, courage and freedom. It's only natural that the Region should be a partner in this incredible human, sporting and technological adventure.

The Vendée Globe is also

a fantastic showcase for our maritime ambitions, our know-how and our talents, and an extraordinary tool for innovation and attractiveness for our region. The start of the race from the port of Les Sables d'Olonne, where the boats parade through the channel, is a vibrant, intense spectacle that attracts huge crowds at every edition. It's an emotional moment that you have to experience once in your life. Thank you to these exceptional sailors who take on the crazy challenge of crossing the world's oceans. They inspire so many dreams, respect and heroism. Through the Vendée Globe, they do us the honour of being ambassadors for our region.

**BANQUE POPULAIRE
GRAND OUEST**

**The sea is a force that we develop every day.
Our common thread: a passion for the ocean, a love of the Grand Ouest,
and a desire to make our region ever more dynamic and attractive.**

Banque Populaire Grand Ouest

Ever since our regional leader fell in love with the sailor Francis Joyon in 1989, Banque Populaire Grand Ouest has continued to develop and strengthen its love and support for the worlds of the sea and sailing. Like our national commitment - shipowner, sponsor of the Fédération Française de Voile, partner of the Paris 2024 Olympic Games and the French Olympic sailing team - we support the region's nautical players: race partnerships, co-financing of sailing equipment for schools and clubs, and conservation of Éric Tabarly's Pen Duick.

Crédit Maritime Grand Ouest

«It's the sea that unites us» makes Crédit Maritime Grand Ouest a team player for lovers of the sea. These are the people who work, live and evolve in a predominantly maritime environment, whether they are professionals, private individuals or players in blue growth. As a key player in maritime dynamics, Crédit Maritime Grand Ouest plays a major role both in the traditional economy and in innovative sectors such as the decarbonisation of transport, marine renewable energies and marine biotech.

ULYSSE NARDIN

Ulysse Nardin is the independent and integrated Manufacture producing advanced timepieces for explorers in pursuit of freedom. Founded by Mr. Ulysse Nardin in 1846, the company owes its reputation to its links with the sea: its onboard marine chronometers are among the most award-winning and reliable ever designed.

A pioneer in innovative technologies and the use of high-tech materials such as silicium, Ulysse Nardin is one of the few integrated manufactures with the in-house expertise to produce its own high-precision components and movements. In

2001, the Maison changed the face of contemporary watchmaking by launching the first Freak.

Today, in the Swiss towns of Le Locle and La Chaux-de-Fonds, Ulysse Nardin remains devoted to its quest for watchmaking perfection in four collections: Freak, Blast, Diver and Marine.

As of 2022, Ulysse Nardin and sister Maison Girard-Perregaux have formed an independent collective of high horology Manufactures.

In June 2014, Eoliennes en mer Iles d'Yeu et de Noirmoutier was designated winner of the tender for the installation and operation of an offshore wind farm off the Vendée. EMYN is a consortium made up of Ocean Winds (a joint venture between ENGIE and EDP Renovaveis), Sumitomo Corporation, Banque des Territoires and Vendée Energie.

As we all strive to combat climate change, this project represents a tangible commitment to the success of France's energy transition, and makes its own contribution to preserving the planet.

The offshore wind farm on the islands of Yeu and Noirmoutier will comprise 62 wind turbines, each with an output of 8 MW. With a total capacity of 496 MW, the farm is expected to produce an average of 1,900 GWh per year, equivalent to the annual electricity consumption of around 800,000 people, or more than the entire population of the Vendée.

The wind farm will be located 11.7 km from Port Joinville and 16.5 km from l'Herbaudière, on a seabed varying in depth from 19 meters to 36 meters.

iles-yeu-noirmoutier.eoliennes-mer.fr

A pioneer and world leader in RIBs with more than 120 years of history, Zodiac is first and foremost a company of engineers known for developing the most stable and resistant hulls possible, capable of ensuring all sea outings whatever the conditions. Drawing on decades of expertise, Zodiac is celebrating its commitment to intrepid adventurers and lovers of the sea by supporting this prestigious event. The sailors will board their IMOCA to face the most extreme conditions of the oceans, while Zodiac will provide state-of-the-art nautical equipment to ensure safety and comfort.

Zodiac and racing are first and foremost a beautiful love story, with shared values: surpassing oneself, performance, daring and reliability... «. For us, above all, it's a way of sharing strong, unforgettable moments with a whole community of enthusiasts like ourselves», emphasises Fanny Revert-Ciavattini, Product Director at Zodiac. This partnership represents the perfect fusion between Zodiac's technical excellence and the winning spirit of the Vendée Globe skippers.

WHAT IS THE **VENDÉE** **GLOBE?**

THE MAGIC OF THE VENDÉE GLOBE

Every four years, a unique excitement grips the hearts and minds of the public in Vendée and around the world.

It's the ultimate sailing event, an extraordinary adventure that captures the collective imagination. The popular fervour that surrounds this race is an ode to daring, passion and the search for the unknown. It celebrates the tenacity and intrepid spirit of the sailors who embark on this adventure.

MORE THAN 2 OUT OF 3 FRENCH PEOPLE FOLLOWED THE PREVIOUS EDITION OF THE VENDÉE GLOBE.

In the 30,000m² village, which opens three weeks before the start of the race, more than 2 million visitors come to cheer on the sailors and enjoy the many activities for all ages. Once the race kicks off, the public follows the skippers' adventures with a combination of admiration and concern, feeling each storm as if it were their own, each victory

as a personal triumph. The social networks - which have 1 million fans - become platforms for sharing emotions, where supporters express their solidarity and encourage their favourites.

SOLO, NON-STOP AND WITHOUT ASSISTANCE

To date, the Vendée Globe is the biggest sailing race round the world, solo, Non-stop and without assistance.

The event followed in the wake of the Golden Globe which had initiated the first circumnavigation of this type via the three capes (Good Hope, Leeuwin and Horn) in 1968. Only one out of the nine pioneers who had set off in 1968 succeeded in returning to Falmouth, the major port of British Cornwall.

On 6th April 1969, after 313 days at sea, British sailor Robin Knox-Johnston finally reached his goal. Twenty years later, after having won the BOC Challenge twice (solo round the world with stopovers), navigator Philippe Jeantot introduced the idea of a new race around the world, but.. No-stop! The Vendée Globe race was born. On 26th November 1989, thirteen sailors took the start of the first edition which lasted over three months. Only seven returned to Les Sables d'Olonne. The nine editions of what is now called the Everest of the seas by the public have enabled 167 contenders to take the start of this extraordinary race. Only 89 of them managed to cross the finish line. This figure alone shows the extreme difficulty of this global event in which solo racers are confronted to freezing cold, gigantic waves and heavy skies which sweep the Great South! The Vendée Globe is first and foremost a journey beyond the seas and deep down oneself...

It has rewarded great sailors: **Titouan Lamazou in 1990, Alain Gautier in 1993, Christophe Auguin in 1997, Vincent Riou in 2005, François Gabart in 2013 and Armel Le Cléac'h in 2017, Yannick Bestaven in 2021. Armel Le Cléac'h is still the record holder of the race in 74 days. Only one sailor has won it twice: Michel Desjoyeaux, in 2001 and 2009. The 10th Vendée Globe will leave Les Sables d'Olonne on Sunday 10th November 2024.**

SOLO

THE CONCEPT OF THE VENDÉE GLOBE IS SIMPLE AND EASY TO UNDERSTAND: YOU HAVE TO SAIL AROUND THE WORLD ALONE WITHOUT STOPPING AND WITHOUT ASSISTANCE. THESE THREE PARAMETERS MAKE THE RACE WHAT IT IS BY ESTABLISHING ITS DNA. THEY ARE CLEARLY LAID OUT IN THE RACE INSTRUCTIONS.

One man or one woman, the world and a boat. It is very clear. This is a solo race and no one apart from the skipper is allowed aboard the boat during the round the world voyage (unlike in the French film, *En Solitaire* starring François Cluzet). The notable exception is, of course, when a fellow competitor is rescued and that has happened. We remember **the rescue of Kevin Escoffier by Jean Le Cam** off the Cape of Good Hope during the previous edition but it also happened in the third edition, when **Pete Goss arrived to save Raphaël Dinelli** and dropped him off in New Zealand. In 2009, **Jean Le Cam himself was rescued by Vincent Riou** after he capsized at Cape Horn.

THE ONLY PIT STOP THAT A COMPETITOR IN THE VENDÉE GLOBE IS ALLOWED INVOLVES RETURNING TO LES SABLES D'OLONNE, WITHIN TEN DAYS OF THE START.

This is what happened to Jérémie Beyou in 2020 after he hit an ofni*. That is also what Michel Desjoyeaux did in 2008: he set off again 40 hours after the start, but went on to win the race in the end. The skippers are allowed to stop – by anchoring in a creek for example, but are not allowed to step ashore beyond

the high tide mark. Yves Parlier took advantage of that possibility in a repair that became very famous in the 2000 race. Many have anchored without going ashore, like Romain Attanasio to repair his two rudders in 2016 in South Africa. Sometimes skippers simply sail close to the coast to take shelter – without actually stopping – to carry out repairs, such as LYess Burton in 2020 near the small Pacific island of Macquarie, to repair numerous masthead damages.

*unidentified floating object

NON-STOP

WITHOUT ASSISTANCE

IN THE VENDÉE GLOBE, THE SAILOR IS WELL AND TRULY ALONE. ONCE AGAIN, THE ONLY ASSISTANCE ALLOWED IS WHEN THE SAILOR RETURNS TO LES SABLES D'OLONNE, JUST AFTER THE START, MEANING HE WOULD LOSE A LOT OF TIME.

Apart from this exception, everyone has to rely on what they can do during the round the world voyage. Routing is strictly prohibited. The sailors have to find their own way around, carry out any repairs following on from damage, which is likely to happen... and they have to take care of themselves when injured or ill. In this particular case, they do have the right to seek advice from the race doctor. As for technical assistance, it's very simple: they are strictly forbidden to go alongside another boat or to allow a third party aboard. The sailors may consult the designers or their technical team to get information about how best to carry out a repair, but it is up to them alone to carry out this work with the means they have on board, while continuing to sail as best they can. Yes, the Vendée Globe is an extreme race.

AROUND THE **WORLD**

45 000 KILOMETERS, 24 300 MILES:

THIS IS THE THEORETICAL DISTANCE OF THE ROUTE.

**A REVOLUTION ACCOMPLISHED IN 74 DAYS AND 3 HOURS DURING
THE VENDÉE GLOBE 2016, WHICH IS STILL THE RECORD TO BEAT.**

This planetary voyage is firstly a climatic journey to sail down the Atlantic, cross the Indian and Pacific oceans, then sail back up the Atlantic... To be expected: a start from les Sables d'Olonne in mid-autumn, a trip in the heart of the Southern seas in full austral summer and a wintry return to Vendée. In reality, during the previous nine editions of the Vendée Globe, most competitors sometimes sailed over 28 000 miles (about 52 000 kilometers). The solo racers have to deal with the wind, waves, swell and ice. The trajectories of the boats are thus a chain of broken lines, zigzags, detours and changes in courses.

A climatic TRIO

THE VENDÉE GLOBE SOLO RACERS MUST PERMANENTLY TAMPER WITH THE WEATHER SYSTEMS. THESE ARE MADE OF ANTICYCLONES - RATHER STABLE AND MODERATELY WINDY HIGH PRESSURE ZONES - AND DEPRESSIONS, USUALLY GENERATING STRONG WINDS.

This confrontation between high and low pressures determines the strategy to adopt in each zone of the course of the Vendée Globe. The North-South trajectory to go down the Atlantic and the South-North way back up are perpendicular to the general movement of perturbations whereas crossing the Indian and Pacific in the Southern seas is done in the same direction as the weather systems. During the first phase between Les Sables d'Olonne and the cape of Good Hope, at the tip of South Africa, solo racers must sail along the anticyclone of the Açores in the North Atlantic, followed by its equivalent of Saint Helen in the austral part.

The game consists in finding the good balance: far enough from low pressure centers to avoid the strongest winds without getting stuck in the high pressures. The second phase consists in taking advantage of the weather phenomena coming from the West so as to be pushed rapidly between Good Hope and the Horn. The third phase looks like the first one with **the anticyclones of Saint Helen** and of **the Açores** to be avoided. It's also necessary to manage the passing from one hemisphere to the other: it's the **intertropical convergence zone (ITCZ)**, commonly called the Doldrums. At this place, hot and humid air masses brought by trade winds of the two hemispheres meet and generate unstable air where white calm and stormy squalls alternate without any logic. Vigilance and intuition are indispensable to escape this trap.

Atlantic PARTS

ON 10TH NOVEMBER 2024, STARTING DAY, TWO SITUATIONS ARE POSSIBLE: IF THE ANTICYCLONE OF THE AÇORES STRETCHES OUT TO THE WEST OF EUROPE, GETTING OUT OF THE GULF OF BISCAY WILL TAKE PLACE IN MANAGEABLE CONDITIONS.

