FESTIVAL THEATRE, BAYREUTH.

The Festival Theatre of Bayreuth is the culmination of an idea conceived by Richard Wagner in 1858. He felt that no opera house afforded proper staging possibilities for his monstrous productions and his artistic ideals demanded a stage of greater proportions than any yet considered. A free grant of aid was obtained, situated upon a hill with beautiful prospects. The cornerstone was laid in 1872, but difficulties as to funds led to the abandonment of the project in 1874. However, King Ludwig II. of Bavaria became interested and performances of the Ring began August 13, 1876. Through the efforts of Wagner's son and son-in-law, the place has been kept sacred to the production of his music dramas. Every ideal he established is religiously respected by the singers, who in nearly every case give their services without remuneration. Artistic effect is sought in the same manner and even the orchestra is hidden under the stage. The opera house affords a seating capacity of 1650.

PREFACE

A dictionary of any language is properly supposed to contain all words in use in that language and also words which have been used in time past, but which have become obsolete. These obsolete words are included in order that the development and history of the language may be studied, and, for this reason, they are a very important part of such a work. This should also be true of a musical dictionary, as many terms which are not in use at the present time are of great value in the study of the history of music and also for a thorough understanding of old musical manuscripts. With this idea in mind, the list of terms given in this dictionary have been compiled, including not only obsolete terms but also as far as possible equivalents in the various languages. For this reason, the number of terms given in this dictionary is greater than that found in any other musical dictionary extant, numbering as it does, about fourteen thousand definitions.

In all definitions, the aim has been to use only the simplest and clearest English, so that the definitions would be readily understood by the ordinary reader, as well as the most finished musician. This plan has been carried out, even in the definitions of terms related to such difficult subjects as Theory and Composition.

The work contains a number of special features not covered in any other musical dictionary. Among them being, Dances, National Songs, Poetic Meters, Modes and the Parts of the Mass. Each of these has been defined under the general term and also each specific dance, song, meter, etc., has been included in its alphabetical place.

Illustrations have been placed under English terms wherever practicable, rather than under the foreign equivalent. Musical instruments have been described under their English names, except instruments peculiar to a certain nation, in which case they are given under the name by which they are known in the language of that nation.

An absolute alphabetical arrangement has been followed throughout the work.

In a book of this character, which presents great difficulties in the mechanical work of compilation and proof reading, it is impossible to entirely avoid occasional errors, but it is hoped that they have been reduced to the minimum.

z as in zone

The following notes are in no sense a comprehensive set of rules. They are offered as a possible aid to the better understanding of the more difficult sounds in the French, Italian and German.

The French vowels are frequently modified by accents.

à is sounded like ǎ:

jeu à bouche, zshǔ ǎ hoosh

é and ée are sounded like ä:

écu, ā-kü

volée, vō-lā

ê is sounded like ě:

même, mēm

è is sounded like ǎ or ě:

prière, prē-ār

pièces, pē-ēs

oi is sounded like wä:

droit, drwä

oiseau, wä-zō

In the French the nasal sounds are more exaggerated than in English:

1. am, an, ean, aen, aon, generally in final syllables, and en and em at the beginning of words are sounded like an in wander, and are marked ǎñ:

dissonance, dēs-sō-nǎñs

emporté, ǎñ-pōr-tā

2. en, im, in, aim, ain and ein, generally in final syllables, are sounded as an in lank and are marked ǎñ:

tyrolien, tē-rōl-yǎñ

3. om, on and geon, generally in final syllables, are sounded as on in honk and are marked ôñ:

bourdon, boor-dôñ

m and n lose their nasal quality when doubled, or when followed by a vowel:

tyrolienne, tē-rōl-yēn

chifonie, shē-fō-nē

DICTIONARY

Final consonants are usually silent:
chant, shāñ

There are exceptions to the above rule:

chef, shěf

Frequently the final consonant is sounded by carrying it over to the next word when the latter commences with a vowel. Euphony governs such cases:

chant amoureux, shān-t 'ă-moo-rŭ

The French r is rolled on the back of the tongue; as a final letter it is sounded except after e, er being sounded like ā:

dur, dŭr

diminuer, dē-mē-nŭ-ā

The French do not use syllabic accent; but as they are accustomed to lay stress almost invariably upon the final syllable, in many cases in this volume, an accent has been so placed as an aid to pronunciation. Better results will be obtained with the French sounds if the pronunciation is given rapidly, running the syllables together.

In Italian, each vowel has its own sound; when unaccented i and u are lightly uttered, the former in some cases being almost entirely lost.

Double consonants are of frequent occurrence, and a distinct sound should be given to each.

ch has the sound of **k**:

chiesa, kē-ā'-zā

c, before a, o and u has the sound of k; before e and i, the sound of ch in cheese:

da capo, dā kā'-pō

coro, kō'-rō

custo, koos'-tō

voce, vō'-chě

dolcino, dōl-chē'-nō

cc before e and i is sounded like **tch** in stretch:

accento, āt-chěn'-tō

tamburaccio, tām-boo-rāt'-chō

gn is sounded like **ny**:

sdegno, sdān'-yō

gg is sounded like **dj**:

arpeggio, ar-pěd'-jō

Before e and i, **g** has a soft sound:

generoso, jā-ně-rō-sō

giga, jē'-gā

Before a, o and u, **g** has a hard sound:

gaio, gā'-i-ō

gola, gō'-lā

gusto, goos'-tō

Although **i** is often practically silent it seems to influence the sound of **c** or **g** preceding it:

acciaccatura, āt-chāk-kā-too'-rā

gioco, jō'-kō

r at the end of a syllable or a word or when combined with another consonant, should be rolled:

chitarra, kē-tār'-rā

moderna, mō-děr'-nā

s is sometimes soft and is sometimes sounded like **z**:

doloroso, dō-lō-rō'-sō

deciso, dā-chē'-zō

z is either **ts** or **dz**:

giubilazione, joo-bī-lāt-sī-ō'-ně

zero, zā'-rō

In Italian, accent is less strong than in English. All syllables are more smoothly uttered.

In German the most difficult sounds to indicate are the unlauded, or modified vowels.

ä is represented by **ä** or **ě**:

Jägerchor, jā'-khěr-kōr

länderisch, lěn'-děr-ish

ö is represented by **ä** or **ě**:

Flöte, flā'-tě

höflich, hěf'-lĭkh

ü is represented by **ü**. It is much like the French **ü** and is sounded, usually, like **ue** in the English word **due**:

Flügel, flü'-gěl

Sometimes **ü** has the sound of **ī**:

fünf, fĭnf

äu is represented by **oi**, as in **oil**:

geläufig, gě-loi'-fĭkh

ie is sounded like **ē**:

vergliedern, fěr-glě'-děrn

ei is sounded like **ī**:

Pfeife, pfī'-fě

is usually sounded like **ī**:

minder, mĭnt'-ěr

b at the beginning of a syllable is pronounced as in English; at the end of a syllable, it is sounded like **p**:

abbetont, āp'-bā-tōnt

c is only used in foreign words; before e, i and y, it is sounded like **ts**; before other vowels and before consonants it is sounded like **k**:

ces, tsēs

cimbel, tsĭm'-běl

coloraturen, kō-lō-rā-too'-rĕn

acustisch, ā-koos'-tĭsh

ch is a guttural sound resembling **kh**:

abreichen, āp'-rĭ-khĕn

d at the beginning of a syllable is pronounced as in English; at the end of a syllable it is sounded like **t**:

Bund, boont

r is rolled and always sounded emphatically:

Zurück, tsoo-rŭk'

KEY TO PRONUNCIATION

s beginning a syllable and immediately preceding a vowel is usually pronounced z; at the end of a syllable it is soft:

Sordun, zôr-doon'

Vesper, fës'-për

sp is sounded like shp

st is sounded like sht

sch is sounded like sh:

Spiel, shpël

Stiefel, shtē'-fël

Schall, shäl

v is sounded like f:

vorwärts, fôr'-vwärts

w is sounded like v:

Walzer, vâl-tsër

z is sounded like ts:

unverziert, oon-fër-tsërt'

Words from the Latin and Greek are given the English pronunciation except in a few cases where an expression taken from some psalm or canticle sung or recited in church ritual is used. In such cases two pronunciations are used, the English, and the Roman which is used in singing
agnus dei, äg'-nūs dē'-ī, Eng. or
äg'-noos dā'-ē Roman.

All words of Greek or Latin form that have been incorporated into our English unabridged dictionaries are marked as English words from the Greek or Latin, respectively.

DICTIONARY OF MUSIC

A 1. The sixth tone of the scale of C major, that is, of the scale which has C for the keynote or first degree and has the interval of a major third, two whole tones, between C and the third degree, namely E. This scale is considered the typical diatonic scale, because it necessitates no sharps or flats to bring about the succession of tones and semitones required to make a complete diatonic scale.

2. The A above middle C, generally designated by a', does not vary on the oboe and consequently the tone is given by that instrument in order that the other instruments of the orchestra may tune to it. It is hence called a normal tone.

3. The name of one of the major keys, that is, of one of the keys having the interval of a major third, two whole tones, between the first and third degrees, in this instance A and C. The key of A major necessitates the use of three sharps, C sharp, F sharp and G sharp, to obtain the proper diatonic succession of intervals. These appear in its signature.

4. The name of one of the minor keys, that is, the name of that key which has A for a keynote or first degree and has the interval of a minor third, one whole tone and a half tone, between A and C, the first and the third degrees. It is called the relative minor of C major, described under 1, because it also requires the use of no sharps or flats in order to obtain the succession of tones and semitones required to make a complete diatonic scale.

5. As an Italian or French preposition, designated by a or à, it signifies to, at, for, by, in, with or towards; as a *prima vista* (at first sight), *à deux mains* (for two hands).

a ballata (ä bäl-lä'-tä) It.

In ballad style: a term applied to short, unceremonious Italian melodies; to any song in narrative form; or one with a refrain in chorus, as "Rule Britannia; Britannia, rule the waves;" also to a song which can be accompanied by dancing.

a battuta (ä bät-too'-tä) It.

According to beat; to be rendered in exact time: a term usually employed after some break in the regular time, such as a recitative, that is, a musical declamation. Similar in use to a tempo. Abbr. a batt.

a bene placito (ä bā'-nē plä'-chē-tō) It.

At pleasure: a term frequently used in chamber music. Equivalent to *ad libitum* (Lat.).

a cappella (ä káp-pěl'-lä) It.

In church style: referring to the old style of writing church music, in which the voices were unaccompanied; hence unaccompanied. Sometimes, however, the term is found in an accompaniment, signifying that the accompaniment is to be played in unison with, or an octave above or below, the voices; also used in reference to time, indicating the two-two time, two half notes in a measure, or a quick four-four time. See *alla breve*, to one of the usages of which it is equivalent. Abbr. a capp.

a capriccio (ä kă-prēt'-chō) It.

At the fancy of the performer, both in time and expression.

a cembalo

a cembalo (ä chäm'-bä-lō)· It.

For clavichord, harpsichord or piano. Cembalo was the abbreviated form of clavicembalo, the old Italian name for an instrument greatly resembling our grand piano. Abbr. a cemb.

a cinque (ä chën'-kwě) It.

For five voices or instruments; in five parts: frequently written a 5.

a demi jeu (ä dü-mě zhǔ) Fr.

At half play: using half the power of the instrument.

a demi voix (ä dü-mě vwä) Fr.

At half voice: using but half the possible force or volume; whispered. Equivalent to mezzo voce (It.).

a deux (ä dü) Fr.

For two: for two voices or instruments; in two parts; often written à 2.

adeux mains (ä dü mãñ) Fr.

For two hands: for one player.

a diratamente (ä dē-rä-tä-měñ'-tě) It. adv.

Angrily; with ire.

a dirittura (ä dē-rēt-too'-rä) It.

With straightness: straight, directly.

A double flat

The note A lowered two semitones by a double flat; same tone as G.

A double sharp

The note A raised two semitones by a double sharp; the same tone as B.

a due (ä doo'-ě) It.

For two instruments or voices: in two parts; often written a 2. Formerly spelled a duoi or a doi.

a due corde (ä doo'-ě kôr'-dě) It.

For, of, or on two strings.

a due soprani (ä doo'-ě sô-prä'-ně) It.

For two sopranos.

a due stromenti (ä doo'-ě strô-měñ'tē) It.

For or on two instruments.

a due voce (ä doo'-ě vō'-chě) It.

For two voices.

a dur (ä door) Ger.

The German name for the scale of A major, the signature of which is three sharps. See also A.

A flat

The note A raised a half step.

A flat major

The major key whose signature is four flats.

A flat major

a mezza aria

A flat minor

The minor key having seven flats in its signature, relative to the key of C flat major.

or

à grand choeur (ä grãñ kūr) Fr.

For full choir or chorus: in contradistinction to à petit choeur, which consisted originally of only three parts.

à grand orchestre (ä grãñ ôr-kěstr) Fr. For full orchestra.

A in alt or alto (ält) It.

The second note in alto or alt, indicated by a". It is written on the first added line above the staff.

A in altissimo (A ĩn äł-tis'-sĩ-mō) It.

A above high C, or twelve places above middle C: the second note in altissimo, indicated by a'" and written on the fifth added space above the staff.

à la (ä lä) Fr.

In the; at the; in the style of.

à l'italienne (ä lē-täl-yěñ') Fr.

In Italian style.

à la mesure (ä lä mǔ-zür) Fr.

In time; same as a tempo and a battuta.

à la russe (ä lä rüs) Fr.

In Russian style.

à livre ouvert (ä lēvr oo-vär) Fr.

On opening the book: at sight. Equivalent to a prima vista (It.), and vom Blatte (Ger.).

A major

The major scale or key which is built up from the note A. In order to preserve the intervals as in the natural or diatonic scale, with the half-steps between the third and fourth and the seventh and eighth tones, three tones, F, C and G, must be raised a half-step by sharps placed in the signature.

or

A major chord

A, C sharp and E, or any other combination of the major chord based on A; the chord containing the intervals of a major third and a perfect fifth and based on A.

a mezza aria (ä mēd'-zä ä'-rĩ-ä) It.

In half aria: a style between aria and recitative. Also applied to an air of slight range written for those tones between the highest and lowest ones

a mezza aria

of which any voice is capable of producing. Similar to aria parlante.

a mezza voce (ä mēd'-zä vō'-chē) It.

With half the voice: with half power; usually implying a rather soft, subdued tone. Somewhat similar to mezzo forte. It is used both in vocal and instrumental music and also denotes the quality between the head and chest tones.

a mezzo manico (ä mēd'-zō mä'-nī-kō) It.

Place the hand on the middle of the neck of the violin. The direction for a half shift in violin playing.

A minor

The minor key, having neither sharps nor flats in its signature. See also A.

A minor chord

Any A minor chord or chord containing the intervals of a minor chord: a chord containing minor intervals, and a perfect fifth, or interval of three and a half tones, and based upon A, as A, C, E.

A moll (ä mōl) Ger.

A minor: the relative minor of the key of C. Like the key of C major, its signature contains no sharps or flats. C, its third note, is a minor third or interval of three half tones above the first note, instead of a major third, or interval of two whole tones, and its half tones fall between its second and third and seventh and eighth notes ascending, and between its fifth and sixth and second and third notes descending.

à monocorde (ä môn-ō-kōrd) Fr.

On one string only.

a otto voci (ä ôt'-tō vō'-chē) It.

For eight voices.

a quattro parti (ä kwät'-trō pär'-tē) It.

In four parts.

a quattro soli (ä kwät'-trō sō'-lě) It.

For four solo voices or instruments.

a quattro voce (ä kwät'-trō vō'-chē) It.

For four voices.

a rovescio (ä rō-vä'-shō) It.

By reversing; in an opposite direction: answering ascending intervals by descending and vice versa; repeating the subject of a fugue or canon backwards in the answer. Also in a style which admits of reversion, part or all of the composition being written so that it could be sung backwards or so that it could begin with any part. Same as alla or al reverso or rovescio.

A sharp

A of the diatonic or natural, major or minor, scale, raised by a semitone by means of a sharp, #.

A sharp minor

The minor key with seven sharps in the signature, relative to the key of C sharp major.

a suo arbitrio (ä soo'-ō är-bē'-trī-ō) It.

At one's own will. The same as ad libitum.

A sharp minor

a suo bene placito

a suo bene placito (ä soo'-ō bā'-ně plā-chē'-tō) It.

At one's own pleasure. The same as *ad libitum*.

a suo comodo (ä soo'-ō kō'-mō-dō) It.

At one's own pleasure. The same as *ad libitum*.

a table sec (ä täb'l sĕk) Fr.

a table seche (ä täb'l sĕsh) Fr.

A dry table, French idiom for above. Without instrumental accompaniment; applied to practising vocal exercises unaccompanied.

a tempo (ä tĕm'-pō) It.

In time: the term is used to direct a return to the original time after some deviation. Equivalent to *im tact* (Ger.). Abbr. *a t.*, *a tem.*, or *a temp.*

a tempo comodo (ä tĕm'-pō kō'-mō-dō) It.

In convenient, easy time: in moderate movement.

a tempo dell' allegro (ä tĕm'-pō dĕl lä-lä'-grō) It.

In quick time.

a tempo di gavotta (ä tĕm'-pō dĕ gä-vōt'-tä) It.

In the time used in a gavot: moderately quick.

a tempo giusto (ä tĕm'-pō joos'-tō) It.

In exact or strict time.

a tempo ordinario (ä tōm'-pō ôr-dī-nä'-rī-ō) It.

In ordinary time: at a moderate speed; common time indicated by $\frac{4}{4}$ or **C** in which notes are given their ordinary value, in contradistinction to *alla breve* time, in which a note receives only half its ordinary value. Equivalent to *andante*; also used like a *primo*.

a tempo primo (ä tĕm'-pō prĕ'-mō) It.

Return to the first or original time.

a tempo rubato (ä tĕm'-pō roo-bä'-tō) It.

In stolen time: signifying that one part of a bar or several bars of a movement are accelerated, while the others are retarded that the whole may occupy its usual time. This irregular time is employed to give more expression to music.

à ton basse (ä tōñ bäs) Fr.

In a low tone or voice.

a tre (ä trā) It.

For three: for three voices or instruments, a trio or *terzetto*. Often written *a 3*.

a tre corde (ä trā kōr'-dĕ) It.

On or with three strings: in piano music it contradicts *a una corda*, di-

abbacchiato

recting that the soft pedal be released. See also *pedals*.

à trois (ä trwä) Fr.

For, or in, three: in three voices or parts. Often written *a 3*.

a una corda (ä oo'-nä kōr'-dä) It.

With or on one string: in piano music a direction for the use of the soft pedal. The piano is arranged with three strings to each note, which are all struck under ordinary conditions, but when the soft pedal is pressed down the hammers strike slantingly instead of straight and hit only one string, thus producing a softer tone.

a vicenda (ä vē-chĕn'-dä) It.

In turn: succession; alternately.

à vide (ä vēd) Fr.

A phrase meaning empty: hence open, as applied to strings vibrating in their entire length.

a vista (ä vēs'-tä) It.

For one voice alone.

à voix forte (ä vwä fōrt) Fr.

With or in a loud voice or tone.

à volontĕ (ä vō-lōñ-tä) Fr.

At will: at pleasure.

à vue (ä vü) Fr.

At sight.

ab (äb) Ger. adv.

Off: an expression found in organ music to show where the stop, already indicated, ceases to be used.

ab initio (äb ĩn-ĭsh'-ĭ-ō) Lat.

From the beginning: an expression, now obsolete, for which *da capo* has been substituted.

abacus harmonicus (äb'-ä-küs här-mōn'-ĭ-küs) Lat.

An abacus was an ancient counting-board, and was used to divide the intervals of an octave: hence *abacus harmonicus* is the structure and arrangement of the keys and pedals of an instrument or; a diagram or table of the notes, with their names.

abandon (ä-bäñ-dōñ) Fr. n.

Signifies that the passage so marked is to be rendered with abandon, ease, unrestraint, the time being secondary to natural emotion. Frequently used with the preposition *avec*, with.

abat-voix (ä-bä-vwä) Fr. n.

Literally, that which beats down the voice: a voice reflector; sounding-board.

abbacchiato (äb-bäk-kĕ-ä'-tō) It. part.

Dejected; humiliated: with a dejected air.

abbadara

abbadara (äb-bä-dä'-rä) It. v.

Take care: give attention.

abbandonasi (äb-bän-dō-nä'-zē) It. adv.

Unrestrainedly: with natural emotion.

abbandonatamente (äb-bän-dō-nä'-tä-män'-tē) It. adv.

Desperately; hopelessly: without regard to time. Same as *con abbandono*.

abbandone (äb-bän-dō'-nē) It.

Indicates that the passage is to be rendered despondingly: with feeling, abandoning one's self to emotion and making the time subservient to the expression.

abbandonevolmente (äb-bän-dō-nē-völ-män'-tē) It. adv.

Violently: regardless of time. Synonym of *abbandonatamente*.

abbandono (äb-bän-dō'-nō) It. n.

Abandoning of time, to suit impassioned expression: usually used with the preposition *con*, thus being equivalent to the French *avec abandon*.

abbassamento di mano (äb-bäs'-sä-män'-tō dē mä'-nō) It.

Lowering of the hand. When used to designate the downward movement of the hand in beating time the abbreviation is *a. di mano*, but in piano music it is abbreviated *abb.* and shows which hand crosses over in playing. Abbr. *abb.*, *a. di mano*.

abbassamento di voce (äb-bäs'-sä-män'-tō dē vō'-chē) It.

Lowering of the voice: by diminution of volume. Abbr. *abb.*, *a. di voce*.

abbattimento (äb-bät-tī-män'-tō) It. n.

The down-beat or lowering of the hand in conducting.

abbellare (äb-běl-lä'-rē) It. v.

To embellish a simple melody with ornaments. This word is not so much used as *abbellire*, of which it is a synonym.

abbellimenti (äb-běl-lī-män'-tē) It. n.

Embellishments; ornaments.

abbellimento (äb-běl-lī-män'-tō) It. n.

Evening song or hymn.

Abendmusick (ä'-bënt-moo-zëk') Ger. n.

Evening music: a serenade.

Abendständchen (ä'-bënt-shtënt'-khën) Ger. n.

Evening serenade.

abenteuerlich (ä'-bën-toī-ër-līkh) Ger. adj.

Literally, adventuresome: hence strange, uncouth. A term applied to unrecognized forms of music.

abfallen (äp'-fäl-lën) Ger. v.

To fall off, decrease, deteriorate: applied to a part of the register of a voice or instrument in which the quality or volume of the tone is poorer than in the rest of the compass, as in the low notes of a soprano voice or the high notes of a contralto.

abgebrochene Kadenz (äp'-gë-brôkh-ën-ē kä'-dënts) Ger.

Broken off cadence: a term which has replaced *cadenza d'inganno*. It means that the natural ending of the cadence for which the ear has been prepared by a chord built on the dominant is interrupted. After the chord of the dominant the ear is satisfied only by the chord of the tonic as an ending, and when some other chord comes instead it changes the progression of the harmony and delays and at times avoids the final close. The interrupted cadence has often been used by great musicians from Beethoven

abgebrochene Kadenz

to Wagner and is particularly useful in opera, where it serves to join the scenes, making the music seem to flow unbrokenly instead of stopping to begin anew with each scene.

abgehen (äp'-gā-ën) Ger. v.

To go off; depart; retire; make an exit; leave the stage.

abgestossen (äp'-gě-shtōs'-sën) Ger. past part.

Struck off; detached: staccato.

absetzen

the volume. Equivalent to diminuendo.

abröger (ä-brä-zhä) Fr. v.

To abridge; shorten; curtail.

abrögēs (ä-brä-zhä) Fr. n.

Abridgments: also the couplers or trackers of an organ.

abreichen (äp'-rī-khën) Ger. v.

Literally, to reach down: a violin term, meaning to extend the little finger of the left hand.

The image displays musical notation for absolute pitch across four staves. The first staff shows two octaves of the scale C, D, E, F, G, A, B, labeled '8va'. The second staff shows the scale from C to B, including the first octave (c, d, e, f, g, a, b) and the second octave (c', d', e', f', g', a', b'). The third staff shows the scale from c'' to b''', including the second (c'', d'', e'', f'', g'', a'', b'') and third (c''', d''', e''', f''', g''', a''', b''') octaves. The fourth staff shows the scale from c'''' to b'''' in two octaves, labeled '8va' and '15ma'.

Absolute Pitch

abgleiten (äp'-glī-tën) Ger. v.

To glide or slide off: to slide a finger smoothly from the black to the next white key of a piano or organ, so as not to break the tone.

abkürzen (äp'-kür-zën) Ger. v.

To shorten; abridge; abbreviate.

Abkürzung (äp'-kür-tsoongk) Ger. n.

A shortening; abridgment; abbreviation.

ablösen (äp'-lä-zën) Ger. v.

To exchange: to change fingers quickly in playing on the organ or piano, still sustaining the note.

abnehmend (äp'-nā-mënt) Ger. pres. part.

Taking off; decreasing: diminishing

abrupt modulation

A sudden modulation to a key not closely related to the original key. See also related keys.

abruptio (äb-rüp'-shī-ō) Lat. n.

A breaking off or sudden pause: the stopping abruptly, of a melodic phrase before its close.

Absatz (äp'-zäts) Ger. n.

An interruption or stop: a well-defined passage in music, usually four measures long, like a phrase or cadence.

abschwellen (äp'-shvël-lën) Ger. v.

To diminish: diminuendo.

Academy

organizations, or very often, especially in Italy, to the concert itself, and also to operatic institutions. Under the name *Académie Royale*, Perrin and Cambert, in 1669, laid the foundation of the present Paris Opera, which has been known by many different names. But by *Académie*, the *Académie des Beaux Arts*, which greatly aids the progress of music in Paris, is usually meant. The first English academy was the Academy of Ancient Music, founded in 1710, closed in 1792. Its members were professors and amateurs, gentlemen and children of the Chapel Royal and St. Paul's Cathedral, interested in the study and practise of ancient music. There was also a Royal Academy for the performance of Italian opera, in London from 1720 to 1728, for which Handel was composer. The present Royal Academy of Music in London, like those in Berlin and other German cities, nearly all of which are state institutions, are music schools.

acathistus (äk-ä-thīs'-tūs) Grk. n.

Song or hymn in praise of the Virgin Mary, anciently sung in the Greek Church of Constantinople on Saturday of the fifth week of Lent, by the whole congregation standing, in gratitude that the city had thrice been saved from barbarians.

accademia (äk-kä-dä-mě'-ä) It. n.

1. An academy: an institution or society, founded by the state or by some private individual to stimulate the progress of science, literature and art. Great numbers of *accademie* flourished in Italy from the Fifteenth to the Eighteenth Century, almost every town having one such society, and the cities, several. While the *accademie* usually cultivated many branches of science and art, each generally chose one subject on which to specialize. Many gave their chief attention to music, editing and printing the theoretical works already written, investigating and writing further on the science of music and fostering its practise by giving operatic representation and concerts and by encouraging talent and disseminating knowledge.

The *accademie* were originally called after their founders, but afterwards were named according to their objects or by some elaborate title, as fancy directed, such as *Accademia Degli Intrepidi*, Academy of the

accent

Fearless. The earliest institutions of this kind where music was the main object were those at Bologna and Milan, the former founded in 1482, the latter in 1484. None of the academies was very long lived: the *Filharmonici* at Bologna, probably the last, was in existence at the close of the Eighteenth Century.

2. The term *accademia* is also applied to a private concert or musical *soirée*.

accarezzevole (äk-kä-rět-tsā-vō'-lě) It. adj.

Fond; caressing; flattering; bland.

accarezzevolmente (äk-kä-rět-tsā-vōl-měn'-tě) It. adv.

Caressingly; blandly; persuasively.

accelerando (ät-chä-lě-rän'-dō) It. pres. part.

Accelerating: quickening the time or rapidity gradually. Synonym of *afrettando*, and *stringendo*. Abbr. *accel.*, *acelo*.

accelerato (ät-chä-lě-rä'-tō) It. past. part.

Accelerated: increased in speed; swift.

accent (äk'-sěnt) Eng. n.

accent (äk'-sāñ) Fr. n.

Natural stress or emphasis regularly recurring on certain tones, chords or beats in each measure. This stress, known as regular, metrical, or grammatical accent, is marked by bars crossing the staff. The first note following the bar receives strongest accent, though frequently a secondary accent is used. In the quicker movements of either common, four-four, time or triple, three-four, time there is but one accent to the bar; in slower movements, there are two—the principal or stronger accent on the first note and a secondary or weaker accent on the third.

The rhythmical accent, which emphasizes the musical divisions, phrases, motives and themes, relieves the monotony of the regular recurrence of the time accent.

One very common change from the accent is called syncopation and is caused by tying an ordinarily unaccented note to the following accented note (the crosses in the illustration mark the syncopations). Frequently

accent

sf. (sudden force) is added to emphasize this departure from regular stress. Composers use great liberty in the matter of accent, but the change is always indicated by an accent mark \wedge or $>$ or by *rf.* or *rfz.* (*rinforzando*), $-$ (*tenuto*), ♩ (*marcato*), *sf.* or *sfz.* (*sforzando*), or *fz.* (*forzando*).

Oratorical accent relates to the correspondence between the accent of the note and the natural accent of the words in vocal music. A failure to make these correspond results in loss of force and expression.

accenti (ät-chĕn'-tĕ) It. n.

Accents. See accent.

accento (ät-chĕn'-tō) It. n.

Accent, stress, or emphasis on certain notes. See accent.

accentor

The leading singer or performer in a duet, trio, or quartet, on whom it devolves to keep the accent and time correct. Obsolete.

accentuato (ät-chĕn-too-ä'-tō) It. adj.

Accentuated: strongly accented.

accentuiren (äk-tsĕn-too-ĕ'-rĕn) Ger. v.

To accentuate, accent.

accentus (äk-sĕn'-tüs) Lat. n.

A tuning of the voice, intonation; accent. Applied specifically to one division of the *Cantus Ecclesiasticus*, to the part of the Catholic service read or chanted by the priest or his ministers. To the *accentus* belong the collects; epistles and gospels, including the melodies to which the Passion is sung in Holy Week; the lections—prophecies and acts of the martyrs; various forms of Intonation, Benediction, and Absolution, in the Liturgy; single verses; exclamations and admonitions of the assistants at the altar; and the prefaces. See also *Accentus ecclesiastici*.

accentus ecclesiastici (äk-sĕn'-tüs ĕ-klĕ-zĭ-äs'-tĭ-sĭ) Lat.

The melodic formulæ for intoning

acciaccatura

the end of a phrase or sentence, corresponding to the inflection of the speaking voice at punctuation marks. There are seven kinds of *accentus*, as follows, called *immutabilis* when, at a period in the text, the voice does not change from the monotone, in which it has recited the whole phrase: *medus* when it falls a third below the reciting-note, *sol-mi*, at the end of a phrase marked by a colon: *gravis* when it falls a fifth, *sol-do*, at a period: *acutus* when it falls a third and returns to the reciting-note, *sol-mi*, *mi-sol*, at a comma: *moderatus* when it rises a second and returns, *sol-la-sol*, at a comma: *interrogatus* when it falls a second and returns, *sol-fa*, *fa-sol*, at a question mark: and *finalis* when it rises a second and falls through each degree to a fourth below the reciting-note, *sol-la-sol-fa-mi-re*, at the end. There are some variations to these usages, but they are rare. See also *Accentus*.

accessory notes

Also called auxiliary notes. The eight notes (quavers) not necessary to the harmony. Used in ornaments. They are placed adjoining degrees of the staff above or below their principal note as in a turn, or trill. See also turn or trill.

accessory tones

Tones heard faintly like an echo in a higher octave, after the principal tone dies away. See also harmonics.

accessory voices

Accompanying voices.

acciaccare (ät-chäk-kä'-rĕ) It. v.

To crush; bruise; pound: to strike the chord in a brusque and unexpected way.

acciaccatura (ät-chäk-kä-too'-rä) It. n.

From the Italian verb which means to crush: this term applied to music means that when the melody note is struck the note a semitone below it should be struck at the same time; as soon as they have been sounded together the lower note is released and the melody note is held for its full time. The *acciaccatura* is possible only on keyed instruments. It is written as a grace note with a little slanting line through its stem, and the difference between it and the regular grace note is that the grace note is played before the melody note, while the *acciaccatura* is struck simultaneously with it. When used with a chord this form of ornamentation is

acciaccatura

indicated by drawing a little slanting line through the notes forming the chord, just below the note which takes the acciaccatura, thus:

Its use in the original sense is now confined wholly to the organ, where it gives the effect of an accent to a single note or chord; elsewhere it is now employed as a synonym of short appoggiatura.

accidental chords

Chords which contain one or more notes that do not belong to that harmony found in the figuration as opposed to plain choral harmony. They may be caused either by anticipation, one or more of the notes being put before the natural or expected place, or by suspension, the prolonging a tone in one chord into a following chord.

accidental chromatics

Chromatics employed incidentally.

accidental naturals.

Signs called naturals, \natural , placed before notes to counteract the effect of sharps or flats in the course of a composition, restoring the notes so marked to their natural, usual place in the scale.

accidental notes

See notes, accidental.

accidental sharp

Where a sharp foreign to the key in which the piece is written is introduced it is written before the note which it affects. Such a sharp is called an accidental, and it affects all the notes of this same name in that bar unless revoked. Some musicians contend that when the last note in a bar is affected by an accidental, and is tied to a note of the same pitch in the next bar, the accidental holds over to that note also; others say that an accidental affects only the notes in the bar in which it occurs.

accidentals

Sharps, double sharps, flats, double flats or naturals, not in the signature but placed before a note to lower or raise or restore it to its proper place in the scale. Accidentals are used in

accompaniment

forming the chromatic, enharmonic, and harmonic scales. Formerly they applied to one note only, unless that note was repeated consecutively, but now their influence continues through a measure and is ended by the bar. The signs originated with the round (b) and square B used during the Middle Ages to distinguish B flat from B natural. (b)

These gradually became general signs for depressing and raising notes, square B being written both \sharp and \flat , and round B, b , but it was not until the latter part of the Eighteenth Century that the present system of using accidentals became fixed. In early music many of the accidentals were not noted. Formerly the sharps or flats in the signature were also called accidentals. Any doubtful note may be marked by an accidental.

accidenti (ät-chĩ-děn'-tē) It. n.

accidents (äk-sē-dāñ) Fr. n.

Accidentals.

acolade (äk-kô-läd) Fr. n.

The lines or braces binding together the various staves of music to show the parts that move together.

accompagnato (äk-kôm-pän-yä-tō) It. adj.

Accompanied: a term used to signify a constant accompaniment to a recitative in contradistinction to a recitative secco, where only chords are struck.

accompanied madrigal

See madrigal, accompanied.

accompanied recitative

A recitative with a more elaborate accompaniment than the few chords in the bass which were originally used. Alessandro is credited with the invention of this kind of recitative, which has grown in importance with the growth of the orchestra. The later operatic composers make great use of rich orchestral accompaniments essential to the plot in describing characters and emotions. The accompanied recitative is well adapted to very dramatic moments in the action.

accompaniment

The separate but accessory part or parts which are added to or attend the principal part or parts of a musical composition. The purpose is to support the principal parts, or by producing effects otherwise unattainable, to enhance the general impression. The accompaniment should be independent, but should always be sub-

acocompaniment

servient to the chief part so as not to obscure it but to make it appear to the best advantage. One instrument or several or a chorus of voices may carry the accompaniment. Abbr. acc., accom., accomp.

accompaniment ad libitum (äd lib-ĩ-tüm) Lat.

An accompaniment which adds to the effect of the piece, but may be omitted if desired. Abbr. accom. ad lib.

accompaniment obbligato (öb-blĩ-gä-tö) It.

A necessary accompaniment attending the voices or instruments bearing the principal part or parts of a musical composition. Sometimes given the importance of a solo part. Abbr. accom. oblto.

accompaniment of the scale

The series of chords which begin on the successive notes of the ascending or descending scale.

accoppiato (äk-köp-pĩ-ä'-tö) It. adj.

Coupled; tied: joined by a brace.

accord a l'ouvert (äk-kör-dä-loo-vër) Fr.

A chord played on the open strings of a violin, guitar or other stringed instrument, the strings in their natural or unstopped position not being pressed against the neck of the instrument with the fingers. Also the accordatura, or notes to which the open strings are tuned.

accordamento (äk-kör-dä-mën'-tö) It.

accordanza (äk-kör-dän'-tsä) It.

Accord: agreement in sound; consonance; harmony.

accordare (äk-kör-dä'-rë) It. v.

To tune: to be in tune. Equivalent of accorder (Fr.) and accordiren (Ger.).

accordatoio (äk-kör-dä-tö'-yö) It. n.

A tuning hammer or key.

accordatore (äk-kör-dä-tö'-rë) It. n.

Tuner: one who tunes instruments.

accordatura (äk-kör-dä-too'-rä) It. n.

Accord; consonance: harmony of parts. Also the notes to which the strings of a string instrument are tuned. Equivalent of accord (Fr.).

accorder (äk-kör-dä) Fr. v.

To adjust: to tune an instrument. Equivalent of accordare (It.) and accordiren (Ger.).

accordeur (äk-kör-dür') Fr. n.

1. A tuner: one who tunes instruments.

2. The monochord.

3. An instrument with twelve steel tuning-forks on a sounding-board,

accoupler

which gives the twelve tones of the perfectly tempered scale. Equivalent of accordatore (It.).

according

Being in tune, harmonious: a concordant blending of parts.

accordion

A simple wind instrument of limited capacity invented by Damian of Vienna in 1829. It is oblong in shape and consists of a small pair of hand bellows of varying number of folds which can be drawn out or pushed together at will. The bellows is closed at either end by a keyboard, that for the right hand containing four keys, each of which act on two reeds and give a compass of a diatonic scale of one octave, and that for the left containing two keys that give harmonic bass tones, usually on the tonic and dominant. These keys open valves admitting air from the bellows to metal reeds in two sets, one set sounding when the bellows is closing, the other when it is opening. Only one octave can be played, and that imperfectly, so the instrument is little more than a toy. The concertina is a higher development of the accordion and is capable of producing a wider range of tone. For further discussion see concertina.

The accordion is the same as German concertina.

accordiren (äk-kör-dë'-rën) Ger.

To tune. Equivalent to accordare (It.), accorder (Fr.).

accordo (äk-kör'-dö) It. n.

Literally, accord.

1. A chord, concord, consonance.

2. An old Italian double bass instrument with twelve or fifteen strings, sometimes as many as twenty-four. It was played with a bow in such a manner as to cause several strings to vibrate simultaneously. Another name was archiviola da lira.

accordo consono (äk-kör-dö kön-sō-nō) It.

A consonance: concord.

accordo dissono (äk-kör-dö dīs'-sō-nō) It.

A dissonance: discord.

accorder (äk-kör-dwär) Fr. n.

An instrument used in tuning: a tuning key, hammer, cone, or horn. Equivalent to accordatoio.

accoupler (äk-koo-plä) Fr. v.

To couple; that is, to draw the coupler, a mechanical contrivance by which the keys of one keyboard are so

accoupler

connected with the corresponding keys of another that when the former are depressed the latter are also depressed, and thus both can be played by a single motion. The term is used in organ music, especially in the imperative, *accouplez*, meaning (You), draw the coupler.

accrescendo (äk-krës-shän'-dō) It. pres. part.

Increasing in power. Same as *crescendo*. Abbr. *accres.*

accrescere (äk-krës-shā'-rë) It. v.

To increase: to augment the sound. Synonym of *crescere*.

accrescimente (äk-krës-shē-mën'-të) It. n.

An increase or growth.

1. Applied to a fugue it means prolonging the fugue by increasing the time value of the notes.

2. It occurs also in the Italian phrase, "punto d'accressimento," abbreviated to "punto d'acr.," which means the dot placed after a note to increase its value; it is called in English the dot of prolongation. Abbr. *accres.*

accresciuto (äk-krës-shoo'-tō) It. past part.

Increased, augmented: applied to intervals. An interval is said to be increased or augmented when by means of a sharp, flat, or natural, a half tone is added which makes it greater than a major interval.

acht (äkht) Ger. adj.

Eight.

Achtachteltakt (akht -"äkh' - tël - täkt) Ger. n.

Eight-eight time.

Achtel (äkh'-tël) Ger. n.

Achtelnote (äkhtl'-nō-të) Ger. n.

An eighth note or quaver.

Achtelpause (äkhtl'-pow'-zä) Ger. n.

Eighth or quaver rest.

achtfüssig (äkht'-füs-sikh) Ger. adj.

Eight-footed: in reference to an organ pipe, one which is eight feet long and can produce a tone two octaves below middle C. Of organ stops, those whose lowest tone is two octaves below middle C.

achtstimmig (äkht'-shtim-mikh) Ger. adj.

Designed for eight voices or instruments.

acocotl Mex. n.

A Mexican plant from whose stalk an aboriginal wind instrument of the same name was made. It consisted of a thin tube from eight to ten feet long,

acoustics

the performer playing upon it by inhaling the air through it. It is sometimes called clarin.

acoustic color

The quality or timber of a tone.

acoustics

The science of sound, comprising the study of its cause, nature and phenomena, and its transmission through air or other media. Musical acoustics distinguishes between musical sounds and noises. The first are the result of groups of regular vibrations, while noises are the result of irregular and fluctuating vibrations.

Sound waves travel slower than any other waves which affect the senses, for, while the slowest light waves have a speed of four hundred and eighty-three trillions of vibrations per second, the approximate rate of audible sound waves is from sixteen to thirty-six thousand five hundred vibrations per second, though physicists differ. A familiar example of the difference in speed between light and sound waves is experienced when we see lightning and must wait some seconds for the peal of thunder to reach our ears, though both are caused by the same phenomenon.

The manner in which sound waves are divided to produce musical sounds differs with individuals and with races. For instance, the Chinese music, which is really music, since the vibrations occur in periodic groups, seems mere noise to our ears, accustomed as they are to a different division or grouping. This distinction between music and noise is a difficult one to make. A combination of sounds, each in itself musical, may result in noise. Any sound so complex that the ear can not resolve it into its component parts we call a noise. And in this connection the value of ear training becomes apparent. The ear trained in distinguishing sound may perceive music in that which an untrained ear would characterize as noise.

Sound is produced by the vibration of an elastic body. In the production of musical sounds that body is usually wood, metal, membrane, a string, or a column of air. The greater the elasticity of the vibrating body the greater will be the regularity of the groups of vibrations, and consequently more exact tones will be produced.

The vibration of strings is easiest to study. If a string is pulled to one

acoustics

side it will not only return to its original position, but will spring as far in the opposite direction as it was pulled from the first position. This double motion is a vibration and will continue until the force of movement is spent. It is the vibration of the individual particles composing it which causes the string to vibrate, and therefore vibration may be defined as the moving backward and forward of the particles composing an elastic body. The distance between the extreme points reached by a particle is called the amplitude of vibration, and upon this factor depends the degree of loudness of a sound. The tighter a string is stretched the greater will be the number of its vibrations per second and the higher the pitch of the resulting tone. The shorter, finer and lighter a string is also increases the vibrations and consequent height of tone. The lowest musical tone, proper, contains forty-one and one-fourth vibrations per second. Higher tones have a more forceful effect upon the ear than lower ones and can be heard at a greater distance.

The reason that the same tone when struck on different instruments has different qualities is because of the accompanying vibrations, or partial tones, produced by the instrument upon which the tone is struck. The mere vibration of a piano or violin string produces very little sound. This must be strengthened by some such means as the sounding-board in the piano, or the sounding-post in the violin, which conveys the vibrations from the strings to the back of the instrument.

The air, vibrating with sound waves, strikes upon the delicate tympanic membrane of the ear, causing it to vibrate and thus to irritate the auditory nerves which analyze every sound entering the ear into its component parts; and in this way are conveyed to the brain the various characters of the complex sounds about us.

In the vibration of a column of air in a pipe, the use of the pipe itself is to imprison the air and by its length and bore modify the sound. The longer the pipe the lower the sound. The column of air is made to vibrate by the motion of some vibrating object placed at the open end of the tube.

Sound waves travel by communicated

acte de cadence

motion. The different particles of which the air is composed do not change their positions materially, but simply pass on in turn a motion which has been conveyed to them by other particles. As air becomes warmer it is more elastic and will allow sound waves to travel faster. Sound travels faster in water than in air because water is more elastic.

Although much study has been given to the acoustic properties of buildings architects are still confused on this subject, so slight are the causes which will produce sound effects. Even hangings or small irregularities will cause a great difference in the acoustics of a hall.

act

One of the main divisions of a drama or opera, which although complete in itself has its part in the development of the whole. Even in the early Greek plays the division was made by the appearance of the chorus, although no name was used. The Roman plays were divided into acts, five being the proper number according to Horace. There is no set number of acts into which a drama or opera must be divided, but as a rule the grande opéra is in five acts, the opéra comique and the opéra bouffa in three or one, while the Italian and German operas have different numbers, three being most common. The word, act, was also applied to the divisions of an oratorio, and the parts of a concert or musical entertainment. Equivalent to acte (Fr.), akt (Ger.), atto (It.).

act-tune

Instrumental music performed between the acts of a play. These act-tunes during the latter part of the Seventeenth and the early part of the Eighteenth Century were especially composed for the play which they accompanied, together with "first and second music" played previous to the overture. Later the works of the noted composers took the place of the special act-tunes and now usually the popular music of the day is played.

acte de cadence (äkt-dŭ-kă-däñs) Fr.

Act of making a close: applied to a movement or progression in one part, particularly in the bass, which forces the other parts to join in making a close, or in avoiding one at the end of a passage. The two chords which introduce the final accent.

actinophone**actinophone**

An instrument in which a sound is produced by the successive expansions and contractions of a body under the action of a rapidly intermittent ray of concentrated sunlight. The alternating action of the ray of light produces vibrations in the body which are transmitted, by means of a telephonic attachment, to the air, where they become sound waves.

action

The mechanism of an organ, piano or similar instrument through which the player is able to produce sound. In the keyboard instruments the pressure of the finger, and in the organ of the foot also, causes this mechanism to act upon the strings, reeds or metal tongues so that the sound is produced. In the action of the harp the pedals change the tension of the strings, thus allowing of chromatic modulations. Equivalent to *mecanica* (It.), *mécanique* (Fr.), *mechanismus* or *mechanik* (Ger.)

acustica (ä-koos'-tī-kä) It.

Acoustics.

acustisch (ä-koos'-tīsh) Ger. adj.

Acoustic or acoustical.

acuta (ä-koo'-tä) It. adj. and n.

Sharp, shrill.

1. The name of an organ stop of higher than ordinary mixture, which produces a shrill sound.

2. The name of an accent applied to certain letters in the Greek notation; expressed *M'*.

acutæ claves (ä-kū'-tē klä'-vēs) Lat.

Literally, acute keys. The intervals, keys or sounds between *a*, and the fifth line of the bass clef and *a'* or according to some authorities *g'* of the G clef. Also called *acuta loca acutæ voces*.

acute

High in pitch; shrill or sharp in tone: opposed to grave, yet both are relative terms. It is equivalent to *acuto* (It.), *aigu* (Fr.), *hoch* or *scarf* (Ger.)

acutezza (ä-koo-tēt'-tsä) It. n.

Acuteness: sharpness of pitch.

adagio pesante

acutus (ä-kū-tūs) Lat. adj. or n.

Sharp, acute: one of the seven accents of the Catholic ritual chant. It implied the falling of the voice a third and its return again to the recitation note. Expressed musically it would be *sol, mi, mi, sol*.

ad captandum (äd kăp-tăn'-düm) Lat.

With zeal: brilliantly, takingly.

ad libitum (äd lib'-i-tüm) Lat.

At pleasure: in a passage so marked the time and expression is left for the performer to use as he chooses. An accompaniment, part or cadence so marked may be used or omitted at discretion, or at the point so marked in a concerto, a cadence may be introduced. Equivalent to a *bene placito* (It.). Abbr. *ad lib.*, *ad libit.*, *ad l.*

ad longam (äd lön'-gäm) Lat.

In long notes: a term applied to early church music, written in notes of equal duration, and, usually, the longest known time. The note itself was called a *longa*.

ad vivendum (äd vī-ën'-düm) Lat.

See *vivendum*, *ad*.

adagio (ä-dä'-jō) It. adv. and n.

1. adv. *Slowly*, *leisurely*: a time indication indicating a movement quicker than *largo* and slower than *andante*.

2. n. The name of a piece of music either an independent composition or one of the movements of a symphony or sonata. When thus used it not only shows that the music is very slow time but that it is to be played with much expression. Abbr. *adgo*, *ado*.

adagio assai (ä-dä'-jō äs-sä'-ē) It.

Very slowly.

adagio cantabile (ä-dä'-jō kăn-tä'-bī-lë)

It.

Slowly and in a singing tone.

adagio con gravita (ä-dä'-jō kōn grä-vī-tä') It.

Slowly and with gravity, dignity.

adagio di molto (ä-dä'-jō dē mōl'-tō)

It.

Very slowly.

adagio non troppo (ä-dä'-jō nōn trōp'-pō) It.

Slowly, but not too much so.

adagio patetico (ä-dä'-jō pä-tä'-tī-kō)

It.

Slowly and pathetically.

adagio pesante (ä-dä'-jō pä-sän'-të)

It.

Slowly and gravely, heavily.

adornamenti

adornamenti (ä-dôr-nä-mën'-të) It. n. plu.

Ornaments, embellishments.

adornamento (ä-dôr-nä-mën'-tō) It. n.

An ornament: grace note.

adornatamente (ä-dôr-nä-tä-mën'-të) It. adv.

Elegantly: with grace.

adoucir (ä-doo-sēr') Fr. v.

To soften; to sweeten, or to become sweet.

adquista (äd-kwīs'-tä') Lat. past part.

Acquired; adopted: the added note at the bottom of the Greek scale, called proslambanomenos. Equivalent to A in the bass.

adsumta (äd-sūm'-tä) Lat. past part.

Synonym of *adquista*.

adulatoriamente (ä - doo - lä - tō - rī - ä - mën'-të) It. adv.

Flatteringly: in a caressing, insinuating manner. Synonym of *accarezzevolmente*.

ædophone

A musical instrument invented in the Eighteenth Century.

æolharmonica

A kind of seraphine: the seraphine was an early development of the harmonium and was invented by John Green in 1833. Its sounds were produced by thin strips of wood or metal made to vibrate by a current of air. Its tone was coarse and unpleasant and it was superseded by the harmonium.

Æolian

1. A term applied to one of the early Greek modes, also called the hypodorian mode. It had the following form: $\overbrace{a-g-f-e-d-c-B-A}^+$

— indicates a whole step; \smile a half step; $\overbrace{\quad}$ connects the notes forming a tetrachord, i. e., a group of four tones; + marks the diazeuxis, or tone, separating the tetrachords.

2. Descriptive of the Greek transposition scale, formed from five tetrachords, beginning on F, and embracing two octaves, was also called *æolian*.

3. In medieval church music a term applied to the fifth authentic mode, i. e., the fifth of those modes which began on the final or key note. This mode extended from a, A on the fifth line of the bass staff to a' an octave above. See also Greek modes and music, and church mode.

Æolian harp

Takes its name from *Æolus*, the

Æolian pianoforte

Greek god of wind. Its inventor is unknown, some authorities attributing it to an Englishman named Pope, others, to a German named Kircher, about 1670. It is on the same principal as the monacorde, a single string stretched on two bridges over a sounding-board. It consists of a long, narrow box of thin, even-grained pine, about three feet long, five inches wide and three inches deep, and having a circle of small holes drilled in the center of the upper side. Its ends are of beechwood for the insertion of the pegs by which the strings are held or tuned. At either end is a bridge of hard wood about three-fourths of an inch high, over which pass from half a dozen to a dozen strings of gut, or sometimes silk. These are tuned in unison at rather low tension. The instrument is played by being put in a window or other place where a current of air strikes it obliquely and sets the strings in motion so that they produce the greatest variety of tone, increasing or decreasing in power according to the force of the wind. The sound has been likened to the effect of hearing at a distance the full orchestra minus the percussion instruments, but other writers have denied its likeness to any sound produced by human voice or instruments. There is a tradition to the effect that in the Tenth Century St. Dunstan was accused of witchcraft because he hung his harp where the wind vibrated the strings, and that this was the germ of the *Æolian harp*, but the first authoritative invention we have is not until about 1670.

Æolian harp is the same as the *æolian lyre*, and the *Æolsharfe*.

Æolian lyre

The same as *Æolian harp*.

Æolian piano

An obsolete keyboard wind instrument invented by Schortmann of Buttelstedt in 1825. It was like a piano but had wooden reeds or bars instead of strings or metal reeds, and these when struck by the hammers produced a soft and sweet tone of peculiar quality.

Æolian pianoforte

A piano with reed attachment invented and manufactured by T. Gilbert and Company of Boston, about 1850. This instrument was like the small square piano then manufactured and had a set of free reeds, or thin

Æolian pianoforte

strips of metal, set in vibration by a current of air from a bellows of the pressure variety operated by a pedal at the right of the regular piano pedals. This reed part was added to give the piano a sustaining power which it did not then possess, and in parts where the notes were held produced a good effect. The instrument has gone out of use owing to the impossibility of keeping the strings in tune with the reeds.

æolina

A small and simple instrument, probably the germ of the accordion and concertina, was invented by Messrs. Wheatstone about 1829. It consisted of a graduated series of free reeds, that is, thin pieces of metal fixed into a metal plate at one end and set in motion by being blown by the mouth like a mouth organ. Each reed was furnished with a separate aperture in the metal plate for supplying wind, and simple melodies could be played by moving the instrument backward and forward before the mouth.

æolodion (also æolodicon)

A keyboard instrument embodying the principle of the æolina and the direct forerunner of the harmonium. Most authorities attribute this invention to J. T. Eschenbach of Hamburg who is said to have first made the æolodion in 1800. The tone is produced by steel springs or a graduated series of thin metal plates set in motion by a current of air supplied by bellows, or according to some authorities, struck by hammers set in motion by the keyboard. It had a compass of six octaves and its tone was similar to that of the harmonium or cabinet organ, which followed it. Equivalent to the German, Windharmonika. Obsolete.

æolomelodicon

An instrument invented by Professor Hoffmann of Warsaw in 1825 and constructed by Brunner of that city. Like the æolodion, it was a wind instrument played with a keyboard, but it differed from it in that brass tubes were placed above the reeds, as in the reed stops of an organ, thus greatly increasing the tone of the instrument. It was probably intended as a substitute for the organ in small churches, especially in the accompaniment of chorals, whence it is also called choraleon.

affabile

æolopantalon

An instrument invented by Dlugosz at Warsaw, about 1830. A piano was attached to a wind instrument called an æolomelodicon, played by a keyboard and having brass tubes fixed over the reeds to increase the tone. The instrument was so arranged that the player could use either piano or æolomelodicon, or both together.

Æolsklavier (ä'-öls-klä-fër)

The same as Æolian piano.

æotana (ē-ō-tā'-nä) Grk. n.

A very small wind instrument made of seven short reeds or thin strips of metal fastened in a frame and played upon by the breath of the player. Perhaps the forerunner of the modern jew's-harp.

Aequal (ä-kwäl') Ger. n.

A German word derived from the Latin, meaning "8-ft." The term is generally applied to organ stops and signifies all those usually designated as eight feet. This indicates that eight feet is the length of the longest pipe in the stop, hence the one having the lowest pitch. Its length gives it a pitch of two octaves below middle C and the other pipes of the stop gradually ascend in pitch through the compass of the keyboard nearly five octaves. Stops of this pitch are the principal or foundation stops of the organ and the others are tuned from them.

æquivagans (ē-kwī-vā'-gäns) Lat. adj.

Literally, wandering equally: hence applied to passages in which all the parts deviate from the natural order at the same time, as when in all the parts, simultaneously, a naturally unaccented syllable receives the accent instead of the accented syllable to which it is tied following it. Simultaneous syncopation.

ære recurvo (ē'-rē rē-kür'-vō) Lat.

A Roman horn resembling the trumpet. The same as bucina.

ærophon

A French reed instrument of the melodion class, that is, one having free vibrating reeds or thin strips of wood or metal fastened at the end and set in motion by currents of air from bellows. The reeds had no tubes over them.

affabile (äf-fä'-bī-lě) It. adj.

Affable: kindly, pleasing, gently and sweetly in style of rendering music.

affabilita**affabilita** (äf-fä-bē-lī-tä') It. n.

Affability: cordiality in style.

affabilmente (äf-fä-bīl-mēn'-tē) It. adv.

Affably: in a kindly, pleasing manner.

affannato (äf-fä-nä'-tō) It. adj.**affannato** (äf-fän-nä'-tō) It. adj.

Literally, stifled: grieved, distressed, anxious, sad.

affannosamente (äf-fän-nō-sä-mēn'-tē)

It. adv.

In a distressed manner: restlessly, anxiously.

affannoso (äf-fän-nō'-sō) It. adj.

Grievous, anxious, mournful, sad. Applied to expression in rendering music.

affectirt (äf-fēk-tērt') Ger. part.

Affected: with affection.

affectueux (äf-fēk-tū-ū') Fr. adj.

Affectionate: warm-hearted.

affektvoll (äf-fēkt'-fōl) Ger. adj.

Similar to mit affect, passionate, with passion, fervor.

affettatamente (äf-fēt-tä-tä-mēn'-tē)

It. adv.

Very affectedly.

affettato (äf-fēt-ä'-tō) It. adj.

Affected, unreal.

affettazione (äf-fēt-tä-tsi-ō'-nē) It. n.

Affectation: artificiality of style.

affettivo (äf-fēt-tē'-vō) It. n.

Affecting; touching; pathetic.

affetto (äf-fēt'-tō) It. adj.

Affected; touched; affection; tenderness; warmth, emotion.

affettuosamente (äf-fēt-too-ō-sä-mēn'-tē) It. adv.

Affectionately; tenderly; with feeling. Similar to con affetto or con affezione.

affettuosissimo (äf-fēt-too-ō-sīs'-sīmō) It. adj.

Very affectionate; with great pathos; with tenderest expression.

affettuoso (äf-fēt-too-ō'-sō) It. adj.

Affectionate; tender. Often used with con (with). It is usually employed to indicate soft and delicate expression but occasionally is used as a direction for a time slower than andante, but not so slow as adagio. Abbr. affett., affetto.

affinité (äf-fē-nē-tä) Fr. n.**affinity** Eng. n.

Connection; agreement; relation. Applied to chords which allow of an easy progression from one to another.

affiocamento (äf-fē-ō-kä-mēn'-tō) It. n.

Hoarseness.

affiocato (äf-fē-ō-kä'-tō) It. adj.

Hoarse.

aggiustamente**afflitto** (äf-flēt'-tō) It. past part.

Cast down: sorrowful, melancholy.

afflizione (äf-flē-tsi-ō'-nē) It. n.

Affliction: sorrowfully, in an afflicted manner. Usually used with con (with).

affrettando (äf-frēt-tän'-dō) It. pres. part.

Hurrying: hastening the time, implying some excitement. Abbr. affret, affretto.

affrettato (äf-frēt-tä'-tō) It. past part.

Hurried. Similar to piu mosso (more motion).

affrettoso (äf-frēt-tō'-sō) It. adj.

Hurried; hasty; quick.

afinar (ä-fē-när') Spa. v.

To tune musical instruments.

after-beat

An ornament consisting of one or two short notes, called after-notes, following the principal note from which they take their time. The

double after-beat, consists of two after-notes. It is often used at the

end of a trill. Equivalent to Nachschlag (Ger.).

after-note

A grace note placed after a note, in an unaccented part of the measure, and deriving its time from that note, which is consequently shortened. See also after-beat.

after-striking

The appearance of part of a chord in the bass after the part in the treble has been played.

**agevole** (ä-jä'-vō-lē) It. adj.

Easy; light.

agevolezza (ä-jä-vō-lēt'-tsä) It. n.

Facility; ease: often used with con (with), signifying a light and easy manner of performance.

agevolmente (ä-jä-vōl-mēn'-tē) It. adv.

Easily; readily.

aggiustamente (äd-joos-tä-mēn'-tē) It. adv.

Literally, rightly; properly: hence in correct or strict time.

aggiustamento

aggiustamento (äd-joos'-tä-mën'-tō)

It. n.

Adjustment, agreement.

aggiustare (äd-joos-tä'-rë) It. v.

To adjust, set right, arrange, or adapt.

aggiustato (äd-joos-tä'-tō) It. past part.

Adjusted; arranged; adapted.

aggradevole (äg-grä-dä'-vō-lä) It. adj.

Agreeable, pleasing.

aggrappando (äg-grä-pän'-dō) It. pres. part.

Grappling; hooking: hitching of the pedal of a harp into its groove in the pedestal, thus raising the pitch.

aggraver la fugue (äg-grä-vā lä füg)

Fr.

To augment the subject of a fugue.

agilita (ä-jē-lī-tä') It. n.

Agility; nimbleness: quickness combined with skill.

agilité (ä-zhë-lë-tä) Fr. n.

Agility, sprightliness.

agilmente (ä-jël-mën'të) It. adv.

Agilely; nimbly, lightly.

agitamente (ä-jī-tä-mën'të) It. adv.

Perturbedly: with agitation.

agitamento (ä-jī-tä-mën'tō) It. n.

Action; agitation; perturbation. Same as *agitazione*.

agitato (ä-jī-tä-tō) It. past part.

Agitated; perturbed: indicates a hurried and broken style of performance.

Abbr. *agit.*, *ago*.

agitata presto (ä-jī-tä'-tä prä'-tō) It.

agitato allegro (ä-jī-tä'-tō äl-lä'-grō)

It.

Quickly and in a perturbed manner. An *allegro* which is disturbed and unsteady.

agitato un poco (ä-jī-tä'-tō oon pō'-kō)

It.

A little, slightly agitated.

agité (ä-zhë-tä') Fr. past part.

Agitated.

agl' or agli (äl'-yë) It.

To the, at the, in style of. Combination of the preposition *a* and the article *gli*, used before masculine plural words beginning with a vowel. It becomes *agl'* before *i*. Singular *allo*.

Agnus Dei (äg-nūs dë'-i, or äg'-noos dä'-ë) Lat.

Lamb of God. These are the opening words of the last main division of the high mass in the Roman Catholic Church. The *Agnus Dei* is sung just before the communion. The simple words "*Agnus Dei, qui tollis peccata mundi, miserere nobis*" (Lamb of God, who takest away sins of the

Agogik

world, have mercy upon us) are repeated once unchanged and again a third time substituting "*dona nobis pacem*" (grant us peace) for "*miserere nobis*."

The formula is of scriptural origin and is directly connected in substance with the "*Gloria in excelsis*," ancient chant. The declaration of John the Baptist, "*Ecce Agnus Dei, ecce qui tollit peccatum mundi*," (Behold the Lamb of God, who takest away the sin of the world—John I, 29) is completed by the cry of the two blind men "*Miserere nostri, fili David*"—Matt. IX, 29 (Have mercy upon us, Son of David). The present distinct form was introduced into the mass service by Pope Sergius I. in the Seventh Century.

The musical setting of the *Agnus Dei* was originally plain-song and in the Vatican "*Kyriale*" we find twenty forms, all simple but of varying grades. There are eighteen syllables of text in each invocation and these are variously set to a chant form of from nineteen to sixty-one notes. All the compositions of the medieval differ from those of the modern masters in not giving a separate setting to the "*Dona nobis pacem*," to which the later composers assign an entirely different movement from that given to the first two. In Bach's *Mass in B minor*, the first two invocations form alto solos, and the *Dona* is a four part fugue. In Beethoven's *Mass in D* the first two are *adagio*, slow, and the *Dona* distinctly alters the tempo to *allegretto vivace*, fast and lively. In Haydn's first mass the "*Angus Dei qui*" is accompanied by stringed instruments only, while the "*Dona*" calls for trumpets, flutes, strings, etc. So also in masses of Mozart, Schubert, etc. Gounod alone offers an exception. His treatment observes a symmetry in the setting of the three divisions and adheres closely to the original plain-song form.

agoge rhythmica (ä-gō'-ghë rīth-mī-kä) Grk.

Literally, rhythmical movement: hence the rhythmical order or succession of notes; time.

Agogik (ä-gō'-ghīk) Ger. n. from Grk.

The theory of modifying the time in which a piece is written to enhance the musical expression. Equivalent to the Italian *tempo rubato*.

agogischer accent**agogisher accent**

Rythmical accent. An expression mark (A) placed over a note to show that it is to be held a little longer than its strict time value, to mark the accent in cases where the rhythm does not coincide with the time.

agraffe (ă-grăf) Fr. n.

Literally, a clasp: a metal support preventing the vibration of that part of a piano string which is between the hitch pin and the bridge.

agrémens (ă-grá-măñ) Fr. n.

agréments (ă-gra-măñ) Fr. n.

Ornaments. See also ornaments.

ai (ă'-ē) It.

To the, at the, in the style of. Combination of the preposition a and the article i, used before a masculine plural word beginning with a consonant.

aigu (ě-gü) Fr. adj.

Pointed, sharp, acute, shrill, piercing, high.

air

A song, or tune, with or without words; a group of phrases forming a complete rhythmical melody, for which an accompaniment is not necessary; a strain; the part of a composition in which the melody lies, usually the upper part. Though more commonly used of vocal music it is also applied to instrumental.

To the breve, i. e., one beat to a breve, instead of to a semibreve or whole note as in common time, con-

() sequently a quick time in which the breves came to be sung as semibreves. Originally each measure was equal in value to a breve, and usually contained two whole notes, or four half notes. But two-one and four-two time are frequently called great *alla breve* time, since modern composers have divided the original measure into two, each equal to a semibreve (whole note). This second or derived species of *alla breve* time is also called a *cappella*.

It usually contains two half notes or four quarter notes with but two beats to the measure. The sign for *alla breve* time has gone through several changes and is now written

allemande (äl-mänd) Fr. n.

The feminine form of the adjective allemand, German, used as a noun, the name of the first movement of a suite which immediately follows the prelude or opens the suite when no prelude is used. The form originated in Germany, hence its name. It is a moderately lively movement of two parts, both repeated, in common time, beginning on the last beat of the first measure, ordinarily with a quarter or eighth note, but sometimes with three short notes. The melody is usually elaborate but progresses regularly and uniformly; the accompaniment is simple; the rhythm is not strongly marked, nor is the accent ever thrown on the (properly) unaccented part of the measure. Also a national dance in two-four time; and a lively dance in three-four or three-eight time, similar to the waltz, called the Deutscher Tanze or Teutsch, and popular in Bavaria, Suabia, Baden, and the northern part of Switzerland.

Alp horn

Alpen horn

A horn used by Alpine herdsmen. It is from three to eight feet long and consists of strips of fir-wood firmly bound together to form a conical tube. The bell at the end curves slightly upward, and the cupped mouthpiece is made of hard wood. Its sounds are simple harmonics, that is, the tones produced by a column of air set in motion, when it is divided into its aliquot or equally divided parts. They are somewhat varied according to the material of which the horn is made and the size of its bore. This instrument is used to signal with, by the mountaineers, and also to sound the Ranz des Vaches, as they call the airs used to assemble the cattle on leaving the pasture.

alphabet

The musical alphabet which is used to designate the different sounds of the scale consists of seven letters, A, B, C, D, E, F and G, and the German's add H, making eight letters in their scale. The order in the scale is C, D, E, F, G, A, B, and the reason for this can be seen best from a short history of the musical scale.

From the fact that the ancient Greek lyre had seven strings, and the ancient shepherd pipes consisted of seven reeds, it is natural to assume that the ancient Greek scale consisted of seven tones, each tone represented by one string or one reed on their old instruments. As their music developed new tones were added to the scale and in 340 B. C. their scale included fifteen tones, extending from A in the first space of the bass staff to A

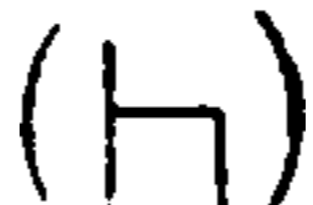

Alpine horn

in the second space of the treble staff. Since the names of the notes were too long to be written out in full on a musical composition they were designated by letters of the alphabet.

But these fifteen letters did not suffice to express all the variations a single note might undergo; so, as the music developed, these letters were written in a great many different forms, large and small, straight and inverted, horizontally, and leaning to the right or left, till by the time Alypius wrote his learned treatise on music not less than 1240 different musical forms were used by the Greeks.

Now the Romans borrowed the Greek scale, but simplified it, using the fifteen letters of the alphabet to indicate their scale. But when Gregory the Great, Pope of Rome, in the Sixth Century, revised the music of his time, he discovered that the last eight letters of the alphabet were but a repetition of the first half, only an octave higher, so he used the first seven letters of the alphabet only, using capital letters to designate the lower octave, and small letters for the upper.

Thus the original Greek scale of fifteen tones was preserved, and A was naturally the first note of the scale. But in the Tenth Century a new note was added just below lowest A, and this note, for no known reason, was named after the Greek letter Γ (gamma, G). Later other notes were added, till in the Sixteenth Century the scale reached as low as C on the second added line below the bass staff. Thus A, instead of being the first note of the scale, became the sixth, as it is today.

In Germany this same system was originally adopted. But when accidentals came into use, and *b* came to be used for B flat, the square B  was mistaken for an H, and in the German scale B flat is now called B, and B natural, H.

alphabetical notation

The system of notation in which the tones are indicated by letters of the alphabet. The earliest method of writing music known to history; it was used by the ancient Greeks and has continued in use to the present day. For full discussion see alphabet and letter notation.

alt (ält) Ger. adj. or n.

Alto; counter-tenor or contra-tenor; contralto.

alt (ält) It.

High: contraction of the adjective alto, used as a noun.

Notes between g'' , on the first added space above the treble staff, and f''' on the fourth added space above, are said to be in alt.

alt zeichen (ält tsī-khën) Ger.

The alto clef.

alt' ottava (ält' ôt-tä'-vä) It.

The higher octave. Used in the same way as all' ottava alta, to signify that the notes so marked are to be rendered an octave higher. Abbr. 8va., written above the staff.

alta (äl-tä) It. adj.

The feminine of alto, high. Though the comparative degree is, properly piu alto, alta is often understood as comparative, e. g., all' octava alta.

altera prima donna (äl'-të-rä prē-mä dön-nä) It.

One of two leading female singers.

alterata (awl-tür-rä'-tä) Lat. adj.

1. Doubling the value of a note in composition.

2. Altered in pitch, raised or lowered a semitone by the introduction of chromatic notes. Equivalent to alterato (It.).

alteratio (awl-të-rä-shī-ō) Lat. n.

Alteration: a name applied in old unbarred measurable music to a doubling of the length of duration of the second of two notes of the same kind, semibreves or minims, used when the notes of the nearest greater species indicated triple time. In triple time the passage $\equiv \diamond \diamond \equiv$ would equal

$o \cdot | \diamond o | o \cdot$ in modern notation.

alteration

The altering of a note by means of accidentals, which raise or lower it a semitone. For its significance in music of the Twelfth Century when notes were first used to indicate a definite duration of time see also alteratio.

alterato (äl-të-rä'-tō) It. adj.

Equivalent to alterata (Lat.).

altère (äl-tä-rä') Fr. part.

Altered; changed: raised or lowered a semitone by means of accidentals.

alti**altered chords**

A chord in which one of the notes has been lowered or raised a half tone without affecting a change of key.

alterezza (äl-të-rët'-tsä) It. n.

Haughtiness, stateliness, pride.

alternamente (äl-tër-nä-mën'-të) It. adv.

Alternately.

Alternating.

alternations

Melodies for bells.

alternativamente (äl-tër-nä-të-vä-mën'-të) It. adv.

Alternately.

alternativo (äl-tër-nä-të'-vō) It. adj.

Alternate: a term applied to the second or contrasting movement in the dance, or minuet form, and is to be played alternately with the more lively, dashing principal theme. In this connection the word trio has almost entirely replaced alternativo in modern music. Although the idea of going back to the first strain is never absent from alternativo it seems to have the same force as da capo, as that sign is seldom used with it.

alternativo minuetto (äl-tër-nä-të-vō mē-noo-ët-tō) It.

Alternately perform the trio part and first theme of the minuet.

Altflöte (ält-flā'-të) Ger. n.

Alto flute. Its compass is from G in the bass upwards for three octaves. It is now almost obsolete though Weingartner used it in his Das Gefilde der Seligen.

Altgeige (ält'-gī-khë) Ger. n.

The old alto viol. The name is now applied to the viola. See also viola.

Althorn (ält'-hörn) Ger. n.

An instrument of the saxhorn variety, used only in wind bands. It is usually tuned in E flat or F, and is provided with valves by means of which half tones may be produced. Although less fine in tone than the French horn, it is often substituted for it because it is easier to learn and gives greater facility in rapid passages for one part. Where it is introduced into a reed band the best effect is obtained by associating two althorns and two French horns, and giving the held notes to the French horns. This name is sometimes given to the baritone saxhorn.

alti (äl'-të) It. adj. and n.

Plural or alto. High: higher than

alti

tenor. Also as a noun, altos. As used in the phrase, *alti naturali*, the natural male altos. Altos is used to indicate the alto voices, or parts written for alto voices or instruments.

altieramente (äl-tī-ä-rä-měn'-tě) It. adv.

Haughtily; proudly; loftily.

altierazza (äl-tī-ä-rět'-tsä) It. n.

Loftiness, sublimity.

altisonante (äl-tī-sō-nän'-tě) It. adj.

Loud sounding.

altisono (äl-tī-sō'-nō) It. adj.

Sonorous.

altissimo (äl-tīs'-sī-mō) It. adj.

Highest. Superlative of alto. The octave beginning on *g'''* on the fourth added line above the treble staff to *f'''* two octaves above the fifth line of the treble staff.

Abbr. *altiss.*

Altist (äl-tīst') Ger. n.

A name for the singer who took the first alto part, or alto primo. One with an alto, falsetto counter-tenor, or contralto voice. In German it is applied to a male alto.

altista (äl-tēs-tä) It. n.

altiste (äl-těst) Fr. n.

See Altist.

Altistin (äl-tīs'-tīn) Ger. n.

A contralto. Feminine of Altist.

altitonans (äl-tī-tō-näns) Lat. adj. and n.

Sounding from on high: a term used in the Sixteenth Century to denote the alto or counter-tenor part, the highest for the natural male voice.

Altklausel (ält'-klow-zěl) Ger. n.

Alto clause: the alto having the leading part in a perfect cadence or close.

alto (äl-tō) It. adj.

Literally, high.

1. Applied to high male, counter-tenor, and low female, contralto, voices.

2. Alto is applied also to one of the stringed instruments which is a little larger and a fifth lower in pitch than an ordinary violin, and takes a position in harmony which corresponds in register to the alto voice. In the expansion of the compass of instrumental music, alto, formerly the highest of low parts, has become the lowest of high parts, the tenor taking its place. Consequently, the terms alto and tenor are often applied to the same instrument, e. g., the viola is called tenor violin by the English and

alto, compass of

alto by the French. The instruments called alto in English and French and alt in German are usually spoken of in Italian as *contralto*. Abbr. *a.*
alto Fr., Eng., It. n.

Either the masculine form of the It. adjective *alto* used as a substantive, or a noun derived from the Latin adjective *altus* (high). In Italy before the violin came into use the tenor viol took the high parts in string compositions, and hence was called the *alto di viola*. When this instrument gave way to the tenor violin, the viola, the name was retained and alto has remained the name of the tenor violin both in Italy and France. In the latter country the saxhorn alto in *E b*, a military band instrument, is also called the alto. In vocal music one whose voice is between tenor and mezzosoprano, an alto, counter-tenor or contralto singer. Alto at first signified the highest male part, sung by high tenor (counter-tenor) voices. Later boys took the part, and now for many years it has been sung by women with low voices (contraltos). The term is seldom used at present in the strict meaning, but is interchanged with *contralto*, which is properly higher than alto, the part between the soprano and tenor in mixed choruses being called alto and sung usually by contraltos. Abbr. *a.*

alto clef.

The C clef on the third line of the staff is called the alto clef, and since the note, middle C, is always on the same line of the staff as the C clef, middle C, or *C'* is on the third line. Middle C is also on the added line above the bass clef and on the added line below the treble clef, so these three lines correspond, and the two upper lines of the alto staff correspond to the two lower lines of the treble and the second and third lines added above the bass. This clef is also called the counter-tenor and viola-clef. Formerly it was used to denote the alto part in vocal music, but now it is used only in viola and alto trombone music and is usually written Equivalent to *altschlüssel* and *altzeichen* (Ger.).

alto, compass of

In the old music, called mensurable because it had a fixed time value for its notes, the rules for singing were difficult and took many years to mas-

alto, compass of

ter, and all the parts had to be taken by men or boys, since women were not allowed to sing in the churches. The two upper parts, altus and dis-cant, or soprano, had to be taken by men and boys with high voices, hence the compass of the alto voice upwards was limited to the notes of the alto clef, that is, from E in the fourth space below the treble clef to A in the second space of that clef. In the Sixteenth Century this compass was extended by the use of falsetto or forced head tones. The falsetto, often best in bass voices, was higher than counter-tenor or alto, hence it was known as falsetto counter-tenor or counter-alto. Counter-alto, contralto, was written on the stave with the C clef on its second line and had a compass of from about G to C'', or G on the third space below the treble stave to C on the first line above it. The contralto staff is now obsolete, and that part must be written in bass or treble. Some of the original contraltos or falsetto counter-tenors are said to have sung as high as A'', that is, A on the first added line of the treble stave. In the Seventeenth Century the place of the falsetto singer was taken by the *evirati*, as the Italians called men with soprano voices.

alto primo (äl'-tō prē'-mō) It.

The first, highest, alto.

alto secondo (äl'-tō sã-kōn'-dō) It.

The second, lowest, alto.

alto tenore (äl'-tō tä-nō'-rě) It.

The high tenor, counter-tenor. This part between the tenor and the modern contralto was the original alto.

alto trombone.

A brass wind instrument whose scale of half tones is obtained either by means of a sliding tube or valves. The valve trombone is easier to play, but the slide trombone has better tone. The alto trombone has a range of from B flat below the bass clef to E flat above and sometimes higher, whence its name, E flat trombone. This is not a transposing instrument but sounds the notes in the key in which they are written; its music is usually written in the alto clef. The alto trombone is now little used in orchestras. The same as *altposaune*.

alto viola (äl'-tō vē-ō'-lä) It.

The small tenor viol on which the alto part was usually played. The predecessor of the viola.

alto violino (äl'-tō vē-ō-lē'-nō) It.

The counter-tenor: the small tenor violin called the viola on which the alto part may be played.

Altposaune (ält'-pō-zow-ně) Ger. n.

The German name for alto trombone.

altro (äl'-trō) It. adj.

Other; others; another; different.

Altsänger (ält'-zěng-ěr) Ger. n.

Alto singer: a counter-tenor.

Altschlüssel (ält-shlūs'-sěl) Ger. n.

Alto clef, or key: the C clef placed on the third line, used for alto parts. See also alto clef.

Altstimme (ält'-stīm'-mě) Ger. n.

Alto, counter-tenor or contralto voice.

altus (äl'-tūs) Lat. adj.

High: the high tenor, contra-tenor, or alto voice. In old church music it was appended to the counter-tenor part on the second stave, being between the cantus, which corresponded to our soprano, and the tenor.

Altzeichen (ält-tsi'-khěn) Ger. n.

Alto sign, alto clef: the C clef on the third line. See also alto clef.

alzamento (äl-tsä-měn'-tō) It. n.

A raising or lifting. Abbr. *alz.*

alzando (äl-tsän'-dō) It. pres. part.

Raising; elevating.

amabile (ä-mä'-bī-lě) It. adj.

Amiable; gentle; sweet; tender; graceful.

amabilita (ä-mä-bē'-lī-tä) It. n.

Amiability; gentleness; tenderness.

amabilmente (ä-mä-bīl-měn'-tě) It. adv.

Amiably; gently; sweetly; tenderly.

amaragnolo (ä-mä-rä-yō'-lō) It. adj.

Somewhat bitter, rather sad.

amarissimamente (ä - mä - rīs - sī - mä - měn'-tě) It. adv.

Very bitterly; very sadly.

amarissimo (ä-mä-rīs'-sī-mō) It. adj.

Very bitter; very sad; sorrowful.

amaro (ä-mä'-rō) It. adj and n.

Bitter, sad; bitterness, sadness, grief, sorrow.

amarognolo (ä-mä-rōn-yō'-lō) It. adj.

Somewhat bitter, rather sad.

amateur (äm-ä-tūr) Fr. n.

A lover of an art: one who studies and practises an art, music, painting, or any other, for pleasure, not as a profession. Usually the education of an amateur is not very thorough. Those who have an intimate knowledge of the subject but do not practise it professionally are more proper-

ly termed *cognoscenti*. Equivalent to *amatore* or *dilettante* (It.), *dilettant* (Ger.).

ambitus (ăm'-bĩ-tūs) Lat. n.

Literally, a going around: hence compass or range; the distance between the highest and lowest notes. Formerly the compass of an ancient church chant.

Ambrosian chant

The method of intoning the mass and Scripture selections introduced by St. Ambrose, Bishop of Milan, during the latter part of the Fourth Century. Ambrose feared the loss or corruption of the old melodies, the origin of which is unknown and which before this had been handed down by oral teaching. His efforts to restore them to their primitive purity and to train the clergy in singing them correctly resulted in the establishment of the so-called Ambrosian chants. These forms have been used in modern times only in the diocese of Milan, having been supplanted elsewhere by the Gregorian chants. The Ambrosian chant is a kind of plain-song and differs from modern music in that it is not written in the major and minor scales, but in modes. These correspond somewhat to the Greek manner of writing music and differ from the modern in the placing of the semitones. There are fourteen modes, but Ambrose used only four of them.

Ambrosian hymn

This term is applied to the *Te Deum Laudamus*, We praise thee, O God, a hymn of praise which takes its title from the name of its reputed author, St. Ambrose, Bishop of Milan, who lived during the latter part of the Fourth Century. It is very likely of Greek origin and only translated by St. Ambrose. He introduced many beautiful hymns into the service of the Milan Cathedral. They were really the first metrical or rhythmical hymns used and soon became of equal importance with psalms and canticles.

Ambrosianus cantus (ăm-brō-zĩ-ā'-nūs kăn-tūs.) Lat.

Ambrosian chant.

Ambrosianus hymnus

The Ambrosian chant.

ambubajæ (ăm-bū-bā'-jē) Lat. n. plu.

A name given to a society of itinerant Greek flute-players; doubtless a corrupted form of a noun derived from the Latin verb, *ambulare*, meaning to walk.

American organ

ambulant (ăn-bū-lăn) Fr. pres. part.

Walking; wandering: as itinerant musicians or strolling players.

âme (ăm) Fr. n.

1. Soul; spirit; feeling, emotion.

2. In violins, violas, and other stringed instruments of that class, the sounding-post or prop is called the *âme*.

amen (ä'-mën in the ritual of the church, otherwise (ā'-mën) Heb.

So be it: used at the end of psalms, hymns, anthems and other sacred music.

amen chorus

A chorus which is written chiefly on the word Amen. Many composers from the early Italians to the present day have written long settings to this word to show their skill in counterpoint and fugue. The most famous, perhaps, of all these compositions is Handel's Amen chorus in the "Messiah."

ameno (ä-mä'-nō) It. adj.

Pleasing; agreeable; charming; sweet.

America

See My Country 'Tis of Thee.

American concert pitch

The pitch adopted for the note A on the second space of the G or treble clef, by which it has 435 double vibrations per second. This pitch was adopted in 1891 by a committee appointed by the National Music Teachers' Association.

American fingering

The system of fingering in which the thumb is marked X and the fingers 1, 2, 3, 4, as opposed to the present German system, which counts the thumb as the first finger. Its origin, however, is German or English. When fingering was first used the Germans indicated the thumb by 0, but when the system came into use in England this sign, easily mistaken for a whole note, was changed to  and finally X, hence this fingering is more properly termed English.

American organ

A keyboard instrument rather similar to the harmonium but having important differences. The chief difference is that the bellows suck the air in through the reeds instead of forcing it out through them. The reeds are more curved and twisted and considerably smaller than those of the harmonium and have larger space in

American organ

which to vibrate. This makes the tone broader and softer, less thin and nasal. In this instrument the wind channels or cavities under which the vibrators of the reeds are fixed is always the exact length of the reed in contrast to the harmonium, in which it is shorter or longer as a reedy or fluty tone is required. The tone quality of the American organ is more like the organ than that of the harmonium but is not capable of nearly so much expression. The instrument is sometimes made with two manuals and a mechanical device by which all the power of the instrument can be obtained on the lower row of keys. It was sometimes provided with pedals like the organ pedals. Two recent improvements on this organ are the addition of an automatic swell, a pneumatic lever set in motion by the pressure of the bellows, which gradually opens shutters placed above the reeds, thus increasing the tone; and the *vox humana*, a fan placed just behind the sounding-board, which gives a slightly tremulous tone quality.

This instrument was invented by a workman in the harmonium factory of Alexandre in Paris about 1835. This workman came to America and began to make his organ here. It was later improved and manufactured by Mason and Hamlin. The first instruments were called melodeons or melodiums.

amore (ä-mō'-rě) It. n.

Love; affection; tenderness, ardor.

amorevole (ä-mō-rā-vō'-lě) It. adj.

Loving; affectionate; ardent; tender.

amorevolmente (ä-mō-rā-vōl-měn'-tě)
Lovingly; affectionately; ardently;
tenderly.

amorosamente (ä-mō-rō-sä-měn'-tě)
It. adv.

Lovingly; amorously; affectionately.

amoroso (ä-mō-rō'-sō) It. adj.

Loving; amorous; affectionate; tender.

Amorschall (ä'-môr-shäll) Ger. n.

Amorsklang (ä'-môrs-kläng) Ger. n.

A French horn with valves invented in 1760 by Kolbel, a musician in the

amplitude of vibrations

employ of the Emperor of Russia. It was an attempt at improving the French horn by the use of valves. The valve mechanism did not entirely do away with stopping the bell of the horn with the hand to produce some tones. The French horn with cylinder and valve has entirely supplanted the Amorschall.

amousikos (ä-moo'-sī-kōs) Grk. adj.

Unmusical; a term applied by the ancient Greeks in regard to individuals to signify the lack of musical appreciation, either due to deficiency in the organs of hearing or to absence of cultivation.

amphibrach (äm-fī-bräk) Eng. n. from
Grk.

From a Greek noun meaning short on both sides. A metrical foot consisting of three syllables or notes, the first and third of which are short or unaccented, the second long or accented, $\cup - \cup$. Also written amphibrachys.

amphicord (äm'-fī-kôrd) Eng. n. from
Grk.

The same as *lira Barberina*.

amphoter

Amphoteric: applied to a series of tones common to two parts of the range of which any voice is capable.

amplitude of vibrations

That quality of vibrations upon which the loudness of a sound depends. Taking the string as an example, the amplitude of its vibrations is the distance it departs from its position of rest after it has been struck, plucked, or bowed. This distance is increased in proportion to the force with which the string is caused to vibrate. When the string is first struck its vibrations are wide enough to be visible to the eye and the corresponding tone is loudest. As the force of the stroke becomes spent, the vibrations become smaller and smaller and at the same time the loudness or intensity of the sound diminishes. When the distance of the hearer from the sonorous body is increased, the intensity of the sound likewise diminishes, for every movement of the string is transmitted to the air in the form of a sound wave which coincides in every way with the vibrations of the string. As the string leaves its position of rest it moves outward, dislodging the particles of air next to it. As air is elastic the motion of the string can not change the bulk of the

analysis of compound musical sounds by the corresponding key. These various tones blend so perfectly that even a trained musician has difficulty in distinguishing them separately.

When in acoustical investigations it is desired to determine the component parts of a given tone, that tone is subjected to a test, in principle, resembling the test to which a compound chemical substance is subjected when searching for its elements. To determine whether a given tone is present in a compound sound it is only necessary to bring within range of the sound an elastic body tuned to produce the given tone for which the search is being made. If the tone be present the body will be caused to vibrate sympathetically, otherwise it will remain silent. In like manner every element of the sound may be discovered and by observing the force with which they cause the elastic body to sound the investigator may determine the original strength of each partial tone.

Helmholtz, born in 1821, and perhaps the most noted modern physicist, was largely instrumental in establishing this method of testing or analyzing compound sounds. He preferred to use, as test bodies, hollow glass vessels of the correct sizes to produce certain tones. If these are arranged not far from a vibrating substance they will each respond to their corresponding partial and the compound sound will be analyzed with facility.

analytical programs

Programs containing analyses of and extracts from the compositions to be presented, usually with some added memoranda concerning the circumstances under which each piece was written and often with a short biographical sketch of the composer. Programs in the early part of the Nineteenth Century did not give even the opus number or key of a work, but only a general title such as, Prelude and Fugue — Bach, which might be any of the forty-eight by that composer, and it was not until the middle of the century that real analytical programs appeared. The development to their present proportions has been gradual.

analyzation

The act of analyzing, resolving a composition or a compound sound into its elements.

ancilla

ancilla (än-sil'-lä) Lat. n.

The shields which the ancient Greeks used to clash in beating the measure of their music on festive occasions.

ancor piu mosso (än-kôr pē'-oo môs'-sō) It.

Even more motion: quicker still.

ancora (än-kō'-rä) It. adv.

Yet; still, even; again. Equivalent to *encore* (Fr.).

andacht (än'-däkht) Ger. n.

Devotion, piety: often used with *mit*—with devotion; devoutly, piously.

andächtig (än-dëkh'-tikh) Ger. adj.

Devotional; devout; pious.

andamento (än-dä-mën'-tō) It. n.

Movement: mode of walking, or proceeding; gait; hence movement or time in music, as *andamento rapido*—a quick movement. In fugal composition the term is applied to a long and elaborate subject, longer than the ordinary subject and more highly developed. It is often in two parts, distinct and strongly contrasted. Many of Bach's organ fugues, Mozart's overture to *Die Zauberflöte*, and Mendelssohn's Six Fugues for piano furnish fine examples of *andamenti*.

andante (än-dän'-të) It. adj. and n.

Literally, going, moving.

1. It was formerly used in this sense and modified by a word indicating the kind of movement, as *andante allegro*—moving quickly. In the Eighteenth Century it frequently indicated a steady, distinct movement. It is now used of a moderately slow, leisurely time and a flowing easy and graceful movement. The character of the movement is often indicated by modifying words. *Andante* time is slower than *allegretto* and faster than *adagio*.

2. *Andante* is also used as the name of a separate composition and of a moderately slow and graceful movement in a large composition, such as a sonata or symphony. Abbr. *andte*.

andante con moto (än-dän'-të kōn mō'-tō) It.

Moving easily, gracefully: with more emotion than *andante* alone, a little faster than *andante*.

andante grazioso (än-dän'-të grä-tsi-ō'-zō) It.

Rather slowly and with grace.

andante largo (än-dän'-të lär'-gō) It.

Slow, broad, distinct and exact.

andante ma non troppo (än-dän'-të mä nōn trōp-pō) It.

Rather slow but not too much so.

anémocorde

andante non troppo (än-dän'-të nōn trōp'-pō) It.

Not too slow.

andante pastorale (än-dän'-të päs-tō-rä'-lë) It.

Rather slow: in a simple manner.

andante piu tosto allegretto (än-dän'-të pē'-oo tōs'-tō ä-l-lä-grët'-tō)

Moderately slow, yet rather cheerful: a rather animated *andante*.

andante quasi allegretto (än-dän'-të kwä'-zī ä-l-lä-grët'-tō) It.

Andante, almost like *allegretto*: almost as lively as *allegretto*.

andante sostenuto (än-dän'-të sōs-të-noo'-tō) It.

Rather slow and sustained: with a stately movement.

andantamente (än-dän-të-mën'-të) It. adv.

Flowingly, uninterruptedly; easily, gracefully.

andantino (än-dän-të'-nō) It. adj.

Diminutive of *andante*: hence a slower movement than *andante*, but it is also wrongly used to indicate a faster movement than *andante*. This arose from the error of considering *andante*, slow. There is no way to tell in which sense the word is used by individuals. It, too, is modified as is *andante*. Abbr. *andno*.

andare a tempo (än-dä'-rë ä tēm'-pō) It.

Move in time: keep precise time.

andare diritto (än-dä'-rë dē-rët'-tō) It.

To go straight on.

Änderungsabsatz (ën-dër-roongs'-äp-säts) Ger. n.

Half cadence: a cadence ending on the three toned chord built on the fifth note of the scale. Half cadence is used in the progress of melody to which other parts have been added.

anelantemente (ä-në-län-të-mën'-të) It. adv.

Pantingly; ardently; eagerly.

anelanza (ä-në-län'-tsä) It. n.

anelito (ä-në-lë'-tō) It. n.

Ardent desire. Also panting, shortness of breath, but *ansamento* is more usual in this case.

anemochord (ä-nëm'-ō-kōrd) Eng. n.

anémocorde (ä-nä-mō-kōrd) Fr. n.

A pneumatic stringed instrument invented by J. J. Schnell, a piano manufacturer of Paris, in 1789. It resembled a piano and had small bellows which forced the air against the strings to give the sounds of an Æolian harp. This idea was further developed by Kalkbrenner and Henri

anémocorde

Herz who constructed a similar instrument in 1851 and called it piano eolien.

anemometer

An appliance used in ascertaining the amount of wind required to sound organ pipes. It consists of a glass tube bent in the form of an S turned on its side. Water is poured into the upper end and the other end is fitted into a socket placed over one of the holes in the sounding-board into which a pipe is to fit. The bellows are then operated and the wind passing through one opening of the tube forces the water through the U-shaped section of the tube on which are indicated inches. From this has grown the expression that pipes are voiced at three, six or ten inch pressure.

anesis (än'-ě-sīs) Eng. n. from Grk. and Lat.

A relaxing, lowering in pitch, of strings: the descent from acute to grave, higher to lower. Opposite of epitasis.

Anfang (än'-fängk) Ger. n.

Commencement, beginning. Vom anfang is equivalent to da capo. Als zu anfang equals a tempo primo.

Anfänger (än-fěng'-ěr) Ger. n.

Beginner.

Anfangsgründe (än - fängs - grün'-dě) Ger.

Rudiments; elements.

Anfangsritornell (än' - fängs - rē - tōr - něl') Ger. n.

The instrumental introduction to a vocal piece.

anfibraco än-fē'-brä-kō) Spa. n.

Amphibrach. A metrical foot containing two short or unaccented syllables separated by a long or accented one. Thus, — — —

Anführer (än'-fü-rěr) Ger. n.

Leader; director; conductor.

angeben (än'-gā-běn) Ger. v.

To give sound; strike a tone: angeben der Tone—to give the pitch; falsch angeben, to produce a wrong note.

Angelic Hymn

The song of the angels at Christ's birth, "Glory to God in the Highest, and on earth, peace, good will toward men." It is sung in the Roman Catholic mass as Gloria in excelsis Deo. and after communion in the Episcopal Church.

Angelika (än-jā'-lī-kä) Ger. n.

angelique (än-zhā-lěk') Fr. n.

1. One name given the organ stop

anhaltende Kadenz

generally known as vox angelica because of its sweet tone or "angelic" voice.

2. A small keyboard instrument of the Seventeenth Century. It was strung with seventeen strings plucked with little quills.

angelophone (än'-gěl-ō-fōn) Eng. n., rare.

An early name for the harmonium or parlor organ. See harmonium.

Angelus (än'-jě-lūs) Eng. and Lat. n.

A prayer to the Virgin, beginning Angelus Domini (the angel of the Lord), offered in the morning, at noon, and in the evening at the sound of the bell, which is also called the angelus. Pope Urban II. instituted this custom.

angemessen (än'-gě-měs'-sěn) Ger. adj.

Adapted to; appropriate; suitable.

angenehm (än'-gě-näm) Ger. adj.

Ageeable; pleasing; sweet.

angkloung (änk'-loong) n.

A crude Javanese instrument made of different lengths of bamboo fastened to a strip of wood. An instrument of the zylophone variety.

anglaise (än-glěz) Fr. adj. and n.

English: an English air; a tune suitable for the country dance, ballad, or hornpipe. It was usually in two-four time, but sometimes in three-four or three-eight. It probably had its origin in the rigaudon, a dance of French origin very popular in England at the end of the Seventeenth Century.

anglico (än-glě'-kō) It. adj.

English. Equivalent to anglaise (Fr.).

angore (än-gō'-rě) It. n.

Anguish; distress; grief; passion. An obsolete term.

angoscevole (än-gō-shā'-vō-lě) It. adj.

Painful; grievous: filled with anguish.

angoscia (än-gō'-shä) It. n.

angosciamiento (än-gō-shä-měn'-tō) It. n.

Anguish, grief, pain, affliction, anxiety.

angoscioso (än-gō-shō'-sō) It. adj.

Grieved; sorrowful, anxious.

ängstlich (enkst'-līkh) Ger. adj. and adv.

Anxious, uneasy; timidly, fearfully. Equivalent to timidamente.

anhaltende Kadenz (än'-hāl-těn-tě käděnts') Ger.

Sustained cadence: the term once

anhaltende Kadenz

applied to the sustaining of one or two notes in a part, properly the bass. Now obsolete. See also organ-point and pedal note.

Anhang (än'-hängk) Ger. n.

Appendage; postscript; coda, codetta. Abbr. Anh.

anhänglich (än'-hëng-lïkh) Ger. adj.

Attached; appended to.

anima (ä'-nï-mä) It. n.

1. Soul; life; spirit.

2. Also the sounding-post of a violin.

anima, con (kôn ä'-nï-mä) It.

With spirit or animation; soulfully. This term and its variations frequently, but not necessarily, imply a quickening of the time, for it is found quite often with a time indication, *adagio molto e con anima*, very slowly and with spirit, and *allegro con anima*, quickly and with spirit. The meaning depends upon the character of the movement in which it occurs. The effect of animation may be gained by marking the rhythm more distinctly.

animando (ä-nï-män'-dō) It. pres. part.

Becoming animated, spirited. Abbr. anim.

animas (ä'-nē-mäs) Spa. n. pl.

Literally, souls; the bell rung in Catholic churches, at sunset, to admonish the faithful to pray for the souls in purgatory.

animato (ä-nï-mä'-tō) It. adj.

Animated, spirited. Abbr. animo.

animazione (ä-nï-mä-tsi-ō'-në) It. n.

Animation.

animé (ä-nē-mä) Fr. part.

Animated.

animo (ä'-nï-mō) It. n.

Mind, heart; sentiment; affections; courage.

animo corde (ä'-nï-mō kôr'-dë) It.

Derived from the Latin *anima*, breath, and *chorda*, cord or string. An Italian name for the anemochord.

animosamente (ä-nï-mō-sä-mën'-të)

It. adv.

Courageously; boldly; resolutely.

animosissimo (ä-nï mō-sis'-sï-mō) It. adj.

Exceedingly bold and spirited.

animoso (ä-nï-mō'-sō) It. adj.

Animated, spirited; bold; courageous.

aniversario (ä-nē-vër-sä'-rë-ō) Spa. adj. and n.

Annual, yearly: an anniversary mass celebrated on the date of a person's death.

Anschlag

Anklang (än'-kläng) Ger. n.

Accord; consonance; tune; harmony.

anklingen (än'-klïng-ën) Ger. v.

To accord in sound; to be in tune.

Ankteriasmus (änk-tër-ï-äs'-moos) Ger.

A mild form of castration to prevent men's voices from changing.

Anlage (än'-lä-khë) Ger. n.

A laying out; plan; outline; sketch of a composition.

anlaufen (än'-low-fën) Ger. v.

To rise: increase, swell in sound.

Anleitung (än'-li-toongk) Ger. n.

Instructor: guidance; direction; a preface, introduction.

Anmuth (än'-moot) Ger. n.

Agreeableness; charm; sweetness; gracefulness; suavity.

anmuthig (än'-moo-tïkh) Ger. adj.

