<u>Product End of Life Notification</u>

ADADIO

General Standards Corporation is committed to providing the highest quality products and services to our customers.
As a technology developer and provider, we understand that technology evolution allows our customers to establish and maintain competitive advantages, achieve operational efficiencies, and provide superior customer service.

At General Standards Corporation, we view product EOL as a part of the life cycle that drives new technology and product innovation.

All technology products eventually reach the end of their useful life requiring a business decision to discontinue availability and maintenance.

The **ADADIO** line of products have reached a point in its life cycle where components are increasingly difficult to source.

As such, we must make a difficult business decision to announce the EOL on the **ADADIO** line of products effective as follows;

MODEL		EOL Date
PMC-**ADADIO**	(True PMC Form Factor)	12/30/2019
PCIE-**ADADIO**	(PMC Form Factor on a PCIE Adapter)	12/30/2019
PCI-**ADADIO**	(PMC Form Factor on a PCI Adapter)	12/30/2019
cPCI-**ADADIO**	(PMC Form Factor on a CPCI Adapter)	12/30/2019
PC104P-**ADADIO**	(True PC104P Form Factor)	12/30/2019

We will do our best to accommodate repairs or replacement for legacy products purchased before 06/15/2019, but our ability to fulfill orders relies on component availability.

We will inform customers of component availability upon request.

We will not accept new orders for any **ADADIO** products after 12/30/2019.

We have now completed the **ADADIO2**, as a replacement for legacy applications.

For all New Designs, please see the PMC66-16AISS8AO4. This is an enhanced version available with higher sample rates, larger buffers, buffered analog outputs, etc.

These boards are replacements with the same functionality and more capability; however, depending on your driver it is very close to a "drop in" replacement.

The following is the URL to our ADADIO2 landing page;

http://www.generalstandards.com/view-products2.php?BD_family=adadio2

The following is the URL to our 16AISS8AO4 landing page;

We would like to suggest a free loaner board, for you and your end-users to evaluate.

For the loaner board, you can submit a PO indicating the board required as a loaner.
"Loaner" Purchase Order must state full price for whatever is ordered as well as "Bill To" and "Ship To" Information.

The loaner will be for 60 days. You will receive an invoice for the loaner items.
If the loaner is returned within 60 days, no charges will be due (full credit will be given for that invoice). If purchased, the invoice amount will be due within 60 days.

As always we have our Technical Support team and engineers, available to assist with any questions or concerns.

General Standards Corporation understands how integral this equipment is to our customer's overall productivity. Newer technology provides more productivity and greater efficiency in the same or similar applications as these older products. As an engineering-driven company, we maintain a continuous new product development schedule.

Please contact General Standards Corporation at 1-800-653-9970 to discuss optional products or if you have any questions or concerns.

Sincerely,
General Standards Corporation