On the contrary, Atlantic depressions which rush in between Newfoundland and Spain could generate strong and adverse winds. This beginning of race between Les Sables d'Olonne and the tip of Finistère could be achieved very quickly in one short day or prove to be a difficult start... Once past the Portuguese coasts, the fleet will slide toward the Cape Verde: contenders must be careful not to endure perturbations off the islands (Madeira, Canarias, Cape Verde), nor take the risk of being trapped in the calm of the anticyclone of the Açores... This critical moment actually impacts the future point of entry in the Doldrums, generally between the 27° and 30° West parallel. The point of entry also determines the point of exit: North-Easterly winds turn to South-Easterly ones on the other side of the equator! The closer the trajectory to Africa, the shorter the route to go around the anticyclone of Saint Helen... The high pressures of the South Atlantic are fickle at the end of the austral spring: the goal of the solo racers is thus to sail along the Brazilian coasts as offshore as possible and catch one of the depressions which appear in the bay of Rio and die in the Indian ocean! If the high pressure system breaks up into ephemeral and mobile cells, the fleet ends up scattered in small groups with very different weather conditions: the split is often critical...

Catching the train in the **GREAT SOUTH**

IN LESS THAN A MONTH, THE FROST OF VENDÉE MAKES WAY FOR EQUATORIAL HEATS, TROPICAL RAINSHOWERS AND THEN SUBANTARTIC POLAR COLD.

The Southern seas, which represent almost 3/5th of a round-the-world, offer a chain of depressions originating from Brazil, Madagascar, New Zealand... Solo racers must preserve this train of downwind conditions, sliding from one perturbation to another without being absorbed by anticyclonic tentacles. Powerful North-Westerly winds, fronts with violent Westerly squalls, switchover to South-Westerly freeze, the sequence is very trying for the sailors as well as the machines... To limit the risk of encounters with icebergs, the Race Direction establishes a zone prohibited to sailing, the Antarctic Exclusion Zone (AEZ), which goes around the Antarctic between the 45°S on the Crozet Islands side and the 68°S off Cape Horn. Consequently, this demarcation for safety imposes a rather Northerly trajectory which flirts with the anticyclone of the Mascareignes (Indian) and Easter Island (Pacific). Competitors can get caught in high pressure systems while their opponents are surfing on a depression!

IF ROUNDING CAPE HORN AFTER 50 DAYS AT SEA REDUCES DRASTICALLY THE STRESS OF BREAKAGE AND MARKS THE INCREASE IN TEMPERATURES, THE 7000 MILES LEFT TO SAIL TO REACH THE SABLES D'OLONNE AREN'T THE SIMPLEST ONES, ESPECIALLY IF OTHER COMPETITORS ARE RIGHT BEHIND YOU!

Once you've passed Patagonia, there is still the anticyclone of Saint Helen to avoid while negotiating stormy depressions coming from Brasil. Adverse and irregular breezes, important wind shifts, fronts to cross, far from being an easy ride... Once the Brazilian coasts are more or less within sight, the Doldrums loom at the horizon before reaching the trade winds of the North hemisphere. Once again, racers must avoid getting trapped in the fearsome calm of the anticyclone of the Açores in order to finally reach the Atlantic depressions which can be more devastating than their austral equivalents in January... After 70 to 75 days at sea, the winner of the Vendée Globe 2020 will finally be able to see the Nouch buoy which marks the finish line of the Vendée Globe in Les Sables d'Olonne.

The long **WAY HOME**

**WHICH BOAT IS
COMPETING
IN THE VENDÉE
GLOBE?**

THE BOAT

THE BOATS OF THE VENDÉE GLOBE ALL MEASURE 18,28 M LONG (60 FEET) FOR A 4,50 DRAUGHT. With a large sail area, they are the most powerful monohulls of the planet led by a solo skipper. They can nearly reach 40 knots downwind at top speed. The gauge of these race animals is defined by the IMOCA class (International Monohull Open Class Association), founded in 1991 and supported by World Sailing, the International Sailing Federation. The gauge requires that the mast, sails, keel ram, but also (and this is a new feature) the boom, J2 forestay and runners be common to all boats. The rest is up to the architects. In addition, the volume of the foils - these appendices which allow the hull to lift in upwind conditions - is limited by the rule (limited to 8m³). The foils save a lot of drag (water friction) and allows better performance.

- antenna

IMOCA GLOBE SERIES

The fastest ocean racing monohulls in the world

The IMOCA class (60-foot length = 18.28m) has been competing in the Vendée Globe since its creation in 1989. In 1991, Christophe Auguin, Isabelle Autissier, Alain Gautier and Jean-Luc Van Den Heede created the IMOCA Class (International Monohull Open Class Association), which has been recognised by World Sailing since 1998.

These boats are the stars of the Vendée Globe and the IMOCA Globe Series, their annual championship. On a daily basis, the members of the IMOCA combine the notions of competition and human adventure. They also define the rules, guaranteeing sporting fairness and safety, while stimulating innovation around these ocean-going monohulls, which are now the fastest in the world.

30 YEARS OF TECHNOLOGICAL INNOVATION

The IMOCA monohulls really came into being in 1986, during the second edition of the BOC Challenge, when five of the monohulls had in common the reasonable size of 18.28 metres (60 feet). By this time, the most recent boats were already displaying the characteristics of boats designed for

THE IMOCA CLASS

downwind sailing in the Deep South. The IMOCAs are designed to be both as light as possible to gain speed and strong enough to withstand the worst conditions that open sea sailing can throw at them. Today, thanks to foils, the most recent boats can reach top speeds of over 40 knots... twice the speed of the first IMOCAs. In 2023, in the North Atlantic, Boris Herrmann and his crew set a new record for the distance covered in 24 hours by a monohull, with 641.13 miles sailed at an average speed of 26.71 knots.

THE INTERNATIONAL OCEAN RACING CHAMPIONSHIP

In 2018, the Class inaugurates the IMOCA Globe Series, a Championship including the most prestigious solo, double-handed and crewed events, including the two famous round-the-world races, the Vendée Globe (solo) and The Ocean Race (mixed crew). With four to six races a year, the IMOCA Globe Series rewards skippers for their regular participation and performance. Charlie Dalin is one of the leading names on the circuit, having won the IMOCA Championship for two consecutive seasons, in 2021 and 2022. The wealth of the sporting calendar also enables the teams to structure themselves and innovate

on an ongoing basis, while offering their partners a comprehensive activation package. At the start of the last Vendée Globe, more than 130 companies and local organisations supported the fleet of 33 skippers.

TOWARDS EVER MORE SUSTAINABLE PERFORMANCE

IMOCA sailors have a privileged position from which they can observe, from the front line, the constantly changing state of the Ocean. In 2021, the IMOCA Class will be the first offshore racing Class to vote for technical rules in favour of transition, with the aim of reducing its impact and making it more positive, while retaining the thrill of competition.

HOW TO **TAKE PART** IN THE VENDÉE GLOBE ?

FROM EDITION TO EDITION, THE SUCCESS OF THE VENDÉE GLOBE IS GROWING. In 2020, 33 competitors took the start of this unique round the world race. There have never been so many! In response to the growing enthusiasm of the sailors, the number of participants has been increased to 40 skippers for the 10th edition in 2024. To face the success of the event, the organization has defined conditions in order to participate. If the number of candidates meeting these requirements exceeds the quota, a selection system has been established.

EXPLANATION OF RULES

1. QUALIFICATION, A GUARANTEE OF SAFETY

To take part in the Vendée Globe, the skipper and his/her boat must first qualify. This qualification concerns all the skippers who will be taking part in the 2024 Vendée Globe. The aim is multiple: to certify the skipper's skills, the regularity and reliability of his/her project. This qualification guarantees that the boats are sufficiently tested to sail around the world. It was designed to optimize the safety of the sailors.

THE CONDITIONS TO QUALIFY ARE:

Each IMOCA/skipper pairing must be at the start of at least two qualifying races (one in 2022 or 2023 and one in 2024). The skipper must finish at least one of them and his or her race time must not be more than one and a half times faster than the winner's time. The qualifying races, contested single-handed, are :

**Derogation: In case of major damage encountered on the Transat Jacques Vabre 2023 making it impossible to participate in the return race of the Transat Jacques Vabre 2023, the organization will be able to grant a derogation and accept that the start of the Transat Jacques Vabre 2023 will count as a qualifying race, even though it will be raced in double-handed.*

2. AN OBJECTIVE SELECTION, BASED ON THE NUMBER OF MILES SAILED

If the qualified skippers are more than 40, a selection may be made between them. It consists of counting the number of nautical miles sailed by the skippers single-handed, double-handed and crewed since the Transat Jacques Vabre 2021.

All the races in the Globe Series championship since the Transat Jacques Vabre 2021* count towards this selection by miles. For the selection, unlike the qualification, the miles are only counted by the skipper, even if he is sailing on a boat that is not the one on which he will be competing in the Vendée Globe. If a skipper abandons a race, the miles he or she sailed before abandoning are counted. If two skippers have the same number of miles sailed, they will be separated by their ranking in the IMOCA Globe Series Championship after the New York Vendée race.

MILES COUNTED

Single-handed:
one mile sailed = one mile counted

Double-handed:
one mile sailed = 0.5 mile counted

With a crew:
one mile sailed = 0.25 mile, with a maximum of 5,000 miles

The last race before the Vendée Globe, **the New York Vendée**, organised by the SAEM Vendée, **will be an exception as it will be sailed single-handed, but for every mile sailed, 1.5 miles will be counted.**

**With the exception of Guyader Bermudes 1000 Race 2023.*

EXCEPTIONS

➤ **No selection process for 13 new IMOCAs :**

The term «new IMOCAs» refers to IMOCAs built to compete in the 2024 Vendée Globe. The first 13 pairs - new IMOCA/skipper - to start a qualifying race will be automatically selected.

➤ **The wild card :** The organisation has the right to invite a skipper who meets the qualifying conditions.

 **1978-02-24**

A lover of the ocean, the former journalist turned professional skipper decided to put his boat at the service of science. He installed a number of oceanographic sensors to measure temperature, salinity and CO₂ levels, as well as microplastics and environmental DNA in surface waters. This precious data will be made available to the international scientific community to help preserve our oceans. An ongoing adventure, at sea and on shore. With his new boat, fitted with 15 square metres of solar panels, his ambition is to circumnavigate the globe without using fossil energy.

Maître CoQ is France's No. 2 poultry brand, and since 1969 has been offering consumers a wide range of poultry products with quality labels (French origin, Farmhouse Label Rouge and Organic, animal welfare, Bleu

Blanc Coeur certified), both raw and ready-prepared. The company has 8 production sites in France (7 in Vendée and 1 in Auvergne). It employs 2,600 people and had sales of €701 million in 2022.

COMMITMENT

People and Nature.

Yannick has chosen to support 2 associations: LA HALTE DU CŒUR, which provides food aid to the underprivileged, and ECHO-MER, which works to protect the seas and coastal environment. *«I participate occasionally in some of their actions, but I'm happy to be able to give them visibility on the boat and at the start of the races. Thank you to all the volunteers who help out on a daily basis.»*

JÉRÉMIE BEYOU

CHARAL

5TH PARTICIPATION
- APPLICANT 2024 -

LORIENT

FRANCE

1976-06-26

For more than 20 years, Jérémie Beyou has built up one of the most impressive track records in offshore racing.

He is a skilled and passionate sailor who shines by his tenacity and perseverance in raising the bar a little higher. One of the favourites for the 2020 Vendée Globe, he was forced to return to Les Sables d'Olonne for repairs and then set off again 9 days, 2 hours and 50 minutes after the official start. He finished 13th. Today, he is at the helm of Charal 2, a new IMOCA that led him to the third step of the podium in the Route du Rhum 2022. More motivated than ever for 2024, he is eager to take his revenge on the last edition.

DID YOU KNOW?

Favourite TV series:
Peaky Blinders

Apart from water sports, tennis and cycling, which he does regularly, **Jérémie likes to spend his free time gardening.**

Jérémie's Vendée Globe dream was born when Vincent Riou won the 2004-2005 edition.

Favourite band:
Radiohead

Favourite film: Kill Bill

ARNAUD BOISSIÈRES

LA MIE CÂLINE

5TH
PARTICIPATION
- APPLICANT 2024 -

 LES SABLES D'OLONNE

 FRANCE

 1972-07-20

Born in Bordeaux, Arnaud Boissières, nicknamed Cali, developed his passion for sailing in the Arcachon basin, before being adopted by Les Sables d'Olonne, which has become his home port. He is the only skipper to have completed four consecutive Vendée Globe races. This lover of the world's seas, of adventure and of the adrenalin that ocean racing gives him is an emblematic character in French sailing. Aboard his new IMOCA La Mie Câline since 2022, he is happily and ambitiously looking ahead to the 2024 Vendée Globe, for a fifth consecutive round the world race.

DID YOU KNOW?

His guilty pleasure:
Nutella

Arnaud is a rock fan.