Agreeable, pleasant, charming; graceful. Equivalent to *grazioso* (It.).

anomalies

The false intervals or scales in keyed instruments of fixed pitch, such as piano, organ and harmonium. These instruments can not be exactly and perfectly intoned according to the scientific relation of one tone to another, so certain intervals, especially the major third, or interval of four half tones, and the fifth, or interval of seven half tones, are put slightly out of tune (tempered) by being somewhat sharpened or flatted, in order that all the notes of each scale may be produced. See also temperament.

anomalous chord

A chord which contains a very sharp or flat interval on account of tempering, that is, being put slightly out of tune. This applies to chords played on piano or organ, which, on account of being rigidly tuned to certain pitch, can not produce the exact tone as it is determined by the science of acoustics.

anomalous triads

Altered triads. See also triad.

Ansatz (än'-säts) Ger. n.

Onset; attack.

1. The method of attacking a phrase in singing and of setting the lips in playing wind instruments.

2. Also applied to the mouthpieces of those instruments. The tuning slide in instruments.

Anschlag (än'-shläkh) Ger. n.

1. Stroke. The method of striking the keys of an instrument, especially a piano.

Anschlag

2. Touch. As the name of a kind of double appoggiatura. It is now obsolete. Also the percussion of a discord before its resolution.

anschlagen (än'-shlä-khën) Ger. v.

To sound; strike; touch. Einen andern Ton anschlagen (to sound another tone) means to change the key.

anschwellen (än'-shvël-lën) Ger. v.

To swell; increase in volume of tone.

ansingen (än'-sīng-ën) Ger. v.

To welcome or celebrate with song.

ansiosamente (än-sī-ō-sä-mën'-të) It. adv.

Anxiously.

ansioso (än-sī-ō'-sō) It. adj.

Anxious.

Ansprache (än'-spräkh-ë) Ger. n.

Speech; intonation: the sounding or "speaking" of an organ pipe, a string, or a wind instrument.

ansprechen (än'-sprëkh-ën) Ger. v.

To emit a sound; speak.

anstimmen (än'-stīm-mën) Ger. v.

To tune, intone; strike up. Similar to ansprechen.

Anstimmung (än'-stīm-moongk) Ger. n.

Tuning; intonation.

answer

A response given by a second part to the principal musical thought or theme in a vocal or instrumental composition in which there is an interweaving of melodies. The term is oftenest applied to the replies in a fugal composition where the answer is subject to certain special rules. It is an outgrowth of the original theme called the subject, in melodic character is like it and the nature of the subject determines its treatment which in turn decides to which type of fugue the composition belongs, tonal or real. It is always a transposition of the subject to the dominant key, the tonic is answered by dominant, the dominant by the tonic; in other words, the first note of the scale or the keynote in the subject is replied to by a note either four whole tones above it or three tones below, the fifth above or the fourth below. We may regard the scale as divided into two unequal parts, the tonic being either end note and the dominant at the point between the two parts. With seven whole intervals in the scale we have between tonic and dominant four, and on up from dominant to tonic but three intervals. If the

anthem

answer repeats exactly the subject but is simply moved a fifth higher or a fourth lower it is a real answer and constitutes a real fugue. However, in order to keep both subject and answer within the confines of the scale, as is desirable, there must be some modification, notes are altered and a fifth replies to a fourth or conversely, so the answer is no longer a real but tonal answer and the fugue in which it occurs a tonal fugue.

antanzten (än'-tän-tsëu) Ger. v.

To begin to dance.

ante-chapel

The part of the chapel which leads to the choir.

antecedent

The musical thought, subject or theme introduced by the first part in a composition; used in canon fugue and sonata forms. It always implies in any species of imitation the part which furnishes the model, while the part repeating its melodic design is the consequent. Equivalent to antecedente, guida or proposta (It.); Fuhrer (Ger.); theme (Fr.).

anteludium (än-tē-loo'-dī-üm) Lat. n.

Literally, before the play: hence a prelude, introduction.

anthem

A sacred vocal work usually founded on Biblical words and with or without instrumental accompaniment. The form of the music suggests several divisions, the full anthem consisting wholly of chorus; the verse and chorus anthem consisting of parts intended to be sung by a single voice to a part, with choruses to commence and conclude; the verse anthem in which the verse or parts sung by a single voice to a part have the prominent place but ending in full chorus; a solo anthem consisting of solos and choruses, but without verse; the instrumental anthem, which may be similar to either of these, but is accompanied by other instruments than the organ. The anthem is purely of English birth and is ordained by the ritual of the Anglican church to be sung at the morning or evening services, "in choirs and places where they sing."

It is an ornamental part of the service and the only one in which the congregation does not take part. Although usually founded on Biblical passages, especially those from the psalms, prose and poetry derived from other sources may be used.

anthem, choral

anthem, choral

A slow and stately anthem, similar to a choral, that is, a musical composition set to words from the Scripture or Liturgy, and sung by the choir at the culminating point in the ritual music, notably in the Church of England, but in other Christian churches as well.

anthem, full

An anthem to be sung by the whole choir in chorus.

anthema (än-thē'-mä) Grk. n.

antifonero (än'-tē-fô-nä'-rō) Spa. n.

Precentor, one who chants anthems and leads the choir.

antiphon

Originally a system of singing the psalms in two alternating choirs, one of men's voices, one of women's or boys'. In this system the antiphon introduced the psalm and served as a refrain after each verse. From time to time changes were made, the repetition and refrain, sometimes the psalm itself being shortened. In the Liturgy the antiphon belonging to the Psalm of Introit, sung while the priest is approaching the altar to celebrate mass, was reduced to one verse, and at communion the psalm disappeared, leaving only the antiphon. At divine service the psalm remained intact, but the antiphon was sung only at the beginning and end, and at the beginning was reduced to the opening words. The present meaning of antiphon is a short scriptural sentence sung before and after the psalms for the day or the canticles, selected for its appropriateness to the season in which it is sung. Originally the antiphon was sung between every verse of the psalm and was much longer. Owing to the close connection between antiphonal melody and psalm tone it is essential that there be correspondence between the antiphon and the ending of the psalm and that both be in the same key. During the musical reforms of the Eighth and Ninth Centuries were drawn up the Tonals,

antiphon

a series of methodical rules which secured correspondence between psalm and antiphon by dividing the antiphons according to key and subdividing these groups according to the beginning of the antiphons. The antiphons were used to a certain extent as independent compositions and in this way instead of in connection with the psalms they passed into the English prayer-book. As a general term the word antiphon is applied to the alternate chanting, singing or intoning by two choirs, as practised by the Greek, Roman, Anglican and Lutheran churches.

antiphonaire (än-tē-fō-när') Fr. n.

Antiphonary; a book of antiphons and responses.

antiphonal

The book of antiphons, responses and other music used during the canonical hours in the Roman Catholic Church. Originally the name was also applied to the book containing the music of the mass, but ceased to be used in this connection when most of the antiphons were omitted from the mass, and Introit and Communion became the names of the two principal remaining antiphons, while the book of music for the mass was called Cantatorium and afterwards became known as the Gradual.

antiphonarium (än - tīf - ō - nä' - rī-üm) Lat. n.

A book containing a compilation of responsive singing arrangements called antiphons; an antiphonary.

antiphonary

1. n. A book of antiphons, or arrangements of responsive choir singing introducing and closing the psalms, and used in the divine offices and canonical hours of the Catholic service. This book originally contained all verses sung responsively but later the antiphons pertaining to the service of the mass were collected into one book called the Gradual. The responsories, or versicles, recited by the priest and answered by the choir, which formed a separate volume, are included in the present antiphonary.

2. adj. Related to responsive or alternate singing; antiphonal.

antiphone (än-tīf'-ō-nä) Grk. n. pl.

Antiphons; anthems.

antiphony

appoggiando (äp-pôd-jän'-dō) It. pres. part.

Leaning on; dwelling on; accenting. Connecting notes so that the naturally unaccented takes the accent of the other on which it "leans," as in syn-copation or suspension. Also used as a synonym of portamento.

appoggiato (äp-pôd-jä'-tō) It. past part.

Propped; dwelt on; accented.

appoggiatura (äp-pôd-jä-too'-rä) It. n.

From the verb appoggiare, to lean or dwell upon. The name given to an ornament consisting of one or more grace notes, inserted one degree,

sometimes more, above or below the principal note, from which they derive their time. The long appoggiatura (langer Vorschlag, Ger.) receives the accent of its principal note and has a definite value: one half of a simple note; two-thirds of a dotted note not divisible into two equal parts; or the whole value of the principal note when that note is tied to another of the same pitch.

appoggiatura

Its value is usually indicated in the grace note, but this is not always the case, e. g.:

The performer must judge from the passage in which it occurs how long the appoggiatura is to be, for if the harmonic progression of the notes or rhythm of the piece would be spoiled by the strict observance of the rules concerning the length of this appoggiatura, the appoggiatura would have to be rendered shorter. Shortened long appoggiaturas, taking only a third, or even less, of the value of their principal notes also occur, and sometimes lengthened appoggiaturas, equal to three-fourths of the principal notes, are found. The long appoggiatura is really a suspension and was written in small notes by the early composers because they were forbidden to use unprepared discords.

The short appoggiatura or acciacatura is rendered rapidly, and varies

so slightly in different forms of time that it is sometimes called the unchangeable appoggiatura.

It is now indicated by a small eighth or sixteenth note with an oblique line through the hook, but in old music the line was not used, so that it may easily be mistaken for a long appoggiatura.

When an appoggiatura consists of two or more grace notes it is called a double or compound appoggiatura.

appoggiatura

Appoggiaturas like those starred in the illustration are also called slides (Schleifer, Ger.) The term superior appoggiatura is applied to one in which the grace note, or notes, are above the principal note; inferior to one in which they are below.

Grace notes following the principal note from which they derive their time value form an unaccented appoggiatura or after beat. **Written Played** (Nashlag. Ger.).

Following is an example of an appoggiatura with a chord:

apprestare (äp-prä-stä'-rě) It. v.

To make ready, prepare; to tune an instrument preparatory to playing.

âpre (äpr) Fr. adj.

Rough, harsh, uneven; bitter, austere.

âprement (äpr-män) Fr. adv.

Arabeske (är-ä-bēs'-kě) Ger. n.

arabesque (är-ä-běsk') Eng. and Fr. n.

1. An architectural ornamentation consisting of plant, animal or even human forms arranged in fanciful groups or combinations. The pure Arabian arabesque was comprised only of lines, curves and geometrical figures.

2. The term was first applied to music by Schumann as the title of one of his piano pieces, light and graceful in style and similar to a rondo in form. It is occasionally used by writers of music in this sense, and in speaking of ornamentation of themes.

arbitrii (är-bī-trī'-ī) Lat. n. plu.

Points, introduced by the singer at pleasure while the accompaniment ceases, by means of which he leads the ear to the subject matter of the air. Called by the French *recherches*.

arbitrio (är-bē'-trī-ō) It. n.

Free will. At the pleasure of will of the performer.

arcata (är-kä'-tä) It. n.

The use of the bow, mode of bowing, as *arcata in giu*, bowing with the down-stroke, and *arcata in su*, bowing with the up-stroke.

arcato (är-kä'-tō) It. adj.

Bowed: signifying that the passage

archicembalo

so marked is to be played with the bow. Opposite of *pizzicata*. Abbr. *arc.*, *arco*.

arch

In old figured bass the system of musical notation wherein the bass part was written out and the other parts indicated by Arabic numerals placed over or below it, this sign was placed over the note to indicate that a note at an interval of an imperfect fifth, or three whole tones, was to be used with it. Now obsolete.

arch-chanter

The leading singer in the choir; the precentor.

Arche (är'-khě) Ger. n.

Literally, a chest: hence the sounding-board of an organ or other musical instrument.

arched viall n. obscure.

An instrument described in Pepys' Diary, October 5, 1664, as "being tuned with lute strings and played on with keys like an organ; a piece of parchment is always kept moving, and the string which by the keys are always pressed down upon it, are grated in imitation of a bow, by the parchment; and so it is intended to resemble several vialls played on with one bow, but so basely and so harshly that it will never do. But after three hours stay it could not be fixed in tune and so they were fain to go to some other musique of instruments."

archeggiamento (är-kěd-jä-měn'-tō) It. n.

The act of bowing: the management of the bow in a general sense.

archeggiare (är-kěd-jä'-rě) It. v.

archettino (är-kět-tě'-nō) It. n.

archetto (är-kět'-tō) It. n.

Diminutive or arco. A little bow.

archi (är'-chē) It. n.

Bows. Plural of arco. *Gli archi*—the bows, is equivalent to our expression, the strings, meaning the string instruments in the orchestra.

archi (är'-kī) Lat.

1. A prefix meaning chief, greatest.

2. Used of old instruments, signifying the largest in size and compass.

archicello (är-kī-chěl'-lō) It. n.

Diminutive of arco. A little bow.

archicembalo (är-shē-shēm-bä-lō) Fr. n.

An instrument of the harpsichord

archicembalo

species invented by Don Nicolo Vicentine in the Sixteenth Century. It had six keyboards and special keys and strings and on it could be played chromatic, diatonic and enharmonic scales.

archiluth (är-shē-lüt) Fr. n.

Equivalent to archlute, which see.

archimandora (är-kī-män-dō'-rä) It. n.

A large instrument of the lute variety, having deep, pear-shaped body and long neck. It is the largest of the mandora species.

archiviola da lira (är'-kī-vē-ō'-lä dä lē'-rä) It.

The name given to a large lyre furnished with about twenty-four strings and capable of producing bass tones. Also called lirone.

archlute

A theorbo or double-necked lute, having a special large body and being more than four feet high. The double neck has two sets of tuning pins, the upper, which has the bass strings, containing ten pins and the lower about fourteen. Its strings of catgut or metal were often tuned in pairs and had a range of two octaves upward from G below the bass clef. The body had ornamented sounding-holes and to the neck were fastened frets of gut or wire. The necks and backs of these instruments were often elaborately ornamented. It was popular in the Seventeenth Century for the lowest part in instrumental music and accompaniments, especially in combination with the clavicembalo to accompany recitative.

arci (är'-chī) It.

Equivalent to archi (Lat.), which see.

arcicembalo (är-chī-chām-bä'-lö) It. n.

See archicembalo.

arciliuto (är-chēl-yoo'-tō) It.

The same as archlute.

arco (är'-kō) It. n.

The bow. Coll'arco or arco, used to contradict pizzicato, means that the bow is again to be used in playing instead of the fingers.

ardente (är-dēn'-tē) It. adj.

Ardent; fiery, passionate, amorous.

ardentemente (är-dēn-tē-mēn'-tē) It. adv.

With much force; very boldly, passionately.

ardore (är-dō'-rē) It. n.

Ardor, fervor, warmth.

Aretinian syllables

The syllables of a scale system of six sounds called a hexachord and invented by Guido Aretina or d'Arezza, who lived from 995 to 1050. In 770 Paulus Diaconus, the first important historian of the Middle Ages, wrote a hymn in honor of the festival of St. John the Baptist. The words were as follows:

Ut queant laxis	Resonare fibris
Mira gestorum	Famuli tuorum
Solve polluti	Labii reatum
Sancte Johannes.	

To the notes:

C D F	D E D
E F G E	D E C D
G A G F E	F G D
D D C D	E E
F G A	G F E D D
A G A	F G A A
G F E D	C E D

Thus it will be seen that the first syllables Ut, Re, Mi, Fa, Sol, La, of the divisions, represented the first six notes of the scale in their natural order. Ut=C, Re=D, Mi=E, Fa=F, Sol=G, La=A. This fact became apparent to Guido and on it he formed his hexachord which became the foundation of the modern octave scale. Later on the seventh note Si=G was added. Do was substituted for the word Ut in every country but France, and up to the present time this system of monosyllables is used to designate the seven notes of the scale.

argenté (är-zhāñ-ñ) Fr. adj.

Silver-like: silvery, clear, bright. Silver-tone.

aria (ä'-rī-ä) It. n.

Primarily an air or melody; a song; a melodic composition, usually elaborate, designed for a solo voice with instrumental accompaniment.

An air in German style: an air with closely related accompaniment.

Ariadne, dance of (ä-rī-äd-nē) Grk.

A Greek dance, described by Homer in the Iliad. Vulcan engraved such a dance on the shield he made for Achilles. In Homer's description of this dance young men and maidens joined hands and formed a circle, dancing with graceful and rhythmic steps. After a time they broke up the ring and formed various figures. The young girls were clad in a light drapery and wore garlands of flowers over their brows; and the young men, their bodies shining with oil, rubbed in at the gymnasium, wore tunics of a heavier material, and from their silver belts hung richly decorated swords.

arie (ä'-rī-ä) It. n. plu.

Airs; songs.

arie aggiunte (ä-rī-ä äd-joon'-tē) It.

Abbr. arpo.

arpeggio accompaniment

An accompaniment made up almost entirely of arpeggios: broken chords.

arpeggione (är-pëd-jō'-në) It. n.

Guitar-violoncello. A stringed instrument invented by G. Staufer of Vienna in 1823. It seems to have been about the size of the small violoncello called viol da gamba, but was shaped more like a guitar. The finger-board had frets and the six strings were tuned to E, A, d, g, b, e. This instrument was little used, although we have a sonata in A for piano and arpeggione written by Schubert about 1824.

arpicordo (är-pî-kôr-dō) It. n.

The same as harpsichord.

arpinella (är-pî-në'l'-lä) It. n.

See arpanetta.

arpone

arpone (är-pō'-ně) It. n.

An instrument like the harp but having its strings set horizontally instead of vertically. It was played like the harp. It was invented about the end of the Eighteenth Century by Barbieri of Palermo.

arrangement

The adaptation of music for some other instrument or voice, or for some purpose for which it was not originally intended. Orchestral scores are frequently arranged for piano, piano duets as solos, or a separate composition as an overture or incorporated in a larger work, such as an opera or vice versa. There are already a long array of arrangements, made by one composer of another's works or of his own. Abbr. arr.

arranger (är-rän-zhä) Fr. v.

arrangiren (är-rän-zhër'-ën) Ger. v.

To arrange music for special voices or instruments, other than those for which it was written, as to arrange an orchestral score for the piano.

ars canendi (ärz kä-nën'-dī) Lat.

The art of singing.

ars componentis (ärs kōm-pō-nën'-tis) Lat.

The art of composing.

ars musica (ärz mü'-zī-kä) Lat.

The art of music.

arsis (är'-sis) Grk. n.

Literally, the lifting or elevating of the voice or the hand in beating time; the up beat. Usually understood to mean the unaccented part of the-measure, but construed also as the part on which the stress is laid (the accented part). This contradiction arose from the fact that the Latin grammarians in the Middle Ages construed the Greek word to mean a raising with emphasis and hence applied it to the accented feet in poetry and the accented beats in music, but it is now generally considered that the Greeks used it in the opposite sense and it is now so understood by the majority of musicians, though it is virtually obsolete in the present day.

art (ärt) Ger. n.

Kind, species, sort; way, mode, manner, or style.

art de l'archet (är dü lär-shā') Fr.

astronomic dance

This was thought to be the most sublime of all Egyptian dances. In rhythmic steps, figures and movements, the dancers tried to represent the majestic harmonious movements of the heavenly bodies. They danced to a musical accompaniment of flute and lyre. In these astronomical dances, the altar, in the center of the Egyptian temple, stood for their god Ra, the sun, while the dancers, representing the signs of the zodiac, the planets, and the constellations, moved in rhythmic figures around it. The Greeks also used the astronomic dance, performing it around the burning altar of Zeus.

augmentatio (awg-měn-tä'-shī-ō) Lat. n.

Augmentation, which see.

augmentation

Increase: a lengthening of time; opposed to diminution. In a contrapuntal composition or one in which melodies are combined, as fugue or canon, augmentation is the device used for prolongation of the principal theme or musical thought and consists of the doubling of the original value of the notes, using whole notes for half notes, half notes for quarter notes, and quarter notes for eighth notes. The term is chiefly confined to the description of fugal works in which augmentation is but one of the methods employed to give variety and at the same time permit the repetition of the central musical thought or subject. The changed value of notes brings about an increase in length of musical units, making measures into phrases, phrases into sections and sections into periods, still retaining the theme and by its new setting emphasizing it and increasing the interest of the listener. It is a method of varying a theme that has been used with good effect by some of the greatest composers. Each employed it in a number of his piano fugues. Handel in the first chorus of Samson and Leo and Cafaro in their Amens. Abbr. aug., augm.

augmenté (ōg-māñ-tä) Fr. past part.

Augmented, increased, enlarged.

augmented

Increased, widened: applied to intervals increased by sharp, flat or natural until they are greater than the major or perfect interval.

augmented chord

A chord containing a major third, four half steps, and an augmented fifth, eight half steps. Same as redundant chord.

augmented fifth

An interval of five tones with the upper tone raised a chromatic semitone by an accidental, making an interval of four whole tones or steps instead of three and a half steps, as in the perfect or ordinary fifth.

augmented fourth.

augmented fourth

A fourth or interval of two and a half tones which is increased a half tone by the sharpening of its higher note.

augmented imitation

Imitation in which the consequent, or part that repeats the subject, is written in notes twice the length of the antecedent or part that introduces the subject.

augmented intervals

Intervals increased a half tone by means of sharp, flat or natural so that they are larger than perfect or major intervals.

augmented octave

An octave, the last tone of which is raised half a tone by means of a chromatic sign, that is, a sharp, flat or natural.

augmented second

A second or interval of a whole tone which is increased a half tone by the sharpening of its higher note.

augmented sixth

A sixth or interval of four whole tones which is increased by a half tone through the sharpening of its highest note.

augmented unison

Two notes on the same degree of the staff, the second note of which is raised a half step by means of a chromatic sign, making half a tone instead of a whole tone.

augmenter (ōg-māñ-tä') Fr. v.

To augment: to increase; enlarge; widen.

auletes (aw'-lē-těz) Grk. n. pl.

Players upon an ancient Greek flute, the aulos.

aulodia (ä-oo-lō'-dī-ä) It. n.

Aulody: singing to a flute accompaniment.

aulos (aw'-lōs) Grk. n.

Derived from the Greek verb to blow. The most important wind instrument of the Greeks. The word has been translated generally as flute, but the name was doubtless more comprehensive, including reed instruments also. The aulos was often double, one pipe being longer than the other. The two were played by one performer and sounded the bass and treble simultaneously.

auteur (ō-tūr) Fr. n.

Author; inventor; composer.

authenticImmediately related to the keynote, that is, within an octave above the keynote. Equivalent to *autentico* (It.), *authentique* (Fr.), *authentisch* (Ger.).**authentic cadence**

The old name for perfect cadence or perfect close, formed by the chord of the dominant (the chord based on the fifth tone of the scale) followed by the chord of the tonic (the chord based on the first or fundamental tone of the scale) in contradistinction to the plagal cadence which is formed by the chord of the sub-dominant (the chord based on the fourth tone of the scale) followed by the chord of the tonic. The perfect cadence is generally used to conclude modern music.

authentic keys

A series of notes which extend from the first degree or keynote of a major or minor scale to the fifth and the eighth or octave above.

authentic melody

See melody, authentic.

authentic modes

The seven modes or scales used in

auto

early church music, the original four of which are attributed to St. Ambrose, Bishop of Milan, in the Fourth Century. These modes had a compass of an octave above the final or keynote, in contradistinction to the plagal modes, established later, the first degree of which was four tones below the keynote of the authentic mode upon which it was based. Thus the first authentic mode ranged from d to d'; that is from D below middle C to D above middle C, while the first plagal mode was from a to a'. The two kinds of modes were inverted as regards structure, the authentic being considered as a pentachord, five tones, with a tetrachord, four tones, above it, the two meeting on the dominant, the most important tone of the older octaves and the fifth degree of the scale in the authentic modes. Thus:

$$\overbrace{d \ e \ f \ g \ a \ b \ c' \ d'}$$

The plagal modes are thought of as a tetrachord with a pentachord above it meeting on the final in the corresponding authentic mode. Thus:

$$\overbrace{A \ B \ c \ d \ e \ f \ g \ a}$$

No chromatic semitones were used except occasionally B flat.

authentic part of the scale

That part of the scale between the tonic or keynote and the dominant or fifth above in contradistinction to the plagal part or that part from the dominant to the higher extreme of the octave. For instance, in the key of C, C-D-E-F-G is the authentic part of G-A-B-C, the plagal part. The terms have grown into this use because of the musical significance of authentic as meaning nearer and more closely related to the keynote, and plagal as meaning further away and less closely related. Hence the authentic is considered a more important part of the scale than the plagal or "leaning" part.

authentique (ō-tën-tëk) Fr. adj.**authentisch** (ow-tän-tīsh) Ger. adj.

Authentic: immediately related to the keynote, that is, within an octave above the keynote.

auto (ä-oo'-tō) Spa. n.

Act, action. Auto sacramental, an allegorical or dramatic play on a religious subject, in which music played an important part. These representations were formerly given during reli-

auto

gious festivals, but have been obsolete since the Eighteenth Century.

autoarpa Wagner (ä-oo'-tō-är'-pä) It.

An improvement on the autoharp by which that instrument may be played in the ordinary keys. It was invented by E. Gläsel, of Markneukirchen, in 1896. See autoharp.

autoharp

A zither without finger-board or accompaniment strings. All the strings are swept or struck by a plectrum and are stopped by a series of from four to eight compound dampers called manuels or pedals so arranged that pressing one down leaves free only certain strings which form a chord. When these are swept with the plectrum a chord results. The melody is accented by special stress put on the melody tone of the chord.

autophon (aw'-tō-fōn) Eng. n. from Grk.

A kind of barrel organ.

autore (ä-oo-tō'-rě) It. n.

Author; composer.

auxiliary notes

auxiliary scales

The scales of relative keys. See also relative keys.

Ave Maria (ā-vē mā-rī'-ā or ä'-vē mā rē'-ä)

Hail! Mary.

1. The opening of a hymn to the Holy Virgin, written about the Twelfth or Thirteenth Century. It is based on the words of the angel Gabriel, "Hail Mary, full of grace; the Lord is with thee," and Elizabeth's salutation, "Blessed art thou among women, and blessed is the fruit of thy womb." These words have furnished the text of many musical compositions by eminent composers.

2. Also a prayer to the Virgin Mary consisting of the two salutations and a short prayer added by the church. It is called the Angelic salutation.

Ave Maris Stella (ā'-vā mā'-rīs stěl-lä or ä'-vē mā'-rēs stěl'-lä) Lat.

Hail! Star of the Sea. A Roman Catholic hymn to the Virgin, sung at the Vesper service on her festivals. It follows the psalms and precedes the Magnificat. It is an unrhymed accental hymn frequently ascribed to St.

avoided cadence

Bernard, but it antedates him, since it is found in a St. Gall manuscript of the Ninth Century. On account of its popularity in the Middle Ages, many hymns are founded on it.

Ave regina coelorum (ä'-vē rē-jī'-nä sē-lō'-rüm or ä'-vē rā-gē'-na sē-lō'-rüm) Lat.

Hail! Queen of the Skies. A Roman Catholic antiphon or responsive hymn sung during the divine office from the Feast of the Purification, February second, to Holy Thursday, and followed by its own versicle and response. It is found in St. Alban's Book of the Twelfth Century and was introduced into the service by Pope Clement VI in the Fourteenth Century. During Lent and Passiontide it recalls the part of Mary in opening heaven to man.

B moll

azione sacre (ă-tsi-ō'-ně să'-krä) It.
A sacred musical drama; an oratorio.

B**B**

1. The seventh tone of the scale of C major, that is, of the scale which has C for the keynote or first degree, and has the interval of a major third, two whole tones, between C and the third degree, namely, E. This scale is considered to be the typical diatonic scale because it necessitates no flats and sharps to bring about the succession of tones and semitones required to make a complete diatonic scale.

2. The name of one of the major keys, that is, of one of the keys having the interval of a major third, two whole tones, between the first and the third degrees, in this instance, B and D. The key of B major necessitates the use of five sharps, C sharp, D sharp, F sharp, G sharp, and A sharp, to obtain the proper diatonic succession of intervals. These appear in its signature.

3. The name of one of the minor keys, that is, the name of that key which has B for a keynote or first degree and has the interval of a minor third, one whole tone and a half tone, between B and D, the first and third degrees. It is called the relative minor of D major because they both require two sharps, C sharp and F sharp, to bring about the proper succession of intervals required by the diatonic scale.

4. The note B flat in Germany where B natural is called H.

5. Abbreviation of bass or basso.
bb Ger.

Double flat (bb). Same as doppel-b.
B cancellatum (kän-sě-lä'-tŭm) Lat.

Cancelled B. The sharp formed originally by crossing or cancelling B to indicate that it was to be raised a half tone. Until the middle of the Eighteenth Century the sharp following a flattened note had the same meaning that the natural now has. See also accidentals.

B double flat

B lowered two half steps by means of a double flat; same tone as A.

B double sharp

The note B raised two semitones by means of a double sharp; the same tone as C sharp.

B dur (bā door) Ger.

The key of B flat major.

B flat chord

The B flat major key has two flats in the signature. The chord of B flat consists of the notes B flat, D and F.

B flat major

The major key whose signature is two flats.

B flat minor

The minor key whose signature is five flats, relative to the key of D flat major.

B flat minor chord

This chord consists of B flat, D and F flat, B minor key having five flats in the signature.

B major

The major key whose signature is five sharps. See also B.

B minor

The minor key whose signature is two sharps relative to the key of D major. See also B.

B in alt (ēn ält) It.

The third note in alto octave, or the tenth note above the G clef, or soprano clef. The note on the second space above the staff.

B in altissimo (ēn äł-tis'-sī-mō) It.

The octave above B in alto.

B-mol (bā-mŭl) Fr. n.

The character called a flat, which has the effect of lowering half a tone the note it follows. Also, the note B flat.

B moll (bā mōl) Ger.

The key of B flat minor.

B flat major

B flat minor

B major

B minor

B quadrum

B quadratum (kwäd-rät'-üm) Lat.

B quadrum (kwäd'-rüm) Lat.

Square B. In old notation B natural was written square, to distinguish it from B flat, B rotundum (*b*) and was therefore called B quadratum or quadrum. The modern natural sign (*n*) evolved from this square B.

B rotundum (rō-tün'-düm) Lat.

Round B (*b*), the name given by the old musicians to the note B flat to distinguish it from B natural, B quadratum, which was written square: Later it became a general sign for lowering any note, and finally took the form of the modern flat sign (*b*), B sharp.

The seventh note in the scale of C, raised by a half tone. In keyed instruments, the same as C natural.

bacchanale (bäk-kä-näl) Fr. n.

Drinking songs.

Bacchanalia (bäk-ä-nä'-lī-ä) Eng. from the Lat.

Originally a Greek dance performed by priests and priestesses of Bacchus, dressed in fawn skins, wearing ivy crowns, and carrying thyrsi, spears entwined with ivy or having a pine cone stuck on the point. These ceremonies were introduced into Rome in the Second Century B. C., and at first were celebrated by women only, on three days of the year. Later the mysteries were opened to men, and their celebration was made more frequent. They were marked by such licentiousness and immorality that the Senate discontinued them in 186 B. C., many persons being sentenced to

backfall

death or imprisonment because of the disclosures resulting from the investigations.

Bacchanalian songs

Originally songs sung in ceremonials of the worship of Bacchus, the Roman god of wine. Hence any songs in praise or defense of the use of wine.

bagatelle (bă-gă-těl) Fr. n.

A trifle: a short piano composition, rather easy and light in character.

bagpipe

An instrument of eastern origin and of very great antiquity, which was almost universally used. It was known to the Greeks and was a military instrument among the Romans, and during the Middle Ages attained great popularity. The French form of bagpipe called *musette* was one of the instruments played at concerts at the court of Louis XII. It gradually fell into disuse, holding its place longest in England, Ireland and Scotland, Italy and Sicily and Poland, in which countries it may still be heard occasionally. It was also used in the East, in China, Egypt, India and Persia.

The bagpipe varies in form, but its general characteristics are a leather bag, which contains the wind conveyed from the mouth or from a pair of bellows worked by the arm, three pipes or drones capable of producing but one tone each, and the melody pipe called *chanter*, which is fitted with a reed and bored with six or eight holes, stopped at the ends by the fingers of the performer. The Highland bagpipe is perhaps the most common form, so a description of it follows: It has a valved tube leading from the mouth to an air-tight leather bag, into which are tightly fastened five short tubes, into which are fitted the three long pipes or drones, the blow pipe and the *chanter*. The drones are tuned by a slider on the pipe itself, which varies the length of the air column in the pipe. The drones are single reeds, but the *chanter* has a double reed like oboe and bassoon. The length of the drones are propor-

balance

tioned to their notes, and their tuning varies, some authorities stating that they are all tuned to A, others that they are tuned to G, D, G, D, A, D, or even G, D, A. The *chanter* is a conical wooden tube about fourteen inches long, having eight sound holes, seven in front for the fingers, and one at the top behind for the thumb of the right hand. Two additional holes are bored across the tube below the lowest sound hole, to regulate the pitch. The *chanter* is not tuned in strict accord with any generally used modern musical scale. The nearest idea of the position of its tones can be obtained by taking the common chord of G, that is G plus the notes at intervals of a third and a fifth above it, and adding above it the common chord of A and an extra note, F or F sharp. We get G, B, D, G plus A, C sharp, E and A. This very imperfect tuning gives the bagpipe its archaic and picturesque character. Ornamental notes are much used and are called *warblers*. A skilful piper is able to introduce a warbler of eleven notes between the last up beat and the first down beat of a measure. Until modern times music for the bagpipe was written according to a special system of notation, each note being called by a special name.

banjo

The negro pronunciation of banjore, a corrupt form of bandore, which see. Also written banjer. An instrument supposedly descended from the African bania. It has a long neck which carries the finger-board and pegs which tighten the strings, and are a support for the body which consists of a circular part like a drum-head over which parchment is stretched. It has from five to nine strings stopped in the ordinary way except an octave string next the

banjo

lowest tuned string which is never stopped. When there are five strings they are tuned to the G on the third space below the treble clef C on the first line, below G on the second line, B on the third, D on the fourth and G on the space above. The parchment drum gives the strings a peculiar tone quality. The music of this instrument is sprightly and quaint in character, adapted to dancing and as an accompaniment to the voice, and the instrument is a great favorite with the American negro.

Bänkelsänger (bënk'-ëlsëng-ër) Ger. n.

Bench-singer. Strolling ballad-singers of a low class, who partly sing and partly recite ballads and romantic tales at fairs and such places. So called because they stood upon benches the better to be heard.

A simple instrument or vocal melody written in imitation of or similar in character to the songs of Venetian gondoliers and usually in six-eight time.

bard. Eng. n. of Celt. origin.

In all Celtic countries the name given poet musicians or minstrels whose duties consisted in celebrating the deeds of heroes and kings, reciting accounts of battles and other important events at social gatherings, and of singing the praises of the gods at all religious assemblies. They usually accompanied themselves on the harp, or the ancient Celtic instrument like a violin which they called *crowd* or *crwth*. They became very powerful, winning the favor of kings and princes through their abilities as chroniclers or entertainers, and wielding it sometimes so mightily that laws were made to restrain them. They marched in the forefront of battle, inciting the warriors to bravery by means of their heroic and inspiring music, and in times of peace served the state as ambassadors and heralds. They were the preservers of traditions and chronicles, and were sometimes among the most learned people of a community. They preserved old song forms and the words of old songs and ballads and have thus greatly influenced music of the nations in which they flourished. They kept their influence longest in Wales, where they held assemblies called *Eisteddvodau*, where they met and held contests in recitation and singing until the time of Queen Elizabeth; these assemblies have since been revived. In Ireland they are divided into *Filheda* or singers of sacred and heroic songs, who served as heralds and councillors and ambassadors; *Braithlemain*, who expounded the laws; and *Senachaidhe*, who preserved the chronicles and records. To the bards in great measure we owe the preservation of ancient Celtic song.

The bridge or small arched piece of wood on the face of the lute over which the strings pass to the screws on which they are stretched.

barred C

C with a bar through it,  the sign for alla breve time, meaning that the notes which follow are to be sounded twice as fast as in common time. It usually stands at the beginning of a piece, instead of 2-2, but is also used to indicate two-one or four-two time.

barrel

The cylinder studded with pins which in the barrel organ opens the key-valves, and in the music box sets in vibration the teeth of a steel comb by which the sound is produced.

barrel, chime

The revolving cylinder in a mechanical apparatus for playing chimes.

barrel organ

barrel organ

A portable organ. A crank turned by hand revolves a wooden cylinder furnished with keys, which open a series of valves. Currents of air are in this way forced into pipes of various length and diameter and the tones produced. By mechanical devices the valves are opened in melodic and harmonic order, and the barrels or cylinders are movable so a number of melodies can be played. The compass seldom exceeds two and one-half octaves and as the tone is incapable of expression the music becomes decidedly monotonous.

At one time the barrel organ was used in church services but today is known only as a means of street entertainment and even there is being superseded by the street piano. Also called hand organ.

barrer (bär-rā') Fr. v.

To bar, to obstruct, to stop. In guitar playing the act of pressing all the strings against the finger-board, with the left fore-finger, thus raising the pitch.

1. A male voice, intermediate between bass and tenor and partaking of the quality of bass. Its range is usually from lower G on the bass staff to lower F on the treble.

2. A brass wind instrument of the saxhorn family having a range of from B flat on the second line of the bass staff to C flat on the third line of the treble stave.

3. A viola da gamba, an ancient instrument similar to the violoncello, the bass instrument of the viol family,

Bass

which beside the regular strings had sympathetic metal strings passing under the keyboard. The peculiarly shaped bridge carries six or seven regular strings tuned much as they are on the viola da gamba. Partly under it and partly to the right of it is a brass frame carrying a variable number of strings, from seven to forty-four. The lowest string was usually tuned to E and the tuning of the rest varied according to their number, the largest number allowing a pair of strings to each half tone throughout the two octaves which comprises the compass of the instrument. If the strings were only seven they were probably tuned to some diatonic scale. The barytone was invented in the latter half of the Seventeenth Century, and was attributed to English makers, although no English specimens exist, and the instrument was used almost exclusively in Germany. Equivalent of viola di bordone and viola bastarda.

4. A term applied to any instrument between the bass and tenor instruments of the same family. Abbr. bar. barytone clef

top, as

bass string

In stringed instruments, the string upon which the lowest note is played.

bass, thorough

A system of notation which might be called musical shorthand. The bass part of the composition is written out and the other parts, such as treble and alto, are indicated by Arabic numerals written above or below the bass notes. Each figure indicates the interval or difference in pitch between its note and the bass, and the order of the figures is according to the width of the intervals, the widest being placed at the top. Equivalent to basse chiffrée, basse continue, basso figurato, basso numerato, and synonym of continued bass.

bass trombone

The bass instrument of the trombones, a series of metal wind instruments used in orchestra and making the half tones by means of a slide mechanism. The bass trombone has a range from C on the second line below the bass clef to F on the first space of the treble clef.

bass tuba

The brass wind instrument of the tuba class, the lowest members of the saxhorn family. A cylinder horn in two forms; the one tuned to e flat is straight and the one tuned to b flat circular and passing around the neck of the performer. The tuba has four valves and gives a complete chromatic scale of about four octaves, with b flat, that is b flat on the second line of the bass clef, as its first open tone and a range up to f on the first space of the tenor clef. This instrument is used in orchestras in Germany and in military bands.

basse taille (bäs tî'-yü) Fr.

A barytone voice having bass quality.

basset-horn

An instrument of the clarinet family, of very beautiful rich tone, invented about 1770 and improved by Lotz of Pressburg twelve years later. It had a range of all the half tones except F sharp and A flat in the lower part from F on the first space below the bass clef to C on the second line above the treble clef, and except for the four lowest notes differed in no respect from the tenor clarinet. These four notes were obtained by means of

basset-horn

long keys worked by the thumb of the right hand, which on ordinary clarinet is used only to support the instrument. For convenience of handling this instrument has been made in a variety of curved shapes, the curve coming either between the right and left hands or just below the mouth-piece, it had a curved and bell shaped metal end. Music for it is the bass and treble clefs a fifth higher than the real sound. In spite of its fine tone and the ease with which it may be played this instrument has never been much used.

bassetto (bäs-set'-tō) It. n.

1. Formerly a small bass viol furnished with only three strings.

2. Rarely used as a name for the tenor violin.

3. When the bass is silent, the term applied to the lowest part of the harmony.

beliebig (bě-lë'-bikh) Ger. adj.

At one's pleasure: a part to be rendered or not at one's will.

bell

1. An instrument of percussion, usually made of a combination of tin and copper in varying proportions. It is played by being swung and struck by a clapper within, or if it is attached to a clock or is one of a series played by mechanical means, it is fastened in a stationary position and struck by a hammer from without. It consists of a hollow metal body expanding at one end, an ear or canon, by which it is hung, and the clapper. The bell is almost universally used, and has part in the religious ceremonies of almost every country; it is also used as a means of giving signals of various kinds and is intimately connected with the history of many nations.

2. A hollow body of metal having a ball inside and giving sounds when shaken.

3. The flaring opening at the end of the trumpet horn and such brass instruments.

bell diapason

A diapason organ stop consisting of pipes which expand into bell mouths at the top. The tone is consequently more reedy and powerful than that of the ordinary diapason.

bell gamba

An organ stop consisting of conical pipes spreading out into a bell at the top. The tone is remarkably sweet and is a cross between that of a stringed instrument and a clarinet.

bell-harp

1. An ancient instrument, probably the lyra or cithern.

bellows

2. An old variety of harp, having eight or more steel strings enclosed in a wooden box. The player swung this instrument back and forth like a bell when twanging the string with both thumbs, inserted through holes in the cover.

bell metronome

A metronome to which is added an attachment for striking a bell at every second, third, fourth or sixth oscillation so as to mark primary accents. See also metronome.

bell piano

See Glockenspiel.

bell scale

A rule which bell makers follow in regulating the dimensions and qualities of their instruments.

Bells are tuned by removing a small portion from the inner side of the thickest part when the tone is too sharp, thus reducing the thickness and flattening the sound produced; or when the tone is too flat a portion from the rim is removed. But this last may injure the shape of the bell and perhaps the tone. The effort is therefore made in casting to let the error, if any, come on the side of sharpness, since this can be more easily remedied. Modern processes make it possible to cast bells with remarkable accuracy, and frequently a perfect or maiden bell is turned out, which requires no changing.

bellëzza (běl-lëts'-sä) It. n.

Beauty, abundance, grace: beauty of tone and expression.

bellicosamente (běl-lī-kō-sä-mën'-të)

It. adv.

In a martial or warlike style.

bellicoso (běl-lī-kō'-sō) It. adj.

Warlike, martial: applied to warlike or martial music.

bellicrepa salatio (běl-lī-kräp'-ä sä-lä'-shī-ō) Lat.

An ancient Roman military dance, probably danced in armor. The Roman soldiers were sometimes trained to dance in armor, so that even at a ball they might not be caught unprepared should an armed foe fall upon them.

bellonion

An instrument which consisted of twenty-four trumpets and two drums played mechanically. It was invented at Dresden in 1812.

bellows

A mechanical contrivance for gathering and propelling the wind supplying the pipes or reeds of the organ,

bellows

harmonium, concertina, bagpipe, and the like. It consists of an air-chamber which can be alternately expanded and contracted, and a nozzle by which the current of air can be directed. When the air-chamber is expanded air is admitted through a valve opening inward. The pressure produced by the contraction of the air-chamber closes this valve and leaves the nozzle as the only available avenue of escape for the air in the chamber.

bellows exhaust

A small bellows fastened to the underpart of the windchest of an organ and fitted with a spring on its outer side. The wind entering the windchest partially inflates the bellows so that when a sudden demand on the wind supply occurs and the tone is likely to be faltering or insufficient, the reduced pressure allows the spring to force the bellows shut, emptying the wind it contains into the windchest and assisting in counteracting the deficiency. Also, if there is danger of the wind supply becoming excessive the exhaust bellows takes off some of the overpressure.

bellows, organ

See organ bellows.

bellows, panting

A small bellows about twelve inches by four and one-half, attached to the windchest and kept closed by a spring that also forces open a small pallet hinged against the bottom board of the bellows. In the top board of the bellows a hole is cut, but when the bellows is closed down by the spring the air can not pass out freely. When the pallet is open the wind rushes in faster than it is able to escape, lifting the little bellows and opening the hole in the top board, at the same time closing the pallet. The automatic repetition of this act causes more or less rapid fluctuations in the wind supply, which reaches the pipes in a series of shocks or puffs.

belly

In stringed instruments with or without a keyboard the sounding-board over which the strings are stretched, but most commonly used in connection with stringed instruments played with a bow.

bemerkbar (bě-märk'-bär) Ger. adj.

bolero (bō-lä'-rō) Spa. n.

A lively Spanish dance, in three-four time, to be danced by two persons. It is composed of five parts, namely, the paseo or promenade, a kind of introduction; the traversias or crossing in which the dancers change places, and which is done both before and after the diferencias, a measure in which the steps are changed. Then follows the finales and bein parado, a graceful attitude or grouping of the two dancers. These dances are usually in three-four time, although the time often changes and the dancers accent the rhythm by means of castanets. This is one of the national dances of Spain. Sequidellas Boleros are those sung and accompanied by a guitar.

bombard (bŏm'-bärd) Eng. n.

bombarde (bôn-bärd) Fr. n.

bombardo (bôm-bär'-dō) It. n.

Bombart (bôm-bärt) Ger. n.

A medieval wind instrument, the forerunner of the oboe, of which it is a large and coarse species. Bassoons, clarinets, and oboes grew from the same beginnings. The ancient bombards of the larger size were long and unwieldy, until the reed was doubled upon itself and both reeds placed in one wooden tube as in the bassoon and oboe. This instrument was properly the bass of the shawms, but was made in the different sizes, the bass bombard called bombardone, contra bombard and bass bombart, the tenor or basset bombard and the alto or bombardino piccolo. A large, deep-toned instrument was usually referred to, although at times the name was applied to smaller instruments.

bombardon (bŏm-bär'-dŏn) Eng. n.

bombardon (bôn-bär-dôn') Fr. n.

Bombardon (bôm-bär'-dôn) Ger. n.

1. A brass wind instrument like a trumpet, having valves whereby the half tones are produced. The deep brass bombardon, now obsolete, had three valves and a range from F on the first space below the bass clef

boot

to d on the second space above. The modern instrument is somewhat like the saxhorn species and is used as a bass in military music. It is usually built in sizes tuned to b flat, F, C, and B flat on the second line below the bass clef. In tone the bombardon is somewhat like the ophicleide, a modern brass wind instrument. There are two forms of bombardon, the upright and the circular, which passes over the player's shoulder with its bell toward the front. The tone, broad and open, does not blend very well with orchestral instruments, but in military brass bands forms the mass of the bass tone. The music for the bombardon is usually written in the bass clef, and the notes are played in the pitch in which they are written.

2. The name of an organ stop composed of pipes fitted with reeds for producing the sound. The tone is very powerful and the lowest pitch is the second or third octave below middle C.

bombilation

A buzzing or droning sound.

bombilatus (bŏm-bĭ-lä-tŭs) Lat. n.

The buzzer, hummer of the bee: a loud humming sound.

breviario (brā-vī-ä'-rō) It. n.

A breviary or book containing the matins, lauds and vespers of the Roman Catholic, or the Greek Church.

breviary

1. In the Roman Catholic and Greek churches a book containing the daily public or canonical prayers, for matins and lauds, the first, sixth and ninth hours, vespers and compline. It is divided into Psalter; Proper or offices of the season, as Advent, Christmastide, Lent, etc.; Proper of the saints, psalms, lessons, antiphons for feasts of saints; common, lessons, gospels, etc.; not reserved for special occasions; and special offices.

2. This name is given to similar books of Greek and Oriental churches.

brevis brě'-vis) Lat. adj. and n.Short, little: the longest note now used in music and equivalent to two whole notes. Synonym of *breve*.**Brillenbässe****bridge**

A wooden support, situated on the belly of stringed instruments for the purpose of holding the strings away from it. The bridge doubtless originated in the eastern countries where small movable bridges are found employed in changing the length of strings and hence their pitch. The ancient Greek monochord also was fitted with this variety of bridge. Such movable bridges serve the same purpose as do the fingers when pressing the strings against the neck of an instrument to change the pitch. In most modern instruments the bridge is not stationary, although those of the guitar and the mandolin are fixed. These exceptions are due to the fact that in these instruments the bridge does not assist in producing the tone as it does in those belonging to the viol tribe. Here the bridge transmits the vibrations of the strings to the belly which in turn vibrates and reinforces the meager tone of the strings. A small post called the sounding-post connects the belly and the back and transmits the vibrations of the belly to the back, still further reinforcing the sound. It is this peculiarity which creates the vast difference in the resonant quality of the two classes of instruments. The bridge of the violin is of maple and is carved so that the feet exactly fit the curves of the belly. It is not glued in place, but the tension of the strings holds it firm. The bridge of the crwth and that of the tromba marina possessed a marked individual characteristic in that they possessed one foot much longer than the other. The longer foot passed through a sound hole and rested upon the back of the instrument, transmitting the vibrations of the strings much as does the sounding-post of the violin.

brief

1. An obsolete term for *breve*, an ancient note equal to two whole notes.

2. The bridge of a bass viol.

bugle

1. A hunting horn of straight or curved form.

2. A treble wind instrument of brass or copper which differs from the trumpet in having a shorter and more conical tube with less expanded bell; it is played with a cupped mouthpiece. Originally the bugle was the signal horn for the infantry, and was usually tuned in C with an extra B flat crook. Now the regular bugle in the British army is tuned to B flat, only being a transposing instrument it has its music written in C. Only five sounds are used in military signals, but the instrument is capable of eight by employing B flat and the octave of the lowest C, which, however, is poor and weak in tone. Its entire compass is C on the second space of the bass clef, C on the first line below the tenor clef, G, C, E on the tenor clef, and G on the first space above, B flat on the second space above. About 1810 it was fitted with sound holes and keys to fill the gaps between the open notes given above. It has also been made with valves. The instrument became exceedingly popular, and until about 1835 divided honors with the clarinet as the most popular solo instrument in military bands. It is bold and clear in tone and is much used in military music but almost never in orchestra. Of the two styles of instruments the valve bugle possesses a more uniform quality of tone but the key bugle is better in shakes and rapid passages.

ça ira (sä ē-rä') Fr.

That will go or that will succeed. This phrase was much used by Franklin in reference to the American Revolution. La Fayette suggested it as the title of a song to a street singer named Ladré, who composed the words and set them to an air called Carillon national. The song was first heard on Dec. 5, 1789, when the Parisian mob marched out to attack Versailles, and from that time became one of the typical songs of the Revolution. For many years after it was known as the Fall of Paris and the Downfall of Paris and was popular as a piano piece subject to many variations.

cabaletta (kä-bä-lët'-tä) It. n.

Literally, a little hoarse: a song

cabaletta

cadence irrégulière

cadence (kă-dăns') Fr. n.

1. Literally, a fall and consequently referring to the decline of the motion of a melody or harmony to a point of rest, either momentary or entirely complete; any concluding strains either rising or falling, which form an harmonic turning point for a rest or close. The cadence in music answers the purpose of stops in language. For its effect it depends upon the manner in which certain chords succeed one another; as a rule the first create a feeling of suspense or anticipation and then follows a chord more satisfying to the ear. Cadences may be classed under three general heads: the perfect, the imperfect and the interrupted or broken cadence.

2. The pulsation and velocity of motion, as the cadence of double-time in a military sense is one hundred and eighty steps to a minute.

3. A trill

cadence évitée (kă-dăs ā-vē-tă') Fr.

An interrupted cadence: a cadence which has its final chord based upon some other note than the tonic or first note of the scale.

cadence rompue (kă-dăñs' rô-m-pü')

Fr.

See interrupted cadence.

cadent

Falling: an obsolete grace or ornament.

**cadenza** (kă-děn-tsä) It. n.

Its simplest meaning is a flourish of indefinite form used in vocal music. It is usually introduced upon a base note immediately before some important close, that is, the close of an entire movement or an important part of one. This idea spread to instrumental music and is much used at the end of a concerto for a solo instrument, where it serves to show the skill of the performer. It may occur in the first or last movement and is sometimes found in both. There is no rule regarding its form, but it usually contains groups of notes suggestive of the chief themes of the movement and is usually very brilliant and ingenious. In other instrumental music it has several uses, being introduced where a pause is desirable in the big part of the movement without breaking its continuity, or after a climax, that the transition to the level may not be too abrupt, or before the finale of a composition, that that may not be too abrupt. Abbr. cad.

cadenza ad libitum (kă-děn tsä) It.; (äd lib'-i-tüm) Lat.

A cadence or pause to be rendered at the pleasure of the performer.

cadenza d'inganno (kă-děn'-tsä dën-gän'-nō) It.

A deceptive cadence. The name given a cadence when the chord built upon the dominant or fifth note of the scale resolves or changes into some other chord than that on the tonic or first note of the scale.

cadenza in tempo (kă-děn'-tsä ên tēm'-pō) It.

A passage at the close of a com-

calandrone

position, somewhat like a cadenza, brilliant, elaborate and seemingly extempore, but in strict time.

cadenza sfuggita (kă-děn'-tsä sfood-jē'-tä) It.

An interrupted cadence, one which has its final chord based upon some other note than the tonic or first note of the scale. Equivalent to cadence évitée and cadence rompue (Fr.).

canarder**canarder** (kǎ-när-dä') Fr. v.

To imitate the cry of a duck; to produce a sound like the "cauac" of a duck on the clarinet or oboe.

canarie (kǎ-nä-rē) Fr. n.**canario** (kǎ-nä'-rī-ō) It. n.**canary** (kǎ-nä'-rī) Eng. n.

An obsolete dance, which derives its name from the Canary Islands, where it is supposed to have originated, although some authorities claim it to have been Spanish. It was probably adapted by the English and is a kind of gigue, usually in three-eight or six-eight time and sometimes as fast as twelve-eight. It consists of two strains or tunes each repeated, and its distinctive feature is that the first note of the measure is almost always dotted. It begins on the first beat of the measure. A good example of this dance occurs in Purcell's Dioclesian.

cancan (kän-kän) Eng. n. from Fr.

Tittle-tattle, noise. A vulgar French dance. The cancan is not really a dance in itself or even a characteristic step; it is a slang name for the peculiar style of dancing that obtains in public dance halls in Paris; it is extravagant jumping with obscene gestures introduced into the regular figures of the quadrille. According to Francisque Michel the word originated because the dancers imitate the walk of the duck.

canna d'anima (kän'-nä dä'-nē-mä) It.

Flue-pipes; that is, those organ pipes in which the sound is produced by the vibration of the column of air within the pipe which has been disturbed by a current of air forced through a narrow aperture in the bottom of the pipe and sent against a sharp edge.

cannon

The ear or loop of a bell by which it is suspended. Also spelled canon.

cannon-drum

The tom-tom or drum used by the natives of the East Indies.

canon

The strictest variety of musical imitation. The name is derived from the Greek word for rule or standard. Consequently a canon is a composition written strictly according to rule. The essence of the canon is that two or more parts or voices take up in succession exactly the same progression of notes. The simplest kind of canon is for only two parts, but may contain one or more themes for imitation. The part which begins or takes the lead is termed the subject or antecedent and the one which imitates or follows is called the answer or consequent. If the voices were always separated by the interval of an octave the notes could be exactly imitated. However, this is impossible, as such intervals would give a composition for more than two voices too extensive a compass. Therefore the voices may be separated by an interval

Canon

and although they are unable to repeat the same notes, the progression of intervals is exactly imitated and a like effect is produced. A canon containing one theme for two voices which remain the interval of an octave apart is termed a canon "two in one at the octave." In like manner a canon containing two themes for four voices which remain the interval of a fifth apart is termed a canon "four in two at the fifth." Often in a quartet there may be a canon between two of the voices while the other two are free, that is, they progress regardless of the canon; or there may be a canon between three voices, the third remaining free. Canon has been a very popular device among composers and has been the object of extremely ingenious treatment, some of which savored more of mathematical precision than of artistic ability.

canon, perpetual

A canon whose termination leads directly back to its beginning, and so can be sung on, or played, forever. Also called *canone infinito*.

canon, resolved

See resolved canon.

canon, riddle

See riddle canon.

canonic imitation

Strict imitation of one part by another, wherein one voice follows the melody previously sung by another voice a fixed interval above or below.

canonical hours

The seven canonical hours prescribed by the Catholic Church as the hours of daily prayer; each day has its own office, even each hour of the day, for liturgically, the day was divided into periods of three hours each, founded on the ancient Roman division. The prayers of the night-vigils are Matins and Lauds; Matins being divided into three nocturnes for the hours of nine o'clock at night, midnight, and three in the morning.

The day offices correspond approximately to these divisions: Prime to six a. m., Tierce to nine a. m., Sext to midday, None to three p. m., Vespers to six p. m. The Compline, which is of later origin, is recited at nightfall.

The hours equivalent to Tierce, Sext, None and Vespers were known to the Jews and were adopted by the Christians. They were originally hours of private prayer but later

cantamento

became times of public prayer. Each of these offices consists of psalms, antiphones, lessons, etc.

canonical mass

A mass which strictly follows the regular order of the church services, omitting no part, and restricting it entirely to the prescribed canonical regulations.

canonici (kā-nōn'-ī-sī) Lat. n.

The name given followers of Pythagoras, who founded a system by which they judged the correctness of combinations of tones according to the ratio of their sound vibrations, instead of by their actual sounds, in contrast to the Musici or disciples of Aristoxenus, who made the ear their test. The Canonici used abstract mathematical science where the Musici relied upon actual sounds.

cantabile (kān-tā'-bī-lě) It. adj.

That which may be sung, singable. A direction phrase used in instrumental compositions to denote that the part so marked is to be rendered in a graceful, melodious, singing style, full of expression. Abbr. *cantab.*

cantabile ad libitum (kān-tā'-bī-lě) It. (ād lib'-ī-tūm) Lat.

caprice

A whim: according to Marpurg this name was originally given to harpsichord compositions similar to fugues, that is, having the subject treated according to certain rules. Fugues written upon a lively subject were sometimes given this title, and Bach used it as a synonym for fantasia, a piece of music unconventional in form. In the middle of the Eighteenth Century the word described compositions similar to the modern *étude* in which one distinct subject is carried through the composition. The modern meaning of the word is any composition free and unconventional in form and fanciful in treatment, a piece of unusual and original arrangement, often of peculiar rhythm.

captandum, ad (äd kāp-tän'-dūm) Lat.

With zeal: brilliantly: takingly.

caput scholæ (kāp'-ūt skō'-lē) Lat.

The precentor: the leader of the choir. This office ranks second in dignity to that of Dean, among the four church officers, and the duties of the incumbent are to select the music and to train and lead the choir and orchestra.

caractères de musique (kär-äk-tär' dü mü-zěk') Fr.

A general term for all the marks and symbols used in musical notation. See table of signs.

caramillo (kā-rä-měl'-yō) Spa. n.

A flageolet or small flute: a kind of small, straight flute, blown from the end, the notes of which are re-

caramillo

markably shrill and clear. It is not used in orchestra because of the crudeness of its tone.

carattere (kā-rät-tä'-rě) It. n.

Character, letter: character, dignity or style as used in the direction, *con carattere*.

carattere, mezzo (mëd'-zō kā-rät-tä'-rě) It.

A term applied to music of moderate difficulty: a song having few ornaments.

caratteristica, nota (nō'-tä kā-rät-të-rës'-tī-kä) It.

See *nota caratteristica*.

cardatura (kär-dä-too'-rä) It. n.

A scale or series of notes according to which stringed instruments are tuned.

cardometre (kär-dō-mëtr') Fr. n.

String gauge: an instrument for measuring the thickness of strings for violins, guitars and other instruments. It consists of a disc or oblong piece of metal having a graduated slit along which are engraved numbers indicating the various diameters which the strings should have.

caessant (kā-rës-säñ') Fr. adj.

carezzando (kā-rët-tsäñ-dō) It. adj.

See *carezzevole*.

carezzevole (kā-rët-tsä-vō'-lě) It. adj.

Caressing: singing or playing in a caressing or tender manner, frequently introducing notes of anticipation.

caricato (kā-rī-kä'tō) It. adj.

Insincere, affected: a composition performed with exaggerated expression, overloaded with musical ornaments.

carillon (kā-rē-yôñ') Fr. n.

1. A set of bells so hung in a tower that they form a sort of musical instrument and may be played either by a keyboard or by machinery similar to that of a clock. Unlike a peal of bells they give out a regularly composed melody in distinct and correct time. In a carillon the bells are stationary and are struck from without with a hammer. In Belgium and Holland carillons were furnished with keyboards somewhat like piano keyboards but on larger scale with keys far enough apart to be struck with great force by the hands without disturbing other keys. Owing to the weight of the bells and mechanism the art of playing the carillon required great physical strength. In medieval manuscripts we have representations of an instru-

carola

ment composed of small bells hung in order of their size and struck by hand.

2. An instrumental piece imitating the music of a carillon or any piece especially composed for that instrument.

3. An organ stop composed of several pipes to each digital of the keyboard and giving a combination of several tones of different pitch when each key is depressed. The sound is high and tinkling in effect.

4. A set of bells or steel bars which are struck with hammers and are operated upon by one of the keyboards of the organ. They are brought into use by drawing a stop knob.

carillon a clavier (kā-rē-yôñ' ä kläv-yä') Fr.

The keyboard and pedals that act upon the bells of a carillon.

carillonner (kā-rē-yô-nä) Fr. v.

To chime or ring bells: to play the carillon.

carillonneur (kā-rē-yô-nür') Fr. n.

One who plays the carillon.

carita (kā-rē'-tä) It. n.

Charity, feeling: as used in the direction *con carita*, with feeling.

carmagnole (kär-män-yöl') Fr. n.

A well-known song and dance of the French Revolution dating from the taking of the Piedmantese town, Carmagnola, in 1792. It was originally a country song and dance of Provence, to the melody of which many revolutionary verses were written. Some of the wildest excesses of the Reign of Terror are associated with this song, which was sung everywhere, and even on one occasion, it is said, in the National Convention itself. The name was afterwards applied to the exaggerated accounts of the French victories in battles.

carmen (kär'-mën) Lat. n.

A tune, song, poem.

carmen natalitium (kär'-mën nä'-täl-ışh'-i-üm) Lat.

A carol on the nativity.

carol

A song of joyful devotion, particularly associated with Christmas and Easter. It originally referred to a song accompanied with dancing in which the performers joined hands and danced in a ring as they sang.

carola (kā-rō'-lä) It. n.

A ring-dance of the Middle Ages, which, like all old dances, was accompanied by singing.

Catalan baile

join in a round and the women, placing their hands on the shoulders of the men beside them, spring into the air above their heads. The men hold them in the air, and the women, bending their heads, kiss their partners. A variation of this last movement is for the woman to place her left hand in the right hand of her partner, or resting her right hand on the shoulder, and stiffening her left arm, to spring suddenly into the air. The man then lifts her up and seats her on his hand. These dances require great skill of the female dancer, who must be able to retreat without the slightest jerkiness or jumping. This dance is native of the Catalan provinces of Spain, and is symbolical of a man's winning the woman of his choice.

catch

A humorous canon or round so contrived that the singers catch up one another's words. The catch originated in the early part of the Seventeenth Century, and was at first a simple round for three or more voices, the words being of the simplest character, similar to nursery rhymes. They were sung that the different performers emphasizing or bringing in different words gave a very humorous effect. During the reign of Charles II. they became indecent and have since sunk into comparative obscurity, although there are still in existence several clubs organized to promote the performance and composition of catches.

catena di trilli (kā-tā'-nā dē trīl'-lē) It.

A chain of trills: in instrumental or vocal music a chain or series of trills.

cateratio (chā-tē-rā-tō'-yō) It. n.

A song accompanied on the cithern or guitar.

catgut

A small string for violins, guitars, and other stringed instruments made from the intestines of sheep and goats and sometimes those of a horse, dried and twisted; not from those of a cat.

The word probably stands for kitgut, by confusion of kit, a fiddle with kit, a small cat—hence, catgut.

cathedral music

Music especially composed to suit the services of English Cathedrals since the Reformation. Immediately after the Reformation music in the English Church was in an unsettled state, as may be seen in the compositions of Tye and Byrd, where Latin

cavare il suono

and English words were given to the same music. Italian motets and other church compositions were taken as models, and except for the words, church music and secular music were identical. From this beginning there has gradually grown up a body of musical composition adapted to Anglican services including settings for canticles and anthems and both constant and varied offices. It includes a large variety of special psalms and prayers, besides Kyrie, Gloria, Credo, Sanctus, litany and the ten commandments and short sentences and responses called versicles. There are also special musical services for Holy Communion, ordinations, confirmations and funeral services.

catling

Catgut, a catgut string: lute string of the smallest size. Obsolete.

cattivo (kāt-tē'-vō) It. adj.

Bad, unfortunate, unfit.

cattivo tempo (kāt-tē'-vō tēm'-pō) It.

1. A part of a measure where it is not proper to end a cadence or place a tone syllable.

2. The part of a musical measure where light accent falls.

catzozerath (kāt-zō-zē'-rāth) Heb. n.

See chatsoteroth.

cauda (kaw'-dä) Eng. n. from Lat.

The end, the tail: the tail of a note, the coda. The coda was originally a few chords added to the end of a piece of music to make it more effective. By some of the great masters this was developed into a grand summing up of the whole movement or composition. This also means the final part of a fugue.

cavalletto (kā-väl-lēt'-tō)

Literally, a small horse.

1. A lively melody, a bridge.

2. The break in the voice.

3. The short, quick finale of an air. This is the usual meaning.

4. A song in rondo form, that is, in which a prominent theme is constantly alternated with less important ones, with variations and an accompaniment in triplet time similar in rhythm to the hoof beats of a cantering horse. See also cabaletta.

cavalquet (kā-väl-kā') Fr. n.

A piece played by the cavalry trumpeter-corps when approaching or marching through a town.

cavare il suono (kā-vä'-rē ēl soo-ō'-nō) It.

To dig out the sound: to bring out

cavare il suono

all the tone of which the instrument is capable.

cavata (kā-vä'-tä) It. n.

1. A short song, sometimes preceded by recitative.

2. An air or strain dramatic in character.

3. The act of producing tone from a musical instrument.

cavatina (kā-vä-tē'-nä) It. n.

cavatine (kā-vä-tēn') Fr. n.

A short air: an air of one strain only. An air of simple and expressive character shorter than an aria and sometimes preceding it. Also, a short song of any description. Beethoven gave this name to the second movement of his B flat quartet. A smooth, melodious air forming part of a grand scena or movement.

cebell

1. A name given to an obsolete musical form, which consisted of a principle theme with variations. Its characteristics were the sudden alternation of high and low notes and the fact that it was usually in common time, that is, four quarters notes to a measure.

2. Purcell and other English writers used this name for the dance form now known as the gavotte.

3. It was also the name of compositions for violin or lute.

Cecelia, St.

A young Roman noblewoman who lived about 229 A. D., and is looked upon as patron-saint of music.

cecilium (sŭ-sē-lē-uñ) Fr. n.

A peculiar free reed and keyboard instrument invented by Quantin de Crousard and exhibited in Paris in 1867. It was the shape and about the size of the violoncello and was held in the same position. It has reeds acted upon by keys pressed by the left hand and supplied by wind from bellows worked by the right hand by means of a handle like a bow. The cecilium a compass of about five octaves, and the tone was sweet and sonorous.

cédez (sā-dä) Fr. v.

A direction, meaning to go slower, also to follow the voice, to decrease the volume of sound.

ceja (thä'-hä) Spa. n.

In stringed instruments the bridge on which the strings rest.

célamustel (sā-lä-mü-stěl') Fr. n.

A kind of reed organ having fundamental or principal stops similar to

celestial music

those of the harmonium and also additional parts, such as bells, harp, echo, thunder, dove and cuckoo notes and other sounds.

célébrer (sā-lä-brä) Fr. v.

To sing, to celebrate, to praise.

celeramente (chä-lä-rä-mēn'-tē) It. adv.

Swiftly, in haste, fast: a direction, meaning to be performed swiftly.

celere (chä'-lä-rē) It. adj.

Quick: quick in tempo.

celeridad (thä-lä-rī-däd') Spa. n.

Celerity, velocity, rapidity of music.

celerita (chä-lä-rī-tä') It. n.

Celerity, swiftness, speed, as in the direction, *con celerita*, to be rendered with speed.

celerité (sā-lä-rē-tä) Fr. n.

Celerity. See *celerita*.

celestia

A keyboard instrument of the harmonica type, invented by Auguste Mustel, of Paris, in 1886, and by French composers substituted for carillon in the orchestra. Steel bars suspended over resonating boxes of wood are struck with hammers by an action similar to that of the piano. It has a compass of five octaves upward from the C on the second space of the bass clef and its tone is exquisitely pure and clear. As an orchestral instrument it is used by many modern French composers and was even employed by Tchaikowsky.

céleste (sā-lěst) Fr. adj.

1. Celestial or heavenly and applied to such organ stops as produce a soft, sweet tone.

2. Also used as the name of a piano pedal producing a like effect.

celestial music

The music of the spheres. This refers to the ancient supposition that the movements of the heavenly bodies produced a harmony imperceptible to human ears. Pythagoras supposed these motions to conform to fixed laws expressed in numbers corresponding to the numbers which give harmony of sound. The seven planets give the seven notes of the scale. Plato in his Republic says a siren sits on each planet and carols a sweet song which agrees with the tone of her own sphere and harmonizes with that of the others. This belief in the music of the spheres has been repeatedly mentioned in literature from the earliest times, as in Job we find, "When the morning stars sang

celestial music

together," in Milton's Hymn on Christ's Nativity, "Ring out, ye crystal spheres."

References concerning this theory might be multiplied innumera- bly from Shakespeare, Dryden, Addison and others, but these suffice, perhaps, to show its widespread prevalence.

celestina (chā-lēs-tē'-nä) It. n.

1. An organ stop composed of pipes producing a soft tone. Its pitch is rather high, the lowest tone being an octave below middle C.

2. In reed organs a stop consisting of reeds producing a tremolo effect.

celeusma (sē-loos'-mä) Grk. n.

From the Greek verb, meaning to urge on, to command. The name given to the word or sing-song by which oarsmen in ancient times were encouraged to row rhythmically, and which is now used by sailors to help them pull uniformly and simultaneously at a rope. It is the same as the proceleusmatic song, written in four short measures to arouse animation and life in action.

'cello (chĕl'-lō) It.

Abbreviation of violoncello.

cembal (sāñ-bäl') Fr. n.

1. Harpsichord.

2. Cymbal.

cembal d'amour (sāñ-bäl dä-moor') Fr.

Harpsichord of love. An instrument invented by Silberman, of Freeburg, early in the Eighteenth Century. It was a double clavichord with strings twice the length of those of a clavichord and passing over two bridges instead of one. Its action was similar to that of the clavichord except that the tangents struck between the bridges, and both parts of the strings were allowed to vibrate. The strings when at rest lay upon the damping cloth and were free to vibrate as long as they were raised from it by the keys. The case was like that of the spinet except that the elongated part lay to the left of the performer. For further discussion see clavichord.

cembalist

One who plays the cembalo: cembalo being an old name for harpsichord or piano, or various instruments having wire strings struck by hammers.

cembalista (chäm-bä-lēs'-tä) It. n.

One who plays on the harpsichord, cymbals or piano.

cercar la nota

chamber organ**chamber organ**

A small portable organ, either reed or otherwise, designed for use in a small room.

chamber pitch or tone

This is the pitch adopted by the Paris Académie in 1859 when A once accented (a'), that is, A on the second space of the treble staff, was fixed at 870 simple or 435 double variations per second. Equivalent to normal pitch.

chamber style

In the style of chamber music suitable to be played in chamber concerts.

chamber voice

A voice especially suited to performing chamber music.

chamberga (chäm-bär'-gä) Spa. n.

A Spanish dance, which is usually accompanied by song.

change

1. The various arrangements and alternations of tones produced on a peal or set of bells tuned to the scale.

2. In harmony a change means a modulation, or in a composition a passing from one key to another.

3. In the voice, the change from the boy's to the man's voice.

change, enharmonic

A passage where the notation is changed but not the sound, and where the same keys of the instrument are used. This can be effected on an ordinary keyed instrument only, where intervals of less than a half tone can be ignored. For instance, if the phrase, A—B^b—C, were changed to A—A[#]—C, on instruments like the piano, whereon there are only whole and half tones, the same note would represent B flat and A sharp, and the two phrases would sound alike.

change ringing

The art of ringing a peal of bells in a regularly varying order so as to produce every combination which the number of bells makes possible.

changeable

A name for chants which may be sung in either the major or minor mode of the key in which they are written. The major mode is that having an interval of a major third above the first note of the scale, and the minor mode is that having an interval of a minor third above the first note.

changer de jeu (shän-zhä' dü zhü) Fr.

To change the play: to change the registers or stops in an organ.

chant**changing-chord**

In ancient counterpoint, entering unaccented, and then skipping. In ancient counterpoint a chord that enters on an unaccented part of the measure, then transposes into another key more than a whole tone higher or lower.

changing note

1. A name applied by theorists to those notes which do not form a part of the chords which they accompany, but which connect those chords and carry the ear more smoothly from one to another. They usually occur on the unaccented part of a bar.

2. A note which takes the place of a note in the chord and lies one degree above or below it.

3. Also, an auxiliary note from which the tones descend an interval of a third. The equivalent of passing note.

channels

In the organ the separate parts of the wind chest into which the air is pumped and stored, and by which the wind is conveyed to pipes. All the pipes belonging to one stop are placed over the same channel. The wind gains access to the channels by means of a channel valve.

chapel

1. A church.

2. A general term for those musicians in the service of a great personage.

chapelle (shä-pěl') Fr. n.

A chapel. A company of musicians who sing or play in a church or in private employ. An orchestra.

chapels royal

The bodies of clergy and lay clerks who conduct religious services at the courts of Christian monarchs. In England there are several, the chief one being at St. James Palace, and consisting of the Dean, the Lord High Almoner, the Clerk of the Closet, two deputies, the sub-dean, forty-eight chaplains, eight priests in ordinary, a master of the children, one lay composer, an organist, one lay organist and chapel-master or choir-master, eight lay gentlemen and ten boys, and other attendants. They hold services at ten a. m., twelve noon and five-thirty p. m. on Sundays and at eleven a. m. on feast days.

character of keys

Owing to the system of tuning instruments of fixed intonation, some keys are much more useful than others. Most composers have shown a preference for certain keys, finding some character inherent in a given key which suited it to the subject of the composition. Thus, the sharp keys are more intense, clear and brilliant than the flat keys, which are somber and relaxing. Major keys are clear, minor keys somber. The consummation of clearness and brilliancy is attained by the major sharp keys, that of somberness by the minor flat keys. The keys of C major and A minor, having neither sharps nor flats, possess less character than any of the others.

characteristic

As an adjective this term is applied to music designed to represent some

chatzozerah

special occurrence or express some certain emotion. As a noun this word relates to the individual character of the different musical keys. Theoretically every major or minor key is precisely alike because the intervals between the notes are exactly similar. However, many musicians maintain that the sharp keys have brighter and stronger character and the flat keys a duller and more somber, a minor character.

characteristic chord

The leading or principal chord: the chord founded upon the fifth note of a scale and introducing a perfect cadence, or one which satisfies the ear at the end of a movement or of the composition.

characteristic note

The leading note: the seventh note of the major scale, which is the scale having semitones between the third and fourth and seventh and eighth tones. So called because it especially emphasizes the keynote.

Charakterstimme (kä-räk'-těr-shtim'-mē) Ger. n.

Literally, character voice: a solo stop in the organ; that is, any stop which produces a special effect or imitates an orchestral instrument and is generally used in solo work.

charivari (shä-rē-vä-rē) Fr. n.

Rough music, clatter noise: a discord made on tin horns and bells and such instruments. A mock serenade.

chasse (shäs) Fr. n.

The hunt: in hunting style. Music similar to the music of the hunting horn, or music to accompany the chase.

chatsoteroth (kät-sō'-těr-rōth) Heb. n.

chatzozerah (kät-zō-zē'-rä) Heb. n.

This is thought to have been the straight silver trumpet of the Hebrews which they used in their ritual and sometimes in battle. In the Bible, Moses was given specific directions in regard to the making of these trumpets out of one piece of silver. According to Josephus, these trumpets were somewhat less than a cubit long, a little thicker than a pipe, and having an oblong opening for blowing on, and a bell-shaped end like a horn. There is some dispute as to the appli-

1. The bridge of a stringed instrument. A small bridge-shaped piece of wood set on the body of instruments of the violin and lute families, over which the strings pass to the head.

2. A stand for suspending a cymbal or gong.

cheville (shě-vē'-yě) Fr. n.

A peg, pin or bolt: in violin and similar instruments a movable wooden peg set in the head and used to tighten or loosen the tension of the strings.

chevrottement (shě-vrôt-măñ') Fr. adv.

A trembling of the voice: a tremor or shake in singing.

chevroter (shěv-rô-tă') Fr. v.

To sing or speak in tremulous voice: to make a bad or false trill.

chiaramente (kē-ă-ră-měñ'-tě) It. adv.

Clearly, purely: a direction meaning to be rendered clearly, brightly and distinctly.

chiarezza (kē-ă-rět'-tsă) It. n.

Brightness, clearness: as used in the term, *con chiarezza*, meaning to be rendered with clearness, brightness.

chiarina (kē-ă-rē'-nä) It. n.

A clarion or trumpet. Derived from its clear, bright tone.

chiaro (kā-ă'-rō) It. adj.

Clear, brilliant, bright, pure in tone.

chiaroscuro (kē-ă-rō-skoo'-rō) It. n.

Light and shade: a term descriptive of the transitions from faint to loud in musical performance.

chiave (kē-ă'-vě) It. n.

A valve, a key: the key or clef, the

chime

character at the beginning of the composition which denotes the pitch in which it is written. The tuning key, an instrument used by piano-tuners in tuning the instrument. The key of an instrument.

chiave maestro (kē-ă'-vě mă-ăs'-trō) It.

The key note or note upon which the composition is built up.

chiavette (kē-ă'-vět'-tě) It. n.

Value key. During the Sixteenth Century it was an almost invariable rule that no vocal part should go beyond the compass of the five line staff. In representing notes above or below this composers resorted to the use of the clefs differing from those in ordinary use for the various voices, which signs really had the effect of transposing the parts to higher or lower pitch. The *chiavette* proper, or high *chiavette*, transposed the parts into a key a major third, an interval of two whole tones, or a minor third or interval of one and a half tones, higher than they were, and was really equivalent to three flats or four sharps in a signature having the usual clef. The low *chiavette* had the effect of three sharps or four flats over the ordinary clef.

chica (tshē'-kā) Spa. n.

An old Spanish dance brought to South America by the early Spanish settlers, and very popular with their descendants.

chiesa (kē-ă'-zä) It. n.

A church. Used as an adjective to denote music of religious character, as *concerto da chiesa*, in church style.

chiffre (shēfr) Fr. n.

chifladura (tchē-flä-doo'-rä) Spa. n.

Whistling.

chiflar (tchē-flär') Spa. v.

To whistle.

chifonie (shē-fō-nē') Fr. n.

A corruption of the Old French *symphonia*, the old name for a hurdy-gurdy, an instrument composed of four strings and played by a wheel rubbed in rosin. Two of the strings were stopped by certain keys and the others acted as a drone bass, or bass having no variation of tone.

chime

1. A set of bells varying in number, tuned to the scale and played by

chime

swinging either the bells or the clappers inside them.

2. A set of bells with the hammers that strike them, often placed in a music-box or an organ, to produce the effect of a chime.

3. The sound produced by bells rung in harmony.

chime-barrel

A revolving barrel or cylinder fitted with pegs. As the barrel revolves these pegs, in passing, operate levers by which a chime or carillon is played.

chiming machine

A machine, for chiming bells mechanically, which consists of a revolving drum studded with pins so placed that they pull the ropes of the bells, causing them to chime.

chimney

A small tube passing through the cover of certain stopped organ pipes, causing the air to vibrate in two equal columns, thus making the tone more brilliant.

chinare (kē-nā'-rě) It. v.

To clamor, to chime.

Chinese music

See hiven.

Chinese crescent

Chinese hat

Chinese pavilion

A musical instrument, now practically obsolete, used in military bands. It consisted of a pole with several transverse brass plates in crescent shape surmounted by a conical pavilion resembling a Chinese hat. To all these parts are hung a number of small bells. This instrument is held vertically and is played by being shaken up and down to emphasize the time of the music. More common names are the German Schellenbaum, and the French, *chapeau chinois*.

chirimia (tchě-rě-mě'-ä) Spa. n.

The oboe, the clarinet. From *chirimoya*, the name of a fruit; the pear-shaped portion of the oboe in which the mouthpiece is inserted. Equivalent to *Birne* (Ger.).

chirogymnast (kī-rō-jīm'-näst) Eng. n. from Grk.

Finger-trainer: a square board to which is attached a cross bar to which rings are attached by a set of springs. It is to exercise the fingers of piano and organ players.

chiroplast (kī'-rō-pläst) Eng. n. from Grk.

An apparatus, invented by Logier

chladni's figures

about 1810, to keep the fingers of young piano players in correct position. It consisted of two smooth wooden rails attached parallel to the piano keyboard, and a pair of brass frames or open gloves which held the wrist up and compelled the fingers to strike the keys vertically.

chitarra (kē-tär'-rä) It. n.

A guitar. The Italian guitar, strung with wire instead of gut strings. The English cither was strung in the same way.

chitarra col arco (kē-tär'-rä kōl är'-kō) It.

Guitar with the bow: a violin with sides gently curved like the guitar instead of having corners like the violin. A guitar played with a bow.

chitarrone (kē-tär-rō'-ně)

A theorbo or double-necked lute having a very long neck. It had wire instead of gut strings, and two sets of tuning pegs, the upper set carrying twelve and the lower set eight strings. The very long neck permitted of great development of the bass. It was used in Italy in the Sixteenth Century to accompany the voice and it was also used in orchestra. It was similar to the archlute and theorbo.

chiucchiurlaia (kē-ook-kē-oor-lä'-yä) It. n.

Confused chatter: a buzzing or humming sound.

chiudenda col aria (kē-oo-děn'-dä kōl ä'-rī-ä) It.

Ending with the air.

chiudendo (kē-oo-děn'-dō) It. adj.

Closing, ending: as used in the direction, *chiudendo colla prima strose*, ending with the first verse.

chiudendo col ritornello (kē-oo-děn'-dō kōl rě-toor-něl'-lō) It.

Ending with the symphony, or with the postlude.

chiuso (kē-oo'-sō) It. part. and adj.

Closed: as used in *con bocca chiuso*, a direction meaning to be performed with closed mouth, hummed, also used as in *canone chiuso*, a canon, in which only the principal part is written out fully.

chladni's figures (khlät'-nē)

Experiments in electric figures made by Chladni, a scientist, born at Wittenburg in 1756. These experiments which he carried on chiefly by means of a plate of rosin covered with sand, are discussed in his books, *Discoveries concerning the Theory of Sounds* and *A Treatise on Acoustics*.

choeur

choeur (kür) Fr. n.

Choir, chorus: the choir, or band of singers, the chorus of singers.

choice note

A note written above or below the regular note in a vocal solo, which the singer may take in preference to the regular note if he choose.

choir, trombone

Among the Moravians a band of trombone players whose duty it is, by playing in the belfry of the church, to announce the death of one of its members and to assist at the funeral services. They also play on festal occasions and at the opening of the church service.

Chor (kôr) Ger. n.

Chorus, choir.

1. On the piano two or three strings for one tone sounded in unison.

2. A combination of instruments of the same family but of different pitch.

3. In the organ several of the pipes composing a so-called mixture stop are grouped together so that they are sounded by one key, producing tones of various pitch.

choragus (kō-rā'-gūs) Eng. n. from Lat.

The man who had the care of the

chord

chorus and the supplies necessary for it. In ancient Greek and Roman drama the leader and trainer of the chorus. Also spelled choregus.

choral

1. noun. In the Roman Catholic Church any part of the service sung by the choir. A hymn or psalm tune of the early German Protestant Church or one in imitation of them.

2. adj. Of or pertaining to a church service or chorus.

choral anthem

A simple anthem in rhythmic style similar to a chorale, or hymn tune, of the German Protestant church.

choral book

A collection of choral music either with or without regularly written accompaniment.

choral hymn

A hymn to be sung by the chorus.

choral service

Service in which the priest sings in response to the choir and the entire liturgy is chanted instead of being read.

Choralbearbeitung (kō-räl'-bē-är'-bī-toongk) Ger. n.

A choral treatment: a composition treated in a simple and rhythmical style.

Choralbuch (kō-räl'-bookh) Ger. n.

A collection of church music: a choral-book.

Chorale (kō-rä'-lě) Ger. n. plu.

Hymn tunes. A sort of sacred choral music introduced by Luther at the time of the reformation of the German Protestant church. This music was rhythmical in contrast to the old unrhymic church music.

choraleon

The same as æolomelodicon.

choralist

A chorister, one who sings in a choir.

choraliter (kō-räl'-i-tēr) Ger. adj.

choralmässig (kō-räl'-mäs-sīg) Ger. adj.

In the rhythmic or measured style of a choral or psalm tune.

Choramt (kôr'-änt) Ger. n.

Cathedral service.

choraules (kō-raw'-lěz) Grk n.

A flute player in the Greek theatre. One who keeps a chorus and plays in it himself.

chord, diatonic

O or — bass should be played
(tasto solo) as written, or in octaves

When two or more figures are written above the bass the widest interval is always expressed by the upper figure. When a #, b, ♯, X, or bb stands alone over a bass note, it indicates that the third of the chord should be raised or lowered accordingly. An oblique line through a figure signifies that the interval is to be sharpened. A dash (—) after a figure means that the note for which it stands is to be prolonged into the next chord.

chord a vido (kôrd ä-vē'-dō) It.

An old name for the sound given out by the open strings of the violin or similar instrument.

chord, anomalous

A chord containing an interval which has been made very sharp or flat in tempering the scale for instruments of fixed pitch.

chord, accidental

A chord is the simultaneous sounding of a number of tones. An accidental chord is the term used when one or more of the tones are either held back or played before the other tones of the chord.

chord, altered

A chord in which one of the notes has been lowered or raised a half tone without affecting a change of key.

chord, augmented

A chord containing a major third, four half steps, and an augmented fifth, eight half steps. Same as redundant chord.

chord, broken

A chord whose tones are sounded in succession instead of simultaneously. Equivalent to arpeggio.

chord, characteristic

The principal or characteristic chord. A chord that is built up on the dominant or fifth note of the key in which the music is written. The same as dominant chord.

chord, chromatic

A chord that contains one or more chromatic signs, sharps, flats or natural.

chord, common

A chord composed of the fundamental note, or note upon which the chord is built, plus a note an interval of a third above it plus another note at an interval of a fifth.

chord, diatonic

A chord formed by tones in the same standard scale.

chord, dominant

chord, dominant

A chord that is built upon the dominant or fifth note of the key in which the music is written. The same as characteristic chord.

chord, doubtful

A term applied to a chord or chords, which may belong to more than one key when its notation is slightly changed. Same as equivocal chord.

chord, equivocal

Same as doubtful chord.

chord, fundamental

The chord consisting of the first note of a scale plus its third and fifth.

chord, imperfect

A chord which does not contain all the intervals belonging to it.

chord, inverted

A chord whose lowest tone is not its fundamental or tone from which the chord is built, but is at an interval of a seventh below the bass note. A chord which has literally been inverted, its bass note being taken as the highest note and the notes which had been above the bass in the original chord being below it in the inverted chord.

chord, key

See key chord.

chord, leading

The chord built on the fifth note of the key in which the composition is written, plus the third and fifth. The same as the dominant chord and the characteristic chord.

chord, major

A chord containing a major third, tones distant four half steps from each other, and a perfect fifth, tones distant seven half steps from each other.

chord, minor

A chord containing a minor third, tones distant four half steps from each other, and a perfect fifth, tones distant seven half steps from each other.

chord of nature

Every tone actually consists of one chief sound called the fundamental tone, plus a number of fainter, higher tones called overtones that sound simultaneously with the fundamental tone. The blending of these overtones with the fundamental tone is called the chord of nature. See also harmonic overtones.

chord of the second and fourth

chord of the augmented sixth

This chord is variously formed, according as it is the Italian, German or French augmented sixth. The feature in common is that the augmented sixth chords all extend from the note on which the chord is based to the sharp of its sixth interval, while the intermediate notes forming the harmony vary according to the name of the chord.

chord of the eleventh

A chord consisting of the chord of the ninth, that is, a chord composed of a note plus notes at intervals of a third, a fifth, a seventh and a ninth above it, to which the note eleven degrees above the first note has been added.

chord of the fifth and sixth

The first inversion or change of position of the notes of the chord, called chord of the seventh. This chord consists of a note plus other notes at intervals of a third, a fifth, and a seventh above it. The chord of the fifth and sixth takes the note a third above the bass note of the chord of the seventh for its bass and adds other notes at intervals of a third, a fifth and a sixth above it.

chord of the fourth and sixth

The second inversion of the common chord, which consists of the fifth note of that chord for a bass, plus its fourth and sixth notes.

chord of the ninth

A chord consisting of a note plus notes at intervals of a third, a fifth, a seventh and a ninth, respectively.

chord of the second

The third inversion or rearrangement of notes of the chord built on the seventh degree of the scale. It takes the note an interval of a seventh above the original bass note for its bass note, adding notes at intervals of a second, fourth and sixth, respectively.

chord of the second and fourth

The third inversion or change of position of the notes in the chord of the seventh. The chord of the seventh consists of a note plus the third, fifth and sixth notes above it. The chord of the second and fourth takes the seventh note of the chord of the seventh for its bass note, and to it adds the second, fourth and sixth notes above it.

chord of the seventh**chord of the seventh**

A chord consisting of the first note of a scale plus the third, fifth and seventh notes above it.

chord of the sixth

The first inversion or change of position of notes of the common chord, which consists of a note plus the notes at intervals of a third and a fifth above it in the scale. The first inversion takes the note a third above the original bass note for its bass, and to it adds notes a third and a sixth above it.

chord of the suspended ninth

The chord built upon the ninth of the tonic, that is, upon a tone which is an octave and one degree more, six tones and two semitones, above the keynote.

chord of the suspended sixth

This chord is variously formed, according as it is the Italian, German or French augmented sixth. The feature in common is that the augmented sixth chords all extend from the note on which the chord is based to the sharp of its sixth interval, while the intermediate notes forming the harmony vary according to the name of the chord.

chord of the third, fourth and sixth

The second inversion of the four-toned chord called chord of the seventh. The chord of the seventh consists of a note with other notes at intervals of a third, fifth and seventh. The second inversion takes the note at an interval of a fifth for its bass note, and add notes at intervals of a third, fourth and sixth from it.

chord of the thirteenth

The chord built on the chord of the ninth. The chord of the ninth consists of a note plus other notes at intervals of a third, fifth, seventh and ninth, respectively. The chord of the thirteenth adds to this notes at intervals of an eleventh and a thirteenth from its keynote.

chord of the thirteenth

The chord built on the chord of the ninth, which consists of the first note of the scale plus its third, seventh and ninth, plus eleventh and thirteenth.

chord of the tritone

The third change of position of notes in the chord of the seventh. This takes the highest note of that chord for its bass and it adds notes at intervals of a second, a fourth and a sixth above.

chordomelodion**chord passage**

A chord in figuration, or an ornamental chord. The quick rendering of the notes in a chord successively, as distinguished from scale passages the notes of which follow each other in their order in the scale. Equivalent to arpeggio.

chord, perfect

See perfect chord.

chord, primary

See primary chord.

chord, redundant

See redundant chord.

chord, solid

A chord the tones of which begin and end at the same time, in contradistinction to a broken chord.

chord, transient

A chord in which, in order to make a smooth transition from one chord to another, notes are introduced which do not form an essential part of the fundamental harmony. A chord used in modulating or changing from one key to another, but foreign to both keys.

chorda (kôr'-dä) Lat. n.

A string of a musical instrument.

chorda characteristica (kôr'-dä kär-äk-tēr-īs'-tē-kä) Lat.

The characteristic tone: the leading or principal note or tone.

chorda, dominant septima (döm'-ī-nānt sēp'-tī-mä kôr'-dä) Lat.

The dominant chord of the seventh: the chord founded upon the dominant or fifth note of the scale with its third, fifth and seventh.

chorda, nona (nô'-nä kôr'-dä) Lat.

See chord of the ninth.

chordæ essentiales (kôr-dē ěs-sĕnshĭ-ä'-lĕz) Lat.

The keynote, or first note of a scale, plus its third, or the note two and one-half tones above it, plus its fifth, or note three and one-half tones above it. This is called the tonic triad.

chordaulodion

A large automatic barrel organ having a combination of pipes and strings. The chordaulodion was invented by Kaufmann, an organist, of Dresden, in 1812.

Chordienst (kôr'-dĕnst) Ger. n.

Choir service; choral service: in church a song service, when canticles, hymns, versicles and responses are all sung.

chordomelodion

See chordaulodion.

chorus

number of men and women, varying from twelve to twenty-four, who in a species of rhythmical declamation resembling chanting expressed the sentiments aroused by the chief actors in the play. Sometimes the chorus was divided and one part answered the other. When not singing they were grouped upon a platform called the thymele, placed in the center of the building. There was sometimes an accompaniment of flutes in unison to the singing of the chorus, but very little of the character of the chorus music is known.

2. A body of singers who form the chorus in opera, oratorio or chorus.

3. A composition written for a band of singers.

4. A refrain or burden of a song. Abbr. cho., chor.

chorus, cyclic

In dramatic performances of the ancient Athenians, a dance performed by the chorus around the altar of Bacchus.

chorusmaster

The leading singer in the chorus.

Christe eleison (krīs'-tē ě-lä'-i-sōn, or ā-lī'-sōn) Grk.

O Christ, have mercy upon us: a part of the Kyrie or first movement of the mass in Catholic Church services. See Lesser Litany.

Christmas carols

Carols or ballads commemorating the birth of Christ, sung at Christmas time, especially in England. The beginning of these carols was in the Twelfth or Thirteenth Centuries. They varied greatly in subject and style, some being deeply religious in tone and others being jovial and festive in character. They were sung by all classes of people during the Christmas holidays, and were a part of the church service Christmas morning.

Christmesse (krīst'-mēs-sě) Ger. n.

Christmette (krīst'-mēt-tě) Ger. n.

Christmas matins: in the Catholic Church a special matins service for Christmas morning.

chroma (krō'-mä) Eng. n. from Grk.

Color, complexion: the ancient name for an eighth note. The name for the sharp which raises, and the flat which lowers, a note half a tone in pitch. The name of one of the modifications of the Greek musical scale.

chroma diesis (krō'-mä dī'-ě-sīs) Eng. from Grk.

A half tone.

chromatic instruments

chroma duplex (krō'-mä, from Grk.; dū-plěks,) from Lat..

1. The double sharp or double flat.

2. In ancient music the name for a sixteenth note.

chromameter

A tuning fork. A small steel instrument having two prongs which upon being struck give out a fixed tone by which musical instruments are tuned and the pitch of tunes ascertained. Tuning forks are of two pitches: A, two octaves above A in a minor scale, for orchestra; and C, three octaves above C in C natural scale.

chromatic

Literally, colored.

1. Relating to music this means the introduction of a sharp, flat or natural that does not belong to the key. The word chromatic is well chosen, for by the use of sharps and flats tone color or shading is added to the natural sounds of the notes.

2. A chromatic interval is an interval one half step above or below the given note.

3. A chromatic scale is a scale that ascends or descends by half steps; on the piano a chromatic scale includes all the black keys as well as the white keys in that scale, as C, C#, D, D#, E, F, F#, G, G#, A, A#, B, C.

chromatic alteration

Altering, that is, raising or lowering a note by a half tone.

chromatic chord

A chord that contains one or more chromatic signs, sharps, flats, or natural.

chromatic depression

Lowering a note by a half tone.

chromatic elevation

Raising a note by a half tone.

chromatic fugue

A fugue in which the subject has many intervals of half tones.

chromatic harmony

That which is characterized by the use of chromatic tones; that is, tones produced by raising or lowering the original by the use of sharps or flats.

chromatic horn

The French horn having valves or keys which make it possible to sound half tones on this instrument.

chromatic instruments

All instruments on which half tones can be sounded.

chromatic keyboard

chromatic keyboard

An attachment applied to the piano keyboard, which enables moderately skilful players to execute chromatic scales of half tones, half tone runs and trills more easily.

chromatic keys

The black keys on the piano: every key in the piano scale which has one or more half tones.

chromatic melody

A melody that moves by half tones.

chromatic scale

A scale which consists of twelve half steps in an octave and which divides the whole tones of the diatonic or natural scale into half tones.

chromatic signs

The characters used in musical notation for the purpose of raising or lowering tones. Those used in modern music are the sharp, #, the flat, b, the natural, ♮, the double sharp, ×, and the double flat, bb. For additional matter see under separate heads.

chromatic tuning fork

A tuning fork that sounds all the tones and half tones of the octave.

chromatics, accidental

Sharps or flats that are not natural to the key in which the passage is written, but which do not modulate, or change the passage into another key.

chromatique (krō-mä-tĕk') Fr. adj.

Chromatic.

chromatiquement (krō-mä-tĕk-măñ')

Fr. adv.

Chromatically: proceeding by half tones, or according to the chromatic scale.

chromatische Tonleiter (krô-mä-tĭ-shĕ tōn'-lĭ'-tĕr) Ger.

The chromatic scale: a scale consisting of twelve successive half tones to an octave.

chromatisches Klanggeschlecht (krō-mä-tĭ-shĕs kläng-ghĕ-shlĕkt') Ger.

The chromatic mode or class of scales.

chronometer

A general name for **any** machine for measuring time.

chronometer, Weber

An apparatus for measuring the duration of notes, invented in 1813 by Gottfried Weber. It was a pendulum formed of a string divided into fifty-five inch spaces by knots, and having a bullet attached to thĕ end for a weight. It was provided with means for lengthening or shortening **the**

church modes

string and the rate of velocity of the pendulum depended upon its length. Thus, the slider set at some determined mark or knot on the string makes one beat per second, and gives a basis for measuring other lengths and their number of beats per second.

chronomètre (krō-nō-mĕtr) Fr. n.

A form of monochord, an instrument having one string and a movable bridge, which was used for determining intervals of pitch and to teach piano tuning. This instrument was invented by Raller in 1872.

chronos protos (krō'-nŭs prō'-tŭs)

Grk.

Literally, the first time: the smallest time unit. In ancient music the simple short or breve, a note equivalent to two modern whole notes, by which long syllable values were measured. Thus, one simple long, a note having the value of four modern whole notes = two chrono protoi or breves.

church cadence

A musical ornament consisting of a chord formed on the keynote or first note of the scale, preceded by a chord formed on a note three and one-half tones below or two and one-half tones above the keynote. The same as plagal cadence.

church cantata

A rather long and elaborate choral work on a sacred subject, in the style of an oratorio but not long enough to be dignified by that name.

church modes

The modes or scales in which early church music was written. The idea of modes was borrowed from the Greek music, with some modifications. The later Greek musicians used chromatic tones, while the church mode had none except b flat. Each chant, with this exception, was kept strictly within the compass of one mode. The Greek scale descended, the church ascended. Both modes were built upon a system of fifteen tones, divided into groups of four tones each, known as tetrachords, and beginning on the second tone called B, because A was originally an extra tone. Each mode or scale had to consist of a perfect fourth, or interval of two whole tones and one half tone, and a perfect fifth or three whole tones and a half tone, but they could be so arranged that either the perfect fourth or the perfect fifth stood for the lower part of

church modes

the scale. A mode began upon any one of the seven tones of the natural scale and extended through an octave. There were two kinds of modes, seven authentic and seven plagal, founded upon the authentic. St. Ambrose, who was Bishop of Milan during the Fourth Century, is supposed to have founded the first four authentic modes called after the Greek names, Dorian, Phrygian, Lydian and Mixolydian. To these, in the Seventh Century, Pope Gregory added the first four plagal modes, the Hypodorian, Hypophrygian, Hypolydian and Hypomixolydian. Later three other authentic, the Æolian, Locrian and Ionian, were created, and three plagal, the Hypoæolian, Hypolocrian and Hypoionian. An authentic mode was one which ascended a fifth and then a fourth above the keynote, or note upon which the scale was built but did not go below it. A plagal mode was one which ascended a fifth above and descended a fourth below its keynote. In each mode the following tones were of special importance: the final, nearly equivalent to the modern keynote, upon which every melody ended; the dominant or principal reciting note; the mediant and participant, upon which phrases other than the first and last might begin and end. These modes exerted a powerful influence over the development of modern music and were used exclusively down to the Sixteenth Century, when the introduction of modern forms gradually superseded them in all but the Roman Catholic church music, where they are still in use.

chute (shüt) Fr. n.

