

# AUTROL-Q

## DIRECTIONS

AUTROL-Q is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algal growth, microbiological slime and other deposits. An initial slug addition of 1 to 2 fluid ounces of AUTROL-Q per 1000 gallons of water to provide a concentration of 8 to 20 parts per million of AUTROL-Q based on the total weight of water in the system is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 1 to 2 fluid ounces of AUTROL-Q per 1000 gallons of water (2 to 20 parts per million of AUTROL-Q) should be employed every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

### 1 GALLON

NET CONTENTS

# ALGAECIDE FUNGICIDE BACTERICIDE

ACTIVE INGREDIENT	
Polyoxvethylene(dimethylamino)ethylene-(dimethylamino)ethylene dichloride	60%
INERT INGREDIENT	40%

Weight per gallon ..... 9.60 pounds  
 Weight of active ingredient per gallon ..... 5.76 pounds

## CAUTION:

**KEEP OUT OF REACH OF CHILDREN**  
 See additional cautions on side panel.