On his round-the-world trips, a friend prepares playlists for him based on the countries he passes along the way.

ARNAUD BOISSIÈRES

PROJECT

La Mie Câline

La Mie Câline is a Vendée-based brand of breads, pastries, sandwiches and salads. Created in 1985, the network of franchise shops now has more than 2,200 franchisees and employees in 242 shops. The company defends the values of respect, professional

competence and solidarity. The brand, a major partner of Arnaud Boissières' team since 2015, relies on Arnaud to illustrate its signature "Happiness is here" on a daily basis, which materializes the project, the affinities and the common objectives.

COMMITMENT

Institut Bergonié

Arnaud is committed to the Institut Bergonié, the cancer centre of New Aquitaine, where he himself was treated for leukaemia when he was younger. He is also an ambassador for the association «À Chacun son Everest», which helps children with cancer to get new lease of life after the disease.

LOUIS BURTON

BUREAU VALLÉE

**4TH
PARTICIPATION**
- APPLICANT 2024 -

 **SAINT-MALO**

 **FRANCE**

 **1985-06-04**

Born near Paris, this adopted Malouin loves speed, on water as well as on shore. Collaboration, courage and self-sacrifice are at the heart of his values. On the water, Louis likes the tough options and never gives up. Beyond the competition, he uses his project to raise awareness of the fragility of the marine environment among new generations. Accompanied for the past 13 years by his loyal partner Bureau Vallée and his co-sponsors, Louis achieved a very fine 3rd place in the last Vendée Globe. His goal for 2024? To do even better!

LOUIS BURTON

PROJECT

Bureau Vallée

Bureau Vallée is a concept that combines proximity, innovation and digital technology to offer, through its 400 shops, a complete range of stationery, supplies, office equipment, furniture, high-tech and services. The Bureau Vallée brand is proud to offer professional and private

customers optimal value for money. The franchise network is developing in France and internationally with more than 25 openings per year, while deploying a retail and digital strategy in a multi-channel logic. Bureau Vallée has been a partner of Louis for over 13 years.

COMMITMENT

For the past 10 years, Louis Burton has been visiting schools and students all over France. His aim is not only to share his passion for the ocean and ocean racing, but also to raise awareness among the younger generation of the fragility of the marine environment and the need to protect its ecosystem. From these long-standing relationships with numerous schools, the «I'm discovering the world of the oceans with Louis Burton» educational kit was created. The tool, designed in collaboration with teachers 5 years ago, offers free and fun resources for all elementary classes. It allows pupils to study the world of the sea by linking it to the entire school curriculum.

CONRAD COLMAN

IMAGINE

2ND
PARTICIPATION
- APPLICANT 2024 -

LORIENT

USA / NEW ZEALAND

1983-12-02

Conrad Colman was born in Auckland to an American father and a New Zealand mother, and spent his first year on a sailing boat in the Pacific.

After studying in Colorado and setting up a business manufacturing titanium bicycles, he decided to follow his dream of offshore sailing and moved to Europe. He made his debut in the 2009 Mini-Transat, then went on to compete in the Class40 Route du Rhum and a double-handed round-the-world race, which he won. He then moved up to the IMOCA class and competed in the 2016 Vendée Globe, which he finished after dismasting off Portugal. He became the 1st sailor to complete the race with 0 emissions. A challenge he is keen to take up again in 2024.

DID YOU KNOW?

Favourite band:
Fat Freddy's Drop

Conrad **grew up in New Zealand until he was 15, when he moved to the United States.**

ANTOINE CORNIC

HUMAN IMMOBILIER

1ST
PARTICIPATION
- APPLICANT 2024 -

 LA ROCHELLE

 FRANCE

 1980-01-04

At the age of 20, Antoine Cornic took part in the Mini Transat and finished 10th.

Proud of this honourable ranking, he went on to attempt the North Atlantic record in a Mini, but broke his boat. Several years later, after starting a family, he decided to set sail again. Tenacious, he set up an IMOCA project in 2021, supported by Pascal Barreau and his company Ebac. In 2022, he met Benjamin Salah, CEO of Human Immobilier. The three men with shared values decided to set sail together for the Vendée Globe 2024.

DID YOU KNOW?

The sailor who inspires him:
François Joyon

Before becoming a professional ocean racer, **Antoine was a chef and nightclub owner for 15 years!**

His dog is called Bastack
(like the name of the cables that hold the mast at the stern of sailing boats).

ANTOINE CORNIC

PROJECT

Human immobilier

The project's main partner, Human Immobilier, with its 650 agencies, is a major player in the property sector. Already involved in sport through its Human Sport entity, joining Antoine Cornic and his team's project seemed an obvious choice in light of their shared values.

Ebac

Ebac, a company that makes mattresses from recycled plastic waste, is Antoine Cornic's longest-standing partner. Their story is one of friendship, but also of shared values, notably their fight for cleaner oceans.

BOAT

Former names: Spirit of Canada, ALGIMOUSS Spirit of Canada, O Canada, ebac

MANUEL COUSIN

COUP DE POUCE

2ND
PARTICIPATION
- APPLICANT 2024 -

 **LES SABLES D'OLONNE**

 **FRANCE**

 **1967-07-10**

Naturally welcoming, Manuel Cousin has, at first glance, the profile of a passionate sailor.

But that would be a reductive view of this 55 year old sailor from Normandy, based in Les Sables d'Olonne, his boat's home port. For him, the competition is at all levels of the ranking. With a strong technical background, Manuel, who comes from the Class40, has been lining up in all the races on the IMOCA calendar since 2017. Finisher, 23rd in the 2020 Vendée Globe, he crossed the line in 103 days with a broken keel ram! His boat has since benefited from major improvements: mast, boom, ballast tanks, rudders and daggerboards have been completely transformed. Determination and performance will be his two driving forces in the next Vendée Globe.

DID YOU KNOW?

Favourite film:
Dead Poets Society

Manu always takes a cuddly octopus on board his IMOCA, named **Madeleine Sourire** by his daughter. **It's his lucky charm!**

His guilty pleasure:

CLARISSE CRÉMER

L'OCCITANE EN PROVENCE

2ND
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **FRANCE**

 **1989-12-30**

Clarisse Crémer grew up near Paris and discovered sailing on family holidays, then in student regattas during her studies at HEC. Meeting sailor Tanguy Le Turquais encouraged her to try offshore racing. At the age of 25, she took part in the Mini-Transat. Her sporting performance (2nd) and her ability to share her adventures impressed everyone. She continued in the Figaro class and then entered the IMOCA circuit in 2018. In 2020, she competed in her first solo round-the-world race: after 87 days at sea, she became the fastest woman in the history of the Vendée Globe. As soon as she arrived, Clarisse had just one goal: to be back in this legendary race.

PROJECT

L'OCCITANE EN PROVENCE

L'Occitane

Since 1976, L'OCCITANE en Provence has been dedicated to sharing the wonders that nature has to offer, by designing and distributing beauty, skincare and well-being products throughout the world, which are produced in France. It knows that Nature needs balance for each seed to

blossom anew, and believes that a renewed sense of harmony between human beings and the environment can strengthen this balance. The company cultivates change. It works hand in hand with local teams who also believe that every gesture, no matter how small, can make all the difference.

MACIF

As a mutual insurance company, Macif is committed to its 5.7 million members and customers on a daily basis. It offers simple and useful protection services in property and casualty insurance, health and provident insurance and finance and savings. IMOCA MACIF Santé Prévoyance is

dedicated to Macif's health and life insurance activity, a strategic business for its development and growth in the global response it provides to its members. Macif has been active in the maritime sector for over 50 years. In 2022, it was voted France's favourite brand in the insurance company category.

COMMITMENT

Charlie Dalin is the ambassador of the Olygocyte Association, which aims to defeat brain tumours.

Thanks to his support, the skipper wishes to bring more visibility to this association so that it can obtain more funding for research and to accompany the families affected by this cancer.

SAMANTHA DAVIES

INITIATIVES-CŒUR

4TH
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **UNITED KINGDOM**

 **1974-08-23**

Born in England into a family of sailors, Sam Davies spent her childhood on the water.

With a degree in engineering from Cambridge University, she began her racing career at the age of 24, with her first crewed round-the-world race. With 5 circumnavigations and numerous transatlantic crossings to her credit, she is one of the most experienced sailors on the circuit. She embodies determination, daring and passion. At the helm of her new IMOCA Initiatives-Cœur, built in 2022, Sam uses every race to raise funds for children with heart defects. Her dedication to this noble cause makes her a sailor with a big heart, combining sporting performance with solidarity.

DID YOU KNOW?

Favourite dessert:
English pudding

Sam named his foils Orville and Willbur, like the Wright brothers, pioneers of aviation. Orville is also the name of the albatross in the Bernard and Bianca cartoon.

SAMANTHA DAVIES

PROJECT

Each race is the occasion for a major awareness-raising campaign during which the boat's sponsors use their donations to fund operations on children suffering from serious heart malformations by donating €1 to Mécénat Chirurgie Cardiaque for each new follower of the project's Facebook and Instagram pages. With its « **Les Chocolats du Cœur** » brand, Initiatives offers sales of solidarity chocolates to associations, schools, companies, CSEs and individuals. These fine chocolates have been made near Orléans by the Alex Olivier chocolate factory since 1927. France's leading

manufacturer of aluminium joinery, the Vendée-based company **K-LINE** (LIEBOT Group) designs, manufactures and markets custom-made sliding windows and entrance doors for all types of architecture, both new build and renovation. **VINCI Energies** is speeding up the environmental transition by implementing two major changes: digital and energy. Its teams deploy customised technologies and multi-technical solutions, from design to construction, operation and maintenance, at the heart of their customers' energy choices, infrastructures and processes.

Weight: 8 t
Mast height: 28 m
Foils: Yes

COMMITMENT

With Initiatives-Cœur, Sam Davies is sailing to support the humanitarian organisation Mécénat Chirurgie Cardiaque.

This association enables children with heart malformations to be operated on in France when this is impossible in their own country due to a lack of technical or financial resources. They are accommodated by volunteer host families. To date, 363 children have been treated and saved since 2009. The aim is to reach 500 children saved by the end of the Vendée Globe 2024.

VIOLETTE DORANGE

DEVENIR

1ST
PARTICIPATION
- APPLICANT 2024 -

 **PORT-LA-FORÊT**

 **FRANCE**

 **2001-04-17**

A hard-working and dynamic sailor, Violette Dorange has been sailing since she was very young, and has completed all the stages in her bid to take part in the 2024 Vendée Globe: the French dinghy sailing team, crossings of the English Channel and the Straits of Gibraltar in an Optimist, a solo Atlantic crossing in a Mini 6.50 and participation in three editions of the Solitaire du Figaro, the antechamber to the Vendée Globe, where she finished in 10th place in 2022. A result that confirms her desire to go even further and push back the horizon to set off around the world. That's why, at just 22 years old, Violette is launching her Vendée Globe project after acquiring Jean Le Cam's boat, now called DeVenir.

DID YOU KNOW?

Her favourite artist:
Billie Eilish

At 15, **Violette** crossed the English Channel in an Optimist!

VIOLETTE DORANGE

PROJECT

DeVenir

DeVenir is a sporting and social project involving a number of partners. These historic partners have been joined by France's leading youth recruiter: McDonald's restaurants. More than 130 McDonald's

establishments have joined DeVenir, with the aim of giving restaurant team members an incredible adventure, promoting the values of the project and solving problems of integration through original communication.

COMMITMENT

Over and above a sporting project, Violette wanted to add a social dimension to this adventure: her Vendée Globe project, called DeVenir, supports the Apprentis d'Auteuil Foundation, which Violette is supporting by giving hope to young people looking to build their future. Today, a group of McDonald's restaurants, 130 in all, are supporting the DeVenir project, taking on board their team members and managers to work alongside Violette, and in this way, together with the Apprentis d'Auteuil Foundation, promoting the integration and training of young people in difficulty.

LOUIS DUC

GROUPE FIVES

- LANTANA ENVIRONNEMENT

**1ST
PARTICIPATION**
- APPLICANT 2024 -

 **CAEN**

 **FRANCE**

 **1983-09-18**

Louis Duc is a self-made sailor who has always managed to accomplish a lot with limited resources. Determined and independent, this native of Normandy knows that everything comes in good time to those who know how to work and train. However, the beaten track is not for him. Bold and thoughtful, Louis does not see his life as an offshore racer without technological challenges. Offshore, he is definitely in his element. On shore, he is an entrepreneur. In a team he listens, respects... and makes himself respected. At sea as well as on shore, he has the audacity of his ideas.

DID YOU KNOW?

Louis plays diatonic accordion.