Literally, fall, decline. An obsolete sliding grace, taking half the value of the note which it modifies: predecessor of the long appoggiatura. It was indicated by a little hook or an oblique stroke before a note.

ciaccona (chäk-kō'-nä) It. n.

ciacconne (chäk-kōn'-nē) It. n.

A slow dance, probably Spanish in

cinyra

origin. The music of this dance, usually in three-four time and moderately slow in tempo, was most often in the form of variations on a ground bass, mostly about eight measures long. The same as chaconne.

cicogna (chē-kōn'-yä) It. n.

Literally, a stork: the mouthpiece of a wind instrument.

cicutrenna (chē-koo-trēn'-nä) It. n.

A musical pipe: this was probably derived from cicuta, a Pan's pipe, made from the stalks of the hemlock.

cifrato (chē-frä'-tō) It. adj.

Marked with initials: figured, as a figured bass, in which the other parts are indicated by numerals written above and below the bass notes, instead of by notes.

cimbalo (chēm'-bä-lō) It. n.

Originally a large dulcimer, from which grew the application of the name to a variety of instruments furnished with strings and struck by hammers. Now it has numerous meanings, among them cymbal, harpsichord and piano. It is even given as a name for the tambourine.

Cimbel (tsīm'-běl) Ger. n.

1. Cymbalo: a pair of thin concave circular metal plates, with straps through the middle by which they are held.

2. Organ stop: a so-called mixture stop in the organ composed of several pipes to each key of the keyboard.

Cimbelstern (tsīm'-běl-shtārn) Ger. n.

Literally, cymbal-star: a star made of circular pieces of metal hung with small bells which are sounded by a current of air, controlled by a draw-stop. It is now rarely used, but in old organs was placed in front and at the top of the instrument. Synonym of Zimbelstern.

Cinellen (tsē-něl'-lěn) Ger. n.

cinelli (chē-něl'-lē) It. n.

Cymbals: two thin round metal plates with leather straps through the center by which the performer holds one in each hand. They are played by being rubbed together with a peculiar sliding motion.

cinq (sänk) Fr. adj. and n.

cinque (chēn'-kwě) It. adj. and n.

1. Five.

2. The fifth voice or part in a quintet, which is a composition for five voices or instruments.

cinyra

An obsolete name for the harp.

cithara

from which many medieval and modern instruments, such as guitar and zither, derive their names and in part their construction.

3. A cither, which see.

cithara bijuga (sĭth'-ä-rä bĭ-joo'-gä)

Lat.

Two-necked guitar or lute: on this instrument some of the strings passed along the side of the finger-board and therefore could not be stopped, while some of the higher strings were tuned in unison. It was sometimes strung with wire and played with a plectrum like a cithara and sometimes with gut and played like a

clt̄ang

citharœdus (sĭ-thä-rē'-dŭs) Lat. n.

One who sings while playing upon the harp or cithara.

cither

An instrument shaped like a lute but with a flat back like a guitar. It was strung with wire instead of gut and the oldest specimens had three strings, which were afterwards increased to eight, nine and even twenty-four, generally tuned in pairs and played by quill or plectrum. It was very popular during the Sixteenth and Seventeenth Centuries in Europe and England. English cither was the name given this instrument during the Eighteenth Century; it usually had four pairs of wire strings, although the number was variable up to fourteen pairs.

cithole (sĭt'ō'-lē) Eng. n. obsolete.

An instrument much like the dulcimer and sometimes thought to have been synonymous with it. Some authorities derive the word from the Latin, *cistella*, a small box, others from *cithera*, a guitar. It was frequently referred to by poets of the Thirteenth, Fourteenth and Fifteenth Centuries, and was pictured as a small box shaped psalter in manuscripts of the times. Chaucer refers to it in the *Knight's Tale*, in which it seems to be a kind of guitar.

cittam (sĭt'-täm) Old Eng. n.

The old English name of the guitar.

cittern (sĭt'-tĕrn) Eng. n. old form.

See *cither*.

civetteria (chē-vĕt-tĕ-rē'-ä) It. n.

Coquetry: as used in the direction phrase, *con civetteria*, to be rendered in a coquettish, trifling style.

clair (klär) Fr. adj.

Clear: shrill, loud, in tone.

clang sound

clairon (klär-ôn') Fr. n.

1. Clarion: a trumpet having a clear tone.

2. The reed stop in an organ.

clam

In bell ringing the practise of uniting several sounds by ringing a group of bells.

clama ne cesses (clä'-mä nē sĕs'-ĕz)

Lat.

A phrase used in the Middle Ages, indicating that the second voice in a canon should sing all the notes the first voice sang, singing through the rests; that is, there should be no rests in the second voice.

clamoroso (klä-mō-rō'-sō) It. adj.

Clamorous, loud, noisy; plaintive sounds.

clan marches

The individual marches which belong to each clan in Scotland, and by which they are led into battle, or marshaled to clan gatherings of various kinds. These are composed for the bagpipes and have a strongly marked accent and rhythm.

clang

From the German word *klang*, sound. A composite musical tone consisting of a principal tone and the subordinate tones of higher pitch which sound with it. A sharp, shrill sound.

clang-color

Tone, color, tone quality, the result of the composite tone. A peculiar ringing quality to the tone.

clang figures

The peculiar star-like forms into which sand, scattered on a glass or metal plate, shapes itself when a bow is drawn along the edge of the plate. This means of studying vibration was first discovered by Chladni about 1787.

clang-key

See *klangschlüssel*.

clang-meaning

The meaning of a chord, that is, not its abstract harmony or character, but its relation to other chords with which it is being used.

clang sound

The audible vibrations of elastic bodies. What we generally call tones are compounded of several simple sounds not usually distinguishable, and the word *clang* signifies the compound of several simultaneous simple sounds or single vibrations.

clang-succession

clang-succession

A progression or changing from one chord to another as the chord moves from the principal harmonic form or clang to some related harmonic combination.

clang-tint

The color of a tone, that is, its quality or individuality; that peculiarity of a tone which makes it different from another of the same pitch. Every instrument, every voice, has its own clang-tint. Also called the timber of a tone.

clangor tubarum (kläng'-ör tū-bā'-rūm) Lat.

An ancient Roman military trumpet which consisted of one large bronze tube surrounded by seven smaller tubes, all terminating in a single mouthpiece.

clapper

The tongue of a bell: the metal tongue which hangs within a bell and produces sounds by striking against the sides.

claque bois (kläk bwä) Fr. n.

A French name for the zylophone.

clara voce (klä'-rä vō'-chě) It.

A clear, loud voice.

claribel flute

An organ stop composed of open wood pipes producing a full tone of soft, sweet quality. The pitch is an octave higher than that of the ordinary clarabella stop, of which it is a variety. The lowest tone is only an octave below middle C.

claribella

In the organ a group of pipes which are open at both ends. Their tone is very mellow and can be effectively used in solo work. Claribel, or clarabella, is the name given by English makers, whereas the German portunal and the American melodia are the same.

clarichord

The same as clavichord.

Clarín (klä'-rēn) Ger. n.

1. A clarion or trumpet.

2. An organ stop, the same as clarion.

Clarinblasen (klä'-rēn-blä'-zēn) Ger. n.

The sound of a trumpet: specifically the soft tones produced on a trumpet.

clarinero (klä-rē-nä'-rō) Spa. n.

A trumpeter.

clarinet

A very important wood-wind instrument much used in orchestras and in military bands. It was invented in

clarinet

1690 by Johann Christopher Denner of Nuremberg. The name is probably derived from the Italian clarino, or trumpet. The ancient shawns were probably of this type, too.

The clarinet consists primarily of a mouthpiece furnished with a single beating reed and a cylindrical tube pierced with many side holes and terminating in a bell. The reed consists of a broad flat strip of a kind of tall grass called cane. It is flattened on one side and thinned to a feather edge on the other. In early times it was attached by wax cords, but it is now held in place by a double metal band having two screws and called the ligature. Except for the mouthpiece and the bell, the tube of the clarinet is entirely cylindrical and for that reason produces a tone deeper than the conical tube of a flute or oboe of the same length. Thus on the flute or oboe extra pressure of air produces a tone an octave above the natural tone, but on the clarinet it produces a tone at a twelfth, or an octave and a fifth, higher than the natural tone. The fundamental scale of the clarinet extends from E on the third space of the bass staff to B flat on the third line of the treble. E in the bass being sounded through the bell of the horn. This scale of nineteen half tones requires at least eighteen side holes. Most modern clarinets have twenty side holes, seven closed by the left thumb and first, second and third fingers of the right and left hand, two by the little fingers acting through open standing keys, one by an open standing key closed by either or both the second or third finger of the right hand, and eleven by closed keys. The system of fingering is very complicated on the clarinet and makes this instrument difficult to play. Its compass is usually divided into four registers: The lowest includes the fundamental scale; the second or medium consists of a few extra notes and brings the compass up to B; the third or acute, which is the scale based on the first harmonic produced; and the fourth which is obtained from the upper overtones. Its compass is from E on the third space of the bass staff to C of the second octave above the treble staff. Music for the clarinet is written in the G clef. The lower register of the clarinet, sometimes including the medium, is called chalumeau, and is

clarinet

rich, full and rather reedy in tone. The upper register is clear, round and brilliant, the fourth or highest shrill and fierce. Clarinets are tuned on various notes. The A clarinet is used in orchestra and is tuned to the scale of A major; it sounds one and a half tone below the C clarinet. The B flat clarinet is much used in military bands; it sounds two half tones below C and gives the scale of B flat major. For the higher notes military bands use a small clarinet tuned to E flat. The clarinet tuned to D is by some composers thought to blend better with the violins than those at lower pitch. Owing to the complicated system of fingering used it is difficult to play on it compositions having more than three sharps or three flats. It is difficult to tune and is very susceptible to atmospheric changes, and ought rightly to give the pitch to the orchestra instead of the oboe. Many compositions have been written in which the clarinet has solo or prominent part and it is an important factor in the modern orchestra. Abbr. clar.

clarinet, bass

The deep-toned member of the clarinet family. It has the same key system as the ordinary clarinet, but has a large bell at the lower end and a crook for the mouthpiece. The tones it produces are an octave lower than those of the clarinet, and it is usually tuned in the key of B flat on the first space above the bass staff. When its music is written in the treble clef the instrument plays the notes a major ninth or nine tones lower than they are written but only one tone lower when the bass staff is used for the lower notes, and the treble only for the highest register. The bass clarinet has a compass from D nearly two octaves below middle C, to F an octave and one half above it, but its highest notes are seldom used. Its lowest register is full and rich in tone. The instrument is especially good in solemn or mysterious music. Abbr. cl. b.

clarinettiste (klä-rē-nēt-těst') Fr. n.

A clarinet-player.

clarino (klä-rē'-nō) It. n.

1. The Italian name for a small shrill-toned trumpet used chiefly in its higher notes. A name loosely applied to bugle and trumpet. In old scores used for tromba.

clausula

2. An organ stop, the same as clarion. Abbr. clar., claro.

clarion (klär'-i-ön) Eng. n.

1. A trumpet having a clear tone.

2. An organ stop composed of pipes furnished with reeds whose vibrations produce the sounds. The pitch is not low, the deepest tone being an octave below middle C. The tone is ringing and brilliant and is used in loud effects. The clarion is the only reed stop of this pitch in general use.

clarion stop

A group of pipes in the organ which are fitted with a reed fashioned in such a manner as to produce a brilliant piercing tone.

clarionet

An obsolescent form of clarinet.

clarionet-flute

A meaningless name applied to an organ stop composed of pipes covered at the top, but having a slender tube through the stopper, making the tone rather piercing. The lowest tone is two octaves below middle C.

clarone (klä-rō'-nē) It. n.

The clarinet.

clarté de voix (klär-tä dü vwä) Fr.

Clearness of voice.

classical music

Classical music is music of an acknowledged style in art composed by a recognized master in that style. In a broader sense classical music is any music that from its perfect harmony of form, subject matter, and spirit, is worthy to serve as a model for other compositions in that style. This is a name given to work of the earlier masters, including Beethoven, and is sometimes applied to that of their imitators. Serious music in general in contrast to music of ephemeral nature.

classical pitch

The pitch in use between 1713 and 1897, and employed by all the great musicians from Purcell and Bach to Weber and Schubert and even Mendelssohn and Rossini. In this pitch a', that is, a on the second space of the treble staff varied from 415 to 429 double vibrations per second.

clause

A musical phrase, or unit, a musical sentence or idea.

Clausel (klow'-zěl) Ger. n.

A close; cadence or concluding musical phrase.

clausula (klaw'-zū-lä) Lat. n.

A close: a conclusion; a concluding

clavichord

The strings of finely drawn brass wire stretched almost parallel to the direction of the case, but slanted toward the back. They were fastened to the right of the player on tuning pins inserted in the sounding-board which was strengthened on the under side by a strip of oak. At the back and partly along the left side they were attached to hitching pins of thicker wire. On the right hand the strings rested on a curved bridge which carried their vibrations to the sounding-board beneath them. In clavichords made before the Eighteenth Century there were two or three unison strings to a note, beginning with the bass which had one string continuing with two and after middle C three, and even four strings for the highest note of the four octave compass. The lowest key was probably E and was made to sound C, while F sharp sounded D. In some clavichords, called gebunden, a set of strings served for two sets of notes, by the use of extra tangents. About the end of the Seventeenth Century the clavichord was enlarged and its compass extended and fretted clavichords were made with only two tangents to a pair of strings but with A and D always unfretted or bundfrei. In all clavichords except those of Italy and the Netherlands the natural keys were black and the chromatic keys white. Abbr. clav.

clavictherium

The harp with keys. This was originally designed to be played upon a table and was similar to a spinet; later it was provided with standards and its sounding-board was placed on end. It had a triangular case and instead of tangents such as those of the clavichord, it had wooden bars called jacks, which had small quills at the upper end by means of which it set the strings in vibration. Each key sounded a separate string.

clavicylinder

A keyboard instrument invented by Chladni about 1800 and exhibited in Paris in 1806. It consisted of a glass-cylinder or series of cylinders made to revolve by a treadle. By means of keys, steel rods were pressed against the cylinder and thus made to sound the notes of the scale. This instrument had a compass of four and a half octaves.

Another instrument of the same name consisted of glass plates of dif-

clear flute

ferent lengths struck by hammers operated by a keyboard.

clavier (klāv-yā) Fr. n.

clavier (klāv-vā') Fr. n.

Clavier (klä-fēr') Ger. n.

1. The keyboard of such instruments as the piano or the organ.

2. A name formerly used for the clavichord.

3. The modern German name for the piano, in fact, for all keyboard instruments except the organ.

clavier de récit (klāv-yā' dě rā-sē') Fr.

Literally, the recitative manual or keyboard: the swell organ or swell keyboard by which the sustained tones of the organ are increased or diminished in volume.

clavier, Virgil practice

See Virgil practice-clavier.

Clavierauszug (klä - fēr' - ows' - tsoog) Ger. n.

An arrangement of a full score to be played on piano.

Clavierdrath (klä-fēr'-drät) Ger. n.

Music wire: wire used in pianos and similar instruments.

Clavierlehrer (klä-fēr'-la'-rēr) Ger. n.

A teacher of piano playing.

Clavierschule (klä-fēr'-shoo'-lē) Ger.n.

Progressive exercises for the piano.

Clavierspieler (klä-fēr'-shpēl'-ēr) Ger. n.

A piano-player.

Clavierstimmer (klä-fēr'-shtëm'-mēr) Ger. n.

Piano-tuner.

Clavierübung (klä - fēr' - ü' - boongk) Ger. n.

Exercise for the piano.

Clavierunterricht (klä - fēr' - oon' - tēr-rikht) Ger. n.

Lessons on the piano.

claviglissando (klä-vī-lēs-sän'-drō) It. n.

A keyboard instrument invented by C. W. Le Jeune. It consisted of a mechanism which combined the effects of the harmonium in imitating the sounds of various instruments, and of the violin in its portamento or slide.

clavis (klä'-vis) Eng. n. from Lat.

A bellows handle. A key, a note, a clef, the character at the beginning of a stave of music which shows the pitch of the notes thereon.

clē (klē) Fr. n.

Clef.

clear flute

An organ stop sounding an octave higher than its nominal pitch and having a clear, flute-like quality of tone.

clef

clef (klěf) Eng. n.
clef (klä) Fr. n.

The key: the only musical symbol by which the pitch of a sound may be absolutely represented. In the Sixteenth Century there were five clefs in use, the gamut named from the Greek letter Γ gamma, the F. C. G and D clefs. The gamut, which represented the G now written on the first line of the bass staff was then the lowest sound in the musical system, the D clef, which indicated d", D in the second oc-

tave above middle C. Both of these are now obsolete, the only G clef. now in use being C clef, G clef and F clef.

Any of these symbols placed on any line of the staff, fixes the name and pitch of the note on that line, and from that the names and pitch of the notes on the other lines and spaces can be found. The C clef has been used on all lines but the fifth:

On the first line it is called the soprano clef and is found in old ecclesiastical

music and sometimes in modern vocal scores; on the second line it indicated the mezzo-soprano, and early in the

Eighteenth Century the tenor violin part, but is now obsolete; on the

third line of the staff it is called alto clef, and

used in music for alto voices, violas and the highest trombone; and on the

fourth line, it is known as the tenor clef, and used in

writing for tenor voices, trombones and the upper register of

the bassoon and cello. The F clef, placed on the fourth line of the staff,

is used in music for all bass instruments and voices.

In old music it is sometimes found upon the third line and called the barytone clef;

and sometimes on the fifth line when it is called the

basso profundo clef. The G clef is now used only

on the second line of the staff and is known as the treble

clef; the G clef on the first line or French treble clef, and the G clef on the third

clef, mezzo-soprano

line are obsolete. The modern clefs are corruptions of the letters C, F, G.

clef, alto

The C clef, placed on the third line of the staff. See also alto clef.

clef, barytone

The F clef, placed on the fourth line of the staff. See also barytone clef.

clef, bass

The F clef, placed on the fourth line of the staff. See also bass clef.

clef, basso profundo (bäs'-sö-prö-fün'-dō) Lat.

The F clef on the fifth line of the staff. See also basso profundo clef.

clef, C

See C clef.

clef, counter tenor

The C clef, placed on the third line of the staff. See counter-tenor clef.

clef d'accordeur (klä däk-kör-dür') Fr.

A tuning hammer or sort of hand wrench by which the strings are tuned by tightening or loosening, in harps and instruments of the piano family.

clef de fay (klä dü fā') Fr.

The F, or bass clef, which is placed upon the fourth line of the staff. See also F clef.

clef, descant

See discant clef.

clef d'ut (klä düt') Fr.

The C clef.

clef, F

See F clef.

clef, French treble

clef, French violin

The G clef, made on the lowest line of the staff. Formerly much used in French music for the violin, flute and other instruments but now obsolete. See also French treble, or French violin, clef.

clef, G

See G clef.

clef, German soprano

The C clef, placed on the first line of the staff to indicate soprano parts. See also German soprano clef.

clef, mean

The tenor clef, the C clef placed on the fourth line of the staff. See also mean clef.

clef, mezzo-soprano (męd'-zō-sō-prä'-nō) It.

The C clef placed on the second line of the staff. See also messo-soprano clef.

clef note

clef note

The note upon which the clef is placed; G in the treble and F in the bass.

clef sol (klä sül) Fr.

The G, or treble clef.

clef, soprano

The C clef, placed on the first line, thus making the note on the first line middle C; this clef denoted the soprano part. See also soprano clef.

clef, tenor

The C clef, placed on the fourth line and denoting the tenor part. See also tenor clef.

clef, treble

The G clef, placed on the second line of the staff. See also treble clef.

cliquette (klē-kět') Fr.

Four pieces of wood, bone or ivory, held two in each hand between the fingers and shaken. They form a rattling accompaniment to song, dance or instrumental music.

clocca (klök'-kä) Lat. n.

cloche (klôsh) Fr. n.

Bell.

cloche de l'elevation (klôsh dü lā-vās-yôn') Fr.

Bell of the elevation: mass bell, sacring bell. A bell rung at the altar during the elevation of the Host and other solemn parts of the celebration of the mass in the Roman Catholic Church.

cloche funëbre (klôsh fü-näbr') Fr.

A funeral bell: the toiling of a bell at funerals.

cloche sourde (klôsh soord) Fr.

A dull bell: a muffled bell.

clocher (klô-shā) Fr. n.

A belfry or steeple: a tower where a bell or bells are hung.

clochette (klô-shët') Fr. n.

Hand-bell.

clock, musical

A clock containing an arrangement of weights and springs similar to that in a barrel-organ, and which produces various tunes.

clock, to

To produce sounds from a bell by attaching a rope to the clapper and swinging it until it strikes the stationary sides of the bell.

clog dance

This is a jig-like dance in which the dancers wear clogs, which are shoes having very thick soles and often high heels. The dance is commonly ascribed to Ireland and is one in which the dancer varies the steps at will.

coda

The feet are kept constantly in motion, the performer tapping the floor with his heels, tapping his soles together, in as many varied steps as his ingenuity and balance will allow. This dance is a great favorite even to-day with the small boys and grown-ups and can be seen in many a vaudeville performance. It is danced without music as a rule, bystanders sometimes clapping hands to form a rhythmic accompaniment.

clokerre, Old Eng. n.

A belfry or tower where, bells are hung.

clorone (klō-rō-ně) It. n.

A kind of clarinet which is tuned five tones lower than the regular clarinet. The clarinet is sometimes called by this name.

close

The end or conclusion, as the closing movement of a composition or the closing measure. When the close is based upon the keynote of the composition it is called a perfect close, when it is based on another note it is an imperfect close. A cadence is often called a close because it often concludes a composition or a division of one.

close harmony

That in which the notes or parts are kept as close together as possible. For instance, in a composition of four parts where the three highest parts lie within the compass of an octave.

close play

The style of lute playing in which the fingers are kept on the strings as much as possible.

close position

The same as close harmony.

close score

A score with more than one voice or instrumental part on a stave. The same as compressed score.

clynke-bell

Chime.

Comedy: a piece having the elements of humor in it.

comédien (kō-mäd-yän) Fr. n.

A man who plays a comic part.

comédienne (kō-mäd-yĕn') Fr. n.

A woman who plays comic parts.

comes (kō'-mĕz) Eng. n. from Lat.

An associate, a companion, a partner. In a fugue, an answer that is in strict counterpoint, the repetition in a different pitch by one part of a theme previously given by another part. The more general meaning is a sort of reply made by one phrase of a composition to another, or one instrument to another. This also means the repetition of a phrase or theme of a canon proposed by one part and repeated by another with or without modification.

comic opera

An opera of a humorous cast in which the music is varied by the interpolation of spoken words. The plot is lively and full of amusing situations, and the story ends happily. The music suits the nature of the plot, being gay and cheery.

comico (kō'-mĕ-kō) It. adj.

Comic; a comic actor. It is sometimes used as a noun and means a writer of comedies.

cominciante (kō-mĭn-chän'-tĕ) It. part. and n.

One just beginning the study of music.

cominciato (kō-mĭn-chä'-tō) It. n.

The beginning: the commencement. Obsolete form.

comique (kō-mĕk') Fr. adj.

Comic; a comic actor. It is sometimes used as a noun and means a writer of comedies.

comiquement

comiquement (kō-měk-măñ) Fr. adv.
Comically, jocularly: to be rendered in a comical manner.

comma

1. The smallest interval of musical tone, used in theory but not in practice, for there the difference is so slight that it is lost. When the scale is mathematically perfect the interval from one to two is a major tone, and from two to three a minor. Majors contain nine commas and minors eight, so that a comma is the difference between a major and a minor. 9 commas — 8 commas = 1 comma. The comma syntonum, or comma of Didymus, agrees with the above description, but the comma ditonicum, that of Pythagoras, is the difference between the twelfth, fifth and the seventh octave above a given note in a mathematically perfect scale.

2. A breathing-mark; also the sign for a backfall, coulë or tremblement. See table of signs.

comma ditonicum (kôm'-ä dī-tōn'-i-kūm) Lat.

See comma of Pythagoras.

comma of Didymus

The difference between the major and minor whole tone or the ratio of eighty to eighty-one, as worked out by Didymus, a Greek mathematician and theorist, who with other scientists revised the Greek musical scale.

comma of Pythagoras

The difference between the seventh octave or interval of eight tones or the twelfth, fifth or interval of three whole tones and one half tone, above the given note. This is named after Pythagoras, a Greek theorist, who omitted C, a major third, from the highest tone on the seven-stringed Greek lyre, because it was a discord.

comma syntonum (kôm'-ä sīn-tō'-nūm) Lat.

See comma of Didymus.

commencer (kôm-măñ-să') Fr. v.

To begin, to start, to commence.

common chord

A chord composed of the fundamental note, or note upon which the chord is built, plus a note an interval of a third above it, plus another note at an interval of a fifth.

common measure

See common time.

common time

Four-four time, having four quarter

complement

notes, or the equivalent, to a measure. Written $\frac{4}{4}$ or **C** Applied in a more general sense to any kind of duple-time, i. e., any time in which the number of beats in a measure is divisible by two.

common time, compound

Time having two or a multiple of two groups of beats to a measure; e. g., six-four or twelve-eight time.

common time, half

Two-four time; time in which there are only two quarter notes or their equivalent to a measure. Written

common turn

The usual or regular turn, an ornament consisting of a principal note, the note above it and the note below it.

Common turn

comodamente (kô-mō-dä-měn'-tě) It. adv.

Easily: without effort; with composure.

comodo (kô-mō'-dō) It. adv.

Comfortable; easy.

compass

The range or scale which a voice or instrument is able to produce, from the lowest to the highest.

compensation mixture

An organ stop connected with the pedals and composed of pipes, several of which sound at different pitches when a single key is depressed. This stop is used with various other pedal stops to reinforce and brighten the tone.

compiacente (kôm-pī-ä-chän'-tě) It. adj.

Complaisant; amiable.

compiacevole (kôm-pī-ä-chä'-vō-lě') It. adj.

Pleasing; charming; delightful; complaisant.

compieta (kôm-pī-ä'-tä) It. n.

Complin or evening prayers. The last of the seven canonical hours, definite periods of daily prayer in the Roman Catholic Church service.

complainte (kôn-plänt') Fr. n.

A wailing; a lament: a religious ballad.

complement

That quantity which is lacking to any given interval not wider than an octave to complete or fill up an octave. For example, to any note taken with its fourth, the fifth above the upper of two notes is the quantity wanting, and hence the complement.

complementary part**complementary part**

The part in fugue which is added to the subject, or main theme or motive, and the counter subject, or second theme in double fugues and fugues with two subjects.

complete cadence

1. A perfect cadence. When the verse of a chant ends on the first note of the scale in which the chant is written.

2. A cadence or closing phrase which brings to mind emphatically the key in which it is written and fully satisfies the expectation roused by the discordant nature of a foregoing chord, or completes the effect begun by that chord.

When the chord built on the dominant or fifth note of the scale is followed by the chord built on the first note of the scale, with foundation notes of both chords in the base, and the foundation note of the second tone is repeated by the highest voice it is called a complete cadence.

completorium (kõm - plē - tō' - rī - ūm)

Eng. n. from the Lat.

completory

A service containing prayers and said at the close of the day. In the service as arranged by St. Ambrose, an anthem supplementary to an antiphon or short Scripture sentence sung before and after the psalms for the day or the canticles for the season in the service of lauds, the first canonical hour, and in the vesper or evening service.

complin (kõm'-plīn) Eng. n. from Lat.

The seventh and last of the canonical hours of the Roman Catholic ritual. It is sung after vespers, sometimes with and sometimes without a pause between services. Part of its ritual is invariable and part changes with the seasons.

from G on the third space below the treble staff to G on the fourth line above. It is capable of much variety of tone and can be played with great expression and with complete effects of holding the notes and of playing them shortly and crisply. Music written for violin, flute and oboe can be played on it without alteration, but music written especially for it can be played only on organ or harmonium. The tenor, bass and double bass instruments are single action, that is, produce sounds by pressing the bellows only. They can play tenor, bass and double bass parts without alteration and have a compass as follows: tenor, from B on the second added space below the treble staff to C on the third line above; bass, from C on the second line below the bass staff to C on the third line above the treble staff; double bass, from C on the second line below the bass staff to E on the third space of that staff. The keys producing the sounds on these instruments connect with metal reeds in the two ends of the bellows, which are worked by the wrists, while the fingers are free to press the keys.

concertino (kôn-chěr-tē'-nō) It.

A short concerto. The leading instruments, as violin concertino, the principal violin. The principal part in a concerto or other piece for full orchestra. This name is sometimes given the first violin part in which begin the other independent parts.

concertiren (kôn-tsěr-tē'-rěn) Ger. v.

1. To concert; to devise.

2. To harmonize or agree in sound.

3. Movements played by one performer to each part in which each instrument or voice in turn takes the principal part.

concertista (kôn-chěr-tīs'-tä) It. n.

A virtuoso, a solo player: one who plays in concerts.

Concertmeister (kôn - tsěrt' - mīs - těr) Ger. n.

Concert-master. In an orchestra, the leader of the first violins, who sits next to the conductor and makes known his wishes to the others. He is second in importance to the conductor, whose lieutenant he is. Upon him depend, to a great extent, the attack, the time and the shades of expression in the playing.

concerto (kôn-chěr'-tō) It. n.

Concert harmony. A form of in-

concerto

strumental composition for the display of one, sometimes of several solo instruments, almost always accompanied by orchestra. Originally the term was applied to almost any kind of concerted music, and in 1602 Viadana applied it to motets having organ accompaniment. Torelli is considered the inventor of the instrumental concerto owing to his concerted pieces for two violins and basso published in 1686. In the time of Bach and Handel it was much freer in form and much like our suites. The modern form of the concerto is probably due to Mozart. His concertos usually begin with a passage for the whole orchestra containing the principal subjects and usually the second subjects and ending in the original key. This is followed by the solo instrument sometimes with a brilliant introduction sometimes at once with the chief subject. A repetition of the first orchestral passage with modifications now follows for both solo and orchestra. The second subject is now introduced followed by a brilliant ending of the first solo. A short passage for orchestra follows, leading up to the second solo which after a number of modulations goes back to the original key. The principal subject is now repeated by the orchestral passage which brings the first movement to a close. In older concertos a pause is made near the end of this last orchestral passage to admit of a cadenza by the soloist. The second movement might be an andante, an adagio, larghetto or any slow movement and sometimes it was the variation form. The solo parts in this slow movement were usually very florid in character and a cadenza was sometimes introduced at the end of this movement, but if it appeared, was much shorter than that in the first movement. The third movement was usually in rondo form. Sometimes in form of variations and occasionally the rondo was subject to complete change of tempo. A short cadenza was usually introduced in the finale.

In Beethoven's concertos we find the orchestra of greater importance, the second and third movements were often connected and the introductory orchestral passage usually shortened, also the cadenza in the first movement is written out in full instead of

concerto

being improvised or composed by the performer. In the modern concerto, the lines of Beethoven's concertos are usually followed, the introductory orchestral passage being short and the cadenza near the end of the first movement written out, and sometimes the tempo quickened. Various other modifications have been made but none of them are typical.

Concertos for two solo instruments are known as double concertos, those for three, triple, and so on. Occasionally concertos are written with four movements but this is not a usual form. Abbr. cto.

concerto a solo (kôn-chěr-tō ä sō'-lō) It.

A concerto written to display a single instrument and therefore having no accompaniment.

concorde (kôn-kôrd) Fr. n.

concordia (kôn-kôr'-dĩ-ä) It. n.

Concord, harmony: a pleasing combination of sounds.

concorde, imperfect

An imperfect concord is a combination of two notes harmonious and complete in themselves, which can be changed from major to minor, that is, lessened in extent by one half tone and still remain harmonious and complete or satisfying to the ear. This term usually applies to intervals of thirds and sixths, and to all concords or combinations of tones except the intervals of the fourth or the fifth, with the keynote.

concorde, perfect

Are common chords in their original position, that is, chords composed of three notes, the fundamental, or note on which the chord is built, its third, or a note the next but one above it and its fifth, or note three whole and one half tones above it.

conducten (kôn-dook'-těn) Ger. v.

To conduct, to lead.

conducting

The art of so drilling and directing a group of musicians that they can give to the public a correct, clear and appreciative performance of a musical composition, embodying the composer's intention and the conductor's own artistic feeling. The principal duties of conducting are rehearsing

conducting

and conducting performances and sometimes transposing or rearranging parts of musical scores. It is necessary to rehearse until every player performs his part correctly and has an understanding of the composer's meaning in the composition as a whole, and of the conductor's individual interpretation. In conducting a performance it is necessary that the conductor give his directions firmly and clearly by means of alert and expressive gestures, for even if he has the correct impression and feeling for the composition in his own mind unless his gestures convey this to those under him he will never succeed as a conductor.

conductor

1. One who rehearses and directs an orchestra or chorus.

2. The inventor or leader of a chime or change in bell ringing.

3. One who marks the rhythm and emphasis of a composition with a baton.

4. One who accompanies vocal or instrumental pieces on the piano.

The office of conductor has been known since the earliest times in music. The Assyrians had a leader to regulate the rhythm of songs and dances. Among the Greeks this same officer was called Coryphoeus. It was not until the end of the Eighteenth Century that the conductor was known as an independent time-beater. Before that he had always led by playing the harpsichord and thus giving the tempo. Very often the conductor was the first violinist, who led with his bow. At present the conductor is specially educated for his profession, and is required to have a thorough knowledge of performance, theory, counterpoint, harmony and all the great compositions, and to know just what effect each instrument is capable of.

conductor's part

A substitute for a full score, on which the parts are condensed into two staves and the names of the various instruments inscribed where they enter.

conductus (kõn-dũk'-tũs) Lat. n.

A form of vocal composition of which the leading characteristic was that it was the only form of composition which did not have its tenor based on already existing church melody. Its words were always

conjoint degrees

metrical and given to the lower voice only and all the parts were built upon the tenor there being sometimes two, three or even four parts. It was composed according to two methods, one elaborate, the other simple, and there is dispute today as to whether the term *conductus simplex* refers to this simple style or to a *conductus* having only one part. There is also dispute as to whether the tenor part had always to be original or could be derived from some existing secular composition. This was an important form of composition during the Thirteenth and Fourteenth Centuries. There is little definite information about *conductus* and it is disputed that there were three hundred and eighteen *conducti* having four parts and one part.

conduit (kõn'-dĩt, or kũn'-dĩt) Eng. n.

conduit (kõn'-dĩt, or kũn'-dĩt) n.

1. Same as *conductus*.

2. In the organ a wind trunk: the hollow wooden canal through which the air is forced from the bellows to the windchest, a wooden wind-reservoir under the sounding-board on which the pipes rest.

cone-gamba

Same as *bell-gamba*.

confinal

Final, the concluding notes. In church music the last note of a melody called the final is the first note of the scale in which the melody is written and is the means of finding out in what scale the melody is written and of building up that scale. In authentic modes, those composed of a fifth plus a fourth, the first note of the scale rests on the first line of the staff. In the plagal, or subordinate modes which consist of a fourth plus a fifth, the first note is on the fourth degree of the scale, that is, on the second space of the staff. In church melodies a *confinal* is an irregular final one that does not end on the first note of the scale.

conjoint

Related, joined. The Greeks applied this term to two tetrachords, that is, scale divisions of four notes each, when the highest note of the lower tetrachord was the lowest note of the following tetrachord. Equivalent to *congiunto* (It.).

conjoint degrees

Two note, one of which follows the other in the order of the scale.

consonant**consonant**

Harmonious: agreeable and satisfying. Pleasing to the ear.

consonant chord

A chord containing no dissonant intervals, that is, no two successive tones, no sevenths, or intervals of the next tone out of five above the keynote, nor any intervals augmented or widened by a half tone, or diminished by a half tone.

consonant sixths

An interval is consonant when it is composed of tones that are harmonious and satisfying without the addition of other tones. Sixths are harmonious and satisfying when they are major sixths or intervals of nine half steps and also when they become minor sixths or intervals of eight half steps. Therefore they are called consonant.

consonant thirds

The major and minor thirds. They are consonant, or complete and satisfying to the ear, both when they are major and consist of two whole tones, and when they are minor and consist of three half tones.

A fugue in which the subjects move in contrary directions.

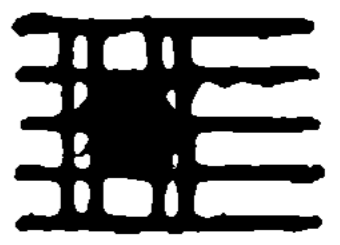

counter-subject

In a fugue, when the contrapuntal treatment, that is, the working out by parts of the subject of a fugue, forms a definite new subject that is used further along in the fugue, this new subject is called a counter-subject.

counter-tenor

Same as alto-tenor and contra-tenor.

counter tenor clef

The name given to the C clef when it is placed on the third line of the staff in music for  the high tenor voice.

counterpoint

1. In the broadest sense music for many voices as opposed to music for one voice.

2. The name comes from the Latin "punctus contra punctum," meaning point against point, the older word for note being point. Consequently in more modern phraseology the term means, note against note, in a sense, the setting against each other of the values of the corresponding notes of two or more different melodies. Generally speaking counterpoint may be defined as the art of adding one or more parts or melodies to a given melody that is known variously as subject, cantus firmus, and theme.

country-dance

country-dance

A rustic dance of English origin, popular from the earliest date until comparatively recent times and known in France as the contredanse and in Italy as the coranto. One peculiarity of this dance is that its music is not limited to any special accent or time beat, so long as the strains are in four or eight measure phrases to accompany the several movements of the dance. It was customary to use some popular ballad tune to dance to, and many of these survive today, among them being the book of tunes called *The Dancing Master*, first issued by John Playford in 1651. This dance is quite similar to the Virginia Reel, the dancers facing each other in two lines, the ladies in one and all the gentlemen in the other. In the first part of the dance all advance, then retreat, cross to opposite places, advance and retreat, then recross to their original places. Then the lady standing at the head and the gentleman standing at the foot advance toward each other and return to their places. The gentleman at the head and the lady at the foot do the same. The first named couple advance, swing by the right hands and return to their places, a figure repeated by the other couple. The lady at the head then advances and gives her hand to her opposite partner, then after passing behind the two gentlemen who stand next to him, gives him her left hand, he having meanwhile passed behind the two ladies standing beside his partner's place. The lady passes behind the two ladies next in line and her partner behind the two gentlemen, and so on down the line. At the foot the lady gives her left hand to her partner and they promenade back to their places, then the lady turns to the right and the gentleman to the left, each followed by their own line. Meeting at the foot they join hands and allow the others to pass under the arch formed by their arms until all have passed and they are the foot couple. This is repeated until they arrive at their original places.

coup (koo) Fr. n.

A blow, a stroke: as used in *coup d'archet*, a stroke of the bow.

coup d'archet (koo dār-shä') Fr.

A stroke of the bow: a way of using the violin bow.

courtaud

coup de baguette (koo dū bă-gět') Fr.

A beat of the drum.

coup de glotte (koo dū glôt) Fr.

Blow or stroke of the glottis: the sudden approximation of the vocal chords, by which is produced a sudden, clear tone in singing.

coup de langue (kōō dū lāng) Fr.

Stroke of the tongue: in wind instrument playing the use of the tongue to produce certain effects of tone.

couper le sujet (koo-pā lū sü-zhä) Fr.

To cut the subject: to abbreviate or cut short a musical subject or theme.

coupler

From the French verb, *coupler*, to unite. A mechanical contrivance, which connects two organ keyboards or a keyboard and a pedal-board, so that when one is played upon the corresponding keys or pedals of the other are simultaneously depressed and the tone is augmented.

coupler, octave

A mechanical contrivance in an organ which connects keys which are an octave apart.

coupler, pedal

A device for coupling one or more of the manuals or keyboards of an organ by means of pedals.

couplet

1. In poetry two successive lines forming a sentence, and generally rhymed.

2. In music the verse of a song.

3. In triple time the name given to two equal notes sounded in the time given to three notes in the regular rhythm of the piece.

courante

See *cither*.

courante (koo-ränt') Fr. n.

An old dance: in the old French dance suite the second part after the *allemande*. See also *coranto*.

couronne (koo-rün') Fr. n.

A crown: the name of a musical symbol that lengthens the time of the note or rest over which it is placed beyond the natural value or at pleasure of the performer. Equivalent of *corona*.

course

A group or set of strings tuned in unison.

courtal (koo-räl) Fr. n.

courtaud (koo-rō) Fr. n.

From the adjective *court*, meaning short and thick. An obsolete instru-

courtaud

ment consisting of a wooden tube and fitted with a double reed mouthpiece. In reality a short bassoon.

covered

An adjective used with several different meanings according to the noun it modifies.

1. Covered strings are strings of silk, wire or gut wound by fine silver or copper wire.

2. Covered octaves are those notes of one part, which are sung in octaves with another part and which are for the time wasted as they lose their power of forming any distinct melody, or of adding any real contribution to the harmony.

covered octaves

Imagined octaves; that is, the octaves are not really sounded on the instrument, nor do they appear in the printed music, but as the harmony moves from one chord to the next the ear supplies some of the intervening notes, and these imagined notes form octaves in themselves or with some that are actually sounded. For example, strike a' and f'' together on the piano, then strike the octave d'-d'' The actual sounds produced are the harmony a'-f'', and then the harmony d'-d'', but the ear supplies the downward steps, and hears between the upper notes f'' and d'' of the two harmonies, the note e''; and it supplies between a' and d', the lower notes of the two harmonies, the downward steps g', f' and e', and the e'' at the top, and the e' below, which the ear unconsciously supplies, form a covered or hidden octave. Covered octaves are forbidden in modern harmony.

crackle

In lute playing to produce chords brokenly, that is, one note at a time instead of simultaneously.

cracoviak (krä-kō-vī-äk) Pol. n.

A circular Polish dance accompanied by songs improvised during the pauses of the dance. This song may be flattering or otherwise and is begun by the man of the head couple to his partner.

The tinkling of brass and silver rings attached to the dancer's belt or the clank of iron bound boots enlivens the performance. In the mountains this becomes a very vigorous dance and many feats of skill and agility are added. Cracoviakis sometimes called cracovienne.

crepitaculum

cran (krāñ) Fr. n.

A notch: a notch into which the pedal of a harp is hitched.

creanluidh (krän'-loo-ě) Scotch n.

I believe. This is the third part or movement in mass of the Roman Catholic Church.

crembala

An ancient instrument similar to castanets, and used as an accompaniment by female dancers or singers.

crembalum

A jew's-harp: a small brass or steel instrument shaped somewhat like a lyre and consisting of a rigid frame and a thin vibrating metal tongue. When it is played the frame is held between the teeth and the tongue of metal is plucked by the fingers, the loudness and pitch of the tones being determined by the air space of the mouth.

Cremona (krä-mō'-nä) It. n.

1. A town on the river Po. in Lombardy, famous for the fine violins made there during the Sixteenth and Seventeenth Centuries. Hence, a violin made in this place is now known as a Cremona violin.

2. A name given to an organ and doubtless a corruption of the German Krummhorn. The pipes are fitted with reeds for producing the tones which somewhat resemble those of the clarinet.

cremona stop

Name given to a reed organ stop, a corruption of the word Krummhorn, the name of an organ stop.

cremonese violins

The name applied to fine violins made in Cremona, Italy, by one of the famous makers: Amati, Guarnerius and Stradivarius.

cross flute

cross flute

A transverse flute: a flute held across or in an almost horizontal position and blown at the side.

cross relation

When a note that has appeared in one chord is found in the following chord, sharpened or flattened, but in a different part of the chord, this produces a very harsh and unpleasant combination which is at its worst, perhaps, when the note is in a major chord, or chord containing an interval of two and a half degrees, and is followed by a minor chord, or one containing an interval of two degrees.

crotal (krō-täl) Eng. n. from Grk.

A kind of jingling ornament, worn formerly on clerical vestments.

crotale (krō-täl) Fr. n.

crotalistris (krō-tä-lis'-trī-ä)

A woman who plays upon the crotalon. A female minstrel.

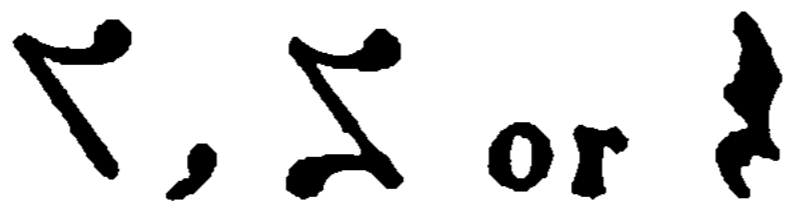

crotalo (krō'-tä-lō) Eng. n. from Grk.

An old English term for one who played upon the crowd; afterward applied to a common fiddler.

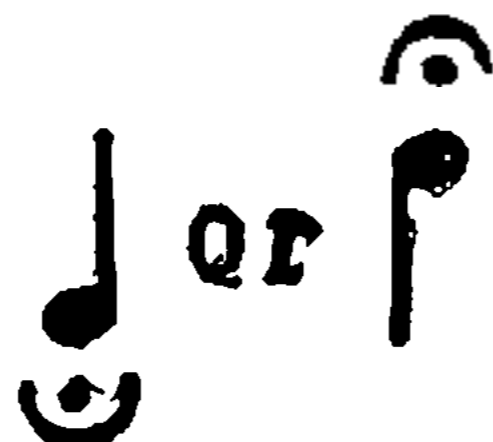

crowie

An old English instrument of the bassoon type.

crowle Old Eng. n.

An old English name for the crwth and derived from the Latin form of the name chrotta. The instrument doubtless derived the latter name from its rounded or protuberant form, this being identical with the Welsh name, crwth, meaning a hump or bulge. See also crwth.

crowned note

A note with a crown or hold above it, for example:  The sign signifies that the note is to be sustained for a longer time than its value indicates, for the sake of expression.

crowth Old Eng. n.

Old English form of the name of the Welsh crwth, which see.

csardas

cruit (krŭ-īt) Irish n.

The ancient Irish name for a harp and a violin; greatly akin to the Welsh word crwth and considered to refer to that instrument which is a combination of harp and violin. See also crwth.

crush-note

A very short grace note placed before the principal note, the accent being on the principal note; or a grace note which consists of the note a half tone below a chord note, sounded with the chord note but instantly released. It is only used in music for instruments of the piano family. See also acciaccatura.

crusma (kroos'-mä) Grk. n.

A timbrel, a tabor, a sort of small drum.

crutchetam (krŭtch'-ĕ-täm)

A name originally given to the crotchet or quarter-note.

crwth (krooth) Welsh n.

In Europe, the oldest known specimen of stringed instruments played with a bow, and known only to England, Ireland and Wales. It consisted of a square body terminating in two parallel arms connected at the end by a cross-bar, from the center of which the fingerboard extended. In ancient times it had only three strings, but in more modern times six, four lying over the fingerboard and played with a bow and two lying beside it and pinched or plucked with the fingers of the left hand. It had two circular sounding-holes and its bridge did not stand straight but leaned to the right. The length of the left foot of the bridge was two and a half inches, and that of the right was only three-quarters of an inch. The longer foot passed through the left sounding-hole and rested upon the back of the instrument thus resembling the sounding-post of the modern violin in that it transmitted the vibration of the strings through the belly to the back. The crwth is considered a predecessor of the violin.

csardas (tsär-däs) Magyar n.

A national Hungarian dance consisting of a slow and a fast movement, both of which are in the same key and in common four-four or two-four time. The music of the csardas (from Csarda inn on the heath) is distinguished by its wild passionate character and is always performed by gypsies. The dance begins with slow

csardas

dignified steps, then the movements grow faster and more complicated and the dance ends in a mad whirl.

cue

The tail, the end. In concerted music, a repetition in small notes of a prominent phrase that has just been performed to serve as a guide and to aid a singer to come in correctly after a long rest.

cuivre (kwēvr) Fr. n.

curfew Eng. n.

Literally, cover fire: curfew bell.

1. A bell rung in many countries during the Middle Ages about eight o'clock in the evening as a warning to the people to put out all fires and lights, as a protection against fire. This custom was introduced into England by William the Conqueror.

2. A bell rung at the present day in many communities at eight in winter and nine in summer, after which time it is unlawful for children under a certain age to be upon the streets.

Currendaner (koo-rĕn-dă'-nĕr) Ger. n.

Currende (koo-rĕn'-dĕ) Ger. n.

A procession through the streets of school-boy church choristers singing plain chants.

cushion dance

An English round dance popular with all classes during the Sixteenth and Seventeenth Centuries. The music to which it was danced was known as Joan Sanderson, and the manner of dancing it was as follows: This dance is begun by one person, who with a cushion in his hand dances around the room stopping at the end of the tune and singing, "This dance it will no further go," to which the musician asks, "I pray you, good sir, why say you so?" The man replies, "Because Joan Sanderson will not come too." To this the musician answers, "She must come too, and she shall come too, and she must come whether she will or no." At this the man lays the cushion at

cyclische formen

the feet of a woman who kneels upon it while he kisses her, singing, "Welcome Joan Sanderson, welcome, welcome." Both then rise and dance singing "Prinkum-prankum is a fine dance, and shall we go dance it once again, once again, and shall we go dance it once again?" Then the woman takes the cushion and goes through the formula sung by the man only substituting the name of John Sanderson for Joan. This goes on until the whole company present are in the dance and sometimes if there are enough people, a small ring is formed inside the large, with a man seated upon the cushion in the middle. The circle is dissolved by beginning with the first man and repeating a similar formula to the one already given, only substituting "go" for "come too," and "Farewell, Joan Sanderson, farewell, farewell," for "Welcome Joan Sanderson." This quaint dance is often alluded to in literature and has its survival today in a children's game called "Kiss the Pillow."

custode (koos'-tō-dĕ) It. n.

custos (kŭs'-tōs) Lat. n.

A guardian, attendant. A mark called a direct, put at the end of a staff to show the position of the first note of the following staff.

cuvette (kü-vĕt') Fr. n.

The pedestal of a harp.

cwibian (kwĕ-bĭ-ăn) Welsh v.

To quaver, to trill.

cycle

cycle forms

A circle or series of compositions relating to the same subject and forming one piece of music or a musical whole. As song cycles are a series of songs all related to one subject and forming a complete composition.

cyclic chorus

In dramatic performances of the ancient Athenians, a dance performed by the chorus around the altar of Bacchus.

cyclische formen (sik'-lishĕ fôr'-mĕn)

Ger.

Such compositions as are made up of a cycle or series of complete forms, or movements contrasted one to another. Examples of this form of compositions are the old suites or partita, or in modern music, the symphony and sonata, concerto and string quartet.

cymbals**cymbals**

Percussion instruments of invariable and indefinite pitch, much used in orchestras and military bands. They vary in shape from that of a cup or basin, such as the kind used by the Burmese, to almost flat circular plates, such as are used in modern orchestras. They are thinner at the outer edge. They originated in Arabia or Turkey, where the finest are still manufactured. They are made of brass or bronze, the proportions being kept secret by Turkish manufacturers. They vary in size from finger cymbals about an inch in diameter to those used in orchestras which are a foot or more in diameter. Straps are fastened to the center through which the hands are passed. The cymbals of the Assyrians were fitted with handles, one held in a vertical position with the basin part uppermost, and the other clashed against it. In some modern military bands both cymbals are held in the hands of the performer and are struck together with a rubbing motion but in other bands, and usually in orchestra, one cymbal is fastened to the upper rim of the bass drum and the other is held in the left hand of the drummer. The tone given out by the cymbals is loud, clear and brilliant.

D**cymbalum** (sĭm-bäl'-üm) Lat. n.

Cymbals. In ancient times an instrument consisting of two circular hollow plates of brass which made a hollow sound when struck together. They were used in festivals especially to Cybele and Bacchus. In medieval times the name was given to several small drums tuned to form the scale of an octave and played like a carillon or set of bells, by the medieval monks. The modern cymbalum is a kind of dulcimer used by gypsies.

cypher system

An early system of musical notation in which numerals represented the notes. Also written cipher system.

czardas (tsär'-däs) Magyar n.

See csardas.

czimken (tschĭm'-kĭn) Pol. n.

A country dance of Poland. The dancers arrange themselves in lines, one line facing another and certain prescribed figures are then performed very much as in the English country dances.

czymbalom (tshĭm'-bä-lôm) Hun. n.

The Hungarian dulcimer, an instrument composed of a wooden frame, a sounding-board with two holes, two bridges, and wire strings. It was played by being beaten upon by two padded hammers.

D**D**

1. The second tone of the scale of C major, that is, of the scale which has C for the keynote or first degree, and has the interval of a major third, two whole tones, between C and the third degree, namely, E. This scale is considered the typical diatonic scale because it necessitates no sharps or flats to bring about the succession of tones and semitones required to make a complete diatonic scale.

2. The name of one of the major keys, that is, of one of the keys having the interval of a major third, two whole tones, between the first and the third degrees, in this instance D and F. The key of D major necessitates the use of two sharps, C sharp and

F sharp, in the signature to obtain the proper diatonic succession of intervals.

3. The name of one of the minor keys, that is, the name of that key which has D for the keynote or first degree, and has the interval of a minor third, one whole tone and a half tone, between D and F, the first and the third degrees. It is called the relative minor of F major because each requires the use of one flat, B flat, in order to obtain the succession of tones and semitones required to make a complete diatonic scale.

4. The abbreviation of the Italian preposition *da* or *dal*; meaning by, for, from or of.

Dachschweller

Dachschweller (däkh'-schvēl-lēr) Ger. n.

Swell-box; that part of an organ in which the pipes connected with the swell manual are enclosed. See also organ.

dactyl (däk'-tīl) Eng. n. from Grk.

A metrical foot consisting of three syllables or notes, the first long or accented, followed by two short or unaccented thus: — ◡ ◡. The term comes from a Greek word meaning finger and is so called because of its resemblance to a finger, having one long and two short members. A dactyl in music, strictly speaking, is composed of a note followed by two of half its value. For instance, a quarter followed by two eighth notes. Dactylic hexameter, six dactyls to a line, was the heroic verse of the Greeks and Romans, that in which Homer's Iliad and Virgil's Æneid were written. Longfellow imitates heroic verse in Evangeline.

Dactylic dimeter, two dactyls to a line, is appropriate to mourning.

dactylion (däk-tīl'-ī-ōn) Eng. n. from Grk.

A mechanical device invented by Henri Herz, designed to strengthen the fingers and render them independent for piano playing. The apparatus consisted of ten rings, each attached to a steel spring, hanging above the keyboard. See also chiroplast.

daddy-mammy

A name for the roll on the side-drum, used in the United States.

damenisation

A method used by Graun, the Nineteenth Century singer and composer, in vocal exercises, which substituted the syllables da, me, ni, po, tu, la, be, for the notes of the scale.

damper

1. A cushion of layers of felt, numbers of which constitute an important part of the action of a piano. Each damper when at rest is in contact with the strings; when raised by depressing the corresponding key or the damper pedal, it permits the strings to vibrate freely, and when the key or pedal is released, it springs back into contact with the strings, checking their sound. Above a certain note in the treble register of the keyboard, the vibrations cease so quickly that no dampers are needed or used.

2. A mute for a brass instrument.

damper pedal

The right-hand pedal of the piano, often, but misleadingly, called the "loud" pedal. Its proper use is not merely to increase the sound but by means of raising the dampers from the strings, to permit the free vibration of those already sounding. The added sonority of tone is only one of the effects produced by the use of this pedal; it is employed in sustaining harmonies or a single tone and in connecting the successive tones of a melody.

dämpfer (dämp'-fēr) Ger. v.

To deaden the sound of an instrument.

Dämpfer (dämp'-fēr) Ger. n.

A damper, or mute; a piece of mechanism used to muffle the tone of an instrument, such as the violin, piano or horn.

Dämpfung (dämp'-foongh) Ger. n.

Damping, muffling; hence, the entire set of dampers, or the damping mechanism, in the action of a piano.

dance rhythms**dance rhythms**

Since prehistoric times the intimate relation existing between gesture and music has led to the expression of dance rhythms in music, which owes its definiteness of figure and phrase to dancing. The first rhythmic music was that played as an accompaniment for dancing and consisted in the beating of a drum or similar instrument. Dancing was used as an illustration for songs sung or recited. From their connection with dancing popular songs thus obtained a definite rhythm and in turn influenced more serious compositions. This is illustrated by reference to the works of some of the early composers such as Peri, Gagliano, and Lully. The traces of dance rhythms are unmistakable in opera, oratorio, sonata and symphony, and in the modern orchestral symphony there is always at least one dance movement. Probably the waltz has had more influence than any other dance over modern composers. Some of the most important dance movements are: Bolero, Bourree, Chaconne, Cracoviak, Csardas, Fandango, Gavotte, Mazurka, Minuet, Musette, Polka, Polonaise, Saltarello, Sarabande, Tarantella and Waltz. For more detail, see under separate heads.

dancing

Dancing is the moving of the body or feet to the rhythm of music. It is the expression of some emotion or dramatic feeling in gesture, and corresponds to the spontaneous expression of strong emotion in song or exclamation. It belongs to all ages and all nations, and is a primitive instinct of man.

Just as in the early stages of modern civilized races dancing was a practise, so today it is a custom of the insular tribes of the South Sea, of the forest Indians of Brazil, of the natives of Australia and central Africa, and of the Zulus. Ferocious war dances were held among the North American Indians, by which means they were roused to the heights of physical excitement and activity and carried to victory. Into the

dancing

dances of savages the element of magic always enters. Thus certain tribes of Indians dance when the food supply is low; in central Africa the ram-doctor, in time of draught, performs a mystic dance to bring down rain; and the women of the Gold Coast, wishing to aid their husbands, dance war dances during the time of battle.

In every ancient religion dancing was one of the chief acts of worship. Among the Egyptians, who believed dancing the invention of the god Thoth, religious choruses danced and sang on their way to the temples; Greek processions, moving with measured tread, offered hymns of praise to Apollo, leader of the muses, one of whom, Terpsichore, was patroness of the dance; the early Romans honored their gods with songs and dances; the Jew danced in praise of Jehovah; David danced before the ark of God, and later the dancing of Salome cost the head of John the Baptist. Christmas and Easter were celebrated by dancing accompanied by song.

In Spain and in some of the neighboring islands religious dances during Holy Week still continue.

The choral dances of the Christians fell into discredit and were condemned by St. Augustine and other Fathers of the Church who thought promiscuous dancing resulted in great sin. They especially disapproved of the fandango, but when the Sacred College saw it danced, they were so charmed that they gave it their approval.

There is always a close relation between the excellence of a nation's dancing and the excellence of its music and poetry; no country shows this better than Spain, where the national fondness for dancing exercises considerable influence over their music. The song of the Spaniards is full of feeling and expresses deep passion; their love songs and choruses have never been excelled.

In France the rise of chivalry gave a new stimulus to dancing. Catherine de Medici, who had shown the charm of dancing to the Italians, introduced several lively dances of Italy into France, where she made them a special feature of her festivities; she organized allegorical ballets, which had foreshadowed the opera in Italy, and which were the foundation of the opera in France; she raised the char-

dancing

acter of masquerades by associating them with the art of music and dancing. Louis XIV. founded, in 1661, a Royal Academy of Dancing, and during his reign dancing reached its height in France.

Throughout Europe the people still maintain their national dances, which are characteristic of the races and the classes to which they belong. Examples of these are the Scotch Highland-fling, the Irish jig, and the sailor's hornpipe.

dargerson (där'-gür-sön) Eng. n. from Scotch.

A very old English dance which was popular in the reign of Henry VII. In this dance the dancers formed a long line, all the youths at one end and all the maidens at the other. When the dance began the youth nearest the girls turned to the girl at his side and danced with her, then moved on down the line, dancing with each girl in turn, while the other youths followed him, dancing each time with a new partner. Thus each youth danced with each maid and then returned to his original place, dancing his way back again with change of partners at each turn.

In a declamatory style.

declamation

declamazione (dä-klä-mä-ṭsī-ō'-nē) It. n.

This term is applied in several ways; in its broadest sense, to the effective and accurate rendering of words set to music, with especial regard to the concurrence of musical and poetical accent, to enunciation and to expression. In the last named particular, declamation, in the sense of declamatory music, is distinguished from singing in general by the predominance of the dramatic element over the lyric; and in any case implies greater importance in the words than in the accompanying music. Recitative, albeit, confined to certain passages in opera or oratorio, is a form of declamation while the latter in its most distinctive sense is used throughout entire compositions of lesser scope, such as melodramas and bal-

degli

lads for declamation. In these the words are written for the speaking voice accompanied by piano, or more rarely, by orchestra.

declaver (dä-klä-vā') Fr. v.

To change the key; to go out of the key.

dēcomposē (dä-kōñ-pō-zā') Fr. part. and adj.

One of the eight tones constituting a major or minor scale, used ordinarily with reference to the position of a given tone in a given scale.

2. One of the lines or spaces of the staff.

3. An interval between two notes as indicated by their position on the staff.

degree, conjunct

A degree which comprises two adjacent notes, i. e., two notes, one of which is on a line of the staff, the other on the space below or above, or vice versa. The adjunct degree forms the interval of a second, or a degree which comprises two notes in juxtaposition on the staff, forming the interval of a second.

degree, disjunct

A degree which comprises two notes separated on the staff by a third of any larger interval.

degree, half

A half tone; a semitone.

degrees in music

Universities in America, Great Britain and Ireland confer two degrees in music, the higher being Doctor of Music, and the lower, Bachelor of Music; the latter usually preceding the former, although Doctor of Music is frequently conferred as an honorary degree. In England these degrees are obtained by examination, and a third degree, Master of Music, between the two mentioned, is now conferred by the University of Cambridge, tracing its origin to the act of some Spanish universities in the Thirteenth Century. In Germany the degree of Doctor of Music is, in rare cases, conferred as honorary on eminent musicians, but the degree more frequently conferred, in such cases as those of Mendelssohn and Schumann, was that of Doctor of Philosophy. This degree has also been obtained by examination from various German universities, but as considerable learning in other scientific branches and in literature, as well as musical theory, is required to pass such a test, it is bestowed infrequently enough to be a real honor to those who receive it.

Dehnung (dä'-noongk) Ger. n.

Extension; prolongation; expansion.

dehnungsstrich (dä' - noongs - strikh)

Ger. n.

A term in vocal music, applied to a

deux fois (dü fwä) Fr.

Two times; twice.

deux temps (dü-tāñ) Fr.

Literally, two-time. The two-step, a quick dance written in six-eight time, three steps being taken to the measure, in which it resembles the waltz, although the rhythm is different. The accent is the same as in the waltz and is the only difficult part of the dance. The *deux temps* is sometimes called the *ignoramus waltz* because of its name "two-time," when the dance is three-time, and because of the simplicity of the movements.

deuxième fois (düz-yĕm fwä) Fr.

The second time.

deuxieme position (düz-yäm pō-zĕs-yōñ') Fr.

The second position of the hand in playing the violin and other related instruments; also called the half shift. development

In a composition of well defined form, such as the sonata, symphony or fugue, the term development is used in two closely related senses: as a general name for the movement which follows the statement of the first and second themes, and which is based upon them; and also as the working out of these themes by varying the rhythm, the harmony, or the melody, by expansion, contraction and modulation, within certain limits.

devoto (dä-vō'-tō) It. adj.

Literally, devout, devoted, pious.

devozione (dä-vō-tsi-ō'-nĕ) It. n.

Devotion: *con devozione*, with devotion, with devotional feeling.

diadrom (dī'-ä-dröm) Grk. n.

Tremulance or variation of chords: a fluttering effect produced by the rapid reiteration of a tone or sound.

diagonal bellows

An old variety of organ bellows, with the top hinged at one side, forming, when open, an acute angle with the bottom. As one bellows never supplied enough wind, at least two were required for every organ, some large instruments, notably the St. Sulpice organ in Paris, having as many as fourteen. In the modern organ, the slanting form has been replaced by the horizontal bellows.

diagonal stroke

A heavy oblique stroke, with one dot above the lower end and another below the upper end, placed across the middle or latter part of a measure. It is an abbreviation signifying the repetition of either the preceding measure, or the previous group of notes in the same measure.

diagramma (dī'-ä-gräm'-mä) Grk. n.

A diagram.

1. The old Greek scale of fifteen tones; also the division of same into tetrachords, with their nomenclature. The tetrachord was the unit of analysis in ancient Greek music, just as the octave is in modern. It was a diatonic series of four tones, that is, a series confined to the tones of one key with no sharps, flats, or naturals belonging to another key. There were three varieties of tetrachords, differing from each other in the position of the semitone. These were: the Dorian, which had the semitone at the bottom, the Phrygian in the middle and the Lydian at the top. The Dorian was the standard. Greek scales were made by adding tetrachords together. The Greek system of tones when completed included two octaves extending upward from a tone almost equal to the modern second A below middle C. The tones of this system were included among five tetrachords, called: extreme, disjunct, conjunct, middle and lower.

diapason, open

2. In early music, the staff and the signature.

3. A score or part of same.

dialogo (dē-ä-lō'-gō) It. n.

dialogue (dē-ä-lōg') Fr. n.

A dialogue: a musical composition in which two voices, two instruments, two choruses or two groups of instruments are sounding, at times in response to each other and at other times together, as in a duet or duo; terms more commonly used for the dialogue for two single voices or instruments.

diamond-shaped notes.

diana (dē-ä'-nä) It. n.

diane (dē-än') Fr. n.

The reveille, or morning signal of drum-beats, played to rouse the soldiers from sleep.

diapase (dī-ä-pā'-sē) Grk. n.

Diapason.

diapason (dī-ä-pā'-zön) Eng. n. from Grk.

1. The entire octave.

2. The English name for a class of organ stops, called by other European nations principal. They are fundamental stops of the organ, that is, the foundation, the stops which give it the tone distinguishing it from all other instruments. The lowest tone of fundamental stops is two octaves below middle C.

3. A rule or scale used by makers of wind instruments, such as flutes and organ pipes, to gauge their size.

4. The compass of a voice or instrument, that is, the total range or number of notes which a voice or instrument is capable of producing.

5. Fixed or absolute pitch; normal diapason, a recognized standard of pitch known as international pitch, adopted by the Vienna Congress in 1877, in which a', A on the second space of the treble clef has four hundred and thirty-five double vibrations per second. In this connection the term is applied to the tuning fork. Abbr. diap.

diapason, bis (bis) Lat.

Twice through an octave; double octave.

diapason, open

Those foundation stops of the organ producing the typical organ tone. They are composed of metal pipes

diapason, open

open at the top. Their tone is full and rich and the lower extreme of their compass is usually the second C below middle C, unless they are connected with the pedals, when they are an octave lower. When there are two or more diapason stops connected with one keyboard the pipes differ in diameter and a variation in the power of their sound is thus created.

diapason, stopped

Those foundation stops of the organ producing the typical organ tone and composed of pipes which are closed at the top and are usually of wood, although the treble pipes are sometimes of metal. These two characteristics cause them to produce a less brilliant tone which has been designated as soft and flute-like. The fact that the pipes are covered at the top does not lower the pitch, but the pipes are shorter and the second C below the middle C remains the lowest tone unless the stops are connected with the pedals, when they are pitched an octave lower.

diapente (di-ä-pën'-tē) Eng. from Lat.

The interval of a perfect fifth; that is, three and a half steps.

diapente col ditono (di-ä-pën'-tē) Eng. from Lat.; (köl dē tō'-nō) It.

An interval of a perfect fifth plus a third; a major seventh which consists of eleven half steps.

diapente col semiditono (di-ä-pën'-tē) Eng. from Lat.; (köl sã-mē-dē-tō'-nō) It.

The interval of a perfect fifth with a minor third; a minor seventh or interval of ten half steps.

diapente cum semitono (di-ä-pën'-tē kũm sēm-ĩ-tō'-nō) Lat.

The interval of a fifth plus a half tone: a minor sixth; an interval of eight half steps or four whole steps in the scale.

diapente cum tono (di-ä-pën'-tē kũm tō'-nō) Lat.

The interval of a fifth or three and a half tones, plus a whole tone; the same as a major sixth.

diapentisare (di-ä-pën-tĩ-sã'-rē) Lat.

1. To discant, or modulate, at the interval of a fifth, or three and a half tones; also, in French usage, to discant at the intervals of a second, or interval of two whole tones; sixth, or interval of nine half steps, and seventh, or interval of eleven half steps.

diaschisma

2. To proceed by fifths in tuning a piano.

3. To build up progressions of fifths.

diaphone (dĩ-ä-fõn) from Grk.

The name of an organ stop invented a few years ago by Hope-Jones. Below the sound board, under the foot of each pipe is a box through which the wind must pass before entering the pipe. In the box is fitted a small bellows connected with the pallet covering the opening of the pipe by a spring holding the pallet open. When the wind is directed against the pipe the bellows is filled and distended, forcing the pallet shut. However, the air is immediately exhausted and the bellows close allowing the air to enter the pipe. This action is rapidly repeated, producing an undulating or tremulous tone which is effective in loud passages.

diaphonia (dĩ-ä-fõ'-nĩ'-nĩ-ä) Grk. n.

The Greek term for dissonance; the opposite of symphonia, symphony or consonance. The Anglicized and more common form of the word is diaphony, which see.

diaphonics (dĩ-ä-fõn'-ĩks) Eng. n.

from Grk.

The science of the refraction of sound.

diaphony (dĩ-äf'-õ-nĩ) Eng. n. from Grk.

The Anglicized form of the Greek word diaphonia, dissonance, the opposite of symphonia, consonance. From being applied to discordant sounds, the term came to include the earliest attempts at two-part counterpoint, also called organum, which was a crude form of music for two voices, consisting of tones in parallel motion, the lower part usually written four or five tones below the upper, progressions now considered violations of the rules of harmony. Later the word was applied to discant in its early stages, that is, one of the first forms of counterpoint, adding one or two parts to a melody usually by improvisation. Some writers consider the Latin word discantus merely an equivalent for the Greek diaphonia.

diaplasion (dĩ-ä-plã'-shũn) Eng. n. from Lat.

A large piano with two keyboards placed opposite each other; a vis-a-vis.

diaschisma (dĩ-ä-skĩz'-mä) Eng. n. from Grk.

1. In ancient Greek music, a minute interval whose size is variously given.

dichorus

syllables or notes, the first and third of which are long, the second and fourth short, thus, — ◡ — ◡. It is the equivalent of two chorees or trochees and is also called ditrochee or ditrochaeus.

dichten (dikh'-tĕn) Ger. v.

To compose verse: used, apparently, of such musical invention as that of the old minstrels or minnesingers.

dictation

dictĕe musicale (dĕk-tă mŭ-zĕ-kăl')

Fr.

Musical dictation: the act of singing or playing certain notes to be written by the hearer. This is a part of the modern methods of ear-training.

Die Wacht am Rhein (dĕ văkht äm rĭn) Ger.

The Watch on the Rhine: one of Germany's most popular national songs. The words were written in 1840 by Max Schneckenburger and have been set to music by various composers, the present form being by Carl Wilhelm of Schmalkalden. It attained wide-spread popularity on the breaking out of the Franco-Prussian War and exerted a great influence over the soldiers. Emperor William gave Wilhelm a pension of \$750 a year.

diecetto (dĕ-ă-chĕt'-tō) It. n.

A piece of music written for ten instruments.

dies irae (dĭ'-ĕz ĭ'-rĕ) Lat.

Literally, Day of Wrath: a great production of the Thirteenth Century attributed to Thomas of Celano. It is the sequence or hymn following the Gradual in requiems, or masses for the dead, and constitutes the second movement. On account of the various emotions revealed in the poem it has been the subject of numerous musical compositions by many eminent composers.

diesare (dĕ-ă-ză'-rĕ) It. v.

Equivalent to *dieser* (Fr.).

diĕsĕe, note (nôt dĕ-ĕ-ză') Fr.

Literally, a note raised half a tone: a note marked with a sharp.

diĕser (dĕ-ă-ză') Fr. v.

To sharp; to raise a tone from lower to higher pitch.

diesis (dĭ'-ĕ-sĭs) Eng. n. from Grk.

In ancient Greek music the name of a semitone, or *limma*, according to Pythagoras; also the name of a quarter-tone, used by Aristotle as the unit

Differenzen

among musical intervals. In modern acoustics it is applied to the interval representing the difference between a major semitone and minor semitone, or between the octave and three perfect thirds, which constitute its equivalent in practical music. It is also used in France to designate the sharp, *diese*.

diesis chromatica (dĭ'-ĕ-sĭs krō-măt'-ĭ-kă) Grk.

The third part of a tone.

diesis enharmonica (dĭ'-ĕ-sĭs ĕn-hăr-mōn'-ĭ-kă) Grk.

A quarter tone; any fraction of a tone less than a half tone; for instance, the interval representing the difference between C sharp and D flat on the violin. This is called an *enharmonic interval* because on instruments like the piano any part of a tone smaller than a half tone is ignored, and C sharp and D flat are represented on the keyboard by the same key or note.

diesis magna (măg'-nă dĭ'-ĕ-sĭs) Lat.

A half tone; a semitone.

diezeugmenon (dĭ-ĕ-zoog'-mĕ-nōn)

Eng. n. from Grk.

Disjoined tetrachord: a term in old Greek music applied to tetrachords in the same scale, separated from each other by a degree; the same as *disjunct tetrachord*.

diff (dĕff) Turk. n.

An instrument similar to the *tambourine*.

difference tones

1. A tone produced by the simultaneous sounding of two independent tones whose vibrations are nearly the same in number, the number of vibrations in the new tone being equal to the difference of the respective numbers of vibrations.

2. A resultant or secondary tone whose vibrations are numerically equal to the difference between the respective numbers of vibrations of two primary or independent tones sounded at the same time.

differēntiale (dĭf-ĕ-rĕn-shĭ-ă'-lĕ) Lat. n.

Differenzen (dĭf-fĕr-ĕn'-tsĕu) Ger. n.

A term given in the Gregorian Psalm singing of the Middle Ages to the different possible cadences of *Saeculorum Amen*, or the closing words of the *Gloria Patri*, which is generally added to the singing of the psalms in the Roman Catholic Church.

digital

digital

From the Latin *digitus*, finger.

1. (n.) A key for the finger, and key on the piano or organ keyboard; as distinguished from a pedal or key for the foot.

2. (adj.) Relating to or for, the fingers; as digital exercises, finger exercises.

digital exercises

Digital exercises: literally, finger exercises, or those designated to develop the independent power of each separate finger.

digitorium (dij-ĭ-tō'-rī-ŭm) Eng. n. from Lat.

A small dumb keyboard instrument having five keys attached to metal springs for the mechanical exercise of the fingers.

dignata, nota (nō'-tä dĭg-nä'-tä) Lat.

A note marked with a sign.

dignita (dēn-yĭ-tä') It. n.

dignitate (dēn-yĭ-tä'-tĕ) It. n.

Dignity, grandeur.

digressing

Literally, deviating: an intentional lapse from one key into another, followed by a return to the first key.

digressione (dē-grĕs-sĭ-ō'-nĕ) It. n.

A digression: an episode in a musical composition.

diiambus (dī-ĭ-ām'-bŭs) Lat. n.

A metrical foot composed of four syllables or notes, the second and fourth of which are long, the first and third short, thus, \cup — \cup —. It is composed of two iambic feet.

dilettante (dē-lĕt-tän'-tĕ) It. n.

An amateur; a dabbler in some art, such as music. The term dilettante often implies a more superficial attitude than is meant by the word amateur.

dilettoamente (dē-lĕt-tō-sä-mĕn'-tĕ)

It. adv.

Delightfully, agreeably.

dilicatamente (dē-lĭ-kä-tä-mĕn'-tĕ) It. adv.

Delicately, gently. Obsolete form of *delicato*.

dilicato (dē-lĭ-kä'-tō) It. adj.

Delicate; soft. Obsolete form of *delicato*.

diligenza (dē-lĭ-jĕn'-tsä) It. n.

Diligence: con *diligenza*, diligently, with diligence.

diludium (dī-lŭ'-dĭ-ŭm) Lat. n.

An instrumental strain or passage connecting two other parts, especially in chords. The equivalent of *intermezzo* and *interlude*.

diminished sixth

diluendo (dē-loo-ĕn'-dō) It. part. and adj.

From the Italian verb, *diluire*, to dilute: gradually weakening in sound; dying away.

dimeter

A measure divisible into two feet; a period made up of two feet. A line of poetry, containing two metrical feet.

diminished

Made smaller; contracted: the term is used primarily of intervals which are a semitone smaller than the corresponding major or perfect intervals, and also of the chords built up of such intervals. It is also used in the form of imitation called diminished imitation, or diminution, in which the duration of time the notes are held is shortened.

diminished chords

A diminished chord is one smaller than a major or a minor chord of the same denomination. A chord which has an interval lessened by a half tone between its highest and lowest notes.

diminished fifth

An imperfect fifth; a fifth smaller by a semitone than a perfect fifth; an interval of three whole tones; a perfect fifth diminished by sharp, flat or natural.

diminished fourth

An interval composed of a whole tone and two half tones: a fourth smaller by a semitone than a perfect fourth.

diminished imitation

In counterpoint, the repetition of a subject or theme in notes corresponding melodically to the first statement, but shorter in relative time-value; diminution. Notes so lessened were usually shortened to half the length of the original theme.

diminished intervals

Intervals a half tone less than the corresponding major or minor intervals; major or minor intervals lessened a half tone by sharp, flat or natural.

diminished octave

An interval smaller by a semitone than a perfect octave.

diminished seventh

An interval smaller by a semitone than a minor seventh; that is, an interval of nine half steps.

diminished sixth

An interval smaller by a semitone than a minor sixth, an interval of

diminished sixth

seven half steps; a minor sixth lessened a half tone by sharp, flat or natural.

diminished third

An interval a semitone less than a minor third; an interval of two half steps; a minor third lessened a half tone by sharp, flat or natural.

diminished triad

A three-tone chord containing an interval of a minor third plus an interval of an imperfect or diminished fifth, or interval of two whole and two half tones.

diminuë (dē-mē-nū-ā') Fr. part. and adj.

Diminished.

diminuendo (dē-mě-noo-ën'-dō) It. part. and adj.

Diminishing gradually in power of tone. Abbr. dim.

diminuendo molto (dē-mě-noo-ën'-dō mōl'-tō) It.

Greatly diminishing in power: the term signifies a somewhat more rapid change from loud to soft than **diminuendo** alone.

diminution (dē-mē-nūs-yōn') Fr. n.

See diminished imitation.

din-din

A name applied to cymbals used by the Hindus. It probably attempts to imitate the sound made by the instruments.

d'inganno (d'ēn-gān'-nō) It.

Literally, a deceit, a blunder, an oversight; musically, an unexpected close or ending.

dioxia (dī-ōk'-sī-ä) Eng. n. from Grk.

The interval of a fifth; the fifth tone.

dip

The key-fall; the extent to which a key, either of the piano or organ keyboard, or of the organ pedals, responds to pressure.

diphonium (dī-fō'-nī-ŭm) Lat. n.

A duet for voices.

diple (dī'-plē) Eng. n. from Grk.

This was a Greek dance of very gay measure, the dancers singing to very lively music. Time-keepers, whose business it was to beat the time and to direct the rhythm of the music, added to the musical accompaniment by clinking shells together, much as the Spaniards use castanets, and by beating the ground with the soles of their sandals. These sandals were of wood or iron and the thickness of the soles differed according to the effects which the time-keeper was to produce.

disallowed octaves**direct**

1. The sign placed at the end of a staff to indicate the pitch of the next **w**, **w** or **✓** note. It is also used in German music as a mark of continuation, like etc. in ordinary language.

2. (v.) To conduct.

direct intervals

Intervals computed upward from the fundamental tone.

direct motion

Parallel motion: the melodic progression of two voice parts is direct, when both follow the same direction, up or down. Same as similar motion.

direct turn

A musical embellishment played or sung as four notes; the principal note, which is sounded twice, being the only one written, while the sign of the turn, placed above this note, or at one side, indicates the higher and lower auxiliary notes. A chromatic sign over or under this sign affects the higher or lower auxiliary note respectively.

directeur (dē-rĕk-tŭr') Fr. n.

direttore (dē-rĕt-tō'-rĕ) It. n.

A director; a conductor of a chorus, orchestra, or other musical organization.

dirge

A piece of vocal or instrumental music composed for performance at funerals or memorial occasions.

diritto (dē-rĭt'-tō) It. adj.

Direct, straight: progressing by direct motion.

dirizzatore (dē-rĭt-tsä-tō'-rĕ) It. n.

A director.

Dis (dēs) Ger. n.

The note D sharp.

Dis dis (dēs dēs) Ger.

D double sharp.

Dis dur (dēs door) Ger.

The key of D sharp major; not in use.

Dis moll (dēs mōl) Ger.

The key of D sharp minor.

disaccentato (dĕz-ät-chĕn-tä'-tō) It. adj.

Unaccented.

disallowance

An irregular chord progression; one contrary to the rules of harmony, such as consecutive fifths.

disallowed octaves

In part-music consecutive octaves are forbidden by the laws of harmony, except in cases where they are used to emphasize a melodic phrase;

the composer or the leading performer of a piece.

dizdiapason (dīs-dī-ä-pā'-zōn) Eng. n. from Grk.

A double octave; the interval of a fifteenth.

disemic proceleusmatic (dī-sē'-mīk prōs-ē-lūs-māt-ik) Eng. from Grk.

A metrical foot composed of two short syllables or notes, thus $\cup \cup$. It is usually called pyrrhic, and is half of a proceleusmatic, $\cup \cup \cup \cup$.

Disharmonie (dēs-här-mō-nē') Ger. n. Lack or harmony; discordance.

disharmonisch (dēs-här-mō'-nīsh) Ger. adj.

Inharmonious; discordant.

disinvolto (dēs-īn-vōl'-tō) It. adj.

Free, unhampered, easy.

disinvoltura (dēs-īn-vōl-too'-rā) It. n.

Grace, ease, freedom; con disinvoltura, gracefully, naturally.

Disis (dēs-ēs) Ger. n.

D double sharp. Same as dis-dis.

disjunct

Disjoined; separated.

disjunct succession

A succession of sounds progressing by skips, the interval between any two of the notes being greater than a second.

disjunct tetrachords

Disjoined; separated. Disjunct tetrachords, in ancient Greek music, were those in which the highest sound of the lower tetrachord, group of four tones, was a degree below the lowest sound of the upper tetrachord, in contradistinction to conjunct, or overlapping tetrachords.

Diskant (dēs-känt) Ger. n.

Equivalent to discant.

Diskantgeige (dēs-känt-gī'-gě) Ger. n.

The violin; the treble or soprano of the group of stringed instruments; an obsolete term.

Diskantist (dēs-känt-ēst') Ger. n.

A soprano singer: same as discantist.

Diskantregister (dēs'-känt-rā-gīs'-těr) Ger. n.

A term in organ music, designating a stop with treble pipes only, sounding when played from the upper half of the keyboard. Such stops are also called Halbe-Stimmen (Ger.), or half stops.

Diskantsaite (dēs'-känt-zī'-tě) Ger. n. Treble string.

Diskantsänger (dēs'-känt-zěng'-ěr) Ger. n.

A treble or soprano singer.

dissonance

Diskantschlüssel (dēs'-känt-shlīs'-sěl)

Ger. n.

Same as discantschlüssel.

Diskantstimme (dēs'-känt-shtīm'-mē)

Ger. n.

Same as Diskantregister.

disparte (dēs-pär'-tě) It. adv.

Apart, aside, separately.

disperato (dēs-pě-rā'-tō) It. adj.

Desperate, despairing.

disperazione (dīs-pě-rā-tsr-ō'-nē) It. n.

Desperation, hopelessness: con disperazione, despairingly, in a manner expressive of despair.

dispersed harmony

Extended or scattered harmony: dispersed or extended harmony is that in which the notes composing a chord are so far apart that the upper three parts, treble, alto and tenor, exceed an octave in compass; and between any two of the parts of a chord in dispersed harmony there is space for the insertion of some one of the notes belonging to that chord.

dispersed position

Said of chords when the notes comprising them are far apart and extend beyond an octave. Also called open position.

dispondeè (dī-spōn'-dē) Eng. n. from Grk.

A metrical foot composed of four long syllables or notes, thus: — — — —. It is the equivalent of two spondees.

disposition

The arrangement of the notes of a chord with respect to the intervals separating them; of the various parts of a score, of an orchestra, or of a chorus; and of the stops, couplers, normals, and other parts of the mechanism of an organ. In the last case, the term is applied rather to the estimate of the cost of the instrument than to the enumeration of its parts with regard to their effectiveness, the latter being termed more properly the specification.

dissonance

1. In acoustics, a combination of tones whose respective groups of vibrations will not blend, but produce an alternate increase and decrease in the power of the sound, which effect is called beats; this is the primary cause of the disquieting sensation produced in the ear by such a combination.

2. A discord; the two terms are often used interchangeably. See also discord.

dissonance

3. An inharmonious combination of sounds which produce the effect of unrest and which must be resolved into a chord having an agreeable and complete or final effect. Equivalent to *dissonanz* (Ger.), *dissonanza* (It.).

dissonant

Disagreeing, discordant. A dissonant note in a chord is the one that produces the effect of disagreement. A chord may be concordant or agreeable to the ear in all its parts but one; that one is the dissonant note.

dissonant chords

Dissonances: chords requiring resolution. See also *dissonance*.

dissonant sixths

When the sixth is diminished or augmented by a half tone its highest and lowest notes sounded together are inharmonious or dissonant: therefore diminished or augmented sixths are called dissonant sixths.

Dissonanz (dīs-sō-nānts') Ger. n.

A discord; an inharmonious combination of sounds. See also *dissonance*.

dissonanza (dīs-sō-nān'-tsä) It. n.

A discord, an inharmonious combination of sounds. See also *dissonance*.

dissonare (dīs-sō-nä'-rě) It. v.

dissoner (dēs-sō-nä') Fr. v.

dissoniren (dīs-sō-nē'-rěn) Ger. v.

To sound discordantly; to be out of tune.

distance

A term used, rarely, instead of interval.

distanza (dēs-tän'-tsä) It. n.

Same as *distance*.

distinctio (dīs-tīngk'-shī-ō) Lat. n.

Literally, in rhetoric and grammar a separation, or division; a mark of separation; a stop or point, hence a pause; a break; a term used in the Gregorian chants to indicate the divisions between phrases, allowing the singer to take breath.

distinctio tonorum (dīs-tīngk'-shī-ō tō-nō'-rūm) Lat.

Same as *distinctio*.

distintamente (dīs-tēn-tä-měn'-tě) It. adv.

Distinctly, clearly.

distinto (dīs-tēn'-tō) It. adj.

Clear, distinct.

distonare (dēs-tō-nä'-rě) It. v.

distoniren (dīs-tō-nē'-rěn) Ger. v.

To play or sing out of tune.

dital

From the Italian, *dito*, finger. A key for the finger, which, when pressed,

diverbio

sharpens the pitch of the string which it controls; used on the guitar and the lute.

dital harp

A chromatic instrument akin to the lute and shaped like a guitar, having from twelve to eighteen strings, each furnished with a dital.

diteggiatura (dē-těd-jä-too'-rä) It. n. Fingering.

dithyramb (dīth'-ī-rāmb)

1. In ancient Greek music a hymn in honor of Bacchus, god of wine, of a rhapsodical character, ranging from enthusiasm to wildness, and extremely irregular in form, having no two stanzas alike.

2. A Greek dance in honor of their god Bacchus. A degenerate dance little better than a drunken revel. No dithyramb was considered a success unless the dancers generally, and the leader especially, had drunken freely of wine; in fact it was considered very poor taste to be sober during the dance. Through the efforts of the poet Arion much of the shamelessness of this dance was discarded, and it became a respectable dance, performed by a chorus of about fifty well-trained dancers, dancing in orderly figures around the blazing altar of Bacchus.

dito grosso (dē'-tō-grōs'-sō) It.

Literally, great finger: the thumb.

dition (dē-tōñ') Fr. n.

ditone (dī'-tōn) Eng. n.

ditono (dē-tō'-nō) It. n.

ditonus (dī-tō'-nūs) Lat. n.

Of two parts, or tones. A discordant interval, used in ancient Greek music, and known as the Pythagorean major third. It contains two major tones, greater whole tones, thus being larger than the usual major third of a major and minor tone.

ditrochaeus (dī-trō-kē'-ūs) Lat. n.

ditrochee (dī-trō'-kē) Eng. n. from Grk.

A metrical foot composed of four syllables or notes, the first and third of which are long, the second and fourth short, thus — ◡ — ◡. It is the equivalent of two trochees or chorees and is also called *dichoree* or *dichorus*.

diverbia (dī-vēr'-bī-ä) Lat. n.

diverbio (dē-vär'-bē-ō) It. n.

Words apart. Dialogue in two parts. A musical dialogue, introduced as an episode into the drama of ancient times.

divertimento

divertimento (dē-vēr-tē-měn'-tō) It. n.

1. A musical diversion; a series of songs or dances inserted in operas and plays.

2. In fugue, an episode.

Equivalent to divertissement.

divertissement (dē-vēr'-tēs-māñ) Fr.

1. A musical diversion; a series of songs or dances inserted in operas and plays.

2. In fugue, an episode.

Equivalent to divertimento.

divide

To run a division; to execute a division, or elaborate series of notes, which, in vocal music, were intended to be sung to one syllable. See also division.

divided accompaniment

Accompaniment in which the intervals are taken by both hands. A simple instance of this is seen in certain church hymns where the tenor and bass are too far apart for the left hand to play both parts; the tenor part is therefore played by the right hand.

divided stops

A divided stop is one in which the treble and bass are brought into use by two separate drawstops. For the sake of economy, the bass portion of some divided stops is used with another treble stop of limited compass.

divisi (dē-vē'-zē) It. adj.

A term used in orchestral scores, where parts for two different instruments are written on the same stave, indicating the separate performance of such passages. Where the instruments are expected to play in unison again, the score is marked, a due, meaning for two. Abbr. div.

divisio modi (dī-vīzh'-ī-ō mō'-dī) Lat.

A point used as a sign of separation, equivalent to the modern bar; now obsolete.

division

1. The separation of an octave into intervals.

2. In Seventeenth and Eighteenth Century music, a rapid vocal or instrumental passage, considered as a dividing of slow notes into fast ones. The term was applied to a variation, but more especially to such coloratura effects as are frequently found in Handel's oratorios; florid passages to be sung in one breath to a single syllable.

3. (Fr.) A double bar.

do maggiore

division du temps (dē - vēr - yōñ dü tāñ) Fr.

1. Division of time strokes or beats.

2. A time table; a list of the several notes in music showing their relative lengths or durations.

division mark

The slur with its attendant figure used in designating the triplet, or other groups of notes, to be played in the time of a group of different number in the regular rhythm of the composition; such as three in the time of two, or five in the time of four.

division-viol

1. A violin having frets upon the fingerboard.

2. The viol da gamba.

Dixie

A song written as a "walk around" by Dan Emmett, an Ohioan, and first sung at Dan Bryant's minstrel show on Broadway, N. Y., a year or two before the Civil War. It was sung by both armies during the war, but particularly by the Confederates, and was regarded by them as their national song.

dixième (dēz-yām') Fr. n.

The interval of a tenth, that is, an interval of an octave plus a third; an octave plus two whole tones.

do (dō) It. n.

The Italian name for the first of the syllables used in naming the tones of the scale. In the Aretinian system ut was used instead of do, and this is still the name applied in France. The change from ut to do dates from the Seventeenth Century. In the fixed do system, do always stands for C. In the movable do system it is the first tone of any major scale. It is spelled doh in the Tonic Sol-fa system.

do bemolle (dō bā-mōl'-lē) It.

The note C flat.

do bemolle maggiore (dō bā-mōl'-lē mäd-jōr'-ē)

The key of C flat major.

do diesis (dō dē-ā'-sīs) It.

The note C sharp.

do diesis maggiore (dō dē-ā'-sīs mäd-jō'-rē) It.

The key of C sharp major.

do diesis minore (dō dē-ā'-sīs mē-nō'-rē) It.

The key of C sharp minor.

do maggiore (dō mäd-jō'-rē) It.

The key of C major.

A cathedral choir.

dominant

1. The fifth note, or degree, of any major or minor scale, counting upward from the keynote; also, the related key having the dominant as

dominant section

its keynote: e. g., the note G is the dominant in the scale of C, and the key of G, as related to the key of C, is the key of the dominant; which is so called because, to ascertain the key of a passage, some chord must have this note for its root, or foundation note. The dominant is second in importance only to the tonic, or keynote; and the chord of the dominant seventh, based upon this tone as its root, ordinarily determines the key of the passage in which this chord occurs. It is of especial importance in the formation of cadences, because here the keynote must be clearly marked; and its tendency to dominate the other notes in the common chord is so strong that writers for orchestra make it a point to assign other notes in that chord to more of the instruments than they give the dominant. In fugues, when the subject begins with the keynote the answer begins with the dominant, and the reverse. In the sonata, the second subject formerly began with the dominant in almost every instance; and this alteration of keynote with dominant is noticeable in many other kinds of musical composition.

2. In the Gregorian modes, the note on which the chant or recitative is sung. The Gregorian chant was divided into five parts: the intonation, the first reciting note or dominant, the mediation, the second reciting note or dominant and the ending. Every verse of a canticle began with an intonation, but only the first verse of a psalm. The remainder was divided so that all the rest was recited on the dominants except as much as would have one syllable to each note of the mediation and ending.

dominant chord

A three-tone chord built on the dominant or fifth note of the scale; also, the chord of the seventh, or four-tone chord, built on the dominant, and consisting of that as its first note, plus other notes at intervals of a third, a fifth and a seventh.

dominant harmony

Harmony based on the dominant, or fifth note of the scale.

dominant section

A section of a movement written in the key built on the dominant or fifth note of the scale placed between two other sections in the key built on the tonic or first note.

 Double bombard: a huge bass instrument of the bassoon family, over ten feet long, used in the Sixteenth Century.
Doppelrohrflöte (dôp'-ěl-rôr-flā'-tě) Ger. n.
 Literally, double reed flute: an organ stop composed of flue pipes covered at the top. The name reed is derived from the tube or reed passing through the cover of the pipe; thus, adding a piercing quality to the tone, which nevertheless, bears no resemblance to that of the reed-stops. Each pipe is furnished with two mouths, hence "double." In various organs the pitch differs; the stop may have as its lowest tone either the first, second or third octave below middle C.
Doppelschlagg (dôpl'-shlāg) Ger. n.
 Double beat; a turn.
Doppelschritt (dôpl'-shrit) Ger. n.
 Literally, double step; a quick march.
doppelt gestrichene Note (dôp'-plt gě-strīkh-ěn-ě nō'-tě) Ger.
 Literally, a note doubly marked with a stroke: a double stroked note. A semiquaver, or sixteenth note.

A double lyre.

doppio movimento (dôp'-pë-ô mō-vë-mën'-tō) It.

Double movement, e. g., twice as fast as the movement preceding the one so marked.

doppio pedale (dôp'-pî-ô pë-dä'-lë) It.

Double pedal, a term in organ music directing to play the pedal part in octaves. Abbr. dopp. ped.

doppio tempo (dôp'-pî-ô tēm'-pō) It.

Double time; twice as fast as the time preceding the part so marked.

dopple Be (dôp'l bā) Ger.

A double flat (bb). Also written doppel B.

Dorian (dō'-rî-än) Eng. adj. from Grk.

1. Name applied to ancient Greek mode of

this form: e'—d'—c'—b—+—a—g—f—e

—indicates a whole step; ∩ indicates a half step; — connects the tones forming a tetrachord, or group of four tones; + indicates the location of the diazeuxis, or tone separating the tetrachords.

2. Dorian was also the name of the Greek transposition scale beginning on d, embracing two octaves and formed from five tetrachords.

3. In medieval church music Dorian was the name of the first authentic mode, the authentic modes being those which began on the final or keynote. Its range was from d to d'.

Same as Dorian.

dossologia (dôs-sō-lō'-jä) It. n.

Doxology.

dot

1. A point, placed after a note or rest, which prolongs the duration of the note or rest by half of its original value. Each additional dot in-

creases the note or rest by half the length of the dot preceding it, e. g.,

$\text{J}.. = \text{J} \text{J} \text{J}$ or $\text{J}... = \text{J} \text{J} \text{J} \text{J}$

$\text{J}... = \text{J} \text{J} \text{J} \text{J}$

or $\text{J}... = \text{J} \text{J} \text{J} \text{J}$

2. A point placed below or above a note to indicate it is to be executed staccato.

A series of dots together with a slur indicate that the notes so marked are to be rendered mezzo staccato, i. e., detached, but not so short as staccato. See also mezzo staccato.

dotted touch

a breve rest. In tablature for wind instruments vertical rows of dots were placed on a staff instead of notes, the number of dots in each row corresponding to the number of holes which had to be stopped to produce the tones intended.

dotted double bar

A double bar with dots, placed either before, after or on both sides of it, indicating a repetition of the music on the corresponding side or sides of the

double bar.

dotted semibreve

A semibreve the duration of which is prolonged by a dot or dots.

dotted touch

An old term signifying a strict accuracy in the playing of passages containing dotted notes, and which

creases the note or rest by half the length of the dot preceding it, e. g.,

$\text{J}.. = \text{J} \text{J} \text{J}$ or $\text{J}... = \text{J} \text{J} \text{J} \text{J}$

double-bassoon

double-bassoon

The largest instrument of the bassoon class, an octave in pitch below the bassoon. The older instruments, being unwieldy, were discarded from the orchestra for some years; the later models are curved several times for convenience in handling. The orchestral double bassoon is of wood, but a more powerful one of brass is now used in military bands. Music for this instrument, as for the double-bass, is written an octave higher than played. It is often called by its Italian name, *contra-fagotta*.

double bémol (doo-bl bā-mül') Fr.

Double flat.

double C or CC

The C two octaves below the C on the second space of the bass staff. In English organ music, double C is the C an octave higher, the C on the second added line below the bass staff. See also double letters.

double chant

A chant equivalent in length to two single chants.

double corde (doo-bl kôrd) Fr.

Double stopping: playing at the same time upon two strings of an instrument such as the violin.

double counterpoint

Counterpoint in which the higher part and the lower may exchange places and still remain effective.

double croche (doo-bl krôsh) Fr.

Double hooked; a semiquaver, or sixteenth note.

double demisemiquaver

A note equivalent to half of a demisemiquaver; a sixty-fourth note.

double descant

See double discant.

double diapason

The term double, signifies an octave below, consequently those foundation organ stops giving the typical organ tone which have as their lowest tone the third C below middle C, an octave below the ordinary diapason. If the stops are connected with the pedal keyboard the lowest tone is four octaves below middle C, the lowest pitch of the organ, or in fact, of any musical instrument, and an octave below the ordinary diapasons connected with the pedals.

double dièse (doo-bl dē-ěz') Fr.

Double sharp.

double discant

Discant music written in two or

double note

more parts, in which the upper and lower parts are convertible: such an arrangement of a composition written in two or more parts that the treble or any high part may with good musical effect exchange places with the bass.

double dotted note

See note, double dotted.

double flat

The sign (bb), indicating that the note before which it is placed is to be played or sung two semitones lower.

double flute

1. A flute from which two tones can be obtained at once.

2. An organ stop (Doppel Flöte).

double fugue (doo-bl füg) Fr.

double fugue (dübl füg)

A fugue employing two principal subjects. See also fugue, double.

double G or GG

The G an octave below the first line of the bass staff. See also double letters.

double hautboy

An organ stop, composed of pipes fitted with reeds, for producing the sounds which greatly resemble those of the oboe. The pitch is an octave lower than that of the ordinary hautboy or oboe stop, hence the term double. The lowest tone is three octaves below middle C.

double letters

The terms Double C or CC, Double G or GG, are generally applied by organists to the notes in the second octave below the bass staff from CC to BB inclusive. In England, however, they are used for the octave above this.

**double long**

An old character equal in duration to four breves, or in modern notation to eight whole notes. See also duplex longa.

double lyre

An ancient stringed instrument similar to the viol.

double main (doo-bl män') Fr.

An octave coupler.

double mordent

See mordent.

double note

The breve: so called because twice as long as the semitone, or whole note.

double octave

double octave

The interval of two octaves; a fifteenth.

double quartet

1. Two bodies of four musicians each, united to form one group.

2. A composition written for performance by such a group.

double reed

1. The double piece of cane in the aperture of such instruments as the oboe and bassoon, set in vibration by the breath of the player.

2. An organ reed stop, whose lowest tone is three octaves below middle C.

double reed melodeon

See melodeon, double reed.

double relish

See relish.

double shake

A thrill on two notes at once, commonly at the interval of a third.

double sharp

The sign X which indicates that the note before which it is placed is to be raised two semitones. Formerly written

double sonata

A sonata composed for two instruments, in which each has an independent part, such as piano and violin, piano and 'cello.

double stem

A double stem consists of two stems attached to the same note head, one drawn up, the other down. It is used whenever the same note belongs to two parts; one of the stems indicates its natural length, while the other may indicate a shorter length, in connection with a note or group of notes following it.

double-stemmed note

See note, double-stemmed.

double stopped diapason

A double organ stop whose wooden and occasionally metal pipes are stopped or covered at the top, and whose lowest tone is the third C below middle C.

double stopping

In playing the violin and other instruments of its class, the stopping of two strings at once with the fingers in order to shorten the strings,

double trumpet

so that when struck, they produce two respective tones higher in pitch than those sounding when the open string is touched by the bow. The term is also applied to the playing of two notes at once on the open strings.

double suspension

The suspension, or carrying over, of two notes of a chord into the next chord.

double tierce (doo-bl tērs) Fr.

Literally, double third, double having the meaning of an octave above: an organ stop composed of pipes pitched the interval of a tenth, an octave and a third, above the ordinary pitch of the corresponding keys of the keyboard. A tierce stop would be only an interval of a third above the ordinary pitch.

double-time

Duple-time: time in which the number of beats in each measure can be divided by two, as: two-two, two-four, four-four, six-two or six-four time. See also time.

double-tonguing

A term used in playing the cornet, and some other instruments of brass and also the flute: it signifies a rapid alternate motion of the tongue between the teeth and the roof of the mouth, producing a clear articulation of rapid notes. The word "ticker" is commonly used for double-tonguing.

double touch (doo-bl toosh) Fr.

A peculiar modification of the action of an organ, in which two grades of pressure must be used on the keys, according to the result desired. The first depth of touch is the lighter, and by using it alone the softer stops are heard. On the player's using heavier pressure, sufficient to depress the key as far as possible, a more powerful solo tone or combination is brought into effect, and the organist is thus enabled to play effectively a solo and accompaniment on the same manual. It is a comparatively recent improvement in organ building.

double trill

Same as double shake.

double triplet

Two triplets united to form a sextole, or group of six equal notes executed in the time of four.

double trumpet

An organ manual reed stop corresponding in size, power and tone

double trumpet

quality to the trumpet, and whose lowest tone is three octaves below middle C. When, as is often the case, the lowest octave of pipe is omitted it is called the tenoroon trumpet.

double twelfth

An organ stop belonging to the class called mutation stops; it sounds a fifth above the foundation stops.

doubled

A note is said to be doubled when it occurs in two different parts of the same chord, or in more than one instrument or set of instruments in the orchestra.

doublette (doo-blět') Fr. n.

An organ stop composed of two pipes to each key of the keyboard and giving the typical organ tone. One row of the pipes is pitched an interval of a fifteenth, or two octaves, above the ordinary pitch of the corresponding keys, and the other row is pitched the interval of a twelfth, or an octave and a fifth, above. This stop is used to brighten any other having a tendency towards dulness.

doublophone (doo-bl-fōn') Fr. n.

A combination of the euphonium and the valve-trombone, having two separate bodies, but a single mouth-piece with a valve so constructed that the pressure of the thumb will enable the performer to direct the air to either side of the instrument chosen. It was invented in 1891 by a Parisian, Fontaine Besson.

doubtful chord

Equivocal chord; a term applied to a chord or chords which may belong to more than one key when their notation is slightly changed.

doxologie (dök-sō-lō-zhē') Fr. n.

Doxology.

doxology (dök-söl'-ō-jī)

A hymn or song of praise used in the church service, sung usually at the close of a prayer or psalm.

There are special doxologies used in different services. The Lesser Doxology, Doxologia Parva, or Gloria Patri, "Glory be to the Father, and to the Son, and to the Holy Ghost; as it was in the beginning, is now, and ever shall be, world without end. Amen," came into use in the Fourth Century. In the Roman Catholic Church this appears at the conclusion of every psalm and canticle, except the Te Deum and Benedicte, and in all the responses of the breviary, except on the last three days of Holy Week and in the office of the dead. In the Anglican church the Lesser Doxology is used at the end of psalms and canticles. The Greater

1. (adj.) Sweet; soft.

2. (n.) A delicate toned organ stop with metal pipes, whose lowest tone is one octave below middle C.

dulcian (dŭl-sĕ-än') Fr. n.

1. An obsolete form of bassoon.

2. An organ reed-stop sounding as its lowest tone either C two, or C three octaves below middle C, depending upon the use of a pipe of eight or sixteen foot pitch.

duo

dulciana

An organ stop with open metal pipes of very small scale, giving a soft tone suitable for accompaniment. It is one of the most essential organ stops. Its lowest tone is C, two octaves below middle C. Formerly the name was applied to a soft reed-stop.

dulciana principal

An organ stop similar to the dulciana proper, but of four-foot pitch, an octave higher in pitch, making its lowest tone one instead of two octaves below middle C.

dulcimer

An old stringed instrument. Dulcimers varied greatly in construction, but had in common one essential feature, the wire strings strung over a flat sound board; they were struck with two hammers or mallets held in the hands. This ancient instrument was usually triangular in shape, and the fifty strings were of brass. It has been used by peoples of all lands which accounts for its varied forms and its several names. The Germans called it Hackebrett, chopping-board, because of the manner in which it is played. In Italy it was at one time known as the cembalo because of its cymbal-like tone. Its greatest interest now lies in the fact that it was the forerunner of the spinet, harpsichord and piano.

dumka (dooom-kä) Bohem n.

A term signifying a movement in slow tempo, and sad or depressing character, such as a dirge or elegy. The name dumka occurs frequently in the music of Dvořák.

dump

1. An old English dance of slow time and having a peculiar rhythm. It was well known in Elizabeth's time, and Shakespeare makes numerous allusions to it.

2. The word dump was in olden times also used to mean tune; as, a melancholy dump, a merry dump.

E

E

1. The third tone of the scale C major, that is, of the scale which has C for the keynote or first degree and has the interval of a major third, two whole tones between C and the third degree, namely, E. This scale is considered the typical diatonic scale because it necessitates no sharps or flats to bring about the succession of tones and semitones required to make a complete diatonic scale.

2. The name of one of the major keys, that is, of one of the keys having the interval of a major third, two whole tones between the first and the third degrees, in this instance E and G. The key of E major necessitates the use of four sharps, C sharp, D sharp, F sharp and G sharp in its signature to obtain the proper diatonic succession of intervals.

3. The name of one of the minor keys, that is, the name of that key which has E for a keynote or first degree and has the interval of a minor third, one whole tone and a half tone between E and G, the first and the third degrees. It is called the relative minor of G major because each key requires the use of one sharp, F sharp, in order to obtain the succession of tones and semitones required to make a complete diatonic scale.

E double flat

The note E lowered two half steps by means of a double flat; the same tone as D.

E double sharp

E raised two semitones by a double sharp; same as F sharp.

E dur (ä door) Ger.

ĕchancrure (ā-shāñ-krūr') Fr. n.

An inward curve of a rib of an instrument of the violin kind, by which the waist is formed.

ĕchappement (ā-shäp-māñ') Fr. n.

A term meaning escapement and now generally applied to what is called the double escapement of modern pianos. This part of the piano, the invention of Sebastian Erard in 1808 and patented by his nephew, Pierre Erard, 1821, insures the successful instantaneous repetition of a tone. Formerly, with single escapement, the second tone of a repetition was weak as compared with the first tone, because the hammer was not allowed to resume a complete position of rest before the key lever sent it against the string a second time. Without resuming its position of rest, sufficient momentum to insure a forceful stroke could not be gathered in its passage to the string. In modern pianos there is what might be termed a middleman, the hopper. The depression of the key-lever instead of immediately affecting the hammer, affects the hopper which, with a horizontal movement strikes a projection on the hammer and then makes its first escape by continuing its movement, which is forward as well as horizontal. The hammer is sent against the string and with the consequent removal of the projection the hopper, making its second escapement, may return to its position of rest and become ready for a repetition of the action while the hammer is striking the string and the key lever is resuming its equilibrium. As a result the hopper comes to rest in time to receive a second stroke from the key lever and to convey it to the hammer with sufficient force to make the tone full and powerful.

Eisteddfod

of Welsh bards and minstrels. The beginning of these meetings dates back to ancient times, mention being made of them in the Seventh Century. They were held for the election of the Chief Bard and the creation of the Pencerdd or Chief Minstrel. Only those bards who had acquired the degree of chief minstrel were authorized to teach. The Chief Bard was called the bard of the chair, because after his election he was installed in a magnificent chair and was decorated with a gold or silver chain as a badge of the office. Persons wishing to take degrees were presented to the Eisteddfod by a chief minstrel, who vouched for their fitness. The Eisteddfod of 1450, known as the great Eisteddfod of Carmarthen, the Eisteddfod of 1567, commissioned by Queen Elizabeth; the Eisteddfod of 1681, under the direction of Sir Richard Bassett, and the Eisteddfod of 1819, held by the Cambrian Society, are Eisteddfodau of great importance. The modern Eisteddfodau are held annually and are designed to encourage native poetry, music, patriotism and the study of the Welsh language. Thousands from all parts of the country are attracted to these assemblies, which last for three or four days. The time is devoted to contests in oratory, music and poetry, prizes being awarded to the successful competitors. The proceedings are conducted partly in Welsh and partly in English. The Welsh inhabitants of the United States sometimes hold similar meetings.

electric organ

An ordinary organ whose pipes are opened by means of an electric current passing from the keys along wires to the pallets covering the openings to the pipes. This method is especially useful in organs in which the pipes are situated at some distance from the keyboard.

electric pianoforte

First invented in 1851, but not perfected until 1891, by Dr. Eisemann of Berlin. The instrument is much like the ordinary piano in appearance. The keys, instead of acting upon hammers, each close an electric circuit when depressed. Over each string or group of strings is an electric magnet, and when the circuit is closed, each magnet attracts its strings, thus causing them to vibrate. The tone of the electric piano is full and sweet and its strength can be varied at will.

Englisch Violet (ëng'-lish fē-ō-lēt') Ger.

A name given by Leopold Mozart to the viola d'amore. This instrument became very popular in England during the Eighteenth Century and the name "Viol" in German means both violet and viola. Furthermore, the especially soft voice doubtless carried with it a suggestion of the retiring qualities of the violet.

englische Mechanik (ëng'-lish-ë mä-khän-ēk') Ger.

English action, applied to pianos.

English concert pitch

The pitch generally adopted in England, after some discussion, in 1896. According to this pitch A on the second space of the G clef has 439 double vibrations per second at a temperature of 68° Fahr. or 435 double vibrations per second at a temperature of 59° Fahr. This pitch has since been adopted by all musical bodies in England except the military bands.

English fingering

The system of marking piano-music, in which the notes for the thumb are designated by the sign × or † and the notes for the fingers by 1, 2, 3, 4. Sometimes called American fingering.

English horn

A meaningless name which has been given the alto oboe or cor anglais. The real name doubtless should be angle horn and is derived from the angle which the tubes of the older instruments described. The French adjectives "angle" meaning angle and "anglais" meaning English, having been confused. Now, however, the tube is straight.

enguichure (än-gē-shür') Fr. n.

The mouthpiece of a hunting horn.

enharmonic

1. The early history of Greek music is enveloped in great obscurity and the earliest indications of a regular system are found in the little that can be discovered concerning the poet-musician, Olympus, who lived about 1400 B.C. It is comparatively certain that the Greeks had three kinds of scales,

enharmonic modulation

flat, G, C, produce exactly the same sound, but the second tone may be called either E flat or D sharp. Such a change in the names, yet producing no change of tone, is called enharmonic modulation.

enharmonic organ

A reed organ invented by an American, H. W. Poole, in 1848 and furnished with enough keys to produce all tones of the untempered scale, that is, a sharp and a flat for each white key as opposed to those keyboard instruments which give only the tones of the tempered scale, such as the pipe organ and the piano, in which only one chromatic key serves as the sharp of one key and the flat of the key next above.

enharmonic relation

The relation existing between two chromatics or semitones, when by lowering one or raising the other, they become identical.

enharmonic scale

A scale having more than twelve tones to the octave; a scale proceeding by intervals smaller than semitones, that is approximately quarter tones.

equivocal chord

A term applied to chords that may, with slight changes in notation, belong to more than one key.

Erniedrigung**Erard action**

The so-called double-action mechanism that was the reconstruction of the harp; named for the inventor Sebastian Erard, a Frenchman (1752-1831). The strings of the harp are all tuned a half tone lower than is natural. For instance, there are no C strings, their pitch being C flat instead. In the pillar of the harp are rods which connect the pedals at the base of the pillar with a mechanism on the neck. This mechanism consists of discs each studded with two pins. The number of discs corresponds with the number of strings on the instrument and when at rest the strings are allowed to pass between the pins in the discs. When a pedal, for instance, the one connected with the C strings, is half-way depressed, the string is slightly shortened and the tone is raised a half tone so that C natural is sounded. If the pedal is entirely depressed the string is shortened still more and the tone is raised to C sharp.

F clef

A character, evolved from the letter F, placed at the head of the staff to indicate the position of f, that is, the F five tones below middle C. The two dots following it are on each side of the line which represents F. The F clef is now placed only on the fourth line of the staff and is called the bass clef. Prior to the Eighteenth Century it was also written on the third and fifth lines, and was known as the barytone, and basso profundo clef, respectively.

Easily; with facility.

fackeltanz (fäk'-ěl-tänts) Ger.

Literally, torch dances. As the name implies, a dance with torches. An old German dance which is still a favorite. The dance itself is a tuneful grand march. At the wedding of Princess Margaret, sister of William II., with the Prince of Hesse, an elaborate torch dance, in which the Emperor and Empress and all the royal guests took part, followed the wedding dinner. When the signal for the dance was given, twelve pages, carrying large silver torch-holders containing lighted thick candles, entered the room, and handed these to twelve ministers of state who headed the march. After the royal procession had made two tours around the room, the pages took the torches again, replacing the ministers in the march. Every time the procession passed the throne, which

Fähnenmarsch

was at one end of the dance hall, the bride and groom changed partners, and this continued till every prince and princess had danced with the bride and groom, respectively. The torches, the varied exquisite costumes, and the gay music made it a brilliant affair. This dance is a survival of a medieval custom and lends itself to a great variety of display.

A closing strain which does not produce the effect of completeness. Same as *imperfect* or *flying cadence*.

false chords

Chords that do not contain all the intervals belonging to them, that is, chords some of whose tones are omitted.

false fifth

A fifth is an interval of three whole tones and one semitone. If this interval be narrowed a semitone by raising the lower or lowering the upper tone a half step, the result is a false fifth. Also called *diminished*, *imperfect*, *flat*, *minor*, or *defective fifth*.

false harmony

Harmony not based upon established rules. See also *harmony, false*.

false intonation

Incorrect intonation, the tones not true to the key.

fandango

false relation

When a note sounded by one voice is simultaneously or successively sounded by another voice, but altered by a sharp, flat or natural; or, in chords which are so near together that the effect of one note, chromatically changed, that is, a semitone flattened or sharpened, reappears immediately after in another part, it is a false relation.

false string

A string made so poorly that it gives a bad tone.

false triad

A triad is a common chord consisting of three tones: (a) the fundamental note or note upon which the chord is built; (b) a note which is a third or two tones of the natural scale above the fundamental; (c) a note which is a fifth or three tones and a semitone above the fundamental note. If this last tone be narrowed by raising the lower tone or lowering the upper tone a half step, making of it a false fifth, the three resulting tones form what is called a false or diminished triad.

Falsett (fäl-zět') Ger. n.

falsetto (fäl-sět'-tō) It. n.

1. The head voice distinguished from the chest voice; that part of a person's voice that lies above its natural compass; so called because it sounds unnatural and forced in its untrained state and because at its best it is not easily managed.

2. A singer who uses this register almost exclusively is the male alto. It is much more obvious in a male voice than in a female. Abbr. *falset*.

falso (fäl-sō) It. adj.

False; wrong.

ficta (fĭk'-tä) Lat. adj.

fictus (fĭk'-tŭs) Lat. adj.

Feigned; a term applied in the Fourteenth, Fifteenth and Sixteenth Centuries to musical scales in which notes foreign to the scale at that time were added for the sake of harmony. It is usually written *musica ficta*; music into which singers at their discretion introduced, at the movement of performance (only in doubtful cases were they indicated), accidentals for the sake of the harmony. These rules came into use as early as the Fourteenth Century, when musicians of good taste upheld the bull of Pope John XXII., forbidding the use of semitones in church music (plain chant). This was the beginning of the separation of the modern scale from the church system.

fiddle

A musical stringed instrument; a violin. Derived probably from the Middle English *fidel* or *fithel*; connected with the Latin *vitula* or *vidula*, whence *viola* (It.), *viol* (Eng.). Possibly derived from *fidicula* (Lat.), a small stringed instrument.

Finger bildner

cised but slight pressure on the end joints of the fingers and gave entire freedom to the rest of the hand. Similar to dactylion and chiroplast.

finger-board

Finger-brett (fing-ër-brët') Ger. n.

In such instruments as the violin, the guitar, and the mandolin, a thin strip of wood, generally ebony, glued to the upper side of the neck. The strings are stretched above this finger-board and are pressed down on it with the fingers of the left hand, in securing the proper lengths for producing the various tones of the scale.

finger-cymbals

Castanets.

finger-developer

An apparatus for strengthening the last joint of the finger and preventing it from bending inward, invented by Seeber. It consisted of a separate attachment for each finger, and was better than other similar devices in that it exercised but slight pressure on the end joints of the fingers and gave entire freedom to the rest of the hand. Similar to dactylion and chiroplast.

finger-holes

In wind instruments, holes in the side of the tube so placed that they may be closed by the fingers of the player, that the tones produced may be modified in pitch.

finger trainer

An apparatus resembling the chiroplast, invented by H. Herz in 1835, but of a very short existence. It consisted of two smooth wooden rails, parallel with the piano keyboard, and a pair of open gloves, the whole serving to hold both hands in the proper position for playing, by hindering the wrist from sinking and obliging the fingers to strike vertically.

Fingerfertigkeit (fing'-ër-fär'-tikh-kīt) Ger. n.

Agility and readiness of the fingers.

fingering

1. The method of applying the fingers systematically when playing an instrument.

2. The marks or figures that indicate what fingers are to be used. For piano and organ music in America and England, the thumb is marked + or X and the fingers 1, 2, 3, 4. In German music the thumb is marked 1, and the fingers 2, 3, 4, 5.

fino

fingering, American

A system of fingering in which the notes to be played with the thumb are marked with a cross or (X) and those to be played with the fingers 1, 2, 3, 4.

fingering, German

A system of fingering which originated in Germany and in which the notes to be played with the thumb are marked 1 and those to be played with the fingers 2, 3, 4, 5.

fingering, scale

The system of fingering, that is, the method of applying the fingers to the keys, strings, or holes of different instruments. American fingering differs from German or foreign fingering in the use of the sign X to indicate the thumb in piano playing, instead of calling it the first finger. The earliest method of scale fingering taught the passing of the thumb under on the first white key after a black one; our present system of scale fingering is based on this. Some Germans have tried to form a system of fingering in which the thumbs in both hands shall always fall together; but the change has not yet been accepted. In scale work the thumb and fingers, one and two, have to do the most work; the third is less used and the fifth least of all.

Fingerleiter (fing'-ër-lī-tër) Ger. n.

Literally, finger guide. See also chiroplast.

Fingersatz (fing'-ër-zäts) Ger. n.

Fingersetzung (fing'-ër-zët'-oongk) Ger. n.

One who plays on the pipe.

fistuliren (fīs-too-lē-rěn) Ger. v.

1. To sing falsetto.

2. To allow too strong a pressure of wind to enter an organ pipe, causing it to produce a tone higher in pitch than the one ordinarily produced. In technical language, to accidentally overblow an organ pipe in such a way as to produce some harmonic tone instead of the fundamental.

fithele Old Eng.

Term for fiddle.

five-eight time

That kind of time in which a measure requires five-eighth notes or the equivalent; indicated by 5 at the head

8

of the staff after the key signature.

five-four time

That kind of time in which five quarter notes, or the equivalent, are required to complete a measure; indicated by 5 at the head of the staff

4

after the key signature.

fixed do

That system of using certain syllables to name or represent the tones of the scale, called solmization, in which do is always given to C, whether sharp, flat, or natural, re to D, and so on.

fixed intonation

A term applied to instruments such as the piano and organ whose pitch cannot be changed at the will of the player. Also called fixed tone.

fixed syllables

Syllables always applied to the same notes as do to C, re to D.

fixed tone

fixed tone

Same as fixed intonation.

Flachflöte (fläkh'-flā-tě) Ger. n.

1. Flageolet.

2. An organ-stop of rather thin tone.

flageolet

flageolet (flāzh-ō-lä') Fr. n.

1. A wind instrument made of a tube of wood or ivory. It resembles the flute but is blown at the end instead of at the side; has from one to seven finger holes, and a mouth-piece like a toy whistle. Its tone is clear and shrill, similar to but softer than that of the piccolo; it possesses a compass of two octaves and three semitones and is made in several different keys. It is rarely heard in the modern orchestra but flageolet solo parts are found in many old orchestral scores.

2. A small flute stop in the organ of very high pitch. Abbr. flag.

flageolet tones

The harmonics or overtones of stringed instruments; tones produced on violin and like instruments by lightly pressing the bow near the bridge and merely touching the strings with the fingers. See also harmonics.

Flageolett (flä-jě-ō-lět') Ger. n.

Flageolet. See also flageolet.

flam

A grace note in drum music. There are two kinds, the close flam being made as rapidly as possible and the open flam with a brief interval.

Flaminenorgel (flä-mēn-ēn-ōrkh'-ěl)

Ger. n.

Literally, flame organ: a pyrophone, an instrument in which the tones are produced by two burning jets of hydrogen enclosed in graduated glass tubes. It was invented by Frederick Kastner in 1875. The two flames when near each other produce no sound, but when, by depressing a key on a keyboard with which the instrument is furnished, the flames are separated, their flickering motion creates vibrations in the column of air in the tube and a sound is produced, greatly augmented by the tube. The pitch of the tones is governed by the diameter and length of the tubes.

flat

1. A symbol (b), evolved from round B (b) or B rotundum, the B

flauto ad libitum

flat of the medieval scale. It lowers, a semi-tone, the pitch of the note before which it is placed.

2. When tones fail to reach the true pitch, they are said to be flat.

flat, double

A sign, composed of two flats (bb), which lowers a note two semitones.

flat eighth, extreme

The octave diminished by one semitone at either extreme.

flat fifth

A diminished fifth: an interval consisting of five degrees and containing two tones and two semitones.

flat fourth, extreme

A perfect fourth diminished by one semitone at either extreme.

flat seventh

A minor seventh consisting of four tones and two semitones.

flat tuning

A method of tuning the lute, called also French tuning or French flat tuning, because of the lowness of the earlier French pitch.

flatter la corde (flät-tä lä kôrd') Fr.

Literally to flatter or caress the string; that is, to play expressively upon any bowed instrument.

flautando (flä-oo-tän'-dō) It. adj.

flautato (flä-oo-tä'-tō) It. adj.

1. A flute-like tone.

2. A direction in music to produce the flute-like tones on a violin.

flauti unisoni (flä'-oo-tē oo-nē-sō'-nē)

It.

The flutes in unison.

1. Bugle.

2. A form of valved bugle.

fluit (floit) Dutch n.

Flute.

fluta (flū'-tä) Lat. n.

Flute.

flûte (flood) Fr.**flute**

The flute used in the orchestra is generally considered as the flute proper. The cylindrical tube of wood, silver or German silver, is furnished with several side holes opened and closed by means of keys manipulated through levers. The mouthpiece is a side hole near one end and above it the tube terminates in a conical elongation. The position of the mouthpiece necessitates that the flute be held transversely or crosswise of the face when being played. The compass is from middle C to the C

flute, portunal

three octaves above. The fingering is the same in all octaves, the differences in pitch being obtained by varying the force in blowing. The tones of the lowest octaves are rather faint, those of the second are much stronger and those of the third are very piercing, being suitable only for loud passages. The flute is used almost constantly in the orchestra and the chief characteristic of its voice is suavity and gentleness.

flûte à bec (flood ä běk) Fr.

Literally, flute with a beak: the older flute which was held vertically and blown into through a mouthpiece at the end called a beak.

flûte allemande (flood äl-mänd) Fr.

German flute.

flute, ancient

A flute blown into at one end having a conical wooden tube and a varying number of finger-holes. Sometimes two tubes were attached to one mouthpiece.

flute, Boehm

A flute perfected by M. Boehm, of Germany, in 1832. The holes are arranged in their natural order and are fitted with keys.

flûte conique (flüt kôn-ēk) Fr.

A conical shaped flute.

flûte d'allemande (flood däl-mänd) Fr.

Cross flute; the German or transverse flute. See also transverse flute.

flûte d'amour (flood dä-moor) Fr.

1. A flute, now obsolete, in A or in B flat.

2. An organ-stop which produces a very sweet tone.

flute douce (flood doos) Fr.

1. The beak-flute.

2. Organ-stop, same as flauto dolce.

flute, German

Name given to the flute which is blown into at the side. Same as transverse or cross flute.

flûte octaviante (flood ök-tä-vē-änt') Fr.

Same as harmonic flute.

flûte, ouverte (flood oo-värt') Fr.

Literally, open flute. An organ-stop composed of pipes open at both ends and producing a flute-like tone.

flute, pastoral

A short beak-flute. See also Shepherd's flute.

flute, portunal

An open organ stop producing a clarinet tone. Its pipe is wider at the top than at the bottom.

flute, pyramidal

flute, pyramidal

An eight-foot wood stop on the organ. Its lowest tone is two octaves below middle C.

flute, shepherd's

A short beak flute. See also Shepherd's flute.

flute stop

In an organ a group of metal or wooden pipes capable of producing a clear, sweet tone greatly resembling that of the orchestral flute.

flute, transverse

Name is given to the flute which is blown into at the side. Same as cross or German flute.

flûte, traversière (floo trā-vēr-sē-är')

Fr.

The transverse or cross flute.

flute-work

All the flue stops of an organ taken collectively in contradistinction to the reed stops or reed-work, that is, those stops composed of pipes fitted with reeds for the production of the tone. Flue stops are those composed of pipes in which the sound is produced by a current of air passing through a slit called a flue near the bottom of the pipe, and then striking against a sharp edge or lip. The current is cut and part enters the body of the pipe, setting the column of air in vibration. The rest passes out of the pipe and is lost. All stops designated as flute stops are constructed on this plan. Same as flue-work. The German name is Flötenwerk.

flûté (floo-tä') Fr. adj.

Fluty; soft and clear in tone, like a flute.

fluter (flü-tä) Fr. v.

To play on the flute.

fluttuan

An organ stop whose tone resembles a horn.

fly

A hinged board used as a cover for the keyboard of a piano or organ.

flying cadence

A closing strain which does not produce the effect of completeness. Equivalent to imperfect or false cadence.

Fire; energy; passion.

focosamente (fō-kō-sā-měn'-tě) It. adv.

Ardently; passionately; vehemently.

fofa (fō'-fä) Port. n.

A Portuguese dance similar to the

folk-song

fandango, which is the national dance of Spain. When the Portuguese gather for merry making on the festivals, called Romarias, the principal dance is the fofa, a national dance in which couples dance to the music of guitars or other instruments. Freedom was a special characteristic of the Eighteenth Century dances and the fofa was noted for its undignified character.

foglietto (fōl-yēt'-tō) It. n.

In orchestral music the copy of the score which is often given to the leader. It contains only the passages which accompany solos.

foire des enfants (fwär-dä-zän-fän)

The second time.

fois, première (fwä prüm-yär') Fr.

The first time.

folatre (fō-lätr') Fr. adj.

Wild; playful; lively.

folia (fō'-lē-ä) Sp. n.

An old Spanish dance written for one person in three-four time. The music was frequently written on a ground bass, which consisted of a series of four or eight bars as a theme, constantly repeated, and at each repetition accompanied by a new melody. This theme is used as the basis of the composition as a whole.

Corelli uses the term folia, to name the variations which close his twelve solos (op. five). Farinelli, in his "Ground" offers the same air, also Vivaldi. See also, folies d'Espagne.

foliated

Ornamented: said of a musical composition when ornamental notes above or below are added.

folies d'Espagne (fō-lē-dēs-pän) Fr.

1. A species of composition consisting of variations on a given air, remarkable more for the ingenuity of the composer than for beauty. The term means literally, "Follies of Spain" and has come to be applied in a general way for much labor expended on trifles.

2. A dance of Spain. See also folia.

folk-song

A song of the people, based either on an event of legend or history or on some happening of ordinary life.

folk-song

The simplicity of the text is accentuated by the simple accompaniment. Folk music lacks the studied character of compositions by professional musicians, and portrays the sentiments of the people spontaneously expressed by themselves.

Since they are the natural outburst of deep feeling, the folk songs shows strong racial characteristics and we find in the North the melancholy, minor strains, while the South gives rise to the lively and vivacious. A strange coupling of the energetic, vigorous dance with the heavy song seems to mark a natural tendency to express in wild and forcible motion a feeling too deep for words. In the southern dances the motion is gentler and more even and the songs reveal more expressively the depth of emotion.

The tracing of these melodies of early times presents great difficulties to the musical investigator, for though the words in many instances have come down to us in good form, the music, never written, has perished. Some of these best known folk-songs have been preserved in an unexpected manner. About the Twelfth Century the musicians became accustomed to select a well-known melody and around this as a foundation would weave other melodies of their own creation. Since, at that time most of the musicians were connected with the service of the church, sacred words were frequently used in these original additions, and in many great masses the composers have as their basis the simple folk-song, as for instance, the Mass of Palestrina based on L'Homme Armé.

The folk song of Germany is found as the theme of many compositions of Mozart, Mendelssohn and Weber.

Dvořák has made known that of Bohemia; Liszt has immortalized the weird, Oriental character of the Hungarian; and Chopin that of Poland. Of the Celtic races, Scotch, Irish and Welsh, the early music is very ancient and of a peculiarly poetic character, but no great composer has as yet made these forms the theme of a greater production.

The American characteristic music is perhaps to be found in the plantation melodies, but may be found in some Indian songs; but as yet no

foot

earnest effort to collect or classify these types has been made.

folk-tone

The folk-song style or manner.

folia di spagne (fōl-lē'-ä dē spän-yě)

It.

Same as *folies d'espagne*.

fondamental (fôn-dä-män-täl') Fr. adj.

fondamentale (fôn-dī-měn-tä'-lě) It. adj.

Fundamental.

fondamento (fôn-dä-men'-tō) It. n.

The foundation; the basis; the fundamental bass.

fonds d'orgue (fôn dôrg') Fr.

Literally, the ground or foundation of an organ. Those stops which produce the typical organ tone and are pitched at the so-called eight-foot pitch that is, the pipe producing the lowest tone is eight feet in length and sounds C two octaves below middle C. Such stops are also called diapason and serve as the foundation of the organ. The other stops for the production of special effects, such as those which imitate orchestral instruments, are called solo stops and vary in pitch being higher or lower than the foundation stops.

foot

1. In poetry one of the parts into which a line of poetry is divided, containing two or more syllables. It corresponds to the measure in music which is the group of notes between two bars, the first note always being accented and a secondary accent sometimes falling on some other note.

2. That part of an organ pipe below the mouth or slit which admits the wind to the pipe.

3. An obsolete meaning was a drone bass or one or more bass tones sounding continuously throughout a composition.

4. The unit of measure in designating the pitch of organ stops and consequently the pitch of other instruments. The practise is derived from the fact that a pipe eight feet in length produces the second C below middle C. Consequently a stop whose longest pipes, producing its lowest tone, is eight feet in length is designated as an eight foot stop. A sixteen foot stop is an octave lower in pitch, and a thirty-two foot stop another octave lower. A four foot stop is pitched an octave higher than an eight foot stop, and a two foot

fredon (frü-dōñ) Fr. n.

A trill; a melodic embellishment; a flourish.

French concert pitch

fredonnement (frü-dün-mäñ') Fr. adv.

Trilling; humming; warbling.

free chant

A form of reciting the psalms and canticles, in which a phrase, consisting of two chords only, is used for each half line.

free composition

In a free style; deviating from the rules of musical art.

free fugue

A fugue in which the many rules governing its composition are occasionally, or for the most part, disregarded.

free imitation

When the passage that repeats or imitates the subject does so only approximately, with variation or additions, it is called free imitation.

free reed

A reed which vibrates without striking anything. The harmonium or reed organ contains the typical free reed. It consists of a thin pliable strip of metal or wood fastened at one end and so fitted into a slot that when a current of air is sent against it, it vibrates without striking the fastened end or the sides of the slot. The use of free reeds in the organ has not proved successful. When employed, the organ pipes are fitted over them in such a manner as to augment the sound greatly, whereas in the harmonium the reed alone produces the tone. There is no means of varying the quality of the sound, the uninteresting voice of the reed organ and harmonium resulting.

freemen's songs

Little compositions for three or four voices, in use about 1600.

fregiare (frä-jä'-rě) It. v.

To adorn; to decorate; to embellish.

fregiato (frä-jä'-tō) It. adj.

Freiheit (frī'-hīt) Ger. n.

Liberty; freedom.

frémissement (frä-mēs-mäñ') Fr. n.

Humming; a murmur; singing in a low voice.

French concert pitch

The pitch adopted in 1859 by a commission of musicians and physicists appointed by the French government. By this decision, the pitch of the note A on the second space of the G clef

French concert pitch

was fixed at four hundred and thirty-five double vibrations per second. According to this, are tuned all instruments in French orchestras and all those manufactured in France.

French flat tuning

One of the varieties of tuning on the lute; so called because the French pitch was formerly lower than that used elsewhere.

French horn

The name by which the horn used in the orchestra is known. It is provided with valves for lowering the pitch although they tend toward producing a mechanical tone. The compass is three octaves and six notes. The tube of the horn is of brass and varies in length from nine to twelve feet according to the key in which it is pitched. It is conical, with a conical mouthpiece and is coiled several times before expanding into a bell. To play the horn requires skill and musical knowledge. To produce some of the tones of higher pitch the performer must greatly increase the pressure of his lips against the mouthpiece, which soon tires him. Furthermore he can not successfully produce any tone unless he first has a mental impression of it.

French sixth

A chord composed of an augmented sixth, an augmented fourth and a major third. An augmented sixth is an interval of six degrees increased by the addition of a semitone, this being accomplished by raising the highest note half a step or lowering the lowest note half a step. An augmented fourth is an interval of four degrees increased in like manner. A major third is an interval containing two whole tones or steps.

French treble clef

French violin clef

Clef with the G made on the lowest line of the staff. Formerly much used in French music for violin, flute, etc. Now obsolete.

frescamente (frēs-kä-měn'-të) It. adv.

Freshly; lively.

fresco (frēs'-kō) It. adv.

Lively; animatedly; vigorously.

frestel (frū-těl') Fr. n.

A Pan's pipe.

fret

In instruments of the lute and viol class, a small ridge of wood, ivory, metal, or other material, set across the fingerboard, and serving as a fixed

Frühlingslied

point for stopping or shortening the strings in playing, the fingers being applied just above it so as to press the string against it.

fret free

In the early clavichords there were fewer strings than keys, each string serving for several notes, through the use of the tangent. These instruments were called tied, fretted, or gebunden. Later when instruments were made having a string for each note, they were called bundfrei, or ungebunden or free or fret free.

fretta (frēt'-tä) It. n.

Haste; hurry; increasing the time.

fretted

Having frets.

Freudengesang (froi' - dē - gē - zäng') Ger. n.

Ger. n.

Song of joy.

freudig (froi'-dīkh) Ger. adv.

Joyfully; joyously.

Freudigkeit (froi'-dīkh-kīt) Ger. n.

Joyfulness.

fricassée (frē-käs-sā') Fr. n.

1. A popular dance with pantomime, in vogue in the Paris boulevards during the Eighteenth Century.

fuga mixta

the answer has notes of double the time value of those in the subject.

3. Answer by diminution when the notes have half the time value of those in the subject. Answer by inversion may be accompanied by augmentation or diminution.

fuga obligata (fū'-gä öb-lī-gā'-tä) Lat.

A fugue whose episode, that is, digressions from the principal theme derive the base of their material from either the subject or principal musical thought, or from the counter subject.

fuga partialis (fū'-gä pär-shī-ā'-līs) Lat.

A fugue with only partial or periodic imitation of parts, in distinction from a composition with perpetual imitation which is now called canon.

fuga per arsin et thesin (fū'-gä pūr ār'-sīn ēt thē'-sīn) Lat.

A fugue by inversion (a) of rhythm, (b) of interval. In this fugue the subject or main theme begins on the strong beat and the answer or second division on the weak beat, thus reversing the accent throughout.

fuga per augmentationem (fū'-gä pūr āwg-mēn-tā-shī-ō'-nēm) Lat.

A fugue in which the answer is by augmentation, that is, the answer is prolonged by means of lengthened time value of notes.

fuga per diminutionem (fū'-gä pūr dīm-i-nū-shī-ō'-nēm) Lat.

A fugue whose answer is by diminution, or shortened by diminishing the time value of notes.

fuga per imitationem interruptam (fū'-gä pūr ĩm-ĩ-tā-shī-ō'-nēm ĩn-tēr-rūp'-tām) Lat.

A fugue whose answer is interrupted by rests and breaks.

fuga per motum contrarium (fū'-gä pūr mō'-tūm kōn-trā'-rī-ūm) Lat.

One whose answer is the subject inverted, which makes the answer more in contrary direction; if the subject ascends, the answer descends or vice versa.

fuga periodica (fū'-gä pē-rī-öd'-ī-kä) Lat.

Equivalent to fuga partialis.

fuga perpetua (fū'-gä pēr-pēt'-ū-ä) Lat.

Equivalent to fuga inconsequenza.

fuga plagale (foo'-gä plā-gā'-lē) It.

A fugue with a plagal subject, that is, one the leading notes of which are in descending order.

fuga plagalis (fū'-gä plā-gā'-līs) Lat.

A fugue whose subject descends below the keynote.

fugirt

fuga propria (fū'-gä prō'-při-ä) Lat.

A fugue in regular form.

fuga reale (foo'-gä rā-ä'-lē) It.

A real fugue.

fuga reditta (foo'-gä rā-dēt'-tä) It.

A fugue in which at the middle or end, some of the parts take up the subject in succession, note for note, while the other parts are in harmony with it.

fuga regularis (fū'-gä rēg-ū-lä'-rīs) Lat.

A fugue in regular form.

fuga retrograda (fū'-gä rēt-rō-grā'-dä) Lat.

A fugue having the answer in retrograde progression, that is, the answer is the subject given backwards.

fuga retrograda per motum contrarium (fū'-gä rēt-rō-grā'-dä pūr mō'-tūm kōn-trā'-rī-um) Lat.

A fugue whose answer is the subject given backwards as regards succession of notes, and is also in contrary motion to that of the subject, if subject ascends answer descends or vice versa.

fuga ricercata (foo'-gä rēt-chēr-kä'-tä) It.

An elaborate fugue of the highest development.

fuga sciolta (foo'-gä shē-ōl'-tä) It.

fuga soluta (fū'-gä sō-lū'-tä) Lat.

A free fugue.

fugara (foo-gä'-rä) It. n.

An open, metal pipe organ stop, whose lowest tones are either one or two octaves below middle C, according as the pipes are four or eight foot pipes.

fugato (foo-gä'-tō) It. adj.

Giving the impression of a fugue without being worked out in strict fugue form.

Fuge (foo'-gě) Ger. n.

Fugue.

Fuge gallante (foo'-gě gäl-län'-tě) Ger.

A free fugue in the style of chamber music.

fuggire la cadenza (food'-jē-rě lä kädēn'-tsä) It.

To escape the cadence, as, by interruption, that is, when the chord based on the dominant or fifth tone of the scale is followed by any other than the chord based on the tonic or key note.

fughetta (foo-gět'-tä) It. n.

A short fugue.

fugirt (foo'-gěrt) Ger. adj.

In fugue style; a term also applied

fugirt

to the ranks of a mixture-stop in an organ, a stop which consists of two or more pipes sounding different tones to each key.

fugitive pieces

Short-lived pieces.

fugue

From the Latin *fugare*, to put to flight. The highest form of instrumental or vocal composition in counterpoint. It derives its name from the fact that it is a flight or chase of melodies; one part enters with the principal theme, a second takes up the theme and another and another follows until all have entered. Every development is directly or indirectly attached to the initial motif or subject, and variety is obtained by modulations and various combinations in imitation. The constructive elements indispensable to any fugue are the subject or principal theme; the answer, a repetition of the subject, given a fifth higher or a fourth lower; the counter-subject, a counterpoint or counter-subject, which combines with the subject, and the stretto in which subject and answer are brought as close together as possible for the sake of heightening the interest. In most fugues will also be found episodes or digressions, developments which draw their material from the subject or counter-subject, and serve to vary the work and act also as transitions. The general plan of the fugue is as follows: First comes the exposition which serves as an introduction of all the parts, of which there may be from two to eight. The subject, a definite theme usually consisting of a few measures of melody given in the principal key, is announced by the first entering part. The second part to enter takes up the answer which is the subject repeated a fifth higher or a fourth lower. To it the first part, having completed the subject, supplies a counterpoint or merely completes its harmony, and so forms the counter-subject, as does every successive part upon its completion of the fugue theme. Part three enters with the subject an octave higher or lower than the first part, is answered as was part one, and like it, then supplies the counterpoint to the answer. When all parts have entered as subject or answer the first development or the exposition is completed. Next follows a short digression or episode

fugue, double

which serves to vary the composition, for in it the composer is free to use as he will, any of the musical devices permissible, though he still preserves the unity by the nature of his material which is drawn from some part of the exposition. This episode may be followed by another or by several episodes or immediately by a second or counter-exposition, a sort of reflected exposition in which the answer is heard first and then the subject, each once only, and accompanied by the counter-subject. The greater the number of parts the greater will be the number of expositions and episodes. The stretto is perhaps the most interesting part of a fugue, as it is intended it should be. In this development the subject and answer crowd upon each other, overlap in a way, and with increasing vehemence if the nature of the subject permit; here the pursuit of melodies grows eager and pressing, the climax is reached. Frequently several strettos are found in a fugue and invariably at least one, though fugues have been written without any, but this is rarely the case. The subject and answer during the various developments may have been given in different but related keys, but in the stretto always return to the original key. Often a coda is added and the fugue brought to a close by a cadence. The fugue, as a definite musical form, is a comparatively modern development of what we now call canon, which during the Sixteenth Century was called *fuga*. It owes its development and perfection to John Sebastian Bach.

fugue, counter

A fugue in which the subjects move in contrary directions, that is, if one is a melody whose succession of notes ascend the musical scale, the other descends.

fugue, double

A form of musical composition in which there is an interweaving of melodies, one or more melodies acting as accompaniment to others. In the double fugue there are two principal musical themes called subjects, which, after they once are announced, usually separately, proceed in unison. There are usually four voice parts, but occasionally but three are found in double fugue. There is a contrast in both rhythmical and melodic treatment of the two subjects, so their individuality

fugue, double

is recognized whenever they appear. Mozart's Requiem is written in this form. For further understanding of fugal composition, see also fugue.

fugue, perpetual

A composition in strict imitation, in which parts progress in a similar manner but not simultaneously, and in such a way that the end leads back to the beginning; a canon which can be repeated continuously.

fugue, regular

See regular fugue.

fugue renversée (fäg räñ-věr-sā') Fr.

An inverted fugue; hence, one in which the answer moves in an opposite direction from that of the subject; if notes of the principal theme or subject move in ascending order those of the reply or answer descend.

fugue, simple

A fugue containing a single subject.

fugue, strict

A fugue in strict accordance with the fugal form.

fugue, triple

A fugue based upon three principal themes or subjects which, after their introduction, being usually announced separately, proceed in unison. They are of contrasting material and in the interweaving and chase of melodies, the ear can distinguish them. Fugal compositions written on three subjects require so much technical skill that often they lack artistic merit and are of interest only to students of composition.

fugued

Constructed wholly or in part in the style of a fugue.

fuguing

Composing or performing wholly or in part in fugued style.

fuguist

A performer or composer of fugues.

Führer (für'-ěr) Ger. n.

Director; conductor.

full anthem

An anthem to be sung by the whole choir in chorus.

full band

A band or orchestra consisting of all the customary instruments.

full cadence

A perfect cadence. See also perfect cadence.

Füllstimme**full choir**

A direction found in organ music, which indicates that a stop is to be drawn which will open all the pipes in the choir organ. See also choir organ.

full chord

A chord in which all the essential tones are present; or in concerted music a chord in which all the parts unite.

full close

The end of a movement finishing upon the tonic or keynote which was preceded by the dominant or fifth tone of the key. Synonym of perfect close and perfect cadence.

full orchestra

1. An orchestra consisting of all the customary instruments.

2. A direction found in orchestral scores meaning that all instruments play during the passage so marked.

full organ

In organ playing the entire power of the instrument with all stops and couplers drawn. Abbr. f. o., f. org.

full score

A copy of a musical work in which all the parts, vocal or instrumental, are written out in full.

full service

A service for the whole choir in chorus, with or without an organ accompaniment.

full stop

1. A chord followed by a pause.

2. A chord, in producing which all the strings are stopped by the fingers.

Füllflöte (fül-flā'-tě) Ger. n.

Literally, filling flute: an organ stop composed of pipes producing a high, flute-like tone. Its lowest note is an octave below middle C. This stop is used with other stops, when the tone lacks brilliancy, hence the idea of filling expressed in the name, its duty being to make the tone fuller.

Füllpfeife (fül-pfī'-fě) Ger. n.

Dummy pipe; an ornamental organ pipe that produces no sound.

Füllquinte (fül-kwīn'-tě) Ger. n.

Literally, filling fifth: a stop composed of pipes having a pitch a fifth higher than the ordinary pitch of the keys that sound them.

Füllstelle (fül-shtěl'-lě) Ger. n.

An extra passage put in to fill out.

Füllstimme (fül-shtīm'-mě) Ger. n.

1. Parts added to complete the harmony, giving resonance and fulness to the chords.

A term satirically applied to Wagner's works by L. F. C. Bischoff, in 1850; but later used as a watchword by the Wagnerians.

G

G

1. The fifth tone of the scale of C major; that is, of the scale which has C for the keynote or first degree and has the interval of a major third, two whole tones, between C and the third degree, namely, E. This scale is considered the typical diatonic scale because it necessitates no sharps or flats to bring about the succession of tones and semitones required to make a complete tonic scale.

2. The name of one of the major keys; that is, of one of the keys having the interval of a major third between the first and the third degrees, in this instance, G and B. The key of G major necessitates the use of one sharp, F sharp, to obtain the proper diatonic succession of intervals. This sharp appears in the signature.

3. The name of one of the minor keys, that is, the name of that key which has G for a keynote or first degree and has the interval of a minor third, one whole tone and a half tone, between G and B, the first and third degrees. It is called the relative minor of B flat major because each key requires the use of two flats, B flat and E flat, to obtain the succession of tones and semitones required to make a complete diatonic scale.

g.

Abbreviation for gauche, as in main gauche (left hand).

G.

Abbreviation for grand orgue (full or great organ).

G clef

The treble clef indicating that the line around which it curls is g', the fifth tone above middle C. Formerly the G clef was sometimes written on the first line of the staff, a form known as the

French treble, or French violin clef, and in some old music it is

found on the third line.

G double flat

G lowered two semitones by means of a double flat; same tone as F.

G double sharp

G raised two semitones by means of a double sharp; same tone as A.

G dur (gā-door) Ger.

The key of G major.

G flat.

The note a semitone below G.

G flat major

The major key whose signature is six flats.

G gamut

The G which is written on the first line of the bass staff.

G in alt

The octave in alt is the octave which begins on the G in the first space above the treble staff. This G

G flat major

G in alt

is seven notes above G written on the second line of the treble (or G) clef.

G in altissimo (g in al-tis'-sī-mō) It.

The first note in the altissimo octave. An octave in alt is the octave beginning with G in the first space above the treble staff. An octave in altissimo is the octave above the octave in alt, so that G in altissimo is fifteen notes above the G in the G clef line of the treble staff.

G major

The major key whose signature is one sharp. See also G.

G major chord

A tone of three notes, composed of G plus notes at an interval of a major third, two whole notes, and a perfect fifth, three and a half tones, respectively.

G minor

The minor key whose signature is two flats, relative to the key of B flat major. See also G.

G minor chord

A chord of three notes, composed of G, plus notes at an interval of a minor third or one and a half tones, and a perfect fifth or three and a half tones, above it.

G moll (gā mōl) Ger.

The key of G minor.

G sharp

The note a semitone above G.

G sharp minor

The minor key whose signature is five sharps, relative to the key of B major.

G Schlüssel (gā shlūs'-sēl) Ger.

The G clef. Schlüssel being German for key. See also G clef.

G string

The name given to the fourth string on the violin, the third on the guitar and violoncello, and the first on the double bass viol.

G ut

Low G in Guido's scale. See also gamma ut.

Free; ideal style common to harpsichord composition of the Eighteenth Century.

galimathias (gä-lē-mă'-tē-ăs) Fr. n.

A French term of doubtful origin, probably a variation of galimafré, a medley. It means confused, unintelligible, and is applied to musical compositions consisting of a mixture of forms. Mozart in 1766 wrote such a composition in "Galimathias musicum," a comic piece to celebrate the coming of age of William of Orange the Fifth. It is in thirteen short numbers, and ends with a variation on the Dutch national air, Wilhelms von Nassau.

galimatias

galliard (gäl'-yărd)

This dance bears in its French name, Gaillarde, which means sprightly or lively, a description of its character. It is one of those dances so popular in Italy, France and England, in the Sixteenth Century. It originated in Roman Campagna and is therefore also called the romanesca. Written in lively triple time, it formed an excellent contrast to the slow and stately Pavan which it usually followed. It was a dance particularly suited to young people; though historians tell us that Queen Elizabeth danced it at the age of seventy. One of her courtiers, young Halton, first attracted the Queen's attention by his graceful, agile performance of the galliard.

It was not essential that certain steps should be used, all that was required was that the steps be nimble, light, and in time to the music. Perhaps one foot was raised high, sometimes both left the floor at the same time, and again, while performing high leaps, the feet were struck together in the air, or crossed and recrossed rapidly as the dancer danced on alternate feet, flinging his limbs forward or behind him. The Italian name was gagliardo.

galop**galopade** (gäl-ō-päd') Fr. n.**Galopp** (gä-löp') Ger. n.**Gambeta****galoppo** (gä-löp'-pō) It. n.

This dance originated in Germany but soon became popular in other countries. It is a quick, spirited round dance in two-four time, and like the waltz, it has been a great favorite at different times. It has been used in many compositions, being favored for its lively, rhythmic time.

galoubé (gä-loo-bā) Fr. n.**galoubet** (gä-loo-bā) Fr. n.

A small flute having a very shrill voice. It is furnished with three finger holes and is capable of producing a compass of seventeen notes. The instrument is found in Provence and is played with the right hand while the left hand plays a small drum and furnishes the accompaniment for rustic dances.

gamba (gäm'-bä) It. n.

1. See viola da gamba.

2. An organ stop comprising narrow pipes producing what is technically known as stringy tones, that is, tones resembling those of bowed instruments like the violin. The name comes from the obsolete viola da gamba, the predecessor of the violoncello.

gamba major

An organ stop having as a lowest tone the C three octaves below middle C. The pipes are narrow in diameter and produced a tone resembling that of such instruments as the violin. This is one of the several stops whose names come from the obsolete viola da gamba, the predecessor of the violoncello.

gavot

This dance was originally a French peasant dance named after the village of Gap, in the French Alps. In character, it resembles the minuet, but is livelier, being written in moderately quick four-four, four-four time. It belonged to those rustic kissing dances in which the young men kissed their fair partners at the beginning and at the end of the dance; the kiss in those times was a mark of etiquette much as the bow is now. When this dance was adopted by the higher society, the kisses were by no means neglected. The gavot was popular at the court of Henry VIII. and the king himself one of its ardent performers. Much latitude was allowed in the steps of the gavot; it was always written in two distinct parts, and as is custom-

Gefährte

ary with all old dances, each part was repeated. This dance should begin on the third beat of the bar, and finish therefore in the middle of a measure. The music for this dance is also called a gavot, and is a popular form of musical composition with many of our best composers. Bach was one of its admirers. The dance was popular from the Sixteenth to the Eighteenth Century, and has again become popular. Equivalent to gavotta (It.) and gavotte (Fr.).

gloria (glō'-rī-ä) Lat. n.

Certain hymns of praise to God used in nearly all church services. The name is derived from the first word of the hymns, "*Gloria in Excelsis Deo*" and "*Gloria Patri*."

The "*Gloria in Excelsis Deo*," *Glory in the Highest to God*, is called the great doxology and contains the words sung by the angels, who appeared to the shepherds on the eve of the birth of Christ. These words are found in *Luke ii, 14*, and are known as the *Angelical Hymn*. This hymn is used in the Eastern Liturgy at the beginning of the Eucharistic office; in the Western or Roman it appears in the mass after the *Kyrie* and in the Anglican Church it stands at the end of the communion.

The "*Gloria in Excelsis*" is omitted during all seasons of penance, as *Advent*, *Lent* and also in *Requiem Masses*.

2. *Gloria, Lesser Doxology*, see also *Gloria Patri*.

Gloria Patri (glō'-rī-ä pä'-trī) Lat.

"*Glory Be to the Father, and to the Son, and to the Holy Ghost*." This is called the lesser doxology and is of unknown origin, though it has been used since earliest times in the Eastern and Western offices. It is now sung in the Roman and Anglican churches at the close of each psalm, a custom peculiar to Western churches.

grace note

grace note

An ornamental note: a note, not essential, and sometimes even foreign to the melody in which it occurs, inserted to add grace and beauty. It is not counted in completing the time of a measure; hence, the value given it has to be subtracted from one of the other notes, and it is invariably written smaller. Grace notes were formerly used more extensively than now, their selection in vocal music often being left to the discretion of the singer.

graces

A general term for all ornamental notes or embellishments not essential to the melody or harmony of the composition in which they appear. See also ornaments.

In the organ a stop consisting of pipes furnished with reeds and producing a tone similar in quality to that of the cornet. The lowest tone of which this stop is capable is C three octaves below middle C.

grand jeu (grän zhū) Fr.

A direction found on organ scores, indicating that all the draw stops are to be drawn, in order to secure the effect of all the pipes sounding together.

grand stave

grand messe (grän mäs) Fr.

Literally, great mass: hence, high mass. This is the Catholic Church service given throughout in musical tones by the priest and the choir. It is distinguished from low mass, in which there is no music and which is delivered in the manner of ordinary speech.

grand opera

An opera of high musical character, sung throughout, and accompanied by a full orchestra. It has full choruses, finales, arias, recitatives and all varieties of duets, trios and quartets. Its plot is dignified and usually of a serious nature. There is harmonious co-operation between the lines of the plot, the music and the scenic effects upon the stage.

The action of the drama is never checked nor veiled by the charm of the music, but the music must illustrate the emotional course and effects of the drama, and aid in the development of the plot. The orchestra plays a most important part in interpreting the drama, for it not only reflects the moods of the characters, but by use of motives, it suggests past incidents or anticipates coming events.

grand orchestre (grän-dôr-kěstr) Fr.

The full or entire orchestra.

grand orgue (grän-dörg) Fr.

1. Full organ or all pipes combined.

2. A great organ or principal keyboard to which are connected the most powerful pipes and the stops having the most extended compass.

3. Pipe-organ. Abbr. G. org.

grand pianoforte

A piano in a three-cornered case, so shaped as to accommodate the strings to best advantage. Hence, this piano is the best instrument of the kind and produces the finest tone.

grand sillet (grän sē-yā) Fr.

Large nut; situated at the tail piece, or lower end of the violin.

grand sonata

An enlarged sonata, containing all the proper movements to their fullest extent.

grand stave

The enlarged musical staff consisting of eleven lines. It has been in use for many generations, having been used in Italy in 1729. The clefs never change their places. The lower five lines represent the bass staff and the upper five lines the treble staff. Middle C is written on the sixth line.

Greek modes and music

the diazeuxis between the tetrachords. The other six are composed of conjoined tetrachords, joined by a common tone and having the diazeuxis either before or after the tetrachords.

The modes were combined so as to make a scale embracing two octaves. Fifteen of these scales were recognized by the later writers of music, each beginning on a different pitch, a half step higher than the preceding scale. These scales were also called modes, and thus a great confusion exists as to the meaning of the term mode. Each of these later scales had a special esthetic and moral value about which there was much discussion. An author chose a certain mode for his composition according to the sentiment which he was expressing, as for example, the Dorian was considered severe, grave and manly.

To the original system as here described, later writers made various additions, inserting half steps between the whole steps until they possessed a complete chromatic scale with which they acquired much freedom of transposition. The transposed scales were named from the one whose steps they resembled.

The Greek notation was very complicated, two sets of signs being used. The one for the voice was composed of the letters of the ordinary Ionic alphabet. That for instruments is thought by some writers to be founded upon cabalistic signs for the heavenly bodies, but others explain them as the first fourteen letters of an old Doric alphabet.

Greek music

The Greeks gave music a very high place in their arts. But it was so hampered by theory that its development was limited, and their musical compositions lacked both variety and harmony. Greek music lacks gaiety; it seems best suited to tragic expression, for its tones resemble the minor key. No chords were used in the Greek music, it consisted only of the melody.

Gregorian

This means collected or arranged by Pope Gregory I. in the Sixth Century.

Gregorian chant

A method of intoning the mass and selections from the Scriptures, which was perfected by Pope Gregory in the Sixth Century from material which had already been arranged by Ambrose of Milan in the Fourth Cen-

greifen

tury, the origin of which is lost in antiquity, being attributed variously to the Hebrews, Greeks, the early Christian Church or even to the Phœnicians or Egyptians. The Gregorian chant was written in eight different modes or scales, four of which are said to have originated with Gregory. These modes correspond somewhat to the Greek manner of writing music, and differ from the modern major and minor scales in the placing of the semitones. In the free recitation of the text with cadences, especially at the ends of sentences, each syllable may receive either a single note or one or more groups of notes. The original manner of writing the chants, by means of a short-hand character called a neuma, was replaced in the Eleventh Century by a staff of four lines upon which the notes appeared as square or diamond-shaped characters. The neuma indicated the rhythmical movement, but the later notation, while a more exact manner of representing pitch, left the rhythm to be handed down orally. As a result much of the original character of the rhythm has been lost, and the efforts of modern church musicians are being exerted toward its restoration. The earnestness and solemnity of the Gregorian chant peculiarly adapts it to the celebration of the mass and other church ceremonies, and the present pope, Pius X., has done much toward restoring Gregorian music in its original purity.

Gregorian letters

This name is given to the letters a b c d e f g applied to the tones of the scale. It was believed that Gregory originated this method of notation.

Gregorian tone

A melody written in the Gregorian style. See also Gregorian chant.

gregorianisch (grĕ-gō-rĭ-än'-ish) Ger. adj.

Gregorian.

gregorianischer Gesang (grā-gōr-ĭ-än'-ish-ĕr gĕ-säng') Ger.

Gesang is German for song; hence Gregorian chant.

Magnificent; grand; noble.

grosse caisse (grōs kēs) Fr.

Same as gros tambour.

Grosse Nazard (grōs' - sě nā - tsärd')

Ger. n.

An organ stop tuned a fifth above the principal stops.

grosse Quinte (grōs'-sě kvēn'-tē) Ger.

An organ stop composed of pipes connected with the pedals and producing tones the interval of a fifth higher than the ordinary pitch of the corresponding pedals of the keyboard.

grosse tierce (grōs'-sě tēr'-sě) Ger.

and Fr.

Grosse means great or major, and tierce is French for third. The interval of a major third; an interval of two whole tones.

Grosses Principal (grōs'-sēs prīn-tsī-päl') Ger. n.

A large open diapason stop. One composed of pipes possessing great length and producing tones of deep pitch.

grosses Quintenbass (grōs'-sēs kvēnt'-ēn-bäs) Ger.

Same as grosse Quinte.

Grossgedackt (grōs-gě-däkht') Ger. n.

Literally, double covered: an organ stop composed of pipes which are covered at the top and whose lowest tone is two octaves below middle C, a pitch an octave lower than the ordinary pitch of the principal stops of the organ, hence this stop accompanies or doubles the stop of higher pitch, and receives the name double-covered.

Grossenasart (grōs'-sě-nä-zärt') Ger. n.

Meaning great and nasal and applied to any organ stop whose pipes produce tones a fifth higher than the tones ordinarily signified by the keys which sound them.

grosso (grōs'-sō) It. adj.

Great; grand; full.

Grossvatertanz (grōs - fä - tēr - tänts)

Ger.

The grandfather dance. An old German family dance very popular in the Seventeenth Century and still danced in Germany at the present day. The words sung to the dance tell how simple life was "when grandfather took grandmother to be his bride, then no one thought of borrowing foreign words and manners, especially from the French, then a man's handshake was his oath, and then the wife loved her home and her family." It is three-four time and the

Grossvatertanz

tune is very simple. This dance was popular at weddings and family festivals, and so expressive of German family sentiment that in 1825 the Princess of Hess and the Duke of Saxe Meinigen commanded it to be included in the music composed for their Festival March.

The dance was used much as "Home Sweet Home" is, to conclude an evening's pleasure, and for this reason is often called the "Kehraus," literally, turn-out. It was the popular air of the Seventeenth Century and has been introduced in many musical compositions of later time. Schumann uses it in his Carnival and also in the finale of his Papillons.

grottesco (grôt-tēs'-kō) It. adj.

Grotesque.

ground bass

A simple bass consisting of four or eight bars, which is constantly repeated throughout the entire movement.

group

1. Several short notes tied; a run.

2. A division of the orchestra comprising instruments of the same class; as, the wind-instrument group.

Grund (groont) Ger. n.

Basis; ground; foundation.

Grundakkord (groont'-äk-kōrt') Ger. n.

A chord in which there are no inversions, that is, in which the original position of the notes is not changed.

Grundbass (groont'-bäs) Ger. n.

Literally, fundamental bass. See also ground bass.

Grundlage (groont'-lā-gě) Ger. n.

Literally, foundation: applied to chords it means the first or fundamental position of a chord; that is, when the letter for which the chord is named occupies the lowest position in the chord.

Grundstimme (groont'-shtīm-mě) Ger. n.

Literally, fundamental voice: the bass part.

Grundton (groont'-tōn) Ger. n.

Literally, fundamental tone; hence the keynote; also, the bass note.

A group of short notes tied together.

guide

guaracha (gwä-rä'-chä) Spa.

A national Spanish dance. The measure is lively, and it is written in two different kinds of time, one part in triple, the other in double time. The steps are very graceful.

guaranita (gwä-rä-nē'-tä) Spa. n.

A variety of the Spanish guitar.

Guarnerius

The name given to violins made by Guarnerius. These violins are very highly prized, and were made by the celebrated Guarneri family of Cremona. The early members of this family of violin makers sought to give their instruments form and style, but all their masterpieces yield in fame to the celebrated violins of Joseph Del Gesu. Splendid varnish, wonderful curves, and softness of tone were all characteristic of the Guarnerius; but the tone producing powers of the "Joseph" was its main quality. Until the present century the Stradivarius was preferred by amateurs; but today the Guarnerius is the most popular.

guddok (goo-dōk) Rus. n.

A primitive violin having a guitar-shaped body and furnished with three strings. The tone is weak owing to the imperfect construction.

gue (gū)

An obsolete instrument said to have originated in Shetland. It was a member of the violin family and was furnished with two horsehair strings played with a bow.

Guttural.

gymnastice (jīm-nās'-tī-sē) Grk. n.

Contests of skill among the ancients in which the performance of music formed a principal part.

gymnopædia (jīm-nō-pē'-dī-ä) Grk. n.

One of the four classes of sacred dances of the early Greeks. The gymnopædia were especially performed at

halbe Applikatur

the festivals sacred to Apollo. The dancers were naked youths, wearing chaplets of palms, singing to their dancing. These dances often preceded the Pyrrhic dances at a festival. The gymnopædia were considered among the noblest of all the ancient dances. Sometimes maidens, too, entirely without clothes, were allowed to take part in the dance. Such an air of sacredness pervaded every movement of the dance that its effect was ennobling. All who took part in these dances were well trained dancers. The Greeks so loved beauty that the body was trained to be graceful in movement as well as in outline.

gytarah barbarych

The name by which the guitar is known in that region of Nubia, called Berber.

H

H

1. The German name for B natural, B applying only to B flat in that language.

2. Found in orchestral scores as an abbreviation for horn; in organ music for heel; in music for keyboard instruments for hand, as, r. h., right hand, l. h., left hand.

H bes (hä' bēs') Ger.

The double flat of the note B, hence A natural.

H dur (hä door) Ger.

The key of B major. See also B.

H moll (hä mól) Ger.

The key of B minor. See also B.

Literally, a board on which you chop: the German name for the dulcimer.

hadán Egyp.

The Egyptian call to prayer: a chant which is sung five times a day from the top of the towers or minarets of the mosques. The muezzin, or crier, chants at dawn, noon, four o'clock in

the afternoon, sunset, and nightfall. The chant begins with "God is most great!" and ends with "Come to prayer. There is no deity but God."

Hail Columbia

The music was composed as a march in honor of the election of Washington in 1789. The composer was probably a German, named Johannes Roth, though the honor has also been claimed for a Prof. Pylo. The piece was intended as an instrumental selection and was called the President's March. In 1798 Judge Joseph Hopkins wrote the words. Though few Americans would acknowledge this as our national song, it seems to be thus considered by most European countries and is invariably played by foreign bands in honoring our nation. It is always played in the United States navy at evening colors.

Halbbass (hämp'-bäs) Ger. n.

Literally, half bass: a double bass viol which is a little smaller than the usual size.

Halbcello (hämp'-chěl'-lō) Ger. n.

Literally, half 'cello: a small 'cello.

halbe Applikatur (hämp'-ě äp-plē-kä'toor') Ger.

Literally, half application. See also half shift.

halber Ton

halber Ton (hälp'-ër tōn') Ger.

A half tone.

halbgedackt (hälp'-gě-däkht') Ger. adj.

Literally, half covered or stopped: applied to organ stops composed of wooden pipes producing a flute-like tone and half covered at the top. The cover is of thin, pliable metal and can be rolled back as much as desired if the pitch is to be raised.

Halbinstrumente (hälp'-in-stroo-měn'-tě) Ger. n.

Literally, half instruments; incomplete instruments: the length of wind instruments is generally considered as governing their pitch, but their diameter also has its effect. If the tubes are too narrow the pitch is a little high, and if too wide the pitch is low. Halbinstrumente is a general term referring to those instruments whose diameter is too narrow or too wide to exactly produce the tone having the correct pitch in comparison with its length.

Halbkadenz (hälp'-kä-děnts) Ger. n.

Literally, half cadence. See also half cadence.

Halbmond (hälp'-mōnd) Ger. n.

Literally, half moon, or crescent: a Turkish military musical instrument of crescent shape and having bells or jingles.

Halbnote (hälp'-nō-tě) Ger. n.

A half note.

Halborgel (hälp-ôrkh'-ěl) Ger. n.

Literally, half organ: a small organ; an organ which contains no pipes having a pitch lower than the second C below middle C.

Halbprinzipal (hälp'-prin-tsē-päl') Ger. n.

Literally, half principal: smaller principal; an obsolete organ stop having as a lowest tone the C an octave below middle C. This pitch is an octave higher than that of the typical or principal organ stops, hence the name.

Halbrüdenhorn (hälp-rü'-děn-hörn) Ger. n.

Literally, half hunting horn: a smaller hunting horn; a wooden hunting horn of medium pitch and capable of producing but two or three tones.

Halbschluss (hälp'-shloos) Ger. n.

Literally, a half close: a half cadence, hence to the ear, an unfinished close.

halbstark (hälp'-shtärk) Ger.

Literally, half strong: therefore, mezzo-forte.

half shift

Halbstimme (hälp'-shtim-mě) Ger. n.

Literally, half voice; an incomplete or partial organ stop. See half stop.

Halbtaktnote (hälp'-täkt-nō-tě) Ger. n.

A half note: in playing a horn this means a stopped note.

Halbton (hälp'-tōn) Ger. n.

Literally, a half tone: a semitone.

Halbviolin (hälp'-fē-ō-lěn') Ger. n.

A small sized violin for children, usually about three-quarters of the full size.

Halbwerk (hälp'-vërk) Ger. n.

Literally, half work: an organ in which the stops of deep pitch are lacking; even on the pedals no tone lower than the second octave below middle C can be produced. Another name is Halborgel.

half cadence

Cadence means falling to a close; hence half cadence means a half close, that is, the concluding strain finishes on the fifth and produces an unfinished effect.

half-circle

When four notes in a melody follow each other in such an order that the second and fourth notes are the same note on the staff, these four form a semicircle; as, E, G, B, G.

half close

See half cadence.

half common time

Two-four time; two quarter notes to a measure.

half degree

A half step, a half tone; this is the smallest interval used in music.

half-note

A note equal in value to two quarter notes; a minim; written

half-note rest

A character indicating a pause equal in length to the time of one half note.

half position

In the first position the thumb and first finger are at the extreme end of the violin, close to the bridge over which the strings pass; the first finger presses the first tone or semitone of the open string; the half position is a modified first, in which the second, third and fourth fingers take the place generally held by the first, second and third fingers. The half position makes much easier the playing of pieces in certain keys.

half shift

The second position on the violin;

half shift

that is, when the left hand moves down, and the first finger presses upon the same place occupied before by the second finger.

half soprano

A female voice the register of which does not reach as high as a soprano voice nor as low as an alto.

half-stop

In the organ a stop which is capable of producing only about half of the tones called for by the keyboard with which it is connected.

half treble

Same as half soprano; mezzo-soprano.

halil (hä'l'-il) Heb. n.

A flute or oboe used by the Hebrews; also spelled khalil.

Hall (häl) Ger. n.

Sound; resonance; clamor.

Halldrommete (häl-drôm-mä'-të) Ger. n.

From hallen, to sound or to resound, and drommete, trumpet: hence, a very loud trumpet.

hallelujah metre

A stanza of six lines of iambic measure, the first four lines containing six iambic feet (—) and the last two lines eight iambic feet.

hallen, (häl'-lën) Ger. v.

To sound; resound; clang.

halling (häl'-līng) Nor.

A country dance of Norway.

Halltrompete (häl-trôm-pā-të) Ger. n.

See Halldrommete.

Halmpfeife (hälm'-pfif-ë) Ger. n.

Literally, grain pipe: a shepherd's pipe made from a grain stalk.

Hals (häls) Ger. n.

1. Neck of a violin.

2. Throat of a singer.

3. Stem of a note.

halsening Anglo-Saxon and Ger. adj.

Rough; sounding harshly in the throat.

Halt (hält) Ger. n.

A halt; pause; stop; hold.

hammer

1. That part of the action of the piano which strikes the strings causing them to vibrate and produce tones.

2. The mallet with which the strings of a dulcimer are struck.

3. The clapper of a bell.

Hammerklavier (häm'-mër-klä-fë'-ër) Ger. n.

The piano: a klavier or keyboard instrument furnished with hammers for striking the strings in producing tones.

Handbildner**hanacca** (hä-näk'-kä) It. n.**hanaise** (ä-nëz) Fr. n.**Hanakisch** (hän-äk'-ësh) Ger. n.

A dance of Moravia, written in three-four time. It is danced more rapidly than the polonaise, but is similar to it in rhythm.

hanche (änsh) Fr. n.

See anche.

Hand (hänt) Ger. n.

Hand. Abbr. h.

hand-drum

A tambourine.

hand-guide

An instrument invented by Kalkbrenner for the purpose of assisting young players to acquire a good position of the hands on the piano.

hand, Guidonian

See Guidonian hand.

hand-harmonica

An accordion.

hand-horn

A horn without valves or slides, so curved that the bell of the horn is within reach of the player's hand. By inserting his hand in the bell, the player shortens the length of the air passage, and thereby raises the pitch of the note. By this device, discovered by Hampel in 1770, some of the missing notes in the chromatic scales could be produced. It is still used in playing some of the compositions of the early part of the last century.

hand-note

In playing horns that have neither slides or valves certain notes can be produced only by thrusting the hand into the bell of the horn. This raises the pitch and produces a tone slightly muffled.

hand-organ

The name sometimes given to a portable barrel-organ that is played on the streets. See barrel-organ.

Handbassl (hänt'-bäs'l) Ger. n.

An obsolete string instrument between a cello and a viola.

Handbildner (hänt'-bilt-nër) Ger. n.

Literally, a hand former: hence, a hand-guide; a mechanical arrangement consisting of two wooden rails attached in front of and parallel with the keyboard of a piano, and a pair of open gloves, into which the hands fitted. It served to hold the hands of the beginner in position so that the fingers struck the keys vertically and the wrists were prevented from sinking. Also called chioplast.

harmonic flute

causes the column of air contained in the pipe to vibrate in two equal lengths, thus producing a tone an octave higher than that which would be produced by the entire pipe. Consequently the tone is sweet and clear. The lowest tone of the stop is an octave below middle C.

harmonic hand

A figure of the left hand with the names of the notes of the scale named upon the joints and fingertips in such a way that the names may be easily memorized. It was invented by Guido, an Italian musician of the Eleventh Century, and is called Guidonian hand. See also Guidonian hand.

harmonic mark

The sign  placed over certain notes in violin, violoncello and harp music, indicating that these notes are to be harmonics; which can be obtained by lightly touching the strings at certain points and thus causing them to vibrate. See also harmonic.

harmonic minor

A scale in which the semitones fall between the second and third, and seventh and eighth tones; both in ascending and descending the scale.

harmonic note

A tone obtained on a harp or instrument of the viol family by touching lightly with the finger tip a nodal point; that is, any point that will cause the string to divide into equal parts such as halves, thirds and fourths, so that the string can not vibrate as a whole but in sections. Such high pure tones are also called flageolet tones or harmonic tones.

harmonic piccolo

An organ-stop whose tube is twice the normal piccolo length, but pierced in the middle with a small hole. These holes cause the air column to divide into two parts and thus produce a tone an octave higher than the tone ordinarily produced by a pipe having such a length. See harmonic stop.

harmonic progression

See progression.

harmonic reed

In an organ a reed pipe twice its normal length, but pierced in the middle with a hole. This hole causes the air column to divide into two parts and thus produces a tone an octave higher than the tone ordinarily produced by a pipe having such a length. See also harmonic stop.

Harmonica-ätherisch**harmonic scale**

A scale formed by a series of natural harmonics, which are the higher and indistinct tones accompanying the production of any given tone and so blending with it as to form, apparently, a single note. The harmonic is the scale of all brass instruments without valves or pistons. With open C, the tones which form the harmonic scale will be: C-c-e-c'-e'-g', bb'-c''-d''-e''-f#''-g''-c'''-d'''-e'''.

harmonic series, natural

See natural harmonic series.

harmonic stop

In organ building this means a pipe having twice its ordinary length, but pierced in the middle with a small hole. This hole divides the air column into two parts and thus produces a tone one octave higher than the tone ordinarily produced by a pipe having such a length. The tone is clear and brilliant, and by this contrivance such stops may be safely subjected to high wind pressure without being overblown, that is, producing a tone higher than the one desired. They are used to produce striking solo effects.

harmonic triad

The common chord of three notes, made up of the fundamental note, plus notes at intervals of a third and a fifth, respectively.

harmonic trumpet

An old instrument much like the trombone. Also called sackbut.

harmonica

1. A musical instrument developed by Benjamin Franklin from the musical glasses. It consists of a series of graduated glass bells, fastened in a row upon a spindle, which is revolved by a treadle, the edges of the glasses passing through a trough of water, fixed below the spindle. The player, rubbing the wet edges of the glasses with the fingers, can produce the scale and melodies, even being able to sound chords. Also an instrument in which flat glasses, or pieces of steel, are struck by small hammers. It has a compass of about two octaves from middle C, upwards.

2. The name of an organ-stop of delicate tone.

Harmonica-ätherisch (här-mō-nē'-käh-ä'-tēr-īsh) Ger. n.

In German organs, a delicate mixture stop, or compound flue-stop, consisting of two to six ranks of pipes. See also Harmonika-ätherisch.

harmonica harpsichord

harmonica harpsichord

A glass harmonica furnished with a keyboard.

harmonica, keyed

See keyed harmonica.

harmonica, nailed

A name sometimes given to the Nagelgeige or nail-violin.

harmonical mean

The middle note in a chord of three notes.

Harmonicello (här - mön - ĩ - chël' - lõ)
Ger. n.

An instrument greatly resembling the cello but having fifteen strings. It is played with a bow. John Karl Bischoff of Nuremberg invented it in the latter half of the Eighteenth Century.

harmonichord

A piano-violin. This musical instrument had keys and strings like those of a piano; when the keys were struck, the strings pressed against a small revolving cylinder, which was covered with rosined leather. This produced violin-like tones; the cylinder rubbing against the strings acted as a bow to produce the sounds.

The ancient Greek musicians who developed the theory of music from the actual sounds themselves; as opposed to the canonici, who developed the theory of music mathematically.

harmonicon

1. Popularly called a mouth organ. A small instrument consisting of a number of little rectangular reeds set side by side in a frame. The tones are produced by blowing into the instrument or inhaling through it. It is really a toy, though recent inventors have produced complicated forms. Also called mouth-harmonica.

harmonicon, rock

See rock harmonicon.

harmoni-cor (är-mō-nē-kôr) Fr. n.

An instrument invented by Jaulin of Paris, and consisting of a series of free reeds contained in a clarinet-like tube. The wind is supplied from the lungs through a long mouthpiece or rubber tube. Along the side of the instrument are two rows of keys, the lower row giving the natural notes, and the upper, the chromatic notes.

Harmonielehre (här-mō-nē'-lā'-rë)
Ger. n.

Lehre means theory: hence theory of harmony.

Harmoniemusik (här - mō - nē' - moo - zëk') Ger. n.

1. The music for the wind instruments in the orchestra, both brass and wood.

2. Music for a military band.

harmonieren (här-mō-nē'-rën) Ger. v.
To harmonize.

Harmonietrompete (här-mō-nē'-trôm - pā'-të) Ger. n.

Literally, a harmonious trumpet: a trumpet upon which muted notes can be successfully played.

harmonieusement (är-mōn-yüz-män)
Fr. adv.

Harmoniously; musically.

harmonieux (är-mōn-yü) Fr. adj.

Harmonious; sweet; agreeable.

Harmonieverständiger (här-mō-nē'- fār-shtën'-dikh-ër) Ger. n.

Literally, one who understands harmony; a harmonist.

Harmonika (här-mō'-nē-kä) Ger. n.

The harmonica.

Harmonika-ätherisch (här-mō-nē'-kä'- ä-tër'-ish) Ger. n.

Literally, harmonica ethereal: an organ stop in which two or more pipes sound when a key is depressed. The pipes are so fashioned as to produce a very delicate and pleasant tone.

Harmoniker (här-mō'-nē-kër) Ger. n.
A harmonist. In the plural, the harmonici.

Harmoniphon

Harmoniphon (här-mō'-nī-fōn) Ger. n.

A small musical instrument containing a set of free reeds. The wind is supplied by the breath through a mouthpiece, and is controlled by a small keyboard like that of a piano. This instrument was invented to take the place of hautboys in an orchestra.

harmoniquement (är-mō-nēk-män) Fr. adv.

Harmonically.

harmonist

1. One well versed in the principles of harmony.

2. A composer.

harmonium (här-mō'-nī-ŭm)

A keyboard instrument patented by Alexandre Dubain in Paris, in 1840. A reservoir bellows is supplied with wind by means of treadles and sounds are produced by forcing a current of air upward through a row of free reeds, or flexible strips of brass, made fast at one end and so exactly fitted into a slot that the free end vibrates without striking the sides or the other end. The keys open valves which direct the wind from the bellows against the reeds and each draw stop opens communication with a separate row of reeds. The wind pressure from the bellows is constant, producing tones of uniform or equal strength, and loud and soft effects are procured by means of the expression stop which cuts off the reservoir-bellows and allows the wind from the treadles to directly reach the reeds. Thus the performer has full control over the power of the tone. The harmonium is the prototype of the reed organ. In harmonium music the stops to be used are indicated by figures in a circle as follows:

① below the bass staff denotes the cor anglais; above the treble staff, the flute.

② signifies bourdon, below the bass staff, and clarinet when placed above the treble staff.

③ signifies clarion, when below and piccolo when above.

④ indicates bassoon when below, oboe when above.

harmonium organ

A harmonium or reed-organ of great compass and power designed to be used as a substitute for an organ.

harmonize

To combine two or more parts according to the laws of harmony so

harmony

as to produce a good musical effect; to set accompanying parts to, as an air or melody.

harmonometer Eng. n.

harmonometre (är-mō-nō-mätr) Fr. n.

A monochord or instrument for measuring the harmonic relations of sounds. It often consists of a single string stretched over movable bridges.

harmony

In its earliest sense, among the Greeks, harmony was a general term for music, and it is thus used today in poetry. Harmony is literally a fitting together, and hence its modern application to a proper arrangement of sounds in a scale.

Among the Greeks harmony never passed beyond the use of accompanying chords. Under this head they treated: the divisions of the monochord, the three genera, the sounds proper to the different modes, the shape and position of the letters used to represent the musical sounds, and tune-making to some slight degree, though they knew little about this latter subject. During the Middle Ages harmony as an art progressed more rapidly than the science of harmony, the development of which was hindered by the writers upon the subject who wished to base all progress in music upon the ancient Greek standards. Medieval attempts at harmony were called diaphony and organum, in which the parts for two, three or four voices progressed in parallel motion either an octave, twelve semitones, a fifth, seven semitones, or a fourth, five semitones, apart. Diaphony and organum were succeeded by discantus which was at first merely the combination of two tunes in such manner as to make them endurable when sung together. From discantus sprang counterpoint, the support of melody by melody, and polyphonic music, which consisted of two or more parts treated independently. Not until the beginning of the Seventeenth Century did harmony as we now conceive it become known.

Loosely, the term is applied to any combination of tones or chords which produces music, but specifically it applies to a group of tones of different pitches sounded as a chord. It is also used in reference to the structure of the chords, or harmonies, in contradistinction to the melody, or rhythm, all of which are essential ele-

tones are produced upon strings, but which are not played with bows.

harp, Irish

See Irish harp.

harp, jews'

See jews'-harp.

harp, key

See key harp.

harp-lute

See dital harp.

harp-lyre

An instrument having a flat, circular body from which rise three necks joined together at the top by a cross-piece. Each neck is fretted, and along the left-hand neck are drawn the seven bass strings, along the middle one are drawn six accompaniment strings which furnish the harmony, and along the right-hand neck are drawn seven strings upon which the melody is played.

harp pedal

The soft pedal.

harp, single action

A harp in which the pitch of the strings can be raised only a semitone. In the modern double action harp it can be raised a whole tone.

harp style

Played as you play a harp, striking the chords in a manner to produce a rippling sound, one note following the other in quick succession; arpeggio style.

harp treadle

The pedal of a harp. The use of the single action pedal raised a note one semitone; the double action pedal, two semitones. See also harp.

harp, triangular

A harp having a triangular frame. The ancient harps were of this kind.

harp-way tuning

A popular early English method of tuning the viola da gamba. This style of tuning was so called because it made arpeggio playing easy.

harp, Welsh

An ancient harp having ninety-eight gut strings, arranged in three rows. The outer rows produced the natural notes and the center row gave the flats and sharps.

The harp.

harpe, Eolienne (ärp' ä-ō-lī-änn') Fr.

The Æolian harp.

harpechorde (ärp-kôrd) Fr. n.

The harpsichord.

harpeggieren (här-pëg-gë'-rën) Ger. v.

To play the chords harp fashion,

hasur

that is, to play the notes of a chord one after the other like a ripple, instead of striking them all at the same time. To play arpeggio.

harpicordo (är-pī-kôr'-dō) It. n.

The harpsichord.

harpsecol (härp'-sī-kül)

Another name for harpsichord.

harpsichord

An improved form of the spinet or virginal, having a greater number of strings which, in order to be accommodated, required that the frame be changed from its trapezoidal form to harp-shape, hence the origin of the name. Some instruments were furnished with double or triple banked keyboards, one or more causing each quill to pluck but one string and the other operating upon two strings. Each maker displayed individual ideas to such an extent that the harpsichord as a type is hard to describe. See also spinet.

harpsichord graces

Grace notes were used very much in harpsichord music; and one of the essentials in learning to play this instrument was to understand well the playing of grace notes. About a dozen signs were used to indicate different kinds of turns and trills. These little ornamental notes added much to the music of the harpsichord, since the tones of the instrument lacked body.

harpsichord, vis-à-vis (vë-zä-vë)

Vis-à-vis is the French for opposite; hence, a harpsichord having two keyboards placed on opposite sides of the instruments, the players facing each other. Called also double harpsichord.

harsur (här'-zoor) Heb. n.

An old Hebrew instrument of ten strings.

hart (härt) Ger. adj.

Hard; harsh; unprepared; major.

hart vermindeter Dreiklang (härt fër-mën'-dër-tër drī'-kläng) Ger.

Literally, hard, diminishing three-tone: a triad with major third and diminished fifth; a three-tone chord consisting of a note plus notes at intervals of a major third or two whole tones, and a diminished fifth or three whole tones.

Hartklingend (härt-klīn'-khënd) Ger. n.

Harsh sounding.

hasur (hä'-zoor) Heb. n.

A dechordon; an instrument of ten strings used by the Hebrews.

Principal accent.

Hauptakkord (howpt-äk-kôrd') Ger. n.

Chief or fundamental chord: a chord having the first note of the scale for its lowest note and consisting of that note plus other notes at intervals of a third and a fifth.

Hauptgesang (howpt-gě-zäng') Ger. n.
Chief song or melody.

Hauptkadenz (howpt'-kă-děnts') Ger. n.

Literally, chief cadence; full cadence.

Hauptmanual (howpt' - män - oo - äł') Ger. n.

Literally, principal manual: the great organ.

Hauptmelodie (howpt' - mël - ō - dē') Ger. n.

Principal melody.

Hauptnote (howpt'-nō-tě) Ger. n.

Literally, principal note: an accented note; melody note; the note on which the chord is built.

Hauptperiode (howpt' - pā - rī - ōd - e) Ger. n.

Principal period.

Hauptprobe (howpt'-prō-bě) Ger. n.

Principal rehearsal; final rehearsal.

Hauptsatz (howpt'-zäts) Ger. n.

Principal theme or subject. Abbr. H. S.

Hauptschluss (howpt'-shloos) Ger. n.

Literally, principal close: full close; final cadence.

Hauptseptime (howpt'-zěp-tī-mě) Ger. n.

Literally, chief seventh: the chord of the dominant seventh, the four-toned chord which takes the dominant or fifth note of a scale for its bass and adds the notes at intervals of a third, fifth and seventh above it, respectively.

Hauptstimme (howpt'-shtīm-mě) Ger. n.

Principal part or voice.

Hauptthema (howpt'-tē-mä) Ger. n.

Chief theme or subject.

Hauptton (howpt'-tōn) Ger. n.

Literally, head tone, principal tone.

1. Fundamental tone.

2. Principal accent.

3. The keynote.

4. In a three-tone chord consisting of the first note of a scale plus notes at intervals of a minor third and a fifth, this term is applied to the note at an interval of a fifth.

hay

Haupttonart (howpt'-tōn-ärt) Ger. n.

The principal key.

Hauptwerk (howpt'-vėrk) Ger. n.

Literally, chief or main work; the great organ. Abbr. Hauptw., Hptw., H. W.

hausse (ōs) Fr. n.

Literally, something that lifts up: hence, the nut of a bow.

haut (ō) Fr. adj., mas.

High; shrill.

hautbois (ō-bwä) Fr. n.

Derived from haut, meaning high, and bois, meaning wood; hence, a wood-wind instrument capable of very high notes. This is the highest pitched of the oboe family to which it belongs, and it is used for the high parts. Hautboy in English is a corruption of the French pronunciation. The more popular name is oboe.

hautbois d'amour (ō-bwä d'ă-moor) Fr.

Literally, an oboe of love: an oboe having an alto pitch. Its tone was subdued and especially sweet. It is obsolete now.

hautboy (hō-boy)

See hautbois. Abbr. Haut.

hautboy-clarion

An organ stop composed of pipes producing a tone of similar quality to that of an oboe, and pitched an octave higher than the ordinary pitch of the keys which sound them.

hautboy, octave

See octave hautboy.

hautboy stop

A group of pipes in the organ fitted with reeds and producing a tone similar to that of the oboe.

hautboyist (hō'-boi-ist)

One who plays the hautboy; an oboist.

High; shrill.

haute-contre (ōt-kōñtr) Fr. n.

High tenor. Abbr. H. C.

haute-dessus (ōt-děs-sü) Fr. n.

High treble, soprano.

haute-taille (ōt-tä-ē) Fr. n.

High tenor.

hautement (ōt-măñ) Fr. adv.

Haughtily; boldly.

hay

A figure in a dance common in England during the reign of Elizabeth. The origin of the name is uncertain, and little that is definite is known about it. From allusions made to it by writers of that time it appears to have been a winding figure dance, something of a quadrille figure, the

hay

women standing still in a row, and the men dancing among them. Again an equal number of men and women danced it after the manner of a reel.

head

1. The membrane stretched upon a drum.

2. That part of the violin or other stringed instrument in which the pegs are inserted.

3. The point of the bow.

4. The portion of a note which determines its position on the staff.

head voice

The upper or highest register of the voice.

hecklephone

The baritone oboe having a pitch an octave lower than the bassoon. Only recently has it come into general use.

heel

A kind of a wooden brace which joins the neck of a violin and similar instruments, to the body. Abbr. H.

Heerhorn (hār'-horn) Ger. n.

Heer is the German for army; hence, a military trumpet; a battle-horn.

Clear; serene; bright.

Heldenlied (hěl'-dēn-lēt) Ger. n.

Heroic song.

heldenmüthig (hěl'-dēn-mü-tīkh) Ger. adj.

Heroic: of heroic courage.

Heldentenor (hěl'-dēn-tēn-ör) Ger. n.

Literally, heroic tenor; dramatic tenor.

helicon

Helikon (hěl'-ī-kön) Ger. n.

1. An ancient instrument made by the Greeks for measuring the intervals between different tones.

2. A modern brass wind instrument much used in bands. It is a circular trumpet-family instrument and is carried over the shoulder while marching. It has a low register.

hell (hěl) Ger. adj.

Bright; clear; sonorous.

helper

A pipe which in some organs is placed beside another pipe of certain

heraufgehen

stops and is capable of producing a tone an octave higher than the other, thus adding brilliancy to what otherwise would be a hollow tone.

hemidiapente (hēm-ī-dī-ä-pēn'-tē) Grk. n.

Diminished or imperfect fifth; a perfect fifth or three and a half tones diminished by a half tone; an interval of three whole tones.

hemiditonos (hēm-ī-dīt'-ō-nōs) Grk. n.

An interval of a minor or lesser third, or one and a half tones.

hemiola (hēm-ī-ō-lä) Grk. n.

hemiolia (hēm-ī-ō'-lī-ä) Grk. n.

Literally, the whole and a half; technically, the proportion of two to three. The word is used in the latter sense in medieval music to denote an interval containing three whole tones and one semitone, the sound of which is produced on the monochord by two-thirds of the open string. This term is also applied by writers of the Sixteenth Century to certain rhythmical proportions, corresponding to the triplets of modern music; also a group of three notes introduced, in the midst of a piece, in place of two.

hemiope (hēm-ī'-ō-pē) Ger. n.

A flute having three finger holes, used by the ancient Greeks.

heptachord (hěp'-tä-kôrd) Grk. n.

1. A series of seven notes.

2. An instrument with seven strings.

3. Interval of a seventh.

4. In Greek music, a series of seven tones, with a half-tone step between the third and fourth.

heptade (hěp'-täd)

heptadechord (hěp'-täd'-ē-côrd)

Terms invented by John Alexander Ellis, and used in his system of acoustics in the appendices to the second English edition of Helmholtz's work, *On the Sensations of Tone*.

heptameris (hěp'-tām'-ě-rīs) Grk. n.

The seventh part of an meris which is the sixth part of an octave; hence, the forty-second part of an octave.

Herabstrich (hār-äp'-strīkh) Ger. n.

Literally, down stroke; down stroke of the bow on a stringed instrument.

heralds

A name formerly applied to minstrels, because on account of the strength of their voices, they were assigned the duty of animating the soldiers in battle, and of making proclamations at public festivities.

heraufgehen (hār-owf'-gā-ēn) Ger. v.

To ascend.

high bass

high bass

A barytone: a voice between bass and tenor.

High Mass

A mass celebrated in the Roman Catholic Church with deacon, subdeacon and a full corps of minor ministers is called a solemn or grand high mass. It is called high from the fact that the greater part of the service is chanted in a high voice by the celebrant, and grand because of the ceremonies attending it. If the deacon and subdeacon are absent such a mass loses some of its formal ceremony and is called a simple high mass. Such is the usual form for the principal mass on Sundays and feast days. At this service three candles must be lighted on each side of the altar, incense is used and the Asperges or sprinkling of holy water accompanied by the singing of the Fifty-first Psalm, Purge me with hyssop, precedes the mass. The musical service of the mass comprises, the Kyrie, the Gloria, the Credo, the Sanctus and Benedictus and the Agnus Dei. It has received treatment at the hands of musicians of all ages, and has been set to the original plain chant of the ancient church; to the elaborate and almost fantastic counterpoint of the Middle Ages, which brought about the reaction of the severe style of Palestrina in order that propriety be observed; and to the modern operatic arrangement, requiring a full chorus with orchestral accompaniment.

higher rhythm

A rhythmical form composed of several smaller ones.

Highland fling

A very characteristic Scotch dance. It may be danced alone or in company with any number of persons. The music is in rapid four-four time, and is of an animated jerky character. The dance gets its name from the peculiar fling of the foot at the end of each step as the dancer dances alternately on one foot and then on the other. The modern Highland fling is less jerky, the dancers, forming a single row, move together through a number of pretty, graceful figures, keeping time to the music and accompanying some of their gestures with stamping of feet.

Hilarodia (hī-lār-ō'-dī-ä) Grk. n.

Songs and lyric poems sung by the Hilarodi, a class of musicians, who

Hisis

carried their instruments and traveled from one place to another, singing songs.

hilfs (hīlfs) Ger. adj.

Literally, helping; auxiliary.

Hilfsnote (hīlfs'-nō-tě) Ger. n.

Literally, a helping note; an auxiliary note.

Hilfstimme (hīlfs'-shtīm-mě) Ger. n.

Literally, helping voice: a stop composed of several pipes to each key of the keyboard. They are pitched to produce tones of higher pitch than the corresponding keys, consequently, the tone is brilliant and the stop is used in connection with other stops having duller voices, to help out the tone. The equivalent of the term mutation stop in the organ.

Hinaufstrich (hīn-owf'-shtrīkh) Ger. n.

From *hinauf*, meaning up, away from the speaker and *strich* meaning stroke; hence, an upward stroke of the bow away from the player.

hinchar (ēn-tchär') Spa. v.

To inflate, to fill an instrument with air.

hindudeln (hīn'-doo-děln) Ger. v.

To drum.

Hinstrich (hīn'-shtrīkh) Ger. n.

Hin means away from the speaker, *strich* means stroke; therefore, the upward stroke of the bow on a cello or a double-bass.

Hintersatz (hīn'-těr-zäts) Ger. n.

Literally, placed behind: a stop found in old German organs and composed of several pipes to each key of the keyboard. The pipes were pitched at various intervals and sounded as a reinforcement of the diapason, or principal organ stop, behind which it was placed.

Hirtenflöte (hīr'-těn-flā'-tě) Ger. n.

Literally, shepherd's flute; shepherd's pipe; pastoral flute.

Hirtengedicht (hīr'-těn-gě-dīkht') Ger. n.

A pastoral poem.

Hirtenlied (hīr'-těn-lět) Ger. n.

A pastoral song.

Hirtenpfeife (hīr'-těn-pfī'-fě) Ger. n.

Literally, shepherd's pipe; pastoral pipe.

hirtlich (hīrt'-līkh) Ger. adj.

Pastoral; rural.

His (hīs) Ger. n.

The name for B sharp.

Hisis (hīs'-īs) Ger. n.

The name for the double sharp of the note B, hence C sharp.

hitch pins

hitch pins

The little pins or pegs in the plate of a piano, to which the strings are attached.

hiven Chi. n.

One of the eight species of sound in the Chinese musical system, being that produced by instruments of baked earth.

The Chinese musical system ignores semitones, technical harmony and counterpoint but nevertheless is a very complicated system. For instance, in instrumental music, marks indicate what string is to be played, what fingering is to be used, and so many other details that the system is very difficult to comprehend, and playing by ear is far more common than playing by note.

For orchestral music they use a perpendicular staff, with no distinction of keys, and with the length of time given to each note indicated at the side. A curious fact about the Chinese orchestra is that they play by ear.

Before the year 1100 it is probable that the Chinese used the Pentatonic scale—a scale consisting of a combination of five fixed sounds, but in that year an F sharp and B natural were added. This scale was used until the beginning of the Fourteenth Century A. D. After the Mongolian invasion a scale with F natural was introduced; but there was so much confusion between F and F sharp that all semitones were abolished and a regular Pentatonic scale of five tones, C, D, F, G and A, adopted.

hlud A. S. adj.

Loud.

Hoboe (hō-bō'-ě) Ger. n.

A German name for oboe or haut-boy.

Hoboist (hō-bō-ist') Ger. n.

One who plays the oboe.

Hoboy (hō-bō'-ē) Ger. n.

Same as Hoboe.

hoch (hōkh) Ger. adj.

High; grand; great.

hochfeierlich (hōkh'-fī'-är-likh) Ger. adj. or adv.

Exceedingly solemn.

Hochgesang (hōkh'-gě-zäng) Ger. n.

Ode; hymn.

Hornquinten

two horns were sounded together, the first tones E and C would be the interval of a sixth apart, but the next tones G and D would be the interval of a fifth. Musicians consider that between the two intervals there is another interval of a fifth understood, although not written, because in progressing from E to G the second horn must pass through F, which would make the interval of a fifth with C. This is called a hidden or covered fifth and is forbidden by a strict rule governing good harmony, as all are consecutive fifths, that is, the practice of allowing two parallel voices or parts to remain the interval of a fifth apart in two or more successive chords.