As a hobby, **he sails on a caravel** (a small old wooden boat) **and likes to go lobster fishing.**

For his round-the-world race, **he'll be taking on board foie gras and Beaufort cheese from his two grandmothers!**

– WATER FAMILY

2ND
PARTICIPATION
– APPLICANT 2024 –

 **LES SABLES D'OLONNE**

 **FRANCE**

 **1990-04-05**

In 2014, Benjamin joined Team Vendée Formation where he learned the basics of offshore racing tactics. He finished 1st rookie in the 2015 Solitaire du Figaro, before taking 5th place in 2018. Determined, he bought an old generation IMOCA and lined up six months later at the start of the Transat Jacques Vabre. Despite a tight budget, he became the revelation of the last edition of the Vendée Globe by finishing 9th. He took a new step forward by buying a 2016 foiler with a view to the 2024/25 Vendée Globe, in which he should take part aboard the IMOCA GUYOT environnement – Water Family.

BENJAMIN DUTREUX

PROJECT

GUYOT Environnement

Major and independent player in the waste recovery industry. For 40 years, it has been collecting, sorting and recovering waste to give it a second life. The Group, which recycles raw materials and transforms non-recyclable waste into fuel,

will tomorrow produce the energy that will make it independent. The company intends to go even further in preserving the environment: tomorrow to reach 100% of recovered waste. Joining Benjamin and the Water Family just reinforces their commitment.

COMMITMENT

Water Family – Du Flocon à la Vague

Benjamin is committed to La Water Family – Du Flocon à la Vague. The Water story of Benjamin and the Water Family began in 2017. Two Tour Voile and one Vendée Globe later, the objective of his project remains the same: to win for water, to win on water. The mission is to educate people about the preservation of water, our health and all forms of life in a positive and empowering way.

BENJAMIN FERRÉ

MONNOYEUR - DUO FOR A JOB

**1ST
PARTICIPATION**
- APPLICANT 2024 -

 **PORT-LA-FORÊT**

 **FRANCE**

 **1990-10-30**

Benjamin Ferré is a young Breton who loves life and challenges. With more than 40,000 km hitchhiking around the globe, a crossing of the Atlantic using a sextant, a 4L Trophy and a Mini Transat in 2019, Benjamin is not a newcomer in the world of adventure. When he launched his Mini project, he discovered the offshore racing world: it was the trigger! His new challenge is to take the start of the 2024 Vendée Globe aboard his IMOCA Monnoyeur - Duo For a Job.

DID YOU KNOW?

His favourite dish:
Pizza margherita

Benjamin's boat is Clarisse Cremer's former boat, on which she competed in the 2020-2021 Vendée Globe. It is also the boat that won the 2012-2013 Vendée Globe with François Gabart.

SAM GOODCHILD

FOR THE PLANET

**1ST
PARTICIPATION**
- APPLICANT 2024 -

 **LORIENT**

 **UNITED KINGDOM**

 **1989-11-19**

**FOR THE
PLANET**

A childhood spent on a boat, a meeting with Alex Thomson, sailing from one support to another where Sam Goodchild demonstrated his skills...

This journey led the skipper to take the helm of his first IMOCA, named For the Planet, to take part in his greatest dream: the Vendée Globe. «Vendée», a word that has resonated strongly in his adventurous mind since his earliest childhood and the stories told by his father. At the start of 2023, he joined the experienced TR Racing team - alongside Thomas Ruyant - an ideal setting for this major project. Sam is a man of challenges, and in 2024 he's preparing to take on his greatest challenge yet.

DID YOU KNOW?

The sailor who inspires him:
Loïc Peyron

Sam is originally from the UK but grew up in the Caribbean where he lived on the family boat. He now lives near Lorient.

His favourite series: Narcos

PROJECT

Advens

Advens is a leading French cybersecurity company. With its independence and more than 400 experts in France and Europe, it helps companies to prevent and neutralise cyber attacks. But that's not its only vocation: Advens wants to have an impact on the world. It is building a committed business model that allows it to dedicate 50% of the Advens group's capital to the development and acceleration of initiatives that aim to have a large-scale impact on people and the planet.

Leyton

Leyton is a world reference in financial consulting. Its mission, Empower your future, is to sustainably accelerate everyone's performance in order to build a more responsible world.

**WE SAIL
FOR PEOPLE
AND PLANET**

BOAT

COMMITMENT

We Sail for People and Planet is a collective of committed people, working together around two boats, For People and For the Planet, and two skippers, Thomas Ruyant and Sam Goodchild. Its aim is to harness the power of top-level sport to accelerate concrete, high-potential social and environmental programmes.

Team for the Planet

Entrepreneurship at the service of the climate emergency! Team for the Planet creates companies that are designed and configured from A to Z to fight against greenhouse gases. Its mission is to identify high-impact innovations around the world and recruit skilled entrepreneurs to transform the 100 best innovations into companies with solid business models. Team for the Planet injects money and the power of a network of over 100,000 shareholders to maximise and accelerate the deployment of these companies. All innovations are widely shared thanks to an open licensing model. Any individual or legal entity can join the adventure from €1 in 2 minutes and take concrete action, on a global scale, against climate change.

PIP HARE

MEDALLIA

2ND
PARTICIPATION
- APPLICANT 2024 -

 **POOLE**

 **UNITED KINGDOM**

 **1974-02-07**

Pip Hare started sailing competitively late in life by participating, in the Mini-Transat in 2011.

In 2018, the British skipper chose to turn her dreams into reality by being the skipper of Superbigou, the IMOCA built in 2000. At the helm of the veteran of the fleet, the Briton could finally savor the happiness of being at the start line of the Vendée Globe on November 2020, the happy conclusion of two years of hard work. The skipper left Les Sables d'Olonne with several objectives: to finish, to tell the best story and to withstand all the trials of the race. This she did in abundance. Now, let's head for 2024!

DID YOU KNOW?

Sailors who inspire her:
Peter Blake
and Isabelle Autissier

Although Pip took up competitive ocean racing late in life, **she started sailing even before her first birthday, with her grandfather.**

OLIVER HEER
OCEAN RACING

1ST
PARTICIPATION
- APPLICANT 2024 -

 **PORT-LA-FORÊT**

 **SWITZERLAND**

 **1988-05-10**

Oliver Heer is a passionate Swiss German offshore sailor who has competed since childhood.

After the untimely death of his father in 2014, Ollie decided that a corporate career wasn't for him, and he needed to "follow his dreams". In 2018, he joined Alex Thomson on the IMOCA, HUGO BOSS, as Boat Captain. Together the pair sailed over 50,000 miles and in 2021, Alex and Ollie co-skippered the Rolex Fastnet Race, Ollie's debut into the IMOCA Globe Series. Competing in the Vendée Globe has been Ollie's ambition since he was small.

MALIZIA - SEAEXPLORER

2ND
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **GERMANY**

 **1981-05-28**

Boris Herrmann started his professional offshore sailing career in 2001 as the youngest participant in the Mini Transat race. Since then, he has circumnavigated the world 6 times. The Southern Ocean holds few secrets for him, after a Barcelona World Race, an attempt in the Jules Verne Trophy, and a Class40 race around the world. In 2020, he became the first German to ever compete in the Vendée Globe, finishing in 5th place. After launching the new Malizia – Seaexplorer in 2022, he finished 3rd with his Team Malizia in The Ocean Race, winning two legs, and breaking the 24-hour distance record.

BORIS HERRMANN

PROJECT

Malizia

Malizia's A Race We Must Win

Team Malizia's A Race We Must Win – Climate Action Now! mission is only possible due to the strong and long-lasting commitment from its seven main partners: Hapag-Lloyd, Schütz, the Yacht Club de Monaco, EFG International, Zurich Group Germany, Kuehne+Nagel, and

MSC Mediterranean Shipping Company. These partners, ranging from the logistics industry, to insurance, to banking band behind Team Malizia to support its campaign, each of them working towards sustainability projects in their own field to innovate around climate solutions.

COMMITMENT

Boris Herrmann runs the A Race We Must Win campaign since 2018, combining sailing, science, and education.

Since then, he carries a laboratory onboard that measures valuable Ocean data in partnership with the Max Planck Institute for Meteorology, GEOMAR and Ifremer. Through the My Ocean Challenge programme, his Team Malizia also educates children around the world about the Ocean and climate change.

ISABELLE JOSCHKE

MACSF

2ND
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **FRANCE & GERMANY**

 **1977-01-27**

Isabelle Joschke is Franco-German. At the age of 25, she became a skipper, starting with the Mini 6.50 circuit between 2004 and 2007.

In 2008, she joined the Figaro class and spent 8 seasons on the most demanding of offshore racing circuit. She took the helm of her IMOCA in 2017, after a season in Class 40. She fitted her with foils in 2019 to take part in the Vendée Globe in 2020, which she will finish out of the race. With two participations in the Route du Rhum, four Transat Jacques Vabre and a solo round the world race, Isabelle is one of the few women fully committed to this path.

PROJECT

MACSF

MACSF has been involved in sailing since 1979. Since its first sailing partnership with health student Olivier Moussy, the group has shared the spirit of solidarity and humanism of this discipline with its 1,600 employees and more than one million members. Since 2019, MACSF has been involved in a sailing partnership with the skipper

Isabelle Joschke and her team manager Alain Gautier, winner of the 1992 Vendée Globe. In 2021, after three years of partnership and a remarkable round-the-world voyage, the mutual insurance company and the skipper have decided to continue their adventure until 2025, culminating in the 2024 Vendée Globe.

COMMITMENT

Horizon Mixité

Single-handed ocean racing is a totally mixed discipline, and nevertheless... Faced with a large majority of men, few women have made it their profession, many imagining that they do not have access to such careers. As a direct witness to this phenomenon, Isabelle decided to react by committing herself to gender equality. With her journalist friend Martine Gauffeny, she created the Horizon Mixité association in 2012. Her aim is to change mentalities by raising awareness of the issue of gender equality among professionals and the general public. If sailing is a starting point, the association's field of action extends to all areas of activity in society: education, business, sports, politics, etc.

– APPLICANT 2024 –

 **PORT-LA-FORÊT**

 **FRANCE**

 **1959-04-27**

This talented Breton is as relevant on shore to prepare fast boats as he is at sea to get them to the right place quickly. But Jean Le Cam is even more than that. Over time and through his exploits, he has become a true «figure» of offshore racing in general and of the Vendée Globe in particular. He loves to regale the public with his countless nice words. Jean has never left the limelight: he took a magnificent fourth place in his fifth Vendée Globe after an emotionally and athletically intense race. Jean is and always will be a competitor and he will – whatever the circumstances – set himself realistic sporting goals to achieve.

DID YOU KNOW?

In the 2020 Vendée Globe, **Jean Le Cam** rescued **Kévin Escoffier** who was in his life raft off the Cape of Good Hope.

PROJECT

TOUT
commence
en FINISTÈRE

Armor·lux

Département du Finistère

With 2263 km of coastline, Finistère is one of France's major maritime departments. Famous skippers live or were born here and continue to emerge in its centres of excellence. Like Tout commence en Finistère, Jean's project federates the region around its identity, its values of performance and solidarity.

Armor-lux

For 80 years, Armor-Lux has been perpetuating exceptional expertise in the manufacture of quality clothing. The company symbolises an art of living, marine-inspired collections, authentic, sustainable clothing and a strong commitment to preserving jobs.

COMMITMENT

The ASE: social assistance for children

In the department of Finistère, 2,500 children are under the protection of the Departmental Council and almost as many are cared for at home. The Departmental Council has made child protection one of its main priorities. Jean Le Cam has decided, together with the Finistère department, to defend the cause of children by embarking them on the Vendée Globe 2024/25 adventure.

PAUL MEILHAT

BIOHERM

2ND
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **FRANCE**

 **1982-05-17**

Between the lakes of the Paris region where he was born and the coast of Brittany, Paul Meilhat began sailing at a very early age, first in a dinghy and then in a Figaro. In the space of a dozen years, he became one of the most prominent racers of his generation. He has had some powerful experiences: resounding successes but also setbacks, when he was rescued by helicopter off the Azores or when he abandoned the 2016 Vendée Globe in the middle of the Pacific. After a few years as a top co-skipper with Charlie Dalin and Sam Davies, he launched his own project. At the helm of the IMOCA Biotherm, he will be setting off on his 2nd Vendée Globe.

DID YOU KNOW?

After retiring in 2016 in the middle of the Pacific, Paul has returned to Polynesia. His technical team caught up with him there.

PAUL MEILHAT

PROJECT

BIO THERM

Biotherm

Founded on the discovery of the regenerative properties of Plankton of Life, Biotherm, an expert skincare brand, takes its effectiveness from bioscience with highly effective and sensorial formulas, for a visibly full of life skin. Coming from the water, the brand takes action to protect

aquatic biodiversity with its Water Lovers programme. It has joined forces with Paul Meilhat and the Tara Océan Foundation to conduct a research programme aboard the IMOCA Biotherm. «Bio» means life, «Therm» means source. Biotherm is committed to being the source of a better life for skin, body, mind and ocean.

COMMITMENT

Paul Meilhat has never compromised on his strong social and environmental convictions, which he has always defended as hard as his position on the sporting chessboard. Since 2010, he has been taking concrete action with the Surfrider Foundation, initiating the Echappée Bleue operation and continuing his commitment as a Water Lover to the scientific study of the oceans alongside Biotherm in partnership with the Tara Ocean Foundation.