Technically, the covered fifths produced by the natural tones of a pair of horns.

hurdy-gurdy

An obsolete instrument, most popular during the Eleventh and Twelfth Centuries. Its musical value was not great and it gradually passed out of use, finally being used almost entirely by street musicians, from which fact the name has been erroneously applied to the street piano of the present day. The hurdy-gurdy was a pear-shaped instrument having from four to six wire strings and with a rosined wooden wheel just above the tail-piece. The player turned this wheel by means of a crank located in the tail-piece. Over the face of the instrument was set an oblong box fitted with keys, which were depressed by the fingers of the left hand, the instrument being held in such a position that the keys fell back into their proper places. A wedge-shaped piece of brass, in the rear of the key lever, pressed the strings against the rosined wheel. Two of the strings tuned in unison were acted upon by the keys, and were used in producing the melody. The others were drones and gave but one tone each throughout a composition. In the beginning the hurdy-gurdy was made so large that two performers were necessary, one to turn the wheel and another to touch the keys.

iambus (ī-ām'-būs) Eng. n. from Grk.

A metrical foot consisting of two syllables or notes, the first short or unaccented, the second long or accented. The literal meaning is "to

assail with words," the form being thus named because first used by Greek satiric writers. Iambics were songs or satires which are supposed to have been the forerunners of early comedy. These were of two kinds, one for singing and one for recitation with instrumental accompaniment. Iambic rhythm is the commonest in English poetry because the easiest to prolong and thus adaptable to epic, dramatic or descriptive writing. Fully three-fourths of all English poetry is written in this form and most of that in iambic pentameter, five feet in a line. The so-called heroic couplet is written in iambic pentameter.

iambus

Iambic hexameter, six feet to a line, is called Alexandrine, because old French poems in praise of Alexander were written in it. The last line of the Spenserian stanza is in this form, but otherwise it is seldom used in modern poetry.

Iambic heptameter is frequently employed in hymns and ballads and is generally divided into two lines, one of four, the other of two feet.

Iambic octometer is usually written as two lines of four feet each. This is the long metre of hymns.

the other parts are indicated by Arabic numerals written above and below the bass notes.

4. Notation, the art of representing musical sounds by written characters.
integer valor notarum (in'-tē-jūr vā'-lōr nō-tā'-rūm) Lat.

Untouched: integral value of the notes. Their absolute duration at an average tempo, a question of high importance before the invention of tempo marks and the metronome. According to Michael Prætorius, about 1620, about eighty tempora, that is, breves which were then the units of measure, should fill seven and a half minutes.

intendant (ãñ-tãñ-dãñ') Fr. n.

interligne (ãñ-těr-lěn') Fr. n.

Space: the space between two lines of the staff.

interlude

1. A short musical composition, impromptu or prepared, played between the acts of a play. In this sense, equivalent to *intermezzo*.

2. Intermediate strains or passages played between the verses of a canticle or hymn.

3. An instrumental piece played between parts of the church service.

interludium (in-těr-lū'-dī-ŭm) Lat. n.

Interlude.

1. A piece of music detached, introduced between the acts of an opera, or a play.

2. A short movement in the symphony taking the place of the scherzo.

3. A movement placed between two others.

4. Music performed between the verses of a hymn, also music performed between certain parts of a church service.

intermède (ãñ-tär-mäd') Fr. n.

Same as *intermezzo*.

intermediate

A term applied to those sharps and flats which do not belong in the original key of a composition. The same as accidental.

interrupted cadence**intermediate symphonies**

Short, instrumental passages introduced in long, vocal compositions to relieve the strain on the voice, and to heighten the effect.

intermedietto (in-těr-mã-dī-ět'-tō) It. n.

A short interlude:

1. A short piece to be performed between the acts of a play.

2. A short musical passage between verses of a hymn or canticle or between portions of the church service.

intermedio (in-těr-mã'-dī-ō) It. n.

intermezzo (in-těr-měd'-zō) It. n.

An interlude; a short movement connecting the larger movements of a symphony or sonata, or introduced between the acts of an opera. Short musical compositions originally very simple and quite independent of each other, but later they were more elaborate and even were treated as separate parts of the whole musical drama but of less serious nature than the main work. In dance suites the *intermezzo* usually occurred between the sarabande and the gigue.

international pitch

This is identical with French pitch of A on the second space of the treble clef, whereby it has four hundred and thirty-five double vibrations per second. This has been adopted by most countries.

interrogativus (in-těr-rög-ä-tī'-vūs) Lat. adj.

Interrogative: one of the musical inflections which, in a measure, corresponds to punctuation marks in ordinary writing, and which is used in reciting the collects. The *interrogativus* is used for questions and consists in lowering the tone a second, that is, to the next tone below it, then raising it again to the note on which the greater part of the psalm is chanted, that is, the dominant or fifth note of the scale.

interrotto (in-těr-rôt'-tō) It. adj.

Interrupted, imperfect: said of a cadence, accent or rhythm.

interrupted cadence

A cadence broken into; a cadence which seems to be leading to the conclusion of the harmony and is interrupted by some chord or chords that seem to the ear to defer the conclusion. After the harmony of chords built on the dominant or fifth note of the scale, the ending which fully satisfies the ear is a chord built on the

interrupted cadence

tonic or first note. Where some other chord comes when this chord is expected, or when some other chord comes in before it, leading the ear to expect something further before the end, this is called an interrupted cadence.

interruzione (in-tēr-root-sī-ō'-nĕ) It. n.

Interruption; suspension: as used in the phrase, *senza interruzione*, play on without interruption.

interval

The difference in pitch between two tones. It is usually reckoned from the lower upward. Equivalent to *intervale* (Fr.); *intervall* (Ger.); *intervallo* (It.); *intervallum* (Lat.).

interval, augmented

An interval, a half tone greater than a major or perfect interval.

interval, consecutive

An interval passing in the same direction in two parallel parts, as when two parallel parts or voices of a score proceed in succession by similar motion.

interval, diminished

An interval, a half tone less than a minor interval or a perfect interval.

interval, enharmonic

An interval of less than a half tone. An interval which, according to the fixed distribution of notes in the modern musical system, is only nominal, as G sharp to A flat. On instruments like the piano whose tones are rigidly tuned to a given pitch, G sharp and A flat are the same note and played on the same key, because G sharp is a half tone higher than G, and A flat is a half tone lower than A, and G and A are consecutive tones. Actually, there is a slight difference between the two intervals as may be seen by comparing the interval of A flat to F, a major sixth, or interval of nine half steps with the interval of G sharp to F natural, a diminished seventh, also an interval of nine half steps. The relative vibrations of A flat to F are as one hundred and twenty-five to seventy-five, while the relative vibrations of G sharp to F natural are as one hundred and twenty-eight to seventy-five. This difference is too small to be taken account of in practical music and is only taken account of in the theoretical consideration of the subject.

interval, extreme

An interval a half tone greater than

intonato

a major interval. Also an interval smaller than a minor. The same as augmented interval.

interval, prepared

See prepared interval.

interval, redundant

See redundant intervals.

intervalli vietati (in-tēr-väl'-lĕ vĕ-ā-tä'-tĕ) It.

Forbidden intervals: intervals contrary to the rules of harmony.

intervals, parallel

Intervals passing in two parallel parts, either ascending or descending.

intervening

Coming between; intermediate; as the intervening subject of a fugue, an idea similar to the principal or counter subject of a fugue, introduced for embellishment.

intimissimo (in-tī-mīs'-sī-mō) It. adj. and adv.

1. (adj.) Most heart-felt.

2. (adv.) With fervent expression.

intimo (in'-tī-mō) It. adj.

Inward, heart-felt, as used in the phrase, *con intimo sentimento*, with deep genuine feeling.

intonare (in-tō-nä'-rĕ) It. v.

To pitch the voice; to begin to sing; to fix the keynote; to tune; to resound; to set to music; to compose.

Huntsman's horn. Same as Jagdhorn.

jailtage

The only musical instrument of the Tartars. Its six wire strings are stretched across the open side of a box of firwood about four feet in length and three inches in width, and is played by plucking with both hands, particularly the left. The

instrument is tuned by placing a bridge under each string and shifting its position until the required tone is obtained.

jaleme (yā-lē'-mē) Grk. n.

A dirge or song of lamentation among the ancient Greeks.

jaleo (hä-lā'-ō) Spa. n.

A Spanish national dance performed by one person. The music is in three-eight time, and moderately slow.

Jalousieschweller (yäl-oo-zē'-shvēl-
lër) Ger. n.

This word is composed of Jalousien, meaning Venetian blinds, and schweller, to swell, and is applied to the swell of an organ, a box enclosing a number of the pipes and fitted with a sliding front fashioned like a Venetian blind. When the front is closed the sound produced by the pipes is faint, but it can be greatly increased by allowing the front to slide up. See also organ.

jammerend (yā'-mër-ënt) Ger. part.

Lamenting; mourning; wailing.

jammerlich (yā'-mër-likh) Ger. adj.

Lamentable; miserable; deplorable; piteous.

Janitscharenmusik (yā - nīt - shä' - rën-
moo-zēk) Ger. n.

Janizary music, noisy band music. Also called Turkish music.

Janizary music

The music of the Janizaries, a body of Turkish infantry soldiers, was abolished in 1826. This music consisted of noisy pieces for the cymbals, drums, triangles and shrill wind instruments. The Janizaries' band is said to have been made up of two large oboes and three small ones, a piccolo, flute, three kettledrums, four long drums, two triangles and three pairs of cymbals.

janko keyboard (yän-kō) Hun.

A keyboard invented in 1882 by Paul von Janko, a Hungarian pianist. It consists of six rows of keys arranged, one above the other, in a semi-circular fan. The space occupied by an octave is reduced in this keyboard to that of a sixth on the ordinary keyboard, thus shortening the stretch for small hands, and bringing at least a tenth, and often a fourteenth within reach of large hands. The six

janko keyboard

manuals are divided into three pairs, the upper four rows repeating the lower two, and the corresponding keys of the alternate rows are fastened to the same lever, three keys being depressed simultaneously when one is struck. This arrangement makes it possible to strike a note in three different places on the keyboard, thus saving the player much traveling over the keyboard, but it adds weight in playing, the rows being connected, which is the principal defect of the invention. The fingering is the same in all scales. The arrangement of the keys of an octave between the two rows of each set of manuals, facilitates the execution of chromatic scales. The keys are placed as follows:

Upper row, C# D# F G A B

Lower row, C D E F# G# A# C thus necessitating only the raising and lowering of the hand in playing the chromatic scale. The invention is sometimes called the chromatic keyboard. It has not as yet been largely adopted.

jarabe (hä-rä'-bě) Spa. n.

A Spanish dance.

jargon

The union of a number of sounds produced by vibrations of different characters, resulting in discord and confusion: a rattling vibration, a discord or dissonance.

jauchzend (yowk'-tsënt) Ger. part. and adj.

Shouting; with joy; rejoicing.

je (yä) Ger. adv.

Ever, always; at any time; at a time; each, when used with numerals, as *je drei Pauken*—three drums each.

jeu (zhǔ) Fr. n.

1. Play, style of playing.

2. A set of anything, such as bells; or organ pipes, also an organ stop. *Jeu ordinaire*, the usual method of playing an instrument, counteracts the effect of such directions as, *sur le chevalet*, play near the bridge.

jeu à bouche (zhǔ ä boosh') Fr.

Literally, played by the mouth: a flue stop. An organ stop composed of pipes in which the sound is produced by a current of air sent through a slit or flue near the lower end, and striking against a sharp edge. The current is cut and part enters the pipe causing the column of air to vibrate. The rest passes out and is lost.

jeux

jeu bouchée (zhǐ boo-shā')

A set of stopped pipes; a register consisting of stopped pipes.

jeu celeste (zhǔ sâ-lěst') Fr.

Celestial stop: an organ stop producing a soft tone likened to the voices of angels. See also *voix celesto*.

jeu d'anche (zhǔ d'ãñsh) Fr.

A reed stop of an organ. Any organ stop composed of pipes fitted with reeds for producing the sound.

jeu d'anges (zhǔ dãñzh) Fr.

Angel stop. See also *vox angelica*.

jeu de flutes (zhǔ dü flüt) Fr.

Flute stop: an organ stop composed of pipes in which the sound is produced by a current of air sent through a slit or flue in the lower end and striking against a sharp edge. The current is cut and part enters the pipe, setting the column of air in vibration. The rest passes out and is

lost.

jeu de mutation (zhǔ dü mü-täs-yôn) Fr.

A mutation-stop: an organ stop composed of pipes pitched to give tones either the interval of a fifth, the interval of a third, or some of their higher octaves above the ordinary pitch of the corresponding keys of the keyboard.

jeu de timbres (shǔ dü täñbr) Fr.

A set of bells; chimes in an organ, or a stop imitating bells.

jeu de violes (zhǔ dü vē-ôl') Fr.

A chest of viols.

jeu de voix humaine (zhǔ dü vwä ü-mën) Fr.

Literally, stop of human voice: an organ stop producing a tone greatly resembling the human voice. See also *vox humana*.

jeu d'échos (zhǔ dä'-kō) Fr.

Echo stop: an organ stop producing a soft, distant effect somewhat resembling an echo.

jeu, demi (dü-mē zhǔ) Fr.

Half-power.

jeu d'orgue (zhǔ dôrg) Fr.

1. An organ stop.

2. A row of organ pipes all giving tones of similar quality.

jeu, grand (grãñzhǔ) Fr.

Full organ.

jeu, plein (zhǔ, plãñ) Fr.

Full organ.

jeux (zhǔ) Fr. n. pl.

Stops in an organ or harmonium, as, *jeux de fonds*, foundation stops.

joyusement (zwä-yŭz-männ) Fr. adv.

Joyously; gladly; merrily.

juba (joo'-bä) African n.

A part of the break-down dance common among the southern negroes before the Civil War.

Jubal (yoo'-bäl) Ger. n.

A name of an organ stop, but having no special significance. The pipes are of the flute species, and produce a bright, joyous tone. Doubtless identical with Jubelflöte.

jube (jŭ'-bē) Grk. n.

jube (joo'-bē) Lat. n.

A harvest hymn to Ceres or Demeter, goddess of agriculture, and Bacchus or Dionysus, god of the vineyard. This musical harvest, celebrated by the Romans and Greeks, was borrowed from the Egyptians, who worshiped their corresponding deities, Osiris and Isis. These festivities in honor of Dionysus are of great interest, since out of the rustic buffooneries and dances which accompanied them the drama arose. Out of the hymns sung at the altar in honor of Dionysus came the cyclic chorus with its further developments. Equivalent to jule.

Jubelflöte (yoo'-bël-flā-tě) Ger. n.

Literally, jubilant-flute: an organ stop of the flute species producing an exultant or jubilant quality of tone.

Jubelgesang (yoo'-bël-gě-zäng') Ger. n.

Festival song, a song of jubilee. Synonym of Jubellied.

Jubelhorn (yoo'-bël-hörn) Ger. n.

Literally, joyful horn: a name given to the bugle finished with keys.

Jubellied (yoo'-bël-lět) Ger. n.

Festival song; a song or jubilee. Synonym of Jubelgesang.

jubilee

Jubilate (joo-bī-lä'-tē) Eng. n. from the Lat.

Rejoice, or, be joyful. The first word of the Latin version of the One Hundredth Psalm.

The Jubilate is used as an alternative to the Benedictus after the second lesson of the morning service in the Anglican church. It first appeared in the Second Service Book of King Edward VI, in 1552. At the time of the Reformation the Benedictus was more frequently used and was set by Tallis, Byrd and Farrant, but as enthusiasm decreased the shorter Jubilate became more popular, and in the Eighteenth Century was much more frequent than the Benedictus. Handel's famous Te Deum and Jubilate were written in 1713 to celebrate the Peace of Utrecht. The Jubilate also appears in Mendelssohn's Service in A.

In the Roman Catholic calendar the third Sunday after Easter is called Jubilate, because the Sixty-sixth Psalm, beginning Jubilate Deo, is used as the introit for that day.

jubilatio (joo-bī-lä'-shī-ō) Lat. n.

Jubilation; a shouting for joy; crying aloud with exultation. In Roman Catholic Church music this term is applied to the elaborate ending sung on the last syllable of Alleluia.

jubilee

A year of rejoicing observed by the ancient Jews after the completion of seven Sabbaths of years, forty-nine years. This fiftieth year was one of rest and liberty; all slaves of Hebrew blood were given their freedom; the lands remained untilled, and those which had been sold were returned to their original owners. It has also been thought that debts were cancelled, but this is not certain. The jubilee received its name from the fact that it was heralded by jovel, the blare of trumpets. After the Babylonian captivity the Jews ceased to observe jubilees.

A festival year in imitation of the Jewish jubilee was established in the Roman Catholic Church by Pope Boniface VIII. in 1300, and appointed for every hundredth year. Clement VI. reduced the time to fifty years, Urban IV., to thirty, and Sixtus VI., to twenty-five, and jubilees have since then been observed every twenty-five years. During this year the Pope grants indulgences; originally, to

jubilee

those communicants who went to Rome and performed certain ceremonies; but, afterwards, not necessarily a pilgrimage to Rome, but acts of charity and devotion at home were rewarded during the jubilee with indulgence from the consequence of penal sin. The special ceremony which marks the Catholic jubilee is the opening of the holy gates of St. Peter's by the Pope, and those of St. John of Lateran, St. Paul and St. Maria Maggiore by cardinal legates. The Pope goes to the holy gates, which have been blocked since the previous jubilee, knocks upon the wall with a golden hammer and says: "Aperite mihi portas justitiæ," open to me the gates of righteousness, whereupon masons tear down the wall before the gate, and the Pope, kneeling before it, is washed with holy water. He then takes the cross and enters the church singing the *Te Deum*, the clergy following. The next morning the Pope gives his benediction to the people. On Christmas eve of the jubilee the gates are closed, the Pope blessing the stones and mortar, and laying the first stone of the wall which is to seal the gates for another twenty-five years.

Thus the term jubilee has come to mean any season of rejoicing or festivity, such as the fiftieth anniversary of the reign of a sovereign, or of the building of a city, and popes have also appointed special jubilees, sometimes on their ascension to the papal throne. Music has always been inseparable from a jubilee, and many a great composer has written for such gala occasions. Equivalent to *jubilé* (Fr.); *Jubelfest* (Ger.); *giubileo* or *giubilo* (It.).

jubilus (joo'-bī-lūs) Lat.

Applied to an ornamental or florid passage sung on one vowel, especially that at the end of the *Alleluia*. See also *jubilatio*.

Judenharfe (yoo'-dēn-härf-ě) Ger. n.
jews'-harp.

jug

In the Eighteenth Century this name was given by English bird fanciers to a clear and brilliant bird note which repeats the sound *jug*, sixty or seventy times and closes with a brilliant shake.

Jugend (yoo'-ghěnt) Ger. n.

Youth: used as a prefix in compounds.

justesse de la voix

jugum (joo'-gūm) Eng. n. from Lat.

An apparatus for stretching or loosening the strings of the ancient lyre.

Jula (yoo'-lā) Ger. n.

The name of an obsolete organ stop composed of pipes tuned the interval of a fifth above ordinary pitch of the corresponding keys of the keyboard.

jule (jū'-lē) Grk.

A harvest hymn, sung by the Greeks to Demeter and Dionysus, and by the Romans to Ceres and Bacchus. Same as *jube*.

jump

1. A leap; a skip; progression by more than a whole step at a time, that is, progression to more than the adjoining note or tone.

2. Also an old Italian dance, usually known as *dump* or *dumpe*.

3. A melancholy tune.

Jungfernregal (yoonk-färn-rā'-gäl)

Ger. n.

Virgin register: the *vox angelica* organ stop.

Jungfernregalstimme (yoonk'-färn-rā-gäl-shtim'-mē) Ger. n.

Literally, virgin stop voice. The *vox angelica*. Synonym of *Jungfernregal*.

jurer (zhü-rā) Fr. v.
To jar; to disagree in sound; to vibrate discordantly.

jusque (zhüsk) Fr. prep.

Until; to; as far as: *Jusqu'à la fin*, up to the end; until the end.

just

Correct in tone; harmonious: applied to consonant intervals, and to voices, pipes and strings which are correct in pitch and tone.

just intonation

The accurate sounding of intervals in singing or playing. Rendering by the voice or an instrument those small and delicate differences of tone, which acoustics and the scientific study of tone show to exist, but which to the untrained ear are scarcely discernible, and on keyboard and other rigidly attuned instruments cannot be shown.

just relations

The affinity between tones which are consonant or harmonious.

juste (zhüst) Fr. adj.

Just; true; exact; accurate in pitch; in tune.

justesse de la voix (zhüs-tēs' dü lä vwä') Fr.

Purity of voice; correctness of tone.

justesse de l'oreille

justesse de l'oreille (zhüs-tës' dü l'ô-rā'-yüh) Fr.

Correctness of ear; the power of distinguishing tones accurately.

kanonik

justo, con (kōn yoos'-tō) It.

With precision; exactness; regularity. More often spelled giusto, which see.

Kehraus (kär'-ows) Ger. n.

Literally, sweep out, clear away: a colloquial term for the concluding dance of a ball or party.

kemangeh

An instrument found in Turkey and Persia. It has a spherical body with a spike-like neck passing through it and projecting at the base. It is furnished with three or more wire strings. The instrument is played with a horsehair bow. Sometimes called kemantche.

kemangeh a'gouz

This name is of Persian origin and signifies crooked or arched, referring to the bow with which it is played. Generally, the instrument takes the form of the ordinary kemangeh, but is found to vary slightly in form among the different Mohammedan peoples.

kemangeh roumy

An instrument found among the African savages. It is in reality a kemangeh furnished with gut strings, which are rubbed with a bow, and several light wire strings stretched close to the belly, and sounding in sympathy with the gut strings.

kemantche

Another name for kemangeh. See also kemangeh.

kenet (kĕn'-ĕt) Aby. n.

An Abyssinian trumpet.

kettledrum

Kenner (kĕn'-nĕr) Ger. n.

Knower; one who knows: a judge, or connoisseur as of music.

Kent bugle

A name given to the keyed bugle in honor of the Duke of Kent. See also key bugle.

kerana (kĕ-rā'-nā) Per. n.

A plain trumpet used in Persia to announce sunset and midnight.

keranim (kĕ-rā'-nĭm) Heb. n.

Hebrew trumpets. Plural of keren.

keras (kĕ'-rās) Grk. n.

A general term meaning horn, used by the ancient Greeks.

keraulophon (kĕ-raw'-lō-fōn) Grk. n.

Literally, horn flute: an organ stop introduced in 1843. It is composed of pipes whose lowest pitch is two octaves below middle C. The tone quality is pleasing and resembles that of the gamba stop. A hole bored in the pipe not far from the top adds a piercing quality to the tone.

keren (kĕr'-ĕn) Heb. n.

The trumpet or horn used by the Israelites in their religious rites; it was made first of a ram's horn, and later from metal.

keren-Jebel (kĕr'-ĕn-yā-bĕl) Heb. n.

A jubilee horn.

Kern (kärn) Ger. n.

Stopper: the flat piece of metal or wood placed horizontally just inside of the mouth of an organ flue pipe. Equivalent to language and languid.

Kernstimmen (kärn'-shĭm'-mĕn) Ger. n.

A term referring collectively to those organ stops whose lowest tone is two octaves below middle C. Such stops are considered typical organ stops and are called fundamental.

kerrena (kĕr-rā'-nā) Per. n.

See kerana.

Kessel (kĕs'-zĕl) Ger. n.

The cup or bell of an instrument having an enlarged mouthpiece.

Kesselpauke (kĕs'-zĕl-pow-kĕ) Ger. n.

A kettledrum. See also kettledrum.

ketch

An old name for the catch, or round, in which several singers sang the same melody, but each one began at a different time. See also catch.

Kettentriller (kĕt'-t'n-trīl'-lĕr) Ger. n.

Literally, chained trills: a chain, or succession of short trills or shakes, either vocal or instrumental.

kettledrum

An instrument consisting of a hollow brass hemisphere from twenty-

kettledrum

four to thirty inches in diameter over which is stretched a head of parchment. The tension of the head is adjusted by means of screws along the sides allowing the pitch to be accurately fixed. A soft-headed mallet or stick is used in striking them. In orchestral music two kettledrums are called for. They are tuned to include a compass of an octave, the highest four tones being allotted to a smaller drum, and the lowest four to a larger drum. They are used to mark the rhythm and to increase the sonority of the general effect.

key

1. A tuning hammer, such as is used in the piano and other stringed instruments of fixed intonation to turn the tuning pins.

2. A lever and valve in certain wind instruments operated by the player's fingers, thus opening and closing a hole in the side of the tube and altering the tone pitch by changing the length of the vibrating column of air.

3. One of the levers depressed by the player in keyboard instruments, such as piano or organ.

4. The family of tones of any major or minor scale, considered especially in their melodic and harmonic relations to each other and to a fixed note called the keynote. This given tone from which the key is named is always the first tone of its scale, and is called the keynote or tonic. Upon this tone the others are arranged in melodic order forming a scale. Modern music differs from the ancient Greek and medieval music in having but two scales, the major and minor, of which the major is the standard. In the major scale half tones occur between the third and the fourth, and the seventh and eighth degrees, counting from the keynote, the other intervals being whole tones. Of all the major keys, that of C is taken as the standard because it is entirely constructed of what are called natural tones, that is, it has neither sharps nor flats, and, on the piano, requires only the use of the white or natural keys. All major keys are built upon the key of C and are similar to one another in everything except pitch. The minor scale differs from the major in the position of its first half step, which is located between the second and third degrees instead of the third and fourth. A is the standard of the minor key. To cause a

key, governing

series of notes beginning upon a tone other than C, to have the half steps in the same relative position, that is, between three and four and between seven and eight, it is necessary to raise certain tones by means of sharps or lower others by means of flats. A sharp or flat raises or lowers a tone one-half step. The notes which have to be thus altered are indicated by sharps or flats, placed for convenience at the beginning of a composition and called the key-signature. The sharps or flats in the signature refer to all the notes following them until contradicted by some other sign. When the signature is composed of sharps, the keynote is one degree above the last sharp. The flat keys are named from the last flat but one. Major and minor keys having the same signature are said to be relative. The keynote of a given minor key is in every case a third below the keynote of its corresponding major key. Keys of more than six sharps or flats are seldom used. The modern system of keys is far from perfect, being based upon the medieval theory of music, and limited by the keyboards of piano and organ.

See tables of flats and sharps on pages 282 and 283.

key bugle

The entire mechanism set in action by the keys of an instrument such as the piano or organ, including the keys themselves.

key bugle

A bugle fitted with six keys, and having a compass of over two octaves, from the B below middle C to the second C above. It was invented by Halliday in 1815.

key-chord

The triad or chord of three tones, whose fundamental tone is the keynote in the scale from which it is formed. In the natural or fundamental position of this chord, the other two tones are, respectively, a third and a fifth above the keynote.

key, fundamental

The original key in which a composition is written from the beginning; especially so called when parts of the composition are written in other contrasting keys, which take effect only for a time.

key, governing

The principal or original key of a composition, as distinguished from the key or keys in which parts of it may be written.

key harp**key harp**

An instrument invented by Dietz and Second in 1819. It resembles a piano in outward appearance, but the keys control hammers which strike tuning-forks instead of strings. The forks are reinforced by metal cavities under them.

key, major

See major key.

key, minor

See minor key.

key, natural

See natural key.

keynote

The tonic, or first tone, of any given scale, also the letter naming such tone; it is the note upon which a composition must end in order to give a sense of complete satisfaction or repose to the ear.

key, principal

See principal key.

key-ship

Tonality; the relation between the tones of a key; the specific musical quality of any one group of tones forming a key.

key signature

The group of chromatic signs, flats or sharps, placed at the beginning of a staff to indicate in what key the music is written. See also key.

key-stop violin

A violin which is fitted in a frame furnished with a keyboard of thirty-three keys. The keys actuate wedge-shaped pieces of metal which press the strings down upon the neck, thus limiting their vibrating length and doing the work of the fingers of the left hand on an ordinary violin. The bow is manipulated by the right hand and the left hand is occupied with the keyboard.

key, transposed

A key changed from that in which a composition was originally written. For example, a song written in the key of F for high voice, might be transposed or changed into the key of D flat for a low voice, while still retaining its original melody and harmony, each tone being changed in relative pitch.

key-trumpet

A trumpet fitted with keys.

key, tuning

A tuning hammer; a small instrument used to tighten or loosen the strings of a piano or harp.

keyboard

The series of finger levers or digi-

keys, pedal

tals and pedals of an organ, piano or similar instrument. By depressing these digitals or pedals the pipes, strings or reeds are caused to sound. The visible part of some of the levers is black and of others white, the black keys being termed chromatic and the white diatonic, because the sharps or flats and the natural tones, respectively, are produced by them. The black keys are shorter than the white and are raised a trifle above them. They are separated from each other by one or two white keys, thus forming groups of two and three alternately.

keyed

Furnished with keys: a term applied to an instrument played by striking or touching keys or levers.

keyed cithara

An upright harpsichord, popular during the Thirteenth Century.

keyed harmonica

A keyboard instrument in which the keys control hammers which strike plates of glass strung on a metal rod. The plates are of graduated size and produce the tones of the scale.

keyed instruments

All instruments whose tones are produced by the pressure of the fingers upon the keys.

keyed violin

See piano-violin.

keys, authentic

A term denoting those keys which, in old Greek music, extended from the tonic, keynote, to the fifth and octave above, that is, through a space of eight whole tones and three semitones. See also Greek music.

keys, chromatic

1. The black keys on the keyboard of an instrument such as the piano or organ.

2. Those keys, groups of tones, the signatures of which contain one or more flats or sharps, a signature being a group of sharps or flats indicating the key of a composition.

keys, parallel

A term applied to any major key together with its relative minor, the relative minor key beginning on the sixth tone of the major scale, or the third tone below the keynote, counting downward, and containing practically the same tones as the relative major scale. See also key.

keys, pedal

In the organ, the row of keys played with the feet.

keys, plagal

keys, plagal

In ancient Greek music those keys whose tones began on the dominant, or fifth tone of the scale upon which they were founded, and extended upward to the octave and twelfth, a twelfth being eight whole tones and three semitones. See church modes.

keys, related

See related keys.

keys, relative

Keys which have the same signature or signatures, key signs, or which differ from each other only by one sharp or flat. See also key.

keys, remote

Keys whose relationship is very distant, having signatures differing greatly in the number of chromatic signs, such as G, the key of one sharp, and F sharp, the key of six sharps; or, F, key of one flat, and G flat, key of six flats. It will be noticed that in position on the keyboard, these remote keys may be very close; the distance consisting in the difficulty encountered in modulating, changing, from one to the other through intermediate keys. See also key.

Klappenflügelhorn

Klangnachbildung (kläng'-năkh'-bĭl-doongk) Ger. n.

Imitation of sound, imitation of tone: as when in poetry the sound or form of the words used recalls the sound or tone associated with whatever is described by the words. The technical equivalent is onomatopœia.

Klangsaal (kläng'-zäl) Ger. n.

Sound-hall: a music-hall; concert room.

Klangschlüssel (kläng'-shlŭs'-sĕl) Ger. n.

From the German word klang, sound. A sort of shorthand system of indicating the formation of chords, invented by the German musician, Riemann. In his system he does not reckon the interval from the base, but from the principal tone of the chord. Major intervals are designated by the Arabian numerals, and minor intervals by the Roman. Major and minor are also abbreviated + and 0, respectively, thus: C + means C major. The sign < indicates raising a tone by the half step; and the sign > indicates lowering it a semitone.

Klangstufe (kläng'-shtoof'-ĕ) Ger. n.

Sound-step, rung of a ladder: degree, of a scale, interval or distance between two tones as counted on the scale.

Klangvertretung (kläng'-fĕr-trät'-oongk) Ger. n.

Substitution of clangs, a clang being a composite musical tone, that is, a fundamental tone with its accompanying tones. Klangvertretung is a term used in modern harmony referring to the special meaning which a given tone possesses according to its relations to the chord or key in which it is found. Thus each tone may form an essential part of six different chords.

For instance, C may be the major root of the C major chord, the major fifth of the F major chord, the major third of the A^b major chord, the minor root of the F minor chord, the minor fifth of the C minor chord, the minor third of the A minor chord. Hence the essential musical meaning of C would depend upon the particular chord in which it was used.

Klappe (klăp'-pĕ) Ger. n.

Literally, a flap: the key or valve of wind instruments.

Klappenflügelhorn (klăp'-pĕn-flŭ'-gĕl-hōrn') Ger. n.

la poule (lä-pool) Fr. n.

Literally, the hen; one of the figures of a quadrille.

la stretta (lä strāt'-tä) It. n.

The pressing: in fugue, that part of the composition where the subject and answer are pressed or hurried together and overlap each other. A concluding passage played faster to enhance the effect. Used to indicate that the part so marked was to be performed in quick, concise style.

la volta (lä vōl'-tä) It.

1. The music which accompanied an old Italian dance. It was written either in three-four or three-eight time and was of a lively and animated nature.

2. A very old dance, sometimes given as the dance from which our modern waltz was evolved.

labecedisation

labecedization (lä-bā-sā-dī-zā'-shôn)

A change advocated by Hitzler in 1628, whereby the syllables used in the method of reaching and singing vocal music should be: la, be, ce, de, me, fe, ge, instead of as present, do, re, me, fa, sol, la, ce, do.

labial

1. Giving forth tones produced by the impact of a current of air against a sharp edge or lip, and thus applied to instruments like the flute or organ.

2. Organ pipes with lips, also called flue pipes.

Labialpfeife (lä-bī-äl'-pfī-fě) Ger. n.

From the Latin, labial, meaning lip, and the German, pfeife, meaning pipe: those organ pipes in which the tone is produced by the wind passing through a slit in the pipe and coming in contact with a sharp edge called a lip. These pipes are termed flue pipes

Lagenwechsel

in English in contradistinction to reed pipes.

Labialstimme (lä-bī-äl'-shtīm-mě) Ger. n.

A stop in the flue works of organ pipes having lips, that is, in those in which the tone is produced by the vibration of a column of air within a tube; not a reed stop. Also called pfeife.

Labien (lä' bī-ën) Ger. n.

Pipes.

labisation

See labecedisation.

labium

Lip: applied to organ pipes, the flat vertical surface above or below the mouth of the flue pipes; when above, it is called the upper lip, and when below, the lower. The upper lip always has a sharp edge, and as the air comes up through the foot of the pipe, the sharp edge of the upper lip cuts it, causing the stream of air to vibrate. This sets the column of air in the body of the pipe in vibration, thus causing the sound.

lachrimæ (läk'-rī-mē) Lat. n.

Tears: the name formerly given in England to the doleful tunes of the Calvinists.

lacrimando (lä-krī-män'-dō) It. part.

Mournful; sad; in a mournful, pathetic style.

lacrimosa (lä-krī-mō'-sä) Lat. adj.

Weeping: the first word in the eighth strophe of the Requiem Mass, hence the name of a movement or division of the grand musical requiem, usually of a plaintive and tender character.

Lade (lä'-dě) Ger. n.

A box or chest: in an organ, the windchest or reservoir. This is a chamber immediately below the pipes into which the air is forced by the bellows. As soon as a valve or pallet at the foot of the pipes is opened the air passes from the reservoir to the pipes, and the sounds are produced.

Lage (lä'-khě) Ger. n.

Position.

1. The position of a chord, that is, the position of the notes that compose it with relation to each other.

2. The position of the hand in violin playing.

Lagenwechsel (lä'-khěn-věkhs-ěl) Ger. n.

A change of position: shifting or changing the position of the left hand on playing the violin.

lagnoso**lagnoso** (län-yō'-sō) It. adj.

l'âme (l'äm) Fr. n.

The sounding-post. See also âme.

lament

In Scottish and Irish folk music, melodies of mournful character to which are sometimes set words of a plaintive cast. In Scotland the laments were mostly confined to the Highlands and were usually bagpipe tunes consisting of an air with a number of more or less irregular variations. Every clan had its own lament, played on occasions of death or other calamity. These compositions were wild and pathetic in character but often possessed a peculiar and haunting kind of beauty. Among the well-known laments are Lochaber No More, and Mackrimmon's Lament, and some may be found in Albyn's Anthology, Patrick McDonald's Highland Vocal Airs and other collections. Irish Laments may be found in the *Aria di Camera*.

lamentabile (lä-měn-tä'-bī-lě) It. adj.

Plaintive; sad; mournful: sad, melancholy or plaintive in style.

lamentando (lä-měn-tän'-dō) It. part.

Lamenting; mourning: a term meaning that music so marked is to be played in slow and mournful style.

lamentations

The funeral music of the Jews. Among the ancient Jews it was the custom to hire five flute players and usually a female singer to perform over the body of the deceased. The number of these musicians was increased according to the wealth of the family.

In the Roman Catholic Church the three first lessons appointed in the Roman Breviary for the Office of Matins on Thursday, Friday and Saturday of Holy Week, are taken from the Lamentations of Jeremiah. They were anciently adapted to plain-song

lanciers

melody, of which the most celebrated version is that printed by Guidetti in his *Directorium Choir* in 1582. Early in the Sixteenth Century the plain-song lamentations were superseded by a polyphonic setting by Genet, which was used until 1587, when Pope Sixtus ordered more appropriate and expressive music written. At his command Palestrina composed music to the First Lamentation for Good Friday, which was so successful that in 1588 he issued a complete set of nine lamentations. In 1640 the unpublished First Lamentation for Good Friday was substituted for the printed Lamentation and a composition by the lessons and accordingly three lamentation for Holy Saturday. Pope Benedict XIII. decreed that the shortened form of Palestrina's first lesson be supplanted by the full text of the lessons and accordingly three Lamentations by modern musicians were submitted for his approval. These were rejected, and Biordi was commissioned to add to the music of Palestrina and Allegri whatever was necessary to complete the text. This augmented version was used until 1731, when Clement XII. restored the Lamentations to their original form. In 1815 Baini restored Palestrina's printed Lamentation for the first day using the MS Good Friday composition for the second and Allegri's for the third. This arrangement is still in use.

lamentoso (lä-měn-tō'-sō) It. adj.

Mournful; lamentable.

lampon (läñ-pôn) Fr.

From the verb, lamper, to gulp down. Drinking songs.

lancers

A square dance originally called the lancers' quadrille. Two claimants for the idea of this dance are a Dublin dancing master named Duval, who is said to have taught it in 1817-18, and an Englishman, Joseph Hart, who claimed to have invented it in 1819. His version consisted of five figures, la rose, la lodoiska, la dorset, les lanciers and l'étoile, the star. They were danced to airs from Italian, Polish and English composers. With a few changes, Hart's figures are still used.

lanciers (läñs-yā) Fr. n.

A set of quadrilles: an arrangement of sets of dances. See also lancers.

larigot (lär-ī-gō) Fr. n.

larigot (lär'-ī-gōt) Eng. n.

1. Kind of flageolet. Now obsolete.

2. A row of small open metal pipes the longest of which is only one and one-third foot and which sounds a nineteenth higher than the key depressed.

larigot stop or octave twelfth (lär-ī-gō)

A group of pipes in the organ capable of giving a very shrill tone. They are pitched the interval of an octave plus a twelfth, or nineteen degrees above the ordinary pitch of the corresponding keys of the keyboard.

larmoyant (lärm-wä-yān) Fr. adj.

Weeping; pathetic; tearful.

laryngoscope

An instrument for inspecting the larynx. It consists of a concave reflector from which light is reflected to a mirror in the patient's mouth and thence to the larynx; the observer looks through a small aperture in the concave reflector. It was invented by Manuel Garcia in 1854 and is a great aid in the study of vocal physiology.

last shift

In violin playing the shift or position of the left hand nearest the lower end of the instrument.

lateral vibrations

Those vibrations of a sonorous body which occur at right angles to its length. The vibrations of a string are of this variety, although they apparently occur in the opposite direction. When the string is caused to vibrate slowly enough for the eye to observe the motion it appears to move from side to side of its position of rest. In reality, the vibrations are moving from end to end and it is the

Lauf

velocity with which they travel that causes the string to move from side to side.

latten strings

Strings for musical instruments, made of latten wire. Latten is a mixed metal composed of copper and zinc, and practically the same as brass. In the Middle Ages it had many uses, but is no longer in vogue except for articles in ecclesiastical use. The wire was made from strips of latten, beaten with a mallet until round, wire-drawing machines not having been invented.

laud

Praise; a hymn of praise: the canonical hour which directly follows matins, that is, one of the seven hours established for prayer in the Roman Catholic Church.

laud (lä-ood) Spa. n.

A stringed musical instrument; the lute.

lauda (lä-oo-dä) It. n.

Equivalent to laud.

Lauda Sion, Salvatorem (law'-dä zī'-ōn Säl-vä-tō'-rēm) Lat.

The name of a hymn sung as sequence at mass on the feast of Corpus Christi between the Gradual Oculi Omnium, and the Gospel for the Day.

Laudamus Te (law-dä'-mūs tē or law-dä'-moos tā) Lat.

We praise Thee: part of the Gloria of the mass.

laudes (law'-dēs) Lat. n.

Laudi spirituali (law'-dī spīr-ī-tchū-ā'-lē) Lat.

1. A composition for voice and instruments illustrating some subject taken directly from Scripture or paraphrased upon some theme in sacred history.

2. A name given to certain collections of devotional music compiled for the use of the laudisti or religious singing societies that flourished in Florence from the Fourteenth to the Eighteenth Century.

laudisti (law-dīs'-tī) Lat. n.

The name applied to members of societies organized in Florence for the performance of spiritual songs called laudi.

Lauf (lōwf) Ger. n.

leader

1. A conductor; director.

2. The first violin in an orchestra; the first cornet in a brass band; first clarinet in a wind band; in a mixed chorus the first soprano. In small orchestras the first violin usually is, and in former times always was, conductor also.

3. The director of a choir.

leading

leading

1. (n.), The advance of the melody from one tone to another, in any part or parts.

2. (adj.) Principal; chief; guiding.

leading chord

The chord consisting of the fifth note of the scale, its third and fifth. This is called the leading chord because it leads the harmony into the chord built on the tonic or first note of the scale, and establishes the key. The same as the dominant chord.

leading melody

The principal melody or theme of a composition of several parts.

leading motive

The musical motive, theme or phrase characteristic of, or accompanying one of the persons in a drama, or some particular emotion or situation of the drama. The motive which recurs at suitable intervals. This is also used for similar motives in opera, oratorio and even program music. Equivalent to Leitmotif, a term used by Wagner.

leading note

The major seventh of any scale which is the note a half tone below the keynote; the note a major third or four half steps above the dominant or fifth note of the scale. Called leading note because it rises up or leads up to and seems to demand the next note, the tonic.

leading tone

The seventh note of the scale of any key when it is a half tone below the keynote or last note of the scale. Same as leading note.

leap

1. To move from one tone to another more than one degree above or below it, as from C to A.

2. In piano playing a spring from one chord to another in which the hand is lifted clear of the keyboard.

leaves
The upper and lower boards of the organ bellows.

lebendig (lā'-bĕn'-dĭg) Ger. adj. and adv.

1. (adj.) Living; alive; quick.

2. (adv.) Lively; animated.

Liveliness; sprightliness; vivacity; animation.

legato

leçon (lŭ-sōñ) Fr. n.

Lesson; lecture; a study; a piece of music intended to develop the taste, skill and power of the player. A name used from the beginning of the Seventeenth to the close of the Eighteenth Century to denote pieces for the harpsichord and other similar instruments, usually referring to a collection of pieces forming a suite. This name was sometimes applied to concerted chamber music.

ledger lines

The short extra or additional lines drawn above or below the staff, to hold any notes too high or too low to be placed on or within the staff.

ledger space

A space bounded on one or on both sides by ledger lines.

leere Saiten (lā-rĕ zī'-tĕn) Ger.

Empty string; open strings: in stringed instrument playing, strings not pressed against the frets by the fingers.

legabile (lĕ-gä'-bĭ-lĕ) It. adj.

legando (lĕ-gän'-dō) It. part.

Tied; connected; smooth. A direction indicating that the piece shall be played in a smooth, graceful, close manner. This is often indicated by a curved mark, called a slur, written over the notes. See also legato.

legare (lĕ-gä'-rĕ) It. v.

To bind, to slur: to join two or more notes together by means of a curved line above or below them in writing music. In playing, to hold the sound of one note until the sound of the next note commences.

legatissimo (lĕ-gä-tĭs'-sĭ-mō) It. adj.

Most closely bound: a direction meaning that the passage so marked is to be performed very smoothly.

legato (lĕ-gä'-tō) It. adj.

Bound, tied. A direction meaning that music so marked is to be played smoothly and closely, each note being held until the next is sounded. Also syncopation, or the binding of an unaccented note to the following accented note of the same pitch, thus throwing the accent on the first note. In singing, a legato passage is sounded upon a single vowel; on stringed instruments, by a single stroke of the bow; on piano by keeping each finger upon its key until the exact moment of striking the next: on wind instruments having holes or keys, it is played in one breath, the notes being produced by opening or

1. Ladder: the scale of any key.

2. The leader; conductor.

Leitereigen (lī'-tēr-ikh'-ën) Ger. n.

Belonging to the scale: notes belonging to any major or minor scale under consideration; chords formed of such notes.

Leiterfremd (lī'-tēr-frēmt) Ger. n.

Not belonging to the scale: notes raised or lowered a half tone by sharps or flats, or chords containing one or more such notes. Accidental sharps or flats not belonging to the key.

Leitmotiv (līt-mō-tēf') Ger. n.

A guiding theme, consisting of a short passage or striking melody, which represents some certain character, action or emotion important in the composition. This motive recurs at appropriate points in the development of the music, such as the introduction or appearance of the character it represents, or the mention or discussion of the deed or sentiment, or even when the character, object or emotion is under consideration when not present. Leit motives serve to unify the composition and also to bring into prominence the important parts by attracting the attention by a theme already familiar to the hearer. Synonym of Leitmotiv and equivalent to leading motive.

Leitmotiv (līt'-mō-tēf) Ger. n.

See Leitmotiv.

Leitton (līt'-tōn) Ger. n.

Leading note: the major seventh of any scale. The note a half tone below the keynote. The note four half tones above the dominant or fifth note of the scale. See also leading note.

Leittonwechselklänge (līt-tōn-vēkh'-zēl-klēng-ē) Ger. n.

The name given by Riemann in his new theory of harmony to opposite chords, one major, the other minor, the primes or first notes of which are leading notes to each other. These chords may be substituted for one another as are parallel chords.

Lene (lē'-nē)

An old term for a note held in one of the harmonic parts of a composition while the other parts are in motion.

lenezza (lā-nēt'-tsä) It. n.

lestissimo (lĕs-tis'-si-mō) It. adj.

Very quick.

lesto (lĕs'-tō) It. adj.

; nimble; light; lively; cheerful.

letter-name

letter-name

1. A letter used to designate a tone, note, key or staff degree.

2. The first seven letters of the alphabet, A, B, C, D, E, F, G, used to form the letters of the scale and repeated in every octave. They represent the notes and determine their pitch.

letter notation

The indication of musical sounds by means of letters. It seems to be the oldest form of notation and was in use among the Greeks, whose system of notation was employed by theorists of Western Europe up to the Tenth Century, A. D. In the Tenth Century the first seven letters of the Roman alphabet replaced the first seven letters of the Greek alphabet as names for the seven sounds of the diatonic scale, but with a meaning differing from the modern meaning. The western monk, Odo, Abbot of Cluny, according to many authorities, gave the letters their present meaning, thus: ancient A, B, C, D, E, F, G correspond to modern C, D, E, F, G, A, C. In old notation C, D and G, A were half tones; in modern, B, C and E, F are half steps. About the Tenth Century the capitals, small letters and double small letters began to be applied to different octaves; sometimes the capitals were continued up to P for the second octave, a system we find in use up to the Twelfth Century. Modern notation, attributed to Odo, became merged with the system founded by Guido D'Arezzo. This system consisted of a scale of twenty notes, two octaves and a sixth, of which the first octave was designated by capital letters, the second by small and the sixth by double small letters. The present system of notation was fully developed as early as 1619, but the old continued in use after that time.

Letters with chord meanings were first used at the beginning of the Nineteenth Century, the capital letter indicating the major chord of the sound expressed by the letters, the small letter indicating the minor chord and a small nought marking the diminished triad composed of a note plus the note three and one-half steps above, plus its imperfect fifth, the note three whole tones above it.

The capital and small letters were also used to represent the major and minor keys. Thus A, means the key of

levě

A major, and a, the key of A minor. Hauptmann invented a system for distinguishing fifth sounds and third sounds by letters, the capitals standing for fifths, the small letters for thirds, but this is not accurate enough for scientific usage. Helmholtz in his *Lehre von den Tonempfindungen*, contrived another method by which the lower pitch was indicated by a horizontal stroke under a capital letter for the second third above the note, thus: ce, eG# and a similar stroke above a capital letter indicates higher pitch for the second third below the note, thus: a b c, $\overline{F}b$ a b.

Ottingen simplified this method by using the horizontal stroke, but not the capital. In his system, a stroke above a letter indicated an interval of a third above a note, a stroke below, an interval of a third below; two strokes indicated the second third or three the third, and so on. Unfortunately in his second edition of the above named book Helmholtz reversed the meaning of the strokes as used by Ottingen, and therefore it is necessary to know whether the music follows the arrangement of Ottingen or Helmholtz.

letterale (lět-tě-rä'-lě) It. adj.

letteralmente (lět-tě-räl-měn'-tě) It. adj.

Literally, word for word; exactly as written.

letters doubled

Capital letters doubled (CC) indicate that the tone is an octave lower than that represented by a single capital (C). Organists usually designate by double capitals the third octave below middle C, which is more generally represented by C. See also double letters.

letters, **Gregorian**

See Gregorian letters.

lettura di musica (lět-too'-rä dē moo'-zī-kä) It.

A musical lecture: a lecture on a musical subject.

leuto (lā-oo'-tō) It. adj.

Slow: implying a pace and style similar to a slow andante.

leva (lā'-vä) It. n.

Lift: release; as used in the phrases, *si leva il sordino*, lift the mute, *si leva i sordino*, release the dampers.

levě (lŭ-vā') Fr. adj.

Raised: in beating time the up stroke of the baton; the unaccented part of the measure.

Hole in the voice: said of that part of the vocal register in which certain tones are weak or wanting.

loco (lō'-kō) It. n.

Place: a direction meaning to return to the original pitch after having played an octave higher. The same as *luogo*. Abbr. *lo*.

locrense (lō-krĕn'-sĕ) Grk. n.

One of the ancient tones or modes.

Locrian (lō-krĭ-än) Eng. adj. from the Grk.

The adjective applied to the eleventh ecclesiastical mode, that is, to one of the scales used in the church music of the Middle Ages. This mode had a theoretical, but not a practical, existence, and little if any music was written in it, because of the false relation or contradiction of *mi* and *fa*. Its theoretical range is from *B* below middle *C* upward through an octave. Its semitones lie between the first and second and third and fourth tones. Its dominant, or fifth degree, above the keynote is *g'*. It is also called *Hyperæolian*, because its range lies a tone above that of the true *Æolian*. Among the Greek modes *Locrian* was another name applied to the *Hyperphrygian* mode. See also *Hyperphrygian*, *Greek modes* and *music*, and *church modes*.

logarithms

Mathematical formulas used to show differences of pitch and first employed in this way by *Enler*. *Brigg's* system is more frequently used with base 2, giving for the octave 1,000,000. *Logarithms* express, in short, formulas, mathematical determinations of pitch, relationships and relative vibration numbers or string lengths for the various musical intervals.

logeum (lō-gĕ'-ŭm) Lat. n.

The stage of the Greek theater. The wide, shallow space of parallelogram shape, in the middle of which the chief actors usually spoke. Behind this was another quadrangular space called *proscenium*, not so wide as the *logium*. The remainder of the *logium* right and left beyond the *proscenium* had a wall rising behind it as high as the highest tier of spectators. The same as *pulpitum*.

Logierian system

A system of musical instruction invented and introduced by *John Bernhard Logier*, in which piano instruc-

long rest

tion was given by simultaneous performance in classes and harmony, and modulation was also taught. In connection with this system *Logier* invented and used the *chiroplast*.

lokrisch (lō'-krĭsh) Ger. adj.

Same as *Locrian*. See also *Locrian*.

Lombardo (lôm-bär'-dō) It. n.

A dance peculiar to *Lombardy*.

long

A note used in old mensurable music, that is, music expressing a determinate time value of the tones in its notes, equal in value to half the large, or to four semi-breves, or in modern notation equal to four whole notes.

long appoggiatura (äp-pôd-jä-too'-rä)

It.

An ornament consisting of a small note before, and a degree above or below, a note of the melody. It receives half the time value of the melody note, or if that note is dotted, two-thirds its value.

See also *appoggiatura*.

long, double

An old character equal in duration to four breves, or in modern notation to eight whole notes. See also *duplex longa*.

long drum

The large drum used in military bands, and called the *bass drum*. It is held horizontally and struck on both sides with stuffed-knob drumsticks.

long mordent

A mordent of four notes; an embellishment consisting of the principal note and the note below it twice repeated, thus:

long particular metre

2. A cord fastening tailpiece to the button on the violin.

Lösung, fortschreitende (fôrt'-shri-tën-dë lä'-zoongk) Ger.

Resolution; that is, substitution of a harmonious group of tones for an inharmonious group. All inharmonious groups or dissonances are temporary substitutions for harmonious groups, and the resolution usually consists in the replacing of dissonances by changing them one step or tone into consonances or harmonious groups of notes.

loud pedal

A piano mechanism which raises all the dampers from the strings, allowing the tones struck to be sustained and broadened. Also called the damper, open, or extension pedal.

lourde (loord) Fr. adj. fem.

Heavy; dull; lethargic.

low soprano

lourdement (loord-mäñ) Fr. adv.

Heavily; without liveliness.

loure (loor) Fr. n.

1. The derivation of this word is uncertain. It may come from the Latin word *lura*, meaning bag. The word *loure* as originally used in France meant a kind of bagpipe used by the peasants of France, especially northern France.

2. The word also signifies an old dance moderately lively and usually in six-four time. It was danced to the accompaniment of the *loure*, and this accounts for its name.

3. The word *loure* as applied to style meant that the music was to resemble the old bagpipe airs.

louré (loo-rä') Fr. adj.

Joined, said of notes; slurred; that is, in written music, when two or more notes are joined by a curved line written above or below them, and indicating that each note is to be held until the following note begins to sound.

louvre (loovr) Fr. n.

A dance adapted to an air called *L'aimable vainquer*, said to have been a favorite of Louis XIV. Other authorities consider it to have been a kind of jig or waltz. It has since formed the air of a well-known dance.

love song

A song, the words and melody of which are expressive of love.

low

1. Soft; not loud.

2. A word of relative meaning, applied to any part, passage or note situated beneath or lower in pitch than some other part, passage or note.

lyra way

2. A medieval term for a certain system of letter notation used in music for the viol da gamba, a six-stringed instrument, the music for which was written on a staff of six lines, one for each string. Also called Lero viol.

lyre

lyre (lēr) Fr. n.

An ancient musical instrument of Asiatic origin much used by the Greeks, and intimately connected with their musical history. It consists of a hollow sound-chest or body from which two arms, sometimes also hollow, curved outward and forward. The arms were connected by a cross-bar or yoke, and on the sound-chest was another cross-bar which served as a bridge to convey the vibration of the strings to the sound-chest. In earliest times the strings were four in number, then Terpander, a Greek musician of the Seventh Century, B. C., raised the number to seven.

After Pythagoras studied in Egypt the lyre was fitted with eight strings to accommodate itself to the new octave scale, and later the number of strings was raised to ten. They were made of gut and stretched between the yoke and the bridge, or sometimes between the yoke and a tailpiece below the bridge.

The lyre was played by being struck with a plectrum, and also by plucking the strings with the left hand. There were several species of lyre, the larger called cithara, being supported by a ribbon slung across the player's shoulders, or by a ribbon fastening it to the left hand of the player and supported by it, and the smaller sort, called chelys, held by the left arm or between the knees. The lyre is important because of the influence it had on the development of Greek music, and because it was a germ from which sprung many of our modern musical instruments.

lyre Æolian

Equivalent to Æolian harp, which see.

lyre, double

An ancient instrument entirely obsolete, but supposed to have been a kind of viol da gamba. Equivalent to lyra doppia.

lyre, Grecian

A lyre of the ancient Greeks, quite

Lytierse

small, having seven strings, and being held in the hand while played upon. See also lyre.

lyre guitar

An instrument which was popular toward the end of the Eighteenth Century and in the early years of the Nineteenth. It consisted of a quadrangular body from which projected two arms connected at the top with a cross-bar, resembling the ancient lyre. The strings were tuned and played as are those of the guitar.

lyre, Mercurian

One of the earliest of musical instruments made of the shell of a tortoise and having seven strings.

lyric

1. Originally this adjective meant pertaining to the lyre, for accompaniment by the lyre; hence, adapted for singing or expressing in song.

2. In the modern sense, a short poem of simple and emotional character. Music, especially songs expressing some particular subjective emotion as distinguished from epic, or narrative music and dramatic music.

lyric comedy

Comedy in which vocal music forms a principal part; comic opera.

lyric drama

Acting accompanied by singing; opera.

lyric form

A composition whose themes are not treated in the manner of the rondo or sonata, in which the first theme is not returned to after the presentation of each new theme, nor is its second theme repeated in the key built on the first note of the scale after being given out by the key of the fifth note.

lyric opera

Opera in which the expression of subjective feeling and the lyric form of poetry predominate over the heroic; sentiment over action.

lyric stage

The operatic stage.

lyric tragedy

Tragic opera.

lyrical

lyrisch (lir'-ish) Ger. adj.

Lyric.

Lytierse (lit-ī-ēr'-sē) Grk. n.

The name given by the ancient Greeks to the Song of the Reapers.

M

ma (mä) It. conj.

But, as used in the phrase, *vivace ma non troppo*, fast but not too fast.

machalath (mä'-kä-läth) Heb. n.

A term employed in the title of certain psalms. It is traced by some authorities to a root meaning pierced or bored, hence it is thought that these psalms were accompanied by flutes. This term is also considered by some to indicate familiar tunes, to which the psalms were to be sung.

machête (mä-shě'-tě) Port. n.

A small Portuguese guitar having four strings and the compass of an octave. It is a pastoral instrument and considered valuable among the country people, who enjoy hearing a number of them played together. It is also used in Spain.

machicot (mä-shē-kō) Fr. n.

Literally, a chorister; a singer in a church. The same as the Italian *maciciconici*.

machicotage (mäsh-ē-kō-täzh') Fr. n.

The accessory notes, such as trills and grace notes added by the clergy in singing plain-song. This was a French custom in the Eighteenth Century.

machicotée (mäsh-ē-kō-tä') Fr. adj.

Adorned; embellished; said of plain-song having ornaments added, as it was sung by French clergy of the Eighteenth Century.

machine head

A rack and pinion used instead of tuning pegs in stringed instruments like the guitar.

machol (mä'-kōl) Heb. n.

A word often occurring in the Old Testament and associated with *toph*, meaning *timbrel*. In the English version it has been translated dances or dancing, hence, the common expression, with *timbrels* and dancing. This translation is now being disproved, some authorities having traced the word to a root meaning pierced or bored, therefore concluding that the word means flute.

Machwerk (mäkh'-vėrk) Ger. n.

Literally, made work; compositions constructed as a result of labor rather than inspiration.

maciciconici (mâ-chē-chē-kō'-nē-chē)

It. n.

An old name for one of the *chorj ministri minores*, lesser assistants of the choir of a cathedral, who added passing notes between intervals of the plain-song, or, according to some authorities, added a part to the plain-song at an interval of a third or fourth.

march

A military air or movement with strongly accented rhythm designed to time the steps of a body of men marching. Marches are divided into two kinds, the quick march or quick step and the slower processional and funeral march. The quick step is usually divided into two halves of two parts each, eight, twelve or sixteen measures long; the latter half being called the trio. Processional marches usually conform to this arrangement but not always. Four-four time is the common march time, although two-four, three-four and six-eight time are sometimes found.

march, dead

A march slower and more solemn than the ordinary march and sometimes symphonically developed. A march designed as part of burial services.

marimba

An instrument found in Africa, in South America, and in the southern part of Mexico. It consists of a graduated series of bamboo or wooden bars, numbering from five to twenty-five, and arranged over a frame, or over gourds, serving as hollow

mark, division

resonance boxes. It generally has a compass of two octaves and the bars are tuned similarly to the white keys of the piano. The African savage usually wears the marimba suspended at the waist by a cord, or an arched wooden handle, and beats it with two rubber tipped sticks.

marine trumpet

An instrument furnished with a single string and played with a bow. The body was long and slender and when played the lower end of the instrument rested upon the floor, the upper end generally reaching as high as the performer's head. The single string was sometimes supplemented by others which served only for accompaniment, or by sympathetic strings, often placed within the body. The bridge rested firmly upon only one foot and the other vibrated with the string, producing a reedy, harsh tone and adding much to the volume of the sound. This quality is sometimes advanced as the reason for the origin of the name tromba marina or marine trumpet, the increased sonority making it more probable that the instrument was used for signaling purposes on board vessels. During the period from the Fourteenth to the Sixteenth Century the tromba marina was very popular in Germany, and was used in Europe and England even in concert work. The instrument also found a place accompanying church music and was used in convents by the nuns. The same as sea trumpet, tromba marina, Thumb-scheit and tympanischiza.

mariona (mä-rë-ō'-nä) Spa. n.

A Spanish dance.

marionette theatre

A small stage upon which puppets moved by wires, enact operas, plays and ballets, the dialogues and songs being sung or spoken by some one behind the scenes.

mark, cadence

masque

ment, much in vogue during the Sixteenth and Seventeenth Centuries. It probably originated in the practise of wearing masks on festive or solemn occasions to represent allegorical characters. It gradually developed into a dramatic entertainment with music.

Mass (mäs) Ger. n.

Measure; time.

mass

That part of the service of the Roman Catholic Church which accompanies the consecration of the bread and wine. The name is derived from the Latin word *missa*, found in the phrase: *Ite ecclesia missa est*, depart, the congregation is dismissed; formerly occurring twice in the mass service, first, in the dismissal of the catechumens, or learners, who were dismissed at the end of the Gospel, before the more solemn part of the mass, a second time at the close of the entire service for the dismissal of the faithful. The liturgy is divided broadly into the ordinary of the mass and the canon of the mass, in which the canon includes the more solemn portions, as the consecration and communion. Throughout the West and in some localities in the East, the language of the mass is Latin and has been so from the beginning of Christianity. At present in many places of the East, mass is said in Greek by the Uniat Catholics in Greece, Jerusalem and Russia; in Coptic, by the Catholics along the Nile district; other languages used in various localities are Syriac, Chaldaic, Wallachian, Armenian and Slavonic. In none of these languages is the vernacular of the day used but the ancient classic form of the particular language of the early Christian period. From the various reasons for the celebration of the mass and the ceremonies attending it, different names have been employed, as follows: High mass, with full ceremony; Low mass, with no ceremony; Requiem mass, for the dead; Nuptial mass, for the solemnization of matrimony.

mass bell

A bell rung during mass in the Roman Catholic Church to give notice of the more solemn parts of the service, the Sanctus, Consecration and Elevation of the Host. It is now a small bell rung by the acolyte or altar boy in the sanctuary. Formerly a bell

massima (mäs'-sī-mä) It. n.

A semi-breve; a whole note.

master chord

The chord based on the dominant or fifth degree.

master fugue

A learned elaborate fugue in which are found rare technical devices. The subject and answer are constantly heard and no episode, that is, no digression from the principal theme is used. It is of interest only to the student of musical composition as it is limited in material and affords opportunity for the display of technical skill.

master note

Leading note or seventh tone of the major scale.

Master of Music

A degree granted by the University of Cambridge under the recent regulations after having been unknown since the Thirteenth Century, when it was granted by some Spanish Universities. It is intermediate between the degrees of Bachelor and Doctor. Rigid examinations are necessary in this degree and cover the following subjects: (a) Eight-part counterpoint; (b) The highest branches of harmony; (c) Four-part canon; (d) Four-part fugue and double fugue; (e) Form in practical composition; (f) Instrumentation and scoring in chamber and orchestral music; (g) The analysis of some classical composition announced six weeks before examination; (h)

Master of Music

The art of music historically considered; (i) An exercise, with full orchestral accompaniment, containing portions of solo voices and for five-part chorus and specimens of canon and fugue. Besides this there is also an oral examination for those whose exercises have been provisionally approved. Women are granted equivalent certificates for this and the Bachelor's degree of Cambridge.

Mastersingers

A class of poet-musicians who succeeded the minnesingers in Germany during the Fourteenth, Fifteenth and Sixteenth Centuries. The minnesingers were of the nobility and correspond to the French troubadours; the mastersingers were of the burghers, and in a few respects correspond to the French jongleurs and minstrels. However, the mastersingers did not wander from town to town and court to court like the minstrels, but were banded together in guilds in the largest cities. The object of these guilds was to invent new metres and shapes for their songs, and they drew up a complicated set of rules to govern these song forms. Admission to their guilds was obtained after an examination of the candidate by four Merker who sat behind a curtain and passed judgment on the quality of the performance, one paying especial heed to the diction and grammar, another to rhyme and metre, another to the melody in which it was sung.

The poems of the mastersingers were always lyrical and sung to music. They were called bars and divided into five or more stanzas, called Gesätzen, each stanza falling into three parts called the Stolle, the Abgesang and again, the Stolle. It made no difference whether the syllables were long or short so that there were the proper number. The length of the verse, number of lines and order of rhymes were variable and admitted of much variety in form in the poems. The invention of new forms was the ambition of every mastersinger and these forms bore their inventor's name.

Mazurke

Mazurka (mä-tsoor'-kä) Ger. n.

Mazurke (mä-tsoor'-kě) Ger. n.

A national Polish dance, deriving its name from the province of Masovia. The mazurka was known as early as the Sixteenth Century, and originated in dances improvised to their national songs. This dance spread to Germany, France and England. It was originally danced by four or eight couples, and written in triple time like the waltz, but slower. It has a great variety of figures and permits of the introduction of improvised steps. There is usually a strong accent on the last note of each measure, while in the waltz the first beat of the measure takes the accent. In old mazurkas the figures were repeated any number of times to suit the performer. Chopin has written many mazurkas.

me

The name of the third sound in the Tonic Sol-fa system.

mean clef

The tenor clef: the C. clef when written on the fourth line of the staff to indicate middle C for the tenor voice.

mean, harmonical

The middle note in a chord of three notes.

mean parts

The middle parts.

mean-tone system

The system in which the intervals of major third were tuned and divided into equal tones, forming a mean between the greater and lesser whole tone, hence the term, mean-tone; this mode of tuning was popular before the introduction of our modern method of equal temperament, which divides the octave into twelve equal parts called semitones.

measurable note

A note whose time value is indicated by its form. In plain-song all notes were of equal duration, but in the Twelfth Century the notes were given different forms to indicate a difference in their time, and were thus made measurable. The earliest measurable notes were the large, the long, the breve and the semi-breve; and in modern music we begin with the whole note and divide and redivide, as, half, fourth, eighth and sixteenth.

measure

1. The unit of metrical division

mechanical instruments

which includes the notes between two bars. Each measure has one major accent whose regular recurrence defines the system of measurement.

2. Occasionally and loosely used instead of tempo.

3. A general name for a dance of slow and stately character.

measure accent

The regular alteration of the strong and weak beats in a measure.

measure, common

A measure having an even number of units, as two-four, six-eight.

measure, imperfect

An old term for two-fold measure, that is, only two beats to a measure. The same as binary measure.

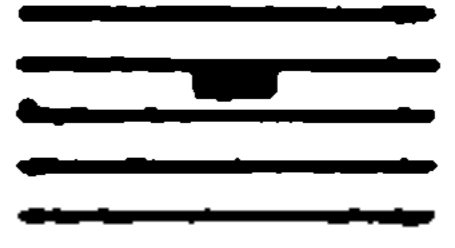

measure motive

A motive or theme whose accent coincides with the measure accent.

measure note

The note which is the unit of measure according to the time signature. Thus in three-four time, the quarter note is the measure note, and three of these, or their equivalent in value, fill the measure.

measure-rest

A rest extended throughout the measure. The whole  rest is used to signify a rest of one measure; the breve  rest indicates a rest of two measures, and by combining these any number of measures can be indicated, e. g., a three measure rest, a  six measure rest. Figures are  generally used in rests of more than six measures, and now are employed in all rests of more than one measure." data-bbox="461 491 877 701"/>

measurable

As used in the term measurable music, the same as measurable music. Music having a definite time value given to its notes.

mėcanisme (mä-kă-nėzm') Fr.

1. Mechanism: that part of an instrument which forms the connection between the player and the sound producing part.

2. The physical power of performance as distinguished from the intellectual power.

mechanical instruments

Instruments producing tunes by means of a mechanical contrivance; such as a crank, clockwork, weights or springs.

edge, and in which there is a constant reappearance of subject and answer without any episodes or digressions between.

Meistergesang (mī'-stēr-gě-zāng') Ger. n.

Master song; minstrel song.

Meistersänger (mī'-stēr-zēng'-ēr) Ger. n.

Meistersinger (mī'-stēr-zīng-ēr) Ger. n.
Master singers.

1. In Germany during the middle ages the title given the most renowned musician of the community.

2. A member of a society or guild formed from the Fourteenth to the Sixteenth Century in the leading cities of Germany, the most celebrated being Nuremberg, to cultivate music and poetry. The members were usually workmen, and in this particular the meistersingers were distinguished from the minnesingers, whom they superseded, for the later were of aristocratic birth. They founded a number of schools in which their art was taught according to certain fanciful and arbitrary laws. Their productions were chiefly lyrical poems on biblical subjects, and these were sung to the accompaniment of a stringed instrument, such as the harp or violin. Just as in other trades the learner must pass from apprentice to journeyman, and finally to master, so here there were five degrees: Schüler, or scholar; Schulfreund, or schoolfellow; Dichter, or poet; Säger, or singer, and Meister, or master. The candidate for admission had to present a poem with musical accompaniment which was passed upon by four judges called Merker. The earliest school established at Mainz, in 1312, by Henrich von Meissen was called Frauenlob, and the school at Ulm continued until 1839. The chief of the Meistersingers was Hans Sachs. In Wagner's opera, *Die Meistersinger von Nürnberg*, we have a vivid picture of the craft.

Meisterstück (mī'-stēr-shtük) Ger. n.

Master work; master piece.

melancholia (mā-lān-kō-lē-ä) It. n.

melancolie (mā-lān-kō-lē') Fr. n.

Melancholy; sadness.

melange (mā-lāñzh') Fr. n.

A mixture; combination: a medley composition founded on several well-known airs.

meleket

An Abyssinian trumpet made of a hollow tube, four or five feet in

melodia

length, and but a half inch in diameter. Its tones are shrill and piercing.

melisma (mě-lis'-mä) Grk. n.

1. A song; an ode; a melody, as distinguished from music of a purely declamatory character.

2. A grace; roulade; fioritura, or florid passages of a movement.

melismatic song

Song in which more than one tone is sung to a syllable.

mellifluous

Flowing; very melodious and pleasing.

melode (mā-lō'-dě) It. n.

Melody; tune: pleasing arrangement of sounds.

melodeon

Invented by Jeremiah Carhart, of Dutchess County, N. Y., in 1836. It was a keyboard instrument in a case resembling that of the square piano, but smaller. The tones were produced by vibrations of free reeds. A foot pedal, similar in appearance to a piano pedal, was used in creating a vacuum in the air chamber just below the reeds and as the keys were depressed currents of air drawn by the exhaust power were caused to rush past the reeds. For a time the melodeon was a popular instrument and in 1859 over twenty thousand were made in the United States. It has since been supplanted by the reed organ.

melodeon, double reed

A melodeon with two sets of reeds, thin tongues of wood or metal, against which currents of air are forced by means of bellows worked by the feet of the performer. The two sets of reeds produce greater volume than does the one set of the ordinary melodeon. See also melodeon.

melodeon, organ

A reed keyboard instrument with a register of stops which aids in producing tones similar to those of the organ, and furnishes a greater compass than the ordinary melodeon possesses. Air is compressed in the bellows, worked by the feet of the performer, and forced through the reeds. These tongues of wood or metal are controlled by the keyboard action, and their motion breaks the currents of air into intermittent puffs and produces the tones. See also melodeon and harmonium.

melodia (mā-lō-dē'-ä) It. n.

Melody.

melody

either derived from or representative of harmony. It forms either the upper outline of a series of different chords or is constructed of different notes taken from the same chords. It is the chief characteristic of composition.

melody, authentic

One whose range extends between the keynote and its octave. The term authentic melody is used only in ecclesiastical modes or scales used by early church writers, and so called because it is the foundation melody. It is opposed to plagal melody.

melody, chromatic

A melody in which flats or sharps that do not belong to the key are used.

melody, diatonic

A melody in which no flats or sharps foreign to the key in which the melody is written are used.

melody, leading

The principal melody, the one which is usually carried by the soprano in part songs.

melody, plagal

A melody whose range extends a fourth below and a fifth above its keynote. The plagal is so called because it is based on the authentic. The term is used only in ecclesiastical music.

melograph

From the Greek words melody and write. An electrical contrivance which is attached to a piano to record the melody. When the keys of the piano are struck, this instrument records the order and duration of the notes on a strip of paper very much as a Morse telegraph instrument does. This record is then worked out.

melographic pianoforte

See pianoforte melographic.

melologue

A combination of recitative and music.

meloman (mĕl'-ō-măn) Grk. n.**mĕlomane** (mā'-lō-măn) Fr. n.**melomaniac** Eng. n.

A person who is passionately fond of music.

mĕlomanie (mā-lō-mă-nĕ') Fr. n.**melomany** Eng. n.

Melomania; excessive love of music.

melo^{pea} (mā-lō-pā'-ă) It. n.**mĕlopĕe** (mā-lō-pā') Fr. n.

1. Counterpoint; the art of forming melody; certain rules governing the writing of music having a number of

melotrope

parts. Music written under such rules.

2. Poetical or rhetorical melody; words and music combined, the vocal declamation or chant of the drama.

melophare

A lantern, inside of which is placed music paper, oiled to make it transparent so that the notes may be read when the lamp is lighted; it is used for serenades.

melopiano

A piano invented by Caldera, of Turin, in 1870, containing a device for sustaining the tone. A bar, to which were attached small hammers, was placed above the strings at right angles. When a tone was to be prolonged the player set the extra hammers into motion by means of a treadle so that they struck the string rapidly.

meloplast**meloplaste**

An instrument, invented in 1818 by Pierre Galin, by means of which vocal music could be taught from a staff without either clef or notes. He used only the five lines of the staff, singing familiar airs to the syllables do, re, mi, at the same time pointing to the position on the staff of the notes sung. The instrument for teaching rhythmical relations was like a double metronome, marking both measures and beats. See meloplast.

melopoeia (mĕl-ō-pĕ'-yă) Grk. n.

Music in general. The art or system of making a tune. In ancient music the name for the rules of composition in melody; these were divided into three parts, the hypatoides or lowest sounds, the mesoides or middle sounds, and the netoides or high sounds, these being again divided according to their character, as sad, gay, comic.

melopomenos (mĕl - ō - pōm' - ě - nōs)

Grk. n.

Vocal melody; vocal music.

melos (mĕ'-lōs) Grk. n.

Melody; tune; a succession of musical sounds, as opposed to noises.

melotrope

A mechanical attachment to the piano into which may be placed a melograph stencil. By means of treadles the stencil is passed over a vacuum so that air is drawn through each perforation as it passes and causes the digitals to be depressed as if by the player's fingers. See also melograph.

mensural signature

this. In church music half notes are often used in place of quarter notes. The half notes are then treated like quarter notes, but the time is usually slower time. To indicate this, a perpendicular line is drawn through the common-time signature, thus:  or else written out in full, four-two. All signatures having two in the numerator indicate duple time; those having three in the numerator indicate triple time; those having four in the numerator indicate quadruple time. These are also called simple duple, simple triple and simple quadruple time. Compound time is so called when the numerators are six, nine, twelve. Six indicates compound duple, as six-four; nine indicates compound triple, as nine-four, and twelve indicates compound triple, as twelve-four.

Menuett (mën-oo-ët) Ger. n.

menuetto (mä-noo-ët'-tō) It. n.

See minuet.

mercurian lyre

One of the earliest musical instruments made of the shell of a tortoise and having seven strings. Ancient Roman and Greek mythology contain the story of the discovery of the lyre by the Greek god, Hermes, or the Roman, Mercury. He is said to have been walking along the bank of a stream after an inundation. The receding waters had left upon the sand a tortoise shell across which the sinews had been tightly stretched by the wind and the sun. Mercury's foot accidentally struck it, producing a tone. This accidental discovery is supposed to have led to the invention of the primitive lyre.

mereket Aby. n.

A trumpet used in Abyssinia.

meris (mē'-rīs) Grk.

The sixth part of an octave.

merula (mēr'-ū-lä) Lat. n.

Literally, blackbird: an instrument which consisted of very small pipes set in water and through which wind was forced to produce bird-like, warbling tones.

mesaulion (mē-saw'-lī-ōn) Grk. n.

Symphony.

mescal (mēs-käl') Tur. n.

An instrument found in Turkey. It consists of twenty-three pipes of dif-

mesto

ferent lengths bound together so that they may be moved to and fro before the mouth of the performer. Owing to the several possible methods of blowing into the pipes, each one is capable of producing three notes.

mescolanza (mes-ko-län-tsä) It. n.

Medley; mixture.

mese (mē'-sē) Grk. n.

meson (mēs'-ōn) Grk. n.

The middle note of the Greek scale and considered the most important.

mesopycni (mēs-ō-pik'-nī) Eng. n. from Grk.

In medieval church music a mode or scale based upon a tetrachord having its half step in the middle. Tetrachord being a group or four tones.

mesotonic

Mean-tone. See also mean-tone system.

mesa bassa (mēs'-sä bäs'-sä) It.

Low mass, that is, a silent mass whispered by the priest during a musical performance.

mesa concertata (mēs'-sä kôn-chēr-tä'-tä) It.

Masses having the recitation intermixed with choruses, or consisting of concerted music.

mesa di capella (mēs'-sä dē káp-pěl'-lä) It.

A mass sung by grand chorus. These compositions were always elaborate, having fugues and various movements in double counterpoint.

mesa di voce (mēs'-sä dē vō'-chē) It.

The gradual swelling and diminishing of the voice in a long held note.

messanza (mēs-sän'-tsä) It.

A quodlibet: as it pleases you; what you please.

1. A humorous combination of various airs performed either simultaneously or one after the other, but having no connecting phrases. A device much used in the Sixteenth and Seventeenth Centuries.

2. A charivari, shivaree.

messe (mēs) Fr. n.

Messe (mēs'-sē) Ger. n.

Mass; music of mass.

messe brevi (mēs'-sē brā'-vē) It.

Short mass.

messe haute (mēs-sōt') Fr. n.

High mass; grand mass.

mestizia (mēs-tīt'-sī-ä) It. n.

Sadness; melancholy; gloom; as used in the phrase *con mestizia*, with sadness.

mesto (mäs'-tō) It.

Sad; pensive: a direction used by

mesto

Beethoven in Op. 10 No. 3, where the slow movement is *largo e mesto* and the second movement is *adagio molto e mesto*.

mestoso (mās-tō'-sō) It.

Sad; pensive: a direction meaning to be rendered in a sad and pathetic manner.

measure (mũ-zŭr') Fr. n.

Measure; dimension; bound; unit of time measurement: the bar between two measures, that serves to divide them as two units.

mesures à deux ou quatre temps (mũ-zŭr' ä dü oo kătr tăñ') Fr.

Duple time.

measure à deux temps (mũ-zŭr' ä dü tăñ') Fr.

Measure of two beats: duple time, that is, having an even number of beats to the measure.

measure à trois temps (mũ-zŭr' ä trwä tăñ') Fr. n.

Measure of three times; triple time: having an uneven number of beats to the measure, a number that is divisible by three.

measure demi (mũ-zŭr' dü-mě') Fr. n.

Half measure; half a bar: also, a half rest, or rest equal in duration to a half note.

metal (mă-tăl') Spa. n.

Strength or compass of the voice.

metal, organ

See organ-metal.

metal, pipe

See pipe-metal.

metallico (mě-tăl'-lĭ-kō) It. adj.

Metallic: clear in tone.

metallo (mě-tăl'-lō) It. n.

Metal: the ringing quality of tone as designated in the phrase: *bel metallo divoce*, the fine ringing quality of the voice.

metamorphoses

Changes in the form or structure of a theme for the purpose of adding to its intellectual interest.

metamorphosis

The working out, or development of a musical idea, adapting it to changed conditions and adding to its intellectual interest. Wagner uses it extensively in his great musical dramas.

meter (mě'-těr) Eng. n. from Grk.

Meter, which literally means measure, is an arrangement of groups of sounds in music, or of syllables in poetry, in regulated succession so as to form rhythmic movement. The result in music is to produce melo-

meter

dious phrases, in poetry, regular verses. In music we have beats combined into measures, in poetry syllables composing feet. The relation between music and poetry becomes apparent the farther back we study into the history of each. In modern times the distinction is principally in the fact that music possesses melody, while speech has quality, but rhythm is common to both.

A knowledge of meter is important, not only when setting words to music, but in all kinds of musical composition. It is its rhythmical character, among other excellences, which distinguishes the work of the really great composers, and almost any musical theme of good quality can be reduced to terms of metrical feet. This almost unconscious instinct of rhythm belongs alike to the musician and the poet, but the former is allowed a greater variety in its use. Thus we do not always find the foot and bar beginning together, for this is possible only when the foot begins with a long syllable and the musical phrase with a strong accent.

In English verse meter depends almost entirely upon the accent and thus differs from the classical, which was founded upon the principle of vowel length or quantity. Accent and stress are important to the composer but quantity in verse has little relation to music. A foot is a part of a line and may contain two, three or four syllables.

According to the number of feet in a line verse is named: monometer, a line of one foot; dimeter, of two feet; trimeter, of three feet; tetrameter, of four feet; pentameter, of five feet; hexameter, of six feet; heptameter, of seven feet; octameter, of eight feet.

Combining the kind of foot with the number of feet in a line we name the verse thus: iambic, pentameter, trochaic tetrameter, anapestic trimeter, etc.

The *cæsura* is a pause in or near the middle of a line. It may come after either an accented or an unaccented syllable, and tends to agree with the logical pause, though it does not always do so. For example: Through all restraint broke loose || he wings his way.

One kind of meter is not necessarily used to the exclusion of all others in a single composition, but one measure

meter

so predominates as to give character to the whole. A verse is said to be acatalectic when it contains just the required number of syllables; catalectic, when it lacks the last syllable of the last verse; brachycatalectic, when two syllables or an entire foot are wanting; and hypercatalectic, when it has too many syllables.

The following are the principal kinds of meter with their signs. A more extensive study of each will be found under the separate names:

meter

The measure of music made apparent by the succession of accents. It is mechanical in character as it concerns the regular grouping of the beats or time units.

meter, long particular

Six eight-syllable lines of iambic feet; that is, metrical feet containing a short followed by a long syllable.

meter particular

See particular meter.

meter, short particular

Six lines of iambic, ˘ —, measure, the first two containing six syllables each, the third eight, the fourth and fifth six and the sixth eight feet.

metodo (mā-tō-dō) It. n.

Rule, order.

1. A system of teaching.

2. A school or style of music, as the Italian method.

3. Treatise or book of instructions.

Metrik (māt'rēk) Ger. n.

Metrical art; metrics: the art of writing in meter.

metrisch (mēt'-rīsh) Ger. adj. and adv.

1. (adj.) Metrical.

2. (adv.) Metrically: written according to metrical standards and having due arrangement of long and short syllables.

metro (mä'-trō) Spa. and It. n.

Meter: rhythm: a certain disposition of a number of syllables.

Metronome

See also metronome.

metrometer

metronome (mēt-rō-nōm)

A mechanical contrivance claimed by J. N. Maelzel in 1816, for marking time, especially as an aid in musical study or performance. It usually consists of a double pendulum, the lower end of which is weighted with a ball of lead, while the upper carries a weight of brass that may be moved up or down. When the latter weight is moved up, the rate of oscillation is slower; when it is moved down, the rate is faster. The upper end of the pendulum is graduated, so that any desired number of oscillations per minute can be secured, ranging from forty to two hundred and eight. Abbr. Met.

metronome mark

A mark at the beginning of a piece of music, meaning Maelzel's Metronome M.M. $\text{♩} = 120$ and meaning that the sliding weight is to be set at 120, which gives the time of a single oscillation to a quarter note, or that each quarter note is given one one hundred and twentieth of a minute. Abbr. M. M.

metronome, pocket

A metronome made in watch form.

metrum (mēt'-rūm) Lat. n.

A measure: specifically a poetical measure; meter; rhythm: the measure or time.

Mette (mē'-tē) Ger. n.

Matins; the first morning service in the Roman Catholic Church.

mi bēmol

mi bēmol (mē bā-mül) Fr.

E flat.

mi bémol majeur (mě bā-mül' mǎ-zhür') Fr.

The key of E flat major.

mi bēmol mineur (mē bā-mül' mē-nür') Fr.

The key of E flat minor.

mi bemolle (mē bā-môl'-lē) It.

The note E flat.

mi bemolle maggiore (mě bā-môl'-lē mäd-jō'-rě) It.

The key of E flat major.

mi bemolle minore (mě bā-môl'-lē mē-nō-rě) It.

The key of E flat minor.

mi contra fa (mē kôn'-trä fä) It.

Literally, mi against fa: the interval from F to B natural. In the method of teaching the scales and intervals by syllables the third sound of the Hexachordon durum; that is, a scale of six sounds whose third is two whole tones above the key note, was called mi; and F, the fourth sound of the Hexachordon naturale or scale of six sounds, was called fa. Musicians of the Middle Ages disliked the false relation existing between the two sounds and expressed it in the saw, mi contra fa est diabolus in Musica; mi against fa is the devil in music.

mi dièse (mē dē-ěz') Fr.

The note E sharp.

mi diesis (mē dē-ä'-sīs) It.

The note E sharp.

mi maggiore (mě mäd-jō'-rě) It.

The key of E major. See also E.

mi majeur (mě mǎ-zhür') Fr.

The key of E major. See also E.

mi mineur (mē mē-nür') Fr.

The key of E minor. See also E.

The key of E minor. See also E.

mi-re-ut (mē-rā-oot)

A term applied to the lowest octave of the organ, where the scale is incomplete or compressed. Equivalent to short octave.

microcoustic (mī-krō-koos'-tīk) Grk. n.

An instrument designed to collect and augment small sounds, for the purpose of assisting the partially deaf in hearing.

microfono (mē-krō'-fō-nō) Spa. n.

An instrument designed to augment sound.

microphone (mī'-krō-fōn) Eng. n.
from the Grk.

An instrument for augmenting small sounds. It is based on the fact that when substances possessing little

military drum

electrical conductivity are placed in the course of an electric current, the conductivity of the system is much increased by even the very smallest amount of pressure. In most instruments one piece of charcoal is held loosely between two other pieces in such a manner as to be affected by the slightest vibrations conveyed to it by the air or by any other medium. By suitable arrangement the sounds of the human voice conveyed from a distance by the telephone can be made audible in every part of a hall.

microphonics (mī-krō-fōn'-īks) Eng. n.
from the Grk.

The science of augmenting small sounds.

middle C

One-lined C, or the C in the center of the piano keyboard. The note C is written on the first ledger line below the treble staff or above the bass staff.

middle voices

A term applied to tenor and alto voices; the voices of middle range.

milote (mē-lō'-tě) Spa. n.

An Indian dance.

mimodrama Eng.

mimodrame (mē-mô-drām') Fr. n.

A dramatic performance in pantomime often accompanied by music.

minacciando (mě-nät-chän'-dō) It. adj.

Threatening; menacing; used once by Beethoven as a direction in a postscript of a letter to Schott.

minaccievole (mě-nät-chä'-vō-lě) It. adj.

Threatening, menacing.

minaccievolmente (mě - nät - chä - vōl - mēn'-tě) It. adj.

In a threatening, menacing manner.

minacciosamente (mě - nät - chō - sã - mēn'-tě) It. adj.

In a threatening, menacing manner.

minaccioso (mē-nät-chō'-sō) It. adj.

Threatening, menacing.

minagnhinim Heb.

An ancient Hebrew instrument. It consisted of a wooden table with a handle. Across the table stretched a chain or hempen chord strung through balls of brass or wood. When this instrument was set in motion, presumably by the handle, the balls struck against the table producing a clear, pleasing sound that could be heard a great distance.

minder (mīnt-ēr) Ger. adv.

Less, lesser, lower: not so much, as used in the direction phrase, *Minder Schnell*; less fast.

mineur (mē-nūr') Fr. adj.

Minor.

minim (mīn'-īm)

A half note. It derives its name from the fact that before the invention of the crotchet note it was the shortest note in use.

minim rest

A rest equal in duration to a half note. It is always placed above the line instead of below it.

minima (mē'-nī-mā) It. n.

A minim.

minime (mē-nēm') Fr. n.

A minim.

Minnedichter (mīn'-ně-dīkh'-tēr) Ger. n.

A minnesinger.

Minnegesang (mīn'-ně-gě-zāng') Ger. n.

Love-poetry; love-songs.

Minnesänger (mīn-ně-zēng'-ēr) Ger. n.

Minnesinger (mīn-ně-zīng'-ēr) Ger. n.
German poets of noble birth who

minor scale

devoted their talents to composing love songs and celebrating deeds of chivalry. They flourished from the latter part of the Eleventh until the end of the Thirteenth Century. They were the counterpart of the Troubadours who preceded them, and wandered from place to place, singing and composing their verses.

minor

Small: of intervals, less; shorter; smaller, as compared with major intervals.

minor canons

Clergymen or canons of a lower grade who assist in performing the daily choral service in the cathedral.

minor chord

A chord containing a minor third: tones distant three half steps from each other, and a perfect fifth, tones distant seven half steps from each other.

minor diatonic scale

One in which the third degree is a minor third, or interval of one and a half tones above the keynote. At one time it was called the scale of the lesser third.

minor key

minor mode

One of the modern scales, in which the third note is a minor third or three semitones from the tonic or first note of the scale.

minor prolatio

See *prolatio minor*.

minor scale

All the notes or tones of a minor key in regular ascending or descending order. There are two kinds of minor scales, the true harmonic minor scale formed of the tones of the minor key, and the melodic minor scale. In the harmonic scale the intervals between tones one and two, three and four and four and five, are major seconds, intervals of one whole tone, and between two and three, five and six, and seven and eight minor seconds, intervals of a semitone, while between tones six and seven there is an augmented second, an interval of three semitones. For melodic purposes the augmented second was avoided by the inventor of the melodic minor scale in which the semitone falls between the second and third, and seventh and eighth tones ascending, and between the fifth and sixth, and second and third descending. In the minor scale not all the tones are

minor scale

represented in the signature as is done in the major scale, the seventh note always being represented by an accidental sharp or flat. In the melodic minor scale notes six and seven are sharped, ascending, but in descending all tones agree with the signature.

minor scale, natural

See natural minor scale.

minor second

A lesser second: a normal or major second narrowed by a semitone; the interval between a tone and the next half tone above or below it. Between C and D flat we have a minor second, the major second would be C-D.

minor semitone

A half tone whose letter or place on the staff remains the same, as G to G sharp.

minor seventh

An interval consisting of four whole tones and two semitones.

minor sixth

A sixth which is a half tone shorter than the major sixth is called the minor sixth, as C-A flat.

minor third

An interval containing a whole tone and a semitone or three semitones.

minor tone

The shorter of the two standard whole tones, the ratio of the vibrations which produce them being 10:9.

minor triad

A chord of three notes containing a minor third, or interval of one and a half tones, and a perfect fifth, or interval of three and a half tones.

minore (mē-nō'-rě) It. adj.

Minor.

minstrel, squire

An ancient title for a professional minstrel; a combination of poet, singer and musician.

minstrels

1. As early as the Tenth Century poet-musicians who sang lyrical verses and ballads to accompaniment of harps or some other instrument. In early times they were the attendants of troubadours or minnesingers, whose compositions they sang.

minue (mě'-noo-ā) Spa. n.

The minuet.

minuet (mīn'-ū-ět)

A stately and graceful French dance,

thought to have originated in Poitou in the middle of the Seventeenth Century. The name is derived from the French adjective menu, small, referring to the steps of the dancers. Louis XIV. made the minuet fashionable in Paris, preferring it to the older court favorite, the pavan, and Charles II. established it at the English court. Here it was destined to enjoy great popularity, particularly from 1730 to 1770, during which time a special minuet was composed each year, for the celebration of the king's birthday. Originally the minuet consisted of two parts of eight bars each in three-four time, each of which is repeated. When the minuet was danced, a slow rate of speed was used, but the movement was decidedly quicker for instrumental performance. In a short time a second minuet was added to the first. It was like the first in form but unlike it in sentiment; being written in three part harmony it was called a trio, a name still in use although the number of parts is no longer limited to three. The original eight bars were also extended. In this new form the minuet was incorporated into the suite or set of dance forms. The minuet is remarkable as surviving the other old dance forms, reappearing in both the sonata and symphony, in the latter of which it was placed by Haydn. The names of Handel and J. S. Bach are associated with the earlier minuet. Mozart used the same form as Haydn. Beethoven, although not abandoning it, effected its transformation into the scherzo. That the minuet is still popular is shown by the enthusiastic reception given to Paderewski's Minuet in G.

minuetto, alternativo (äl-těr-nä-tē'-vō mē-noo-ět'-tō) It.

Alternating minuet: the minuet as a musical composition consists of two movements, the second of which is similar in form but contrasted in character and written in three-part harmony, and was called the trio. This alternated with the first movement, hence, the name.

minugia (mē-noo'-jā) It. n.

möglich (mākh'-līkh) Ger. adj.

Practicable; possible; as used in the direction phrase, so rasch wie möglich, as fast as possible.

Mohammedan dervishes

This sect of dancers was instituted by Mohamet in imitation of Christian practises. Since earliest times dances have played an important part in religious ceremonies, whether pagan or Christian. These dervishes are Mohammedan monks, most of them living very ascetic lives. There are two great classes, the dancing dervishes and the howling dervishes. Both are dancers. Beginning with a slow, rotary motion, they twirl round and round, spinning faster and faster and persisting in this twirling until, from sheer exhaustion, they fall to the ground in a swoon. After a while they get up again and repeat the performance. As their spinning gains in speed they believe themselves to be enjoying divine ecstasy. The howling dervishes emit loud howls as they spin round, shrieking the name of Allah, and going through all sorts of contortions very much as if

mordant (mŏr-dăñ') Fr.

See mordent.

mordent Eng.

mordent (mŏr-dĕnt') Ger.

Literally, bite, hence applied to an ornament resembling a portion of a trill. This embellishment, also called a passing shake, consists of two or more notes preceding the principal note, for example:

showing a short or single, and a long or double mordent, respectively. There

is some confusion

in the nomenclature of the mordent. The term is sometimes applied

to an embellishment having the note above the principal note, as an auxiliary, but this is usually called the inverted mordent, Praller or Pralltriller, and is indicated by a sign without the cross stroke. When there is an accompanying note to that over which the mordent sign is written it is struck simultaneously with the first note of the mordent. The accent is sometimes on the first, sometimes on the last or principal note, and the Germans make a distinction by calling the first kind Praller, the latter Schneller. Over short notes, and in rapid passages the accent usually falls on the first note.

Murmuring; buzzing: in a gentle, murmuring, whispering manner.

morrice dance

See Morris dance.

Morris dance

A figure dance, a precursor of the fandango, taking its name from the

Morris dance

Moors, who probably originated it. Although it was not popular before the reign of Henry VIII. it was probably introduced into England by Edward III. when John of Gaunt returned from Spain. Some of the masquers had bells, tuned to different notes so as to sound in harmony, attached to their many colored garbs and as they danced they clashed steels or swords. Skilful masquers had bells fixed on their feet and they moved them so as to produce a pleasing melody.

In early times the Morris dance was performed by five men and a boy, who was dressed in the garb of a girl, and who was called Maid Marian. Later when it became associated with the May Day festivities, Robin Hood, Friar Tuck and Little John were introduced. With these dances there were one or two musicians. Sometimes one of the dancers, more gaily dressed than the others, acted as leader of the dance.

Like other dances, it was suppressed by the Puritans, but some elements of it still linger in the country dance of the same name in North England.

morriske dance

musical prologue

The preface, or introduction to a musical composition or performance; a prelude.

musical science

The theory of music as distinguished from the practice or art of it. The principles and rules governing the scientific combination of tones; the theory of tone arrangement. This includes counterpoint, harmony, canon and fugue, form and orchestration.

musical sign

A character, printed or written, used in musical notation.

musical signals

Military signals given out on trumpet or drum or certain other musical instruments. The custom of giving military signals by means of musical instruments is apparently a universal one, used in all times and countries. The first authentic record of trumpets as means of signaling occurred in the Thirteenth Century. The drum did not appear in this use in Europe until over a century later. The fife was used for a time in Germany, and the bagpipe still stands pre-eminent among the Scotch as a signal in war. Trumpets were used as cavalry signals, and drums were confined to infantry, and in Germany kettledrums were introduced. There are different signals for every office of the day, such as the breaking of the watch in the morning, the signal to march, the charge, retreat, troop and battery, and many others. These have grown into an elaborate system in every country, and almost universally every regiment has its special code of signals. The Germans have the most musicianly set of signals, some of which have been developed from folk-songs, and many of which have doggerel verses invented by the soldiers, some of them dating back to the Sixteenth Century.

musical snuff-box

A music-box incased in a snuff-box. The novelty of the device is said to

Musikfest

have appealed to a composer, who wrote a waltz to be arranged for the instrument.

muta (moo'-tä) It. n.

Change; alteration; turn: A direction to a player on horn or trumpet to change the crooks or tubes that alter the pitch; on the drum it means to tune the instrument to a different pitch.

mutation Eng. n.**mutation** (mü-tās-yôn) Fr.

Change, alteration.

1. The change of voice which occurs at the age of puberty.

2. In the old system of solmization, the change of syllables which

My Country, 'Tis of Thee

was necessary in order that mi and fa coincide with diatonic half tones.

3. In violin playing, shifting or changing the position of the left hand.

mutation stops

Mutation means change: applied to stops, it means those organ stops which do not produce the tone corresponding to the key on the keyboard, but they sound a tone at an interval of a third, or fifth or seventh, above the note struck. Such stops add brilliancy by contributing harmonic combinations. When a stop produces the fifth, it is called a quint; when it produces the third, it is called a tierce.

mutazione (moo-tä-tsi-ō'-nē) It. n.

Mutation.

mute

A contrivance for subduing the tones of instruments.

1. For instruments of the violin family, this is a little piece of wood, metal or ivory, which can be placed over the bridge without touching the strings. This deadens the sound.

2. For instruments of the trumpet family, this is a little pear-shaped pad, usually made of leather, which the player inserts in the bell of the instrument when he wishes to subdue the tone. This also has the effect of shortening the windpipe in the instrument, and thus raises the pitch of the note. Called in German and Italian a sordino, and in French a sourdine.

Muterung (moo'-tēr-oongk) Ger. n.

Mutation; change of the male voice at the age of puberty.

muthig (moo'-tikh) Ger. adj.

muthwillig (moot'-vil-likh) Ger. adj.

Wanton; pert; mischievous; lively in style.

My Country, 'Tis of Thee

This song, also called America, presents a strong claim as the national hymn of our country. The fact that the tune is the same as that of Great Britain's national hymn has counted against giving it the honored place. The words were written by the Rev. Samuel F. Smith, a Baptist clergyman, while he was a theological student at Andover in 1832. It was first sung at a children's celebration in Park Street Church, Boston, July 4, 1832. For the history of the tune, see God Save the King.

nasutus (nä-soo'toos) Lat. n.

1. An obsolete wind instrument so called because of its thick reedy or nasal tone.

2. Also applied by the French to the *nazard*, an organ stop tuned a twelfth above the foundation stops.

national music

Just as nations speak different languages so their national music varies greatly in its distinguishing character. The southern nations of Europe express more gaiety in their national airs, while it is a well-known fact that those of Sweden, Norway, Russia, Finland and Hungary are minor in tendency. The voice character of the people also affects the music. Russia is said to abound in bass voices, Italy in tenor and barytone, the Hottentots in tenor and the Chinese in falsetto.