LORIENT

SWITZERLAND

1986-10-04

Swiss sailor Justine Mettraux first sailed on Lake Geneva on her family's boat, then at the Geneva Regatta Training Centre, and quickly developed a passion for racing and the open sea.

In 2013, for her first major ocean race, she completed the Mini Transat in 2nd place with her sponsor TeamWork. She continues to train and progress by taking part in all the major ocean races: Volvo Ocean Race, Solitaire du Figaro, Transat Jacques Vabre, etc. In 2022, her long-standing sponsor, TeamWork, bought a new-generation foiler to enable her to prepare the Vendée Globe 2024.

DID YOU KNOW?

Favourite chef:
Yotam Ottolenghi

Justine's Vendée Globe dream was born during her circumnavigation of the globe with a women's crew in 2015, with - among others - Sam Davies!

Her favourite dish:
Aubergines Parmigiana

Her favourite food at sea:
chocolate creams

COMMITMENT

Magenta Project / Association Vaincre les Maladies Lysosomales

Justine has been involved with two associations for many years. The Magenta Project, founded after Team SCA's participation in the Volvo Ocean Race, aims to achieve gender parity in sailing and to lead the way towards greater diversity and inclusion in all areas. The VML association is the only structure in France enabling all those affected by one of the 50 lysosomal diseases to make their voices heard and to pool investment in scientific and medical research.

 **LORIENT**

 **ITALIA**

 **1975-12-26**

Giancarlo has a degree in philosophy. He is also a former boxer. He has a Cartesian approach to sailing, through which he seeks to exceed his limits. Winner of the 2015 Transat Jacques Vabre in Ocean Fifty, he was twice elected «Sailor of the Year» in Italy in 2014 and 2016. In 2020, he finished 8th in the Vendée Globe, 19 hours after the winner. He is the author of two books on learning to sail in Italy and has also published a book about his Vendée Globe, «L'anima nell'oceano», published by Rizzoli. In addition to sailing, Giancarlo has created two initiatives based on his knowledge: #CROSSSPORT (every sport teaches other sports and everyday life) and #CROSSOCEAN (initiatives dedicated to the protection of the Ocean).

DID YOU KNOW?

Giancarlo has a degree in philosophy.

ALAN ROURA

HUBLOT

3RD
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **FRANCE**

 **1993-02-26**

Born on the shores of Lake Geneva, it is on the world's oceans that Alan Roura grew up and matured his dreams of offshore racing. After 11 years of sailing on the family boat, he «passed» his Mini Transat in 2013, at just 20 years old. Three years later, he became the youngest competitor to finish the Vendée Globe (23 years old) and was back for a second participation in 2020, with the North Atlantic solo record in his pocket (2019). Since 2022, supported by new partners and at the helm of a new generation boat, Alan is determined to make the best of it.

DID YOU KNOW?

Sailor who inspires him:
Ellen MacArthur

While sailing a Mini 6.50, a whale shark came to 'play' around his little boat!

His favourite series:
Casa De Papel

THOMAS RUYANT

FOR PEOPLE

3RD
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **FRANCE**

 **1981-05-24**

Born in the Hauts-de-France area, Thomas Ruyant is a specialist in transatlantic races: he has won the Mini-Transat, the Route du Rhum twice, the Transat AG2R, as well as the Transat Jacques Vabre! Thomas is a sailor in the strictest sense of the term. He really comes into his sporting own offshore and over a long period of time. 2024 should be his 3rd Vendée Globe. In 2016, he heroically abandoned the round-the-world race aboard Souffle du Nord after suffering major damage off New Zealand, and finished the 2020 edition in 6th place after often sailing in the top 3. Thomas' motto is to give meaning to his performances, which he does with the collective We Sail For People and Planet.

DID YOU KNOW?

His guilty pleasure at sea:
Sweets

In the 2016 Vendée Globe, Thomas's IMOCA was badly damaged by a collision with an ofni in the Pacific. The skipper managed to reach New Zealand under engine.

His guilty song:
La kiffance

PROJECT

Advens

Advens is a leading French cybersecurity company. With its independence and more than 400 experts in France and Europe, it helps companies to prevent and neutralise cyber attacks. But that's not its only vocation: Advens wants to have an impact on the world. It is building a committed business model that allows it to dedicate 50% of the Advens group's capital to the development and acceleration of initiatives that aim to have a large-scale impact on people and the planet.

LEYTON

Leyton

Leyton is a world reference in financial consulting. Its mission, Empower your future, is to sustainably accelerate everyone's performance in order to build a more responsible world.

**WE SAIL
FOR PEOPLE
AND PLANET**

COMMITMENT

We Sail for People and Planet is a collective of committed people, working together around two boats, For People and For the Planet, and two skippers, Thomas Ruyant and Sam Goodchild. Its aim is to harness the power of top-level sport to accelerate concrete, high-potential social and environmental programmes.

Association Entourage

Entourage is an association with a start-up spirit, serving people and caring for 'living together'. In France today, over 2 million people live in extreme poverty and are excluded from society, and 330,000 people are homeless. Entourage helps these people to break out of their isolation and rediscover a support network. To do this, the association raises awareness and encourages civil society as a whole to take action: local residents, businesses, etc., because it is convinced that everyone is part of the solution to the problem of exclusion. Entourage believes in the magical power of meeting people and worlds that seem to oppose each other!

DAMIEN SEGUIN

GROUPE APICIL

2ND
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **FRANCE**

 **1979-09-03**

Born without left hand, Damien Seguin became in 2021 the first disabled skipper to complete a solo, non-stop, unassisted round the world race. A three-time Paralympic medallist in the 2.4mR class, he entered offshore racing in 2005 in the Figaro and then the Class 40 before joining the IMOCA circuit in 2018. Determined and constantly looking to progress, Damien has managed to convince people that his handicap is not a brake on performance. During his first Vendée Globe, which he finished in 7th place, he made a big impression by often playing at the front of the fleet. For 2024, he aspires to new sporting ambitions aboard his foiler.

DID YOU KNOW?

His favourite dish:
Chicken «boucané»

Damien **grew up in Guadeloupe.**

His boat is the one that won the 2020 Vendée Globe!

The pig is his lucky animal, and he always carries a little pig cuddly toy on board.

OceansLab - Cleantech Accelerator

The OceansLab - Cleantech Accelerator structure offers a range of unique partnership opportunities enabling companies to act as clean energy accelerators, by supporting the world's first hydrogen-electric race yacht.

The project aims to align with like-minded organisations that not only share a spirit of adventure, but are also working towards delivering a zero emissions infrastructure that will highlight the importance of clean technologies, both in the marine and wider environments.

COMMITMENT

Clean innovation & education

Clean innovation: Phil developed the world's first drop-in Hydrogen Power Module, which has been officially labelled as a solution to 'change the world' by the Solar Impulse Foundation.

Education: Phil is a co-author for the International Journal of Hydrogen Energy, and acts as a mentor for students at Imperial College London and EIGSI University.

KOJIRO SHIRAISHI

DMG MORI GLOBAL ONE

3RD
PARTICIPATION
- APPLICANT 2024 -

 **LORIENT**

 **JAPAN**

 **1967-05-08**

Kojiro Shiraishi is a Japanese sailor. In 1994, at the age of 26, he became the youngest sailor to complete a non-stop single-handed circumnavigation. He twice finished 2nd in the BOC Challenge, a solo race with stopovers. In 2016, he became the first Asian to take the start of the Vendée Globe. On 11 February 2021, aboard the IMOCA DMG MORI Global One, he became the first Asian to complete the Vendée Globe. For the 2024 edition, Kojiro aims to do better than his 16th place in 2020, with the same boat but equipped with new foils and a new bow.

DID YOU KNOW?

Favourite film:
Star Wars

Kojiro practices **laido**, a Japanese martial art. For the start of the Vendée Globe 2020, he wore the outfit and carried a sword as he sailed down the channel in Les Sables d'Olonne.

Favourite chef: his wife

GROUPE DUBREUIL

2ND
PARTICIPATION
- APPLICANT 2024 -

 **LES SABLES D'OLONNE**

 **FRANCE**

 **1990-05-06**

As a structural and composites engineer and sports lover, Sébastien Simon discovered sailing as a child.

Driven by competition, it is offshore racing that catches his interest. In 2018, he won the Solitaire du Figaro and the title of Elite French Ocean Racing Champion, a victory that led to his entry into the IMOCA class. In 2020, he took the start of the Vendée Globe, but his attempt was ended off the Cape of Good Hope when he was in 4th place in the fleet. Undaunted, Sébastien is a candidate for the 2024 edition.

DID YOU KNOW?

At sea, **Sébastien admits to taking on board a stock of candies.** It's important for his morale!

 **CONCARNEAU**

 **FRANCE**

 **1986-08-11**

Maxime Sorel is the entrepreneur of his dreams!

Maxime has a degree in civil engineering and is passionate about project management. He uses this passion to pursue his dream: offshore racing. After 5 years in Class40, then 4 years on the IMOCA circuit, he achieved the feat of finishing 10th in the 2020 Vendée Globe. Maxime has surrounded himself with people who, like him, share the desire to go ever higher... In 2021, with his partners, he launched the construction of a new foiling IMOCA with which he should compete in the 2024 Vendée Globe.

DID YOU KNOW?

After competing in the Everest of the seas in 2020, **Maxime climbed Everest, the mountain, in 2023.**

PROJECT

V and B – Monbana – Mayenne

The alliance between V and B, Monbana and La Mayenne is a perfect match!

V and B, number 1 in the cellar and bar concept, has been working alongside Maxime since 2014. They share common values that have bound them together for almost 10 years! In 2019, it is the Department of **La Mayenne** which is committed to Maxime as part of an attractiveness initiative for the area. Together they have completed their first round-the-world race, the Vendée Globe 2020. Encouraged by this success and driven by common values, the Mayenne chocolate factory **Monbana** has joined the adventure to support this new ambitious project for 2024.

COMMITMENT

Vaincre la Mucoviscidose

During his childhood, Maxime participated with his family in the «Virades de l'Espoir». In 2014, for his first Route du Rhum, he asked Alex, a childhood friend and cystic fibrosis patient (now deceased), to symbolically hoist the flag of the association «Vaincre la Mucoviscidose» in his sails. The skipper is now the national standard bearer of the association and brings his community and partners with him in this cause.

 **FRANCE**

 **1992-01-03**

free
lance
com

At the age of 31, Guirec Soudée has already sailed solo around the world via the North and South Poles and spent 130 days in the Greenland ice with his hen Monique. In 2021, he crossed the Atlantic rowing from East to West in 74 days, then set off again in the other direction, for the North Atlantic. He capsized off Canada but continued on his way, with no means of communication and no weather. 107 days later he reached the island of Ushant. In 2022, Guirec switched to the IMOCA circuit at the helm of Freelance.com. Today, he has only one thing in mind: lining up for the start of the 2024 Vendée Globe.

DID YOU KNOW?

His favourite book

The Odyssey of Endurance
by Ernest Henry Shackleton

Before becoming a professional skipper, **Guirec travelled the seas and the world, from the North Pole to the South Pole, with a red hen called Monique.** Three books have been published about his adventures. Sadly, his faithful shipmate passed away in early 2023.

D'IETEREN GROUP

1ST
PARTICIPATION
- APPLICANT 2024 -

 **LES SABLES D'OLONNE**

 **BELGIUM**

 **1967-07-29**

Denis Van Weynbergh, a former SME CEO, decided in 2018 to set sail for the Vendée Globe. He then became the owner of his IMOCA, but due to a lack of budget, he had to give up. Tenacious, he rethought and redesigned his project in 2020: he conceived it as a collaborative and associative project, favouring short circuits and reusing equipment rather than buying new parts. From 2021, he launched himself into the IMOCA circuit to gain experience and miles in order to validate his participation in the Vendée Globe and become the first Belgian to complete this round-the-world race.

DID YOU KNOW?

His favourite film:
Midnight Express

Denis has been playing hockey for 40 years.
He only started sailing competitively at the age of 33!

THE LEGEND

10 VENDEE GLOBE STORIES

**IN 2024, THE
VENDEE GLOBE WILL
BE CELEBRATING ITS
10TH EDITION!**

1. 1989/1990

PHILIPPE POUPON CAPSIZES OFF CAPE TOWN

On 27th December 1989, Philippe Poupon activated his distress beacon as he entered the Roaring Forties. With the means of communication available at the time, it was only 12 hours later that Loïc Peyron - his closest competitor - received the information from the race directors, who asked him to reroute to rescue him. It took him 24 hours to reach the given position, in very complicated conditions. When he saw the boat, it was lying 90° on the water. This situation was incongruous, as theoretically the weight of the keel should have swung the boat upright. He spoke to Philippe on the VHF and the two sailors decided to try a manoeuvre: Philippe threw Loïc a line to reorientate the boat and try to straighten it, but without success. They decided to cut the mizzen mast, the second small mast at the stern, which Philippe had had added shortly before the race and which had totally altered the balance of the boat. After two attempts, the boat finally righted itself! Philippe Poupon's Vendée Globe ended in Cape Town, South Africa. Since then, all the boats in the Vendée Globe have been subjected to a «self-righting test» when they are launched or when major modifications are made, to confirm that if they lie on the water, the pendular keel will be enough to make them right.