The rise of a national air is often the result of some trivial occurrence and many songs absolutely lacking in sense and musical virtue of any kind have become wonderfully popular through some freak of circumstances. Such songs however do not often last beyond the times which called them forth, and most of the national hymns possess dignity and solemnity.

The following is a list of the most important national hymns:

Austria, *Gott erhalte Franz den Kaiser*, 1797. Words L. L. Haschka; music by J. Haydn.

Belgium, *La Brabançonne*, by F. Campenhout.

Denmark, *King Kristian stod ved hojen mast*, *King Christian stood beside the mast*. Words by Ewald, music by Hartman.

France, *La Marseillaise*. Words by Rouget de Lisle.

Germany, *Heil dir im Siegerkranz*, words by H. Harries to music of God Save the King.

Great Britain, *God Save the King*.

Holland, *Wien Nierlansch*.

Hungary, *Isten ald meg a Magyart*, *Lord Bless the Hungarian*.

Italy, *Royal March*, by G. Gabetti.

Mexico, *Mexicanos, al grito de guerra*, *Mexicans at the Cry of War*, by J. Nunó.

Russia, *Bozhe Zaria Chrany*, *God Protect the Czar*, 1830. Words by Zhuhovsky, music by A. Lyoff.

Spain, *Himno de Riego*. Music by Herta.

Sweden, *Ur svenska hjertans*, *Out of the Swedish Heart*.

national music

Switzerland, *Rufst du, mein Vaterland*, to music of *God Save the King*.

United States, America, tune of *God Save the King*, *Star Spangled Banner* and *Hail Columbia*.

national song

A song peculiar to one nation, having become identified with its history either from use and popularity, or from its expression of patriotic sentiment. See also national songs under their names, as *God Save the King*.

Nationalled (nä-tsi-ō-näl'-lēt') Ger. n.

National song.

Natur (nä-toor') Ger. n. and prefix.

1. (n.) Nature.

2. (prefix) Natural.

Naturhorn (nä-toor'-hörn) Ger. n.

Literally "natural horn." The old horn called *Waldhorn*, without keys, and capable of producing only natural tones. The same as natural horn.

natural

According to the laws of nature; fundamental; usual; simple; easy. For natural as opposed to chromatic or enharmonic. See also diatonic.

1. The sign (♮) used to counteract the effect of a sharp or flat and restore the note so marked to its usual place in the scale in which it appears. A natural lowers a previously sharped tone and sharpens a flatted tone. One natural revokes either a single or double sharp (# or ×) or flat (b or bb), but sometimes a double natural (♮♮) is used after a double sharp or flat. When a note which has been raised two semitones by a double sharp is to be depressed only one semitone the sign, ♮♯, is often used, and similarly if a note lowered two semitones, by a double flat, is to be raised only one semitone, the sign, ♮♭, is used, although the single sharp or flat would serve the same purpose. Naturals are indicated in the signature only when the key is changed during the course of a composition. In changing from a flat to a sharp, or from a sharp to a flat key, naturals are not necessary, though often employed. For the origin of the natural, see also accidentals. Equivalents: *Auflösungszeichen* (Ger.), *becarre* (Fr.), *bequadro* (It.).

2. The term is also applied to a white key on the piano or organ, since they represent the natural notes of the scale.

natural compound sound

A sound which is the result of the vibrations of the first sounds being

natural minor scale

reflected from some body against which these vibrations strike. Thus, when a violin string is caused to vibrate, its vibrations are communicated to the body of the violin which acts as a sounding-board and reproduces the original sound in pitch. This compound sound is the tone which we hear.

natural harmonic series

The series of higher intervals of a given tone which by a law of nature always sound with and strengthen that tone, though by an ear untrained and unaided they can rarely ever be heard, the effect being only the principal tone. For the intervals of this series, and fuller information see also harmonic.

natural harmonics

The upper partials or overtones of a note, produced on an open string, in contradistinction to artificial harmonics, those produced when a string is stopped, and hence shortened, by being pressed by the finger. See also harmonic.

natural harmony

Harmony in which no embellishments are used and which is composed entirely of triads.

natural hexachord

The hexachord C D E F G A, beginning on the second space in the bass. This was the second of Guido D'Arezzo's hexachords and was called *hexachordon naturale* (Lat.). See also hexachord.

natural horn

1. The French horn without valves or slides. The tones produced are the same as those made by touching lightly a vibrating string at any point that will cause it to divide into equal parts.

2. A *Waldhorn*, that is, forest-horn; a winding horn.

natural key

A key or scale without sharps or flats; called natural because played on the white, or natural keys. The key of C major.

natural major scale

The scale of C major. On a keyboard instrument it is played on the white or natural keys without flats or sharps.

natural minor scale

The scale of A minor. On a keyboard instrument it is played on the white or natural keys without flats or sharps.

Negro minstrels

The songs and dances of the negroes on southern plantations before the Civil War were always a picturesque part of former plantation life. During the days of slavery education among the slaves was almost unknown, in fact, prohibited in many places, so that the negroes had no way of acquiring new songs except as they imitated the songs of the white people. Many of their songs, both tunes and words, are therefore traditional and characteristic of their race. The negroes have an excellent ear for rhythm and keep exact time to their singing and their dancing with tambourine and bones, using the bones as the Spaniards use the casta-

Negro minstrels

nets. Their voices have no great range but are rich and melodious, especially the lower voices among the men. Men and women sing together, usually in unison, the difference in the pitch of their voices adding color. As a rule the words are sung pretty fast. This is probably due to their intense desire to keep the rhythm perfect. About 1830 the first negro minstrels were put upon the American stage. The performers were white men, who, with faces and hands blackened with burnt cork, imitated in song and dance the songs and dances of the negro during the old slavery days. Interspersed among these negro imitations are jokes and conundrums. The middle man acts as leader, and by adroit questioning calls for jokes and funny repartee from the other performers, chief among whom are the end-men; these, as their name implies, sit each at the end of the row of performers; they are the cleverest men and upon them falls the heaviest burden of the fun-making. The negro minstrels were soon after introduced in England and became very popular there.

The negro minstrels are not as popular as they used to be, their scope for originality was necessarily limited and has been pretty well exhausted. It will be a long time, however, before the negro minstrels disappear.

Neudeutsche Schule (noi'-doit-shě shool'-ě)

The new German school. See also neo German school.

neuma**neume**

Derived from the Greek word for breath or breathing, because a group of sounds were sung to one syllable.

1. Ornamental phrases at the close of a verse, as in the last syllable of Allelula.

2. A sign or character in medieval music to represent a tone or phrase. Neumes were the earliest attempts at musical notation, though they were, at first, no more than musical shorthand, as they were an aid to the memory rather than a definite representation of sounds. They are traced to the Eighth Century, but their origin is uncertain, some supposing them to be Roman and others, Asiatic. The earliest examples of neumes can not be deciphered with any certainty. In the Tenth Century these characters were given a relative height and position to represent pitch, and this was soon followed by the use of lines and clefs, thus developing the staff.

Neunachteltakt (noin-āk'h'-těl-tākt')

Ger. n.

Nine-eight time: tune with nine eighth notes to a measure.

Neunsechzehnteltakt (noin-zěkh-tsān'-těl-tākt')

nonetto (nō-nĕt'-tō) It.

Derived from the Latin *nonus*, nine: a musical composition for nine parts, either for voices or instruments.

Nonnengeige (nōn'-nĕn-gī-khĕ) Ger. n.

Literally, nuns' violin. The German for nun's fiddle. The same as marine trumpet, but also called a nun's fiddle because it was used in Germany and France in the convents as an accompaniment to the voices of the nuns. For description and other use see *Tromba Marina*.

nonny hey nonny Old Eng.

A meaningless refrain used in ballads; sometimes simply *nonny, nonny, nonny*: corresponding to *fa, la, la*, which appears in madrigals.

Nonole (nō-nō'-lĕ) Ger. n.

nonuplet (nōn'-ū-plĕt) Lat. n.

A group of nine equal notes to be played in the time of six or eight of the same value. Equivalent to *nonupla* (It.) and *nonuplet* (Eng.).

nonupla di crome (nō-noo-plä dĕ krōm) It.

A group of nine eighth notes in a measure instead of the usual eight.

nonupla di semicrome (nō-noo-plä' dĕ sĕm-ĭ-krōm') It.

Nine sixteenth notes in a measure, instead of sixteen.

nonupula di semiminime (nō-noo-plä' dĕ sĕm-ĭ-mĕ'-nĭ-mĕ')

Nine quarter notes in a measure instead of four.

nonuplet

A group of nine equal notes, to be rendered, usually in the time of six or eight of the same kind in the regular rhythm. Equivalent to *Nonole* (Ger.) and *monupla* (It.)

normal Eng.

normal (nōr-mäl') Ger. adj.

Normal; natural; model; standard: the scales of C major and A minor

nota coronata

are often called normal scales, because all the others are founded on them.

normal musical institute

A music school for those desiring to become teachers.

normal pitch

Normalton (nōr-mäl'-tōn') Ger. n.

The pitch of sound adopted as a standard, usually middle C or A next above. The modern French pitch, so called because adopted by the French Academy in 1859, is by almost universal consent now considered standard or normal. It is also known as low pitch, there being but four hundred and thirty-five vibrations per second in producing this tone. This is the note to which the orchestra tunes. For further discussion of the subject, see *pitch*.

Normaltonleiter (nōr-mäl'-tōn'-li-tĕr)

Ger. n.

Literally, standard scale: the natural or normal scale without flats or sharps: applied to the two scales C major and A minor, since they serve as the standard for all the other major and minor scales.

nota (nō'-tä) Lat. and It. n.

A note.

nota bianca (nō'-tä bĭ-än'-kä) It.

Literally, white note: half note.

nota falsa (nō'-tä fäl'-sä) It.

Literally, false, or counterfeit note: a changing note; a grace note.

nota principale (nō'-tä prēn-chī-pä'-lě) It.

A principal or essential note: as the harmony note in a turn or shake.

nota quadrata (nō'-tä kwäd-rä'-tä) Lat.

A Gregorian or plain-song note, referring to the shape, not to its location on the scale.

nota romana (nō'-tä rō-mä'-nä) Lat. and It.

A nueme. See also nueme.

nota scolta (nō'-tä shōl'-tä) It.

Literally, notes cut out: a staccato note.

nota sensibilis (nō'-tä sēn-sī'-bī-līs) Lat.

nota sensible (nō'-tä sēn-sē-bī'-lě) It.

Freely, note that is perceptible: the leading note. See also leading note.

note, clef

nota sostenuta (nō'-tä sōs-tě-noo'-tä) It.

A sustained note.

notation

The art of representing musical tones by means of characters. Various methods have been used at different periods; letters, numerals and a variety of signs have been employed. The signs which are now in universal use are called notes.

notation, numerical

See numerical notation.

notazione (nō'-tä'-tsī-ō-nē) It. n.

Notation.

note

A character representing a musical sound. By its form it shows the length of the sound; by its position on the musical staff it shows the height or pitch.

These are evolved from the notes in mensurable music. See also mensurable music.

(See table at bottom of page.)

note (nôt) Fr. n.

A note.

note, bass clef

See bass clef note.

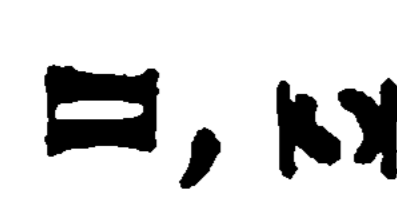

note, characteristic

A leading note; according to some authorities the note at an interval of a minor third or sixth, as being characteristic of the minor scale.

See crowned note.

note, d'agrément (nôt d'ă-gră-măñ)
Fr.

Literally, note of delight: an ornamental note; a grace note. Equivalent to note de goût.

note de gout (nôt dŭ-goo) Fr.

Literally, note of taste; grace note; note of embellishment.

note de passage (nôt dŭ păs-săzh')
Fr.

Literally, note of passage or transit. Notes not forming a part of the harmony, but used to connect the essential tones in any two consecutive chords.

note diésée (nôt dē-ě-zā') Fr.

Literally, a note raised half a tone. A note marked with a sharp.

note, double

A note equivalent to two whole notes; the ancient breve. See also breve.

note, double-dotted

A note having two dots placed after it making its time value three-fourths longer than without the dots.

note, double-stemmed

A note having two stems, one pointing downward, and the other upward, showing that it belongs to two different voices. Sometimes in piano music a double-stemmed note is used with a particular signification; for instance, a half note with two stems often occurs in the bass, the upper stem belonging to a quarter note which is supposed to be concealed behind the half note, and belongs to the voice having the chords above. This note is held the value of a half note, but the chord, or other notes belonging to the quarter note stem, are sounded after one beat.

note, driving

Syncopated note. See syncopation, or notes, syncopated.

note, eighth

A note having one-eighth of the time value of a whole note; also called a quaver.

note, fundamental

The generation or ground note of a chord; the keynote of a chord.

note, grace

A note of embellishment or ornament. See also grace note.

note, reciting

note, half

A note having one-half the time value of a whole note; originally called a minim, from the Latin minimus, least, because in early medieval music, it was the shortest note used.

note, key

The tonic, or first note of every scale, to which all the other notes in that scale bear distinct relation. We say a composition is written in a certain key, meaning that it is founded on that scale, all of its notes bearing a relation to the first note or keynote of that scale.

note, leading

The leading note of the scale; the seventh; called leading because it lies one-half step below the tonic or keynote, and in ascending passages leads into it.

note liée (nôt lē-ā) Fr.

Literally, a tied note: one of several notes united by a tie; one of a number of notes of equal value, as eighth notes or sixteenth notes, the hooks of which are run together in one or more thick strokes.

note of modulation

See modulation, note of.

note of prolation

A note that is extended beyond its original and nominal duration by the addition of a dot or hold.

note, open

A note produced on the strings of a guitar, violin or similar instrument, when not pressed by the fingers.

note, pedal

A note held by the pedal while the harmony forming the remaining parts is allowed to proceed. The term has its origin in organ playing, where a note, usually in the bass, is frequently held on the pedals while the rest of the harmony progresses.

note, preparative

See preparative note.

note, pressure

See pressure note.

note, quarter

A note having a time value equal to one-quarter of a whole note; also called a crotchet.

note raddoppiate (nō'-tě rād-dōp-pē-ā'-tě) It.

Literally, a redoubled note: a repeated note.

notes surabondantes

notes surabondantes nôt sür-ă-bôn-dănt) Fr.

Literally, superfluous notes: groups of notes such as triplets and quintuplets where three equal notes are given in the time of two of the same value or five in the time of four.

notes syncopes (nôt sän-kô-pâ) Fr.

Syncopated notes. When a natural accent or strong beat is suppressed or moved to an unaccented or weak beat, which is generally done by tying a note on a weak beat across the time of the strong beat immediately following, the note that is prolonged is said to be syncopated. The change of rhythm so effected is agreeably confusing.

notes, tied

1. Two notes of like pitch that are joined together by a curved line, called a tie, indicating that they are to be sounded as one note equal to their united time values.

2. Notes like eighth notes, sixteenth notes, the hooks of which are run together in one or more thick strokes.

noteur (nô-tür) Fr.

One who copies written music; a music copyist.

nothus (nô'-thüs) Grk. adj.

Applied to the Hyperæolian and Hyperphrygian modes. See also Hyperæolian and Hyperphrygian.

notula (nô'-tũ-lä) Lat. n.

Literally, a little mark or note: applied to the small notes used in writing a ligature; a musical phrase on which only one syllable is sung. Diminutive of nota.

nourri (noor-rê) Fr. part., mas.

nourrie (noor-rê) Fr. part., fem.

Nourished, fed; hence rich, full or well sustained, in connection with the quality of a tone, as, son nourri, a full, well sustained tone. Equivalent to nutrito (It.).

nourrir le son (noor-rêr lű sôn) Fr.

Hold or sustain the tone.

number

nourrisson (noor-rês-sôn) Fr. n.

Foster-child, nursling; hence figuratively bards, poets, the children of the muses.

noursingh

An East Indian horn or trumpet. It consists of a straight, metal tube and is held in a horizontal position by means of a long rod or stick.

nouveau (noo-vô) Fr. adj., mas.

nouvel (noo-vêl) Fr. adj., mas.

New; recent; modern; simple; inexperienced: nouvelle methode, new method.

nova (nô'-vä) It.

A small flute.

Novellette (nôf-ě-lêt') Ger. n.

A term first used by Schumann for the eight piano pieces in his Op. 21; which was entitled Novelletten, and characterized as "larger, connected, romantic stories." Following him, the term has been applied to compositions of considerable length, romantic in character, free in form, with bold harmony, and a variety of contrasting themes.

novemole (nô-vě-mô'-lě) It. n.

A group of nine notes to be sung in the time of six or eight of the same kind in ordinary rhythm: a nonuplet.

nowell (nô-ël) Old Eng. n.

Possibly meaning literally, good news, referring to the good tidings that the angels sang to the shepherds at Bethlehem, but later said to be derived from the Latin natalis, nativity. Various forms of the word have been found in Christmas carols since early in the Middle Ages, and the word to be used as the name for the Christmas carols themselves. See also noel: nuances (nü-ăns) Fr. n.

Literally, a gentle gradation of color: in music, a shading in vocal interpretation or instrumental performances, giving artistic expression by means of variations in time and force.

null

A nought (0) used in figured or thoroughbass to indicate that there are to be no treble notes, or that if employed they are to be octaves of the bass. Equivalent to tasto solo (It.).

number

A division of or selection from a long work, such as a movement of a symphony or sonata; a song, aria, recitative or chorus from an opera or oratorio: or any single piece on a program.

number, opus

number, 'opus

The number attached to the works of a composer in the order of their publication, to make reference to any special work easy, since much confusion would otherwise result when there are several pieces with the same title, as is not infrequently the case.

numercial notation

A plan originated by Rousseau for substituting numerals for the names of the seven scale tones. Day and Beal's one-lined system, introduced in Massachusetts in 1851, is similar.

numero (noo-mā'-rō) It. n.

numerus (nū'-mē-rūs) Lat. n.

1. Number.

2. Rhythm.

nunc dimittis (nūnk dī-mīt'-tis) Lat.

The opening words of the Latin version of the song of Simeon, Luke ii, 29-32. On beholding Christ when he was consecrated at the temple, Simeon is reported to have cried "Lord, now lettest thou thy servant depart in peace, according to thy word. For mine eyes have seen thy salvation, which thou hast prepared before the face of all people. A light to lighten the Gentiles, and the glory of thy people Israel." These words have been used as a chant from the earliest Christian times, being spoken of in the Apostolical Constitutions written in the Fifth Century, and mentioned in the Ninth Century by Amalarius. English paraphrases dating back to the Fourteenth Century are still extant, and later ones are numerous.

In the Greek Catholic Church, as in early times, the nunc dimittis is sung at vespers, but in the Roman and Armenian Church it is sung at compline, the last service of the day, which is

O

perhaps a more suitable time. The Anglican vesper service is a combination of vespers and compline; nunc dimittis usually forms part of this service, but the Sixty-seventh Psalm is sometimes substituted, as the Second Service Book of Edward VI., 1552, allows. However, nunc dimittis is the more popular. Since it belongs to the least important of the daily services, the great church composers of the Middle Ages overlooked it, but English composers after the Reformation wrote many settings to the canticle.

nunnia (nūn'-nī-ä) Grk.

Lullaby songs, the songs of the nurses. Compare *ninna-nanna* (It.).

nuns'-fiddle See *Nonnengeige*.

nuova (noo-ō'-vä) It. adj., fem.

. New; recent; modern; fresh.

nuovo, di (dē noo-ō'-vō) It. adv.

Again; once more; anew; newly.

nut

In musical instruments played with a bow:

1. The small ridge at the upper end of the neck over which the strings pass, and by means of which they are kept from touching the neck unless pressed by the finger.

2. The movable piece at the lower end of the violin bow into which the hairs are fastened, their tension being regulated by tightening or loosening the nut.

3. The lower nut on the violin is the ridge between the tailpiece and tailpin.

nutrendo (noo-trēn'-dō) It. part.

Nourishing; sustaining a sound.

nutrito (noo-trē'-tō) It. past. part.

Nourished; sustained. Equivalent to the French *nourri*.

O

O

1. A circle was used in the Middle Ages to indicate triple or perfect time whose quality of perfection was derived from its supposed relation to the Holy Trinity. The circle in turn was considered the most perfect of figures.

2. In modern notation a small circle

signifies (a) an open string; (b) the harmonic mark; (c) the diminished fifth or any chord containing it; (d) a *tasto solo*.

3. The small circle was also used in old German clavier-music to mark such notes as were to be played with the thumb.

oaten-pipe**oaten-pipe**

A pipe made of an oat-straw cut so as to have one end closed by a knot, the other end open. Near the knot a slit is cut so as to form a reed.

obbligati (ôb-blī-gä'-tē) It. adj. and n., pl.

obbligato (ôb-blī-gä'-tō) It. adj. and n., sing.

1. Literally, indispensable; so important that it can not be omitted; especially used of accompaniments which can not be omitted without injuring the composition.

2. An accompaniment, whether for a solo or a concerted instrument, which is of independent importance; especially an instrumental solo accompanying a vocal piece. Abbr. Obb., Obl.

obbligato accompaniment

An accompaniment which can not be omitted. The word accompaniment is now left out of the term. It is applied especially to an instrumental accompaniment to a vocal part, in which the instrument has an independent significance and vies with the voice in musical suggestiveness.

obbligato recitatives

Recitatives which are interrupted between the phrases by short symphonies.

Of two parts, when one remains stationary upon one note and the other progresses from pitch to pitch. See also motion.

oblique motion

The melodic progression of any two voice parts is oblique when one rises or falls while the other remains stationary.

oblique pianoforte

An upright piano in which the strings run diagonally instead of vertically. As now made, most uprights are oblique.

oboe Eng. n.

Oboe (ô-bō'-ë) Ger. n.

oboe (ô-bō-ā') It. n.

The name is derived through the Old English word hoboë, from the French hautbois, meaning a wooden instrument with a high pitch. It consists of a conical tube having a small bell at the lower extremity and fitted with a double reed mouthpiece. The compass is two octaves and a half with B below middle C as the lowest tone. At the time of the oboe's entrance into the orchestra it was the most difficult instrument to tune and was given the duty of sounding the notes by which the other members of the orchestra tuned. It is an important factor in the orchestra possessing great versatility. Its loud tones are piercing and the extremely high or low ones have a harsh quality, but the natural voice is gentle and can depict the finer emotions. Abbr. Ob.

oboë basso (ô-bō-ā' bäs'-sō) It.

An obsolete instrument which was pitched two tones and one-half or a minor third lower than the modern treble oboe. Synonym of oboë lungo. **oboë piccolo** (ô-bō-ā' pīk'-kō-lō) It.

Obsolete name for the modern treble oboe.

oboe da caccia (ô-bō-ā' dā kät'-chä) It.

An obsolete tenor oboe or, rather, bassoon. Its normal key was F. The tone was similar to that of the bassoon, but lighter.

octave hautboy

octave hautboy

An organ stop whose pipes produce tones like a hautboy, or oboe, and whose lowest tone is C below middle C.

octave, large

The octave beginning on the second C below middle C.

octave, large, once-marked

The second octave, or the one beginning on the third C below middle C. The notes are represented by capital letters with a single line below, \underline{C} or C_1 .

octave, large, twice-marked

The first octave, or the one beginning on the fourth C below middle C. The notes are represented by capital letters having two lines below, $\underline{\underline{C}}$ or $C_{||}$.

octave, once-accented

octave, once-marked

The octave beginning on middle C, marked C^1 or \bar{C} .

Also called the alto octave.

octave, perfect

An interval which contains five whole tones and two half tones.

octave, rule of the

See rule of the octave.

octave-scale

A scale an octave long, that is, consisting of six whole tones and two half tones.

octave, short

The octave beginning on the next C below middle C, marked with small letters c, d, e.

octave, small, five times marked

The ninth octave, or the one beginning on the fourth above middle C.

The notes are represented by small letters with five lines above them, $\overline{\overline{\overline{\overline{\overline{C}}}}$ chiefly for the organ.

octave, small, once-marked

The fifth octave, or the one beginning on middle C. Notes are represented by small letters with one line above them, \bar{c} , \bar{d} , \bar{e} .

octave, small, six times marked

The tenth octave, or the one beginning on the fifth C above middle C. The notes are represented by small letters with six lines above them. This system was used chiefly for the organ.

octave, small, thrice-marked

The seventh octave, or the one beginning on the second C above middle C. The notes are represented by

octavina

small letters with three lines above them.

octave staff

A system of notation which combines three sets of lines, each of which contains just one octave of ordinary vocal music, from low G in the bass to high G in the treble, and when a higher range is required lines are added with the notes, as in ordinary notation. This system shows at once the exact interval between any two notes. It is not necessary to refer to the clef and signature to determine the note, for sharps and flats are entirely dispensed with. Mr. Adams, of New Jersey, originated the octave staff.

octave-stop

1. An organ stop whose pipes produce tones an octave above the normal pitch of the keys used. See definition 6 under octave and also octave-flute.

2. The position of fingers stretching the interval of an octave on the keyboard.

3. A mechanical stop in reed organs which couples the keys an octave above.

octave trumpet-stop

An organ stop whose pipes produce tones like those of a trumpet and whose lowest tone is the second C below middle C.

octave twelfth stop

An organ stop each of whose pipes produces a tone the interval of an octave and a twelfth, or two octaves and a fifth above the ordinary pitch of the corresponding key of the keyboard.

octaves, covered

When two parts seem to progress in unison or octaves though not actually so written, the one part adds nothing to the real harmony, so is for the time wasted. Covered octaves are forbidden in modern harmony. They may be distinguished by filling up the interval of one of the parts with the intermediate notes of the scale.

octaviana It. n.

A small spinet whose tones are pitched an octave higher than those of the largest kind of spinet. Equivalent to ottavina, and octavine.

Octavin ($\hat{o}k\text{-t}\hat{a}'\text{-f}\hat{e}n$) Ger. n.

opera**opera**

A musical drama, staged with scenic effects, sung to the accompaniment of a full orchestra. The term is also used of any work or publication of a composer. The rise of the musical opera is placed toward the close of the Sixteenth Century in Florence. The chief parts of the opera, apart from the overture, are the recitative, aria, chorus, the different parts of the ensemble or the number in which all or most of the principal characters are introduced, and the finale or last movement. The aim of the opera is to interpret the drama; as it progresses there is less speaking and more music; the spectator seeing the dramatic action understands, without explanation, many musical combinations; hence, the opera has had considerable influence on the progress of music.

Opera is divided into kinds according as certain elements are emphasized. In France the verbal element is the most developed. Italian influence tended to make the musical parts more prominent, hence they have produced many arias suited to concert performances. In Germany the opera was first introduced at the courts, but the performers, composers and airs were Italian. Most of the German arias follow the Italian principle and are sometimes used for separate performance.

The history of the opera in England is curious. At first it was under French influence; later on it was ruled by Handel, who developed the musical parts and gave a new life to the old form. In this he resembled Mozart, who did little in the way of developing the form but whose genius made it immortal.

In the middle of the Eighteenth Century the opera in Italy, Germany and France seemed lacking in vitality, when Glück, whose theory of music is much like that of Wagner, departed from the traditional form of the opera and gave it life. Mozart worked under Italian influence for a time; his technical powers and dramatic sense made him one of the great composers who influenced all later operatic writers. Since then there have been various forms of operas. Abbr. Op.

oratoire (ôr-ă-twār') Fr. n.

Oratorio. See also oratorio.

oratorical accent

A term signifying the adaptation of vocal music to words and meaning. It is this accent which gives music its charm, for by it not only the natural pronunciation of the spoken word is preserved, the accent falling in the same place as the measure accent in the music, but the notes or groups of notes are so arranged as to bring out the intellectual or emotional feeling of the passage. The observance of oratorical accent often necessitates a part instead of a whole measure at the beginning of a piece to bring the accent of words and music together. Perfect accentuation seems difficult to practise and even the great masters are sometimes offenders, through carelessness or an imperfect knowledge of the language which they are using as a text. Also, when words are translated it is often impossible to preserve the original accent, and the music accordingly suffers. Oratorical accent is sometimes marked by the composer. It is indispensable in a good singer.

oratorio (ôr-ă-tō'-rī-ō) It. n.

oratorio

A vocal composition consisting of solos, duets, trios, quartets and choruses. The subject is usually of biblical foundation or taken from sacred history. The name was derived from the fact that during the Sixteenth Century Saint Phillip Neri delivered sacred discourses interspersed with songs to a company gathered in his oratory or place of prayer. The music gradually increased to greater importance than the discourses themselves, growing into the present form. The subject of an oratorio may be secular, as, for instance, Hayden's "Seasons."

orchestra (ôr-kās-trä) It. n.

orchestra Eng. n.

Literally, dancing place. Originally, the name was used to designate the front of the stage, where in Greek tragedy the chorus was stationed. Later, in Rome, this place was reserved for the seating of distinguished personages, but retained the Greek name. Still later the writers of operas used the name in reference to the place in front of the stage occupied by the musicians, and gradually it came to refer to the musicians themselves. Now it is a general term referring to the place, to the musicians or to their instruments. Earlier than the Seventeenth Century there was not a systematic combination of instruments. The score of Monteverde is the earliest attempt to form an orchestral arrangement of instruments. A stringed quartet was his foundation. The musician who sat at the harpsichord was called the conductor. The harpsichord continued to be used much longer than the lute, which was abolished about the close of the Eighteenth Century. At first wind instruments were seldom used, but Scarlatti wrote scores for the oboes and lutes and they quickly gained favor. Handel used all the ordinary instruments of the orchestra except the clarinet; in

the score he required one hundred and sixteen instruments. Gluck was the first composer to direct concentrated efforts toward the improvement of the orchestra. While Beethoven is usually considered the founder of the orchestra, Handel is the greatest modern writer for it. Abbr. orch.

orchestra, full

One in which the groups of stringed, wood wind, brass wind and percussion instruments are present in fairly complete form and well proportioned. The stringed instruments are the violin, viola, violoncello, double bass; the wood wind are the flute, piccolo, English horn, oboe, bassoon, double bassoon, clarinet, basset horn; the brass wind instruments are the French horn, trumpet, trombone, saxhorns, bass tuba, cornet; and the percussions are the kettledrum, bass drum, snare drum, cymbals, triangle, bells, gong. The harp and piano are not usually considered regular orchestral instruments. Sometimes other instruments are required for special scores. There may be any number of the same kind of instruments in a full orchestra.

Singing by ear.

oreille musicale (ō-rā'-yŭ mü-zë-käl') Fr.

A musical ear.

organ

This most important and wonderful musical instrument had its origin in Pan pipes, a primitive instrument of ancient Greece, which consisted of a series of whistles of various pitches joined together at the top, and blown through one mouthpiece. An early development of the organ from this germ consisted of pipes inserted in a wind box and supplied with air by bellows. There came to be several sets of bellows compressed alternately, in order that the wind supply might be uniform, and as the instrument developed these grew so large that they had to be trodden instead of worked by hand. A later method was the use of leaden or stone weights attached to the bellows. About 200 B. C. Ctesibus, an Egyptian, applied

A machine for supplying wind to the organ.

organ-blower

1. One who blows the bellows of an organ.

2. A motor or engine for blowing an organ.

organ, cabinet

A small, portable organ; usually a reed organ or harmonium.

organ, choir

In large organs the third principal section of the instrument, of less power than the great organ, and containing stops suited for choir accompaniment. Formerly called the chair-organ; sometimes, the positive organ.

organ di legno (ôr-gä'-nō dē län'-yō)

It.

A musical instrument of wood; a xylophone.

organ, echo

One set of pipes of a large pipe organ; so called because it is placed at a distance from the main part of the instrument, and is used for echo-like effects. Its action is almost always electric.

organ, enharmonic

An American organ which produces three or four times the usual sounds within an octave, each key being furnished with precise intervals, and by pressing a pedal the scale of each key is produced.

organ, full

In organ playing the entire power of the instrument.

organ, hand

A portable barrel organ, both the barrel and the bellows of which are worked by a hand-crank. By shifting the position of the barrel, different tunes may be played. The pipes are usually of two or three sets of stops; a diapason, a flute, and often a coarse-tone reed stop.

organ, harmonium

A harmonium or reed organ of great compass and power, designed to be used as a substitute for an organ.

organ-loft

That part of the gallery of a church where the organ is placed.

organ, parlor

Cabinet organ.

organ, piano

A variety of barrel organ having strings and hammers like the piano instead of the usual case containing pipes. See also barrel organ.

organ, pipe

See organ.

organ, pneumatic

An organ for which wind is the motive power, in distinction from the hydraulic organ, moved by water.

organ-point

A single tone, usually the tonic, keynote, or the subdominant which is two and a half tones above the tonic, held or sustained by one of the two voice-parts while the other parts progress freely without reference to the sustained tone, except at the beginning and end of the passage. When an organ-point occurs in any other than the lowest voice, it is said to be inverted.

organ-point, pastoral

The same as pastoral pedal-point or pastoral pedal-note. Point originally meant note, therefore pedal-point is synonymous with pedal-note, but it is indicative, in modern use, of the whole phrase in which the pedal-note occurs. Pedal-point, which is gradually displacing the term organ-point, means a phrase in which one note is held by the pedal, or some one voice, generally the bass, while the other parts progress in independent harmonies. The note usually held is the tonic, keynote, or the dominant, the fifth degree, and when both are held at once it is called pastoral pedal-point.

organ score

A score in which the vocal parts are written out in full, generally on separate staves, and the organ accompaniment arranged or compressed, from the full instrumental score, on three staves below the vocal staves. The lowest of the three staves is for the pedal-bass.

organ stop

A collection, register on row of pipes or reeds in an organ, producing tones of the same quality, and ar-

organ stop

ranged in regular musical progression. Organ stops are classed as the flue work, having flue pipes, and the reed work, having reed pipes. The first includes the cylindrical flue pipes of the characteristic organ-tone quality, the diapasons; the covered or stopped pipes of lower pitch; and the flute work including flue pipes too broad or too narrow to produce the true organ tone, and the three or four sided wooden pipes. In the reed work the tone may be modified in quality, but not in pitch, by the shape and size of the tube. According to tone and pitch they are divided into foundation stops, mutation stops and mixture stops. The first two have but one pipe to each key, whereas the mixtures have two, three, or more. The foundation stops produce the characteristic organ tone which agrees with the normal pitch of the key struck, or with some octave of it. The mutation stops produce a tone that is neither the normal pitch nor an octave of the key struck, but a third, fifth, twelfth, fifteenth, and so on, higher.

The mixture stops add the overtones or harmonics to the foundation stops as they are voiced an octave, fifth, twelfth, two octaves, and so on, higher than the regular stops. See also organ stop, foundation, mutation and mixture stop.

organ, swell

One of the partial organs of a pipe organ. In one with three rows of keys, it is usually the upper row, controlling one or more sets of pipes enclosed by a set of sliding shutters, the opening or closing of which by the swell pedal increases or diminishes the tone by degrees, at the will of the performer.

organ tablature

A form of notation used in Europe for keyboard instruments from the Fifteenth to the beginning of the Eighteenth Century. Letter-names were employed for the notes, the melody being marked on a staff with chord accompaniment in vertical rows of letters beneath.

organ tone

A quality of musical tone which is characteristic of the pipe organ; such a tone as is given by the stop in a pipe organ called the open diapason.

organum

music for several voices which became an established system about the beginning of the Christian era. The extremely early music of the Greeks only allowed the voices to sing in unison. The next step was for the voices to observe the interval of an octave throughout a piece of music. Later still, they were given the intervals of an octave, of a fifth, or of a fourth apart, throughout the piece.

of the piece in which it occurs, and upon its position, that is, whether it is above or to the side of the principal note. When it is above the principal note, the turn is executed at once; when it stands to the side the note is sustained for some time. The turn is used in vocal and instrumental music.

The shake or trill is one of the earliest ornaments used in music, and is the principal one of a species of embellishments founded on the alternation of a principal note with its subordinate note one degree above or below it. It may begin on either principal or auxiliary note and owing to the accent, differs considerably in effect, since in one case emphasis falls on the principal and in the other, on the subordinate note. According to one point of view the shake is a reiteration of the principal note continually interrupted by the subordinate note, in which case the accent falls on the principal note. According to the other point of view it is a series of successive appoggiaturas, and the accent is thrown on the auxiliary. In modern music, when the trill begins on the subordinate note it is usually indicated by a small grace note immediately before the trill note. Immediately before the final note of a shake

ornaments

is introduced a new auxiliary, one degree below the principal note, which with the concluding principal note forms what is called the turn of the shake. This is indicated variously, by two small grace notes; by notes of ordinary size; or in old music, by a vertical stroke; a small downward curve; or a regular turn added to the sign of the trill.

The mordent is a very important ornament used in instrumental music. It consists of the rapid alternation of a written note with the note immediately before it, and is divided into two kinds, known as simple or short mordent, and double or long mordent. The simple mordent consists of the principal note, twice repeated, with the auxiliary note between; and the double mordent consists of the principal note, lower auxiliary, and principal again. The first notes are played quickly, the latter are held.

The simple mordent is illustrated by the sign

and the double by

There are a great number of ornaments that were used much in earlier music, but which have since passed out of use. For further discussion of ornaments see the terms in their alphabetical order.

Orpheusharmonika (ôr'-fä-oos-här-mō'-nē-kä) Ger. n.

Equivalent to panharmonicon.

Orphic dances

Sacred Greek dances which accompanied funerals and other solemn or mysterious occasions. A funeral procession was usually composed of all the members of the community, including the relations and friends of the deceased. They kept step, singing hymns, as they walked through the streets to the altar. At their head walked the priest, dancing a solemn step. Then came groups of dancers keeping step to the music of certain instruments reserved for such occasions. At times the procession interrupted their dancing to sing hymns in honor of the deceased. Priests and old women, hired mourners, closed the cortège. When the Orphic dances were strictly religious they were performed by professional dancers only.

Orphic hymns

Hymns which until a comparatively recent period were supposed to be older than Hesiod and Homer and were attributed to Orpheus and Musæus but are now believed to emanate, for the most part, from poets of the Alexandrine age.

passacalle (pä-s-sä-käl'-yä) Spa. n.

passagallo (pä-s-sä-gäl'-lō) It. n.

An old Italian or Spanish dance. The derivation of the name is probably from the Spanish verb pasar, to walk, and the noun calle, street. Originally, it was performed by one or two dancers only. It had much in common with another dance of the Seventeenth and Eighteenth Centuries, called the chaconne. The passacaglio was of a more stately and solemn movement than the chaconne, but both attracted the attention of composers for the organ and harpsichord because the music for both was constructed on a ground bass involving considerable skill in counterpoint in their composition. In the chaconne the theme was kept in the bass, while in the passacaglio it was placed in any of the parts. Bach and Handel have left interesting examples of the passacaglio. As a dance, it survived in France until the Eighteenth Century. Both the passacaglio and chaconne were usually written in triple time.

passage

A phrase; a figure, as a scale passage; a run.

passage-board

A board for the organ tuner to walk on, placed by the side of the sounding board, or through the ranks of pipes.

passamezzo (päs-sä-měd'-zē) It. n.

An old Italian dance popular in England where it was called passing measures pavan, or passy-pavan. This English title shows its kinship with the elegant and stately pavan, that celebrated favorite of kings and courtiers throughout Europe. Being less slow and solemn than the latter, the origin of its Italian name is by some authorities considered to be in the expression *passo a mezzo*, having reference to the time signature of the music, and, being freely interpreted, a dance in hurried time. The *passamezzo* was, nevertheless, deliberate in its movement, differing slightly from a graceful, gliding walk. The music was written in duple, that is, even time. Also spelled *pazzamezzo*.

passant (päs-sän) Fr.

Literally, a traveler: the slide of the bow.

passee-rue (päs-rü) Fr.

Another name for the *passecaille* or *passacaglio*. See also *passacaglio*.
passepied (päs-pē-ā) Fr. n.

Derived from *passer*, to step, and *pied*, foot: a lively, French dance supposed to have its beginning in Basse Bretagne among the sailors. Its first appearance in Paris was 1587, when it was performed by street dancers. In the reign of Louis XIV. it became a part of the ballet. It was also inserted between the parts of a suite, that is, a set of dance forms. It resembled the minuet but was of a livelier character. The movement was in triple, that is, uneven time, three-eight or three-four and began properly on the last beat of a measure. Bach introduced a number of beautiful *passepieds* into his works. In England, it became popular in the Queen Anne period, a slight variation from the French being that English composers frequently commenced on the first beat of a measure. The English called it *paspy*; the Spanish, *paspie* (pas-pe-a). To run a *passepied* was the proper form of expression. Directions for running it, as performed by one or two dancers in a ballet, are still extant. There is also

passy-measure

a description of Madame de Sëvigné running the *passepied* at the festivities in Brittany on the occasion of the assembling of the Estates.

passing modulation

A transient modulation, that is, a brief change of key that is not carried out into a cadence or close of a movement.

passing notes

Notes not forming a part of the harmony, but used to connect the essential tones in any two consecutive chords.

passing shake

A short shake or trill used in a manner similar to the double appog-

giatura, as an ornament, without interrupting the rhythm or melody of the passage in which it occurs.

passing tones

See *passing note*.

passion-music

Music partaking of the nature of the cantata or oratorio, and descriptive of the suffering and death of Christ. It originated in the service of the early Christian church, Fourth Century, and its development, after the Sixteenth Century, greatly resembled that of the oratorio. Two points of difference are that *passion-music* is confined to the one subject and that it contains a decided element of spiritual contemplation expressed in hymns of praise and choral songs. The most remarkable example is the *Passion according to St. Matthew* of J. S. Bach. The dramatic form of the *Passion* with stage-setting and dramatic action is still preserved in the Oberammergau *passion play*.

passionata (päs-si-ō-nä'-tä) It. adj.

Passionate; impassioned.

passionatamente (päs-si-ō-nä-tä-měn'-tē) It. adj.

Patagonian dance

A dance of the Patagonian Indians. This dance was always given on the occasion of a yearly festival in honor of the god of good, *Vita Ouentron*. The celebration was carried on with great solemnity, laughter being considered unlawful. Before assembling for the dance they dressed themselves grotesquely, painted their faces and greased their hair. The men then formed themselves in a line facing the east, with the women standing behind them. The dance that followed consisted in a sort of pirouetting, with one foot, the men always using the opposite foot from that on which the women balanced, all changing their positions slightly by turning from right to left. By way of accompaniment the men blew with

Pauker

all their might into hollow reeds, while the women sang and beat upon wooden drums, covered with the skin of the wildcat dyed in bright colors. The dance was ended suddenly by a signal from the chief, which was immediately followed by cries of hurried alarm. The men jumped quickly upon their horses and raced away with their fantastic garments fluttering in the wind.

peal

3. A musical phrase played upon a set of bells, as a scale or part of a scale played up or down, but likewise applied to any melodic figure so performed.

pean

A song of triumph. See also pæan.

pearly

In the technique of the piano, a style of touch, producing a clear, sweet tone.

pedal

Derived from the Latin *pes*, foot. Any part of a device or a machine by means of which power or action is transmitted from the foot of the operator. In musical instruments, a metal or wooden key or a projecting bar, worked by the foot of the performer.

1. In the piano, two or three pedals are used; (a) the damper, or loud pedal, which lifts the dampers from the strings and increases the tone; (b) the soft pedal which acts in one of several ways, introducing a muffler between the hammers and the strings, or causing the hammers to strike from a shorter distance, or moving the hammers so that they strike but one string instead of the usual two or three; (c) often a third pedal, called the sustaining pedal, which holds up the dampers after they have been lifted causing the hammer to remain upon the strings, thus sustaining the tone. The abbreviation *ped.* is placed at the beginning of a passage where the damper pedal is required and the

* * ⊕ + or 

sign is placed at the end. When the soft pedal is required an expression such as *una corda*, one string, is written above the passage. The sustaining pedal is used at the discretion of the performer.

2. The pipe organ has different sorts of pedals: those in the pedal keyboard that resemble the keys for the hands, but are much larger; the swell pedal, which controls the opening of the shutters of the swell box; and a number of others, which control the drawing of the stops.

3. A pedal in the reed organ or harmonium is any one of the treadles that are used to work the feeders of the bellows.

4. In the harp, any one of the foot levers, which are used to shorten the strings and raise the pitch. There

pedal, damper

Damper pedal: the piano pedal at the right, on depressing which the dampers are lifted from the strings and the tones are made louder.

pedal extension

The same as damper pedal or sustaining pedal. The loud pedal of the piano, by which the tone is increased and extended. See also damper pedal.

pedal-harp

A double-action harp; one with pedals to produce the semitones. The modern harp, perfected in 1820 by Sebastian Erard.

pedal keys

1. In organ building, a set of keys played with the feet.

2. The separate keys of any keyboard played with the feet.

pedal monochord

A one-stringed pedal; a form of soft pedal, which causes the hammers to move so that they strike but one string instead of the usual two or three.

pedal note

The same as pedal point, or organ point, an older term, now less often used. A note held by the pedal while the harmony forming the remaining parts is allowed to proceed. The term has its origin in organ playing, when a note, usually in the bass, is held on the pedals while the rest of the harmony progresses.

pedal, open

In the piano the damper pedal, which, when depressed, lifts the dampers from the strings and increases the tone. Synonym of loud pedal.

pedal, piano

perfect

A term applied:

1. To certain intervals, the first, fourth, fifth and octave, because they do not change their quality in inversion.

2. To certain chords and cadences that are complete or satisfactory.

3. To triple time in medieval music.

perfect breve

A breve having three beats: in medieval music, a breve was a square black note, the third in time value in musical notation. It is twice as long as the present whole note, which is the original semibreve. A breve was said to be perfect: (a) According to the time signature. In triple or perfect time, a breve had three beats and was a perfect breve. (b) According to position. The order in which notes stood was very important; a breve followed by another breve was always perfect.

perfect cadence

A cadence is any concluding strain, rising or falling, of a movement or of a piece of music. A perfect cadence results when the chord of the dominant, or the fifth note in the scale, is followed by the chord of the tonic, or the keynote, with the keynotes of both chords in the bass, and the root or keynote of the second chord doubled in the highest voice. These two forms of the perfect cadence were called authentic, in the early church, in distinction from the plagal cadence in which the chord of the subdominant, that is, the fourth note of the scale, was followed by the tonic or keynote. A piece ought properly to close with a perfect or complete cadence; imperfect or half cadences, the chord of the keynote followed by the chord of the dominant or the fifth note in the scale, being used for a temporary close at the end of a phrase or movement.

perfect chord

A combination of three or more notes; it is also called the common chord, and consists of any tone with its third and fifth and usually its octave interval.

Phrygian (frī'-gī-ĕn) Eng. adj. from Grk.

The name applied to one of the Greek and also one of the medieval modes or scales. As used by the Greeks it had the following form:

— indicates a whole step; \cup indicates a half step; $\overbrace{\quad}$ connects the tones forming a tetrachord or group of four tones; + marks the diazeuxis or tone separating the tetrachords. Phrygian was also applied to one of the Greek scales beginning

Phrygian

on E, embracing two octaves, and formed from five tetrachords. In medieval church music the Phrygian was one of the authentic modes, or those which began on the final or keynote.

phrygische (frē'-jīsh-ě) Ger. adj.

Phrygian. See also Phrygian.

Phyrrhica

The name of ancient Greek military dances of sacred origin, is variously accounted for as coming from Phyrrhicus, a native of Crete; from the Greek word for fire, illustrated in the consuming energy of the performers; or from Phyrrhus, in commemoration of a military march and exhibition given at the funeral of his father, Achilles. Minerva herself, is said to have been its author, dancing it in remembrance of the defeat of the Titans, and it is believed that it was always a feature of the Panathenæa, a festival in her honor. Plato speaks of the Phyrriic dance and describes its movements and postures as those of warriors both on the defensive and offensive—avoiding missiles, stooping, springing to one side, leaping backward, hurling the spear or shooting the arrow. There were several sorts of Phyrriic dances, named according to the pantomime enacted. One showed a fight with shields; one a battle with shadows; a third exhibited single combat, where two youths imitated a hand to hand conflict, from the challenge to the fall of one of the combatants. The Phyrriic dance was also practised by women, notably the Amazons; and at Sparta, by children not more than five years old. Bodily strength and agility were thus acquired, and also the power to think rapidly and act quickly. Gradually the dance became more dramatic in character, evolving into a sort of ballet, with male and female dancers. It was lost eventually in the Bacchic ceremonials, the pipes and wand of the god of wine and revel superseding the shield and spear of Minerva or Mars.

physharmonica

Derived from the Greek, bellows, and the Latin, harmonica. A small reed organ, intended to be attached to the keyboard of a piano to sustain the tones. It was a forerunner of the harmonicon. Invented in 1818.

pianoforte

ness and swiftness of action with the strength of English mechanism, but the construction was very complicated and difficult to manufacture and repair. The weight of wires used had been gradually increased until manufacturers were confronted with the problem of strengthening the frame to resist their tension. Brass and iron strings were being used and they presented difficulties in tuning owing to the inequality of their resistance to tension and atmospheric changes, which resulted in the invention of a construction of brass and iron plates and hollow tubes which counteracted this tension.

The frame of the piano had been gradually improved until, in 1825, Babcock of Boston patented a square piano, having an entire frame of cast iron, an idea which was afterward developed by Meyer of Philadelphia and Chickering of Boston. The quality of strings used had been greatly improved, especially in Germany, and about 1833 over-stringing was introduced in America. This consisted in placing the bass strings diagonally across the treble ones, and afforded greater length and more even tension. The strings varied in length and weight according to the pitch at which they sound, the bass strings being steel, wound with copper or soft iron wire.

The wood used in piano making is selected with the greatest care and may be oak, pine, maple or mahogany. It is weather seasoned from three to ten years, then kiln-dried before it is sawed into strips, which are glued together with the grain matched or opposed, according to the use to which it is to be put.

Every part of the piano must be made of selected material and prepared with the greatest care. It ranks with the orchestra in the opportunities it gives to composer and performer, and vies with it as a means of accompaniment. In connection with it have been developed many mechanical players which have increased its use. These bring it under the control of those uneducated in the technical side of music. Abbr. P. F., pfte.

pianoforte action

The keyboard of a piano together with the entire system of levers and hammers, by which the player sounds the strings.

piano harp**pianoforte, Æolian**

An invention of about 1850. A piano so connected with a mechanical device consisting of free reeds and bellows as to increase the sustaining power of the tone.

pianoforte, concert grand

A grand piano of the largest size.

pianoforte, cottage

An upright piano.

pianoforte, dumb

An instrument resembling a small piano in shape. It has a keyboard, but no hammers or strings. It is designed for silent practise to increase the mechanical skill of the fingers.

pianoforte, electric

A piano the wires of which are vibrated by electro-magnetism.

pianoforte, grand

A large harp-shaped piano.

pianoforte hammer

That part of the mechanism of a piano by which the strings are struck.

pianoforte melographic

A piano, invented in 1827, with an automatic attachment which recorded the improvisations of the performer.

pianoforte, oblique

An upright piano in which the strings run diagonally instead of vertically. As now made most uprights are oblique.

pianoforte, overstrung

A piano whose strings are arranged in two sets, one of which lies over the other, crossing it diagonally; the object is to economize space.

pianoforte, parlor grand

A grand piano of the second size.

A mechanical piano-player.

piatti (pī-ät'-tē) It. n. plu.

Literally, dishes, thence plates: a name sometimes given to cymbals.

pib (pēb) Welsh n.

pibcorn (pēb-körn) Welsh n.

A rustic wind instrument of the Welsh and Celtic peoples. The name is thought to mean pipe-horn, as it resembles both a fife and a horn.

pibroch (pē-brôkh) Scotch. n.

Music of a wild and irregular character played upon bagpipes in the Scottish Highlands. The pibroch was designed to awaken martial spirit and clannish pride. It was composed of an air, or ground theme, that reappeared in several variations each more rapid and difficult than the preceding, the whole ending with a remarkably quick movement. Many times the title related to events of historical or legendary fame, and the full account of a battle was frequently represented from the preparation for the conflict, through the advance of the clan, the encounter, the flight of the foe, the pursuit, and a wail for the slain clansmen.

picciolo (pīt'-chē-ō'-lō) It. adj.

Small.

picco pipe

A small whistle named after a blind Sardinian peasant who appeared in London in 1856. The whistle had but three holes, and was played with remarkable brilliancy, a compass of three octaves being secured.

piccolino (pik-kō-lē'-nō) It. adj.

Very small; diminutive of piccolo.

piccolo (pik'-kō-lō) It. adj.

Small, used as a noun to mean:

1. Flauto piccolo, small flute. See also piccolo flute.

2. Piano piccolo, a small kind of upright-piano.

3. A two-foot stop in the organ.

pieno organo

piccolo flute

Literally, small flute: it is a small flute sounding an octave higher than the ordinary flute. Flauto piccolo is placed in scores to mean the piccolo, but the Italians seldom use this term, preferring ottavino, the diminutive of octave.

piccolo, oboè (ō-bō-ā' pik'-kō-lō) It. n.

Obsolete name for the modern treble oboe.

piccolo pianoforte (pëk-kō-lō pë-ä-nō-fôr-të) It.

To pinch or pluck the strings of an instrument.

pins, plate

In the plate of a piano, the pins on which the strings are fixed.

pipe

1. Any tube of reed, wood, or metal capable of producing musical tones. The name is usually applied to a very primitive instrument consisting of a simple reed.

2. The tubes of an organ which produce the tones.

pipe and tabor

A combination long popular in Europe, but now obsolete. The pipe was blown through a mouthpiece at the end, but as it was held and also played with the left hand it had only three holes instead of the usual six. The tabor was a small drum without snares. It was hung to the waist, or left arm, and was tapped with a small drumstick held in the right hand.

pipe-metal

In organ building a metal for the manufacture of the metallic flue-pipes, usually composed of an alloy of lead and tin; an increase in the proportion of tin improving the quality of the tone. Pure metals, zinc, tin, or lead, or all three combined in different proportions, have also been used.

pipe, oaten

A pipe made of an oat straw cut so as to have one end closed by a knot, the other end open. Near the knot a slit is cut so as to form a reed.

pipe-organ

See organ.

pipe, picco

See picco pipe.

pipe, pitch

See pitch pipe.

pipe-rack

A wooden shelf in an organ situated above the windchest and perforated so as to hold and support the pipes.

plagal cadence**plagal cadence**

The closing strain of a melody, consisting of a chord with the subordinate, or fourth tone of the scale, as a root or lowest note, followed by a chord with the tonic, or keynote, as root. Also called church cadence.

plagal keys

In ancient Greek music those keys whose tones began in the dominant, or fifth tone of the scale upon which they were founded, and extended upward to the octave and twelfth, a twelfth being eight whole tones and three semitones. See church modes.

plagal melody

A melody whose range extends a fourth below and a fifth above its keynote. The plagal is so called because it is based on the authentic. The term is used only in ecclesiastical music.

plagalis (plä'-gä-lis) Lat. adj.

Plagal. See also plagal.

plagalisch (plä-gä'-lish) Ger. adj.

Plagal. See also plagal.

plagiaulos (plä-jī-aw'-lös) Grk. n.

Cross-flute, or transverse, or German flute. The term cross-flute, meaning placed across the mouth and blown through a hole in the side near the larger end, was first used to distinguish it from the beak flute, blown at one end. As the latter is now obsolete the term cross or transverse is no longer necessary. See also flute.

plain-beat

1. An obsolete English harpsichord grace, that is, a certain term or ornament used in playing the harpsichord to make up for the lack of sustaining power in the instrument.

2. A grace peculiar to old English music and adapted to stringed instruments, as it was executed by sliding the finger along the string.

plain chant

Vocal music in its simplest form as used in the early Christian Church; it probably began in the first centuries of the Christian era. Its origin is traditional. St. Ambrose systematized it and Pope Gregory revised it. Its early form was governed by rules very similar to those which govern poetry. It was divided into distinctions, corresponding to lines, neumes or notes, corresponding to feet, and single neumes to syllables. It was quite free from ornaments or embellishments which have since been added, and was the foundation for the

poco piu (pō'-kō pē-oo') It.

From poco, little, and piu, more; hence, a little more.

poco piu mosso (pō'-kō pe-oo' mōs'-sō) It.

A little faster.

podismos (pō-dīs'-mōs) Grk. n.

One of a number of Greek dances that were derived from the military dances known as Phyrriic and Memphitic. The object of the military dances was to train the bodies to heroic deeds by dancing in the apparel of war. The movements of the dancers were those of escaping blows or objects hurled at them, leaping backward, jumping to one side or stooping in the avoidance of danger. The podismos illustrated a retreat from battle, and the pursuit of the triumphant hosts after their fleeing foes.

poggiato (pōd-jä'-tō) It. adj.

Leaned upon; dwelt upon.

poi a poi (pō'-ē ä pō'-ē) It.

By degrees; gradually.

polichinelle (pō-lē-shē-něl) Fr. n.

A clog-dance of fantastic character.

polka

A lively round dance, said to have been the idea of a Bohemian servant girl. It was originally called the nimra, from a song that accompanied it, the opening words of which were: Uncle Nimra bought a white horse for five and a half thalers. The history of the polka is extremely interesting. Miss Frederica Bremer, the Swedish writer and traveler, gives a description of it as danced in Bohemia, Hungary, Sweden and Norway. She said that it painted the northern inhabitants' highest joy in life; that it was an intoxication in which people released themselves from every burden or care of life. It was danced in couples. The man sprung high in the air supported upon the arm of his partner; he then threw his arms about her and swung her violently round in circles, then separated from her to spring again, and so on, as the dance proceeded. In 1835 the polka was danced at Prague; in 1839 it reached Vienna through the conductor of a Bohemian band; in 1840 it took Paris by storm, danced on the stage of the

Literally, a little bridge: hence, the bridge of bow instruments.

pontifical choir

The choir of the Sistine Chapel in Rome. This is a college in Rome of thirty-two members who are trained as choristers to sing at all the solemn services in which the pope officiates in person. This college is of great antiquity and renown, having been founded, it is said, as early as the Fourth Century. These schools have been under the protection of the popes and because of their continuity have preserved in its original purity the music of the early church. Musicians of the greatest genius have belonged to the choir and have added to its music and effectiveness. Palestrina was at one time master, and it is through the performance of this body of singers that his mass, *Missa Papæ Marvelli*, has been given to us. This school earlier supplied singers for all the churches in Rome and many times in other cities, but the name pontifical choir is especially applied to the choir of the Sistine Chapel, in which the music is so conducted by its master and so intimately related and connected with the service itself that its effect upon the listeners is most wonderful. It is in this chapel and sung by this choir that the *Miserere*, sung in the office of *Tenebræ*, has called forth the well-merited admiration for its profound impressiveness.

poogye (poo'-gē) Hin.

A Hindoo flute which was blown through the nose.

porrectus (pör-rĕk-tŭs') Lat. n.

2. The French for choir organ.

position

1. On instruments like the violin position means the place of the left hand on the finger-board.

2. In chords this means the arrangement of the notes of the chord with reference to the lowest note. Abbr., pos.

position, close

Referring to chords, this means that the notes composing the chord are close together; that is, that the upper notes do not extend beyond the octave of the note on which the chord is based.

position, dispersed

Said of chords when the notes comprising them are far apart and extend beyond an octave. Also called open position.

position, first

That position of the left hand on the finger-board of a violin, or similar instrument in which the hand is nearest the nut, that is, the small bridge at the upper end of the finger board over which the strings pass to the screws, and the forefinger pressing the first tone or semitone of the open string.

position, fundamental

Said of chords when the note on which the chord is built is the lowest note of the chord.

position, half

In the first position the thumb and first finger presses the first tone or semitone of the open string; the half position is a modified first, in which the second, third and fourth fingers take the place generally held by the first, second and third fingers. The half position makes much easier the playing of pieces in certain keys.

position, original

See original position.

position, second

The left hand moves up toward the bridge and the forefinger presses the

position, second

same that was pressed by the second finger in the first position.

position, third

A prelude; introduction.

præcentor (prē-sën'-tör) Lat. n.

Choir leader.

præfatio (prē-fä'-shī-ō) Lat.

Preface: in the celebration of the mass in the Catholic Church of both the East and West this is the division of the mass which precedes the canon. It begins with the words: Sursum corda, your hearts upward, that is, lift up your thoughts to Heaven. The use of the preface in the mass is of Apostolic origin and a large number of forms were in use, a special one for every feast. In use today in the Roman Church there are but eleven, assigned to different periods of the year; of these, the most beautiful and most profound is that of the Blessed Trinity. The Oriental Churches have no change of preface, each liturgy having one which is used throughout the year. In the Eastern Church it is called by the name Anaphora; which word really includes also the canon, though its beginning and ending is precisely like that of the preface.

The concluding words of the preface are: Holy, holy, holy, Lord God of Hosts; called the Sanctus, or the Seraphic Hymn. At solemn high mass, that celebrated with the assistance of deacon and subdeacon and accompanied by a full choir, the preface is chanted in full by the celebrant. The music is a very simple, plain chant, but of great solemnity and beauty. At the conclusion of the preface the sanctuary bell is rung to remind the people of the approach of the most solemn part of the service, the canon. It is also called the Inlatio, Inference or Immolatio.

præfectus chori (prē-fëk'-tüs kö'-ri)

Lat.

Chorus leader.

Pralltriller (prä'-tril-lër) Ger. n.

From prallen, to rebound, and triller, a trill. An inverted mordent; a kind of trill or shake consisting of the melody note, the note one degree above it, and the melody note again, for instance:

program

From pro, before, and from gram, write. A printed or written list of the selections to be sung or played, set down in the order in which they are to be rendered. The titles and the names of the composers and performers are usually added and often short descriptions of the compositions.

program music**program music**

Music which contains a program or succession of ideas forming the description of some emotion, condition, scene or event. The description must be only suggestive or the composition deteriorates into descriptive music which contains direct imitations of subjects such as bird calls. Program music is more subtle and requires more delicate handling, descriptive pieces being classed as popular.

programmist

1. One who is devoted to program music.

2. A critic or a theorist who favors composing according to program.

progrès (prō-grě) Fr. n.

Progress; improvement.

progressio harmonica (prō-grēs'-sī-ō hār-mōn'-ī-cä) Lat.

A stop in German organs, composed of more than one pipe to each corresponding key of the keyboard. In the bass there are two pipes, gradually increasing to three, four or five in the treble.

progression

1. Progression, melodic.

2. Progression, harmonic.

Progression means the manner in which the sounds of a composition advance. There are two kinds of progression:

1. When the sounds of a composition move along in a melody or tune, this movement is called melodic progression.

2. But when the sounds follow each other in chords formed according to the rules of harmony, the movement is called harmonic progression.

progression, retarded

See retarded progression.

Progressionsschweller (prō - grēs - sī-ōns'-shvēl'-lěr) Ger. n.

Literally, a swell of progress: an organ contrivance by means of which the stops are gradually opened and closed. This produces a gradual increase, then a diminution of tone.

progressive

This name is given to those mixture stops in organ building in which the number of ranks increases with the pitch. For example, when C on the bass staff is struck on the keyboard, this stop sounds two pipes; an octave higher, it sounds three pipes; and so on, till the number of pipes reaches

five or more. By producing so many tones at once to a key, brilliancy is added.

prolatio major (prō lā'-shī-ō mā'-jör) Lat.

Prolation is the division of the semibreve, or whole note, into minims or half notes. Major prolation was the division of the semibreve into two minims. It was indicated by a dot in the time signature.

prolatio minor (prō-lä'-shī-ō mī'-nör) Lat.

Prolation is the division of the semibreve, or whole note, into minims, half notes. Minor prolation required the division of a semibreve into three minims. The absence of the dot in the time signature, marked minor prolation. See also prolation.

prolation

In the original plain chant, the notes were of equal duration. In the Twelfth Century the old square notes were given a measurable value, and later were called maxima, longa, brevis, semibrevis, minima and semiminima. To express rhythm three terms were used, mode or modus, time value or tempus, and prolation, which is the relation of semibreves or minims. Prolation was either major or minor. Major was indicated by a dot placed after the time signature. In the major, one semibreve was equal to two minims.

prolation, note of

A note that is extended beyond its original and nominal duration, by the addition of a dot or hold.

prolazione (prō-lä-tsě-ō'-ně) It.

A quartet; a composition in four parts.

quadriglio (kwä-drĕl'-yō) It. n.

See quadrille.

quadrille

A square dance for four couples and sometimes more than four. It is a composite sort of a dance which came into vogue in the middle of the Eighteenth Century. It originated in France, where it soon grew to be a popular feature of the French ballets, and was originally danced by four, six, eight, or twelve dancers, who dressed alike and danced the dance in little companies. The dance varied greatly at first, depending upon the originality of the dancing-master for frequent innovations. But it settled into its present form about the beginning of the Nineteenth Century and has undergone but little change since.

It consists of five distinct figures, each figure based upon or borrowed from a popular dance. The first called in France, *Le Pantalon*, took its name from a popular Eighteenth Century dance, danced to a tune beginning with the words, *Le Pantalon*. The second figure is *L' Ete*, and is a very intricate and graceful dance of that period. *La Poule*, the third figure, goes back to this same date. The *Pastourelle* is a survival of the old three distinct parts repeated. Sometimes the *Trenise* is combined with the fourth figure or is substituted.

When first danced the steps were so intricate and so varied, and the time so lively, that the history of the quadrille like that of the galop tells a tale of degeneration. Later, however, the steps were simplified and the time

quantity

made slower and its popularity spread through Europe and America.

The music for the quadrille is scarcely ever original. As a rule, favorite tunes, and even selections from operas, and more dignified compositions were used to furnish the music. Some quadrille music has been written but not much of it.

The couples, four in number, arrange themselves in the form of a hollow square facing the center. The dancing-master or the leader of the orchestra, then calls off the various figures, and these are danced first by couples north and south, and then by those east and west, and thus the four couples alternate through all the figures. Sometimes all four couples dance at the same time and wind in and out in chains.

Because of the slow movement, the dance has long been a great favorite with old as well as young. Old people dance a quadrille long after their waltzing days are over. The dance is declining in popularity, but is still a frequent number on many a dance program. The music alternates in three-four, six-eight and two-four time.

ranz des vaches

but some derive it from *reihen*, to fetch, or *ranner*, to rejoice. The airs heard in the Swiss Alps, sung by the herdsmen or played upon the pipe or Alpine horn to call the cattle to and from their feeding-ground. These melodies vary in form in the different cantons, but in general are characterized by broken chords frequently repeated. F. sharp also appears often, but on account of the peculiarity of the instruments it is always sounded between F and F sharp, as it is the harmonic tone between E and G.

The *ranz des vaches* are dearly loved by the Swiss, so much so that soldiers are said to have deserted and gone home on hearing these national melodies. They are sometimes called *Yodlen* from the constantly recurring call, *odl-di-o-u*, which forms the burden of the song. Equivalent to *Kuhreigen* (Ger.).

Räthselkanon (rät'-zěl-kä-nōn) Ger. n.

Riddle or enigmatical canon: an old form of canon in which but a part of the score was written in full. Enigmatical prescriptions were given and from these the performer was obliged to guess at the intent of the composer.

ratio (rä'-shī-ō) Lat. n.

The mathematical definition of ratio is proportion, or relation between two numbers of the same kind, especially that in which the division of one by the other is indicated. In music, the term is applied to the relation between the respective numbers of vibrations per second of different tones; from this relation is determined the exact measurement of intervals. For instance, the ratio of the vibration number of A on the treble staff to that of the C just above, according to the standard known as international pitch, is 435:522, or in lower terms, 5:6. The ratio of the same A to the A an octave above would be 435:870, or 1:2. That is, the tone represented by A on the treble staff consists of four hundred and thirty-five vibrations per second, while C on the treble staff consists of five hundred and twenty-two, five vibrations of A taking place during six of C.

rattendo (rät-tě-něn'-dō) It. part.

Retaining; holding or keeping back the time; retarding; becoming slower.

rattenuato (rät-tě-noo'-tō) It. adj.

Detained; kept back; retarded. Another spelling of *ritenuato*.

Hoarseness.

rauco (rä'-oo-kō) It. adj.

rauh (rôw) Ger. adj.

rauque (rōk) Fr. adj.

Rough; harsh; hoarse.

Rausch

Rausch (rôwsh) Ger. n.

Roaring, rustling: said of mixture stops on the organ which sound some of the upper partials of a tone, and when drawn with a single stop have the effect of strengthening and making full the sound produced.

Rauscher (rôw'-shër) Ger. n.

Literally, rustler. A passage in which every note or every second note is repeated rapidly several times. Synonym of schwärmer.

Rauschflöte (rôwsh'-flā-tě) Ger. n.

Rauschpfeife (rôwsh'-pfī-fě) Ger. n.

Rauschquint (rôwsh'-kvēnt) Ger. n.

Rauschwerk (rôwsh'-vërk) Ger. n.

A fancy name, meaning rushing flute, applied to an organ stop composed of two ranks of pipes, that is, two pipes to each key of the keyboard. The pipes have various pitches. One rank may be tuned either the interval of a fifth, the interval of a twelfth or the interval of a fifteenth, two octaves above the corresponding keys of the keyboard, and the other rank may be tuned either the interval of an eighth, the interval of a fifteenth or the interval of a nineteenth above the corresponding keys of the keyboard. This stop, which was at one time very popular among German organ builders, does not appear in modern organs.

ravanastron

Originally an ancient Hindoo instrument, thought to have been invented in the reign of Ravana of Ceylon about 5000 B. C., perhaps by the king himself. The sounding-box resembles the bowl of a pipe and the long neck into which two pegs are inserted, the stem. There are two gut strings raised from the sounding-box by a bridge and fastened to the pegs, and it is played with a bow of hair and bamboo, which is permanently attached to the instrument, the hair being passed between the strings before it is fastened to the arched bamboo. The violin probably evolved from this primitive instrument, upon which the omerti, kemangli-a-gouz and afterward the rebec were modeled. The ravanastron is still used among the Chinese and other Buddhist peoples.

ravivando (rä-vi-vän'-dō) It. part.

rebab

rebab (rē'-bāb) Arab. n.

1. The Egyptian and Asiatic name for the rebec.

2. The name given a modern Persian instrument of the same general character as the older rebec, but having three strings.

rebec (rē-bĕk) Old Eng. n.

rebecca (rē-bĕk'-ä) Old Eng. n.

The earliest known form of bowed instrument. It is mentioned historically as appearing in Europe in the Eighth Century, and doubtless was brought into Spain by the Saracens. The instrument had a pear-shaped body terminating in a slender neck. The body was hollow in its lower part, but was furnished with sound holes and a sound post. The strings generally numbered three, but sometimes there were only one or two. The viol was a later development of the rebec and although the latter remained popular for years among the people, the viol largely displaced it among musicians. Synonym of rebed, rebet, rebibe, rebible.

Sought after, in great request; rare; choice; affected; formal.

recht (rĕkht) Ger. adj.

rechte (rĕkh'-tĕ) Ger. adj.

Right. Abbr. r.

rĕcit (rā-sĕ') Fr. n.

Recitation: a vocal or instrumental solo; the leading part, where there is more than one. In organ, *clavier de rĕcit* is the swell manual. Abbr. R.

recital

A performance entirely by one soloist, or when more take part, of the works of one composer; of selections from a certain work, such as an opera recital; or of pieces for only one instrument, such as the recitals given by teachers to introduce their pupils. Liszt's performances in London in 1840 are said to be the first designated by this name.

recitando (rā-chĕ-tān-dō) It. part.

Reciting, performing more as if talking than singing; declaiming in the style of a recitative.

rĕcitant (rā-sĕ-tāñ) Fr. n., mas.

A soloist. Equivalent to *recitante* (It.).

recitante (rā-chĕ-tān-tĕ) It. adj. and n.

1. (adj.) Reciting; declamatory.

2. (n.) One who recites, a soloist, an opera singer. As a noun equivalent to *rĕcitant*.

recitatif (rā-sĕ-tā-tĕf') Fr. n.

Recitativ (rā-sĕ-tā-tĕf') Ger. n.

Recitative: *recitatif accompagnĕ*, accompanied recitative; *recitatif obligĕ*, necessary recitative, same as *recitativo obbligato* (It.); *recitatif mesurĕ*, recitative in time, not free of time restrictions as usual. Equivalent to *recitativo a tempo* (It.).

recitative (rĕs-ĭ-tā-tĕv') Fr. n.

Song which is declaimed; not melody. It is accompanied only by occasional chords which enable the singer to keep on the key. Recitative dates from about 1600, and marks the attempt to establish dramatic song.

recitative, accompanied

A recitative with a more elaborate accompaniment than the few chords in the bass which were originally used. Alessandro is credited with the invention of this kind of recitative which has grown in importance with the growth of the orchestra. The later operatic composers make great use of rich orchestral accompaniments essential to the plot in describing characters and emotions. The accompanied

rectus

rectus (rĕk'-tŭs) Lat. adj.

Right, straight, forward. *Rectus motus*, similar motion, that is, the progression of two or more parts up or down simultaneously.

recueil d'hymnes (rŭ-kŭ-ĕ d'ĕm) Fr.

Collection of hymns; a hymn book.

red-note

In the Fourteenth Century notation a note was colored red to signify a change of time. If it appeared among notes denoting perfect time (time in which the *longa*, was valued at three) it marked a change to imperfect time (time in which the *longa* was valued at two) and vice versa. See also color and notation.

reddita (räd-dĕ'-tä) It. n.

redite (rŭ-dĕt) Fr. n.

A return to the subject; repetition of a strain or melody; a repeat. Equivalent to *replica* and *replicato*.

redondilla (rā-dŏn-dĕl'-yā) Spa. n.

Roundel, roundelay: a stanza of four lines, each containing eight syllables.

redoubled

A term applied to intervals of more than an octave; an interval to which an octave is added making it a compound interval; thus, a tenth is a redoubled third.

redoublement (rŭ-doob-lŭ-māñ) Fr. n.

Redoubling, increase; doubling of a note, or part, that is, reiteration in a higher or lower octave, or by another instrument than that which originally sounded the note. Equivalent to *radoppiamento*.

redowa

A dance originating in Bohemia where there are two forms, the *rejodvák* and the *rej dovacka*. The former is written in three-four or three-eight time and resembles the waltz; the latter is written in two-four time and resembles the polka. Under the name of the *redowa* it became fashionable in Paris, London and New York about the middle of the Nineteenth Century. The *redowa* was written in three-four time; it was much like the *mazurka*, only the accents were far less prominent.

reduplicante (rā-doob-lĭ-kān'-tĕ) It. adj.

Reduplicating; redoubling; doubling of notes or parts.

reduplicato (rā-doob-lĭ-kā'-tō) It. adj.

Reduplicated; redoubled; doubled.

reed

reduciren (rā-doo-tsĕ'-rĕn) Ger. v.

To reduce, diminish: to rearrange a composition in smaller form, as to arrange a work, written for full orchestra, for a smaller orchestra, piano or organ. Synonym of *reduzieren* and equivalent to *reduire*.

reductio (rĕ-dŭk'-shĭ-ō) Lat. n.

Reduction of a score to smaller form. Also the bringing back or restoration of an augmented interval to its natural value.

reduction Eng. n.

reduction (rā-dŭks-yŏn) Fr. n.

The rearrangement of a piece into smaller form.

rĕduire (rā-dwĕr) Fr. v.

Equivalent to *reduciren* (Ger.). See also *reduciren*.

Reduktion (rā-dook-tsĭ-ŏn') Ger. n.

Reduction. See also *reduction*.

redundant chord

A chord containing a major third, four half tones, and an augmented fifth, eight half tones. An augmented chord.

redundant fourth

An interval a half step wider than the natural, perfect, fourth, containing three instead of two and a half tones, for example, C and F sharp. Equivalent to augmented fourth.

redundant intervals

Augmented intervals; intervals containing a half step more than they naturally have.

reed

A technical name which refers to a small thin strip of metal, cane or wood which is so adjusted before an aperture as to nearly close it. The strip is fixed at one end and caused to vibrate by the passage of a current of air through the aperture. The vibration is either immediately communicated to the outer atmosphere, where it forms sound waves, or to a column of air within a pipe. There are three classes: (a) Free reeds, which are so adjusted that they vibrate within the aperture without striking any other substance. They communicate their vibrations to air immediately and do not need to be fitted into a pipe as do the other varieties of reeds. They are found in the reed organ. (b) Single beating reeds, which are fitted within the aperture so that they strike against the edges, as in the clarinet. (c) Double beating reeds, which are fitted within the aperture so that they strike

reed

against each other, as in the oboe, English horn and bassoon.

reed, free

See free reed.

reed fifth

An organ stop composed of pipes which are pitched the interval of a fifth higher than the ordinary pitch of the corresponding key on the keyboard. The pipes are fitted at the top with a stopper, through which is passed a tube or reed, hence the term reed fifth. The reed causes the tone to be rather shrill.

reed instruments

All instruments in which the sound is produced by the vibrations of a reed of any description. Specifically applied to the instruments of the clarinet and oboe family used in the orchestra.

reed nasat

An organ stop composed of pipes covered at the top and having a pitch a twelfth higher than the ordinary pitch of the corresponding key on the keyboard. The term reed is derived from the tube or reed that pierces the stopper and adds a piercing quality to the tone, that is, somewhat reedy or nasal.

reed organ

A keyboard instrument fitted with free reeds. It is furnished with a case resembling that of a piano. Treadles serve in creating a vacuum in a reservoir under the reeds and as the keys are depressed currents of air are caused to rush down past the reeds making them sound. Several rows of reeds serve in producing tones of various qualities in imitation of certain orchestral instruments and the performer can control them through draw knobs situated at the sides of the keyboard. The reed organ is used as a substitute for the pipe organ in small churches and as a parlor instrument. The harmonium and the melodeon were predecessors.

reed pipe

The name given to those pipes of the organ that are fitted with reeds which vibrate in the production of the tone.

reed stop

The name given to any group of pipes in the organ which are fitted with reeds for the production of the sound.

reed, striking

Any thin strip of wood or metal

regal

which, in vibrating, strikes against some other substance, thus producing the sound. Striking reeds are single or double. When single, the reed is fitted into an aperture slightly smaller than itself. A current of air is directed against it and in attempting to pass forces the reed against the sides of the aperture. If double, the two reeds are caused to beat against each other. More commonly known as beating reed.

reed work

The name given to any group of pipes in the organ which are fitted with reeds for the production of sound.

reel

The name of an old dance comprising eight measures in four-four or six-four time. The Anglo-Saxons called it the hreol, reol, rhay or hay, and as it is similar to the Scandinavian Halluing, it has been thought by some to have originated there. That it is more lively than the Scandinavian dances, however, seems to point to a Celtic origin. The form varies in England, Ireland and Scotland. In the last named country it was usually danced by two couples, but the figures were different in each clan. The Irish reel was much faster than the Scotch. In England it was usually danced by three couples, but it is now scarcely ever used except with the sword dance in North Riding of Yorkshire, where it is danced to an ordinary hornpipe tune. Although different figures are used in different localities, a common characteristic is their circular character. The dancers stand facing one another, and wind back and forth, describing repeatedly the figure eight.

refléchir (rā-flā-shēr) Fr. v.

To reflect; throw back; reverberate.

refrain

1. The burden or chorus of a song, repeated at the end of each verse; the chorus.

2. The musical phrase to which the chorus is set.

regal

An ancient portable organ consisting of a case containing one or two rows of pipes furnished with beating reeds. On one side of the case were a pair of bellows operated by the left hand, and on the opposite was a keyboard or row of touches connecting with the pipes and played upon with the right hand.

règales de bois**règales de bois** (rā-gäl dü bwä) Fr.

Literally, organs of wood: an obsolete French name for xylophone, an instrument consisting of strips of wood, tuned to the tones of the scale and lying on two straw cords. It is played by striking with a stick, the end of which is spherical.

Regel der Oktave (rā'-gěl dër ôk-tä'-fě) Ger.

Rule of the octave. See also règle de l'octave and quadreble syghte.

regens chori (rē-jěns kō'-rī) Lat.

The leading person in the choir; the choir master. This term is used in Germany.

regina coeli (rē-jī-nā sē'-li) Lat.

Queen of Heaven: a hymn to the Virgin Mary, sung at vespers from Holy Saturday till Trinity eve.

register Eng. n.**Register** (rā-jēs'-těr) Ger. n.

1. See stop.

2. A frame through which the trackers run in an organ, guiding them and preventing them from rubbing against each other or some other substance.

3. A distinct section of the compass of a voice or instrument.

Register stimmen (rā-jēs'-těr shtīm'-měn) Ger. n.

Speaking stops of an organ: those which produce tones, in contradistinction to the couplers and other mechanical stops.

Registerknopf (rā-jēs'-těr-knôpf) Ger. n.

Knob of a draw stop on the organ.

Registerstange (rā-jēs'-těr-shtäng'-ě) Ger. n.

Draw stop rod or lever of an organ; the rod connecting the knob of the draw stop with the sliders or strips of wood, one of which covers the openings of the pipes in each stop or row. The slider is perforated, but when pushed in the perforations do not coincide with the openings of the pipe and only correspond when the slider has been pulled out by means of the draw stop knob.

Registerzug (rā-jēs'-těr-tsookh') Ger. n.

The mechanism of the draw stop of an organ which shifts the sliders, caps, from the top of the pipes, allowing the air to enter.

registration

The art of using the registers of the organ, that is, of combining the

regulation

stops so as to produce the best effect. As much skill is needed in artistic registration as in orchestration. The combination of stops used in playing a certain piece is called the registration of the piece. Also registëring.

registre (rŭ-zhĕst'-r) Fr. n.

The register of a voice or instrument; the stop of an organ. Equivalent to registro.

registrieren (rā-gĕs-trĕ'-rĕn) Ger. v.

To register, that is, to manage the stops of an organ.

règle (rĕgl) Fr. n.

Rule; precept; law. Equivalent to regola (It.).

règle de l'octave (rĕgl dü l'ôk-täv) Fr.

Rule of the octave: the rule for harmonizing each note of the scale. A term found in treatises on harmony. A synonym of Regel der Oktave. Equivalent to quadreble syghte. See also quadreble syghte.

regula (rĕg'-ŭ-lä) Lat. n.

1. Rule; precept; as regula harmonica, rule of harmony, in which sense it is equivalent to canon.

2. Also register, hence, the stops of an organ were called regulæ.

regular fugue

A strict fugue; a fugue in which the laws are obeyed to the letter, as opposed to a free fugue, where exceptions can be made. See also fugue.

regular motion

Similar motion, the progression of parts in the same direction, ascending or descending simultaneously.

regulation

The loosening or tightening of the keys of keyboard instruments, technically known as the adjustment of the touch. In the piano this is done by means of a projection that governs the return to its place of rest of the hopper, which carries the force of the pressure of the finger on the key lever to the hammer. If this projection or button be screwed too high it will not allow the hopper to return in time to get out of the way of the hammer, as the latter itself returns. If it be screwed too low, the hopper is allowed to fall too soon and much of the force of the pressure on the key is lost before it reaches the hammer. In the organ the touch is regulated by means of pieces of leather screwed on to wires projecting from the trackers, or small strips of wood, exerting a pulling motion between the key lever and

remote

remote

A term applied to chords, keys, or modes which have very few tones in common. Opposite of related.

remote keys

Keys whose relationship is very distant; having signatures differing greatly in the number of chromatic signs, such as G, the key of one sharp, and F sharp, the key of six sharps; or, F, key of one flat and G flat, the key of six flats. It will be noticed that in position on the keyboard, these remote keys may be very close; the distance consisting in the difficulty encountered in modulating or changing from one to the other through intermediate keys. See also key.

remotus (rē-mō'-tūs) Lat. adj.

Distant; remote; separate. Harmonia remota, open harmony, a chord in which the notes are far apart.

remplissage (rāñ-plis-sāzh) Fr. n.

Literally, filling; trash: the filling up of a middle or inner parts of a composition, a term frequently used when the filled-in parts are unnecessary and perhaps invisibly added for the sake of sonority. Sometimes used contemptuously; as referring to the work of a novice who has failed to give all of the individual parts of a composition special value, but has merely added parts between the bass and soprano as a sort of padding.

rendering

The execution of a composition.

rentrée (rāñ-trä) Fr. n.

Re-entrance, reappearance, return of a theme or part. Same as the first meaning of reprise.

renverdie (rāñ-vēr-dē) Fr. n.

Song celebrating the return of verdure; spring songs.

renversé-ée (rāñ-vēr-sā) Fr. adj.

Inverted.

renversement (rāñ-vērs-māñ) Fr. n.

Inversion.

renverser (rāñ-vēr-sä) Fr. v.

To reverse; turn upside down; invert.

renvoi (rāñ-vwä) Fr. n.

Returning; return; a sign indicating a return to and repetition from a similar sign.

reól (rā-ól) A. S. n.

Synonym of hreól. See also reel.

repeat

A sign signifying a repetition. The dotted bar, the commonest form of repeat, is usu-

repeating

ally used at the beginning and end of a movement, or several bars of a movement, that are to be repeated; the dots on the right hand side of the bar indicating where the repetition is to begin, on the left, the end of the repeat. Where dots are used on both sides of the bar, it signifies that the preceding and following measures, both, are to be repeated. Attention is sometimes called to the repeat by heavy lines, or a segno. When only a few measures are to be repeated, they are sometimes marked bis. Repetitions of one measure or of parts of a measure were formerly indicated as follows:

and are sometimes still so marked in manuscript.

repeat 8 va

Repeat an octave higher.

repeating

An organ stop composed of two or more pipes to each key of the keyboard, but in which the pipes are not pitched to produce the tones of the scale in regular succession. On the other hand, those pipes connected with the upper half of the keyboard, sound an octave lower, relatively, than those connected with the lower half of the keyboard. This so-called break in the pitch is arranged where it will be least felt. In other organ stops that lack pipes to correspond with all the keys of the higher part of the keyboard, the keys of that part are connected with the pipes having a pitch an octave lower. Hence, when the keys of that section of the keyboard are depressed, a return to the lower octave is experienced.

repercotimento

repercotimento (rā-pěr-kō-tī-měn'-tō)

It. n.

The rapid reiteration of a tone or chord, producing almost the same effect as a sustained tone.

repercussa (rē-pūr-kūs'-sä) Lat. n.

The name given to the principal note of each of the Gregorian modes. In the authentic modes it was the first note of the octave, and in the plagal it was the fifth.

repercussio (rē-pūr-kūs-shī'-ō) Lat. n.

1. The repetition of a chord or note.
2. The re-entry of subject after an intervening passage. See also *repercussion*.

repercussion

1. The frequent reiteration in a composition of a tone or chord.

2. The name of the dominant or fifth note of the scale in Gregorian music, because it was repeated more than any other in a composition.

3. The regular reappearance, in a composition in which a theme is introduced by one part and is imitated by the other parts in succession, of the subject and answer after the introduction of other incidental digressions not founded upon the principal theme.

répertoire (rā-pěr-twär') Fr. n.

Repertory: the list of works at one's command for performance; the pieces that have been mastered, and can be given extemporaneously or after a little practise.

répertoire d'un opera (rā-pěr-twär' d'ün ō-pā-rä)

A collection of pieces from an opera.

rēpēter (rā-pā-tä) Fr. v.

To repeat.

repetieren (rā-pā-tē'-rěn) Ger. v.

To repeat, or break, as it is called, when speaking of compound organ stops which sound a number of overtones of the key struck, where, because the pipes can not be made indefinitely smaller, a break is made between the registers, and the pitch returns to the lower octave. See also *repetierende Stimme*.

repetimento (rā-pā-tī-měn'-tō) It. n.

Repetition; repeat; rehearsal.

repetierende Stimme (rā-pā-tē-rěn'-dē shtīm'-mě) Ger.

Repeating stops: compound or mixture stops which do not produce the same overtones (intervals above) the note struck in all parts of the key-

replicato

board, but with the higher notes give overtones an octave lower than with the lower notes. For example, a mixture stop of this kind may sound the fifteenth, nineteenth and twenty-second tone above the note struck in the lower part of the keyboard, but the eighth, twelfth and fifteenth when the note played is in the higher portion of the keyboard.

rēpētiteur (rā-pā-tē-tūr') Fr. n.

Repeater; rehearser; trainer of an opera chorus; private teacher; tutor; critic.

repetition

The rapid reiteration of a note, producing nearly the effect of a crescendo on a sustained tone. The old harpers practised it and it was used in playing the dulcimer and guitar. Erard's double échapement or repetition action made it easy on the piano, but his invention has been applied usually to grand pianos only. In this kind of action the hammer falls back from the string immediately after the key is depressed and allows the string to be struck again before the key has returned to its natural position. Though of great advantage such an action is liable to get out of order because of the complex mechanism, and the reiterated notes are not of very good tone because the key not being depressed so far, the sound produced is weaker. Equivalent to *repetimento* (It.), *repetizione* (It.), *Repetition* (Ger.) and *répétition* (Fr.).

repetitore (rēp-ē-tā-tō'-rē) It. n.

Repeater; rehearser. Equivalent to *répétituer* (Fr.).

repetizione (rā-pā-tē-tsī-ō'-ně) It. n.

Repetition; repeat; rehearsal.

repicar (rā-pī-kär') Spa. v.

To chime; ring a merry peal.

repique (rā-pē'-kā) Spa. n.

Chime; a peal of bells on a festive occasion.

replica (rā'-plē-kä) It. n.

Reply; answer; repetition; the repeat sign; *repercussio*, the answer in a fugue or composition in which the subject is introduced by one part and is answered by the other parts in succession.

replicate (rēp'-lī-kät) Fr. n.

The octave of any given note.

replicato (rā-plē-kä'-tō) It. adj.

Repeated; doubled, by having an octave added or the same note sounded in another part, or by another instrument.

Replik**Replik** (rā-plēk') Ger. n.

1. An octave or an interval consisting of five whole tones and two half tones.

2. An answer in a fugue.

3. Small notes inserted in a part for the guidance of the performer.

4. A cue.

5. A complementary interval; that is, an interval which, added to any given interval less than an octave, completes the octave.

réplique (rā-plēk) Fr. n.

1. A complementary interval; one which, with a given interval less than an octave, for example a seventh, is the réplique of a second, a sixth, of a third, and so on.

2. A cue.

3. The reply or answer in a fugue, more commonly called response.

4. The octave of a given tone, a replicate, seldom used. See also Replik.

reply

The answer in a fugue.

répondre (rā-pōñdr) Fr. v.

To respond; answer.

réponse (rā-pōñs) Fr.

Answer, reply, in canon or fugue.

report

Answer.

repos (rū-pō) Fr. n.

Repose; rest; pause, after the cadence at the end of a phrase.

reprendre (rū-prāñdr) Fr. v.

To take up again; begin again; resume.

reprise (rū-prēz) Fr. n.

1. Repetition of a strain or melody; the burden of a song.

2. Return to a previous part, especially the resumption of the principal theme after the development or episode, in a work in sonata form. Synonym of *rentrée*.3. The revival of a work. Equivalent to *ripresa* (It.). See also *break*.**requiebro** (rā-kē-ā'-brō) Spa. n.

A shake or trill of the voice.

requiem

Literal meaning, rest: the first word of the mass for the dead, and therefore lends itself as a name to the musical setting of that mass.

requintar (rā-kīn-tār') Spa. v.

To raise or lower the tone.

research

An old term for an extemporaneous prelude, employing the principal themes of the piece to which it seeks

resonance boxto draw the attention of the listeners. Equivalents, *recherche* (Fr.) and *ricercare* (It.).**reservoir**

That part of the bellows of an organ, harmonium or similar instrument in which the air is stored in readiness to enter the pipes. Beneath the reservoir are two small bellows called feeders, that expand and close alternately in filling the reservoir with wind.

resin

Resin used to make the hair of a bow rough, so that it can grasp the strings of an instrument and set them into motion. The resin used for the bows of violins, violas and cellos is very much refined, but ordinary resin combined with white pitch is used by double bass players.

resolutamente (rē-sō-loo-tä-měn'-tē)

It. adv.

Resolutely; firmly; boldly.

resolutio (rēz-ō-lū'-shī-ō) Lat. n.**resolution** Eng. n.**resolution** (rā-zō-lus-yôn) Fr. n.**risoluzione** (rā-zō-loo-tsī-ō'-nē) It. n.The movement of a dissonant chord or a chord unsatisfactory to the ear into one that is consonant or satisfactory. The progression from the dissonant or unrestful chord to consonant or restful chord is resolution. Equivalent to *salvation*.**resolved canon**A canon, all parts of which are written out. Opposite of *riddle canon*.**resonance**

The effect of the disturbances of a vibrating body sympathetic to the vibrations of some other body. The sympathetic vibrations will be duplicates of the first vibration. Thus, if a certain tone is sounded on a violin a tuning fork, which is very elastic and susceptible to vibrations, will sound the same tone. In instrument making this property is employed in reinforcing tones. Thus, the sound produced by the strings of the piano are reinforced by the sympathetic vibrations of the sounding-board and the resonance of the instrument is increased.

resonance-board

Sounding-board.

resonance box

The hollow box-like part of an instrument, such as the body of a violin, which causes the tone produced to resound.

rest

Various signs are used for representing a rest continuing through a measure. If a measure contains the same or less time than a whole note the rest is represented by the whole rest. Sometimes the whole rest is used regardless of the time value of the measure, but usually in music containing more than a whole note to a measure the breve rest is used for a one-measure rest.

 indicates a three-measure rest.

 indicates a four-measure rest.

 indicates a six-measure rest.

Thus any number of measure rests may be denoted by various combinations of the whole and breve rest, but now a numeral is generally used to indicate the number of measures rested, especially if they exceed six.

Rests are occasionally lengthened by dots, e. g.,  instead of being written in full  **rest, large**

A rest used about the period from the Twelfth to the Fourteenth Century and equal in value to the note called a large, four times the value of the modern whole note. The perfect large rest is represented by two thick lines extending across three spaces of the staff; that of the imper-

fect large is two thick lines across two spaces.

rest, long

A rest used during the Twelfth to the Fourteenth Century and equal in value to the note called a long, which possessed twice the time value of a modern whole note.

rest, quarter

A rest equivalent in time value to a quarter note. 

rest, quaver

An eighth rest.

restez (rēs-tä) Fr. v.

Stay; stop; hold; indicating that the note over which it is placed should be slightly dwelt upon.

restrictio (rě-strīk'-shī-ō) Lat. n.

The passage in a fugue, usually at the end, where the subject and

retentir

answer followed each other so rapidly and closely that they overlap. Synonym of stretto.

resultant tones

The tones that result when two loud and sustained musical tones are sounded simultaneously. There are two kinds of resultant tones called the differential and the summational. The differential tone is so named because the number of its vibrations is equal to the difference between the number of vibrations of the two tones sounded together. Summational tones are equal to the sum of vibrations of the two tones.

resurrexit (rěz-ŭ-rěks'-it) Lat. v.

Literally, and rose again: a phrase from the Credo, the creed of the Roman Catholic mass. In the music of the mass these form the introductory words of the allegro or faster movement, which is strongly marked following the slower time of the Crucifixus. It is commonly written for solo voices and sometimes for bass voices only.

retard

To slacken the speed gradually. A retard almost invariably follows a crescendo which has worked up to a climax and prepares the way either for the final close of the composition or for the introduction of a new theme. In the latter case, the retard ends on the note immediately preceding the new strain. Also the delay in releasing a note of a chord, bringing it over into another chord to which it is foreign. In this sense a retard or retardation is a suspension resolving upward.

retardatio (rě-tär-dä'-shī-ō) Lat. n.**retardation** Eng. n.

A gradual slackening of speed. In harmony a suspension, the prolongation of one note of a chord into another chord in which it does not belong, thus causing a discord which is resolved upward, that is, changed into harmony, the discordant note being replaced by the next note above it which belongs to the chord. See also suspension.

retarded progression

The act of slackening or decreasing the time; the prolonging some tone of a previous chord into a succeeding one.

retentir (rŭ-tāñ-těr) Fr. v.

To resound; ring, re-echo.

retentissement

retentissement (rŭ-tāñ-tēs-māñ) Fr. n.
Resounding; re-echoing; reverberation; peal.

retenu (rŭ-tŭ-nŭ) Fr. adj.

Retained, held back; slackened in speed.

retinte (rā-tēn'-tä) Spa. n.

A tinkling sound.

retraite (rŭ-trēt') Fr. n.

Retreat, retiring, retirement: the tattoo, the signal in the army for the men to turn in, retire for the night.

retro (rē-trō or rēt-rō) Lat. adv.

Backward: applied to a canon or fugue in retrograde motion.

retrograde

Going backward: a canon or fugue is said to be in retrograde motion when the subject or main theme is used backward, note for note, in the answer, the second or imitating division of the fugue.

retrograde imitation

Imitation of the subject or theme of a composition backward.

retrograde imitation, reversed

Imitation, in which the subject or theme of a composition is given backward, note for note, in the answer and moving in the opposite direction from the subject, descending if the subject ascends, and vice versa.

retrograde inversion

Inversion backward: that is, beginning at the end of a composition and writing it backward. Same as retrograde imitation and equivalent to *inversio cancrizans* (Lat.).

retrogrado (rā-trō-grā-dō) It. adj.

Rhapsode (rāp-sōd) Grk. n.

From *raptos*, sewn, an ode, song: the name applied to fragments of epic poems, said or sung by the ancient Greek bards. In modern music it denotes a fragmentary composition. See also *rhapsody*.

Rhapsodie (rāp-sō-dē') Ger. n.

rhapsody Eng. n.

A composition of irregular form and ecstatic character made up of various airs woven together fancifully; a sort of medley expressive of wild joy, a piece resembling *capriccio* or *fantasia*. Rhapsodies are usually written in themes from folk-songs or natural music, but sometimes *fantasias* on some piece of art music, opera airs for instance, are so called.

rhay**rhay** (rä) A. S. n.

A name of the hay, or ancient form of reel. See also reel.

rhythm Eng. n.

rhythme (rēdhm) Fr. n.

Rhythm is the idea of measured motion which is in music. Any regular succession of tones contains a rhythm in that it possesses a complete motion peculiar to itself. In music, notes are sympathetically grouped in regard to duration. Rhythm represents the regular pulsation of music. There may be several rhythms in progress in a piece at the same time. In simple forms of music the rhythm is most prominent, but in advancing to more artistic music the various rhythms become less apparent, though forming everywhere a firm and continuous accental ground work.

Rhythm in music corresponds to meter in poetry. The word flow, which rhythm suggests, is useful in helping to distinguish it from mere time, with which it is often confused.

rhythmical accent

The special stress, apart from regular time accent, given to the themes, motives, phrases or sections of a piece, depending on the rhythm of the composition and giving character to the music. See also accent and rhythm.

rhythmical signatures

At the beginning of a piece, after the key signature, a sign is placed to denote the time or rhythm. It consists of two numerals placed one above the other, the upper indicates the number of beats to the measure and the lower the kind of note assigned to each beat. See also time.

rhythmical value signs

The signs of notation at present in use, evolved from those of measurable notation, are:

breve

semibreve

minim

crochet

ribible

quaver

semiquaver

demisemiquaver

semidemisemiquaver

Rhythmical value signs became necessary at the introduction of combined parts which might contain notes of different time value. The Greeks employed the following signs:

⤿ short single time

— two times

┌ three times

└ four times

└└ five times.

rhythmique (rēdh-mēk) Fr. adj.

rhythmisch (rēt'-mīsh) Ger adj.

Rhythmic; rhythmical.

Rhythmus (rēt'-moos) Ger. n.

Rhythm.

ri

rigabello (rē-gä-bĕl'-lō) It. n.**rigabellum** (rĭg-ä-bĕl'-lŭm) Lat. n.

See regal.

rigadoon

An old French dance thought to have been invented early in the Sixteenth Century by Rigaud, a dancing-master of Provence, from whom it took its name. It was so popular in England that some maintain it originated in that country and took its name from the old adjective rig, meaning romping, lively. It was a merry dance for two people, written in sextuple, six-eight, time, in three or four parts of unequal length, each of which was repeated. The jumping step peculiar to this dance outlived the rigadoon as a whole. Rigaudon (Fr.), rigodon (It.).

rigals

Another spelling of regals. Sometimes spelled rigoles.

rigore (rē-gō'-rĕ) It. n.