2. 1992/1993

BERTRAND DE BROC SEWS UP HIS TONGUE IN FRONT OF HIS MIRROR

On 8 January 1993, Bertrand de Broc suffered a serious injury to his face and, more importantly, a deep cut to his tongue, an incident which has become part of Vendée Globe legend. What could he do, alone at sea? The sailor had no choice but to stitch himself up, with the remote guidance of the race doctor, Jean-Yves Chauve. De Broc immediately inherited the nickname of «Rambo» and a reputation as a tough nut to crack that would never leave him. The general public got the full measure of what a single-handed, non-stop, unassisted round-the-world race could become.

3. 1996/1997

PETE GOSS AND RAPHAËL DINELLI, FROM COMPETITOR TO WEDDING WITNESS

At the end of December 1996, an Australian Navy aircraft spotted a ship in distress, battered by breakers off the Kerguelen Islands. It was Raphaël Dinelli's boat. The organisation asked Pete Goss to reroute to rescue him, in apocalyptic conditions. For 20 hours, Raphaël Dinelli waited for a miracle, and that day Pete Gosse became a formidable hero: upwind, against heavy seas, he managed to reach the wreck and saved the Frenchman's life in extremis, taking him on board with these words: «Raphaël is an exceptional sailor who has kept himself calm. He was close to death on several occasions (...) He made his own luck. I feel privileged to have him on board». At the finish, Pete Gosse added: «I set off to sail around the world single-handed and I came back with my best friend. I even became his wedding witness!»

4.

2000/2001

THOMAS COVILLE GETS HIS TASTE BACK WITH SODEBO

After a collision on the way down the Atlantic, followed by an autopilot problem in the Southern Ocean, Coville is about to retire. Exhausted, he could no longer feed himself. While his wife played an important role in the continuation of his adventure, another woman also made a major contribution: Simone Bougro, founder of Sodebo, his partner - and now major partner in the Vendée Globe - who was 70 years old at the time. On the phone, she said to him: «I don't care whether you win or lose. The only thing that interests me is that you start eating again. I'll make you a deal: every day at eight o'clock GMT, I'll go out onto my terrace and "meet you there" for a bite to eat together. This is how the sailor gradually managed to eat again and regain his strength to complete his round-the-world race!

5.

2000/2001

YVES PARLIER, SEAWEED EATER

On 17 December 2000, while sailing in the leading trio with Michel Desjoyeaux and Roland Jourdain, the mast of Aquitaine Innovation, Yves Parlier's boat, broke in three off the coast of Australia. Nicknamed «the extraterrestrial», the 41-year-old skipper - who is also a composite materials engineer - managed to fit an 18-metre mast he had cobbled together in a cove on a New Zealand island. He finished his Vendée Globe in thirteenth place, after 126 days, on a partial diet of seaweed: his victualling had not been planned for such a long voyage!

6.

2008/2009

JEAN LE CAM, SAVED BY VINCENT RIOU

In early January 2009, Jean Le Cam capsized off Cape Horn after suffering keel damage. Vincent Riou and Armel Le Cleac'h went out of their way to rescue him. They found the boat upside down, without a keel bulb. The boat sank a little deeper with each wave and the two competitors initially struggled to make contact with Jean, who finally gave a sign of life. Vincent Riou tried several approaches to throw a line to the shipwrecked sailor. In the manoeuvre, Vincent Riou's boat was damaged, but the sailor eventually got Jean Le Cam back on board. What a relief! The two competitors rounded Cape Horn together aboard PRB. Shortly afterwards, they dismasted as a result of the outrigger breaking during the rescue. Despite his retirement, Vincent Riou was ranked joint 3rd by the organisers.

7.

2000/2001

ELLEN MACARTHUR, THE PUBLIC FAVOURITE

At just 24 years of age, British sailor Ellen MacArthur has made a name for herself. On 11 February 2001, all the cameras were on her: aboard Kingfisher 2, she completed the fourth edition of the Vendée Globe in 2nd place, just behind a certain Michel Desjoyeaux, at the end of a race lasting 94 days, 4 hours and 25 minutes. In 1997, she took part in the Mini Transat, a single-handed transatlantic race on 6.5 metre boats. She was the youngest of all the competitors and the only woman. Three years later, she finished on the 2nd step of the Vendée Globe podium: a meteoric rise, never seen before! Now retired from competition, Ellen MacArthur is an iconic figure in sailing. Her determination, courage and commitment to a more sustainable future make her a role model for an entire generation!

8.

2016/2017

ENDA O'COINEEN AND THOMAS RUYANT, THE GREAT STORY BORN IN NEW ZEALAND

In 2016, for his first Vendée Globe, Thomas Ruyant was forced to abandon. He headed for New Zealand, where his boat - heavily damaged - had to be repaired. Enda O'Coineen, the Irish competitor, dismasted off New Zealand and also reached land without assistance. His damaged boat «Team Ireland», which had been sold to Arnaud Boissières, had to get back to France quickly to find a new mast and be repaired. Thomas and Enda then decided to merge their projects: Thomas' boat was repaired by his team in New Zealand and Enda carried out the delivery trip to Les Sables d'Olonne to complete the round-the-world race (out of the race): the ambition of a lifetime! Several weeks later, Thomas Ruyant welcomed him to Les Sables d'Olonne - alongside supporters of the two projects and the passionate local population.

9.

2020/2021

JEAN LE CAM, THE RESCUED TURNED SAVIOUR

While sailing in 3rd place in the Vendée Globe, off the Cape of Good Hope, Kevin Escoffier sent a message to his shore crew: «I'm sinking, this is no joke». He triggered his distress beacon and the organisers rerouted the first competitor, Jean Le Cam to come to his rescue, then Yannick Bestaven and Boris Herrmann, and finally Sébastien Simon. The sea was rough and night was falling. After spending 11 hours in his life raft, Kevin Escoffier was rescued unharmed by Jean Le Cam. He was then picked up by the French frigate the Nivose, before being taken to Réunion Island. The sailors rerouted for the rescue received «time compensation» on their arrival from the round-the-world race. Jean Le Cam received a time bonus of 16 hours and 15 minutes on his race time. This compensation enabled Jean Le Cam to move up to 4th place in the rankings and Yannick Bestaven to win ahead of Charlie Dalin, who was the first to cross the finish line.

10.

1996/1997

ONE MAN, ONE BOAT, ONE ROUND-THE-WORLD RACE... ONE BOXER SHORT

Second in the 1996 Vendée Globe, Marc Thercelin sailed around the world with just one T-shirt and one boxer short! The day after the start, he realised that the bag containing his socks, shorts and t-shirts had simply been left in the team van... Luckily, his mother had hidden a pair of fleece socks for him in the boat, bought at the market in Les Sables d'Olonne just before the start!

THE TROPHY

**SIXTY CENTIMETERS HIGH
AND THIRTY CENTIMETERS
OF CIRCUMFERENCE FOR
TEN KILOS.**

The imposing Trophy of the Vendée Globe is a piece of artwork in silver-plated bronze designed by Philippe Macheret. Everything in it evokes circumnavigation. It is composed of an elegant rigging surrounded by a terrestrial globe and sits on a pedestal in the shape of a winch. Edited by the Ateliers du Prisme and crafted in the Fonderie d'art Macheret, in Sarthe, it symbolizes the outcome of long months of work. Each winner of the Vendée Globe receives his/her trophy for life. Who will be the next one to raise it above his/her head? The answer, in January 2025.

LAMAZOU gets the ball rolling

The formula was simple. They had to sail around the world alone via the three capes. Without stopover. Without assistance. It seemed a crazy idea, but it would work well for the pioneers, who set sail from Les Sables d'Olonne on 26th November 1989.

In the newspapers, they asked: "How many would return?" At 1515hrs, Eric Tabarly fired the starting gun. The first example of damage set the tone: the gooseneck fitting on Crédit Agricole broke and Jeantot had to make another one with the means on board to continue his race. The general public found out what the Doldrums were like, bringing some to a halt with sails flapping, leaving others to make their getaway in a squall or thanks to a cloud... Aboard his .cureuil d'Aquitaine II, a brand new Bouvet-Petit design, Titouan Lamazou was already the frontrunner. He led the way from the third day of the race, closely followed by Philippe Poupon. On 28th December, Philippe Poupon triggered his distress beacons. Three boats headed towards

him. Loïck Peyron was the first to reach the area and filmed the whole crazy rescue. The operation was successful. Those pictures would be seen around the world : sailors could rescue each other, when things went wrong. Poupon was of course forced to retire, as was another favourite, Jean-Yves Terlain, whose UAP was dismasted. The American Mike Plant had to ask for help off New Zealand. Guy Bernardin was brought down by a horrible toothache, while Bertie Reed retired after rudder damage. About the South, Jeantot would later say: "For a week or ten days we sped along in amongst the icebergs, with the permanent risk of hitting one. It was too close to Russian roulette. We talked about it with each other on the BLU. We said we'd never do it again. As I was organising the race, I told myself that we would have to put that into the rules." On

9th February, Titouan Lamazou rounded Cape Horn as the leader, but his two closest rivals, Jean Luc Van Den Heede and Loïck Peyron, were only twenty hours or so behind. Patrice Carpentier had to stop in the Falklands. In the rankings it was close, as Loïck Peyron benefited from a bonus of 14 hours and 30 minutes for going to the rescue of Philippe Poupon. But Titouan Lamazou gave nothing up and on 16th March, five minutes after midnight, he crossed the finishing line as the winner in Les Sables d'Olonne. During the night escorted by dozens of spectator boats, Titouan Lamazou became the first winner of the Vendée Globe after 109 d, 08 h and 49 min. Loïck Peyron and "VDH" made up the star-studded podium. Seven boats were ranked. They all made it home. The legend was born.

ALAIN GAUTIER joins the hall of fame

In the second edition of the Vendée Globe, victory went to Alain Gautier, who finished first aboard his Bagages Superior. A huge sporting success. However, the race was marred by its first major dramas.

Fourteen sailors entered the race, but even before the starting gun was fired, the second Vendée Globe took a dramatic turn. The American, Mike Plant, who had already taken part in the first edition, would not make it to Les Sables d'Olonne. He was lost at sea during the delivery trip to the harbour in Vendée. It was the first major drama in the Everest of the seas. On 22nd November, the excitement was tangible when they lined up to set sail around the world. Unfortunately, on 26th November, another disaster hit the race. Nigel Burgess triggered his distress beacons. His body was found after drowning off Cape Finisterre. He was in his survival suit with his two beacons. His boat would be recovered with no significant damage. A complete mystery. As for the race itself, Lo.ck Peyron and Thierry Arnaud had to retire, Alain Gautier and Bertrand de Broc are first and second when they entered the Roaring Forties, followed by Philippe Poupon, Jean-Luc Van Den Heede and Nandor Fa. On 8th January, an episode

happened that would remain part of the legend of the Vendée Globe. Bertrand de Broc sliced his tongue open. He had no choice but to sew it back together himself... Bertrand did this, guided from ashore by the Race Doctor, Jean-Yves Chauve. De Broc was given the nickname Rambo and built himself a reputation of being indestructible. He will retire later because of a keel. Alan Wynne-Thomas was to spend twenty days in the Southern Ocean with six broken ribs. On 12th March, Bagages Superior, the boat of Alain Gautier, entered the harbour entrance channel after 110 days, 02 hours and 22 minutes. Titouan Lamazou's record was not beaten, but Alain Gautier was clearly a giant and was celebrated as such. Poupon logically lost his place as runner-up to VDh, who came in second after 116 days. By setting up a jury rig, Philou managed to make it to Les Sables d'Olonne and finish in third place. Yves Parlier, Nandor Fa, Jose Luis de Ugarte and Jean-Yves Hasselin, ranked 4th to 7th were the other heroes in this second edition of the Vendée Globe. We let the winner have the final say. For Alain Gautier, it was clear. *"The Vendée Globe is without doubt the race, which gave me the most in life in general, and taught me the most about myself."*

CHRISTOPHE AUGUIN

The King of a dramatic edition

Christophe Auguin won the third Vendée Globe masterfully. But, unfortunately, Gerry Roufs was lost at sea during this edition although unbelievable rescues took place: Raphaël Dinelli was rescued by Pete Goss, Thierry Dubois and Tony Bullimore by the Australian Navy.

On 3rd November 1996, in front of the crowded quay of Les Sables d'Olonne, sixteen sailors set sail on the Vendée Globe (in particular Catherine Chabaud and Isabelle Autissier, as well as Raphaël Dinelli who takes the start in "pirate mode"). A raging Great South batters the skippers. On Christmas Day, Raphaël Dinelli sends out this message: "60 knots of wind with terrible gusts at 70. The boat has capsized twice, a lot of damage inside. Everything is a wreck on the deck. With no sails up, I'm moving at 18 knots on the surfs and the boat is still

Christophe Auguin facing the media on returning from his round-the-world record

lying on its side!"

Pete Goss, who sails a 50-foot boat, decides to reroute under apocalyptic conditions after seeing a frightening picture taken by a plane of the Australian Navy : Raphaël Dinelli standing on top over his overturned hull, clinging to a rope with the energy of despair and assailed by the breakers. During 20 hours, Raphaël hopes for a miracle... And, that day, Pete Goss becomes a wonderful hero: upwind against a horrific sea, he manages to reach the wreckage and saves the French man's life in extremis. Unfortunately, we are not done with fear yet. On day 64, Tony Bullimore and Thierry Dubois are saved by rescue services. But another deafening anxiety concerns the one ranked second: Gerry Roufs isn't answering anymore. On 7th January, the beacon of his boat stops transmitting. The day before, during a conversation

with Isabelle Autissier, the Canadian explained he was in a daunting storm "with unrecognizable waves, higher than the Alps" (some weather models identified waves over 20 meters high). Isabelle Autissier, Marc Thiercelin, Eric Dumont and Bertrand de Broc search in vain: Gerry Roufs has disappeared. At the end of August 1998, pieces of the Groupe LG2 wreckage were found on Atalaya Island, to the South of Chile.

Christophe Auguin crosses the finish line on 17th February 1997 after 105 days, 20 hours, 31 minutes and 23 seconds at sea. In the end, six skippers are ranked. Must be added to the podium the names of Eric Dumont and of two other heroes: British Pete Goss, Raphaël Dinelli's rescuer and, finally, Catherine Chabaud, first woman to finish a solo non-stop round-the-world race without assistance.

MICHEL DESJOYEUX, the professor, wins

2001

The fourth Vendée Globe was a turning point. The shock of 1996 was still on everyone's mind and safety was improved. There was much more coverage thanks to pictures being sent back. But more importantly, the event became a truly global race. In this contest, while we saw the arrival on the scene of Ellen MacArthur, it was Michel Desjoyeaux, who proved to be the strongest.

24 sailors lined up for the first Vendée Globe of the new century, including eleven non-French skippers from Belgium, Switzerland, Italy, Spain, Russia and Britain. Two women lined up at the start, Catherine Chabaud and the young British sailor, Ellen MacArthur, aged just 24. Stricter safety and construction rules have been applied. Initially planned for Sunday 5th November, they eventually got underway four days later. In spite of that, they got off to a cracking start with Roland Jourdain and Michel Desjoyeaux setting the tone. The leaders fought it out, as they clearly knew how to do getting the most out of their boats. "I am not an adventurer, I'm a racer," stated Desjoyeaux. Behind them, Ellen MacArthur held on and sent back video and audio of life on board, not hiding her joy, when she danced on the deck, or her fears, when she had to climb to the top of the

mast. The general public loved it and she became the media's favourite. There was plenty for the media, as this edition also marked the arrival of more sophisticated means of communication, allowing better boat-shore contact. Ellen MacArthur and Josh Hall filmed huge icebergs close to them, while Dominique Wavre covered 432 miles averaging 18 knots. The big news was that the former leader, Yves Parlier lost his mast, but he repaired his mast on Stewart Island. On 1st January 2001 in the middle of the Pacific, Michel Desjoyeaux's engine would not restart. But thanks to a pulley system attached to the boom of his boat and a sudden gybe to create a shock, he finally managed to get the engine going again and hope returned. It was an epic climb back up the South Atlantic. The leaders, Desjoyeaux and MacArthur were neck and neck as they crossed the Equator, while Jourdain and Thiercelin were battling it out for third place. On 10th February 2001, a huge firework display and a memorable celebration welcomed the winner Michel Desjoyeaux and his PRB. For the first time a solo sailor had managed to complete the voyage in less than 100 days: 93 days, 03 hours, 57 minutes. There were huge crowds and emotions ran high. That would also be the case to welcome Ellen MacArthur (second place) and Roland Jourdain (third place).

2004 2005

The arrival of **VINCENT RIOU** otherwise known as 'Vincent the terrible'

The fifth Vendée Globe saw an epic duel fought out between the Bretons, Jean Le Cam and Vincent Riou. The battle raged throughout the race with the British sailor, Mike Golding also having his say. In the end, it was Vincent the Terrible, aboard PRB, who would come out on top.

Twenty skippers lined up at the start of the fifth Vendée Globe on 7th November 2004 off Les Sables d'Olonne. Among them, the elite of French ocean racing and seven from other countries, Britain, the United States, Australia, Switzerland and Austria. As is often the case, a third of the fleet were hoping to win, while some others saw it as an adventure aiming simply to make it all

Vincent Riou wins a historic duel against Jean Le Cam

the way around the world. Two women took part, Anne Liardet and Karen Leibovici, and they would both be among the thirteen ranked at the finish. On the harbourside in La Chaume and Port Olona, the crowds lined up with more than 300,000 spectators. The Canaries were behind the first boats after just four days at sea. They crossed the Equator in merely ten days.

At the Cape of Good Hope at the tip of South Africa, Vincent Riou and Jean Le Cam had already built up a good lead. Sailing practically within sight of each other after 6000 miles had been clocked up, Riou and Le Cam managed to get 300 miles ahead of a duo comprising Sébastien Josse and Roland Jourdain. In the Roaring Forties, many skippers retired. In the Indian Ocean, the duel between Riou and Le Cam at the front continued at high speed. In the Pacific, the duel was still just as tight between Vincent Riou and Jean Le Cam, who found the time to come up with nicknames for

his two closest rivals, Goldfinger for Mike Golding and Vincent The Terrible for Riou. Le Cam rounded the Horn in front. But the climb back up the South Atlantic was cruel for King Jean, who got caught in the high, while Mike Golding clawed his way back... Vincent Riou was now dominating the race. The final stretch would be marked by two incidents. Firstly, Ecover, Mike Golding's boat, lost her keel, but the British skipper would not quit and continued to sail as if she was a dinghy to get a well-deserved third place. Secondly, Vincent Riou was forced to sail a long way north before coming back down to Les Sables d'Olonne. Vincent Riou won the race on 2nd February 2005 after 87 days 10 hours and 45 minutes at sea, a new record, averaging 12.73 knots. Jean Le Cam took second place less than seven hours later and so Mike Golding completed the podium the next day. Thirteen sailors were ranked.

Another incredible achievement by **DESJOYEUX**

The sixth edition of the Vendée Globe will be remembered for the spectacular rescue of Yann Eliès in the Indian Ocean and Jean Le Cam at Cape Horn. The big achievement in the race was that of Michel Desjoyeaux. After setting out more than 40 hours late, after returning to Les Sables d'Olonne to carry out repairs, he clawed his way back and won the race for the second time after 84 days at sea.

There were a record number of entrants with no fewer than thirty skippers lining up, including thirteen from outside of France. Among them, there were two previous winners, Vincent Riou and Michel Desjoyeaux. Early on, boats suffered from damages: Kito de Pavant, Alex Thomson and Yannick Bestaven were forced to retire on the second day of the race. Marc Thiercelin's boat was dismantled on the following day. Five other sailors had to turn back to Les Sables d'Olonne to carry out repairs, including Michel Desjoyeaux who set sail again 41 hours after the initial start. At sea, everything was going well for Loïck Peyron, who confirmed that he was one of the favourites, when he crossed the Equator as the leader. Further back, Michel Desjoyeaux had already begun his comeback. December was a terrible month. Conditions were hellish in the Indian Ocean. One sailor retired after another:

2009

Loïck Peyron, Mike Golding, Bernard Stamm, whose boat was swept onto the rocks, while Dominique Wavre was experiencing difficulties with his keel. On 18th December, Yann Eliès broke his femur and pelvis when manoeuvring. He suffered horribly and had to make a superhuman effort to take refuge inside his boat and then look for painkillers. Marc Guillemot headed for him in horrible conditions to go to his aid, then the Australian Navy took off the skipper after suffering for two days. The incident generated huge emotions ashore and obtained unprecedented media coverage. In the race, the incredible was happening. Michel Desjoyeaux took the lead! Sébastien Josse and Jean-Pierre Dick are forced to retire. After 56 days at sea, Michel Desjoyeaux rounded the Horn as leader just a few hours ahead of Roland Jourdain. Jean Le Cam, then in third place, capsized 200 miles from Cape Horn. Vincent Riou was the first to arrive in the area and managed to rescue Jean Le Cam. PRB was dismantled the next night but Vincent Riou would be re-ranked third equal by the Jury. Michel Desjoyeaux crossed the finishing line after 84 days, 3 hours, 9 minutes and 8 seconds. Vincent Riou's record was beaten by three days. Armel Le Cléac'h, regularly up with the frontrunners took the second place. Marc Guillemot took third place. Only eleven were to be ranked.

FRANÇOIS GABART shatters the record in 78 days

For the first time, two sailors completed the race in less than 80 days. François Gabart and Armel Le Cléac'h fought an incredible duel around the world, finishing after 78 days at sea with just three hours between them in Les Sables d'Olonne.

Here's what happened. Twenty skippers were there at the start on 10th November 2012, including Samantha Davies, Vincent Riou, Marc Guillemot, Armel Le Cléac'h, Jean Le Cam and Mike Golding... After two days of sailing, Kito de Pavant collided with a trawler and was forced to retire. Two days later, the same thing happened to Louis Burton. On 15th November, Samantha Davies's *Saveol* was dismasted. On 18th, Jérémie Beyou retired, when his keel jack broke. By the Canaries, a group of six had formed at the front with Armel Le Cléac'h, François Gabart, Jean-Pierre Dick, Vincent Riou (he would retire later), Bernard Stamm and Alex Thomson. At the Equator, Armel Le Cléac'h was 5 hours ahead of his opponents. Jean Le Cam, Dominique Wavre and Mike Golding began the purchase of the leaders. At the Cape of Good Hope, Armel Le

Cléac'h set a new intermediate record of 22 days and 23 h. In the Indian Ocean, there was an incredible fight going on at the front between each ice gate. On 10th December, François Gabart set a daily record of 534 miles. He was just behind Armel Le Cléac'h. Le Cléac'h and Gabart manage to hop onto a slightly more favourable weather system and their lead extended rapidly. To the south of Australia, the duel was relentless between François and Armel. Bernard Stamm was forced to carry out a pit stop to attempt to repair his hydrogenerators, but, without being asked to do so, a sailor of the boat he was linked jumped aboard *Cheminées Poujoulat*. The Jury considered that counted as assistance and Bernard was disqualified. On 1st January, François Gabart rounded the Horn 80 minutes ahead of Armel Le

Cléac'h. When Armel and François were climbing back up the Atlantic, Alessandro di Benedetto was an ocean apart! Armel Le Cléac'h went on the attack, by tacking to the west, but François Gabart was in control. The gap widened gradually. François Gabart did not make any mistakes and sailed fast. On 27th January 2013, François Gabart became the youngest winner of the Vendée Globe and the first to finish in less than 80 days: 78 days, 2 hours, 16 minutes and 40 seconds. Three hours later, Armel Le Cléac'h was honoured by the crowds. Alex Thomson took third place. In all, eleven sailors were ranked. Alessandro di Benedetto, one of the public's favourites, would finish with amazing celebrations on 22nd February after 104 days at sea.

> Disqualified

- Bernard Stamm (CH), *Cheminées Poujoulat*
Au mouillage pour réparer ses hydro générateurs, Bernard Stamm s'aperçoit qu'il dérive en direction d'un navire Russe qui lui propose alors de s'amarrer à couple. Il accepte et, sans avoir le temps d'expliquer la situation, un homme de l'équipage du bateau monte à bord pour l'aider. Le règlement du Vendée Globe est très clair : les skippers ne peuvent bénéficier d'aucune assistance, le marin est disqualifié.

François Gabart celebrates his incredible victory with only 3 hours ahead of Armel Le Cléac'h

2016

ARME LE CLÉAC'H, victory at last

Once again, it's after a sumptuous duel that victory chose its side. Armel Le Cléac'h, runner-up behind François Gabart in 2013, overtook British Alex Thomson by a few hours. On that occasion, he set a new record for the race in just over 74 days.

Twenty nine sailors took the start, with nearly half of them recidivists. The beginning of the race is fluid, with a favourable weather. Only Spanish Didac Costa came back to Les Sables d'Olonne to repair a faulty ballast tube. Alex Thomson got the best deal of the day. By opting to cross the Doldrums on a more easterly route than the others, he benefitted from a better angle in the trade winds of the South hemisphere and started to widen the gap. In his wake, a few solo racers clung to him: Armel Le Cléac'h, Vincent Riou, Jérémie Beyou, Sébastien Josse, Paul Meilhat or Morgan Lagravière. The South Atlantic also had its share of victims. First of all, Bertrand de Broc who gave up after having hit a UFO, and Vincent Riou and Morgan Lagravière retired. At the Cape of Good Hope, Alex Thomson and Armel le Clac'h followed one another by less than 5 hours. On November 28th Armel Le Clac'h regained the race lead and didn't let go until the finish. Behind them, retirements occurred in a cascade.