Repeating; repetition: the burden of a song; refrain.

ripienino (rĕ-pĕ-ā-nĕ'-ō) It. n.

Diminutive of ripieno, meaning little filling up: hence, an organ stop of high pitch used for adding volume to full effects. The lowest tone is only an octave below middle C.

ripienist

A player of the ripieno, an orchestral instrument which is played only in the full parts.

ripienista (rĕ-pĕ-ā-nĭs'-tä) It. n.

A player of the ripieno. Equivalent to ripienist.

ripieno (rĕ-pĕ-ā'-nō) It. adj. and n.

Literally, filling up, completing, supplementing.

1. A term applied to those instruments in a band or orchestra which play only in what are called the full parts. They are accompanying instruments and not essential to the composition, having as their only duty, to add force to the loud effects. They are used only occasionally, as opposed to the so-called solo instruments that are given the distinctive parts of the composition. The use of ripieno instruments was especially general in the orchestral concertos of the Seventeenth and Eighteenth Centuries, where they were only employed to fill in the harmonies, and to support the solo parts.

riposo

The term is used in orchestral scores to mark the entrance of all the strings, or in military music, the clarinets and oboes, being thus equivalent to tutti, meaning all. In its plural form, ripieni, it is used as the name of an instrument which only plays in the full parts, all the violins, violas, cellos, and double of an orchestra except the leading or solo ones being called ripieni.

2. The name given by some makers to an organ stop composed of several pipes to each key of the keyboard. The tone is brilliant and is used in adding volume to full effects. Abbr. **rip.**

ripieno di cinque (rĕ-pĕ-ā'-nō dĕ chĕn'-kwĕ) It.

A compound or mixture stop of five ranks or sets of pipes, having the full compass of the manual.

ripieno di due (rĕ-pĕ-ā'-nō dĕ doo'-ĕ) It.

A compound stop of two ranks having the full compass of the manual.

ripieno di quattro (rĕ-pĕ-ā'-nō dĕ kwät'-trō) It.

A compound stop of four ranks having the full compass of the manual.

ripieno di tre (rĕ-pĕ-ā'-nō dĕ tră) It.

A compound stop of three ranks, having the full compass of the manual.

Ripienstimme (rĕ-pĭ-ān'-shtĭm'-mĕ) Ger. n.

In an orchestra, any instrument that is used only occasionally and is not essential. Its only value is in adding volume when all the performers take part in loud effects.

ripieur de cinque (rĕ-pĕ-ūr dŭ sänk) Fr.

Equivalent to ripieno di cinque (It.). See also ripieno di cinque.

ripiigliando (rĕ-pĕl-yän'-dō) It. part.

Retaking; resuming.

ripiigliare (rĕ-pĕl-yä'-rĕ) It. v.

To take up again; resume.

ripiglio (rĕ-pĕl'-yō) It. n.

The return of the theme or subject of a piece, as the burden of a song. Equivalent to ripetizione, reprise and ripresa.

riposatamente (rĕ-pō-sä-tä-mĕn'-tĕ) It. adj.

Reposefully; calmly.

riposato (rĕ-pō-sä'-tō) It. adj.

Reposeful; calm; self-possessed.

riposo (rĕ-pō'-sō) It. n.

Rest; repose.

riprendendo

riprendendo (rē - prĕn - dĕn' - dō) It. part.

Taking up again; beginning over; resuming.

riprendere (rē-prĕn'-dĕ-rĕ) It. v.

To take up again; to begin over, resume. Equivalent to *reprendre* (Fr.).

ripresa (rē-prä'-sä) It. n.

Renewal; the repetition of a previous strain; also the repeat sign. Equivalent to *renvoi* and *reprise* (Fr.) and *replica* (It.).

rise

Same as the plain beat: an obsolete English harpsichord grace. It was written two half notes with a dash between them, and played thus: the first note was given its full value, and repeated as an eighth note before the second half note, which, when struck, received only the remaining time, that is, the value of three eighth notes, to complete its full time.

risentitamente (rē-sĕn-tĕ-tä-mĕn'-tĕ)

It. adv.

Resentfully.

risentito (rē-sĕn-tĕ'-tō) It. adj.

Vigorous; resentful; sharp; distinct; poignant; energetic.

Very resolute; firm.

risoluto (rē-sō-loo-tō) It. adj.

Resolved; resolute; determined; firm.

risoluzione (rē-sō-loo-tsĭ-ō'-nĕ) It. n.

Resolution; solution; decision; determination.

risonante (rē-sō-nän'-tĕ) It. adj.

Resonant; resounding; ringing; sonorous.

risonanza (rē-sō-nän'-tsä) It. n.

Resonance. The synonym of *risuonanza*.

risonare (rē-sō-nä'-rĕ) It. v.

To sound, resound, re-echo; ring, boom.

risposta (rĕs-pōs-tä) It. n.

Answer or consequent; the reply to a subject, *proposta*, of a fugue or canon; the imitation of a preceding musical phrase or sentence, theme, subject or antecedent. Equivalent to *repose* (Fr.).

Riss (rĭs) Ger. n.

Crack; gap; break.

Riss in der Stimme (rĭs' ĩn dār shtĭm'-mĕ) Ger

The break in the voice caused by

ritenente

the failure to pass smoothly from one register to another, as from the chest to the head tones. A bass voice is supposed to have no such break.

It also applied to organ stops that sound the higher octaves. This is possible for the lower part of the organ keyboard, but the higher notes forbid the same tones sounding with it that sounded with the lower notes. So that if C''''', the highest note on the organ were played no higher notes would be sounded with it.

For such stops larger pipes are substituted and by this arrangement the pitch at a certain point breaks and returns to the octave below. See also *repetierende Stimme*.

ristretto (rē-strĕt'-tō) It. adj. and n.

Restricted, compressed: the restriction or contraction of the subject and answer into a small space, at the end of a fugue, where they follow each other so rapidly that they overlap, making a compact, *stretto* passage.

risuonanza (rē-soo-ō-nän'-tsä) It. n.

Resonance. Synonym of *risonanza*.

risvegliare (rĕs-väl-yä-rĕ) It. v.

To rouse up; awaken; reanimate.

risvegliato (rĕs-väl-yä'-tō) It. adj.

Awakened; roused; reanimated; lively; excited.

ritardando (rē-tär-dän'-dō) It. part.

Retarding; delaying; lingering: gradually growing slower in speed. Synonym of *rallentando*. Abbr. *ritar.*, *ritard.*

ritardare (rē-tär-dä'-rĕ) It. v.

To retard: grow slower in time. Synonym of *rallentare*.

ritardato (rē-tär-dä'-tō) It. adj.

Retarded; delayed: gradually slackened in speed. Synonym of *rallentato*.

ritardazione (rē-tär-däts-ĭ-ō'-nĕ) It. n.

Retardation: slackening the time.

ritardo (rē-tär'-dō) It. n.

Delay: a gradual slackening of speed, a retard. In harmony a suspension, same as one meaning of retardation. Synonym of *rallentamente*.

ritardo un pochettino (rē-tär'-dō oon pō-kĕt-tĕ'-nō) It.

A very slight retard.

ritenendo (rē-tä-nĕn'-dō) It. part.

Retaining; detaining; holding back: in a strict sense, making the time immediately slower, but it is very often used as a synonym or *rallentando* and *ritardando*.

ritenente (rē-tä-nĕn'-tĕ) It. adj.

Retaining; holding back; retarding.

Roger de Coverley

goes below the second woman, then around below the second man, returning to his own place; the first woman then goes below the second man, circles around him and passes below the second woman, returning to her own place. The first couple then cross over below the second couple, join hands and turn twice and slip through, taking the second couple's place. On account of the last named part of the figure the dance is frequently called the slip. The second number of the *Spectator*, 1711, introduces the immortal Sir Roger de Coverley, saying, "His great-grandfather was the inventor of the famous country dance which is called after him," showing where they found the name for their now celebrated knight. It was not until after this time that the title Sir was used in the name of the dance.

Rohr (rōr) Ger. n.

Cane; pipe; reed: usually used for the double reed in an oboe or bassoon.

Rohrblatt (rōr'-blät) Ger. n.

Reed: the reed of a wind instrument, such as the clarinet, oboe or bassoon. The reed of the latter two instruments is usually called *doppeltes Rohrblatt*, double reed, of the former, *blatt* or *einfaches Rohrblatt*, single reed.

Rohrflöte (rōr'-flā'-tē) Ger. n.

Literally, reed-flute: an organ stop composed of partly stopped flue-pipes. The name is derived from the reed or tube passing through the cover of the pipes in the upper half of the rank and adding a peculiarly clear quality to the tone, which, however, bears no resemblance to that of the reed stops. The stop may be tuned at various pitches, having for the lowest tone either the first, second or third octave below middle C.

Rohrquinte (rōr'-kwīn'-tē) Ger. n.

A *Rohrflöte* organ stop composed of pipes sounding a fifth above the key struck.

Rohrschelle (rōr'-shēl'-lē) Ger. n.

Literally, reed bell: an organ stop belonging to the *Rohrflöte* class, consisting of flue-pipes covered at the top and having a high pitch, being capable of producing no tone lower than middle C. The covers of the pipes are pierced with a small hole, thus rendering the tone more piercing. This, with the high pitch, gives the tone a bell-like quality.

Roman-strings

Rhor-werk (rōr'-vēr'k') Ger. n.

Reed-work: the reed stops of an organ, in contradistinction to the flue, or flute, pipes.

roll

The trill or tremolo on a drum produced by rapid strokes with each hand alternately on the kettledrum and bass drum, and by two rapid strokes with each hand, alternately on the side drum, resulting in a continuous rumble. In notation, the roll is indicated by tr — — — written above the note, or by three heavy lines above the note or drawn through its stem. On the tambourine the roll is produced by the rapid stroke of the knuckles. In organ music, roll indicates a rapid arpeggio, broken chord.

roll, long

A prolonged rolling of the drum; a military signal for attack or rally.

rollando (rōl-län'-dō) It. part.

Rolling: applied to drums or tambourines. Synonym of *rullando*.

rollante (rōl-län'-tē) It. part.

Rolling: applied to drums. Synonym of *rullante*.

Rolle (rōl'lē) Ger. n.

A run, a rapid succession of the same notes, upwards and downward. Compare *roulade* (Fr.).

roller

In organ building a wooden bar with pins in the ends upon which it may be rolled or rocked and two projecting arms, usually at some distance from each other, one of which is pulled by a tracker from the keyboards while the other pulls a tracker attached to a valve. Rollers are primarily designed to transfer motion from side to side, but they also often change it from a horizontal to a vertical plane.

rollo (rōl'-lō) It. n.

Equivalent to roll. See also roll.

romaika (rō-mā'-ī-kā) Grk. n.

A tune and dance of modern Greece beginning with great solemnity, increasing in liveliness and ending with great spirit and vigor.

Roman

Applied to the school of composers at Rome from Palestrina down.

Roman chant

Another name for the Gregorian chant. See also *Gregorian chant*.

Roman-strings

Fiddle strings made in Italy. Though made from sheep's intestines they are usually spoken of as catgut.

romana, nota

romana, nota (nō'-tä rō'-mä-nä) **Lat.**
and **It.**

A neume. See also neume.

romance

From roman, a name given to long tales, ballads in the Provençal language, sung by the troubadours and minstrels, and since they sang of chivalry and love the name later was applied to love ditties and songs of adventure. It is now used of both vocal and instrumental music of a delicate and romantic character. There is no fixed form for romances. Equivalent to *romanza* (It.), *Romanze* (Ger.), *romaunt* (Old Eng.), *romance* (Fr.).

romance sans paroles (rō-māñs säñ pä-rôl') **Fr.**

Song without words.

romanesca (rō-mä-něs'-kä) **It. n.**

romanesque (rō-mä-něsk') **Fr. n.**

A popular Italian dance of the Sixteenth Century resembling the galliard. It originated in Rome, hence the name *romanesca*.

romantic **Eng. n.**

romantique (rō-män-těk) **Fr. adj.**

Its meaning in reference to music is rather arbitrary and is directly opposed to that of the classic, signifying something uncommon or unusual. Before music can be properly termed classic it must have stood the test of years and have received the approval of succeeding generations. Thus a new composer's imitation of music which has become known as classic borrows the modifying term and is itself known as such. Any deviation from the beaten path in order to display genius and ingenuity is, on the other hand, termed romantic. Wagner was called Romanticist by his contemporaries, but has successfully stood the test of time and is now regarded as a Classicist. The term *romance* was first used in reference to tales written in the Romance tongues and has grown to refer to a tale which is the product of imagination. Hence, its use in reference to original music.

Romanusbuchstaben (rō - mä'-noos - bookh'-shtä-běñ) **Ger. n.**

The single Greek or Latin letters such as m c i and abbreviated words such as ten., sep., moll., used over the neumes which were the signs or characters used to indicate a tone or phrase in early medieval music. They were called *litteræ significatæ*, signifi-

rondeau

cant letters, and their use is credited to Romanus, a Greek hymn writer, but their meaning now is doubtful.

romanza (rō-män'-tsä) **It. n.**

Romance. *Romanze* (Ger.).

romanza senza parole (rō-män'-tsä sěn'-tsä pä-rô'-lě) **It.**

Song without words.

romanzero (rō-män-tsä'-rō) **It. n.**

A cycle or suite of piano pieces of a romantic character.

romanzesco (rō-män-tsäs'-kō) **It. adj.**

Romantic. See also *romantic*.

rombando (rôm-bän'-dō) **It. part.**

Droning; humming; buzzing.

rombare (rôm-bä'-rě) **It. v.**

To drone; hum; buzz.

Rome, prix de (prē dü rōm) **Fr.**

1. A prize offered by the French government to the pupils of the Paris Conservatory at their annual competition. It consists of an allowance sufficient to afford four years' study in Rome. Another name is the *grand prix*.

2. A prize of the same description awarded every other year by the *Brussel's Conservatory*.

römischer Gesang (rā'-mish-ěr gě-zäng') **Ger.**

Roman song; the Gregorian plain chant of the Catholic Church.

roncon (rôn'-kōn) **Spa. n.**

Drone of a bagpipe.

ronda (rôn'-dä) **It. n.**

A round: a song made up of a certain melody sung by each voice beginning at a given interval from the leading voice and repeated until the last voice has completed the melody.

ronde (rôñd) **Fr. n.**

1. A *ronda* or round.

2. A semibreve, a whole note.

ronde pointée (rôñd pwäñ-tä') **Fr.**

A dotted whole note.

rondeau (rôñ-dō) **Fr. n.**

A vocal or instrumental composition in which the principal theme is often repeated; a round, catch, rondo. The setting to a *rondeau*, a poem in three parts, the first having five lines, the second three and the third five, and having only two rhymes, the first word or portion of the first line being repeated at the end of the second and third parts. The *rondeau* usually has eight syllables to a line. The *rondeaux* of Adam de la Hale, a composer of the Thirteenth Century, were merely three-part songs, either short or fairly long, which were sung again and again till the words were all said.

rondeaux

rondeaux (rôn-dō) Fr. pl. n.

Rounds; catches; rondos. See also rondeau.

rondellus rondel

An old form of imitation in which a certain melody was sung by all the voices in turn. It differed from the canon or round, however, in that all the parts began at once, the additional voices each having a melody of its own which accompanied the given melody and exchanged with it till all had been sung by each part. See also roundel.

rondeña (rôn-dân'-yâ) Spa. n.

The popular ballad of ronda, similar to the fandango, sung in couplets of four verses, eight syllables in a verse.

rondiletta (rôn-dī-lēt'-tä) It. n.

rondinetta (rôn-dī-nēt'-tä) It. n.

rondino (rôn-dē'-nō) It. n.

Diminutive of rondo: a short, easy rondo.

rondo

A form of instrumental composition which is characterized by a return to the leading theme so that it assumes the form of a circle. No matter how great the digressions from the leading theme, the return is inevitable. Equivalent to rondeau (Fr.).

rondo form

The composition or form of a rondo. This form, the oldest and most frequently used as a mould for musical composition, was first brought into practical shape by Philipp Emmanuel Bach. It consists of three strains, each constructed so as to lead the ear by pleasant and natural means back to the first strain. The rondo form differs from that of the sonata and symphony in not having the first part marked for repeat. While there is no hard and fast rule for the construction of a rondo, the following formula or one similar to it is frequently used; first subject, second subject in dominant, first subject, third subject, first subject, second subject in tonic, coda or conclusion. Modern composers, notably Chopin, give all their material in the first half of the piece and then repeat the whole unchanged, except such portions as were originally in the dominant are, in the repetition, given in the tonic.

rondo mignon (rôn-dō mën-yôn) Fr.

Literally, a favorite rondo.

rondoletto (rôn-dō-lēt'-tō) It.

Diminutive of rondo; a short, easy rondo.

rosin

ronzamento (rôn-tsä-mën'-tō) It. n.

Buzzing; humming.

root

The fundamental tone of a chord; the note on which a chord is built. It is the lowest note of the chord in its first or natural position but appears above or between the other notes if the chord is inverted. Thus the chords C E G, E G C and G C E are all formed on the root C. See also generator, though in modern usage they are not generally synonymous.

rosa (rō'-zä) It. n.

The ornamentation around the sounding-hole of instruments of the violin type. Equivalent to Rose (Ger.) and rosette (Fr.).

rosalia (rō-zä'-lī-ä) Lat. n.

Rosalie (rō-zä-lē') Ger. n.

The repetition of a phrase or passage of a melody several times in succession, each time a degree higher. When employed often it usually results in monotony and shows a lack of ideas on the part of the composer, for which reason the Germans derisively call it Schusterfleck, cobbler's patch, but many of the great composers have used it effectively, though they generally employ only two or three repetitions. The name was derived from an old Italian song, Rosalia, mia cara, which was written in this style, and as the same device appears in an old German folk-song, Gestern Abend war Vetter Michelda, it is often called Vetter Michel in Germany.

The term, construed more loosely, is also applied to a succession of repetitions on various degrees of the staff, higher or lower.

Rose (rō'-zě) Ger. n.

rosette (rô-zět') Fr. n.

Equivalent to rosa (It.). See also rosa.

rosin

The resin left after distilling the volatile oil from turpentine. It has to be refined for use on the hair of the violin, viola or cello bow, but the ordinary rosin mixed with white-pitch is used for the double-bass. The rosin should not be too sticky or it will only mat the hair and if it is very dry it has to be applied often. It is used to roughen the hair that the bow may grasp the strings of the instrument and cause them to vibrate. Equivalents, colofonia (It.), colophane (Fr.), Kolophon (Ger.).

rovescio

with one of the imitating parts, devices often used by the old composers (1400-1600), who so arranged the music that it could be sung backwards or upside down, or with one part substituted for another, for instance, the bass part being sung first and followed by the soprano, or the soprano part leading off, and the bass following using the same music with the sheet reversed. Such compositions bore two clefs, one of which was inverted, and were called pieces *al rovescio*.

ruana

A Hindu violin.

rubato (roo-bä'-tō) It. adj.

Literally, robbed: used in connection with tempo when the usual time values of the notes are disregarded and the longer ones steal some of the time from the shorter ones. It is necessary that care be taken or the rhythm will be marred.

Rückfall (rük'-fäl) Ger. n.

A back-fall: an obsolete grace, indicated by a heavy oblique line or a comma over a note where a very short note a tone higher than the written note was to be introduced, falling back to the principal note, which received almost its full time value. Two heavy oblique lines or two commas indicated a double back-fall, two short notes. See also back-fall for illustration.

Rückgang (rük'-gäng) Ger. n.

Retrogression: the part of a work in sonata form between the end of the development of the theme, or an episode, and the repetition of the principal theme, reprise; the transition of the development or episode into the reprise. Abbr. Rg.

Rückpositiv (rük'-pō-sē-těf') Ger. n.

A small fixed organ in front of the main instrument, so called because it is usually behind the organist.

Rückung (rük'-oongk) Ger. n.

Literally, moving with a jerk: syncopation; the tying of the last note of a measure to the first of the following measure, which shifts the accent of the first beat to the usually unaccented note and produces a sort of jerky movement.

Rüdenhorn (rü'-dēn-hörn) Ger. n.

The low-pitched wooden hunting horn, one of the three kinds of Hifthorn. See also Hifthorn.

Ruf (roof) Ger. n.

Call; cry of a hunter of the winding of a horn; voice: a trumpet-call in the army.

running**ruff****ruffle**

A word of unknown origin: applied to a low, vibrating beat of a drum greatly resembling the roll but less loud. It is used on certain occasions as a mark of respect.

Ruhepunkt (roo'-ě-poonkt') Ger. n.

Resting point; pause: point of repose in a melody, hence a cadence.

Ruhestelle (roo'-ě-shtěl'-lě) Ger. n.

Ruhezeichen (roo'-ě-tsī'-khěn) Ger. n.

A rest sign; rest, pause. See also rest.

ruhig (roo'-ikh) Ger. adj. and adv.

1. (adj.) Tranquil; calm; peaceful; gentle.

2. (adv.) Tranquilly; calmly; gently.

ruhig gehend (roo'-ikh khä'-ěnt) Ger.

Gently moving.

Rührtrommel (rür'-trôm'-měl) Ger. n.

A drum. No longer in use.

Rührung (rü'-roongk) Ger. n.

Emotion; sympathy.

rule

1. Formerly applied to line.

2. Rules in music are the result of observation made by qualified persons of what has proved successful at previous times. They are not absolutely binding but are subject to exceptions.

rule of the octave

A system used by teachers of harmony before the formulation of the laws governing harmonic progression. The diatonic scale was taken as a bass and chords formed on each degree to exemplify their mutual relation.

rullando (roo-län'-dō) It. part.

Rolling: used of a drum or tambourine. Synonym of rollando.

rullante (rool-län'-tě) It. part. adj.

Rolling. Tamburo rullante, side drum.

run

1. A rapid succession of notes, usually a scale passage, used as an ornament; a roulade.

2. To run: an organ term, used of the leaking of air from the windchest into a groove, which makes the pipes of that groove sound.

Rundgedicht (roont'-gě-dīkht') Ger. n.

Round poem; a roundelay; rondo. Synonym of Rundgesang.

Rundgesang (roont'-gě-zäng') Ger. n.

Round-song; a roundelay; round; catch; a convivial song: a solo with refrain for chorus.

running

1. Executing rapid scale passages.

2. The leaking of the air from the

running

windchest of an organ, or the faint sound of the pipes caused by such a leak.

rural Dionysia (roo'-rēl dī-ō-nīs'-ī-ä) Grk. n.

Festivals celebrated in early times in many parts of Greece in honor of Dionysus or Bacchus, the god of wine. The rural Dionysia were a vintage celebration, occurring in the rural districts in December, and characterized by great freedom and boisterous merry-making. The dancing, jests and songs which were a part of these festivals gave rise to lyrical drama. This festival was later introduced at Rome where it assumed such lawlessness and license that it and all other forms of the worship of Bacchus were banished.

russe (rüs) Fr. adj.

Russian.

russe, à la (ä lä rüs) Fr.

In Russian style.

Russian bassoon

A bassoon of low pitch, used for military purposes. See also bassoon.

Russian horn band

A band playing horns which sound only one note each. In 1751 J. A. Maresch, a Bohemian in Prince Narischkin's service, invented a band of horns, thirty-seven in all, having a compass of three octaves, the tones and semitones being produced by

Sackpfeife

horns varying in length from about twelve feet to nine inches, and trained a force of serfs to play them, for since each had only certain notes to play no especial degree of intelligence was necessary. The first performance took place before the court in 1755, and from that time until a short while ago a horn band was maintained by the Russian court.

Russpfeife (roos'-pfī'-fě) Ger. n.

See Rauschflöte.

rusticano (roos-tī-kä'-nō) It. adj.

sabeca (sä'-bā-kä) Heb. n.

An instrument mentioned in the Bible and very likely belonging to the harp family although there is no way of definitely identifying any of the biblical names of musical instruments with existing specimens. Researchers, however, consider the *sabeca* to have been an instrument with strings which were plucked by the fingers as are those of the harp.

sabot (sä-bō) Fr. n.

1. In harp making, a disc furnished with two pins and turned by one of the pedals of the double action harp. Each pin is so arranged as to catch the string and shorten the vibrating section.

2. A poor, ill-made fiddle.

sackbut

1. A medieval instrument which greatly resembled the slide trombone.

2. An incorrect biblical translation of *sabeca*, a small harp. See also trombone and *sabeca*.

Sackgeige (säk-gī-khě) Ger. n.

Literally, a pocket fiddle. See *kit*.

Sackpfeife (säk'-pfī'-fě) Ger. n.

The German name for the *bag-pipe*.

sacred music

sacred music

Music of a religious character or connected with religious worship. The oratorio, while not used in services for worship, is classed with sacred music.

sacring bell

In Roman Catholic Church services, a bell rung by the acolyte or altar boy at the singing of the Sanctus, at the conclusion of the Ordinary of the Mass, at the Elevation of the Host, or other solemn parts of the service.

sacrist

The music librarian of a cathedral, whose duties include whatever copying of music is necessary for the choir.

Saengerfest (zěng'-ěr-fěst) Ger. n.

A German music festival, partly social in its nature, in which much of the music is furnished by male chorus.

safety valves

More commonly known as the waste pallets. An opening in the top of the bellows, the covering of which is held in place by a spring until an oversupply of wind is admitted to the bellows; when in danger of over-expansion, the valve is forced open and the extra wind is discharged.

sagbut

See sackbut.

saint's bell

Same as sacring bell.

saison (sā-zōñ) Fr. n.

The musical season; the time of the year during which are given the most important concerts and operatic performances.

Saiten (zī'-těn) Ger. n.

Strings.

Saitenchor (zī'-těn-kör) Ger. n.

A group of two or three strings tuned in unison.

Saitenfissel (zī'-těn-fis'-sěl) Ger. n.

Tail piece: a less usual form of Saitenhalter. See also tail piece.

Saitenhalter (zī'-těn-hält'-ěr) Ger. n.

Tail piece.

Saitenharmonika (zī'-těn-här-mō'-nē-kä) Ger. n.

Stringed harmonica: a keyboard instrument with a diminuendo attachment. It was invented by J. H. Stein in 1788.

Saiteninstrument (zī' - těn - ĩn-shtroo-měnt) Ger. n.

An instrument having strings.

salii

Saitenklang (zī'-těn-kläng) Ger. n.

The sound emitted by a string when it is set in vibration.

Saitenorgel (zī'-těn-ör'-gěl) Ger. n.

Literally, 'stringed organ': a keyboard instrument invented in 1890 by Carl Gumbel of Kroffdorf, Prussia. Each key is furnished with three strings which are struck by a hammer and to each group is added a fourth, which is caused to vibrate by the rapid fanning of a free reed, whose vibrations are the result of the action of a supply of wind from a bellows worked by the performer by means of treadles. By reason of the manner in which this fourth string is caused to vibrate it is capable of furnishing a sustained tone like that of the organ. By means of various mechanical contrivances and combinations the tones of a piano or of an organ or of the two combined may be produced. When combined the effect is that of a string band, organ and piano.

Saitenspieler (zī'-těn-shpěl'-ěr) Ger. n.

One who plays upon a stringed instrument.

Saitenton (zī'-těn-tōn) Ger. n.

The same as Saitenklang.

saitig (zī'-tĭkh) Ger. adj.

Stringed.

salamanie

A name for the flute used by Oriental people.

salcional (säl-sē-ō-näl') Fr. n.**salicet** (sä-lē-sä') Fr. n.**salicional** (sä-lē-sē-ō-näl') Fr. n.

A soft string-toned organ stop with small open metal pipes varying in pitch. Salicional is the name preferred for this stop, especially those of low pitch, those of the higher pitch being called Salicet. Abbr. salic.

salicional stop

An organ stop composed of narrow metal pipes open at both ends. It has a delicate reedy tone, resembling that produced by a bird called the willow pipe or willow wren, very abundant during the summer in the woods of the British Islands.

salii (sā'-lĭ-ī) Lat. n.

Literally, leapers, dancers: the twelve priests of Mars, the god of war, who sang and danced in procession through the streets of Rome on festal occasions, when celebrating in honor of Mars, bearing the Ancilia, or sacred shields.

saraband (sär-ä-bänd) Eng. n.**sarabanda** (sär-ä-bän-dä) It. n.**sarabande** (sä-rä-bänd) Fr. n.**Sarabande** (sär-ä-bän'-dě) Ger. n.

1. A dance, once of great popularity in Spain, France and England. Its origin is variously given: from **Zarabanda**, a Spanish dancer well known in Seville; from the Spanish word, **sarac** an entertainment of dancing; or traced back to a still earlier ancestry in Turkey and Persia. In the early part of the Sixteenth Century it was danced in Europe, and it was generally denounced as immodest and disgraceful, giving strength to the belief of its Oriental beginnings. In Spain it was even temporarily suppressed at the end of the reign of Philip II. Soon a more refined version came into notice, and in 1588 we hear of it in France. Richelieu's name is associated with its story, he having danced it before the French Queen, Anne of Austria, in ballet, wearing green velvet knee-breeches and having castanets in his hands and bells on his feet. The saraband was changed into a country dance in England, where, in 1651, it is mentioned as danced longways, in the manner of the Roger de Coverley or our own Virginia reel.

2. In the musical suite, or set of dance forms, the saraband plays an important part. It was first used in this way in the Seventeenth Century. It is noble and stately in character, thus forming a contrast to the lively gigue which immediately follows it and forms the concluding movement of the suite. The saraband is written sometimes in the major, sometimes in the minor key, and in three-two, three-four or even two-four time.

saraband

There are usually two parts of eight to ten measures each.

It always begins on the first beat, and concludes on the second or third. Handel and J. S. Bach have left fine examples.

sarangi (sä-rün-gī) Hin. n.

A Hindu instrument of the violin family having a pear-shaped body whose sides are slightly incurved. It is furnished with a number of fine wire strings which are stretched along the belly and which vibrate from sympathy when the heavier melody strings are rubbed with the bow.

sarungi (sä-rün-gī) Hin. n.

See sarangi.

sarrusophone (sä-rüs-ō-fōn') Fr. n.

An instrument invented in 1863 by M. Sarrus, a band master of Paris. Its tube is of brass, but is fitted with a double reed mouthpiece like the oboe. It is the only combination brass and reed instrument.

sartarella (sär-tä-rěl'-lä) It. n.

A Neapolitan dance.

Sattel (zät'-těl) Ger. n.

Literally, saddle or ridge: the nut of a violin or similar instrument; the piece of wood on the finger-board which holds the strings stretched in place.

Sattelage (zät'-těl-lä-khë) Ger. n.

Half position; a term used in violin playing.

sattelmachen (zät'-těl-mäckh-ën) Ger. v.

Literally, to make a ridge: in violoncello playing, to form a temporary nut by pressing the thumb firmly on a string, in order to produce harmonico.

satyric dance

Generally speaking, any dance, among the Greeks, in which the performers represented Satyrs. In particular, the satyric dance is the sikinnis, and is described under that name.

sauter (sô-tä') Fr. v.

Literally, to jump, to skip.

1. To jump from one note to another.

2. To overblow; with a wind instrument to blow the current in a way which divides the tone into a series of tones, which sound with, but are higher in pitch and less intense, than the generating tone.

sautereau (sô-tü-rô') Fr. n.

The jack of a spinet or harpsichord.

sauterie Old Eng. n.

A psaltery.

sautillé (sô-të-yä') Fr. adj.

Hopped, leaped, rebounded: a term, in violin music, designating that the passage so marked is to be played by a leaping, bounding motion of the bow. It is used for rapid repetition of one note or for passages in light staccato.

sauvement (sôv-män') Fr. n.

Salvage; the act of saving; resolution: used in the sense of resolving, saving a discord by following it with a consonance or harmonious chord.

sauver (sô-vä') Fr. v.

Literally, to save: to resolve a dissonance, that is, a discord or tones that do not give a sense of rest, into a concord or sounds that give a sense of rest and are agreeable. This is done by progressing a semitone or whole tone up or down.

sax

A prefix which is found in the names of those instruments which were the invention of Adolphe Sax in the first half of the Nineteenth Century. Sax greatly improved brass wind instruments which had formerly been furnished with finger holes and keys like a flute, by adopting valves to them.

saxtuba

The bass saxhorn; a brass bass wind instrument similar to the saxtromba, and one of the family of brass instruments invented by Adol-

saxtuba

phe Sax. It has three cylinders or pistons for regulating the pitch, a wide mouthpiece, and possesses a deep sonorous tone.

saxhorn (säks'-hörn)

Before the time of Sax the keyed bugle and the ophecleide, which constituted the brass instruments then used, were furnished with keys as are the flutes, clarinets and oboes of today. Sax, however, invented an improved variety of brass instruments which were furnished with from three to five valves instead of keys for increasing their compass. The various sizes are sopranino, soprano, alto, tenor, bass, low bass, contrabass. The first four are collectively known as bugles à piston and the rest as tubas and bombardons.

saxofonia (säk'-sō-fō-ni-ä) It. n.

See saxophone.

saxophone

An instrument invented by Sax about 1840, having a conical brass tube furnished with keys and a single reed mouthpiece. Its voice does not mingle well with those of the members of the orchestra so that it is relegated to use in military bands. It is most popular in France. The saxophone is in six sizes, each size comprising two registers a tone apart in pitch. They are: Sopranino in F and E flat, soprano in C and B flat, contralto in F and E flat, tenor in C and B flat, baritone in F and E flat, bass in C and B flat.

saxotromba

A valve instrument of the trumpet family having a narrow tube and the quality of whose tone is less delicate than that of the horn and more refined than that of the saxhorn. It is found in seven sizes: soprano; sopranino; alto; tenor; bass; low bass, and contrabass.

saynete (sä-ē-nä'-tě) Spa. n.**saynete** (sě-nět') Fr. n.

sbalzato (sbäl'-tsä'-tō) It. adv.

Headlong, impetuously.

Sbalzo (zbäl'-tsō) It. n.

Leap; skip; a skip in melody, as distinguished from the progression of a melody by consecutive degrees.

scannello**sbarra doppia** (zbär'-rä dōp'-pīa) It.

A double bar.

scagnello (skän-yěl'-lō) It. n.

The bridge of the violin and other instruments of its class. Synonym of scannello and scannetto.

scala cromatica (skä'-lä krō-mä'-tī-kä)

It.

Chromatic scale; the scale which ascends and descends by half tones.

scald Scand. n.

A minstrel; a bard; a court composer and singer of the old Scandinavian songs, the Eddas and Sagas.

scale

From the Latin word, *scala*, meaning a ladder.

1. It refers to the series of tones taken in direct succession through the interval of an octave. The manner in which the tones are arranged and their number have given the various scales individual names, such as diatonic, chromatic and pentatonic, each discussed under its own heading.

2. The series of tones which the various wind instruments are capable of producing, no matter whether it be identical with any of the series ordinarily termed scales.

3. Also the range or compass of a voice or instrument.

4. Relating to organ pipes and the tubes of other wind instruments the term is practically synonymous with diameter; or rather, the relation between the width and the length. In organ pipes this relation varies from: as one is to ten, to: as one is to twenty-four. A pipe wide in proportion to its length is said to be of wide scale and yields a mellow, sonorous tone; a pipe narrow in proportion to its length is said to be of narrow scale and yields a sharp or thrilling tone, or a thin stringy tone. The scale slightly affects the pitch of a pipe and necessitates a proportionate alteration in its length, thus a pipe of a small scale must be made somewhat longer than a pipe of a large scale sounding the same note.

scampanare (skäm-pä-nä'-rě) It. v.

From *compaña*, a bell: to sound a chime of bells.

scampanio (skäm-pä'-ni-ō) It. n.

A sound of bells; a chime, or chimes; Christmas chimes.

scannello (skän-něl'-lō) It. n.**scannetto** (skän-nět'-tō) It. n.

The bridge of a violin. Synonym of scagnello.

A score in which the vocal parts are written out in full, generally on separate staves for each part, and the piano accompaniment arranged or compressed from the full instrumental score on two staves below the vocal staves.

score, pianoforte

Vocal or orchestral music arranged for the piano.

score playing

Playing the score readily and with expression. It requires not only a quick eye and a trained ear that easily catches a dissonant tone, but also agile fingering that the notes may be clearly struck. Arduous practicing and a desire to interpret the composer's mood soon bring about skill in score playing.

score reading

Reading and interpreting readily the notes upon the score. An accomplishment indispensable to every good conductor and musician. This can be accomplished by assiduous study and systematic practice.

score, vocal

See vocal score.

scoring

To write and arrange music for an orchestra, or any combination of instruments and voices, or voices alone. Also called instrumentation and orchestration.

sea trumpet

A stringed instrument similar to the violin but on the principle of the monochord. It consisted of a wooden body about six feet long, flat in front and polygonal behind. It tapered from a large, flat base which stood on the floor to a short, thick neck ending in a head with a tuning screw. It had one large gut string usually tuned the second octave below middle C, which passed over a peculiarly shaped bridge of which one foot was fixed firmly and the other vibrated against the body. This instrument was played with a large bow like a violoncello. Sometimes there were added strings which served as a drone. For marine use the vibrations of the instrument were increased in order that the tones might be strong enough to give signals, for which purpose it was at one time employed in the British navy. It was also much used in nunneries as an accompaniment of singing because its tones were pitched with those of the female voice, and from this it derived its name of nun's fiddle. Some instruments had a second string pitched an octave above the first and some had a number of strings inside which were vibrated in sympathy with the strings outside. Equivalent to marine trumpet, tromba marina and nun's fiddle.

A section of the movable front of the swell-box in the organ.

si (sē) Fr., It and Spa. n. and pron.

1. (n.) The name applied to the tone B in French, Italian and Spanish. Since the system of Aretinus had but six tones, the seventh was called ut like the first. Si was first suggested by Ericius Puteanus of Dodrecht in 1850, and again by Lemaire of Paris in 1690. Although za and sa have been used at times, si has kept its place because the sibilant sound is supposed to indicate the peculiar

si scriva

quality of the tone. In the fixed do system si always stands for B; in the movable do system for the seventh tone of the major scale. In the Tonic Sol-fa system the seventh tone is te.

2. (pron.) An indefinite pronoun used as we use the words: one, people, it, in such expressions as: one knows, people say, it is said. In music it occurs in such terms of direction as si volta, turn over, one turns over; si libet, it pleases at pleasure.

sibilus (sīb'-i-lūs) Lat. n.

A flute or flageolet of small dimensions and not used for the production of music, but by bird fanciers in training singing birds.

siciliana (sē-chē-lī-ä'-nä) It. n.

sicilienne (sē-sēl'-yěn) Fr. n.

A Sicilian peasant dance of tender and pastoral character and rather slow movement in six-eight, or twelve-eight time. The peasants dance it to the accompaniment of a flute or tambourine, those of somewhat higher station in life to the music of several violins. The bagpipe and guitar are also used. The dance is opened by a man who, cap in hand, chooses his lady and bows low before her. She rises with eagerness, grasps one end of the handkerchief which her partner extends to her, while he keeps the other in his own hand. They dance vigorously until the man with another bow retires and leaves the lady to choose a partner. The dance is continued in this manner until weariness ends it. The married couples dance only with each other until the dance becomes general towards the end of the evening.

The music was often in a minor key and themes or movements under the same name or alla Siciliana, in the style of a Siciliana, are found in many vocal compositions, sonatas, and also as independent productions, most frequently in works of the Eighteenth Century.

side beards

Horizontal projections placed at the side of the mouth of an organ pipe to make the tone more cutting by changing the shape of the opening.

side drum

A drum which derives its name from the manner in which it is carried, slung over the shoulder, so that it hangs against the left thigh. Only the upper side is struck with the drum sticks. The manner in which it is carried implies its smaller size as compared with the bass drum, and the tones it produces are detached and crisp in character. It is strictly a military instrument, but can be used for martial effects in the orchestra.

Signalist

Sieb (zēp) Ger. n.

Literally, sieve; a name given in Germany to the sounding-board, or cover of the windchest of the organ, because of its numerous perforations designed to admit the feet of the pipes. See also sound-board.

signature

Signatur (zēkh-nā-toor') Ger. n.
signatura (sēn-yä-too'-rä) Spa. n.
signature Eng. n.

The signature of a musical composition or a part of it comprises all the signs and figures set at the beginning on the staff. These indicate two things, the key and the time, so that two kinds of signatures are often spoken of separately.

1. The sharps and flats called the chromatic signs, and the clefs constitute the key signature, which is usually repeated at the beginning of each staff. Each sharp or flat in the signature affects all the notes of the same name throughout the piece except when changed by a new key signature, or, temporarily, by an accidental, a sign to alter a note one half step higher or lower.

2. The figures or signs placed after these chromatic signs constitute the time signature, which indicates the fixed number of notes of equal value in each measure, expressed in fractional form. The denominator of this fraction represents whatever part of a semibreve or whole note is used as the unit of measurement, and the numerator, the number of such notes in each measure; thus, in three-eight time, eight denotes that the unit of measurement is an eighth note, and three that there are three of those units, or their equivalent, in each measure. The time signature is placed only at the beginning of the piece, except when a change in the time occurs, when the new time signature is simply written on the staff.

signe de silence (sēn dū sē-lāns') Fr.

Literally, signs of silence; rests. See also rests.

signes accidentel (sēn āk-sē-dāñ'-těl') Fr.

The natural (♮), sharp (♯) and flat (♭); musical characters representing a note artificially raised or lowered from the pitch indicated by its position on the staff, or according to the key-signature.

signet

A diminutive of signa or mark; a signal of entrance or exit sounded on a horn or trumpet, usually a stage direction. See also sennet.

siguidilla (sē-gwě-děl'-yā) Spa. n.

A Spanish dance. See also seguidilla.

sikinnis (sī-kīn'-nīs) Grk. n.

A dramatic dance among the Greeks. It was performed in company with witty speeches and frivolous, even immoral verses. The actors taking part sometimes caricatured well-known citizens, wearing masks to complete the resemblance, and not even the greatest among their countrymen escaped the good-humored ridicule. Although it was Attic in origin, its primitive mirthfulness and spirit degenerated into indecency. According to tradition Bacchus had brought it from India, and the Satyrs had made it theirs by adoption. It was performed also in Roman triumphs, then taking one of its particular forms, the burlesque of a dance of tragic or serious character.

silbar (sēl-bār') Spa. v.

To whistle.

Silbendehnung (zēl'-bēn-dä-noongk)

Ger. n.

Literally, syllable-extension: the drawing out of a syllable in singing over two or more different tones.

silbern (zīl'-bärn) Ger. adj.

Silvery: like silver in tone.

silence (sē-lāns) Fr. n.

silenzio (sī-lēn'-tsī-ō) It. n.

A rest.

sillet (sē-yā') Fr. n.

Nut: one of the two parts of the violin to which the strings are attached.

sillet, grand (grāñ sē-yā') Fr.

Large nut: situated at the tailpiece, or lower end of the violin.

sillet, petit (pū-tē' sē-yā') Fr.

Little nut: the nut at the upper end of the neck of the violin.

silver strings

The covered strings used for the

silver strings

lower tones of some stringed instruments, made of catgut or silk covered with silver or white metal. They add a sonority to the tone produced by an uncovered string, which would otherwise be attainable only by an inconvenient thickness of material. There is one such string on the violin, two on the viola and on the cello, while all the strings of the guitar are covered.

silver trumpet

A Hebrew instrument made of silver; probably the same as the chat-soteroth, having a straight tube about twenty inches long, a small mouth-piece at one end and a flaring bell at the other.

simicon (sĭm'-ĭ-kŏn) Grk. n.

A Grecian harp having thirty-five strings.

sign, canceling

A sign (^h) commonly called a natural, used to cancel the effect of a preceding sharp or flat.

similar motion

The progression of two or more parts or melodies in the same direction but not by the same intervals. The terms similar and parallel are sometimes used as synonymous, but there is a distinction between the two. Parallel motion means that both parts not only move in the same direction but preserve the same interval; in similar motion, one part may move two degrees while another may move one, six or any number of degrees, provided that all parts ascend or descend simultaneously. The melodic progression of any two-voice parts is similar when both rise and fall at the same time.

smile (sĕm'-ĭ-lĕ) It. adv.**similiter** (sĭ-mĭl'-ĭ-tŭr) Lat. adv.

Similarly; in the same manner: direction for a passage to be executed  in the same style as a similar passage preceding it. It is used to avoid re-writing phrases or marks of expression. Abbr. sim.

simpla (sĭm'-plä) Lat. n.

A quarter note; a crotchet; probably a corruption of semiminima, a half minim.

simple counterpoint

The most easily written counterpoint in which the various melodies are intended always to retain the relations which they originally bear to each other; opposed to double coun-

sinfonia

terpoint, which is written so that the melodies or parts may be mutually inverted, that is, the uppermost may become the lowermost and vice versa. In double counterpoint, which is a very artificial kind of composition, the inversion does not always occur in reality, but the parts are so written that it is possible. Its writing is more a mathematical feat than an artistic creation. Simple counterpoint does not take such possibilities into consideration, but is written with the object that each part may retain its normal position.

simple fugue

A fugue containing a single subject.

simple harmony

Harmony in which the chords contain no octaves. Opposed to compound harmony.

simple intervals

Intervals of less than an octave in extent.

simple inversion

Inversion in which the notes which ascended in the subject are made to descend in the answer, while those which descended are made to ascend.

simple recitative

Recitative, or musical declamation, with no accompaniment except an occasional single bass tone; also called plain or dry recitative, recitativo secco or parlante.

simplement (sän'-plŭ-män) Fr. adv.

Simply; plainly; naturally.

sin' (sĭn) It. prep.

Contracted from sino, meaning, to; as far as; until.

sin' al (sĭn ä) It.

Literally, as far as, to the, until to the; but translated simply to the, or, as far as the. It is a redundant expression, the word, al, having the form of both preposition and article, as, to the, in the, about the.

sin' al fine (sĭn ä) It.

To the end; as far as the end.

sincopa (sĭn'-kŏ-pä) It. n.**sincope** (sĭn'-kŏ-pĕ) It. n.

Syncopation: an irregular accent produced by beginning a note on a weak or unaccented part of a measure, and prolonging it over a regularly accented beat. See also syncopation.

sine-keman Tur. n.

An old Turkish instrument allied to the violin.

sinfonia (sĭn-fŏ'-nĕ-ä) It. n.

Symphony; concert. Equivalent to sinfonie. Abbr. sinf.

sinkapaceAn English name for the *cinque-pas*, five-step, an old French dance whose characteristic feature was a movement of five steps. It is the same as the original form of the *galliard* and is frequently mentioned by Shakespeare and other Elizabethan writers. Other forms of the name are *cinque-pace*, *cinqua-pace*, *cinque-pass*, *cinque-pas*, *sinqua-pace*, *sinque-pace*, *zinck-pass* and *sin copas*.**sino** (sē'-nō) It. prep.As far as; to: used chiefly after D. C., return to the beginning, and similar expressions, and usually with *al*, as *sin' al*. Abbr. *sin'*.**sino al segno** (sē'-nō āl sān'-yō) It.

As far as to the sign; to the sign.

siren Eng. n.**sirène** (sē-rēn') Fr. n.**Sirene** (zē-rā'-nē) Ger. n.

1. An instrument which may be used in determining the number of vibrations necessary to produce a given tone. It consists of a disc which is made to revolve over a jet of compressed air or steam. The disc is provided with equi-distant perforations, which, as they pass over the jet, produce a regular series of puffs forming a musical tone. An increased number of rotations of the disc create an increase in the number of puffs per second and consequently a tone of higher pitch. Each perforation represents a vibration and a record is kept of the revolutions per minute, the number of vibrations being thus determined.

2. When spelled with a capital the name of a group of mythological creatures who sat on the shores of a certain island or promontory near the southwest coast of Italy, and sang bewitchingly sweet songs that lured the passing sailor to draw near, only to meet with death. In works of art they are represented as having head, arms and generally the bust of a young woman, and the body, wings or feet of a bird. Homer speaks of them

six pour quatre

in the plural, but does not specify their number. Their tenure of life was dependent on the successful exercise of their charms, for they were doomed if any seaman could resist the enticements of their magic music. It is related by Homer in the *Odyssey* that when Ulysses, in the course of his wanderings, approached their perilous home he stuffed the ears of his companions with wax and lashed himself to a mast until he had sailed out of the hearing of their fatal songs. Others said it was the Argonauts who got safely by, owing to the superior enchantment of Orpheus' singing, whereupon the Sirens threw themselves into the sea and were transformed into rocks.

Sirenen-gesang (zīr-ēn'-ēn-gě-zāng')

Ger. n.

A siren song; a melody of seductive, fascinating character.

sirventes (sēr-vānt') Fr. n.

Position; place.

six-eighth measureMeasure consisting of six eighth 6 notes or their equivalent; marked 8 **six-four time**

A kind of time in which a measure requires six quarter notes 6 or an equivalent; written 4

six pour quatre (sēs poor kătr') Fr.

Literally, six for four: a sextuplet, or a double triplet; a group of six notes to be played in the time of four.

six-quarter measure

six-quarter measure

Measure consisting of six quarter notes or their equivalent; marked $\frac{6}{4}$
six-sixteen time

That kind of time in which a measure requires six sixteenth notes or their equivalent; marked $\frac{6}{16}$
six-two time

That kind of time in which a measure requires six half notes or their equivalent; marked $\frac{6}{2}$
sixieme (sēz-yēm) Fr. n.

Sixth; the interval of a sixth, nine half steps.

sixte (sēkst) Fr. n.

The interval of a sixth, nine half steps.

sixte ajoutée (sēkst ä-zhoo-tä') Fr.

The added sixth; i. e., the subdominant triad or chord of three tones, in the first position with the sixth note added, which in C major, would be f-a-c-d. See also added sixth.
sixteenth note.

A note, whose value is one-sixteenth of the time value of a whole note; also called a semiquaver because equal to one-half of a quaver, or eighth note.

sixteenth rest

A rest equivalent in time value to a sixteenth note.

sixth

1. A tone on the sixth line or space above or below the given note.

2. Also the interval between a tone and the tone on the sixth degree above or below it.

3. Also the harmonic combination of a tone and its sixth.

4. In a scale, the sixth tone up from the keytone, called la.

sixth, augmented

A half tone added to a regular sixth interval makes that sixth an augmented sixth. Thus in the key of C major, from C to A is a sixth, from C to A sharp is an augmented sixth

sixth, chord of the augmented

This chord is variously formed, according as it is the Italian, German or French augmented sixth. The feature in common is, that the augmented sixth chords all extend from the note on which the chord is based, to the sharp of its sixth interval, while the intermediate notes forming the harmony vary according to the name of the chord.

skald

sixth, diminished

An interval two semitones shorter than the major sixth.

sixth, French

An augmented chord, formed from the note on which the chord is based and the sharp of its sixth interval, and including between them the major third above the note on which the chord is based and the major third below the upper note, the sharp.
sixth, German

An augmented chord, formed from the note on which the chord is based and the sharp of its sixth interval and including between them major third and perfect fifth intervals; as, in the key C major, F, A, C and D sharp.

sixth, great

See great sixth.

sixth, Italian

An augmented chord, formed from the note on which the chord is based and the sharp of its sixth interval and including between them the major third of the note on which the chord is based. It is the simplest one of the augmented chords, and elegant in its simplicity. As, F, A, D sharp.

sixth, major

In the major scale of any key this is the tone which is on the sixth degree above or below the given tone. This is the typical sixth interval: as C-A.

sixth, minor

A sixth which is a half tone shorter than the major sixth is called the minor sixth, C-A flat.

sixth, sharp

Another name for augmented sixth; also called extreme sixth. It is the interval between the note itself and the sharp of the note six degrees above it. As C-A sharp.

sixtine (sēks-tën) Fr. n.

A sextuplet.

sixty-fourth note

A note having one-sixty-fourth of the time value of a whole note; also called a hemidemisemiquaver or semidemisemiquaver, because equal to one-half of a demisemiquaver or thirty-second note.

sixty-fourth rest

A rest equivalent to a sixty-fourth note.

An enlarging, expanding, widening; hence, gradual broadening, slackening of the time. Abbr. slarg.

slentando (zlĕn-tän'-dō) It. n.

A relaxing or slackening of the time. Abbr. slent.

slide

1. A movable U-shaped tube which fits over the principal tube of certain wind instruments and can be slid along as an outer casing in such a manner as to increase the length of the tube and thus lower the pitch and add to the compass of the instrument. This device tends to produce more perfect tones than do valves because the length of the principal tube only is increased and the air is not forced into a new tube. However, it is more difficult to manipulate, for the performer must rely upon his ear in determining the exact amount to lengthen the principal tube in order to produce correctly the tone desired.

2. In reference to the organ it means slider.

3. A musical embellishment consisting of three or more notes in the natural order of the scale, either ascending or descending. The last notes are the principal ones and the others are considered graces.

4. A portamento.

slide horn

A French horn furnished with a slide instead of with valves. See also horn.

slide trombone

A trombone furnished with a slide instead of with valves. See also trombone.

slide trumpet

A trumpet furnished with a slide instead of with valves. See also trumpet.

slur, vertical**slide, tuning**

A pipe furnished with a movable outer casing which can be drawn out in such a manner as to increase the length of the pipe, and lower the pitch. This contrivance makes it possible to sound thirteen semitones on the pipe which is used in giving pitches to other instruments or to singers.

slider

A long, flat piece of wood pierced with holes and placed just under the lower ends of the pipes. When a group of pipes is to be used the draw stop is pulled out causing the slider to move until the perforations coincide with the openings in the pipes, thus admitting the wind from below and causing the pipes to sound when the corresponding key is depressed.

sliding-relish

An obsolete embellishment. See also coul  and slide.

slissato (zlĭs-sä'-tō) It. adj.

Slurred.

Slogan

A war cry, or word for assembling a clan of the Scottish Highlanders.

slow movement

1. A term applied to any piece in slow time, whether an independent composition or a part of a larger one.

2. A specific name for such a movement when it constitutes part of a sonata, symphony or other large work in classical form, having several well defined and contrasting movements. In a sonata of only two movements, the slow movement may be placed either first or second; in works of more than two movements it is never placed either first or last.

The character of the movement, rather than the indicated time, determines its claim to be called the slow movement.

slur

1. A curved line which is drawn over or under two or more notes and denotes  that they are to be played smoothly and connectedly.

2. In vocal music the slur indicates that two notes should be sung to one syllable of the text and in one breath. In this case the notes themselves are termed a slur.

slur, vertical

See vertical slur.

solmisare (söl-mĭ-zä'-rě) It. n.To practise the scales by applying to the respective tones the syllables, do, re, mi, fa, sol, la, si. Synonym of *solmizare* and equivalent to *solmisieren* (Ger.).**solmisation**

The derivation of the word may be traced to sol and mi, two of the syllables which are sometimes used to designate the tones of the scale. This method of naming the tones is a part of an ancient system of teaching the scales, said to have been instituted by Guido d'Arezzo during the Eleventh Century. Guido is also said to have instituted a scale containing six tones known as a hexachord, but found much difficulty in teaching the degrees because of the obscure notation which was especially faulty in designating the pitch of the tones. He observed that in a hymn to St. John, the first syllable of each succeeding line was accompanied by a tone one step higher in pitch than the one preceding. The hymn was

solmisation

“UT queant laxis, REsonare fibris Mira gestorum FAMuli tuorum SOLve polluti LABii reatum, Sancte Johannes.” The syllables first used were ut, re, mi, fa, sol and la, but with the Seventeenth Century came the introduction of a scale containing seven tones, and a new syllable, si, was invented. Later it was decided that as do was much easier to sing it should be substituted for ut as the name of the first degree, and the revised series, do, re, mi, fa, sol, la, si, have remained in universal use although several times changes have been suggested.

solmisiren (zōl-mī-zē'-rěn) Ger. v.

solmizare (sōl-mī-zä'-rě) It. v.

To play the violin.

sonata (sō-nä'-tä) It. n.

In the Seventeenth and Eighteenth Centuries, any instrumental composition as opposed to cantata, a vocal composition. In this early music there were two varieties, sonata da chiesa, church sonatas, and sonata de camera, chamber sonatas, the first being grave and dignified, the second lighter in character. In modern music, sonata

sonata

is an instrumental selection, particularly one for the piano having three or four movements with contrasted rhythms in related keys. A sonata for a string quartet is called a quartet, and one for full orchestra, a symphony. The sonata was brought to its present perfection by Beethoven. **sonata da camera** (sō-nā'-tä dä kä'-mē-rä) It.

A chamber sonata; an instrumental composition for parlor use.

sonata da chiesa (sō-nā'-tä dä kē-ā'-zä) It.

A sonata for the church; an instrumental piece of religious character.

sonata di bravura (sō-nā'-tä dē brä-voo'-rä) It.

A brilliant and spirited instrumental piece.

sonata form

The oldest composer to use this term was Andrea Gabrieli in 1568. It was then loosely applied to pieces for several instruments characterized by the evolution of harmonic fulness. At the present time the term designates a composition for instrumental performance distinguished by the possession of two themes in different keys. The sonata form is the one upon which is based the construction of the symphony, the concerto, the overture, and the sonata itself. The sonata form in brief usually follows some such outline as this: (a.) The exposition, in which the chief theme is followed by a subordinate theme in another key related to that of the chief theme. (b.) A development, or working out section, in which both themes are treated as the skill and fancy of the composer dictates, either singly or in conjunction. (c.) A recapitulation, consisting of a return to the first theme and then to the second, not, however, in its original key, but in that of the first theme.

sonata, grand

A sonata of imposing character and proportions, usually in four movements. See also sonata.

sonatina (sōn-ä-tē'-nä) It. n.

Sonatine (zō-nä-tē'-nē) Ger. n.

A short sonata which comprises only two or three movements and in which the composer has developed the themes but little. It is a form requiring much less technical knowledge than the sonata.

A sounding-board.

song, prick

sonatore (sō-nä-tō'-rē) It. n.

A male instrumentalist.

sonatrice (sō-nä-trē'-chē) It. n.

Feminine form of sonatore: a woman who plays an instrument.

sonetto (sō-nēt'-tō) It. n.

A sonnet; especially, a song comprising a sonnet in a musical setting.

sonevole (sō-nä'-vō-lē) It. adj.

Sounding; sonorous; resonant.

song

1. In general, vocal musical utterance or expression.

2. A poem set to music, in which the words are combined with a distinct melody, whether for a single voice, or for several voices. In the latter case, where harmonized for more than two voices, it is usually called a part-song, although compositions for a number of voices are classified under various other names, such as chorus, madrigal and others, according to form, use and extent.

The song proper is usually considered as belonging to one of two classes: (a) the folk-song, a national or popular song, beginning among the common people, usually without definitely known origin; (b) the art-song, which is the product of cultivated musical taste and inspiration, and which is, in its turn, known either as strophic, or as thorough-composed, the former kind being that in which each strophe, stanza, is sung to the same melody, with, perhaps, a variation in the closing measures of the last stanza; the latter, songs in which each stanza has a more or less appropriate musical setting of its own.

The essential element of language in song also leads to a natural classification according to nationality, such as French, German, or Italian songs.

song, bacchanalian

A song of lively and boisterous character, with allusions to the noisy manner in which the festivals of Bacchus, god of wine, were celebrated.

song, florid

A term applied in the Fourteenth Century to figured descant; that is, part-music of an elaborate type, in contradistinction to plain song or plain chant.

song, four part

sopranist

a man having an artificially produced soprano voice.

soprano (sō-prä'-nō) It. n.

High, treble: the highest human voice, usually a female voice but also found in boys, and, rarely, in men. The soprano ranges from middle C up two octaves or more. It is an effective voice, very flexible, and carries the chief melody in any choral music. Some boys' voices are as beautiful in sweetness and pitch as the female voice. A man's voice which still retains these soprano tones is called a falsetto; the tones seem artificial, hence the name. The mezzo soprano ranges between the soprano and the alto. It is richer in quality than the soprano. Equivalent to Sopran (Ger.). soprano acuto (sō-prä'-nō ä-koo'-tō) It.

A high soprano.

soprano clef

The C clef written on the first line of the staff, denoting the use of that line for the note c', middle C.

soprano clef, mezzo

The C clef when placed on the second line of the staff, indicating the use of that line for middle C (c'). It was formerly used in writing the part for the second soprano voice.

soprano concertato (sō-prä'-nō kōn-chēr-tä'-tō) It.

The part for the solo soprano voice, in a chorus.

soprano mezzo (sō-prä'-nō mēd'-zō) It.

Middle soprano: a woman's voice whose compass lies between that of the soprano proper and the alto.

soprano, second

A low soprano: a voice lower in range than first soprano, between first soprano and alto.

soprano secondo od alto (sō-prä'-nō sā-kōn'-dō od ä'l'-tō) It.

The second soprano, or alto; the voice taking the second treble part.

Sopranschlüssel (zō-prän'-shlūs'-sël) Ger. n.

The soprano clef.

Sopranstimme (zō - prän' - shtim - mē) Ger. n.

Soprano voice.

sordamente (sōr-dä-mēn'-tē) It. adv.

From sordo, muffled; damped; veiled; softly, as if muffled or hushed in tone.

sordellina (sōr-dēl-lē'-nä) It. n.

An Italian bagpipe furnished with four pipes. See also bagpipe.

sostenuto

sordine

A mechanical device designed for softening the tones of stringed and cupped mouthpiece instruments. In those of the viol family it consists of a weight of brass, wood or ivory which can be attached to the bridge to deaden its resonance. In trumpets and other cupped mouthpiece instruments a pear-shaped pad made of leather may be inserted into the bell, thereby limiting the emission of air. Synonym of mute.

sordini levati (sōr-dē'-nē lē-vä'-tē) It.

Literally, the dampers removed: without the mutes or dampers.

sordino (sōr-dē'-nō) It. n.

Equivalent to sordine and mute. See also sordine. Abbr. S., s.

sordo (sōr'-dō) It. n.

Literally, one who is deaf: a muffled, veiled, or deadened tone.

sordone (sōr-dün') Fr. n.

sordono (sōr-dō'-nō) It. n.

Sordun (zōr-doon') Ger. n.

1. An obsolete member of the oboe family having a wooden tube fitted with a double reed mouthpiece and furnished with twelve finger holes.

2. An obsolete stop of the organ having pipes finished with reeds and giving muffled tones.

3. Another name for a sordino or mute in a trumpet.

sorgfältig (zōrkh'-fēl-tikh) Ger. adj.

Careful; attentive; used adverbially to direct special attention to accuracy in the passage so marked.

sortita (sōr-tē-tä) It. n.

Literally, a sally; a going out.

1. The piece or aria sung by any one character in an opera on entering the stage.

2. The closing voluntary of a church service.

Primitive flute used by the Malays.

sound-board

Same as *sounding-board*, which see.

sound body

sound box

A hollow place or cavity in a musi-

sous-chantre

cal instrument designed to increase the volume of sound, as the body of a violin.

sound post

In instruments of the violin family, the slender cylindrical wooden prop which is inserted between the top and bottom of the instrument nearly under the right foot of the bridge. It assists the top in withstanding the strain of the strings, and acts in transmitting the vibrations of the strings to the back which still more re-inforces the sound.

sound register

An apparatus invented in Paris in 1858, and designed for collecting and recording the sounds produced by a musical instrument or by the voice in singing.

sound wave

A wave by means of which sound is conveyed. It is started by a sounding body and travels through the air or some other elastic medium. See also *acoustics*.

sounding board

1. A thin plate of wood placed below or behind the strings of various instruments such as the piano, violin, guitar and mandolin. The wood vibrates in sympathy with the vibrations of the strings and re-inforces the sounds which they produce.

2. In the organ an air chamber enclosing the feet of the pipes.

sounding hole

The opening in the body of a guitar, across which the strings pass.

soung Burmese, n.

A harp whose body is shaped like a gondola, with a curved neck rising at one end and supporting the strings.

spanisch (spăn-îsh) Ger. adj.

Spanish. Equivalent to spagnolesco.

spanischer Reiter (spăn'-îsh-ĕr rî'-tĕr) Ger.

Literally, a Spanish sieve. Tones produced by wind leakage in an organ. The sounds are caused by what in organ phraseology is termed running. Wind is admitted to each row or stop of pipes by means of individual grooves or channels. When the parts of the organ have not been fitted carefully, the wind may overflow from one groove to another and cause pipes other than those being played to sound. The same name is applied to tones produced when two pipes are facing each other and the wind issuing from the mouth of one causes the other to sound.

spanisches Kreuz (spăn'-îsh-ĕs kroits)

Spanish cross: the double sharp.

sparta (spăr'-tă) It. n.

Sparte (spăr'-tĕ) Ger. n.

From a root meaning parted, separated, distributed: a partition; a score.

spianato

spartire (spăr-tĕ'-rĕ) It. v.

To separate, distribute, apportion; hence, to write out in score.

Sportiveness; jocularity; ludicrousness.

spasshaftlich (spăs'-hăft-lĭkh) Ger. adv.

Playfully; merrily; jestingly.

spatium (spă'-shĭ-ŭm) Lat. n.

spazio (spă'-tsĭ-ô) It. n.

A space.

species

1. The subdivisions under the genera, or kinds of music recognized by the ancients.

2. The five forms of counterpoint, or combined melodies. Usually some simple melody is taken as a base and others agreeing in harmony are added. (a) In this development, if for one note of the given melody there is only one note equal in time value of the new melody, it is called note against note. (b) If against one note of the original we place two of half value in the added melody, we have two against one. (c) Four notes are placed against one of the original, called four against one. (d) The new melody shows syncopation; the note of weak stress is tied to one of strong stress, giving the accent to the weak, called syncopated counterpoint. (e) If two, three and four are combined in one setting, the counterpoint is called florid.

Sperrventil (spĕr'-fĕn-tĭl) Ger. n.

A draw stop on old German organs which operated a shutter situated within the wind trunk, so that it admitted or shut off the wind supply of certain stops.

spezzato (spĕts-să'-tô) It. adj.

Broken; divided.

spianar la voce (spĭ-ă-năr' lâ vō'-chĕ) It.

Keep the voice smooth.

spianato (spĭ-ă-nă'-tô) It. adj.

Expression.

spring

A cheerful tune in fast time, doubtless of Scotch origin, now obsolete.

springing bow

In playing the violin and other stringed instruments, a style of bowing in which the bow is dropped on the strings and rebounds between tones. There are two distinct effects thus produced; when played from a loose wrist with short, oscillating rebounds, the string being touched by the bow at the point near the middle of the latter, the effect is called *spiccato*; when the fall and rebound of the bow is from a greater distance, a method used in playing several equal notes of medium length, the effect is called *saltato*, meaning leaped or jumped.

Spruchgessang (sprook' - gë - zäng') Ger. n.

An anthem.

Sprung (sproongk) Ger. n.

A skip; a leap.

sprungweise (sproongk' - vī - zë) Ger. adj.

Skipwise; progressing by skips.

Stabat Mater Dolorosa (stā'-bät mä'-tūr dō-lō-rō'-sä or stā'-bät mä'-tër dō-lō-rō'-sä)

The grieving Mother stood: this is the sequence or hymn sung on the feasts of Our Lady of Sorrows, Friday, of Passion week, and the third Sunday of September. It is the plaint of the Virgin Mary over the agony and crucifixion of Christ. It is also sung as a processional between the stations of the Way of the Cross. A number of composers have set the words to music, the best known settings being those by Palestrina, Pergolesi and Rossini.

stabile (stā'-bī-lë) It. adj.

Stable; firm; steady.

staccare (stäk-kä'-rë) It. v.

To detach, to play *staccato*: it consists in raising the hand from the keys immediately after striking by a rapid action of the wrist or elbow, or in passage of single notes in hurriedly taking away the finger.

staccatissimo (stäk-kä-tīs'-sī-mō) It. adj.

Extremely detached or cut very short.

staccato (stäk-kä'-tō) It. adj.

Detached; played in a manner which separates notes from each other, leaving short intervals of silence between. There are various degrees of *staccato*. Abbr. *stacc.*

staccato marks

Dots or dashes placed over or under notes which are to be played short and detached. The dashes denote an extremely sharp *staccato*.

staccato touch

staccato touch

In piano playing, a quick rebound of the hand or finger from the key, after striking the note or chord marked with the staccato sign. On the violin, a very short variety of staccato, called pizzicato, is produced by plucking the strings with the fingers.

Stadtmusikus (shtät'-moo'-zē-koos)

Ger. n.

A town musician; a musician receiving a salary from a municipality for certain official duties.

staff

The five lines on or between which the notes are written, to indicate their pitch. When the range of notes extends beyond the number which can be placed on or between the five lines, the staff may be increased by leger or added lines. These added lines are only the length of a note and may be used above or below the staff. The staff is a development from the early medieval neumes which were dots, dashes or compound marks, placed over or under the syllables to indicate the rising and falling of the voice. About the year 900, a red line was added to indicate the pitch of one tone. All signs placed directly upon this line were understood to represent f, and those immediately above and below the red line, g and e, respectively. Next a yellow line, signifying c, was added, the pitch of d and b being designated by their relative position to c. Later the notes f and g were placed on their respective lines and the colors were no longer used. In the Eleventh Century two black lines were added, designating e and a, one above the yellow line and one between the red and yellow lines. A fifth line was added about the time of Guido and a staff similar to the one now in use was written, although the number of lines which it contained varied for some time.

staff, bass

The staff marked with the base or F clef  or 

staff notation

The staff and the system of musical characters belonging to it; opposed to alphabetical notation.

staff, octave

Standhaftigkeit (shtänt'-häf'-tikh-kīt) Ger. n.

Firmness; stability; steadiness.

stanghetta (stän-gět'-tä) It. n.

A bar; the vertical line drawn across the staff to mark the division into measures. See also bar.

staple

In all instruments of the oboe class the staple is the metal tube, one end of which holds the double reed and carries the vibrations of the reed to the column of air within the instrument.

Star Spangled Banner

Francis Scott Key, a young lawyer in Baltimore during the war of 1812, was seeking the release of a friend detained as prisoner on one of the English vessels engaged in the bombardment of Fort McHenry. On the afternoon of September 13, 1814, he rowed out to the ship, succeeded in his mission, and the two men were about to return when they were prevented by the danger of the bombardment. Thus held on the enemy's side throughout the night, they anxiously watched the American flag waving above the Fort. During that night Key wrote the first verse of the Star Spangled Banner, and completed it shortly afterward. It was published in the Baltimore American, September 21, 1814. The author adapted it to the air of an English lyric beginning "To Anacreon in Heaven," which had been frequently used as a tune for other American patriotic songs. It at once became very popular, though it is not suitable as a national hymn, owing to its great range, an octave and a half, which makes it difficult for ordinary voices. Notwithstanding this disqualification the patriotic sentiment expressed by its words and the associations grouped around it have so endeared the song to every American heart that it is in truth the national air of

stem

our country, and is always played in the United States navy at morning colors. The stanza beginning "When our land is illumined with Liberty's smile" was added by Oliver Wendell Holmes at the opening of the Civil War.

stark (shtärk) Ger. adj.

stärker (shtēr'-kēr) Ger. adj.

Louder; comparative degree of stark.

stat (stät) Lat. v.

It stands; as it stands: to be played as written.

stave

Old name for the staff. Staves of from three to six lines have been found in medieval music, and some compositions were written on eight lines.

stave, grand

The staff of eleven lines, from which the present treble and bass staves of five lines each are said to have been developed, the middle line of the eleven, being represented by the short added line above the bass and below the treble, on which middle C is written. See also grand stave.

steam organ

See Calliope.

stecca (stěk'-kä) It. n.

A faulty tone in singing, giving a strained effect, caused by undue pressure of the root of the tongue on the back of the throat.

Stecher (shtěkh'-ěr) Ger. n.

See sticker.

Steg (stākh) Ger. n.

The bridge of any instrument. See also bridge.

Stellung (shtěl'-loongk) Ger. n.

Position; arrangement.

stem

The vertical line drawn upward or downward from a note head; also called tail. When the note lies below the middle line of the staff, the stem is usually turned upward; when it lies above, the stem is turned downward; when the middle line, either upward or downward. When two parts are written on the same line, the stems of the upper part are turned up, and those of the lower part down. In four-part music on two staves the stems of the notes for soprano and tenor, are turned up, those for alto and bass down.

Stöckchen (shtĕk'-khĕn) Ger. n.

That part of the violin called the heel. See also heel.

Stockfagott (shtōk'-fä-gōt) Ger. n.

The name given a family of wood

Stockfagott

wind instruments, similar to the bassoon. The rackets had a weak tone on account of its many curves, but Denner improved it by reducing the number of curves, giving it the name Rackettfagott. It has long been obsolete, as have also the organ stops of eight or sixteen-foot pitch, resembling in tone the wind instrument for which they were named.

Stockflöte (shtôk'-flā-tě) Ger. n.

A flute which is made from a walking stick, hollowed out and fitted with a mouthpiece.

Stollen (shtôl'-lěn) Ger. n.

Plural of stolle, a strophe, or group of lines in poetry equivalent to the modern stanza. The two stollen in the songs of the German Meistersingers corresponded to the strophe and anti-strophe of Greek poetry.

stolz (shtôlts) Ger. adj.

Proud; stately; magnificent in style or manner.

stonante (stō-nān'-tě) It. adj.

Out of tune; discordant.

stone-harmonica

An instrument consisting of a graduated series of rock slabs. Each slab is of such a size as to give forth a certain tone of the musical scale when struck with a hammer. They are arranged in the proper ascending order.

stop n. and v.

(n.) 1. A group or set of pipes in the organ, so made as to produce tones of similar quality.

2. The frets on the violin and other stringed instruments, or the position which such frets would naturally occupy on any unfretted instrument. See also frets.

(v.) 1. To vary the pitch of the stringed instruments by pressing the finger against the string and so controlling its vibrating length.

2. On wind instruments, the closing of a side hole either with the finger or a key.

3. The inserting of the hand in the bell of a horn or trumpet to decrease the length of the vibrating column of air and consequently to increase the pitch of the tones produced.

stop, bassoon

A group of pipes on the organ furnished with reeds so constructed as to give a tone similar to that of a bassoon.

stop, clarion

A group of pipes in the organ,

stop, foundation

which are fitted with a reed fashioned in such a manner as to produce a brilliant, piercing tone.

stop, compound

In an organ, three or more stops so arranged that by pressing one key, they all sound at once. See also mixture.

stop, cornet

1. A group of pipes in the organ which produce a loud, blatant tone. They are arranged with from three to five to each key.

2. In the old German organ the cornet stop was connected with the pedals. The tone was snarling.

stop, cremona (krě-mō'-nä)

A corruption of the German name **Krummhorn**, and in reality a clarinet stop.

stop, double diapason

The term double signifies an octave below, consequently those foundation organ stops giving the typical organ tone which have as their lowest tone the third C below middle C, an octave lower than the ordinary diapason. If the stops are connected with the pedal keyboard the lowest tone is from octaves below middle C, the lowest pitch of the organ, or in fact, of any musical instrument, and an octave below the ordinary diapasons connected with the pedals.

stop, dulciana

In the organ, a group of narrow metal pipes producing a sharp, thin tone.

stop, fagotto

An organ stop composed of pipes which give a tone similar to that of the bassoon.

stop, fifteenth

In the organ, a group of pipes having a pitch fifteen degrees, or two octaves, above the diapason; an organ stop composed of pipes having a pitch the interval of a fifteenth, or two octaves, above the corresponding keys of the keyboard.

stop, flute

In the organ, a group of metal or wooden pipes capable of producing a clear, sweet tone greatly resembling that of the orchestral flute.

stop, foundation

Any group of pipes in the organ giving tones which exactly correspond with the ordinary pitch of the keys which sound them, or are an octave higher.

stop, hautboy**stop, hautboy**

A group of pipes in the organ fitted with reeds and producing a tone similar to that of the oboe.

stop-knob

See draw stop.

stop, larigot or octave twelfth (lär-ÿ-gō)

A group of pipes in the organ capable of giving a very shrill tone. They are pitched the interval of an octave plus a twelfth, or nineteen degrees above the ordinary pitch of the corresponding keys of the keyboard.

stop, mixture

Any group of pipes in the organ in which two or more pipes are sounded by one key.

stop, mutation

Any group of pipes in an organ which are tuned to produce the interval of a third or a fifth, and their octaves, above the normal pitch of the key which sounds the pipes.

stop, nazard

See stop, twelfth.

stop, octave

See octave stop.

stop, octave trumpet

An organ stop whose pipes produce tones like those of a trumpet, and whose lowest tone is the second C below middle C.

stop, open

An organ stop whose pipes are open at the top.

stop, open diapason

A group of metal pipes open at both ends and commanding the entire compass of the keyboard to which they belong. Their tone is bright, full and sonorous.

stop, open unison

See open diapason stop.

stop, ophicleide

An organ stop producing a tone like the ophicleide, powerful but harsh.

stop, organ

See organ stop.

stop, percussion

In a reed organ, a stop-knob controlling a device which strikes a reed sharply and at the very instant it is sounded, causing it to vibrate promptly and with unusual force.

stop, reed

Any stop in the organ which comprises only pipes fitted with reeds, that is, thin strips of brass which vibrate and produce the sound.

stop, salicional

An organ stop composed of nar-

stopfen

row metal pipes open at both ends. It has a delicate, reedy tone, resembling that produced by a bird called the willow pipe or willow wren, very abundant during the summer in the woods of the British Isles.

stop, sesquialtera

A group of pipes in the organ comprising from two to five to every key on the keyboard. They are tuned at various pitches, and give tones the interval of a fifth or the interval of a third or their octaves above the normal pitch of the keys which sound them.

stop, solo

Any group of pipes in the organ which are designed for producing characteristic or solo effects. This name is not limited to stops in the solo organ. See also solo organ.

stop, tierce

A group of pipes in the organ tuned the interval of a third plus two octaves above the normal pitch of the keys which sound them.

stop, treble forte

A draw stop applied to the melodeon or reed organ by means of which the resonance of a treble part of the instrument may be increased while the bass remains normal.

stop, tremolo

See tremolo stop.

stop, trumpet

A group of pipes in the organ fitted with reeds and producing a tone greatly resembling that of the trumpet.

stop, twelfth

A group of metal pipes tuned the interval of a twelfth above the ordinary pitch of the corresponding keyboard.

stop, twelfth octave

An organ stop, each of whose pipes produces a tone the interval of an octave and a twelfth, or two octaves and a fifth, above the ordinary pitch of the corresponding key of the keyboard.

stop, vox-humana (vöks-hū-mä'-nä)

Lat.

Literally, human voice: a group of pipes in the organ which are fitted with reeds and produce a tone resembling the human voice.

stopfen (shtëp'-fën) Ger. v.

To stop; to fill or stuff: hence, to modify the vibrating tone of a brass instrument, as the horn or trumpet, by inserting the hand in the bell.

streichen**streichen** (shtrīkh'-ĕn) Ger. v.

1. To strike; to stroke; to rub.

2. To strike out; cancel; expunge.

Used in two corresponding senses: (a) to draw the bow; (b) to cut, as a scene in opera.

streichend (shtrīkh'-ĕnt) Ger. adj.

Drawing, as with a bow: making a sound as of the string of a violin under the bow. A term applied to the quality of tone of an organ stop known as string tone; as distinguished from reed tone or flute tone.

Streicher (shtrīkh'-ĕr) Ger. n.

Literally, one who strokes: a player on a violin or other bow instrument.

Streichinstrumente (shtrīkh'-ĭn-shtroo-mĕn'-tĕ) Ger. n.

Instruments played with the bow.

Abbr. Str.

Streichorchester (shtrīkh'-ôr-kĕs'-tär) Ger. n.

String orchestra; an orchestra consisting of stringed instruments only.

Streichquartett (shtrīkh'-kwär-tĕt') Ger. n.

String quartet; an organization of four players on stringed instruments, or a composition for such a group.

Streichzither (shtrīkh'-tsīt'-ĕr) Ger. n.

A zither played with a bow. The resonance box is heart-shaped and the strings are four in number and tuned like those of the violin. The tone is very weak, owing to the peculiar shape of the resonance box.

strene

A breve or note double the value of our modern whole note. The term was first used by Marbecke, and is conjectured to have been derived from stretch or strain, because of its length, and the possibility of prolonging it in recitation or chanting; or, from its being constrained between two short vertical lines.

streng (shtrĕng) Ger. adj. or adv.

1. (adj) Strict; rigid; exact.

2. (adv.) Strictly; rigidly; exactly; as streng gebunden, strictly legato, that is, strictly bound or tied.

strepito (strä'-pĭ-tō) It. n.

Noise.

strepitosamente (strä-pĭ-tō-sä-mĕn'-tĕ) It. adv.

Noisily; boisterously.

strepitoso (strä-pĭ-tō'-sō) It. adj.

Noisy; loud; boisterous.

stretch

1. In playing the piano, violin, or other instruments having a keyboard or finger-board, a wide interval whose

striking reed

tones are to be played by different fingers of the same hand at the same time.

2. The capacity of the hand for extension in playing; as, a stretch of an octave, a stretch of a tenth.

strette (strĕt) Fr. n.

Literally, compressed or narrowed down.

1. The closing development of a fugue which is rendered more effective by causing the answer to follow the subject in such close succession that they overlap.

2. The closing passage of an opera which is usually written in a faster time, in order to enhance the effect. See also stretto.

Stretto (strĕt'-tō) It. n.

Literally, a narrow place; a strait; stress; contraction.

1. A final passage, coda or finale, taken in quicker time than the preceding movements, and thus producing the effect of a climax.

2. That portion of a fugue, usually the final divisions or development, in which the subject and answer are brought so closely together as to overlap.

Strich (strīkh) Ger. n.

Stroke; manner of playing with a bow.

Strichart (shtrīkh'-ärt) Ger. n.

The method of bowing a certain passage, including the signs indicating the desired mode of performance.

strict composition

Composition that adhere rigidly to the rules governing harmony.

strict fugue

A fugue in strict accordance with the fugal form.

strict inversion

Inversion in which the notes that in the subject ascended, are made to descend in the answer, and vice versa, but requiring that whole tones be answered by whole tones and half tones by half tones.

strident (strĕ-dāñ) Fr. adj.**stridente** (strĕ-dĕn'-tĕ) It. adj.**stridevole** (strĕ-dā'-vō-lĕ) It. adj.

Shrill; shrieking; harsh; strident.

striking reed

Any thin strip of wood or metal which in vibrating strikes against some other substance, thus producing the sound. Striking reeds are single or double. When single, the reed is fitted into an aperture slightly larger than itself. A current of air directed

striking reed

against it, in attempting to pass, forces the reed against the sides of the aperture. If double, the two reeds are caused to beat against each other. More commonly known as beating reed.

strimpellate (strēm-pěl-lä'-tä) It. n.

A scraping, harsh sound, coming from a musical instrument when badly played.

string

A sonorous chord made of various materials, according to the use to which it is to be put. For violins whose tones should be of a rich quality, the strings are made of gut; for pianos, whose tone is more metallic, they are made of cast steel; when an especially deep tone is required, greater weight in proportion to the string's length is procured by covering a core of other metal with silver; for the guitar and zither, whose tones are especially dreamy, silk is used as a core and covered with a metal. Abbr. str.

string gauge

An instrument used in measuring the thickness of strings.

string, open

A string that is not stopped or shortened by the finger or a mechanical stop, but is allowed to vibrate throughout its full length.

string organ

See Saitenorgel.

string pendulum

See metronome.

string quartet

1. A group of four instruments of the violin species, including first and second violin, viola and cello; also the performers on such a group.

2. A composition for the above group of instruments.

3. All the first and second violins, violas and violoncellos of an orchestra; or, all the stringed instruments played with a bow in the orchestra, considered as the violins, violas, cellos and double-basses.

string quintet

1. A group of five instruments of the violin species, or the performers on same; consisting usually of: (a) two violins, two violas and cello; (b) two violins, one viola, two cellos; or (c) two violins, viola, cello and double-bass; other combinations of course being possible.

2. A composition for such a group of instruments.

strombettiére

3. The body of stringed instruments in the orchestra considered as a five part group; (a) first violin; (b) second violins; (c) violas; (d) cellos; (e) double-basses.

stringed instruments

All musical instruments whose sounds proceed from strings set in vibration. They are usually classified according to the manner in which this is done, and may be divided in general into three classes:

(a) Plucked strings, those in which the strings are plucked by the fingers or a plectrum, or struck with hammers held in the fingers;

(b) Bowed strings, those played with a bow;

(c) Struck strings, those which are played from a keyboard by the fingers. Abbr. str.

stringed orchestra

See orchestra, full.

stringendo (strěn-jěn'-dō) It. adj.

Literally, binding together; hastening or accelerating the time, usually with an accompanying increase in power of tone. Equivalent to a sudden accelerando. Abbr. string.

stringere (strěn'-jě-rě) It. v.

To bind together, to draw close; to quicken, to accelerate.

strisciando (strě-shī-än'-dō) It. adj.

Metal instrument.

stromento di rinforzo (strō-mĕn'-tō dē rĭn-fōr'-tsō) It.

Instrument for re-inforcement; an instrument used to strengthen or support a particular effect.

stromento di vento (strō-mĕn'-tō dē vĕn'-tō) It.

Instrument for wind; wind instrument.

strophe (strō'-fē) Grk. n.

Literally, a turning: in ancient Greek drama, that part of the song of the chorus which was sung while they turned from right to left; while the following part, or antistrophe, was sung while they turned back in the opposite direction, from left to right. In this way these terms came to be applied to poetry alone; strophe and antistrophe becoming the names of a first and a second group of lines having a definite metrical design, either one of which would correspond to the modern stanza. The epode,

Sturmdrommete

after-song, was a stanza which followed the antistrophe, the entire group of stanzas, forming in poetical nomenclature, an ode.

strumento (stroo-mĕn'-tō) It. n.

An instrument. Synonym of stromento.

Stubenorgel (shtoo'-bĕn-ōr-gĕl) Ger. n.

A chamber organ, that is, an organ small enough to be placed within an ordinary room in a house.

Stückchen (shtük-khĕn) Ger. n.

A little piece, as of music.

study

A composition written for the purpose of the student's accomplishing some special result in practise; either the mastery of some technical difficulty, or the attainment of some particular point in musical style or interpretation. A study has been defined as an exercise for practise, but is a broader term implying usually a more extended composition than a simple exercise. In its more complicated forms it is used for public performance. See *étude*, *étude de concert*.

Stufe der Tonleiter (shtoo'-fē dĕr tōn'-lĭt-ĕr) Ger.

A degree of the scale.

stufenweise (shtoo'-fĕn-vĭ-zĕ) Ger. adj.

Stepwise; progressing by steps or degrees.

stumm (shtoom) Ger. adj.

Dumb; mute: applied to mechanical devices or instruments for practice that give forth no tone when one would naturally be expected; as, *stummes klavier*, dumb piano; *stumme pfeife*, dummy pipe.

Stummregister (shtoom'-rā-jĕs'-tĕr) Ger. n.

A mechanical stop; a stop-knob governing some part of the mechanism of an organ, such as a coupler, or bellows-signal, but not acting on any rank of pipes.

Sturmdrommete (shtoorm'-drōm'-mĕ-tĕ) Ger. n.

Literally, violent trumpet, that is, a trumpet used in giving alarms. *Drommete* is the poetical form of *trompete*.

subitamente

subitamente (soo - bĭ - tä-mĕn'-tĕ) It. adv.

Suddenly; instantaneously; at once.

subito (soo'-bĭ-tō) It. adj.

Sudden; instantaneous; immediate.

Abbr. S., s.

subject

A phrase of a melody or a theme which is the foundation of a composition or a part of a composition, and upon which hinges a development. In fugue it is usually followed by an answer, second subject, or counter-subject.

subject, counter

In fugue the subject or principal theme is sung by the first voice, and then taken up by the second as an answer, while the first voice becomes occupied with another theme which serves as an accompaniment to the answer and is called the counter subject.

subject, principal

See principal subject.

submediant

The under mediant, or third tone of the scale below the keynote, or the sixth degree of the scale counting upward in the regular manner. The third tone above the keynote is called the mediant, the third tone below the sub or under mediant. It is so called because it lies midway between the keynote or tonic and the fifth tone called the dominant. The sixth tone above the keynote is three tones below the octave of the keynote.

suboctave-coupler

A mechanism which connects the keys the interval of an octave lower in pitch with those which are to be played, so that the corresponding keys are depressed simultaneously, and a complex tone is produced. The coupled keys may belong to the same keyboard or to some other.

subordinate chords

Attendant chords; chords neither fundamental nor characteristic; all three-tone chords or triads based on the second, third, sixth and seventh degrees of a scale, and all four-tone chords, or chords of the seventh, except the dominant chord, and that on the fifth degree of the scale.

subprincipal

A stop in the organ consisting of pipes open at both ends. Their pitch is very low and the stop connects with the pedals.

succession, conjunct

subsemifusa (sub-sĕm-ĭ-fū'-sä) Lat. n.

The medieval name for the demi-semiquaver, or thirty-second note.

subsemitone (sŭb-sĕm-ĭ-tōn) Lat. n.

subsemitonium modi (sŭb-sĕm-ĭ-tō'-nĭ-ŭm mō'-dĭ) Lat.

Literally, under semitone: the subtonic, or leading tone, which lies a semitone below the tonic, or keynote.

subsidiary notes

Accessory notes: those representing tones supplemental or subordinate to the principal tones. See also accessory notes and auxiliary notes.

substitution

In composing music in several parts, especially in counterpoint, instead of using a note which is instrumental in changing a dissonant to a consonant chord, or in preparing for a dissonant chord, a note either an octave higher or lower is used, occurring in some other part than the one where it would naturally be expected. See also resolution.

substitution (sŭb-stĭ-tŭs-yōñ) Fr. n.

In piano or organ playing, the change from one finger to another while holding the key first struck.

subtonic

The note immediately below the tonic or keynote; it is the seventh degree of the scale, and is commonly termed the leading note, or leading tone, because it leads into the keynote, the latter being the tone the ear naturally expects after hearing the subtonic.

succentor (sŭk-sĕn'-tōr) Lat. n.

1. Assistant cantor. See also subcantor and subchanter.

2. Undersinger or singer below: the singer of a lower or bass part.

succession

1. A progression: the order in which the notes of a melody succeed each other, or progress. In this sense a regular, or conjunct, succession, is one in which the notes follow each other in the order of the scale to which they belong; a disjunct succession is one in which the notes follow each other at intervals larger than a second.

2. This term is also applied to a sequence, or repetition of similar chords, or of melodic figures. See also sequence.

succession, conjunct

A progression of tones proceeding upward or downward through the consecutive degrees of the scale.

succession, disjunct

succession, disjunct

A progression of tones proceeding upward or downward through other than the consecutive degrees of the scale.

sudden modulation

A sudden change from one key to another remote from the first one, without using intermediate chords in more nearly related keys to prepare the ear for the transition. Also called abrupt modulation and formerly, digressive modulation.

suite (swēt) Fr. n.

A form of musical composition which probably originated during the latter part of the Middle Ages in a custom of town bands of stringing together a series of dance tunes which had no bond of similarity except that they were in the same key. The practise was adopted more seriously, and composers of the Seventeenth Century began to create after this fashion, calling their compositions *partie* or *partita*. The early suites contained four principal divisions: the *allemande*, the *courante*, the *saraband* and the *gigue*. Between the last two there were often interpolated others called thereby *intermezzi*. Among these were the *bourrée*, the *branle*, the *gavotte*, the *minuet*, the *musette*, the

suo loco

passepied, the *loure* and the *pavane*. The form has been extended until the various movements need not be in the same key and other than dance forms may be used. The *suite* is a favorite for orchestral compositions.

suite de pièces (swēt dü pē-ēs') Fr. n.

Literally, a series of pieces, hence the *suite*.

suivez (swē-vā') Fr. v.

syllabic

lables: said of a melody each tone of which is sung to a separate syllable, in contradistinction to a slurred melody, or one in which one tone may cover several syllables.

syllable names

Certain syllables denoting various tones of the scale: such as do, re, mi, used instead of the letter names, C, D, E. See also solmisation and Tonic Sol-fa.

syllables, fixed

The syllable names of notes as used in what is known as the fixed do system, in which each syllable represents a certain note, no matter in what key the music is written. See also do.

syllables, Guidonian

The syllables ut, re, mi, fa, sol, la, used to represent the different tones in a medieval system of musical nomenclature, used before the modern scale. In Guido's system instead of the scale of eight tones, the unit in grouping tones was the hexachord, or group of six tones, to which the six syllables above named were given. Also called the Aretinian syllables, both names being derived from the name of the supposed author of the system, Guido D'Arezzo, or Aretinus, the Latin name.

symbal

An obsolete spelling of the word cymbal.

sympathetic strings

Very flexible strings which instead of being struck, plucked or bowed, are so arranged that the vibrations of the other strings, or any resonant bodies, cause them to vibrate. They reinforce the original sounds.

symphoneta (sĭm-fō-nē'-tā) Lat. n.

Polyphony, or music in many parts.

symphonia (sĭm-fō'-nĭ-ä) Grk. n.

1. Consonance, agreement in sound; a consonance, or consonant chord, a chord in itself pleasing to the ear.

2. An ancient instrument of percussion formed of a hollow piece of wood cylindrical in shape, and having leather stretched over each end. It was beaten with sticks.

3. In medieval times applied indefinitely to several different instruments including the bagpipe, the virginal and the hurdy-gurdy.

4. A composition for several voices or instruments, or for both voices and instruments.

symphony**symphonic poem**

A composition for the orchestra which in its length and musical importance resembles the symphony, but which does not follow any orthodox form. It is descriptive and narrative in character and is a musical counterpart of literary word poem.

Symphonie Ode (zēm-fō-nē' ō'-dē) Ger.

Choral symphony, that is, a combination of orchestra and chorus.

Symphonienseser (zēm-fō-nĭ-ĕn-zā'-zēr) Ger. n.

Symphonist. See also symphonist.

Symphoniker (zēm-fō'-nĕk-ĕr) Ger. n.

Symphonist. See also symphonist.

symphonion

1. A piano placed in the same case with a set of pipes like those contained in the flute stop of the organ. The pipes may be sounded in combination with the strings, wind being supplied from a windchest filled with treadles operated by the feet of the performer.

2. An improved Swiss music box. It consists of a series of metallic teeth of graduated length, each one producing an individual tone. A flat disc, also of metal, revolves above it by means of clock work. In the disc are perforations made in such a manner, that a tongue protrudes from each hole. As the disc revolves, these tongues set into operation a mechanism which put into vibration the teeth, thus producing tones. The disks are interchangeable, so that the repertory of the instrument is rather extensive.

Symphonische Dichtung (zēm-fō'-nĭsh-ĕ dĭkh'-toongk) Ger. n.

See symphonic poem.

symphonist Eng. n.

symphoniste (săn-fō-nĕst) Fr. n.

A composer of symphonies: specifically in France, a composer of church music; also a member of an orchestra. Equivalent to *Symphonienseser* and *Symphoniker* (Ger.).

symphony

The highest form of instrumental music, much resembling a sonata except that it is written for an orchestra. It consists of three or more movements. The usual form is: (a) allegro; (b) largo, adagio or andante; (c) scherzo, or minuet and trio; (d) allegro. Haydn brought the symphony to its classic form, but further

symphony

development is due to Mozart, Beethoven, Mendelssohn, Schumann, Brahms and others.

2. A name formerly applied to an overture.

3. A ritornello or an instrumental introduction; intermediate or concluding part of a song or other vocal selection.

4. In medieval music a name applied to a hurdy-gurdy, a bagpipe or a virginal. Abbr. sym.

symposia, (sĭm-pō'-zĭ-ä) Grk. n.

A term applied to convivial songs, such as rondos and glees. It is evidently taken from the Greek word symposium, a feast, or more particularly, the social and intellectual side of a feast, which might be said to correspond to the modern toasts, and after-dinner speeches.

synaphe (sĭn'-ä-fē) Grk. n.

In ancient Greek music, the conjunction, or overlapping, of two tetrachords, groups of four tones each, in which the lowest note of the upper tetrachord was also the highest note of the lower tetrachord.

synapte (sĭn-äp'-tē) Grk. n.

Litany: a form of responsive prayer in the Oriental or Greek church corresponding to the litany of the western churches, Roman Catholic and Anglican. It is the deacon's litany recited at the beginning of the liturgy in the Greek Church; the deacon sings the petition and the choir or congregation responds, as, Deacon: In peace let us pray of the Lord. Choir or people: Kyrie eleison: Lord, have mercy.

synaulia (sĭ-naw'-lĭ-ä) Grk. n.

From aulos, a flute: a concert of flute music in which several instruments played alternately, but not together.

syncopate

To give an irregular accent to a note by beginning it on an unaccented part of the measure, and carrying the tone over into an accented part of the measure.

syncopated notes

When a natural accent or strong beat is suppressed or moved to an unaccented or weak beat, which is generally done by tying a note on a weak beat across the time of the strong beat immediately following, the note that is prolonged is said to be syncopated. The change of rhythm so affected is agreeably confusing.

syrinx

syncopatio (sing-kō-pä'-shĭ-ō) Lat. n.
syncopation Eng.

The suppressing of the natural accent on the strong beat of a measure and giving it to the weak beat which would naturally be unaccented.

The natural accent would fall on the first note after the bar.

syncopato (sĭn-kō-pä'-tō) It. adj.

Literally, cut off, contracted, syncopated: that is, when the time value of a note is shortened by the following notes occurring before the beat is finished on which the first note began.

synemmenon (sĭ-nēm'-ĕ-nōn) Grk. n.

The tetrachord, group of four tones, found in the middle of the Greek scale, and composed of the following tones: d', c', bb, a. It was a conjunct tetrachord because it overlapped the others.

synkopieren (zĕn-kō-pē'-rĕn) Ger. v.

To syncopate; to make an irregular accent by syncopation.

synonyme (sĕ-nō-nēm') Fr. n.

A homophone, or musical synonym; a letter or character, or combination of same, denoting the same tone as another; for instance, D sharp is a synonyme of E flat.

syntolydian (sĭn-tō-lĭd'-ĭ-än) Grk. n.

See Hypolydian mode.

syntonic

A term applied to the comma, which word expresses a mathematical ratio in musical acoustics. The syntonic comma was an interval corresponding to the difference between a greater and a lesser whole tone, expressed in figures as the ratio 80:81.

syren

An obsolete spelling of siren.

syringe (sĕ-ränzh) Fr. n.

syrinx (sĭr'-ĭngks) Grk. n.

The name syrinx was used by the Greeks interchangeably with Pan's pipes because of the mythological story of Pan's love for the beautiful nymph, Syrinx. While being pursued by him she came to the brink of a stream, where she called upon the gods for help, and in answer was turned into a reed growing along the bank. Pan heard the wind blowing among the reeds, and it suggested

syrinx

to him the possibility of the flute. Straightway he cut a reed and played upon it. See also Pan's pipes.

system Eng. n.

System (zēs'-tām) Ger. n.

1. English term, a group of staves connected with a brace, upon which a musical score is to be written. German term also called Liniensystem, line-system, the staff, which is five horizontal, parallel lines upon, between, above and below which the notes are written.

2. A method of calculating the relations of musical sounds, or an order of signs expressing them.

3. In Byzantine music a compound interval, made up of smaller intervals, like the octave, which is composed of five whole tones and two semitones.

4. In medieval and modern music a series of tones arranged and classified for use as in a mode or scale.

5. A code of rules in harmony; a system purporting to explain and reduce to a logical outline the many and various relations of tones.

systema (sīs-tē'-mä) Grk. n.

In the ancient Greek music any wide intervals which could be divided into other intervals, as a tetrachord, which the Greeks divided into three smaller intervals.

2. Used to signify the hexachord or scale containing six tones.

3. This word has been incorporated into the Latin musical vocabularies, where it signifies staff.

shaped and the neck long and narrow. It is strung with several wire strings which are plucked with the fingers.
tambouret (täñ-boo-rā) Fr. n.

See tambourine.

tambourin (täñ-boo-rän) Fr. n.

1. A dance which was sometimes given upon the stage, and which might be accompanied with a song. The measure was two-four and created a lively effect. The accompaniment was usually played upon the tambourine and was characterized by a continuous bass on one tone, either the tonic or dominant, in imitation of the rubbing of a finger upon the head of a tambourine.