2017

Kojiro Shiraishi, Sébastien Josse and Kito de Pavant who hit an immersed object and threatened to sink (he was saved by the Marion Dufresne, a supply boat). The Pacific wasn't gentler with retirements of Thomas Ruyant, Stéphane Le Diraison, Paul Meilhat and Enda O'Coineen. Armel Le Cléac'h reached the Cape Horn with a comfortable advance on Alex Thomson. But nothing happened as expected. Stuck in calm leeward winds near Tierra del Fuego, Armel Le Cléac'h saw his advance melt away. And it was now up to Alex Thomson to experience the light airs which had slowed down the leader. Progressively, the gap widened again but Armel Le Cléac'h stayed under pressure until the finish line. For some solo racers, going up the Atlantic felt like a cross to bear. Eric Bellion suffered damage on his mainsail rail and Conrad Colman dismasted off the coast of Portugal. The New Zealander refused to abdicate and was able to cobble together a rigging of fortune to reach Les Sables d'Olonne and cross the finish line. On January 19th, Armel le Clac'h crossed the finish line in front of the South Nouch buoy at 16h38 (local time) setting a new record of 74d 03h 36mn. 50 days went by before seeing Sébastien Destremau, last qualified competitor, finally reaching the finish line.

At last, the victorious Armel Le Cléac'h crosses the line, with a new record at stake. After a high-flying duel against Alex Thomson.

2020 2021

YANNICK BESTAVEN the best !

An unprecedented health context, some fog on the line, Kevin Escoffier's rescue, an unfavorable weather system for speed, the panache of daggerboard boats, close racing conditions on the three oceans, the game of compensated time ... The 9th edition of the Vendée Globe followed an unusual and captivating scenario!

Will the Vendée Globe take place? The question was asked for a long time. Gripped by the intensity of the Covid-19 pandemic, the planet was brought to a halt during several weeks at the beginning of 2020. Although pushed back during the summer, the shadow of a new lockdown hovered over the organization of the solo round-the-world in autumn, but the Vendée Globe held up. Ten days after its opening, the Village had to close down though. The population was once again isolated. We had to resign ourselves to this image: the 33 contenders going down the deserted channel of Les Sables

d'Olonne before setting off around the globe. Nevertheless, and despite being run during a lockdown, this edition had an incredible success, breaking all records of audience.

A delayed kick-off

Initially scheduled at 13H02 on Sunday 8th November 2020, the start finally took place one hour and 18 minutes later due to a patch of languid fog fixed on the line. At 14H20, the competitors set off into two typical depressions of the North Atlantic and then a third one, Thêta, described as a tropical storm. On the day of the start, Fabrice Amedeo (Newrest – Art & Fenêtres) had to return to Les Sables because of a broken gennaker hook which had damaged the mast. He resumed his race two and a half days later. On 11th November, Jérémie Beyou (Charal) gave up his dream of victory : he also had to come back to Les Sables d'Olonne to repair damage caused by hitting a ufo, an unidentified floating object. He arrived in Les Sables on the 14th November and set sail again on the 17th, nine days after the lead of the fleet. The day before, Nicolas Troussel (CORUM L'Épargne) had dismasted. He was the first to retire from the race.

Daggerboard boats held up

On 18th November, Alex Thomson (HUGO BOSS) took the lead at the equator. It was the tenth day in the race but 16 hours more than four years before. Four days earlier, Jean Le Cam (Yes We Cam!), Benjamin Dutreux (OMIA – Water Family) and Damien Seguin (Groupe APICIL) were still at the forefront with their daggerboard boats. In the depressions, these IMOCA's proved more agile than foilers. The close combat between boats of different generations had only just begun.

Two days later, while moving slowly along the South-American coasts, Alex Thomson

suffered a structural problem and had to undertake major repair. Meanwhile, Thomas Ruyant (LinkedOut) and Charlie Dalin (APIVIA) managed to escape. Facing them was a raggedy Saint-Helen anticyclone. Unsteady, rather frumpy, badly oriented, it stretched out in tatters and would block them later. The leading pair ventured with three hundred miles ahead of Jean Le Cam, clearly fearsome in designing his trajectory.

DIY or retire?

The first two weeks scattered some damage among the fleet: Kojiro Shiraiishi (DMG MORI Global One) glued together large parts of his mainsail; Armel Tripon (L'Occitane Provence) finally decided not to reach La Coruna to repair a broken hook but then had to make the best of a bad job with the means of the youngest boat in the race; later on, Isabelle Joschke's pushpit was torn off by a sheet block.

While very busy with different repairs during the last of the Atlantic descent, Alex Thomson hit a ufo. With his rudder damaged, he announced retiring from the race off Cape Town. A few days before, Thomas Ruyant (LinkedOut) had lost the use of his cracked port foil. A hard blow that favoured Charlie Dalin (APIVIA) who escaped – partially, as always in this Vendée Globe. It seems like the fleet behind always caught up!

The longest night

On 30th November, as the leader was about to round Cape of Good Hope, the Vendée Globe headquarters were set ablaze and got in full emergency mode: Kevin Escoffier, 3rd in the race, only had a few seconds to inform his technical team: his PRB IMOCA had broken in two, he needed to be rescued. And that was it, for lack of communication.

*ofni : objet flottant non identifié

Both his team and Race management supposed he was on a life raft without a telephone. Jean Le Cam (Yes We Cam!) then 4th, Yannick Bestaven (Maître Coq IV) 5th, Sébastien Simon (ARKEA PAPREC) 7th and Boris Herrmann (SeaExplorer – Yacht Club de Monaco) 8th were re-routed by Jacques Caraës, race director. The four skippers were in the wake of PRB and the search, hazardous but orderly, began following both the positions emitted by a distress beacon and a grid of the shipwreck zone defined by winds, currents and the drifting of the life raft. During twelve hours, a feeling of anxiety seized the fleet, the race and all of France. At 2H18 French time, Jean Le Cam declared having recovered Kevin Escoffier. We could breathe once again! On 6th December, the survivor was dragged from Yes We Cam! aboard the Nivôse frigate.

The jury's decision

This incredible event happened four hundred miles off Cape of Good Hope but had effects all the way to Les Sables d'Olonne: for the time they had lost during the search, the re-routed skippers obtained compensated time defined by the jury of the Vendée Globe on 16th December: 16H15 for Jean Le Cam, 10H15 for Yannick Bestaven, 6H for Boris Herrmann. Sébastien Simon did not wait for this allocation: two days after the rescue, ARKEA PAPREC's skipper hit a ufo: his starboard foil was damaged but more seriously the foil casing and its attachment separated from the boat and there was a water ingress. On 4th December, the skipper from Vendée retired from the race. The following day, Sam Davies (Initiatives-Coeur) also renounced due to a damaged keel after underwater contact. Fourth to retire in this edition, she promised to resume outside of the race once the repairs were done. The South African port welcomed another unfortunate competitor soon after: Fabrice Amédéo, after his computer crashed.

Meanwhile, the Indian had decided to empty its quiver and shoot its arrows. Sometimes strong, sometimes soft, they disturbed the skippers' weather forecasts, gave them a scare in the Great South with a depression around the Kerguelen islands or delivered apathy in impassable sluggish zones. So much so that on 13th December at 11H25 UT, when Charlie Dalin reached Cape Leeuwin first, Jean Le Cam was 4th (at 232 miles), Damien Seguin 5th (233 miles, Groupe APICIL), and Benjamin Dutreux 6th (252 miles, OMI-Water Family). In front of these three old daggerboard boats were Thomas Ruyant (2nd), not yet really weakened by the absence of his port foil which he had cut off shortly before on the open sea, and Yannick Bestaven (3rd, at 67 miles, Maître Coq IV) who navigated ideally to catch up with the delay generated by Kevin Escoffier's rescue. They were actually 10 to be within 400 miles, including Giancarlo Pedote (Prysmian Group) and Isabelle Joschke (MACSF), the new leader of the 6-women peloton competing in the adventure.

A new leader

The Pacific shuffled the cards once again. Charlie Dalin had to concede several hours to his followers to do some repairs and fix a makeshift foil attachment base... and Yannick Bestaven took the lead, keeping it for a long time. He rounded Cape Horn on 2nd January after 55 days at sea and with over 160 miles ahead of Dalin and 460 of Ruyant. Behind them, Damien Seguin reached his first Horn in 4th position, less than 24 hours after the leader. So did Benjamin Dutreux, 5th. Hats off to Louis Burton who found shelter off Macquarie Island, a small island lost in the great South of New Zealand, and had to climb the mast three times to repair a series of technical setbacks which had stopped him from using some headsails. He rounded the third cape of this round-the-world in 6th position and stayed in the match. The ascent of the South Atlantic was

true to the weather patterns that seemed to repeat themselves and systematically impacted the leaders' progression. Yannick Bestaven suffered its consequences along the ascent of South America. All the more so, as we learned later that he had lost the use of many of his sails during a bad nosedive in the middle of a depression off Cape Horn which had torn away his furlers and pulprit.

Last ones to retire

Despite her amazing involvement, Isabelle Joschke finally gave up on 9th January. In the Southern seas, MASCF's keel actuator rod separated from the keel head which threatened the integrity of the boat and forced her to retire. Following was Sébastien Destremau who retired in the South of New Zealand.

So who actually won?

At the start of the 10th week in the race, the hierarchy was disrupted again. In four days, Yannick Bestaven lost the full 439-mile lead that he had managed to get over LinkedOut during the first half of the South American ascent. The pack (Ruyant, Dalin, Seguin, Dutreux, Le Cam, Pedote) came storming after him. The most inspired were Boris Herrmann, who made a spectacular comeback and arrived in 3rd position along the Northern coasts of Brazil, in the wake of Louis Burton, first to cross the equator on the way back, who beat Charlie to it by 59 minutes. Less than four hours separated the first four (including Herrmann and Ruyant). The return in the North Atlantic did not make positions clearer, on the contrary: a high pressure system cast doubt on the direct route to Les Sables d'Olonne while a heavy depression opened a westerly option which Louis Burton, Thomas Ruyant and Yannick Bestaven took on 25th of January in a last attempt to win. Charlie Dalin and Boris Herrmann chose the South, brushing Cape Finisterre and considering they would finish better than their direct competitors for the podium

thanks to a better wind angle on the last tacks. On an intermediate route, Damien Seguin and Jean Le Cam were running for the podium.

Coming from Cape Finisterre, Charlie Dalin (Apivia) crossed the finish line first on 27th January at 20H35. Louis Burton (Bureau Vallée 2) arrived from the West with nearly no electrical devices working except his automatic pilot and endured problems with his mainsail despite his epic stop in the great South. He finished 2nd on Thursday 28 at 00H45. Also on a Westerly route, and sailing under what sails he had left, Yannick Bestaven finished his solo round-the-world in 3rd place on 28th January at 04H19. He struck gold with his race time: the 10h15 credit granted by the Vendée Globe's international jury made him the great winner of the 2020-2021 Vendée Globe.

If the story had ended with these three finishes, it would already have been impressive. But these 24 hours during which 8 boats crossed the finish line – how dense! – had not yet revealed all their surprises. A place on the podium seemed destined to Boris Herrmann but he collided with a long-liner at night, 80 miles from the finish. He lost precious time and at least two places in the ranking.

Having arrived in 4th position in Les Sables d'Olonne, in the wake of the winner, Thomas Ruyant was downgraded two places (6th): Sea Explorer- Yacht Club de Monaco's skipper had a 6-hour credit which ensured him a definitive 5th place. King Jean, the last to cross the finish line on this 28th January at 20H35 climbed to 4th place in the general ranking thanks to his 16H15 compensated time.

Damien Seguin does not only have great talent, he also has an incisive sense of self-mockery. 6th on the finish line, this double Paralympic champion (born without his left hand) showed up in the channel of Les Sables d'Olonne dressed up as Captain Hook and took hold of a beautiful 7th place in the ranking. Giancarlo Pedote (Prysmian Group)

arrived 7th on the line but finished at a remarkable 8th place. On 29th and 30th January, Benjamin Dutreux (OMIA – Water Family) and Maxime Sorel (V and B – Mayenne) respectively took 9th and 10th place, proving the robustness of daggerboard IMOCA's which occupied 4 places in the top 10 of this 9th edition of the Vendée Globe.

On 3rd February, Clarisse Crémer was the first woman of this edition to cross the finish line, in 12th position behind Armel Tripon (11th) who had arrived on 1st February. Banque-Populaire X's skipper symbolically became the fastest woman in a solo round-the-world.

» The ranking of the edition

1. Yannick Bestaven (Fra, Maître Coq IV): 80d 03h 44min

2. Charlie Dalin (FRA) APIVIA, 80d 06h 15min
3. Louis Burton (FRA) Bureau Vallée 2, 80d 10h 25min