2. See tabor and tambourine.

tambourine

A small drum consisting of a hoop over which is stretched a single head of skin. In the hoop are hung metal plates which, when the instrument is shaken, give forth a sound which has brought them the name of jingles. The head is struck by the fingers and emits a dull sound. The tambourine is used in Spain and southern Europe for accompanying dances, and also in the orchestra. In scores for this instrument notes with wavy stems call for a roll produced with the fingers, and notes with little vertical lines, call for jingles.

tambourineur (täñ-boo-rī-nūr) Fr. n.

A drummer or tambourine player.

tamburaccio (tä-m-boo-rät'-chō) It. n.

Tanzstück (tänts'-shtük) Ger. n.

Dance piece; instrumental dance tunes: a general name for all instrumental dance music.

tap

A drum beat of a single note.

tapada (tä-pä'-dä) Spa. n.

See stop.

tapadello (tä-pä'-dhēl'-yō) Spa. n.

See open diapason.

taps

A military signal on drum or trumpet, meaning to extinguish lights and retire for the night.

tarabouk Tur. n.

A typical drum of Turkey, consisting of an earthenware vessel or goblet, over the mouth of which has been stretched a piece of parchment. It is played by striking with the fingers.

tarantella (tä-rän-tël'-lä) It. n.

A southern Italian dance which takes its name from the city of Tarentum, in Apulia. It is fabled variously to cure, and to be the result of the bite of the tarantula. The music is in six-eight time and continually increases in speed with irregular alternations of minor and major. It is danced by a man and woman, or two women who play castanets and tambourines, and formerly it was sung. The old form was in two-four or four-four time. As a form for brilliant solo pieces it has been much used by modern composers, among them being Chopin and Liszt.

tarantellina (tä-rän-tël'-lē'-nä) It. n.

A short tarantella, which is an old Italian dance, said variously to have cured, and to have been the result of the bite of the tarantula: in the latter case the victim danced deliriously until death released him.

Tastenwerk

tarara (tä-rä-rä') Spa. n.

The sound of a trumpet as the signal for action.

tarau Burmah n.

An instrument having a body shaped similarly to that of the violin, but furnished with only three silk strings. A rude bow is used in playing it.

tardando (tär-dän'-dō) It. adv.

tardato (tär-dä'-tō) It. adj.

tardo (tär'-dō) It. adj.

Retarding the time; playing lingeringly; slow in time.

Tartini's tones

A name given to resultant tones because they were first observed by Tartini. See resultant tones.

tascara (tä-s-kä'-rä) Spa. n.

A Spanish dance of great antiquity, danced in southern France since the Middle Ages. Its name was derived from an absurd monster described by Cervantes in his writings.

Taschengeige (täsh'-ën-gi-khë) Ger. n.

Pocket fiddle: a small, three stringed violin formerly used by dancing masters. The strings were tuned c, g, d.

tasseau (tä-s-sō') Fr. n.

temperament

acoustic measurement, the very slight difference between them would require a separate key for each. But by disregarding the theoretic measurement and using the black key between the two white keys D and E as either D sharp or E flat, a simple method of tuning has been devised. The system now used, called equal temperament, is the simplest yet devised. In the old system of unequal temperament, some of the intervals, as the name indicates, were tuned true and others not. This made changing from one key to another much more complicated than at present. Called in French, *temperament* (tän-pā-rä-män); in Italian, *temperamento* (täm-pě-räměn'-tō); and in German, *temperatur* (täm-pě-rä-toor').

tempestosamente (tēm-pēs-tō-sä-měn'-tē) It. adv.

Stormily; furiously: to be rendered impetuously, passionately.

tempestoso (tēm-pēs-tō'-sō) It. adj.

Tempestuous; impassioned; rendered in an impassioned style.

tempête (täñ-pēt) Fr. n.

Storm; tempest: a Parisian dance, somewhat like a quadrille, in which the dancers were in parties of four couples, two couples side by side facing two opposite couples. The step was like the quadrille step, varied sometimes by the gallop introduced in the crossing of couples to each other's places, or advancing to the lines of the next set. This is usually danced to music in two-four time and quick tempo.

tempi dispari (tēm'-pē dēs-pä'-rē) It.

Triple time, or that in which the number of beats in a measure is exactly divisible by three.

tempi pari (tēm'-pē pä'-rē) It.

Duple time, or that in which the number of beats in a measure is exactly divisible by two.

templar (tēm-plär') Spa. v.

To soften, to moderate: to temper or tune an instrument.

tempo (tēm'-pō) It. n.

The Italian word for time, which is used in English to designate the rate of movement in which a piece is played, or more properly the rate of the rhythm, the rapidity with which the natural accents follow one another. There are many gradations of tempo from very slow to very fast. See also *time*. Abbr. t., tem., temp.

tempo-mark

tempo alla breve (tēm'-pō ä'l'-lä brä'-vē) It.

Time of the breve, which equals four whole notes; time in which there are four quarter notes and two accents to the measure, played rather quickly.

tempo alla semibreve (tēm'-pō ä'l'-lä sā-mī-brä'-vē)

Time of the semibreve: time in which there are four quarter notes to the measure and which is played moderately fast.

tempo binario (tēm'-pō bī-nä'-rī-ō) It.

Duple time: time having two beats to the measure.

tempo comodo (tēm'-pō kōm-mō'-dō) It.

Comfortable time; convenient time: in an easy moderate time.

tempo debole (tēm'-pō dā'-bō-lē)

Weak time; weak beat: the unaccented part of a measure.

tempo di ballo (tēm'-pō dē bäl'-lō) It.

Time of the ballo; in dance time; rather quick.

tempo di bolero (tēm'-pō dē) It.; (bō-lä'-rō) Spa.

In the time of a bolero: having the rhythm of a bolero, that is, three quarter notes to the measure, and a lively rate of speed.

tempo di cappella (tēm'-pō dē kăp-pěl'-lä) It.

In church time. The same as tempo alla breve.

tempo di minuetto (tēm'-pō dē mē-noo-ēt'-tō) It.

In the time of the minuet: the present meaning of this term is similar to allegretto, a rather lively time.

tempo forte (tēm'-pō fôr'-tē) It.

Strong time: the accented beat of a measure.

tempo giusto (tēm'-pō joos'-tō) It.

In just, exact time: to be played strictly according to the time indicated.

tempo maggiore (tēm'-pō mäd-jō'-rē) It.

Greater time. The same as tempo alla breve.

tempo-mark

A word or phrase indicating the speed of a movement and thus establishing the time value of its notes. It does not indicate an absolute rate of speed, only the general character of the movement, unless a metronome mark is added for the sake of definiteness. There are three classes of marks, those indicating steady and

tempo-mark

fixed time, those indicating increasing time, and the ones indicating decreasing time.

tempo minore (tĕm'-pō mē-nō'-rĕ) It.

Lesser time: time having four quarter notes and four accents to the measure.

tempo ordinario (tĕm' - pō ôr - dī - nă'-rĭ-ō)

Ordinary time: moderately fast time having four quarter notes to the measure.

tempo perduto (tĕm'-pō pĕr-doo'-tō) It.

Lost time: irregular, unsteady time.

tempo primiero (tĕm'-pō pre-mĭ-ă'-rō)

See **tempo primo**.

tempo primo (tĕm'-pō prĕ'-mō) It.

First time: after a change of tempo a direction meaning to return to the original time in which the piece is written. Abbr. tem. 1°, tempo prim., t. p.

tempo reggiato (tĕm'-pō rā-jă'-tō) It.

The time to be accommodated to that of the solo performer. Equivalent to *colla parte*.

tempo rubato (tĕm'-pō roo-bă'-tō) It.

Robbed or stolen time; irregular time: a slight deviation from the tempo of the piece for purposes of expression, gained by retarding one note and quickening another, so that the time of each measure is not altered on the whole. Applied to a single tone and so relating to the movement of tones in one or two beats; or within the measure as a whole; or to a group of measures within which certain motives or tones are quickened and others retarded.

tempo, senza (tĕm'-pō sĕn'-tsă) It.

Without time: meaning that the time is left to the discretion of the performer. The same as a *piacere*. Abbr. s. t.

tempo ternario (tĕm'-pō tĕr-nă'-rĭ-ō)

Triple time: time in which the number of beats in a measure is divisible by three, as three-eight, six-eight or twelve-eight time.

Tempobezeichnung (tĕm-pō-bĕ-tsiĕh'-noongk) Ger. n.

Time making: the sign that shows the kind of measure.

temporiser (tăñ-pô-r-ĭ-ză) Fr. v.

To delay; to temporize: in playing an accompaniment, to accommodate the time to that taken by the solo performer.

temps (tăñ) Fr. n.

Time; time strike: the time divisions of a measure.

tenebræ

temps faible (tăñ fĕbl) Fr.

Weak time: the weak or unaccented beat or beats of a measure.

temps frappĕ (tăñ frăp-pă') Fr.

Those parts of the measure where the conductor's baton beats a down stroke, hence, the accented parts of the measure.

temps levĕ (tăñ lŭ-vă') Fr.

The up-beats or unaccented parts of a measure.

tempus (tĕm'-pŭs) Lat. n.

Time: in medieval music the second of three divisions of mensurable music. Modus was a division of a maxim, then the longest note used, into longs, equal to half a maxim and the division of longs into breves, equal to half longs. Tempus was the division of breves into semibreves, a semibreve being equivalent in modern music to a whole note.

tempus binarium (tĕm'-pŭs bĭ-nă'-rĭ-ŭm) Lat.

Duple time: time in which the number of beats to the measure is divisible by two.

tempus imperfectum (tĕm'-pŭs ĭm-pŭr-fĕk'-tŭm) Lat.

Imperfect time: one species of time, employed in old mensurable music, in which a breve was equal in value to two semibreves, indicated by  a half circle.

tempus perfectum (tĕm'-pŭs pŭr-fĕk'-tŭm) Lat.

Perfect time: one species of time, in old mensurable music, in which a breve was equal to three semibreves; indicated by a circle. 

tempus ternarium (tĕm'-pŭs tŭr-nă'-rĭ-ŭm) Lat.

Triple time: time in which the number of beats to a measure is divisible by three.

tenebræ (tĕn'-ĕ-brĕ) Lat. n.

Darkness: the name given to the solemn office sung in the Roman Catholic Church on three evenings of Holy Week, Wednesday, Maundy Thursday and Good Friday, being the Matins and Lauds assigned to those days. The name is given from the circumstance of extinguishing, during the course of the ceremony, all the candles in the sanctuary. These rites, as well as all others during this week, symbolize the darkness and gloom attending the crucifixion.

At the beginning of the service, six candles on the altar, and fifteen placed on a standard in triangular arrange-

tenebræ

ment on the epistle, left, side, signify the lights of faith preached by the prophets and Christ; the triangular candlestick is the symbol of the Trinity.

At the repetition of the antiphons, responsive singing, fourteen of the candles arranged in the triangle, are extinguished, and at the last six verses of the Benedictus, which follows, the altar candles are put out, to teach that the Jews were deprived of the light of faith when they put the Saviour to death. The fifteenth candle, at the apex of the triangle, signifying the light of the world, Jesus Christ, is only hidden for a time behind the altar and is brought out again still burning. This is to show that Christ, though he died in his humanity was always alive in his divinity, by which he rose again.

In this darkness which pervades the sanctuary the Miserere, the cry for mercy, is sung with great effect, and the noise which follows represents the confusion of nature at the crucifixion.

tenendo (tĕ-nĕn'-dō) It. v.

To sustain; to hold: as used in the phrase, *tenendo il canto*, sustaining the melody.

teneramente (tā-nĕ-rā-mĕn'-tĕ) It. adv.

Delicately; tenderly: a direction slightly stronger than, but very similar in meaning to the term, *dolce*. It means that the passage so marked should be played delicately and tenderly but warmly withal.

tenerezza (tā-nĕ-rĕt'-tsā) It. n.

Tenderness: as used in the direction *con tenerezza*, to be rendered with tenderness.

tenero (tā'-nĕ-rō) It. adj.

Tender; soft; delicate in treatment.

tenete (tĕ-nā'-tĕ) It. v.

A direction meaning to keep; to hold; to sustain the tone.

teneur (tŭ-nŭr) Fr. n.

In religious music, the fixed melody around which other parts are written.

tenor
1. The name of the highest natural adult male voice next above the barytone, and ranging from C on the second space of the bass clef to C on the second line of the treble staff. This name is also given to some instruments of approximately the same pitch, such as tenor-violin. It comes from the Latin *tenco*, I hold, because in ancient music it held the melody or

Tenorstimme

air, of plain song, then the only real part in composition.

2. The part written for the tenor voice. Abbr. t.

tenor C

1. The lowest C in the tenor voice, one octave below middle C.

2. The lowest string of the violas or tenor violin.

tenor clef

The tenor clef is the C clef placed on the fourth line of the staff, which see.

tenor, second

The lower tenor voice: a voice between tenor and barytone.

tenor staff

A staff marked with the tenor clef.

tenor trombone

The trombone which is used most extensively and is pitched to afford a compass similar to that of the tenor voice.

tenor violin

A violin about a seventh larger than the regular violin and three and a half tones lower in pitch. In pitch it corresponds to the tenor voice and its music is written in the C alto clef. Equivalent to viola.

tenore primo (tā-nō'-rĕ prĕ'-mō) It.

First tenor; the highest tenor voice.

tenore ripieno (tā-nō'-rĕ rĕ-pĕ-ā'-nō) It.

The tenor of a grand chorus.

tenore secondo (tā-nō'-rĕ sā-kōn'-dō) It.

The lower tenor voice: the voice between tenor and barytone.

tenorist (tĕn-ō-rĕst') Ger. n.

One who sings tenor.

tenoroon

One name for the obsolete oboe da caccia and derived from the fact that it was the tenor member of the oboe family. See oboe da caccia.

Tenorposaune (tĕn - ōr - pō - zōw' - nĕ) Ger. n.

The tenor trombone: the trombone of tenor pitch, or middle trombone, having a range of tone from B flat to C above the tenor clef.

Tenorschlüssel (tā-nōr-shlŭs'-sĕl) Ger. n.

The tenor clef; the C clef on the fourth line of the staff. See also tenor clef.

Tenorstimme (tā-nōr-shtĭm'-mĕ) Ger. n.

The tenor voice or part.

terpodion

Within the case a wooden cylinder is made to revolve by a treadle. The keys press down steel wands or bars against the cylinder, thus producing the sounds.

Terpsichore (tŭrp-sĭk'-ō-rē) Grk. n.

Literally, delighting in the dance: in classical mythology the name of the muse of choral dance and the dramatic chorus which was developed from it. During the last days of the Greek religion she was associated more closely with lyric poetry and is represented in art as a graceful figure, draped in flowing robes, usually seated and bearing a lyre.

terpsichorean (tŭrp-sĭ-kō-rē'-än) Grk. adj.

Relating to Terpsichore, the muse of choral dance and song: hence, relating to anything in choral form.

tertia (tŭr'-shĭa) Lat. adj.

Third.

1. The third of the canonical hours, i. e., the seven periods of daily prayers in the Roman Catholic Church.

2. An interval of two tones, four half steps.

3. An organ stop composed of pipes tuned to produce tones the interval of a third, two tones, or a tenth, two tones and an octave higher than the ordinary pitch of the corresponding keys of the keyboard.

tertia modi (tŭr-shĭä mō'-dĭ) Lat.

The third degree of a scale: the degree named mi in the Tonic Sol-fa system.

tertian

An organ stop: it is formed of two rows of pipes and combines a tierce, a stop pitched a seventeenth above the foundation pipes, and a larigot, a stop of extremely shrill register.

Tertianzweifach (tĕr-tsĭ-än-tsvĭ'-fäkh) Ger. n.

Literally, doubled tertian. See also tertian.

Terz (terts) Ger. n.

Third: the interval of a third, that is, two whole tones and one half tone.

terza maggoire (tĕr-tsä mä-d-jō-rĕ) It.

The major third: an interval measured by four half steps.

terza mano (tĕr'-tsä mä'-nō) It.

Literally, third hand: an octave coupler on the organ, that is, a contrivance which connects keys an octave apart and causes them to be depressed simultaneously. The name doubtless comes from the fact that by

Terzquintsexakkord

this means the work of three hands is performed.

terza minore (tĕr'-tsä mĕ-nō'-rĕ) It.

Minor third; an interval measured by three half steps.

terzadecima (tĕr'-tsä-dä'-chĕ-mä) It. n.

A thirteenth: that is, an interval of an octave and a sixth, or an octave plus the fifth tone above or below it, making twelve diatonic degrees, or thirteen tones.

Terzdecimole (tĕrts'-dä-tsi-mō'-lĕ) Ger. n.

A group of thirteen notes to be performed in the time given to eight or twelve.

Terzett (tĕr-tsĕt') Ger. n.

terzetto (tĕr-tsĕt'-tō) It. n.

A short piece for three voices or in a few instances for three instruments. This may mean any combination of three voices, three trebles, three male voices or mixed voices.

Terzia (tĕr'-tsĭ-ä) Ger. n.

1. Third: an interval of two and one-half degrees.

2. An organ stop sounding a third or a tenth, an octave plus two degrees, above the foundation stop.

3. The third canonical hour.

Terznöte (tĕrts-flä-tĕ) Ger. n.

A small flute of the same construction as the ordinary flute used in the orchestra, but pitched the interval of a third higher.

Terzina (tĕr-tsĕ'-nä) It. n.

A triplet: a group of three notes played in the time usually given to two notes of similar value.

terzo (tĕr'-tsō) It. n.

See Terz.

Terzquartakkord (tĕrts-kwärt'-äk-kōrd) Ger. n.

The second inversion of the chord of the dominant seventh. The chord of the dominant seventh is a chord founded on the dominant or fifth note of a scale, plus notes at intervals of a third, a fifth and a seventh, respectively. The second inversion of this chord takes its fifth interval as a bass and adds the notes at intervals of a third, a fourth and a sixth above that fifth or bass.

Terzquartsextakkord (tĕrts-kwärt'-sĕks'-äk-kōrd) Ger. n.

The same as Terzquartakkord.

Terzquintsexakkord (tĕrts'-kwĭnt'-sĕks-äk-kōrd) Ger. n.

The first inversion of the chord of the dominant seventh, that is, a chord beginning on the dominant or fifth

Terzquintsexakkord

note of the scale to which are added notes at intervals of a fifth and a sixth above it.

tessitura (tēs-sī-too'-rā) It. n.

The web, the texture: the position or pitch of the majority of notes of a piece, with relation to the compass of the voice or instrument for which it is written. For example, if the majority of the notes of a violin passage lie on the E string, that passage is said to be high.

Terztöne (tërts'-tä-ně) Ger. n.

Third tones: tones whose pitch are determined by reaching them through skips of two and a half degrees above or below the standard tone, C.

tessiture

Literally, the web: the average pitch of a composition or of a part of it. The idea is that this pitch runs through the piece like a web.

testa (tēs'-tä) It. n.

Head: the upper register of the voice, the tones of which are produced in the head.

testo (tēs'-tō) It. n.

Text: the text, subject or theme of a composition; the libretto of an opera; the words of a song. When the words of a song are well written it is said to have a good testo.

testudo (tēs-tū'-dō) Lat. n.

A name which the Romans gave to the lyre, an instrument whose discovery is based upon a mythological story. The god Mercury is said to have found upon the sand a tortoise shell across which the sinews had been stretched taut by the wind and sun. The word *testudo* alludes to the tortoise shell. See also Mercurian lyre.

tête (tět) Fr. n.

Head.

1. The head of a note.

2. The beautiful curve that terminates the head of the violin.

tetrachord

A scale division of four tones that was used as a unit of measurement in Greek music and plain-song. The tetrachord used in plain-song comprised an interval of a perfect fourth, or two and a half tones. In Greek music the extreme notes were fixed, but the middle ones were varied according to mode.

tetrachordal system

The early form of the Tonic Sol-fa system.

tetracorde (tět-rā-kôrd) Fr. n.

A scale division of four tones that

tetratone

was used as a unit of measurement in Greek music and early plain song. The tetrachord used in plain song comprised an interval of a perfect fourth, or two and a half tones. In Greek music the extreme notes of the tetrachord were fixed, but the middle sounds were varied, according to mode. Equivalent to tetrachord and tetracordo.

tetrachordon

A keyboard instrument similar in appearance to an upright piano. Instead of operating hammers which strike the strings the keys press the strings against a rosined cylinder of India rubber, which is kept in motion by means of treadles. Variety in the volume of tone is obtained only by regulating the pressure of the fingers upon the keys.

tetrachords, conjoint

In Greek music, scale divisions consisting of four tones in which the last note of one tetrachord, is also the first note of the following tetrachord.

tetracordo (tět-rā-kôr'-dō) It. n.

A scale division of four successive notes that was used as a unit of measurement in Greek music and early plain-song. The tetrachord used in plain-song comprised a perfect fourth, or an interval of two and a half tones. In Greek music the extreme notes are fixed, but the middle notes are varied according to mode. Equivalent to tetrachord and tetracorde.

tetrad

A name suggested but not widely adopted, for the chord of the seventh; the chord composed of the first note of a scale plus its third, fifth and seventh, that is, the notes four half steps, seven half steps and eleven half steps above the key note.

tetradiason

The interval of four octaves.

tetrameter (tět-trām'-ē-těr) Eng. adj. and n. from Grk.

A line of poetry consisting of four metrical feet.

tetraphone

An interval embracing three whole tones.

tetraphonia (tět-rā-fō'-nī-ä) Lat. n.

Very early music written in four parts.

tetratone

An interval including three whole tones.

the

the (thä) Grk. n.

One of the four words of the Greek sol-fa system which corresponds to the lychanos or third sound, of their unit of four sounds, called tetrachords.

Theil (tīl) Ger. n.

Part; divisions of a measure; a phrase, strain or component part of a piece; a composition.

Theilton (tīl'-tōn) Ger. n.

Part tone: the simple sounds or overtones which in composition with the fundamental sound form tones.

Thema (tä'-mä) Ger. n.

thema (thē'-mä) Grk. n.

Theme. See also theme.

thematic composition

thematic development

A style of writing counterpoint in which one or more themes first appear in one voice, perhaps the soprano, and are then repeated with or without variations, in the alto, tenor and bass. The themes are the most essential feature.

theme

Often used in the meaning of the general idea of a composition, but strictly, it refers to the extended subject which forms the groundwork of a composition. The several passages which constitute the theme are repeated over and over with variations.

Theorbe (tä'-ôr'-bě) Ger. n.

theórbe (tä-ôrb) Fr. n.

theorbo (thě-ôr'-bō) Eng. n.

An instrument popular during the Seventeenth Century. The body was pear-shaped, and with the extended neck constituted a total length of about four feet. The long neck was fitted with two groups of pegs for fastening the strings. One group was situated near the extreme end of the neck, and the other was nearer the body. The first accommodated longer bass strings, thus affording a much deeper tone for the instrument than if all the strings had been of one length. The increased volume of sound made it an important member of the orchestra. The two groups of pegs gave it the name of double-necked instrument. There were other large varieties having two necks, and all were nothing but enlarged lutes called into existence by the desire for more volume of sound.

Theoretiker (tä-ō-rā'-tī-kěr) Ger. n.

A theorist: one versed in the theoretical side of music.

third inversion

theoricien (tä-ō-rēs-yän) Fr. n.

A theorist; one versed in the theoretical side of music.

theory

The science of music: the principles governing sound and its production, as used in the composition and production of music.

thesis (thě'-sīs) Grk. n.

A putting down: an ancient name for the down beat of baton or hand, which denoted the accented part of a measure.

theurgic hymns

Greek hymns of supposedly Egyptian origin, and the first of which we have any account in Greece. They are songs of incantation, such as those ascribed to Orpheus, and were performed in mysteries on the most solemn occasions.

theyau

See tarau.

thin

An adjective used to describe tones both vocal and instrumental which are lacking in richness and fulness and are of poor quality, also harmony that is meager and scanty.

thiorbo

An instrument extremely popular in the Seventeenth Century. It was a large kind of lute, having a double neck and two sets of tuning pegs, the lower set to hold the strings that lay on the fretted finger-board, and the other to hold the bass strings so that they did not lie against the finger-board but were used as open notes. It was much used to accompany the voice. The same as theorbo.

third

An interval between any tone of a scale and the next but one above or below it; it comprises four half steps.

third, diminished

Is equal to two half steps and is of rare occurrence. It is a half tone less than the minor third.

third flute

A flute that sounds the notes the next but one tone above that in which they are written.

third, greater

The interval of a major third or two whole tones.

third inversion

A term referring only to chords of the seventh, which are chords composed of a root, or fundamental tone, together with its third, four half tones

thrice-marked

thrice-marked

The pitch of certain tones of the scale is designated by a letter under or over which three short lines or marks are placed, as, for instance, $\overset{\equiv}{C}$ or $\underset{\equiv}{c}$. The first indicates that C belongs to the fifth octave below middle C, and the second that c belongs to the third octave above middle C.

through-composed

Some song writers take into consideration that the various stanzas of a song embody distinct ideas, and therefore compose individual accompaniments for each, thus attempting to accentuate the meaning. This style is termed through-composed.

thumb-position

In cello playing, one of the high positions of the left hand, in which the thumb leaves the neck of the instrument.

thumb-string

The melody string on the banjo.

Thürmer (tür'-mër) Ger. n.

Literally, warden of a tower or steeple, but also used to designate a public or town musician, as the warden's duty was to ring the bells of the tower.

Thurmgeläute (toorm'-gě-loi-tě) Ger. n.

1. The set of bells of a tower.

2. The ringing of bells in a tower.

tibia (tīb'-ī-ä) Lat. n.

Literally, shin-bone.

1. A name by which the ancient flute was known, doubtless because the primeval flute is supposed to have been discovered by blowing through the bone of a human leg.

2. A general name given to a number of stops on the organ.

tibiæ (tīb'-ī-ē) Lat. n.

Plural form of tibia.

tibiæ dextræ (tīb'-ī-ē dëks'-trë) Lat.

Right hand flutes; when two flutes were played simultaneously by one performer, the one with which the right hand was employed was termed tibia dextra.

tibiæ impares (tīb'-ī-ē ĩm-pā'-rëz) Lat.

Unequal flutes: a pair of flutes of unequal length and hence of different pitches, played upon by one performer simultaneously. The shorter pipe was held in the right hand and the longer and lower pitched one in the left, the mouthpiece being so arranged that both could be played at the same time.

tierce

tibiæ major (tīb'-ī-ē mä'-jôr) Lat.

An organ-stop composed of pipes covered at the top and producing tones very similar in quality to those of the flute. The lowest pitch is three octaves below middle C.

tibiæ obliqua (tīb'-ī-ē öb'-li-kwä) Lat.

Oblique flutes: the name given to flutes when held transversely and blown through a hole in the side.

tibiæ pares (tīb'-ī-ē pā'-rëz) Lat. n.

Equal flutes: two flutes of the same length, and hence the same pitch, one held in the right hand and one in the left of the performer and having their mouthpieces so arranged that they could be blown simultaneously.

tibiæ utricularis (tīb'-ī-ē ũ'-trik-ũ-lär'-is) Lat.

The name by which the Romans knew the bagpipes. See also bagpipe.

tibiæ vasca (tīb'-ī-ē väs'-kä) Lat. n.

See tibiæ obliqua.

tibicen (tī-bī-sën) Lat. n., fem.

A flute player.

tibicina (tīb-ī-së'-nä) Lat. n., fem.

A female flute player.

tibicinium (tīb-ī-sin'-üm) Lat. n.

A piping.

tie

A curved line placed over two or more notes of the same pitch to indicate that they are to be played as one note equal to their united time value. 

tied-notes

1. Two notes or more, of the same pitch, connected by a curved line are tied, and are played continuously as if but one note, unless the notes are dotted. 

2. Notes, such as eighths or sixteenths, united by one or two heavy strokes instead of having separate tails. 

tier (tëf) Ger. adj.

Deep; low in tone.

Tiefer (të'-fër) Ger. n.

That which makes deeper: deeper, lower, that which makes an octave below.

tiestönend (tëf-tä'-nënt) Ger. adj.

Deep toned.

tier

In the organ a row of pipes containing one pipe to each key of the keyboard.

tierce (tī-ërs) Fr. n.

1. A third.

2. The third canonical hour; a re-

tierce

ligious service which takes place the third hour of the day.

3. An organ stop tuned a seventeenth above the principal foundation stops known as the diapasons.

4. The fourth harmonic of any given tone, that is, the overtone produced by one-fifth of a vibrating string.

tierce coulée (tĭ-ěrs koo'-lă) Fr.

An obsolete sliding grace which moves in intervals of thirds.

When ascending When descending

tierce de Picardie (tĭ-ěrs dü pē-kăr-dē) Fr.

Literally, tierce of Picardy: the interval of a major third, four half steps, introduced in the closing chord of a composition in the minor mode, which has the minor third, three half steps, and minor sixth, eight half steps. The custom is supposed to have originated in Picardy.

tierce stop

A group of pipes in the organ tuned the interval of a third, plus two octaves above the normal pitch of the keys which sound them.

tierce tones

Those tones separated by intervals of a major third, or two whole tones.

tige (tēzh) Fr. n.

Stem; body; stalk: the wooden part of the violin bow. Also a drumstick.

timbalarion

A series of eight drums tuned chromatically; each one is furnished with a pedal operating a stick and making it possible to play some diatonic and chromatic scales and even some chords.

timbale

Kettledrum: a drum consisting of a hemispherical metal shell mounted on three legs and covered with a parchment head. It is beaten with sticks of wood or whalebone having sponge on the heads.

timbalier (tăn-băl-yă) Fr. n.

One who plays the kettledrum.

timballo (tĭm-băl'-lō) It. n.

The same as timbal.

timballone (tĭm-băl-lō'-nē) It. n.

A stop in the organ composed of

time

pipes which produce tones somewhat resembling those of a kettledrum. The stop is connected with the pedals.

timbre (tăñ-br) Fr. n.

1. The quality of tone.

2. A fixed bell having no clapper, and struck by a clapper from without.

3. The sound of a bell that is struck by a hammer.

4. The snare of a drum, that is, the pieces of gut stretched across the lower head of the snare drum to muffle its sound.

timbrel

A name which occurs in the Bible and which refers to the tambourine of the Hebrews. See also tambourine.

time

This word has caused much confusion as to its true musical meaning. It may signify duration, as when the time of a note is referred to, meaning the length to which it is to be held. Time may mean the rapidity of movement of a composition, as slow time or fast time, indicated by such words as *lento* and *allegro*. The meaning most frequently inferred is the division of a measure into equal fractional parts, taking a whole note for the unit of value, so that a standard is established for the rhythmical movement of the composition. In this sense, time is indicated by a fraction, placed at the beginning of a composition, the numerator of which tells the number of notes of a given kind to be found in a measure, the denominator designating what kind of a note is used as a unit of value. The expression 7

8 shows that the equivalent of seven eighth notes is required to fill up a measure. There are two kinds of time, duple and triple, and each of these may be compound. When the number of beats in a measure is exactly divisible by two, the time is duple, when by three, it is triple. In compound duple time the number of beats in a measure is still divisible by two, but each beat contains a dotted note divisible by three, or its equivalent. In compound triple time the number of beats is divisible by three and each beat also contains a dotted note divisible by three. See tables at the foot of page 526, and on the following pages, 527 and 528, which contain the different kinds of time with French, Italian and German equivalents.

time, imperfect

time, imperfect

Time in which the number of beats in a measure is not divisible by three, as four-four time.

time, perfect

In medieval music, a measure having a time value of three beats; medieval triple time. It was called perfect time because it had three beats, and three was considered the most perfect of all numbers, out of deference for the Blessed Trinity. The signature was a complete circle, the most perfect of all figures.

time signature

Figures in the form of a fraction placed immediately after the clef at the beginning of a composition to indicate the time, as $\frac{3}{4}$ three quarter notes to a measure; $\frac{6}{8}$ six eighth notes to a measure; $\frac{8}{8}$ eight eighth notes to a measure.

timpano

time-table

A table representing the forms and proportionate duration of all the notes used in mensurable music, or music in which the notes have a difficult time value.

timidezza (tē-mī-dēd'-tsä) It. n.

Timidity: as used in *con timidezza*, in a style expressive of fear and hesitation.

timore (tī-mō'-rē) It. n.

Fear; apprehension.

timorosamente (tī-mō-rō-sä-mēn'-tē) It. adv.

Timidly; hesitatingly.

timoroso (tī-mō-rō'-sō) It. adj.

Timid; hesitating.

timpanisto (tīm-pā-nēs'-tō) It. n.

One who plays the drum or timbrel.

timpano (tēm'-pā-nō) It. n.

A kettledrum: a drum consisting of a hemispherical metal shell mounted

timpano coperto (tēm'-pā-nō kō-pēr'-
tō) It.

Muffled drums: drums having cloth
put over the heads to muffle or deaden
the sounds.

tinternell

An old dance mentioned by Halli-
well. The name is derived from the
French verb tinter, to ring, to tinkle.

tintinnabolo (tĭn-tĭn-nā'-bō-lō) It. n.

tintinnabulum (tĭn-tĭ-nāb'-ūlūm) Lat.
n.

A small bell.

tintinnamento (tĭn-tĭn-nā-mĕn'-tō) It.
n.

tintinnio (tĭn-tĭn-nē'-ō) It. n.

tintinno (tĭn-tĕn'-nō) It. n.

A tinkling, jingling sound, as of lit-
tle bells.

tinto (tĕn'-tō) It. n.

Color: as used in the phrase, con
tinto, to be performed with color, or
expression.

tiorba (tĭ-ōr'-bā) It. n.

See theorbo.

tipping

In flute playing, a distinct articula-

tion or sound given to every tone
produced by the pulsation of the
player's tongue against the roof of
the mouth. This method of tone pro-
duction ensures brilliant and crisp
staccato notes.

tira tutto (tē'-rā toot'-tō) It.

A draw stop or pedal mechanism
which brings into use all the pipes
of an organ.

tirade (tē-rād) Fr. n.

The filling up of an interval be-
tween two notes with a run, or rapid
succession of notes. This is used in
both instrumental and vocal music.

tirana

A very graceful Andalusian dance
to rhythmical music in six-eight time.
The words of the song accompanying
the dance are written in coplas or
stanzas of four lines each. This dance
is generally performed to guitar ac-
companiment.

tirant (tē-rāñ) Fr. n.

A strap, a brace: a button; the
chord of a drum: a stop knob, the
projecting handle of an organ stop.

tirant à coupler (tē-rāñ ā koo-plā) Fr.

The stop knob of a coupler. See
also coupler.

tirarsi, da (dā tē-rār'-sē) It.

To be drawn out: a slide, as indi-
cated in tromba da tirarsi, a slide

tirarsi, da

trumpet. A trumpet which produces its gradation of tone by means of a metal slide that moves within the large main tube of the trumpet.

tirasse (tĭ-rās) Fr. n.

1. In small organs a pedal keyboard which does not act upon pipes of its own, but upon base keys of the manual or principal keyboard.

2. Pedal coupler.

tirata (tē-rā'-tä) It. adj.

Stretched; drawn: a triade; a rapid run of small notes filling in the interval between two large notes.

tiré (tē-rā) Fr. v.

To draw: a direction meaning to use the down-stroke of the bow in violin playing.

tirez (tē-rā) Fr. v.

To draw: a direction meaning to use the down bow, that is, to draw the bow across the strings from the nut nearest the hand to the point.

tirolese (tē-rō-lä'-zě) It. n.

A dance. See also Tyrolienne.

Tirolienne (tě-rōl-yěn) Fr. adj.

Tyrolese: a Tyrolese dance, really a modified form of Ländler of which the characteristic feature is the Jodler, especially as a refrain. A modern round dance in three-four time and easy movement. This name was also applied to ballet music that was supposed to imitate the dances of the Bavarian peasantry. The best example of this artificial Tirolienne may be found in Act III. of Rossini's, Guillaume Tell.

Tischharfe (tĭsh'-här-fě) Ger. n.

Literally, a table harp: an autoharp which is placed upon a table to be played. See also autoharp.

titty (tziti) Hin. n.

The name of the Hindoo bagpipe.

to (tō) Grk.

One of the names of the four sounds in the Greek sol-fa system and answering to the fourth sound of the tetrachord, or unit of four notes, into which they divided their scales. See also ta, te, tee, to.

tobend (tō'-běnt) Ger. adj.

Tempestuous; boisterous: to be rendered blusteringly, tempestuously.

toccatà (tôk-kä-tä) It. n.

1. From the Italian tocarre, meaning to touch. A form of composition for keyboard instruments and so written as to exhibit the touch and execution of the performer. The oldest toccatas were not definite in form but consisted largely of running passages,

ton

interspersed with shorter passages of imitation, such as are found in canon and fugue. Often but one part is found in a toccata and while not a decided theme or subject, asserts itself as principal musical thought by repetition. One of its chief characteristics is in the flowing movement of notes of equal length and like nature. The toccata lacks individuality and has for that reason never held an important place as a definite form, but Bach developed it further than had any previous writer, and used it to open a number of his fugues. He employed short movements of markedly different styles, giving it variety which it had not before possessed to any degree.

2. The lowest trumpet part in old trumpet music which filled the place the kettledrums now occupy in the orchestra.

toccatella (tôk-kä-těl'-lä) It. n.

toccatina (tôk-kä-tě'-nä) It. n.

A short toccata.

tom-tom

A general expression of the Hindus, meaning drums.

tombeau (tôn-bō) Fr. n.

Tomb: a dramatic elegy; an elegy of impassioned character.

tombestere (tôm'-bēs-tür) Old Eng. n.

A female dancer who accompanied herself upon a tambourine which occasionally she threw into the air and caught again in her hand.

ton (tôn) Fr. n.

1. Tone; sound; melody; voice; the pitch of a note.

2. Also the scale or key, or mode.

3. Also a crook or curved metal tube fitted into the main tube of the trumpet to lower its pitch.

4. Formerly a name for tuning-fork.

ton

5. Used in composition as *ton d'église*, church mode; *ton majeur*, the major key; *ton ouvert*, open or natural tone on a wind instrument.

Ton (tōn) Cer. n.

Tone; sound; melody; voice; pitch; key; mode: also much used in combination as, *Tonabstand*, interval; *den Ton halten*, to keep the pitch; *Tonbildung*, tone production.

ton bas (tōñ bā) Fr.

A deep, low tone.

ton bouché (tōñ boo-shä) Fr.

Stopped tone: in horn playing a tone produced by using one of the valves, in contrast to the open or natural tones.

ton de l'église (tōñ dü lä-glēz) Fr.

Church modes: the eight modes authorized by St. Gregory for intoning the religious offices. There were four principals called authentic modes and four subordinate or plagal modes based upon them. They were founded upon the Greek modes.

ton de réchange (tōñ dü rā-shāñzh) Fr.

Tone of the crook: the tone produced by inserting the crook, a curved metal tube, into the main tube of instruments like trumpet and horn. This lowers the pitch of the note and somewhat changes its quality.

ton de voix (tōñ dü vwä) Fr.

The tone of the voice.

ton du cor (tōñ dü kôr) Fr.

Same as *ton de réchange*.

ton entier (tōñ än-tĩ-ā) Fr.

A whole tone: a musical unit.

ton feint (tōñ fāñ) Fr.

Feigned tone: an old term for a flatted tone, one that is lowered in pitch half a tone.

ton générateur (tōñ zhä-nä-rä-tür) Fr. n.

The ruling or principal key in which a piece is written.

ton majeur (tōñ mä-zhür) Fr.

The major key: a key in which the half tones fall between the third and fourth, and seventh and eighth notes both ascending and descending.

ton mineur (tōñ mē-nür) Fr.

The minor key: a key in which the third note is three half tones above the first note of the scale.

ton ouvert (tōñ oo-vär) Fr.

Open tone: a natural tone. On a wind instrument the tone produced when none of the stops are pressed. On a stringed instrument the tone produced when the string is not pressed against the frets with the left hand.

Tonbestimmung

ton relatif (tōñ rŭ-lä-těf') Fr.

Related key: a key is related to another key when they have two or more chords in common.

Tonabstand (tōn'-äp-shtänt) Ger. n.

The interval between two tones.

tonadica (tō-nä-dē'-kä) Spa. n.

tonadilla (tō-nä-děl'-yā) Spa. n.

A short tune or song; a musical interlude; a song of lively, cheerful character usually accompanied by a guitar.

tonæ ficti (tō'-nē fik'-tī) Lat.

The transposed church modes. In the notation of the church music of the Middle Ages the use of sharps was forbidden by the musical taste of the time and also by a bull issued by Pope John XXII. Hence, such semi-tones were never permitted to appear in the written music, but the demand for their use was acknowledged, and it became the custom for the singers to transpose from the originals as they performed.

tonal

Of or pertaining to tones, keys or modes.

tonal fugue

A fugue in which the answer is an imitation of the subject, only slightly altered in order that it will remain in the same key. This term is used in contradistinction to a real fugue in which the answer is an exact imitation of the subject but written in another key.

tonality

The unity in key relationship of a phrase or composition. In order to keep its tonality a composition must not stray beyond the limits of easy return to a key. Tonality is more important in purely instrumental music than in that accompanied by words, because in the latter case if tonality is not maintained the text will supply the meaning of a passage which otherwise would lack intelligibility. See also key.

tonante (tō-nän'-tē) It. adj.

Thundering; loud; tempestuous.

Tonanverwandschaft (tōn'-än-fēr-vänd'-shäft) Ger. n.

Key relationship; said of keys having one or more chords in common.

Tonart (tōn'-ärt) Ger. n.

The key.

Tonbestimmung (tōn'-bā-shtim'-moongk) Ger. n.

The determining of tones by mathematics, that is, according to the number of their vibrations per second.

Tongattung

whether major or minor. The selection of tones to use in a particular strain. The division of the octave. Tongebung (tōn'-gě-boongk) Ger. n.

The production of tone.

Tongeschlecht (tōn'-gě-shlĕkht) Ger. n.

The character of the modes, whether major or minor. The selection of tones to use in a particular strain. The division of the octave. Same as Tongattung, only more correct.

tongue

1. (n.) In what is termed the reed of certain pipes in the organ, the vibrating slip of brass which produces the sound is called the tongue. See also reed.

2. (v.) To use the tongue in playing certain wind instruments, particularly the cornet. Special effects are produced by a variety of tongue thrusts while producing a tone. See also double-tonguing and triple-tonguing.

tongue pipes

Those pipes of the organ which are fitted with reeds.

tonguing

The production of tonal effects on flute and cornet by a certain method of using the tongue.

Tonhöhe (tōn'-hā-ĕ) Ger. n.

Tone height: the pitch of a tone.

toni, quinta (kwĕn'-tā tō'-nĕ) It.

The fifth tone of the scale, or dominant.

toniæum (tō-nĭ-ĕ'-ŭm) Grk. n.

In ancient Greek music a division of the chromatic scale. In this division, the tetrachord or scale division of four tones rose in intervals of a half tone and a minor third or interval of three half tones.

tonic

The keynote of the scale: the chief note; the first note of the scale from which all others are built up.

tonic-chord

The chord built upon the keynote. The key chord on which a piece is written and with which it concludes.

tonic note

The keynote of any scale; the chief, fundamental, ground note.

tonic pedal

A pedal point which is the keynote or tonic, that is, the tonic occurring in the bass and held while the other parts continue.

tonic section

A section or part of a composition in the key in which the composition

Tonmesser

began, having a cadence, or ornamental passage near the end founded on the first note of that key.

Tonic Sol-fa

A system of writing music invented in England about 1812 by Sarah Glover, and perfected about thirty years later by Rev. John Curwen. In this system neither staves nor notes, as we know them, are used. The letters d r m f s l t, which are the initials of the syllables doh, ray, me, fah, soh, lah, te, are used instead. To indicate which octave above middle C is desired the little figures 1, 2, 3 are written at the right above the letter thus: d¹ d² r³; and 1 2 3 placed at the right below the letter indicate one, two or three octaves below middle C, as d₁ d₂ r₃. Sharps are written de, re, etc., and flats da, ra, etc. The time is easily read from the position of the letter in the measure. Doh is always the keynote of the scale and ray is always a whole tone higher, me, a half tone, and so on.

tonica (tō'-nĕ-kä) It. n.

Tonika (tō'-nĕk-ä) Ger. n.

tonique (tō-nĕk') Fr. n.

Tonic.

Tonkunde (tōn'-koon-dĕ) Ger. n.

Tone-knowledge: the science of music.

Tonkunst (tōn'-koonst) Ger. n.

Tone art: the scientific plus the artistic knowledge of music.

Tonkunstschule (tōn'-koonst-shool'-ĕ) Ger. n.

Tone-science school: a school where the art and science of music are taught.

Tonlage (tōn'-lä-khĕ) Ger. n.

Tone position: the pitch of a tone, whether high or low.

Tonlehre (tōn'-lä-rĕ) Ger. n.

Tone-doctrine or tone-rule: acoustics, the science of tones.

Tonleiter (tōn'-lĭ-tĕr) Ger. n.

Tone-ladder: a scale.

Tonloch (tōn'-lokh) Ger. n.

Tone-hole: in wind instruments a hole that may be stopped by the finger, or a key, to change the pitch of the tone produced.

Tonmesser (tōn'-mĕs-sĕr) Ger. n.

Tone-measure: a monochord; an ancient instrument for exactly measuring the intervals of sounds according to mathematics. It consisted of one string stretched over a sounding-board, having a bridge sliding over a graduated scale by means of which

Tonmesser

any division of the string could be isolated and its pitch obtained. Other similar instruments for measuring the intervals of sound.

Tonmessung (tōn'-mēs'-soongk) Ger. n.
Synonym of Tonbestimmung.

tono (tō'-nō) It. n.

Tone; key.

Tonrein (tān'-rīn) Ger. n.

tremolando (trä-m-ō-län'-dō) It. part.

Trembling; quivering: a note or chord repeated with great rapidity and producing a quivering, fluttering effect. Abbr. trem.

tremolant

A mechanical device in the organ which produces a wavering effect or tremolo. It consists of a small bellows placed over a windchest, in the lower side of which is a covered opening. When the cover is removed, by pulling a stop knob in the front of the organ or by pressing a pedal, the wind rushes in from beneath and escapes through the little bellows into the pipes which are to be sounded. The intruding air raises the cover of the bellows, escaping in a continuous stream, but as the cover rises it is stopped by a spring which forces it down again. This combined action continues causing the air to escape in puffs.

tremolo stop

The tremulant: a mechanism for causing a vibrating or throbbing effect in organ tones. It consists of a valve, having a movable top to which a spring and weight are attached. The currents of air forced through this valve, which is controlled by a draw stop, are partially checked. The up and down movement of the top of the valve gives a vibratory movement to the air, first checking it, then allowing admission into the pipe, and so causing the tremulous tone. Another contrivance found in some American organs is a fan-wheel placed in front of the windchest. When set in motion its vibrations break the currents of air and produce the tremulant tones.

tremore (trä-mō'-rě) It. n.

A trembling: to be rendered with a tremulous, fluttering effect.

tremulant

See tremolant.

tremulieren (trä-moo-lē'-rěn) Ger. v.

A metrical foot composed of two syllables or notes, the first of which is long or accented, the second short or unaccented, thus — ◡. The name choree or chorus is applied to the same foot. Trochee is derived from a Greek word meaning running and is thus applied because it gives a rapid movement and is frequently used in songs to accompany dances. The following is an example:

— ◡ — ◡ — ◡ — ◡ —
Haste thee, | nymph, and | bring
with | thee

— ◡ — ◡ — ◡ — ◡ —
Jest and | joyful | jolli | ty.

Its light, tripping movement adapts trochaic rhythm to lively subjects, but at the same time it is brisk, abrupt and energetic, making it also suitable

tromba marina

to intense themes. Trochaic tetrameter, four feet to a line, is a favorite hymn measure.

trois (trwä) Fr. adj.

tromba marina (tröm'-bä mā-rē'-nä) It. n.

An ancient instrument, furnished with a single string and played with a bow. The body was long and slender and when played the lower end of the instrument rested upon the floor, the upper end generally reaching as high as the performer's head. The single string was sometimes supplemented by others which served only for accompaniment, or by sympathetic strings, often placed within the body. The bridge rested firmly upon only one foot and the other vibrated with the string, producing a reedy, harsh tone and adding much to the volume of the sound. This quality is sometimes advanced in the reason for the origin of the name *tromba marina* or marine trumpet, the increased sonority making it more probable that the instrument was used for signaling purposes on board vessels. During the period from the Fourteenth to the Sixteenth Century the *tromba marina* was very popular in Germany, and was used in Europe and England even in concert work. The instrument also found a place in

tropus (trō'-pūs) Lat. n.

Equivalent to trope.

troubadour (troo-bä-door) Fr. n.

trovador (trō-vä-dhōr) Spa. n.

trovatore (trō-vä-tō'-rē) It. n.

Probably from the Provençal verb,

Trumbscheit

trobar, to invent, to find. Originally kings and nobles of high degree composed and sang their own verses, usually dealing with the subject of love, or sometimes with deeds of chivalry. The troubadours were often attached to some court, and usually selected some lady, and giving her a fanciful title, addressed their songs to her. These poet-musicians flourished from the Eleventh to the latter part of the Thirteenth Century and the title gradually came to include the wandering minstrels who went from court to court singing the compositions of other men, but seldom themselves composing. The work of the troubadours was of real value to music, for they helped to establish the use of the modern major scale in European music, and proved the rhyming stanza to be the most perfect vehicle for lyrical expression. At that time, the art of literature had attained a much higher development than had music, and the effort to set fittingly the verses of the troubadours resulted in the greater development of the song as a musical form. This reduced the melodies and accompanying verses to definite musical forms and reconciled musical and poetical meters.

trübe (trü'-bë) Ger. adj.

Troubled; sad; melancholy in style.

Trug (trookh) Ger. n.

Deception, fraud: as used in Trugkadenz, an interrupted or deceptive cadence.

Trugfortschreitung (trookh'-fört-shrī-toongk) Ger. n.

Literally, deceiving progression: a dissonant chord ordinarily progresses to one which is consonant so that the effect of the dissonance may be pleasantly overcome. However, deceiving progression is effected when the dissonance progresses to a second dissonance.

Trugkadenz (trookh'-kä-dēnts') Ger. n.

Trugschluss (trookh'-schloos) Ger. n.

False key: an interrupted or deceptive cadence, that is, a cadence in which the chord built upon the fifth note of the scale is followed by some other chord than that built on the first note. Equivalent to false or deceptive cadence.

Trumbscheit (troomp'-shīt) Ger. n.

A marine trumpet: an instrument consisting of a triangular chest over which passed a thick gut string pass-

Trumbscheit

ing over a bridge, one foot of which was fastened to the body of the instrument, and the other free. It is played with a bow, and the loose foot of the bridge checks the vibration and gives it the sound of a trumpet.

trump

1. (n.) An obsolete poetical name for a trumpet, or a jew's-harp.

2. (v.) To blow a trumpet.

trumpet

A brass wind instrument: the trumpet is one of the oldest musical instruments now in use. The most primitive forms were made of shell bored at the end and of a horn with the point removed. The earliest brass trumpets had a single, straight tube; then followed the one bent into three parallel lines; later the single tube coiled into convenient shape with a mouthpiece at one end and a flaring bell at the other. The sounds are modified by the action of the player's lips, and also varied by the addition of slides and keys, so that the modern trumpet is capable of producing every chromatic tone within its compass. It is allied to the horn and cornet, and is a soprano instrument pitched midway between them; its tone is bright, clear and penetrating and the loudest of all portable wind instruments. It is effective in some orchestral music, especially in martial compositions, although in the modern orchestra its place is usually filled by the cornet. Abbr. tpt., tr.

trumpet, harmonic

A sackbut.

trumpet, key

A trumpet fitted with keys.

trumpet stop

An organ stop composed of reed pipes producing a powerful tone much like that of the trumpet. The lowest tone of the stop is the second C below middle C.

trumpet stop, octave

An organ stop pitched an octave higher than the trumpet stop.

trumpet, valve

A trumpet fitted with valves. See also valve trumpet.

Trumbscheit (troom'-shīt) Ger. n.

Marine trumpet. The same as Trumbscheit.

See cheng.

tseltsel (tsělt-sěl) Heb. n.

Ancient Hebrew cymbals which were broad and flat.

tune

tuba

1. A straight trumpet used by the Romans.

2. The name of the bass instruments of the saxhorn family. The brass tube, which is conical and especially large, is supplemented with four valves. The instrument is made in three sizes, each having a compass of four octaves. To this group belong the euphonium, pitched in B flat; the bombardon, the interval of a fifth lower; and the contrabass tuba, in B flat, an octave lower than the euphonium.

tuba clarion

A stop of the organ composed of pipes furnished with a reed. The tone is very powerful and resembles that of the tuba.

tuba communis (kôm-mū'-nīs) Lat. n.

A straight trumpet used by the Romans.

tuba curva (kūr'-vā) Lat.

A trumpet which is not furnished with any valves or slides and whose tubing is bent to form a double circle in the center of the instrument, allowing it more length. During the Eighteenth Century and the earlier part of the Nineteenth, this instrument was used in French orchestras.

tuba ductilis (dūk-tīl'-īs) Lat. n.

A trumpet with a curved tube which was used by the Romans.

tuba major

tuba mirabilis (mī-rāb'-ī-lēs) Lat. n.

Tumultuous; agitated; impetuous.

tun

A drum formerly used in Yucatan.

tunable

An adjective applied to pipes, strings and other sonorous bodies or parts of instruments that can be perfectly tuned because of the equal density of their parts.

tune

An air; a melody; a succession of

tune

measured sounds pleasing to the ear, and possessing a distinct and interesting harmony. A name given to well-known melodies of simple construction.

As a verb, to tune, means to bring all the sounds into their proper relation, one to another; to bring into harmony.

tuner

1. One who tunes musical instruments as a profession.

2. A cone of metal or horn, used in tuning organ pipes, which, when pressed inside the end of the pipe, slightly lowers the pitch, and when pressed over the end of the pipe slightly raises the pitch.

3. The adjustable flap or cut at the top of an organ pipe by which the pitch is regulated.

tuning

The act of adjusting the sounds naturally produced by any instrument to a standard or given pitch, and of relating them properly to one another.

tuning-cone

A hollow cone of wood or of metal, used in tuning metal organ pipes open at the top. If the pitch of the pipe is a little low, the cone is inserted into the top of the pipe, and the cone being forced in, enlarges the orifice and raises the pitch. If a pipe is pitched too high a cone, whose base is so broad that it will admit the top of the pipe, is placed on the pipe and squeezed down until the orifice is reduced in size, and the pitch is lowered enough. Also called tuning-horn.

tuning-crook

A crook or curved tube which is inserted into the main tube of horn and trumpet and alters the pitch of the tone produced.

tuning-fork

A steel instrument having two prongs, which set in vibration produce an invariable sound. The pitch of tuning-forks varies according to the thickness of the metal and the length of the distance between the prongs. The tuning-fork is used to tune other instruments and to give the pitch to singers. Tuning-forks are generally of two classes, one tuned to A on the second space of the treble staff for orchestra use, the other to C on the fourth space of that staff, for piano and organs.

tuning-horn

See tuning-cone.

turdion**tuning hammer****tuning key**

An instrument used in tuning pianos and harps. It is a hammer-shaped instrument, having a wooden head and an iron handle, at the end of which is a square or oblong hole to fit the pegs, around which the strings of the instrument are wound. By means of this instrument the pegs are screwed up or down, and the strings thus tightened or loosened as is needful.

tuning-slide

A sliding U-shaped section of the tube in certain wind instruments capable of varying the entire length of the tube and so adjusting the pitch.

tuning wire

A piece of wire which presses against the tongue, or thin brass strip whose vibrations produce the sounds in what are called reed pipes of the organ. When moved down it lessens the vibrating length of the tongue and consequently heightens the pitch. When moved up the pitch is lowered.

tuono (too-ō'-nō) It. n.

Tone; tune; sound.

1. A tune: the volume of tune or sound.

2. A mode.

tuono ecclesiastico (too-ō'-nō ěk-klä-zĩ-äs'-tĩ-kō) It.

umstimmen (oom'-shtim'-men) Ger. v.

To alter the pitch, retune; as, *A in As umstimmen*, change the pitch of A to A flat; *Es nach F umstimmen*, retune E flat to F.

Umstimmung (oom'-shtim'-moongk) Ger. n.

Tuning to a different pitch; a change or mutation of pitch or key in kettledrums or wind instruments, indicated in the score by *muta* and in stringed instruments the alteration of the ordinary pitch of the strings to gain special effects.

un (oon) Ger. prefix.

Signifies not in adjectives; bad, or ill in nouns.

una (oo'-na) It. art. and num. adj.

A; an; one; contracted to *un'* before a word beginning with a vowel. Abbr. *u*.

una corda (oo'-nä kōr'-dä) It.

One string: the direction for the use of the soft pedal of the piano; by the mechanism of which the hammers are shifted to the right and consequently can strike only one of the three strings arranged for each key, thus producing a softer tone. This term is contradicted by *tre corde*, three strings, indicating the release of the soft pedal, whereby the hammers are allowed to strike all three strings. *Una corda col pedale* means use the soft with the loud pedal. Abbr. *u. c*.

unaccented

Applied to that part of a measure and the notes in it which receive no special stress.

United. Pl. of uni. Abbr. of unison.

unison Eng. n.

Unison (oo-nī-zōn') Ger. n.

An accordance or coincidence of sounds resulting when sonorous bodies produce equal numbers of vibrations in a given time; two sounds of the same pitch occurring simultaneously, hence a tone which is of the same pitch as another tone. See prime. The term is more loosely applied to octaves. Voices or instruments are said to perform in unison, all' unisono, all un. (It.), a l'unisson (Fr.), when they render the same notes, or if the character of the voice or instrument prohibits this, octaves of the given notes. Unison passages often occur in orchestral work, to relieve harmony, but at the same time

unmeasured

preserve the full power of tone. Col basso all' unisono, abbreviated c. B. all' un., in unison with the bass, written above the cello part indicates that the same written notes serve for both double bass and cello parts; but as the double bass always sounds an octave lower than the written notes, the cello and double bass really play in octaves. The same is true of the piccolo flute, which sounds an octave higher than the written notes. Oboi all' unisono dei violini, oboes in unison with the violins. Unisono al primo flauto, in unison with the first flute. Abbr. unis.

unison, augmented.

An interval of a semitone, written on the same degree of the staff, as C—C sharp. C—D flat would not be an augmented unison, but a diminished second.

unisona (oo-nē-sō'-nā) It. adj.

In unison: feminine of unisono.

unisonance

Accordance of sounds; a unison.

variation

means of harmonic, melodic, or rhythmic changes and embellishments.

Abbr. var.

variato (vā-rĭ-ä'-tō) It. part.

Varied; changed; having variations. Equivalent to *varié* (Fr.).

variazione (vā-rĭ-ä-tsi-ō'-ně) It. n.

See *variation*.

varsovienne (vār-sō-vē-en') Fr. n.

A dance generally supposed to have originated in France in imitation of the Polish mazurka, polka and redowa. The name is the feminine form of the adjective *varsovien*, of or pertaining to Warsaw. A dancing master named Désiré made it first known in Paris in 1853, and later it was approved by the Empress Eugenie as a feature of the Tuileries balls. The music is in three-four time, with a strong accent on the first beat of every second measure, where occur marked pauses in the dance, giving a deliberate and dignified effect.

vaudeville (vōd-vēl) Fr. n.

This is generally understood to be derived from Vaux de Vire, Valleys of Vire, in Normandy, where, during the Fifteenth Century, Oliver Basselin wrote songs, chiefly satirical, on such subjects as love, drinking or passing events. These songs were usually based on some well-known air, or, if original, a catchy tune was sought so that they quickly won their way into popular favor and were frequently sung on the street. From this circumstance we have another possible derivation, *voix de ville*, voices of the town.

Two centuries later such songs were sung between the parts of a dramatic piece; and at a still later period plays of the character were regularly concluded by a vaudeville finale, in which each character sang a verse. From these parodies of operas and comic operas developed. This light form of dramatic entertainment of the Eighteenth Century was interspersed with lively songs, pantomime and dialogue, all having a close connection with one another and forming an essential part of the subject.

At the present day vaudeville means a light form of entertainment including any kind of music, monologue, dialogue, playlet or acrobatic feat; in fact, anything which will entertain a popular audience. In this form vaudeville is an outgrowth of the variety show. Modern vaudeville, though

velocissimo

often lacking in refinement, is at least decent; and, notwithstanding the hosts of critics who fear the downfall of legitimate drama and predict the weakening of the power of sustained attention to a high class play of any length, so long as vaudeville amuses its audiences it will undoubtedly retain its present popularity. A few years ago vaudeville performers were far inferior to legitimate actors, but now many of the latter have joined its ranks, attracted by its superior salaries, for at the present time it is said that vaudeville performers are the best paid of all persons who work for a living.

vedel (fā-dēl) Dutch n.

Fiddle.

veemente (vā-ā-měn'-tē) It. adj.

Vehement; forcible; energetic.

veiled

An adjective, usually applied in singing to tones somewhat obscured, either purposely or unintentionally. The veiled tone is sometimes desirable as it softens the metallic quality, and, again, unless skilfully used, it detracts from clear vocalization.

veiled voice

A voice the clearness of which is marred by a condition of the whole surface of the vocal chords, either natural or superinduced, causing not a huskiness, but a muffling of the tone. A veil may be natural or the result of a wrong position in singing, overuse or an unhealthy condition of the vocal chords. Many voices are veiled; but when the veiling is very slight it is always a defect, but serves to give the voice richness. Nearly all the great dramatic singers have had slightly veiled voices. In the case of Pasta and others the defect was difficult to overcome. If the veil is cultivated it seldom fails to ruin the voice. Equivalent to *voce velata* (It.) and *voix voilé* (Fr.).

velato (vā-lä'-tō) It. adj.

Veiled. See also *veiled voice*.

vellutato (vēl-loo-tä'-tō) It. adj.

vicar-choral

in the chancel and choir, wherefor he is required to have a practical knowledge of ecclesiastical music. Originally every canon or prebendary had a minor canon or vicar-choral to assist him, but the number of these deputies increased later, a vicar-choral representing more than one canon. The vicars-choral form a distinct corporation or college in all the English Cathedrals of the old foundation and in twelve cathedrals of Ireland, and formerly lived together in collegiate buildings, some of which are still standing, apart from the superior members of the chapter of the cathedral, under whose jurisdiction the vicars-choral were placed only in matters of duties in church services. There are both minor canons and vicars-choral at St. Patrick's Cathedral, Dublin, where they form two distinct colleges, and also at Hereford, where they are only one corporation.

ing festival services, especially at Christmas, are called villancicos.

villanella (vēl-lä-něl'-lä) It. n.

An old Italian country dance originated by the Neapolitans and accompanied by singing; gradually the singing became more important and displaced the dance. It was a precursor of the madrigal and has much the same relation to it that the folk-song has to the part-song. Its character as a song was light and comic, and had a tendency to the coarse and unrefined. The time was gay and brisk and the measure strongly marked. The melody at first was written in very plain style, but later numerous embellishments were added. The modern villanella is composed for both singing and dancing.

1. In ancient Greek music, one of the two accepted modes of notation used for the lyre.

2. A medieval term for a certain system of letter notation used in music for the viol da gamba, a six stringed instrument, the music for

viol lyra way

which was written on a staff of six lines, one for each string. Also called Lero viol.

viola (vê-ô'-lă) It. n.

1. A bowed instrument, the prototype of the violin. It was furnished with six strings, the back was flat as was usually the belly, the sound-holes were circular, the bridge low and the sides only slightly incurved. There were four sizes: the treble, alto, bass, and contrabass; the group being termed the chest of viols.

2. The modern viola is one of the important orchestral instruments. Although the instrument is often referred to as the tenor violin its pitch is more that of the alto voice. The viola is constructed exactly like the violin, but is a fifth larger and is pitched the interval of a fifth lower.

The music is written almost entirely in the C clef with the high notes in the G, or treble, clef. Its tone blends well in the orchestra, and has a range of color extending from sad reverie to agonized pathos. It usually carries the third part in the quartet with the first and second violins and the violoncello, although sometimes it doubles the violin parts. Abbr. va.

viola bastarda (vê-ô'-lă bäs-tär'-dă) It.

Literally, bastard viol: this instrument was larger than the tenor and smaller than the bass viol. In the Seventeenth Century it fell into disuse, having been replaced by the baryton. See also baryton.

viola da braccio (vê-ô'-lă dä brät'-chô) It.

Literally, arm viol: an alto viol which is held in the bend of the arm when played. It was at first strung with six strings, but in the Eighteenth Century the number was reduced to five.

viola da gamba (vê-ô'-lă dä gäm'-bä) It.

Literally, leg viol: an obsolete form of the violoncello. The name refers to the fact that, owing to the size of the instrument, it is held between the knees when played. Equivalent to viol di gamba. See also violoncello.

viola d'amore (vê-ô'-lă dä-mô'-rě) It.

Literally, viol of love: a tenor viol furnished with seven catgut strings passing over the bridge, and a number of wire strings drawn through small holes in the lower part of the bridge and passing under the fingerboard on the neck; the wire strings

violin

were tuned in unison with the others and vibrated sympathetically when the latter were rubbed with the bow. The instrument was useful only in solos and as a consequence had but a short life. The name was suggested by the soft effect of the sympathetic strings.

viola di bordone (vê-ô'-lă dē bôr-dô'-ně) It.

See baryton.

viola pomposa (vê-ô'-lă pôm-pô'-sä) It.

A five-stringed viol almost four feet long, invented by John Sebastian Bach. It was rested on the floor between the performer's knees when played. The fifth string afforded greater felicity in the execution of extended passages; but as performers acquired more skill upon the violoncello the viola pomposa was made unnecessary.

viole (vê'-ôl) Fr. n.

Viola (fê-ô'-lě) Ger. n.

See viola (It.).

violentemente (vê-ô-lěn-tě-mě'n'-tě) It. adv.

violet

A name sometimes applied to the viola d'amore.

violetta marina (vê-ô-lět'-tä mä-rě'-nä) It.

A high tenor viol very similar to the viola d'amore.

violiccembalo

An instrument invented in 1823 and greatly resembling the piano in appearance but differing in its mechanism; the keys pressing the strings against a revolving wheel which was operated by means of treadles. The tone could be made louder or softer by increasing the pressure of the fingers upon the keys.

violier (vê-ôl-yä) Fr. n.

Violist; one who plays a viol.

violin

The principal orchestral instrument, and the one which most closely resembles the human voice. Italy has always been the seat of violin manufacturing; Brescia was made famous by the violins of Da Salo, Mariani and Bente; and Cremona as the home of the Amati, Stradivari, Jacob Stainer and Guarnerius.

violin

ebony an inch in height, cut with small grooves for the strings and placed between the peg-box and finger-board to raise the strings a bit above the finger-board. At the lower end of the violin is the tailpiece, a concave piece of ebony pierced along the upper edge by holes through which the strings pass. This is not screwed or glued to the violin but is secured by a loop of gut fastened to the tail pin and held in place by the tension of the strings.

violin bow

A rod of light wood having parallel hairs strained along its length between raised ends. It is drawn across the violin strings and causes them to vibrate, thus producing the sound:

violin-clef

The G clef on the second line of the staff; also called the treble clef. Formerly in French violin music the G clef was placed on the first line.

**violin, keyed**

See piano-violin.

violin-principal

A stop on the organ composed of narrow pipes producing a tone similar to that of the violin.

violin, tenor

One name used to designate the viola because it takes the third or tenor part in the stringed quartet, the other members being the first and second violins and the violoncello.

terval of a fifth lower than the ordinary bass viol, and an octave below the violoncello. See octo-basse (Fr.).

violoncello (vē-ō-lōn-chĕl'-lō) It. n.

A bowed instrument dating from the latter part of the Sixteenth Century and serving in the orchestra as the bass of the stringed quartet, of which the first and second violins and the viola are the other members. The name is commonly abbreviated to cello. The instrument measures four feet from end to end, and when played is rested upon the floor and held between the knees of the performer, who is seated upon a chair. The four strings are tuned in an ascending scale of fifths, the lowest tone being the second C below middle C. Its music is written in the C clef, with high notes in the G or treble clef and low notes in the F or bass clef. The cello holds a place of importance in the orchestra and has an expressive tone, being capable of a somewhat sardonic humor in lively passages but equally successful in grave effects. Abbr. cello., vc., vcllo., vllo., ce.

violotta (vē-ō-lōt'-tā) It. n.

Literally, large viol: an organ stop composed of pipes of narrow scale connected with the pedals. When skilfully tuned it gives a tone surprisingly like that of the double-bass. See also double-bass.

violotta (vē-ō-lō'-tā) It. n.

A bowed instrument which was invented in 1895 by Dr. Alfred Stelzner, of Dresden. It is midway in size between the viola and the cello, between which there is an extensive gap. It is one-fifth larger than the violin and is tuned an octave lower, G, D, A, E. The tone is rich and full and the instrument can be used effectively in solos.

viols, chest of

A set of viols comprising two trebles, two tenors, and two basses, and forming the nucleus of an orchestra of the Seventeenth Century. The collection was often found in the home also. The name came from the chest in which they were kept while not in use.

virelay

A lay or song in the style of those written in the Fourteenth Century by Oliver Bassel, of the Vaux de Vire, in Normandy. These ballads had love, wine and the current events for their subjects and were usually treated sa-

vis-à-vis

tirically, or epigrammatically. They were very popular throughout the country, and were known as the *lais des Vaux de Vire*, which was later corrupted into *irrelais*, and anglicized *virelay*. *Vaudeville* has the same origin.

virgil (vūr'-jĭl) Lat.

Virga; a neume, or character in medieval music, used to express tones, inflexions and graces.

virgil practise-clavier

A toneless keyboard instrument used in practising for the piano, and invented by A. K. Virgil, of New York, in 1883. The speed of the strokes may be timed by means of clicks which the key makes when going down and when returning to position. Precision is determined by the coincidence of the clicks. A spring which may be tightened or loosened adjusts the weight of the touch from two to twenty ounces, that is, from the lightest piano touch to more than the heaviest organ touch.

virginal

See spinet.

virgula

Literally, a branch, twig, stem rod.

1. An accent mark. This name was given to one of the neumes or characters used to express tones, inflexions and graces in medieval notation, corresponding to the acute accent mark, which represented a single note. The sign passed through many forms, finally becoming the *longa*, equal to four modern whole notes.

2. Also the tail or stem of a note. Also written *virga*.

virtuosita (vēr-too-ō-sē'-tā) It. n.

Virtuosität (fĕr-too-ō-zĭ-tāt) Ger. n.

virtuosité (vēr-tū-ō-zē-tā) Fr. n.

Virtuosity; perfect mastery; remarkable excellence in performance.

virtuoso Eng. n.

virtuoso (vēr-too-ō'-sō) It. n.

One who is remarkably skilled in performing on some special instrument. *Virtuosos* are constantly tempted to indulge in an undue exhibition of their wonderful technic, and as many have succumbed to the temptation, the term *virtuoso* has come to be considered by many as slightly depreciatory, and the greatest artists usually object to having it coupled with their names. Italian plural *virtuosi*. Formerly amateurs were called *virtuosos*.

vis-à-vis (vē-zā-vē') Fr. n.

Literally, face to face: **applied to**

vis-à-vis

double harpsichords or pianos having keyboards at opposite sides of the instruments so that the performers face each other.

vista (vēs'-tā) It. n.

Sight; a *prima vista*, at first sight.

vive (vēv) Fr. adj., fem.

Quick, brisk, lively.

vivendum, ad (ād vī-věn'-dŭm) Lat.

For the purpose of living: applied to a written, as opposed to an improvised, composition, which is intended to live, or be permanent.

vivente (vē-věn'-tě) It. adj.

Living; animated; lively.

vivezza (vē-vět'-tsā) It. adj.

Vivacity; liveliness; sprightliness.

vivo (vē'-vō) It. adj.

Quick; brisk; alive; animated; vivacious. Synonym of *vivace*.

vocal

Pertaining to the voice, especially the singing voice; anything uttered or modulated by the human voice; related to a vowel or voice sound. Applied also to the singing tone of an instrument.

vocal apparatus

The different organs of the human body by which vocal sounds are formed and produced.

vocal chords

Two thick, strong muscles in the larynx, covered with a thin mucous membrane. They are set to vibrating by the wind forced from the lungs, and thus produce the sounds of the voice.

vocal music

Music written especially for the voice.

vocal score

The notes of all of the voice parts, each part written on a separate staff, and placed one under the other, for the use of the conductor. This may or may not have combined with it the instrumental score.

vocale (vō-kā'-lě) It. adj.

Belonging to the voice; vocal.

vocalezzo (vō-kā'-lět'-tsō) It. n.

A vocal exercise. Synonym of *vocalizzo*.

vocalion

An harmonium fitted with unusually wide reeds and producing tones greatly resembling those of organ pipes.

A thin little voice.

Vogar (fō'-gär) Ger. n.

Another spelling of Fugara: an organ stop composed of pipes fitted with reeds and of high pitch, the lowest tone being only an octave below middle C. The tone is very ringing and brilliant, but has a tendency to supersede all else when used with only a few stops and is only available in long effects. On some organs the stop is called clarion.

Vogelflöte (fō'-gěl-flā-tě) Ger. n.

Bird-flute; bird-call; a flageolet or whistle.

Vogelgesang (fō'-gěl-gě-zäng') Ger. n.

Bird-song: an organ stop imitating the warbling of birds, found on old German organs. It consisted of very small pipes, set in a vessel of water through which the air was forced, producing a chiruping tone. See also **merula**.

Vogelpfeife (fō'-gěl-pfi'-fě) Ger. n.

See **Vogelflöte**.

voglia (vōl'-yā) It. n.

Wish; desire; longing; ardor; fervor.

voice

The sound produced by the larynx of human beings or animals. The

voice

human voice is divided into the following classes: basso, tenor, counter-tenor, contralto, alto, mezzo-soprano and soprano. Names often used synonymously with part.

voice, chest

The lowest register of the voice which produces the tones known as chest tones; supposed to consist in a lower position of the larynx, by which that organ is drawn down toward the chest, the tones there produced being reinforced by vibrations of the chest.

voice, falsetto

A man's head voice, the artificial notes higher than the natural tones of the male register, produced in a feigned or false voice.

voice, first

The soprano.

voice formation

The technical training of the voice by which correct habits of singing are formed, and artistic results obtained. As the instrument and the performer are thus combined in one person, the process of forming or training the voice includes both the development of technic and the adjustment of vocal machinery, as it may be called, the tuning or keeping in tune of the voice. The term embraces tone production, breathing, ability to produce and recognize true pitch of tones, equalizing of tone quality throughout the voice, enunciation of words, extension of vocal compass and flexibility, besides the later duty of varied kinds of the best music for interpretation.

voice, fourth

The bass.

voice, guttural

A quality of voice produced by contraction of the larynx.

voice, head

The head voice is the highest register of the human voice, the sound vibrations being strengthened by resonance in the upper part of the cavity of the mouth and throat. In the adult male singer this register is usually termed the falsetto voice, false or feigned voice, because of the wide difference in quality between it and the next lower register, the falsetto tones seeming unnatural in a man.

voice, nasal

A tone of voice produced in the nose.

voice-part

A vocal part; often used for part in any sense; chorus part.

voix voilée

voice, second

The alto.

voice, third

The tenor.

voice, treble

The soprano.

voices, outer

The highest and lowest voices in part singing.

voices, principal

The leading voices.

voicing

Tuning or regulating the pitch and peculiar character of an organ pipe.

volée (vō-lä) Fr. n.

Flight. See also volatine.

Volkgesang (fōlk'-gā-zäng') Ger. n.

Volkslied (fōlks'-lēt) Ger. n.

Folk-song of Germany; or a popular song: the genuine Volkslieder were songs of the people, by authors now unknown, which have been collected and handed down with the race. The melodies of these songs were simple, being nearly always in the Ionian mode, which is now known as the scale of C major, and easy to remember, and gained symmetry by repeating one phrase of the melody to two lines of poetry, with the slight alteration of the notes at the end of the second line. The Volkslied, so popular among the people, exerted a mighty influence in determining the tonality and form of modern music, as well as serving for themes, alike for secular and sacred art-music, Kunstlied, in the Fourteenth and Fifteenth Centuries, and still continues to be used and imitated.

volksthümliches Lied (fōlks'-tüm-likh-ēs lēt) Ger.

A popular kind of art song combining the characteristics of both Volkslied and Kunstlied, art song. This style of writing simple, art songs rose in the Eighteenth Century, and supplanted the old Volkslieder. Volksthümliche Lieder have pleasing melody, regular rhythm, simple harmony, and an unpretentious accompaniment; the poetry to which they are set is simple and natural, and the music is arranged to give the words their proper accent, all these qualities combining to produce a song pleasing and easy to sing, hence popular.

Volkston (fōlks'-tōn) Ger. n.

Folk-tone; resembling the songs of

volltönend

the people. Im Volkston, in the style of a folk-song.

Volkstückchen (fōlk' - shtük' - khēn) Ger. n.

Volksweise (fōlks'-vī'-zē) Ger. n.

See Volkslied.

voll (fōl) Ger. adj. and adv.

Full, whole, complete; fully, completely. ☩ 5 volle Takte Lang,

☩ 5 complete measures long. Mit vollen chor, with full chorus.

Used in compounds, as the English ful, fully; e. g., gedankenvoll, thoughtful, thoughtfully; gefühlvoll, full of feeling, tender, tenderly; klangvoll, full of sound, sonorous, sonorously.

voll Rührung (fōl rü'-roongk) Ger.

Full of emotion; feeling; sympathy.

voll Sehnsucht (fōl zān'-zookht) Ger.

Full of longing; yearning.

volle Orgel (fōl'-lē ōr'-khēl) Ger. n.

Full organ. Mit voller Orgel, with full organ. Synonym of volles Werk.

voller (fōl'-lēr) Ger. adj.

Louder; fuller; stronger.

volles Werk (fōl'-lēs vērck) Ger.

Vorsang**Vorsang** (fōr'-zäng) Ger. n.

The act of beginning, or leading off in a song.

Vorsänger (fōr'-zäng-ër) Ger. n.

Leader; accenter; precentor.

Vorschlag (fōr'-shläkh) Ger. n.

Fore-beat; one or two grace notes written in front of and one degree, sometimes more, above or below a given note from which they derive their time. Opposite of Nachschlag, an afterbeat. Equivalent to appoggiatura (It.). Langer Vorschlag, the long appoggiatura; gurzer Vorschlag, the short appoggiatura.

Vorspiel (fōr'-shpël) Ger. n.

An introduction, a prelude. The Vorspiel to an opera differs from an overture in not being an independent number, but an instrumental introduction using some of the themes of the first act of the opera into which it leads directly. In his later operas beginning with Lohengrin, Wagner replaced the overture by a Vorspiel, following the same principle that Gluck illustrated in his preludes.

Vorspiel auf der Orgel (fōr'-shpël owf där ôr'-gël) Ger.

An introductory piece on the organ; a voluntary.

Vorspieler (fōr'-shpël'-ër) Ger. n.

Leader of a band; the principal performer; soloist on an orchestral instrument.

Vorsteller (fōr'-shtël'-lër) Ger. n.

Performer.

Vortänzer (fōr'-tën'-tsër) Ger. n.

Leader of a dance.

Vortrag (fōr'-träkh) Ger. n.

Execution; delivery; style of performance; rendering; interpretation.

Vortragsbezeichnung (fōr'-träkhs-bä-tsikh'-noongk) Ger. n.

Preparatory sketch; an outline. Also the expression marks or other directions for rendering a piece.

Vortragsstück (fōr' - träkhs - shtük') Ger. n.

Show-pieces: pieces for performance before an audience; concert pieces as opposed to exercises or pieces for practise, Übungsstücke.

vorwärts (fōr'-värts) Ger. adj.

Forward; ahead; on; indicating that the time is to be faster. Equivalent to stringendo (It.). Etwas vorwärts gehend, somewhat faster movement, same as poco piu mosso.

Vorzeichnung (fōr'-tsikh-noongk) Ger. n.

Signature.

vox-humana stop**vowel**

One of the open sounds in speaking or singing which carries the tone. In singing the consonant, or closed sound, can not be pronounced unless connected with a vowel more or less prominent. The consonants simply begin and end the vowels of a word, and are merely articulated.

The sound of the vowel in singing is modified by the frequent prolongation of the tone; this renders it necessary in many cases to change the manner of producing it in order to obtain the best results, as the same position of lips, palate and teeth may produce altogether different sounds in singing and speaking.

vox (vöks) Lat. n.

Voice; a part; duo voces, tres voces, two or three voices: a sound, tone, or key, as inter aliquam vocem et octavam a se, between any note and its octave: acutæ voces, the high keys, the part of the ancient scale between the first A above and below middle C, same as acutæ claves, Plural, voces.

vox acuta (vöks ā-kū'-tä) Lat.

A high, shrill voice. Also the highest note of the double octave, bisdiapason, used in ancient music.

vox angelica (vöks än-jël'-ï-kä) Lat. n.

Literally, angel voice: a name given to several varieties of organ stop having a very delicate intonation. It is of medium pitch, the lowest tone being two octaves below middle C. In German organs the pipes are fitted with reeds and are rather narrow, producing a tone much like that of stringed instruments and resembling the tone of the more common stop called vox humana.

vox antecedens (vöks än-tē-sē'-dēnz) Lat.

Preceding part: the antecedent of a fugal composition, which proposes the theme or subject to be imitated by the other parts. See vox consequens.

vox consequens (vöks kōn'-sē-kwēnz) Lat.

Following part: the consequent which imitates the subject or theme.

vox gravis (vöks grä'-vīs) Lat.

Low voice.

vox-humana stop (vöks - hū - mä - nä) Lat.

Literally, human voice: a group of pipes in the organ which are fitted with reeds and produce a tone resembling the human voice.

vox nasalis

vox nāsalis (vöks-nā-sā'-līs) Lat.

A nasal voice.

vox retusa (vöks rē-tū'-sā) Lat.

Literally, dull voice: an organ stop composed of pipes having a narrow diameter and producing a tone somewhat stringy in character; that is, resembling the tone of a stringed instrument. The voice is dull as the name signifies, and the pitch is medium; the lowest tone being two octaves below middle C.

vox virginea (vöks vīr-jīn'-ě-ä) Lat.

Virgin voice; another name for the *vox angelica*.

voz (vōth) Spa. n.

Voice. Plural *vozes*.

voz argentada (vōth är-hān-tä'-dä) Spa.

A silvery, clear voice.

waltz

voz cascarrona (vōth kās-kār-rōn'-ä) Spa.

A rough, harsh voice.

voz de carretero (vōth dä kār-rā-tä'-rō) Spa.

Literally, voice of a carter: a harsh, loud, unpleasant voice.

vue (vü) Fr. n.

Sight; à première vue, at first sight. Equivalent to a *prima vista* (It.).

vulgans (vül'-gänz) Lat. n.

From the present participle of the verb *vulgare*, meaning to make universal, to spread abroad: the name of an organ stop composed of pipes producing a loud, coarse tone.

vuoto (voo-ō'-tō) It. adj.

Empty; void, as *scena vuoto*, the stage remains empty; open, as *corda vuoto*, open string.

W

W

Literally, a double V: in French usage, an abbreviation for *violini*; violins, in orchestral scores.

Wachtel (väkht'-ěl) Ger. n.

Literally, quail; a term denoting a toy pipe: the imitation of a bird's note by an instrument in the orchestra, such as the oboe.

wahsinnig (vän-zīn-nīkh) Ger. adj.

Frantic; frenzied

waits

A term applied originally to a class of night-watchman, who announced the passage of each hour by sounding on a horn or other instrument. They seem to have been also official musicians of the town, and the name was applied also to town musicians who were not watchmen. It then came to signify any group of singers or players at night, especially those who habitually sing and play Christmas carols, often in an unmusical manner and who passed around the hat afterward. The name also denoted a kind of shawm, hautboy, or oboe, which was much used by such players, and it is not definitely settled whether it was given first to the instruments or the performers.

Wald (vält) Ger. n.

Forest; wood; used chiefly in compounds.

Waldflöte (vält'-flā'-tě) Ger. n.

Literally, forest flute: a stop in the organ comprising broad metal pipes of high pitch, open at both ends, and producing agreeable, resonant tones.

Waldflötenquinte (väld'-flā-těn-kwīn'-tě) Ger. n.

Same as *Waldquinte*.

Waldhorn (vält'-hōrn) Ger. n.

Literally, forest-horn: hunting horn; the bugle.

Waldpfeife (vält'-pfī-fě) Ger. n.

Same as *Waldflöte*.

Waldquinte (väld'-kwīn-tě) Ger. n.

Literally, forest-fifth: an organ stop pitched one-fifth higher than the other flute stops, whose lowest tones are one octave below middle C. Abbr. form of *Waldflötenquinte*.

walnica (väl-nē'-kā) Rus. n.

walnika (väl-nē'-kā) Rus. n.

A Russian name for the bagpipes.

wals (väls) Dutch n.

A waltz.

waltz

The popular dance of the Nineteenth Century. Its origin is doubtful. The French claim that it is the descendant of the *volta*, which passed from France into Germany as the *volte*, in the Sixteenth Century, and became transformed into the waltz. The Germans claim that it is founded

waltz

on the drehtanz, or turning dance, a modified form of those old country dances in which the couples stand face to face, or hold one another by one hand only. As a fashionable dance, the waltz appeared in the Eighteenth Century in Bohemia, Austria and Bavaria; in 1792, it was introduced into France; in 1812, it was danced in London. English criticism was especially severe, and Lord Byron is quoted as regarding it with great disfavor. Yet it was destined to become the most notable round dance of the Nineteenth Century. At Viennese balls it was at first danced quite slowly, but throughout its history there has been no fixed rule for the quickness or slowness of the step; the lively hop waltz, the slow graceful glide, or some modification of either, has each in its turn been the prevailing fashion of a locality or a season.

Notwithstanding the many phases through which this dance has passed, the original is still preserved in the villages of Austria and Bavaria, and on the occasion of a village fete is danced, under various local names, but in the old manner and to the slow rhythms that were copied by Mozart, Beethoven and Schubert when they composed waltzes for the elegant balls given in Vienna. A description is given of the early form of the dance as witnessed in Frankfort, in 1800.

The man placed the palms of his hands lightly against the sides of his partner, not far below the arms. His partner placed her hands upon his sides in a similar manner, and with as great velocity as possible they proceeded to turn around and gradually whirled around and around the room.

Waltz music was originally written in three-four or three-eight time, in two sections of eight measures each. Mozart and Beethoven are notable contributors to this earlier form. A change was effected by Hummel, who wrote a waltz for the opening of a concert hall in Vienna, in 1808.

His waltz consisted of nine numbers. He strung together several of the sixteen bar sections, added secondary movements called trios, and ended with an extra finish, called a coda, a musical term which means a conclusion or tailpiece, from the Latin cauda, a tail. The credit of laying the foundation of the modern

warble

waltz form, however, is really due to Schubert, since it was through his influence that it became of real musical value. Although in the main, he still followed the sixteen bar form, he also made original extensions and improvements, and far surpassed the work of his predecessors.

But while Schubert influenced the dance composers, leading the way for Lanner and the elder Strauss, it is to Weber that the chief credit is due for the use of the waltz form in strictly classical music, both for voice and piano, unaccompanied by dancing. Many fine examples remain in the works of Chopin, Rubinstein Brahms and other modern German writers.

At the opening of the Nineteenth Century waltz music, for dancing, seemed to lie almost entirely within the province of the Viennese composers. Johann Strauss, the elder, introduced the fashion of naming waltzes. At his death, in 1849, he left one hundred and fifty-two waltzes. His son, Johann, composed nearly four hundred waltzes. They are impregnated with the gaiety and vivacity of Viennese life, and have been popular in all countries. The most noted, The Beautiful Blue Danube, was played in Vienna on all joyous occasions, and became popular as a national hymn. The French composers have used the waltz chiefly for operatic performance. In Paris, in 1800, Gardel introduced into one of his operas a beautiful ballet in waltz form called La Dansomanie, the dance madness. England is lacking in waltzes of real musical worth.

Waltzer (väl'-tsër) Ger. n.

Waltz.

walynka (vā-lēn'-kā) Rus. n.

A Russian name for the bagpipes. Same as walnica.

Walze (väl'-tsë) Ger. n.

Weihnachtslied (vī-nākhts-lēt) Ger. n.

A Christmas carol or Christmas hymn.

weight of wind

See wind-gauge.

weinend (vī'-něnt) Ger. adj.

Weeping.

Weise (vī'-zě) Ger. n.

1. Manner, way; also as a suffix in compound words *weise* is equivalent to wise.

2. Tune, air, melody.

weisse Note (vīs'-sě nō'-tě) Ger.

White note; an open-faced note, such as the whole note, semibreve, or half note, minim, in contradistinction to notes with black heads, such as the quarter note and all notes of still shorter duration.

weite Harmonie (vī'-tě här-mō-nē) Ger.

Wide or extended harmony; open or dispersed harmony, in which the intervals are wide, as opposed to close harmony.

well-tempered

This expression was used by Bach in his Well-tempered Clavichord, which was a collection of composi-

Wettgesang

tions exemplifying the practical use of equal temperament in every key of both modes. See equal temperament.

Wellatur (vēl-lä-toor') Ger. n.

A system of rollers: the mechanism on an individual keyboard, by means of which the keys on being pressed with the fingers can control the pipes or group of pipes.

Welle (vēl'-lē) Ger. n.

Roller.

Wellenbrett (vēl'-lěn-brět) Ger. n.

Roller-board.

Welsh-harp

A harp furnished with three strings to each tone, and originally used in Wales.

Welsh triple harp

See Welsh harp.

weltlich (vēlt'-līkh) Ger. adj.

Worldly; secular.

weltliche Lieder (vēlt'-līkh-ě lēd'-ēr) Ger.

Secular songs, as opposed to sacred songs.

wenig (vā'-nīkh) Ger. adj.

Little; used with *ein*, adverbially, a little, rather; as, *ein wenig stark*, a little loud. *Ein wenig* is equivalent to the Italian *un poco*.

wesentlich (vā'-zěnt-līkh) Ger. adj.

Vital; intrinsic; essential.

wesentliche Dissonanz (vā'-zěnt-līkh-ě dīs-zō-nānts') Ger.

An essential dissonance: a dissonant tone constituting part of a chord, as opposed to a dissonant passing-note or changing-note.

wesentliche septime (vā'-zěnt-līkh-ě zěp-tē'-mě)

Essential seventh; the dominant seventh: one of the principal chords of any key, and more fundamental in harmony than any other seventh chord. See also dominant seventh.

Wetterharfe (vēt'-těr-här'-fě) Ger. n.

Literally, weather-harp: the Æolian harp, so called because the wind causes its strings to sound.

Wettgesang (vēt'-gě-zāng) Ger. n.

A contest in singing; a singing match.

wheel

wheel

The refrain or chorus of a song; probably so called because of its constant return after each verse.

whiffle

Old name for a fife, or small flute.

whipping bow

In playing bow instruments, such as the violin, a swift and abrupt attack of the bow, producing a sudden strong accent.

whistle

Any instrument producing a whistling sound. They are of various shapes and sizes, but embody the same principle, that of directing a stream of air through a tube in such a manner that it is sent against a sharp edge which cuts it in two, thus producing the sound.

white keys

The lower row of keys on a keyboard for the fingers, such as that of the piano, of which when sounded in succession give the tones of the so-called natural scale of C major. In old kinds of keyed instruments this row of keys was black, the upper row being then white, instead of black as in the modern keyboard.

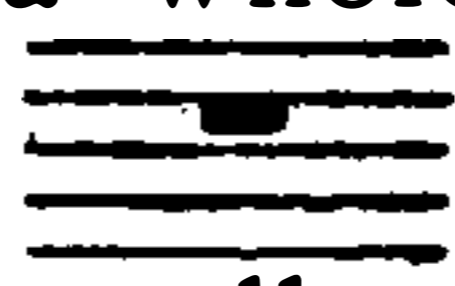

white note

A note having a white or open head; the whole note and half note are white notes.

whole note

A semibreve, the longest note in common use for musical notation and the standard unit of measurement of time value, all notes of shorter duration being usually named and reckoned as fractional parts of the whole note.

whole rest

A rest equal in length to a whole note; a semibreve rest. Also  used to denote a pause consisting of a whole measure, regardless of the time value of the measure.

whole shift

In violin playing the third position of the hand in relation to the fingerboard, in which the first finger of the left hand occupies the place belonging to the third finger in the first position. See also, shift, and shift, whole.

whole step

A major second: a progression from any given note to the next but one in either direction. See also step.

whole tone

A term loosely and misleadingly

winch

used to express the interval more correctly called a whole step or a large second. The whole tone, in this sense, is equal to two half tones, or half steps, being the interval between any two adjoining keys of the piano. Thus C to C sharp is a half tone; C to D a whole tone; or E flat to E a half tone; E to F a half tone; E flat to F a whole tone.

wie aus der Ferne (vē ows dēr fēr'-nē) Ger.

As from a distance.

wie oben (vē ō'-bēn) Ger.

As above: a direction to continue in similar manner.

wie vorher (vē fōr'-hār) Ger.

Resounding, ringing again; resonance, echo.

Weiderrückhalten (vē'-dēr-tsoo-rük'-hāl-tēn) Ger. n.

Repeated retardation; a repeated slackening of the time.

Wiegenlied (vē'-khēn-lēt) Ger. n.

Cradle song; lullaby.

wina

A Hindoo instrument with a bamboo body, fastened to which are two large gourds; attached to these and stretched between them are strings under which are bridges. The performer sets the strings in vibration with his fingers, and by pressing them down into the bridges produces the various tones.

winch

A lever placed within the barrel or hand organ, by means of which the bellows is operated.

Wind**Wind** (vĭnt) Ger. n.

1. Air in motion, when supplied to the interior of an instrument by artificial means, such as the operation of an organ bellows or the breath control of the player on such instruments as the horn, flute, trumpet or oboe.

2. A collective term for the wind instruments in an orchestra, used in compounds; as wood-wind, the wind instruments of wood, and brass-wind, the wind instruments of brass, more generally, however, termed simply the brass.

wind

To sound by blowing: to give a prolonged sound or signal, as on a horn.

wind band

1. A band of wind instruments, also the performers on same.

2. The wind instruments in an orchestra; also, the performers on same, or the parts of the music scored for such instruments.

windchest

A box or chest situated immediately below the pipes of an organ, and holding the compressed air until it is admitted to the pipes.

wind gauge

A contrivance for measuring the weight of the wind which is admitted to any stop or group of pipes in the organ. The measure of the tension is exhibited in a U tube, in which a column of water can rise to the height of three inches. Consequently, the technical expression, that a stop can be voiced on a three, six or ten inch pressure, has grown into existence and means that this degree of wind pressure is needed to sound the pipes.

Windharfe (vĭnt'-här-fě) Ger. n.

Wind harp: the Æolian harp.

Windharmonika (vĭnt'-här-mō'-nē-kä) Ger. n.

Æolodion.

wind instruments

All musical instruments the tones of which are produced by the vibration of air set in motion either by means of bellows, such as the organ, concertina and harmonium, or by the lungs and mouth of the player, such as the flute, clarinet, and others.

Windlade (vĭnt'-lä-dě) Ger. n.

The windchest or air reservoir in an organ. See windchest.

wind orchestra

See orchestra, full.

wohltemperiert**wind trunk**

A wooden or metal tube in the organ, carrying the wind from the bellows to the windchest, where it is held in readiness for admission to the pipes when needed.

wind-way

A slit in the lower end of an organ pipe through which the current of air from the windchest passes in reaching the column of air within the pipe.

Windmesser (vĭnt'-mēs-sēr) Ger. n.

Wind gauge.

Windstock (vĭnt'-shtôk) Ger. n.

Literally, wind stem: the shell of organ pipes.

Windzunge (vĭnt'-tsoong-ě) Ger. n.

Literally, wind tongue: the tongue of a reed organ pipe.

winselig (vĭn'-zě-lĭkh) Ger. adj.

A plaintive voice; a complaining or whining voice.

Wirbel (vēr'-běl) Ger. n.

1. Whirl; rotation; whirling motion.

2. (a) One of the pegs, or movable wooden pins set in the head of the violin, or other bow instrument, by turning which the tension of the strings is regulated. (b) Plug used to close the top of a stopped organ pipe.

Wirbelkasten (vēr'-běl-käs-těn) Ger. n.

Literally, rotating case or frame.

1. The peg-box, or hollowed portion of the head of a bow instrument, in which the pegs are set.

2. A roll, on the drum.

3. Drumstick; equivalent to schlägel, but less commonly used.

Wirbeltanz (vēr'-běl-tänts) Ger. n.

A whirling dance.

wogend (vō'-gěnt) Ger. adj.

Waving; undulating in sound.

Wohlklang (vōl'-kläng) Ger. n.

Pleasing sound or combination of sounds; harmony; euphony.

wohlklingend (vōl'-klĭng-ěnt) Ger. adj.

Pleasant sounding: harmonious; euphonious, sweet-sounding, agreeable in sound.

Wohllaut (vōl'-lowt) Ger. n.

Synonym of Wohlklang.

wohltemperiert (vōl'-tēm-pě-rěrt) Ger. adj.

Well-tempered; said of a keyboard instrument tuned in equal temperament; the modern division of the octave into twelve equal intervals for the purpose of practical music.

yabal (yä-bäl) Heb. n.

A blast from the trumpet.

yambico (jäm'-bē-kō) Spa. adj.

Iambic, applied to verse. See also yambo.

yambo (jäm'-bō) Spa. n.

An iambic foot, a poetic foot consisting of a short syllable followed by a long syllable; represented thus: \cup —. See also iambic.

yang-ch'in (yäng-k'in) Chi. n.

An instrument having a trapezoidal body of wood, over which pass many

strings, often arranged in groups of three or four. The groups vary in number from twelve to twenty. Two small bamboo beaters are used in striking the strings.

yang kin (yäng'-kën') Chi. n.

A Chinese instrument consisting of a quadrangular box, over which are stretched a varying number of strings struck with hammers.

Yankee Doodle

Probably the origin of no song is more uncertain than is that of Yankee Doodle. That it was a derisive song against Cromwell, the tune for Lucy Locket Lost Her Pocket, an old Dutch nursery rhyme, or that it came

Yankee Doodle

from Spain or Hungary are a few of the origins attributed, and it is probably true that the tune originated as an English country dance partially resembling an old Dutch children's song. The earliest mention of it is found in the Boston Journal of the Times, for September, 1768, and it was first printed in Arnold's Two to One, in 1784. The words are said to have been written in 1755, by Dr. Schuckburgh, a surgeon in the French and Indian war. The song was suggested to him by the fantastic appearance of the colonial troops, in their rough and homespun garb, as contrasted with the regular English army. The original name was the Yankee's Return from Camp and the first verse ran:

Father and I went down to camp,
 Along with Captain Gooding;
 There we saw the men and boys
 As thick as hasty-pudding.

Though written in derision of Americans, the song came to be used by them. It was for a long time called the Lexington March, was played all through the Revolution, and later became a national air, though it has little to recommend it as such, except

zampugna

its simplicity. At present it is used principally as an instrumental selection, the words being little known and seldom sung.

yastio (yă'-tī-ō) Grk. n.

The Ionic mode, one of the modes in ancient Greek music. Also called Yonico. See also Ionic.

yo

The name given to the primitive flute used by the Indian. It is blown through the end.

yodel (yō'-dl) Swiss n.

The wordless songs of the Swiss and Tyrolese mountaineers, so called from the syllables to which the music is sung. They are characterized by many alternations between chest and falsetto tones. Also spelled jodel and jodler.

Yonico (yō'-nī-kō) Grk. n.

The Ionic mode; equivalent to Yastio. See also Greek modes, and music and church modes.

yue kin Chi. n.

An instrument of the Chinese, having a circular, wooden body and a short, slender neck. It is furnished with four or more silk strings, which are plucked with the fingers.

Z
